# CIHM/ICMH Microfiche Series. 

# CIHM/ICMH Collection de microfiches. 

The Institute has attempted to obtain the best orig'nal copy available for filming. Features of this copy which may be bibliographically unique. which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

Coloured covers/
Couverture de couleur
Covers damaged/
Couverture endommagée
Covers restored and/or laminated/
Couverture restaurée et/ou pelliculée
Cover title missing/
Le titre de couverture manque
Coloured maps/
Cartes géographiques en couleur
Coloured ink (i.e. other than blue or black)/
Encre de couleur (i.e. autre que bleue ou noire)
Coloured plates and/or illustrations/
Planches et/ou illustrations en couleur
Bound with other material/
Relié avec d'autres documents
Tight binding may cause shadows or distortion along interior margin/
La re liure serrée peut causer de l'ombre ou de la distortion le long de la marge intérieure

Blank leaves added during restoration may appear within the text. Whenever possible, these have been omitted from filming/ Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.

Additional comments:/
Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qul peuvent exiger une modification dans la méthode normale de filmage sont indiqués cl-dessous.

Seule édition disponible
Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image/ Les pages totalement ou partiellement obscurcies par un feuillet d'errata, !ne pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below/
Ce document est filmé au taux de réduction indiqué ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

Bibliothèque nationale du Québec

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol $\rightarrow$ (meaning "CONTINUED"), or the symbol $\nabla$ (meaning "END"). whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Québec

Les images suivantes ont êié reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformite avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la derniàre page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole $\rightarrow$ signifie "A SUIVRE", le symbole $\boldsymbol{\nabla}$ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent ètre filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite. et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

## P R E F A C E.

'TIIE prefent alarming difturbances in North A. merica exciting the attention of the natives of Britain, render any apology for the appearance of the following pages entirely unneceffary; the defign of which is to give a faithful defeription of the different countries known by the names of North-America and the Weit-Indics, their fituation, trade, extent, boundaries, and number of inhabitants ; the importance of which renders them fo interelting, both in the fyftem of commerce and of politics, as to make a particular defcription as neceffary as it is ufeful. The various changes that have occurred in the face of affairs in this part of the world, have rendered all former accounts of it ufelefs and contradictory to the prefent ftate : a new defcription was thercfore highly necefliry; and there being no work extant which gives a concife and genuine account of this part of the globe, as it now exifts, prompted the prefent Editor to attempt this performance, in compiling which all authentic accounts lain before the public with any authority, any ways relating to this fubject, have been confulted, and extracts made from a varicty of original minutes and

## P R E F A C

memoirs, on which dependance could be placed ; amongft which is the valuable Weft - India Atlas, lately publifhed by Meff. Sayer and Bennett, Fleetftreet; all which materials have been difpofed in as clear and concife a manner as the nature of the work would admit, or the extent of the naterials allow : its moft material occurrences have been remarked, and every memorable event inferted, which any way concerned the fituation of the colonies, as well as the principal rivers, mountains, towns, harbours, and their conditions, the nature of the climate and foil, its productions, trade, fhipping, \&c. But as many alterations are daily taking place, occafioned by the prefent unhappy difference between Great - Britain and her Colonies, it is hoped, when thefe alterations are not taken notice of in this work, it will be over-looked, fuch events having happened either fince that part was printed off, or before any account of them arrived in England.

## INTRODUCTION.

BEFORE the invention of the marincr's compars there was no probability of any great improvements in navigation, or of the difcovery of any land remote from the continent of Europe. But the amazing progrefs made in the difierent branches of litcrature, and arts, in the fifieenth century, enabled feveral ingenious men to make many valuable dificoveries, and prored a fortunate ara to fociety; nor were they long without their proper effects. Indeed, from the invention of printing, 14.41, may be dated the period from whence learning had its greateft encouragement. Soon after this, difcoveries in naxigation began at the Canary Incs, and a few years after at the Ciape de Vcrd Inands. Theie liuceffies animated both the men of genius, and the enterprizing feamen, to carry their fpeculations into actual pratice; and teing furnihed with fuch an infrument, they boldiy ventured to fail on the pathlefs ocean, and made excurfions from the European coalts; in hopes of difcovering new countrics. Various expeditions were undertaken, feveral of which proved abortive, but even thefe furnithed ubfervations of the greatelt importance to future navigators; as it is generally allowed, that one of there voyages furnifled Culumbus with the firft idea of thofe extentive difcoveries he afterwards accomplifhed. A notion at that time prevailed, that a great part of the terreftrial globe was undifooverd, which opinion was fupported by the writings of the antients; and this engaged the attention of feveral Princes, and increafed the defire of difcoveries. Till the end of the fificenth century, the whole known terreftial world extended no farther than Europe, Afia, and Africa. Bur, however ftrongly the notion prevailed, that there was land to the weftward of Europe, none undertook to prove the truth of it till Chriftopher Columbus appeared, who being perfuaded that there was another continent on the weft, or at leaf that
he foould reach the caftern thore of the Indies by fleering so the weltward, applied to the fate of Genoa, (of which city he was a native, of an obfoure family, for affiftance to carry his fcheme into execution, but had the misfortune to fee his propofil rejected, and himfelf ridiculed. Vexed at the difappointment he met with fiom his countrymen, he refolved to get his project lain before fome more credulous fate, not doubting but the many confiderable advantages arifing from it would induce fome foreign Prince to liften to his propafals. Confident of the fuccefs of his project, and confcious of the fuperiority of his knowledge, he retired from his native country in difguft, and applied to the court of France, where he again found himfelf difappointed; but being of a perfevering difpolition, he was not thus to be perfuaded in drop his favourite plan, therefore offered his fervice to the King of Portugal, in whofe dominions he refided fome years; but here he found every mortifying objection thrown in his way, without a direct refufal, and every method ufed to provoke him to difcover all he knew, that they might ceprive him of the honour and advantage arifing from the difcovery. Fired with fuch ungenerous behaviour, he fent his brother Bartholemew to England, with propofals of the fame kind, to King Henry VlI. who chofe rather to be a careful manager of a kingdom, than hazard any thing in a chimerical fcheme, and therefore gave a cool reception to Bartholomew. Notwithftanding thefe mortifjing difcouragements, which would have overwhelmed the feheme of many other perfons; Columbus, who was Aliil fully perfuaded of the fuccefs of his detign, applied to the Court of Spain; where, after a delay of feveral years, and repeated difappointments, his plan was at length countenanced by Queen Ifabella, who pledged her jewels to raife money to carry it into execution, being the year that the Moors were expelled Spain; fo that two of the mott memorable events that ever happened to the Spanifh monarchy was in the fane year.

Columbus was furnithed with three veffels, and 120 men, under the pilotage of Martin, Francis, and Ditus Iinfon, three brothers, and failed from Spain Augurl 3, 1492, foon after which they made the ifland of Gomera, one of the Canary-inles, where they refrethed, and afterwards failed wefleard, without any guide but his own genius. la crolfing the Atlantic his crew grew difcouraged and mutinous with the length and uncertainty.

## I NTRODUCTON.

of the voyage, whon he appeafed and comforted with the cafual appearances of birds and floating weds. In this expedition was firt obferved the variation of the compafs, which made grat imprefion on the pilots of Columbus, who were fluck with terror on finding that their only guide had varied, and, they feared, left them; on which the crew inlifted on returning, and with loud and infolent fpeeches threatened to throw him overboard. However, they foon after difoovered land, having been 33 days on a tediou; voyage, duing which rime they had fen unthing but the fea and ky . "This land Columbus at firit hoped to be a part of the Indies he was in quelt of, but it proved a clater of ithond, fince known by the name of the Bahama or Lucayo ller, which are ahout 70 leagues $E$. of the coant of Florid. 'That on which they landed was Guanthani, on S: Satvator, now colled Cat-Inlons. Ho gave it the name of Sis. Salvador, to commemorate the faving, the thips crews, but it is not remarkable for any thing but this event. He took potfethon of this illand with grat ceremony, by erecting a crof on the fore; sreat maltitudes of the native inhabitants looking on unconcerned at the time.

Here the Spaniards remained but a hort time, the extreme poverty of the inhabirants convincing them that this was not the Indies they fought for. Sailing from hence fourhward, after fome dificulty, he difoovered $\mathrm{H}_{1}$ :paniola, inhabited by a humane and hofpitable peop'e, and, what crowned the whole, abounding in gold, which induced him to make this inland the principil objact of his defign, and where he planted a colony before he proreeded further in his difcoveries. From hence, having colleqed a large quantity of gold, and a number of curiolities, in order to enhance the merit of his fuccets, and building a fort for the defence of 30 men he left on the ifland, he fet fail for his return to Spain; and difoovered the Caribbees, having before landed upon Luba, and gained a tlight knowledge of fome other illands which lie feattered in fuch numbers in that great fea which divides North and South America.

On his arrival in Europe, from whence he had been airent fix months, he was driven by dittrefs of weather intn the Tagus, which induced him to vifit Lifbon, where, by convincing that court of their error in rejecting his p:opofals, which were crowned with fuecefs, he triumphed over his encmies; which now excited their envy, as they
faw thofe ndvantages they had flighted in the potieffion of mother. From thence he proceeded to Barcelona, where he eatered in a kind of triumph, exhibiting to public view ihe native Americans he had brought with him, :s well as the curiofities and riches he had collected, the admiral clofing the proceffion, and was received by the King and Queen not only with the greateft marks of segard, but the higheft applaufe.

The Portuguefe, near about the fame time, by directing their courfe towards the eaft, had paffed the Cape of Good Hope, and difcovered the Eaf-Indies. The rivalflip of the nations of Portugal and Spain mewed itfelf at this time only by the emulation each of their navigators had to make different difcoveries, and carich their countries with the foil of other regions before u:known. Ferdinand and Ifabell:, of Caftile and Arragon, at this time provided themfelves with the Pope's bull, to fecure to themfelves all the new iflands and counnies which were, or might be, difcovered by their navigators, under condition that the Gofpel fhould be preached theere by good ne\%. How far they complied with this condition may be judged $b y$ the cruelies practifed on the natives to difcover iheir siches; and of all the priells who have gone from Europe to thefe unhappy countries, Bartbolomerv de las Cafas, who firf propofed the introduction of laves from Africa, is the only one of whom hiftory has not tranfmitted the name and actions with execration. The Pope, by an irrevocable decree, diftributed the new-difcovered countries; but as they were continually encreafing, it was too troubleforne, as well as expentive, to be fo frequently applying to Rome : therefore the Spaniards and Portuguefe agreed to divide the globe by an imaginary line reaching from pole to pole, which the Pope confimed, and placed this famous line of markation in the Atlantic, about 100 leagues to the weft of the $A$ zores, which a few years after, by an agreement between Cattile and Portugal, was removed 270 leagues beyond this; by which all the difcoveries already made, or to be made to the eaft of this political meridian, were to belong to the Portugueit, and that on the weft to the Caltilians.

The honours which Columbus received were far from fatisfying him, a fecond voyage engaged his whole attention; and the fuccefs of his firft having removed every impediment, he was fupplied with 17 fail of thips, with every neceffary for making fettlements: and, having on buard

## I N TRODUCTON.

1500 men, he fet fail aghin Sept. 25, 1493, but on his alitial at IFifpatiola, he found the tort motally demoli'hed, and every one of his men that he had left there nain. This was a mortifying circumtance, but it did not prerent him from raking nore effectu. 1 meafures. He pirched on a more atrantageons fituation on the N. E. part of the ifland, where he erected a firong furtincation, and buitt a town, naming it labella, where he fetled a colony; before which time rhere were neither hories, oxen, Sherp, or fivine, in all America, or the Welt-Indies, (as it was aiterwards cailed) ; and it is not unworthy of remork, that eight fwine, and a fimall flock of black cattle carried thither by Columbus, was the whole fock which fupplied a counny which at prefent fo plentifully abounds with them.

But while he was exerting his utmolt abilities to reduce this weathy and extentive illand, and eftablifh the foundation of the Spanih moarchy in America, his enemies at home tricd every method to dettroy his credit with the, Epminh Monarch; and had fo far fucceted as to order his reand to juftity himfelf. As foon as he appeared in: Spain, having brought with him teltimonials of his fidelity, all their acculations and prejudices againit him difappeared; notwithitandiag which he had the mortification of experiencing numberiefs celays and impediments, before he was able again to fail, though on a difcovery of the lat importance to the Spanifh nation. Having procured, wilh difticuky, the detired forees, he ict fail on his third voyage, when the frit land he made was the ifland of Trimidada, on the coaf of Terra Fima; and afterwards. he proceeded to the continent, wherc he procured from the inhabitants gold and pearis in tolerable quantities, in ascomplifing which he had encountered great latigue and diticulties; and to increafe his meafinefe, on ais arrival at Hifpanola, he found the colony divided into parties. that had proceeded to deiperate extremities againit cach other; which by his prudent management he fuppreft, without being cha ged with fererity : but this his enemies. in Spain confrued to his difadvantage, intinuating that be: had a delign of courting the friendmip of the Indians and. difaffected people, and thereby eitablining an independency for himfelr, to the prejudice of his fovercign; which prom cured an order for his confinement, and the feizure of Lis effects. He, together with his brother, was ient, loaded with irons, into Spain, where they were cleared mith
honour ; and the Admiral was prevailed on to undertake a fourth voyage, which he began in Miy, 1502 , :hen he reached the Ithmus of Darien, where he hoped to have found a palfage into the South-Sea, but was difappointed, though convinced that the continent was of much greater value than the iflands, as it abounded in gold, and the in. habitants more civiiized them any he had ieen before. This voyage, hoovever, was the mof unfortunate of any he had ever experienced. He had fuffered confiderably in feveral hurricanes, and was ill treated by the Governor of Hifpaniola; and returning to Spain found his parronefs, the Queen, dead; and the King, of a diffembling difpo. fition, ufed every frivolous pretence to delay the reward of his labours, till death put a period to the Admiral's toils and vexations; who, to perperuate his ill-treatment, gave orders, before his death, to have the irons he had worn put into his coflin. Thus ended this great man, the difcoverer of the New World.

The fucceffes of Columbus proved his project not folely a chimera, the fame of which extended over Europe; and among others excited the attention and avaricious difpofition of Henry VII. of England, who, when it was firf propofed to him by Columbus's brother, declined embarking in an uncertainty, but in 1496 began to curn his thoughts how to convert it to his certain advantage; yet not being willing to be too enterprizing, he granted a patent to John Cabot, a Venetian, and his fons Lewis, Sthation, and Sancho, wherein he emponered them, with only five fmall veliels under Englifh colours, to difoover and take poiteflion of any countries which before that period had not been difcovered by other nations, let their firuations be E. N. or W. at the fame time he referved to himfelf a fifth of all advantages that fhould arife from fuch difcoveries; and in confequence of this the whole eattern coalt of North America, from Newfoundland to Florida, was foon atter difcovered, and taken poffelfion of in the name of the Britih Monarch ; and, for a confiderable time after, together with the ifland, which fill soes under that name, was called Newfoundland. It is from the difcoveries of the Cabots that Gicat-Britain derives her clain to North America.

In 1493, Americus Veiputius, a Florentine, under a $S_{p}$ anifh commiffion failed to the Weft-Indes, and vifited the continent of America, exploring the coalts of Paria, Caraccas, \&c. quite to the Gulf of Mexico; though we

## INTRODUCTION.

do not find he made any new difoseries, but being a man or addrefs, as well as an able terman, and an excellene geographer, he arrogared to himfelf the firf difcovery of the con ineut of America, and called it by his own name, though that honour was undoabtedly due to Columbus.

Peter Alvarez Capralis, admiral of a Heet belonging to Emanuel, King of Portugal, itecring for the Eatt Indies, in the year 1500 , was by a ftom driven on the conft of Brafil, which he firit difcovered, and which has fince proved of fuch infioite benefit to that crown. Hence is feems to follow, that, if Columbus had not gone exprefisly in iearch of the New World eight years before, it wnuld have been difovered, by chance, by this Portuguefe Admiral. But Bralil was ioon after more fully difcovered by Americus Vefpucius, who had quitred the fervice of Spain in dirgutt, and eutered into that of Portugal. The eaftern fide of the continent having been difcovered, it was not long betore the Spaniards made their way to the weltern ficle, carrying devaftation with them, and leaving an extenfive tract deluged with the blood of millions of the innocent natives, which began the conqueft of Mexico under Fernando Cortez.

It is caly to conceive the abfurdity of the imaginary line of marcation of the Pope, whole iguorance, and that of his geographers, had faid nothing ot an oppotite mar. cation, which ought naturally to have been 180 degrees diftant from the former. It follows, that either nation might comprehend the whole earth in his moiety, and that this curious fipecies of property only depended on the courfe which each followed.

This conlideration induced Magalhaens, or Magellan, a ducontented Portuguefe, to form a defign of taking away the Eaft-India iflands from that nation; which he did, by going there on the weftern courle, in the name, and under the authority of the Spanifh flag, when he allio dilcovered the South-Sea; but the Pope's line of divifion not being infringed upon, it occafioned no rupture between the two nations.

As nothing was then aitended to but the Indies, newly dicovered by the Portuguefe, all the new countries, in the new as well as in the oll hemifphere, received the nane of Indies. From hence came the original divifion and denomination of the Great-Indies, Old-Indies, or Eaft Indies, tor the true and antient India; and of Little-Indies, New-Indies, or Wefl-Indies, for America. The names of

## INTRODUCTON.

Eaft and Went Indies are the only ones now preferved: under the finf is comprehended the greater pait of Ala, \&c. the ferond only takes in the middle part between North and Somth America.

Geographess commonly divide the Contine:t of America into two parts, North and South; the rarrow ifthmus of Panama joining the wo immenfe portions. This divition, without doubt, is the moft fimple that can be conceived, and appears the moment we look at the form and difpolition of America : it is likewife that which was made by the firt Spaniards who went from the ithmus of Pamama to difoover the South Sea, fo ralied in oppofition to that from whence they came.

But this bay, fuimhled with innumerable iflands, improperly called, trom onc of its parts, the Gulf of Mexico, ought 10 be called the Weff-Indian Sea. 'So this valt Gulf the Spaniards have retained the name or Weft Indecs, leaving that of North and Sout's America to the two oppolite Continents. Under this name they comprehend all the coaft of the mand land which lies aifacent to it, as well as all the iftand, the chains of which feem to keep back the fea, which: bears with violence againt this part of America. In one of there illands os the molt northern chain, the little ine of Guahani, at prefont unimhabited, the difcovery was fir mace of the V eft Indies, and indeed of all Amorica, as before oberved. This Gulf is the center of the mor catentive as well as molt precious trade of America, and which furpafes, at leat in riches, that of the Ealt Iadie- Ine appelation of Went Indies, in its whole extent, lato been adoptoci by the Englifh, the Dutch, and all other navigators; and the merchaus, in conforming to it , have obligeti scographers to divide America into three parts, North Amelica, the Weit Indies, and South America, of whiti this Gazetteer comprehends the two fint divitions.

On viewing a map of the Weft Indies, you will find a fea comprized in thite great bafons, divided from each othen by large projections and tmkings-in, and feparated. from the Atlantic Ocean by a firing of iflands, both fmall and large. This divilon is that of Nature, and what prefents itfelf at the firt view. The tea of the Weit Indies ras moft likely formed by an irruption of the ocean always driving towards the weft : all the hores that look towards the eaft, as well as the illands, bear the marks of this continual action; the fidf are for the greater part

## INTRODUCION.

overflowed, and the others are torn and broke throughout. The warers, puhed forward and accumblated in the fea of the Weit Indies, flow back to the ocean very rapidly through the Gulf of Florida, which, being the largelt and principal outlet, keeps up their circulation, and admits of a conftant fupply

The moit northerly bafon is known by the name of the Gulf of Mexico; it is the largelt of the three we have jult taken notice of. Too the E. it has, for a boundary, the peninfula of Florida, with the ifland of Cuba; betwenn which is the outlet which leads to the Gulf of Florida, or Channel of Bahama: on the Cide of the Continent, it is bounded by the overflowed hores of Flnrida, Lomitiana, and of New Leon, with thofe of a conliderable part of Mexico, in which are contained the encire weft and north coalts of the peninfula of Yucatan. Thele two coafts are furrounded by a large chain of fhomels, fands, and rocks; the terrible remains of the lands the fea has fivallowed up.

This baton terminates at Cape Catoche, about 72 leagues from Cipe St. Antonio, the inot wetterly point of the ifle of Cuba. Between this frait, and a line drawn from Cape Gracias a Dios to Point Negril in Jamaica, Nature has formed the fecond baton of the Weat-Indian Sea; it is lefs than either of the others, to which it ferves for a communication. Its boundaries on the fide of the Continent, from Cape Catoche to Cape Giacias a Dios, are, all the eaftern fide of Yucatan, and all the north coaft of the province of Honduras. The waters, running continually out of this bafon into the Mexican Gulf, through a very narrow frait, at with the greatelt violence in the Bay of Honduras, which is full of overflowed iffands and rocks, fome under water, and fome jult level with it, fand-banks, \&c. and all the eaftern cont of Yucatan, which lies open to its action, is entirely torn and pierced with lagoons: fo that throughout the whole may be feen the ravages of a flow but continual inundation of the fea on the fhores.

The third balon is bounded on the W. by the Mexican coalt; on the S. by that of Terra Firma; to the E. and W. by chains of illands. The Spaniards, who firf difcovered the fea which is on the other fide of the ifthmus of Panama, gave it the name of the South Sea, and called that of which we are fueaking the North Sea. It has been fometimes called the Caribbean Sca, which name it
would be better to adopt, than to leave this fpace quite anonvmous, It fipeads from caft to weft, and the ocean breaks in through a great number of inlets between the Carribbee-Inands. Its waters, which may be faid only to flide aiong the coaft of Terra. Firma, beat upon the Mofquito fhore, and that of Colla Rica, which are directly nopofed to its action, with great violence : thefe coafts, of confequence, are overflowed, and cut into great lagoons and lakes. The ravages of the waters are equally fenfible in the fea, which is full of thoals and fands. 'The opening of this bafon, between Cape Gacias a Dios and Jamaica, is quire filled with fand banks, loaded with rocks and litie intands. The environs of the Cape, efpecially aboue 25 leagues off, thew nothing but overflown rocks, the temitle number of which often deceive the $e$ fiorts of the mariner who has got amongtt them.

This is pretty ncarly the phafical divifon of the WeftIndiam Sea. The divifon of the innans which bound it on the bide of the ocean appers more complicated; it is founded on their refpective firuations, or on the retations tha the courfe of natigators has produced. We fall begit: this divifion trom the fouth.

From the inth degree in the 18 th, of north longitude, is a crooked chain, lying nearly N. and N. N. W. of finall illands, of which the largeft is hardly 18 leagues long. Thele the firft difcoverers called the Antilas, or Forwari-Iflands, becaufe they really form a barrier advanced tou ards the ocean. The Spanilin navigators, who traverfed through the little channels that leparate them, to parts into the inner part of the Weft-Indian Sen, diftinguifhed them by the general name of Windward-Iflands, and at the fame time called thofe the Leeward-Ifands which lay from eaft to weft along the coaft of Terra-Firma, from the moll fouthern paflage to Cape Chichibacoa, or Coquibacon, if we adopt the vicious appellation of failors. 'The winds, which almolt always blow eafterly, fhew naturally this diftinction between the iflands which lie more to the eaft, and thofe which are more diftant. The Antilles, or Windward-Iflands, are fiiil called Caribbeeflles, fiom the name of the firt inhabitans, exterminated a long time tince by the chriftians of Europe ; the unfortunate remains of whom, mixed with fome negroes, whofe anceltors were freed by them and faved from finipwreck, have lately fallen under the yoke in the Mand of St. Vincent.

## I NTRODUCTION.

At the 18 th degree, the curvature of the Caribbean chain ends. This rounding comprehends feveral fimall illands, which the Englith call the Leeward Caribbees. At this ending the line bends all at once, and itretches out to the E. and N. W. This lengthening affiords us feveral divitions.

The iflands on the eaft, which are the molt confiderable of this fea, have been called, in their whole extenr, the Leeward-llands, for the fame reafon as thofe which we jult meationed on the coaft of Terra-Firma, and by fome the Greater Antilles, to dittinguif them from the Antilles properly fo called.

Before thefe great iflands, there ftretches our a feond chain of finall illands, long and narrow, placed in fandbanks, fome of which are of a prodigious lize. Tuis is the extenfion of the line to the N. W. to which they have the general name of Bahama-Iflands, or Lucagos.

The fubducifions of thefe different archipelagos arife from the particular groups of iflands in this long feries; to the name of Virgin-ifles diftinguishes that. clufter of inlands and rocks which fill up that part of the fea between the Leeward Caribbees and Porto Rico: and the names of illands of Efpiritu Santo, of Cayques, of Turkifh-Illes, \&c. have been given to feveral parcels of rocks and lands which divide the Lucayos.

This general view of the Weft-India Intands naturally leads us to fome reflections on their formation.

One cannot help regarding them as lands which have efcaped the irruption of water; and, which ever way we conlider them, we fee nothing but the remains of an immenfe Shipwreck. The Caribbees principally appear :o be only the fummits of mouncains, the lower chain of which, at prefent under water, is dillinguifhable in the cbanmels of different breadths, which feparate thefe illands: fome of them are 6 leagues broad, ochers 10 or 15 ; but in all of them we find a bottom at 100,120 , or 150 tathoms. There is between Grenada and St. Vincent a a little archipelago of 16 leagues broad, known under the name of the Grenadilles, or Grenadines, where in fome places there is only ro fathom. To this we may add, that, in all the Antilles, the principal mountains, which lie in the fame direction as the chain of inlands, are all volcanos, either now burning or extinguifhed; and we find, throughout, the marks of a fubterraneous fire, which mult have
joined its efforts to that of the ocean in the general irruption.
'Though philofophers try in vain to find out what was the firt calle of this irruption, or what was that of the particular inundations which have drowned whole countries, and left others uncovered ; or thofe exceeding great accidents, which have overturned a part of the earth's furface, and totally changed its face; it is ccrtain that thefe grand changes in nature are attefted by the moft authentic monuments. The knowledge and proofs of them are almoft cocval with the greatelt antiquity, and tradition has preferved them among the moft uncivilized and mont diftant nations. The principle of thefe alterations is to be found in the waters which furround the globe, and which aft in all directions on its furface. Europe has not fuffered lefs changes than the part of America we are now confidering: and the ancients, who lived nearer to the times when thefe ftrokes happened, were as well convinced of it as the naturalifts of our own times. "It was not enough, (fays Pliny, B. 6, ch. I.) for the ocean to furround the earth, and continually wear away the thores, it was not fufficient for it, by opening a paffage between Calje and Abyla, to have abiorbed a fpace as great as it already took up, not contented with having fwallowed up the lands which filled up the Propontis and Hellefpont, it has, betides, deftroyed a whole country begond the Botphorus, fo that it has at latt joined itfelf to the Paludes Meotides, which have only been formed at the expence of the regions they have overflown."

There particular deluges, in conjunction with great earthquakes, and eruptions coufed by the: volcanos and fulphureous earths, are fufficient to accommt for all the revolutions, both fudden and progrelfive, which change the furface of our globe. The continual agitation of oase element againft another, of the earth which fwallows up a part of the ocean in its intcior cavities, of the fea which tears off and carries away great portions of the land in its abyffes, is the great caufe of thefe inevitable changes. To this we may add, the motion of the fea from eaft to weft, a motion impreffed on it by that which carries the whole globe from weft to eaft: this motion is much greater at the Equator, where the globe, being more raifed, moves in a larger circle. Thus it is that the fea feems to break all the dykes that the land oppofes to it, and that it opene

## v up

 which in its '\% weft, whole to the s in a $k$ all peneitfelf a number of paffages, in places where the tops of mountains which by their great height efape being overthowed, compole at prefent the Caribbee-lhands. All the parts of thefe illands which are expoled to the eatt, that is, to the flock of the waters, are cut and wore away in their whole extent: the hatours and places of melter are on the oppofite fide, which is generally diftinguifhed by the name of Buse . Forre, while the cattern coalt is called C.abes-T゙erre.

In the fane manner Nature has formed the north-weft Jifnds, which we have comprifed under the general name of Lucayns-llles. Thefe being much more flat than the Canibbees, may be conlidered as the furfaces, not immerged, of feveral large fand banks. We may eafily conceive, that, the lands, of which they made a part, being upon the whole more elevated than thole from which the Caribbees have been delached, the water ought not to have cut them in fo precife a manaer, and has overlown then with a lefs quantity.

We might confirm thefe remarks, and feveral others, as well Ly the phyfical appearances, the difpotition of the fireams of water, \&c. as by the natural productions, which would all tend to prove that the illands of the Welt-Indies have been torn from the continent; but we think that thefe new proofs would be unnecellary in fo general an account as this: belides, the bounds we fet ourfelves will only futfer us to give a fuccind relation of each of the objects. We thall now go to confider the climate, productions, and commerce; which offer us fo large and fruitfula field, that we are lefs embarreffed in the choice, than in the manuer of comprifing, in a hort as well as interefting manner, the objects which prefent themflves on all fides.

There are but two feafons in the Welt-India Inands; the dry, and the rain:. By their lituation between the Equator and Tropic of Cancer, they are fubject to fome differences, which arife from the polition and qualities of the foil. The heat is continual; it increafes from funrife to an hour after noon, and decreafes as the fun defcends. The thermometer rifes to 44 degrees, fometimes even to $47 \frac{1}{2}$, above the freezing point. Nothing is more rare than temperate weather; fometimes, indeed, the 1 ky is covered with clouds for an hour or two, but there are never four days in the year in which they do not fee the fun.

Wherever the wind does not blow, one is forched;

## xiv

 INTRODUCTION.and yet all the winds are not cooling: it is only the eatterly winds which moderate the heat; thofe frum the fouth or weft afford little relief, but they are more rare, and lefs regular, than the eafterly. This eafterly wind is not perceived in the Iflands before nine or ten in the morning; it frefhens as the fun rifes above the horizon, and diminifhes as the fun defcends, and falls calm about the evening: but it is only along the coalts, and not in the open fea, that this wind conftantly moderates the exceflive heat of the climate.

The rains likewife contribute to cool the air of the Weft Indies. In general, thefe rains are fo common, and to plentiful, efpecially during the winter, which latts from the middle of July to the middle of October, that, according to the beft obfervations, they gield as much water in one week, as falls in our climate in a year. Thefe rains, fo falutary againft the heat, are, at the fame time, accompanied with all the difagreeable and bad effects of an excellive dampnefs: the truits rot, iron rufts from morning to night, meat cannot be kept fref longer than 24 hours, and it requires continual attention and precautions to preferve feeds until the feafon comes to fow them in the ground.

To thefe inconveniences of periodical rains fucceed thofe of hurricanes and carthyuakes. A hurnicane is molt commonly accompanied with rain, lightning, thunder, and earthquakes, and always with the molt terrible and deftruclive circumitances that the winds can produce. It tears up the largeft trees by the roots, throws down the moit folid buildings, and deftroys the plantations; you would fancy it was the laft convultions of Nature, juft ready to expire. As none of the hurricanes come from the eaft, that is, from the great fea, to which the Caribbee Inands are expofed, one is tempted to think that they are all formed on the continent of America, by the impetuous concourfe of oppofite winds. The earthquakes are not quite fo frequent as the hurricanes, but are fometimes more terrible and deftructive.

The climate of the Continent of the Weft Indies, that is, of thofe parts which lie near the fea, and which are comprifed between the fhore and the chain of mountains nearly parallel to it, throughout the greater part of this country, nearly refembles that of the Iflands; and, in general, there are only diftinguifhed two feafons, the wet and dry. The rains caufe periodical inundations, by the overflowing of the rivers; and the offenfivenefs of the ex-

## I NTRODUCTON.

ceffive moifure produced by them, is yet more augmented by the deftructive exhalations which they fpread in the air; the corruptions of vegrtibles, animals, and of dead fines, which the floods bring with them, the flagnant water collected in the low grounds, and in certain plains. of a prodisious extent, as in thofe near the banks of the Orunoco, fill add to thefe inconveniences. The great rivers fituated beyond the Tropic have alfo their regular inundations; but thefe arife from the melting of the foow in the difant monntains from whence they take their fources.

The regular winds likewife cool the lands within the Tropics, as they do the llands. On the coalt of the Caribbean fea, the wind is generally between the north and eaft. The weiterly wind, which upon the other coalts is perceivabic almolt all the year, is predominant here only in the months of December and January. In general, the winds are more regular upon the conafs which look to the fouth, than upon thofe whofe afpect is different; and every where they are fubject to paticularities $\boldsymbol{r}_{\boldsymbol{r}}$ which arife from the jettings out and in of the fore, more or kefs contiderable, and which render them more or lefs regular, and more or lefs fenfible.

The hurricanes are never felt in that part of the Continent oppofite to the fea of the Weft Indies, and earthquakes are very rare there; but they often fuffer from whirlwinds, called tornados: thefe are fudden, dangerous, and impetuous fqualls, which are commonly againft the regalar wind, and whofe duration is very fhort : they like. wife have fome periodical forms, produced by the northerly winds, efpecially in the months of December and. January. All the fides of the mountains oppofed to this tea do not afford one volcano; indeed, we fee fome peaks of hills, which look like decayed ones: it is towards the South Sea that all thefe burning mountains are collected together; and in this part it is, where earthquakes fometimes happen, and overturn the whole furface of the country, as in 1773, when the city of Guatimala, and many thoufand inhabitants, were fwallowed up.

A perfon of a humane difpofition, who confiders the climate in general of the Weft Indies, both on the Continent and in the Illands, cannot help deploring the infatiable defire of wealth that carries fuch crouds to the fe countries. This climate, at all times dangerous to a European, deadly during fix months of the year, infectious to flran-
gers accuftomed to a temperate air, to a convenient way of living, and to a wholefome nourifhment, becomes foon their grave. The moft moderate computations make the lofs of the Englifh who go to the Weft Indies, amount to four tenths; that of the French to three tenths. It is very remakable, that, on the Continent, which is much more unwholefome than the Iflands, the Spaniards do not lofe more than one tenth. This etfect of their conftituion, or temperance, gives them a manifelt advantage over the two other nations; and it feems as if Nature had deftined them to occupy the Weft Indies, to enrich the indull rious nations, who could not live there, with its productions.

We fhall place, conformable to the general fenfe of markind, gold and filver at the head of the productions. They do not, excepting the gold-mines of St. Domingo, properly belong to the Weft Indies, not even thofe of Mexico. The filver-mines of this country are, indeed, found near the fhores of the Weft-Indian Sea, as well as in the inland parts; but the firft are much poorer, and at prefent they do not work any which are not at a great diftance from the fea, for fear they might be expofed to the invafion of foreigners. The mines of Peru belong ftill lefs to the Weft Indics; but, as it is through their feat that a part of their product is brought to Europe, we may comprehend them in this accounr. The moneyers of Mexico make annually twelve or thirteen millions of piaftres, the fixth part nearly of gold, the reft of filver ; about half this comes over to Europe, a fixth to the Eatt Indies, a twelffh to the Spanifh iflands: the relt runs, by an infenfible tranfpiration into foreign colonies, or circulates in the empire. It is commonly fuppofed, that the mines of Mexico employ about 40,000 Indians, under the direction of 4000 Spaniards.

According to the molt moderate compuation, the Spanifh mines have fent into the metropolis, from 1492 to 1740 , that is, in the fpace of 248 years, more than ume millions of mitions of piaftres, the leaft part of which has remained with the original matters; the other has been fattered over Europe, or carried into Alia. From the firft of Jamany, 1745, th the laft of December, 1764, we are not reduced to conjectures. During this period, Spain has received, in paitres, $27,027,896$ of gold, and $126,798,258$ piaftres 8 reals of filver; thefe two united form a mals of $153,826,154$ piaftres and 8 reals. If we divide thi
way of foon ke the mount 1s. It ich is iniards their ft adas if ies, to there,
nfe of tions. ningo, ofe of adeed, ell as , and great fed to elong their e, we eyers ns of lver; Eilt $s$, by ircu. the $r$ the
fum in eleven parts, we fhall find that the common annual. returns have been $13,9^{3} 4,185 \frac{3}{4}$ piaftres. We ought to. add to thele riches thofe which are not regiftered, in order to avoid paying the duty, and which mav amount to about. a fourth more, and we fhall find that Spain receives annually from its colonies about 17 millions of piatres. We may: obferve, that thefe mi:es might yield much more, and that. they are inexhamible, fince there are new ones continually: forming.

After gold and filver, cochineal is the moth precious article of this part of America, if it is not the molt lucrative upon the whole. New Spain alone remains in pofferfion of this rich production, without which we could not die either purple or fearlet. Independently of what it furnihes Afia with, it fends every year to Europe about 2500 furrons, or bags, which are fold at Cadiz one with another, for 800 piattres each. It is a very conliderable produce, which cofts no trouble to the Spaniards.. They likewife have the beft indigo, the culture of which having been tried fucceffively in different places, feems fixed at Mexico, and St. Domingo, in the Weft-Indies, as it is at Carolina, upon the continent, a little more advanced to-wards the North. In the Spanith pofieflions are likewife found the belt woods for dying, as blood-wood, futtic, and what is called the wood of Campechy, or logwood. [ thall not mention feveral other productions of an interior kind, both by their nature and their quantity; they thall. be fpecified when we run over the particular poffeffions of the Spaniards.

Cacas is another precious prodution; of which the Spawiards carry on a great trade. They reckon that the annual crop of this fruit is moe than 100,000 lanegues, of. 1.10 pounds each. Thefe come moftly from the province of Caraceas; the fanegue, which there cofts feldom more than 6 or 7 piaftres in mercantile commodities, is fold to the public ai the tixed price of 38 . Europe receives from 50 to 60 thouland of thefe fanegues; the reft are diftributed in Mexico, Popayan, and the Canaries.

Sugar is the article in the Weft-Indies, aficr gold and filver, which deferves the molt attention: its produce, and. that of its extraets, known by the name of ram and molaffes, is more important than that of coffee, cotton, indigo, in a word, of all the others put together. It is almot peculiar to the illands; with that they procure every thing; peedful or agreeable to the inhabitants. As thefe iflands.

## xviii INTRODUCTION.

will be more or lefs fpecified, we muft referve, for thofe articles, the enumerations of the richnefs of their produce, and now go on to the manner of carrying on the trade in the Weftern Iflands.

Europe is continually enriched by carrying conflantly to America not only all the goods which it produces, or manufactures, but likewife thofe that its hips fetch from Afia and Africa. The direct commerce of its own commodities, and many imported from the Ealt-Indies, and whofe value has doubled in Europe, is without doubt, very great; and the only one which comes near it is that of the Negroes, which they purchafe, together with other com. modities, on the coaft of Africa, to fell them again in the Weft-Indies. This trade, to the difgrace of the age, has fo deeply taken roor, it is become fo neceffary to the prefent fate of affairs, and our wants have juftified, it in a manner fo abfolute, that it is now almoft a ridiculous com-mon-place to cry out againt the barbarity and cruelty of it. La Cafas, a prieft, gave the firlt idea to replace the converted Americans, who were fmothered by thoufands in the mines, with blacks who were infidels. This diabolical idea was but too much followed. The inhabitants of Africa fold one another; all the Europeans bought them : but, as they had not all mines to work, thofe who were obliged to make plantations began to employ Negroe flaves for that work; and foon all the iflands were cultivated by Africans, badly fed, half naked, beat, and ufed more unmercifully than the moft ftubbern beaits of our country. Every year about 52,000 laves are carried from Africa to the Weft-Indies. The Danes carry away abour 3000, the Dutch 5000, the French 13,000, the Englim have all the reft, which they diftribute in their colonies: they fell about 3000 to the French, and near 4000 to the Spaniards, the only people having any poffeffions in the Welt-Indies who do not go to markets for llaves on the Afican coalt.

This trade of Negroes is carried on freely by all the merchants of thefe different nations, as well as the commerce of Africa, or the mother country, with the refpective colonies: but, at the fame time, the intereft of each nation has made them exclude all others the entrance of their colonies; and it is only the moft preffing neceffity which has engaged the Englifh and the French to except fome places and fome certain goods. This exclufion might cafly be kept up by thofe nations which only have the polleffion of illards; but Spain, which has an immenfe

## I NTRODUCTION. xix

thore aduce, ade in
extent of country, of which it cannot fupply all the inhabitants, is put to anch more expence and caution: hence the number of guarda coltas continually cruifing on the American coats; and the contraband vifiels, till more notherous, who, not withtanding their vigilance, continually furnin the Spaniards with Europtan commodities, which the deficient fupply of their mother-coun ry makes them Itand in need of.

All the trade between Spain and the Welt-Indies is carried on in the royal and privileged fleets. The thips known under the name of galleons were alune employed for a long feries of years in this tratic: but, at prefent, the privileged fleets fets out from Cadiz every two, three, or four years, according to the demand or circumftances. They are commonly compoled of 15 or 20 merchant-ihips, under convoy of two men of war, or more, if there is any apprehention of danger. Wines, brandy, and oil, furm the moft buiky part of the cargo ; the richett is compofed of gold and silver ituifs, galoons, cloth, linen, filks, lace, hats, jewels, dianonds, and fices.

The fleet fets off from Europe in the month of July, or, at the lateit, in the beginning of Auguit, to avod the danger which the violent north wiads in the open fea might produce, efpecially near the ports, it it gould fet off in another feafon. The fleet juit fops at Porto Rico to tahe in refreflments, and gets to Vera-Cruz, from whence its cargo is carried to Xalappa, about a third of the diflance between this port and the city of Mexico. The time of the fair which is held there, is limited by law to fix months; it is, however, fometimes prolonged, at the requelt of the merchants of the commery, or of thote of Spain. The proportion of the metals and merchandize determines the gain or lofs in the exchanges; if one of thofe objects is more plentiful than the other, the feller or buyer are neceffarily lofers. Furmerly the royal treafure was fent from the capital to Vea-Cruz, to wait there for the fleet; but fince this key of the iNew World was pillaged in 1683, by the buccaniers, fo famous in the hiftory of the Welt. ludies, it remains at Puebla de los Angeles, which is 43 leagues off, till the arrival of the fhips.

When the bufinefs is finifhed, they carry on board the gold, filver, cochineal, furs, vanilla, logwood, \&c. The Heet then hapes its courfe towards the Havannah, where after having been joined by fome regifter-hips (the name given to merchant-hips, which, paying a certain fum to

## INTRODUCTIN.

government, have the liberty of carrying goods to the Spanifh fettlements), fitted out for the Bay of Honduras, and fome other ports, it fails to Cadiz, through the Guls: of Florida.

In the interval between one fieet and another, the court of $S_{\text {pain }}$ fits out two men of war, which they call Aznyucs, to carry to Vera-Cruz the quickfilver neceflary for the working the mines of Mexico. The Azogues, to which there are fometimes joined two or three inerchant-fhips, that are not allowed to carry any thing but Spanih fruits, in their return are loaded with the pice of the merchandizes fold fince the departure of the fleet, or with the produce of thofe which were left on credit. If there is any thing till left behind, it is commonly brought back by the mips of war, built at the Havanalh, and which always go to Vera.Cruz before they fail for Europe.

The commerce of the fouthern coalt is carried on by: private perfons invefted with a privilege for that purpofe. This trade was a long time opened to all the fubjects of the Spanifh monarchy, and is ftill fo to the Americans. Thofe of Europe are much worfe treated. In 1728 there was formed a company at Sebatiaa, in Bifcay, called the company of Caraccas, which has obrained an exciufive right of carrying on a correfpondence with this part of the Ncw-Word.

This fort iketch may give us a fufficient idea of the commerce of Spain, in the New. World. The Wett-Indies are the center of it. It is kept under by abfurd regulations, hindered by all kinds of obflacles, both natural and artificial, cramped by a thoutand chains, and yet this commerce is the richef in the univerfe. What then ought the countries to be, which fupport it without interruption ?

Before the arrival of the Europeans, in America, the natives had arts of their own; they had fome notion of painting, and alio formed pictures by the beautiful arrange.ment of feathers of all colours, and in fome places had built palaces and temples. Though the ufe of iron was unknown, they polithed precious flones, cut down trees, and made rot only fimall canoes, but boat of confiderable extent. Their latchets were headed with a tharp flint; and of flints they made knives. Thus, at the arrival of the Eurcpeans, they afforded a lively pifture of the primitive ftate of mankind in the intancy of the world. At that periou the arts and icences, and all the learning that had before long flourined in thefe more enlightened parts.

## I NTRODUCTION.

n the duras. Gulf court incucs, r the which .fips, fruits, chan$h$ the there $t$ back which parts.
of the earth, were entirely unknown. Thefe which had before travelled weft from Egypt to Greece, and from thence to Rome, had proceeded in the fame courle, and were daily gaining ground where ignorance had reigned triumphant, till checked by the unhappy differences which at prefent prevail between America and her mother-country. Thefe have fufpended irs progrefs; and for a while, it is feared, will be controuled by anarchy and confution. Happy will it be both for the 'Provincials and Bitons, when learning and arts are reinftated, and trace and commerce re-eftablifhed among the divided Americans.

North America is faid to contain $3,699,08_{7}$ fquare miles, and all Europe but $2,749,349$, fo great a difproportion is there in their magnitude; and in order to form a proper judgment of their lize, it may not be thought improper to give the principal iflands, and their contents in fquare miles, in the order of their magnitude.

The number of inhabitants in the Britif Colonies, by a lift publifhed at New-Jeriey, in 1765 , was then as folluws, fince which time they are very confiderably increafed.

## ACA

Ad.3.BACCO, or Providence, one of the Bahana Inands, in the Atlantis Ocean, fubject to England. Long. 77. W. lat. 2.4. N. See providence.

Abercokn, a fmall town in Georgia, about 5 miles from Ebenezar, 13 N. W. of Savannah, firusted on the river Savannah, and is the principal thoroughfare to Au$g^{\text {ulfa, from whence it is diftant } 91}$ miles.

Absngdon, a town in Philadclphia county, in Pennfylvania, fituated near Philadelphia city.

ABINGDON, a fmall town in Calvert county, in Maryland.

AbINGDON, a fmall town in the ancient colony of Plymouth, in New England.

Abigibis, a lake north of Nipiffing Lake, the N.E boundary of Canada, in New South Wales, and has communlcation with James'sbay, near Moofe Fort. Long. 78. 5. ldt. 593.

Abrojos, or Baxos de Babuca, a bank with feveral rocks and fmall iflands, E. of Turks Inland, in long. 69, 40. Jat. 21, 5. betucen which and Turks 1 fland is a deep channel for hips of any burthen, $s$ leagues wide.
Acadia, the name of a pro-

## A C A

vince in North-America, See No-va-Scotia.

Acapata, a town in the province of Chiapa, in New Spain, or Old Mexico. It is fituated on the river Tohafco, near the city of Chiapa, and not far from the bay Tecoantepac, in the South Sea.

Acapulco, a city in New Spain, on a bay of the South-Sca, 220 miles S. E. of Mexico, the chief port on this fea, and the principal mart on the whole coaft. Its harbour is fuperior to any on the coaft, being fo fpacious, that feveral hundred hips may ride in it, without the hazard of damaging one another. 'The mouth, which is defended by a low ifland, about 2 mile and a half long, and half a mile broad, having a uide and deep channel at each end; the weftermon channel is the narroweft, but fo deep that there is no anchoring; and the Manila hips pafs in that way: but thofe from Lima enter through the S. W. channel. This harbour runs $N$. about three miles: then growing very narrow turns Thort to the $W$. and a mile farther it terminates. The town flands on the N.W. fide, at the mouth of this paffage, clofe by the fea; and at the end of the town is a plat.

## A C A

form mounted with guns. Oppofite to the town, on the E.fide, is a high Arong caftle, with guns of a large fize. Ships commonly ride near the bottom of the harbour, under the command both of the caftle and platform. The port of Acapulco is by much the fecureft and fineft in all the northern parts of the Pacific Ocean, being a bafon furrounded by very high mountains; but the town is a mont wretched flace, and extremely unhealthy. The place is, hefides, destitute of freh water, and fo inconvenient, that except at the time of the mart, while the Manila /hip is in the port, the town has but few inhabitants. When the arrives in this port, is generally moored on its weftern fide, and her cargo delivered with all expedition; when the town of Acaptilco, from almoft a folitude, is immediately thronged with merchants from all parts of Mexico. The cargo being landed, the filver and the goods intended for Manila are taken on board, together with provifions and water, and the thip prepares to put to fea with the utmon expedition. Tinis city has high mountains on the call fide, and from the end of November to the end of May they have no rain; and it is fo hot here in January, when the fair begins, that the merchants are obliged to do all the hufinefs they can in the morning. When the fair is over every body leaves the place but a few blacks and mulatioes.

The chief-juftice has twentythoufand pieces of eight per annum, and the comptroller and other officers little lefs than that fum. And the curate, though allowed but a hundred and eighty pieces of eight, makes his place worth fourteen thoufand, by the burial-fees of ftrangers who die here, or on hoard the llups in the harbour. 'There is an hofpital here maintained by deductions from the pay of the foldicrs, and the alms of the mir-

## A L A

chants. There are four mountains, which appear above the harbour, the loweft of which is next to the fea, the higheft farther within land, and S. F. of that lies a voleano. On thefe mountains there are deer, rabbits, and abundance of wild fowl of feveral forts. Within a league to the E . of Acapulco is port Marquis, a very good harhour, where the fhips from Peru generally rmo in contraband goods. Lat. 17, 16. N. long. 106. 29. W.

Acasabastian, a river in the province of Vera Paz, in Mex:co. It runs into the Golfo Dulce, and has a town fituated on its banks, named alfo Acafabuftian. The fource of this river is not far from the Sonth-Sea.

Acazatula, a point of land and lea-port, in the province of Guatimala, proper in Mexico, on a bay of the South. Sea, about 4 leagues from Trinidad. It receives the greateft part of the treafiares from Peru and Mexico. In irs neighbourhood are three volcanoes.

Acomac. a comnty of Virginia, in North-America, being a peninfula; hounded on the N. by Maryland; on the E. and S. by the Oceall; and on the W. by the bas of Cheafapeak. Cape Charles is a the entrance of the bay, being the mof fomtiern promontory of this county.

Acouez, a favage nation of Indians, inhabiting part of Ca nada.
Alabaster, or Elcutbera, one of the Bahama or Lucaya Iflands, on which is a fmall fort and garrifon. It lies on the Great Bahama Bank. The foil of this ifland, and Harbour inand, which lies on the N. and of ir, $i$, better than Pro-videace-ifland, and prodices the greateft part of the pine-apples that are exported; and the climate is fo healthy that it is not uncommon to fee perfons there above 100 years old. Long. 76, 5, to 77. lat. 25 1026.

## A L, B

Adatamana, a confiderahle river in fieorgia, and is the boundary of that colony $N$. as the $\mathrm{Sa}_{\mathrm{a}}$ vannah is $S$. It rifes in tice ApaLachion Mountains, runs S.E. thro' Georgia, and falls into the Atlantic Ocenn below the new town of Frederica.

Aseans, a county in the province of New-York, containing a vaft tract of tine low land. Its chief commodities are wheat, peafe, and pine boards. The winters in this country are commonly fevere; and Hudfon's river freezes fo hard an hundred miles to the fouthward of Albany, as to bear heds loaded with heavy burdens. The great quantities of fnow that fall here are ferviceable to the farmers, not only in protecting their grain from the froft, but in facilitating the tranfportation of their boards, and orher produce, to the banks of the river.

Albany, the capial of the county of its name, in the province of New-York, 150 miles from that city, and 140 from Quebec. It was the place of treaty between our governors and the Indians dependent on the Pritih crown. It confilts of about 350 houres, built of brick in the Dutch rafte, governed by a mayor, recorder, fixaldermen, and as many affiftants; has a cityhall, and a fort, compored of a rquare, with four baftions. The greatell part is fortified only by palifadoes, and in fome places by fmall canmon, planted in block-houfes. It has alio a fheriff, town-clerk, chambert.in, clerk of the markers, conltables, and a marihal. The fur-trade at Ofivego is of confiderable advantage to this place. Las. 43. 10. N. long. 44. 29. W.

Alasyy, a Britifh fortrefs, in New fouth Wales, fituated on the rivir of the fame name, emptying ilfelt into Janes's-bay. Lat. 53 , 10. N. long. $8 \mathrm{I}, 20$. W.

Alaemarle, a county in Virginia, which has the Eluvanna flow

## A M P

on the fouth-fide of it, feveral branclas from which run up this county. It is bounded on the E. by Goochland county, and by a ridge of mountains is divided from Augufa county on the $W$. and it has Lonifa county on the N .

Albeatiatie, the molt Sonthern part of Nurth-Carolina. Sce Carolina.

Algoneuins, a favage natinn. inhabiting part of Canada, on the N. lide of Lake Huron; generally at war with the Iroquois.

Alkansas, a favage nation in Louifania, fituated $34^{\circ} \mathrm{N}$. latitude, on the weft fide of the river Miffiffippi, near a river of the fame name.

Ael-Saints inands near Guadeloupe. See Xititis.

Almarma, in New-Spain, Mexico. Sec Villa Ricca.

Amatseug, a fea-pors town at the mouth of the river G:anacos, that runs into a lagune, which em. ties itfelf into the Amatique Gulf, or Gulf of Honduras, in the province of Vera Paz, Mexico. The inhabitants are chiefly logwoodcutters, and on the $S$. of the gulf is a tract of land called Amatique Land. Long. 89. Iat 15. 23 .

Amelia, a county of Virginia, fituated among feveral rivers, hiving Cumberland county or the N . Prince George county on the E. Lunenburg county $S$. and $W$.

Amelia [sle, fituated about 7 leagues $N$. of St. Auguitin, on the coalt of $E$ Floricia. It is about 2 miles broad, and 13 long, and is within a league of $\mathrm{St}_{\text {. }}$ John's river.

Amilpas, two volcanoes in the province of Guatimala, in NewSpain, near the mountains of Soconufco.

Ampalla, a city and rea-port in the province of Guatimala, Mexico, lituated on the Gulf of Guatimala, in the Gulf of Mexico. It is 235 miles S. F. of the city of Guatimala, and carries on a brifk B 2

## A N G

trade in cochineal, cocoa, hides, indigo, \& c .

Amsterdam, New, a place in North America, firt difcovered by Hudion, and fettled by the Dutch. It lies on the bay and river formerly called Mantratte. Sce Tork, New.

Andalusia, New, a province ot lerra Firma, on the coaft of the Atlantic oppofite the Leeward IMands.

Andastes, a favage nation in Canada, bordering on Virginia.

Andover, a finall town in New England, in the province of Maflachufers - Bay and county of Effex.

St. Andres, an ifland on the Mofquito Shore, off the Pearl keys, in Lat. 12. 30 long. 82. 30.

Andros, iflands on the S. W. of Providence, in the Bahama 1flands. There the Spaniards called Ylas del Efpiritu Santo, and take up a fpace of 30 leagues long and 4 or 5 broad, interfected by a numher of very narrow paffages.

Anegada Isce, one of the Virgin Inands, and dependent on Virgin Gorla. It is about 6 leagues bong, is low, and almont covered by the fea at high tides. It has a point on the S. fide called Treafure Point. Long. 63. lat. 18, $35 \cdot$

Angelos, or Tlascala, 2 province of Mexico, extending to both the North and South Seas, having that part of the former which is called the Guif of Nexice on the F. the province of Guaxaca on the S. E. the Pacitic Ocean on the $S$. the province of Mexico Proper on the W. and that of Penuco on the N. from which it is divided by the siver Turpa, or Cavones. From one fea to the other it is 100 leagues; about 80 along the Gulf of Mexico, and 20 upon the South-fea coait. Its foil, climate, and product, are much the fame with Mexico Proper. On the $W$. fide is a chain of mountains of 18 Leagues, well cultivated; and

## A N G

another great ridge of mountains on the N. W. the neighbourhood of which rubjects it to Thocking tempefts, horrid hurricanes, and frequent inundations; yet this is allowed to be the mof populous country in all New Spain, which is partly afcribed to its having been originally an ally to Coriez, in the conqueft of Mexico, who obtained a grant of the Emperor Charles V. then alfo king of Spain, by which it is to this day exempt from all Scrvice or duty whatfoever to that crown; and only pays the king of Spain an handful of maize per head, as an ack nowledgment, which inconfiderable parcels, almoft 40 years ago, amounted to near 13.060 Guthels; for it produces fo much of that Indian corn, that from thence it had the name of Tlafcala, i. e. the land of bread, which name it gives to its principal town. By this means the towns and villages fivarm with Indians. Its principal towns are Acafuchithan, Achiachica, Tufpa, Zacatlan, Cazzeres, Naftla or Alinira, Torre Blancia, P'unta Delganda, Sampula, Xalappa, Puebla, Tepeafa, Cordova, Punta Brava, New Vera Cruz, \&c. They Speak the Spanifi tongue, and fcarce any other; are perfectly reconciled to the Spanifh cuftoms, and gratefut for the countenance and deference thewel to them above their fellow-provinces. It was anciently governed hy kings, till, civil wars ar fing in it, the people forned themiclves into an ariftocracy of many princes, to get rid of one. They divided the towns into different diftriets, each of which named one of their chiefs to refide in the court of Thafiala, where they formed a fensie, whofe refolutions were a law to the whole. Under this form of government, they maintained themfelves againft the lifiops of Mexico; and continued their ariftocracy till their reeeption of the Spaniards under Corta.

## A N G

Anguilla, or Snake Iland, fo called from is windings and irregular form, being 10 leagues in length, and three in breadth; 25 leagues N. W. of Barbuda, and 15 from St. Chriftopher's. It is the moft northerly of all the Caribbee inands, pofleffed by the Englith; and may eafily be feen from St. Martin's, which is about 18 leagues to the E. The country is woody, but perfectly level. It abounds with tame cattle fince it was flocked by the Europeans, of which, before cheir coming, was to be found only the oppuflum. The Englifh fetted here in 1650 , in a fruitful foil, where they cultivated tobacco, planted corn, and bred cattle, for which purpofe they brought a fock with them; but were, as they are now, very poor. Some have removed hither from Barbadoes, and others of the Englith Caribbee 1hands. They fubfift mofly by farming, planting Indian corn, and other kinds of hulbandry, but plant very litule figar or cotton. 'This poor ifland has been frequently pillaged by the French. The number of militia fome years ago was not more than fouricore, and yet they repulfed a body of Erench in 1745, to the number of Icoo, who made a defcent, and marched up to a breaft-work, but were fo well received by this handful, that they were forced to retire with the lofs of 150 men, befides colours and fire-arms. The climate is very healthy, and the inhabitants ftrong and vigorous. The exports, in 1770, amounted, in fugar, rum, and cotton, to near 60001. 38001. of which was for Great Britain, and the reft for N. America. Long. 62. 10. lat. 18.4.

Cape Anguilif., a point of land in Newfoundland, on the W. fide in the Gulf of St. Lawrence, 6 leagues N. from Cape Ray; the S. W. extremity of the illand in Jat. 47, 57.
dNGUallaBansamdISLAND,

## A N N

E. of the Great Bahama Bank, and N. of the ille of Cuba, Long. 78 , 10. 19 79, 30. lat. 23, 30. 1024,10.

Annapolis, the chief town of the county of Anne-Arundel, in Maryland. It was formerly called Severn, and by an act of the affemby, 1694, was made a porttown; and a collector and naval officer were ordered to refide here, at which time it was called Annapolis. The county-court was removed to this place, a church was built within the port, which was made a parifh, and, in the ycar 1699, the port of Annapolis was made the chief feat of jultice within this province, for holding affemblies and provincial courts; and all writs, pleas, and procefs, returnable to the provincial court, or to the court of chancery, were made returnable to Annapolis. The aftembly paffed an att for founding a free-fchool. called King William's School, and ordered others to be erected here under his patronage, and the archbifhop to be their chancellor. Truftees were alfo appointed under the names of rectors, truftees, governors, vilitors of the freefchools of Maryland. But the defign of this good bill never took effect. The county-court for orphans is kept there the fecond Tuefday in September, November, January, March, and May. The records of the county of Anne-A rundel are removed to this town, which now confifts of about 150 houres, not having fourifhed according to expestation; and white planters and merchants affect to live Separately here, as they do in Virginia, there is little profpect of there being any flouribing town in the province. It is not paved, and the flreets are very irregular. It is fituated on a peninfula formed by the river Se vern and two finall creeks, and aqfords a beautiful profpect of Chea-fapeak-bay, and the E. Thore beyoud it. Lat. 39, 5, N. long. 26, $30, \mathrm{~W}$.

## A N N

AnNapolis-Royal, a town and bay in Nova Scotia, called Port-Roya! by the French, when M. De Points came over from St Croile with a French colony, in 2605. It had the name of Annapolis in honour of Qucen Arne, in whofe reign it was taken by the Englifh under Colonel Nicholfon. This harbour is of difficult entrance, befides the great fogs here ; fo that only one Thip can pars i.t or out at a time, and that with the greateft precaution, the hip being obliged to go fternmoft, by reafon of the froug currents and tides here. This difficulty excepted, Na sure has farce omitted one thing to render it the fineft harbour in the world. It is two leagues in length, and one in breadth, having a fmall inand, called Goat Ifland, almoft in the middle of the bafon, which is faid to be large enough to contain all the nips in America. Its depth of water is no where lefs than four or five fathoms; the bottom is every where very good; and Thips may be fecure in it from all winds. The town is not large, hut has fome very handfome build. ings, though the generality are but two ftories high. The old fortifications were demolifhed by the Englifh, and new ones erteted, with lines, and four baftions large and well faced, with a deep dry moat, a covered way, and counterfcarp, 2 half-moon, and outworks detached from the body of the place; fo that it is in little danger from an attack. There are alfo feveral batteries of guns to the fea, fo dif. poied as to keep off an enemy; nor can it eafily be attacked but by a bombardment. At the bottom of the bafon is a point of land, feparating two rivers, where the tide sifes 10 or 12 feet; and on each fide are pleafant meadows, which in Spring and autumn are covered with all forts of frefh-water fowl. The place fublifts by the traffic of $\mathbb{k}$ ins, which the ravages bring down in

## A N T

exchange for European goods. it has alfo a pretty good trade in lum. bet and fifh. The governor refides here with a garrifon, which commonly confifts of soo Englifh. Lat. 44, 50, N. long. 65, 5, W.

Cape Anne, a confiderable point of land, with a harbour, in Maffachufets-Bay, New England. Lat. 42, 45. loing. 70, 17 .

Princess Anne, a county in Virginia, on the fea coalt, of which Norfolk is the principal town. It has the Back-bay, which runs through the Curratuck into the Atlantic, on the S. the Atlantic on the E. Cheafapeak-bay on the N . and Norfolk county W.

ANNE-ARUNDEL2 a county in Maryland, N. of Charles county, S. of Ealtimore county, and is watered by the river Severn, on which ftands the capital Annapolis.

St. Anne's, a port in the lle of Cape- Breton and Gulf of St. Lawrence, on the $E$. fide of the ifland, where the filhing-veffels often put in. Long. 60, lat. 47.

ANSON, an inland county of North Carelina, with the old boun-dary-line of South Carolina on the S. and the Catalsaw nation and town on the W. Mecklenburg county on the $N$. and Bladen and Cumberland counties on the $E$. but is without towns.

Anticosti, a barren ifland in the mouth of the river St . Lawrence. Lat. 49, 30, N. long. 62, 36 , W.

Antigua, or Antego, one of the Caribbee Inands in the Welt Indies, fituated 60 miles to the eaftward of Nevis, and St. Kitt's. It is almoft circular ; being about 3 leagues long, and 4 broad, and 6 leagues in diameter, and near 60 miles in circumference, containing 108 fyuare miles, equal to 69,277 acres. It is more noted for good harbours than all the Englih iflands in thefe feas; yet fo incompaffed with rocks, that it is of dangerous accets in many parts of

## A NT

rAntego, one nands in the Weft 60 miles to the vis, and Sr. Kitt's. ular ; being about and 4 broad, and meter, and near 60 ference, containing s, equal to 69,277 ore noted for gool eas; yet Englith eks; yet fo incoms in many parts of
it, a ledge lying all along the north Gide of it, near two miles from the thore. It has fix remarkable harbours. 1. Five-lnand harbour on the weft lide of the inand, fo called from five fmall illands that lie to the weft of it. 2. St. John's harhour, due north from the former, is a fort of double harbour, the bett and moft ufed in the ifland. There is a fandy bar acrofs the mouth of it, which runs from the N. point of the entrance, where the fort flands, firetching S. W. to the oppofite point. On this bar there are buttwo fathom and half water, and but two in the N. point. Befides the fort at the mouth of St. John's river, which is monnted with 14 cannon, there are feven other batseries. 3. Nonfuch harbour, a Spacions bay at the E. end of the harbour; on the N . fide of the harbour it is foul and rocky. 4. Willoughby bay, two leagues S. E. from the laft harbour, has a wide month near a league over, but there is a fand or hool which almot blocks it up, from whence another point, called Sandy-point, with an ifland in it, Aretches off. Between thefe, however, is a good entrance, and very good riding in every part of it. 5. Englifh harhour. And 6. Falmouth harbour to the S. W. At the hottom of Falmonth harbour, lies Falmouth town, defended by fort Charles, and Monk's Hill fort, which has a magazine.

The climate is hotter than Barbadoes, and like that fubject to hurricanes. The foil is randy, woody, and without one brook, there being few fprings in the jfland : the inhabitants collect the rain in cifterns and ponds, as well for their own ufe as their cattle; it is remarked that this water is very Jight, extremely pure, and very wholefone. The foil is much varied, but in many places it is a fine black mold, in others a clay, pretty Tiff but fertile. The ifand proWuces 16000 hogheads of fugar,

## A NT

one jair with a nother, but does not make half to much rum in proportion to its fugar, though both may be improved by due encouragement. They do not plant much tobacco, though what they do is very good; the wild cinnamos grows in their low lands, or favanna woods. It aloounds in venifon, black cattle, fowls, and mof of the animals in common with the other iflands. The number of inhabitants are computed (Englifh, white, and negroes, included) at about 34,000 . It was difcovered much about the fame time with St. Kitt's, in 1639 . The firf grant of it from the crown appears to have been from Charles II. about 1663, to William Lord Willoughby of Parham ; and a colony was planted in 1666. It was furprifed by the French in the fame year, and furrendered to them. It made no figure in commerce, till Colonel Clirifopher Codrington, lieutenantgovernor of Barbadoes, c: me and fettled here in 1690 . There happened a molt dreadful hurricane here in 1707, that did vaft damage to this inand and Nevis, more than to any of the Caribbees. In October, $1 ; 36$, was the plot of Court, Tombay, and Hercules, three Indians, who had conveyed gunpowder under the ball-room, where the governor was to give a ball ; but it was happily difcovered, and they were all executed. It has a lieute-nant-governor, a council, and its affembly confilts of 34 members. It is divided into 6 parifhes and 11 diftricts, of which 10 fend $2 \mathrm{mem}-$ bers each, and St. John's 4. The number of veffels which enter yearIf is abont 300 . In 1770 they exported to the value of 446,000 . fterling, including 5001 . cotton, the reft fugar, molaffes and rum. Lat. 15 30.N. Long. 57.45. W. Antilees, a clufter of illands in the Wett Indies, diftinguibhed into Great and Small. The Antilles lie from 18 to 24 degrees, north

## A R T

latitude; are diftiuguifhed into Windward and Leewardillands, and lic in the form of a bow, flretehing from the coalt of Florida, north, to that of Brafil, fouth; the mont remarkable of them are Cuba, Jamaica, Hifpaniola or Domingo, and Porto-Rico. See each under its proper article.

Antiejera, a fea-port town in the province of Guaxaqua, in Mexico.

Aralachian Mountains, or Aligany Mountalns, an extenfive chain of mountains, running parallel with the A:lantic ocean, and about 150 miles diftant from it.

Apalachicola, the river that is the boundary between Eaft and Weft Florida, which rifes in Carolina, and falls into the ipulachian bay, near St. George's ille and Cape St. Blaze.

Apalachya, the name of a town and harbour in Florida, $3^{\circ}$ leagues eaft of Penfacola, and the Same weft from the river Del Spiricu Santo, which falls into the Gulf of Mexicc, at the N. W. end of the peninfula of Florida: on both fides of it live the feveral nations calici the Apalachian Indians.

Appreisland, a fmall uninhabited ifland in the river St. Lawrence, Canada; on the $S$. fide of the river, between Bafque and Green iflands. It is furrounded by rocks, which render the navigation dangerous.

Arcas, anifland in the Gulf of Mexico, in the bay of Campechy. Lat, 20.0. Long. 92. 50.

Arazibo, one of the principal places in the ifland of Porto Rico, in the Weft Indies, yet has bue few inhabitants, or little trade but fmuggling.

Armouchiriois, a wild nation of Indians in Canada.
aruba, a little ifland in the Weft Indies, belonging to the Dutch; from whence they bring

## A VE

provifions for their garrifons and negroes. It is one of the Little Antilles, 14 leagues to the weft of Cureço. It is uninhabited, and produces little belides corn and wood.

Arunder., a towngip in the north divifion of New England, called Ne:w IIamplhire, fituated on the fea coart, and having the point of land Cape Porpus within its diftrict on the E. and Biddleford townthip on the N. E. with Wellstown townthip S. W.

Ashford, a town in the county of Windham, in Connecticut, New England.

Assinous, a favage nation of Indians, inhabiting the forefts of Cunada.

Astchixounipi, a vaft lake in New Britain, abounding with whales, and fuppoled to communicate with the Northern fea.
Atrato, a confiderable river, which runs into the Gulf of Mexico, near Carthagena.

Atteborough, a town in Briftol county, in the antient celony of Plymouth, New England, N. of Rehoboth. It is remarkable for its great increafe of inhabitants, houles, and trade, within a few years before the late difturbances; before which it was but an obfcure village.

Avalon, a peninfula at the $S$. E. corner of the infand of Newfoundland, which is joined to the ifland by a narrow neck of land that has Placentia-bay on the S. and Trinity-bay on the N. The E. part of this peninfula is incompaffed by the great bank, and has, befides the two former bays, the bay of Conception on the N. and the bay of St. Mary's and Trepalfy-bay on the S. It contains feveral excelient harbours, bays, and capes; among whom are St. Mary's, Pine, Race, Ballard, St. Francis, \&ce.

Aves, or Birds Island, in the Weft Indies, fiftuated in Lat. 15. 30. Long. 63. 15, naned 60

## A U G

from the great number of birds that breed there, yet is without 2 tree, which obliges them to lay their eggs in the fand. A hoal runs from hence to the iftands of Saba, St. Euftatia, and St. Chriftopher, which is about 2 leagues broad, and from 10 to 20 fathom Soundings.

Aves, another BirdIsland, anong the Litule Antilles, between the coaft of st. Jago de Leon, in Terra Firma, and the ifland of Bonaire.

Augusta, a fort on the river Savannah, in Georgia, which is a thriving place, where the traders from Carolina and Georgia refört to for trading with the Indians. It is fituared about 230 miles up the rivei Savanmah, which is navigable for loats. Roads are made from henre to the Cherokec Indian towns, on the W. of it.

AUGUSTA, an inland county of Virginia, fituated among the mountains which divide it from Albemarle county on the E. L.ord Fairfax's houndary. N. and by mountains S. and W. It has feveral rivers, and the great path from Virginia to Maryland paffes through it.

St. Augustin, a city in Eaft Florida in N. America, fituated on the Eaftern coaft of the peninSula, wathed by the Atlantic ocean, about 80 leagues from the mouth of the Gulf of Florida, or channel
of Bahama, and 47 from the town and river of Savannah. It is built along the fhore, at the bottom of a hill, in an oblong fquare, divided into four ftreets. Near it is the church and monaftery of the order of St. Auguftin. The caftle If called St. Jotin's fort, built of foft flone, has four baftions, a curtain 60 yards long, a pararet - mine feet thick, and a rampart 20 feet high, cafemated, arched, and tomb-proof. There are 50 pieces cannon, 16 of which are brafs, d tome are 24 pounders: it bas

## B A F

a covered way, and the town is entrenched with ten faliant angles. In 1586, Sir Francis Drake took it ; and, in 1665 , it was plunderea. by Captain Davis, the buccaneer. The Englifi and Indians of Caro. lina altacked it again in 1702, under Colonel Moore, who abandoned it after thiree months fiege, after piundeling and burning the country, leaving the ihips and fores to the eneiny, on the light of fome Spanilh cruizers; and marched hack to Charles-town, $3 c 0$ miles, by land. General 0 glethorp was the list who befieged it, in 1740; he hombarded both the sown and cantle, but was obliged to raife the fiege. Lat. 30 , 8, N. long. 81, 10, W.

S'r. Augustin's Port and River, on the coalt of Labrador, near the Araits of Belle-1Me, and oppofite to the bay of st. John's, Newfoundland. It is about 8 leagues from Great Meccatina Illand, and has two iflands in the harbour: about two miles S.W. runs a chain of fmall iflands, called St. Asguftin's chain, the ontermoft of which is a remarkable round fmooth rock. Long. 58, 50. lat. 51, 10.

AyENNIS, a nation of wild Incians, inhabiting part of Florida.

Azua, a little town in the ifland of St. Domingo, in the Weft Indies, on the Southern fide, belonging to the Spaniards, at the bottom of a deep bay.

## B

BAffin's Bay, a gulf fo called from one Baffin, who difoovered it in 1662 , in his attempt to find a North-weft paffage into the South Sea. This bay runs from Cape Farewel into Weft Greenland, and lies between the parallels of 60 and 80 degrees N. lat. It abounds with whales, effecially the apper part of it.

## B A H

Bahamalslands, called by the Spaniards Lucayos, take in, under this denomination, all the inlands in general which are to the North of Cuba and St. Doningo. The firlt difeovery of the New Woild hegan Oct 11, 1492, at Guanahani, or Cats Intand, one of them. They were then full of people, and the inhabitants were limple and mild, and lived happy in the midft of plenty. As they produce no gold, the Spaniards made no fettlement there, but they foon tranfported their inhabitants to the mines of St. Domingo, which they had almolt depopulated: and at the end of 14 years there did not remain a fingle inhabitant in the Bahanias. Then whoever chofe it, were permitted to occupy them, when the Englifh took polfeffion of them ; and Charles II granted all the Bahama lifes to the proprictors of Carolina, who nill clain them. They fent feveral governors, and built the town of Naflatl, which is now the feat of government, in the inland of Providence. The number of the Eahama lnands is very confiderable, and amounts to feveral hundreds, which hardly emerge out of an immenfe fea-bank; but, excepting about 15 , are in gencral very low and narrow; and others, for the molt part, are only fmall rochs, or lille fpots of land even with the water's edge. The principal, which has given its rane to the whole archipelago, is Great Bahama, in the Northern bank, called the little Bank of Bahama, whofe fituation is E. and W. and about 20 leagues from the coaft of Florida. At a litile diftance to the E . is Lucayoneque, of near the fame fize, whofe ficuation is N. and S. To the N. of hoth is that of Lucayo, which has only half their dimenfions, but whofe name has been given to the whole range : its fituation is E. and W.

A channel of 8 or 10 leagues feparates the Little Bank from the

## B A H

Great Bank of Bahama, in which is the illind of Providence, with the great ifland of Alabafter, or Eleuthera, which has Harhour Illand on the Nurth cape. The inles of Aadros are on the S. W. of Providence, which take up a fpace 30 leagnes long and 5 braiad. Towaids the S. E. are Stocking, Exunla, and Yuma or Long Inand. The ifle of Guanahani, the firtt land difcovered in America by Columbus, now called Cats liland, lies B. of the (irear Pank, and feparates from it by Exuma Sound.
'l'be ctimate of thefe inlands is very temperate the land in general fruitful, and the air very healthy. Their greateft difarlvantage is the want of water, and being fituated amongt innumerable moals and rocks, in a tempefluous fea fu!l of currents, that renders them inacceffible to great thips. There are only three that are inhabited, Providence, Eleuthera, and Harbour Ifland. On the coafts is found ambergris, and the inhabitants catch great quantities of green turtle. Thefe inlands alfo produce a great valicty of dying-woods, lignum vitæ, and mahogany. The exports, in 1769, amounted to ahove 60001 . and, in 1770, there were entered inwards 81 loops or Thips, and 84 cleared outwards. Between Long Inand and St. Dumingo are fprinkled many uninhabited iflands.

In thefe iflands are two parilhes, viz. 1, Parifh of Chrift - Church, compreherding the inland of NewProvidence, in which is the town of Naffaiu, the capital, and the only port of entry, except at Turks Inands. 2, St. John's Parih,compreliending Harbour Ifland and E. leuthera.

The number of inhabitants are computed as follows: in New-Providence about 600 Whites, 300 Negroes, Mulattoes, \&c. free, and about 1300 ditio haves. In Harbour Illand, 340 Whites, 130 Ne -

bahama, the clicf of the Bahama Inands, in the Wefl Indies. abmut 20 leagues from the coaft of Florida, and about so Weft from the ifland of 1.01 ay, from which thefe iflands are alf, called Lucay H llands. It is almout 28 leagues long, and three broad. It is very frinitul, the air ferene, watered with maititudes of fprings and brooks. It produced gicat quanfity of fuffifras, farfaparilla, and red-wood, which were all deltroyed by the Spaniards. Its chief produce now is Indian wheat, fowls, ind a particular kind of ralbits: they have other provifions from Carolina. Their chirf conmerce is affilting, with provifions, fhips which are driven in here by buiftefous winds. This is fituated on the fand-t: nk called the Little Baham.a Bank. which extends itfelf Northward oo miles. The ftrait of Bahama, or Gulf of Florida, lies between the coaft of Florida and this illand. The Spanifh frips are obliged in wait all opportunity to pafs this flrait from the Hapanna homeward; and the frait is 16 teagues broad, and 45 long.
BA1.TIMORE, a county the moft Northern in the province of Ma. ryland, in North America, on the W. fide of the hay of Cheafapeak, seaching to the bottom of it. Its chief town is alfo called Baltimore: the houfes are fragg'ing; fo that the townfhip is rather a fcattered village, or parih. This county is called from Lord Baltimore of IreInd, 1631, to whom it was granted b) King Charles I. Its capital lies in N. lat. 39, 30. and 76,35 , W.
antry, or Braintree, a

## B A R

little town, with a frec-fchool, in the county of Suffolk, in NewEngland.
baramdoes, one of the Caribhee Inlands, and next to Jamaica for importance, in the Wefl-lndies; about 15 miles long, and 14 broad, circuir 45 miles, contains about 106,470 acres, or near 140 fquare miles. It lies 20 leagues Eaft from St. Vincent, which may be feen from it on a clear day; 25 from St. Iucia, 28 from Martinico, 60 from Trinidad, 80 from Cape de Salinas, and 100 from St. Chrifopher's: it is ufually ranked among the windward divifion of the Ca ribhees, heing a day or two's fail fron furinam, the Dutch colony. It was the firft difcovered of any of thefe inlants, and is therefore ftiled Mother of the Sugar Colonies. In the gear 16:5, when the Englifh firt landed here, they found it abfolutely defolate: it had not the appearance of having been peopled, even by the moft barbarous Indians. There was no kind of bealt, either of palture or of prey; neither fruit, lierb, nor root, for fupporting the life of man. Yet, as chis climate was good, and the foil appeared fertile, fome gentlemen of fmall fortunes, in England, in 1627 , became adventurers. About 23 years after its firft fettement, in 1650 , it contained upwards of 50,000 whites, of all fexes and agee, and a much greater number of blacks, and Indian llaves. The former they bought, the latter they acquired by means nor at all to their honour. This fmall ifland, in 1680 , peopled by above 100,000 fouls, was not half cultivated. A little before 1645 they learned the art of making fugar ; and in a hort time, by the means of this improvement, grew every day furprifingly opulent and numerous. About this time, the government of England, which was then in the hands of Cromwell, confined the trade of Barbadoes to the mothercountry, which before was managed

## B AR

by the Dutch. Several of the royal party liad fled hither, and from this Inand King Charles II. crected 13 faronets, fome of whom were worth 30,0001, a year, and no one lefs than a thoufand. In 1676, there ap. peared no great increafe of their whites, but a vifible one in their negrocs. They then employed 400 Sail of Mips, of 190 tons, one with another, in their trade, and their annual exports in fugar, indigo, ginger; cotton, \&cc. amounted to 3 (0,000). their circulating cahh at home was $200,0 c o l$. The plague made great havock here, in 1692 ; which reduced the uumber of whites 1025,000 , and the negroes 1080,000 . It at prefent has about 94,000 in. habitants, among whom are reckoned lut 22,000 whites, which gives the proportion of four blacks to a white. They have at prefent fix regiments of infantry, three of cavalry, and one of guards, all fout men, well difciplined. The trade is fo confiderable as to employ 400 veffels, of all burdens. The principal articles of exportation are aloes, cotton, ginger, fugar, rum, molaffes, which in 1770 to GreatBritain amounted to 311,000 . to North-A merica 120,000l, and to the other inands 432,000 . ferling. It is fortified by nature, all along the windward More, by the rocks and moals, fo as to be nearly inaccallible: on the leeward lide it has good harbours; but the whole coaft is protected by a good line, of several miles in length; and feveral forts to defend it at the moft material places. They fupport their own eftablifhment, uhich is very confiderable, with great credit; the Governor's place alone being worth at leaft 60001 . a year. The ctergy are well provided for, who are of the church of England, which is the religion eflablifhed here; there being very few Diffenters. They have a college, founded here by Colond Codrington, the only inftitution of the kind in the Wert-In.

## B A R

dies. Bridgetown is the capital of the ifland, which was much injured by a late fire. The country of Barbadoes has a very luxuriant and beantiful appearance, fuclling into gently rifing hills, which, with the verdure of the fugar-canes, the blomm and fragrance of the orange, lemon, lime, and citron trees, a number of elegant and ufeful plants, and the houfes of the planters thick fown all along the country, form a delightul feene. The climate is very hot, hut the air pure; and though it does not generate any land-wind, the heat is moderated by the conflant trade-winds. Like niont of the other iflands, it is fulb. jed in the fummer months to tornadoes and hurricanes. Its products are, Lefides what is mentioned, the palm, tamarind, fig, aloes, bi. nanas, cedar, maflick, cocoa-tree, and cacao, the laft makes choco late; and alfo papas, guavas, pal. mettots, \&c. Lat. $1_{3}, 5$, N. Long 59, $3^{2}, \mathrm{~W}$.
barbuda, or Barbouthas an inant, one of the Caribliees 35 miles N. of Antigua; 53 N.E of St. Chrifopher's. It is 3 league long, and half a league broad. : is low land, but fertile, atd n : planted by the Englith as early: any of the Leeward 1 hands, excep St. Chrifopher's, who called it D: cina; but they were fo diflurbe by the Caribbeans from Dominia who generally invaded them tuit a year, in the night time, that the were often forced to defert it. A length, their numbers in the oth: iflands intreafing, and that of $t$ favages decreafing, they repoilif: it; fo that in a few years it t: 1200 inhabitants. It is fubject the Codrington family, who mait tain a great number of negre here, to whom it produces alhe 5000l. per annum, and has nc fome hundreds of inhabitants. coafts are full of rocks, and the is but little water on the inat It abounds in black cattle, bout

## B A R

## B $\Lambda \mathbf{S}$

Kids, fowl, the brecding of which is the chief emplogment of the Inhabitants, who make great proEit of their fale to the uther illands; and the Englith here live after the manner of our Englih furmere, in the way of dealing, buying, fastening, and fending to market. The illand produces cltrons, ponegranates, oranges, raifins, lodia figs, maize, peafe, cocoa nuts, and fome tobacco; and feveral rare and valuable woods, herhs, roots, and drues; as Brafil wood, cbony, calfia, cinnamon, pine apples, cotton, pepper, ginger, indigo, potatocs, and the fulitive plant. Ifere are large ant danererous ferpents; fome however are not venomous, and deltroy other rermin, as rats, toads, and frogs. Here is more Mipping than at Nevis, and it is beter planeed than that ilhand is to the S. W. Lat. 17, 50. long. 60, 55.

Barbe, St. a town of Mexice, in New bifcay, in the neigh. bourhood of which are very rich filver mines. It lies 500 miles N. W. of the city of Mexico. Lat. 26, 10. long. $110,5$.

Banstablef, a town, county, and $b y$, in New England. At the N. end of the bay, where this town is fituated, lies Cape Cod. The town is fituated on Hopenas river and ereek, on the $S$. filde of the penimfula open to the Allantie, where the peninfula is about 5 hiles broad, having Yarmouth town and harbour on the $N$. coaft at its back.

Barnwite, a fort 20 miles tothe N. W. of New Bern, in the county of Craven, in North Cacolina.

- Barrington-town, in Briftol county, in Plymouth Colony, New England. It is fitwated on the river Swanfey, which runsinNarraganfet bay, Rhode-Ifland, 6 miles N. from Briftol, and the Thiles N. from Briftol, and the d alio S. E. from Providence.
bartholonew, St. onc of
the Carribtoce Illands, 25 miles N. of St. Chritopher's, and 30 N. E., of salna. it is reckoned five leagues in cirrumference, but has little ground fie tor manuring. It produces tobacto, callava, and abounds with woods. The trees moll in efteen are, 1. The foap, or aloes tree. 2. 'rlie caleback. 3. The canapia, the gum extracted from which is reckoned an excellent cathartic. 4. I he parotane, whofe boughs grow downward, taking root again, and form a kind of bulwark and ftrong fence in time of attack. All along hore are thofe kind of trees called the Sea. Trees, whore boughs are wonderfuily plaited together, and look as if they were glized. On the more are alfo found the fea-ftar and the fea-apple. Here is an infinite variety of birds, and a peculiar kind of lime-ftone, which they export to the adjacent iflands. They depend on the fkies for water, which they keep in cifterns. It now belongs to the French, to whom it was returned in 1763. The Englith took it, in 1746, from the French by two Englilh privateers from Antigua. Its hores are extremely dangerous, and the approaching them requires an experienced pilot; but it enjoys an excellent harbour, in which hips of any fize are thelered from all winds. Half its iahabitants are Irifh Papits, whofe defcendants fettled here in 1666 . There is alro the lignem vitre and iron wood here in great plenty. Lat. 18, 6. long. 52, 15.

Basseterre, the chicf town in the illand of $\mathrm{S}^{\prime}$. Chrifopher. It is fituated at S. E. end of the ifland, and is a place of confiderable trade. See it. Chriftopher's. It conifits of a long frect along the fea-thore, which is detended by Fort Royal, a fmall fort, badly built, and very irregular. This town is the feat of goverment for the iffand.

Bastimentos, ilands near

## B E D

the ithmus of Darien, and fomewhat weftward of the Samballoesiflands, at the mouth of the bay of Nombre de Dios, very near the Thore; famous for admiral Hofier's lying before them with a Britifh fquadron fome years ago. La'. 9, 30. long. 79, 45 .

Ватнтоwn, a fmall fea-port town in the county of Tyrrel, and difrift of Edenton, in North Carolina, lying on the northern bank of the river P'amticoe, where it has a cultom-houfe, with a colJector. Lat. 35, 30. long. 77, 15 . Beavfort, a townand diftrict in S. Carolina, includes all the places to the S. from Combahee river, and the fwamp at the head of the S. branch of that river, between the fea, including the iflands; the boundary continuing from the main Swamp to Matthew's Bluff, on Savannah river.

Beauront, a feaport town in the county of Granville, in South Carolina, fituated on the inand of Port Royal, 26 miles from Purryburg, and 43 from Charlestown to the S. W. It has a good fort, but is not fo well fortified. It is expected from its harbour, and fituation, that it will become the capital of South Carolina, as it is already the ftation of the Britifh fquadron in thofe feas.

Beaugort a county of North Carolina, in the diftrict of Newborn.

Deaurort, a feaport town in North Carolina, in the county of Carteret, and diftrict of Newbern, in Cure Sound.

Beffisland, one of the fmaller Virgin Inands, in the Weft - Indies, fituated between Dog ifland W. and Tortula E. of it. It is about 5 miles long E. W. and near I broad, N. S. in Sir Francis Drake's bay. Long. 63, 2. lat. 18, 23.

Bedford, a fmall town in Middlefex county, Maflachufetsbay, on the river Concord, 6 miles W. of Woburn, and $7 \mathrm{~N}_{\text {. from }}$ Concord.

## BE L

Redrord, a town in Long Inand, New-York, 6 miles S. from New-York, and the fame diftance N. W. from Jamaica bay.
Bedrosd, a town in the county of Weft Chefter, New-York, 35 miles $N$. from New-York, and 10 E. from the Topang Sea, 12 N. from Long-Ifland Sound, on a branch of Minimock river, near the Stamford river, from the head of which it is diftant 3 miles N. W.

Bexia, Becouya, or BoQUiA, a fimall Englifh ifland among the Grenadilles. The French call it Little Martinico; 55 miles to the N. E. of Granada, and 65 leagues from Barbadoes. It has a lafe harbour from all winds, but no frelh water; and is therefore only frequented by the inhabitants of St. Vincent, who came hither to fifh for tortoife. The foil produces wild cotton-trees, and plenty of water-melons.

Belhaver, or Alexan. dria, a town in Fairfax coun$\mathrm{t} y$, Virginia, on the W. fide of Pa. towmack river, 14 miles N. E. of Colchefter, 86 miles S. E. of Winchefter, and $3^{\circ}$ miles W. of An. napolis.

Belinsgate, a town and point of land in Barnftaple county, in Plymouth Colony, New England, fituated on the W. fide of the penintula, in Cape Cod Bay, 5 miles N. of Silver Springs, and io S. from Cape Cod harbour.

Beliingham, in Suffolk county, Maflàchufets-Bay, in the midway between Mendon and Wrentham, and 2 miles $\mathbf{N}$. of Blackfone river.

Bele-islejslandand Straights, at the moft $N$. end of Newfoundland, and the entranct into the Gulf of St. Laurence. The ifland is about 7 leagues in circuit, and on the N. W. fide has a fnial harbour fit for fmall craft, called Lark Harbour, within a littl ifland that lies clofe to the Chore; and at the E. point it has anothe fmall harbour or cove, that wil only admit fihing fallops; from

whence it is only 16 miles to the Coaft of Labradore. Long. 55, $30 \cdot$ lat. 51,55 .

BERGEN, a town and county on Hudfon's river, in New Jerfey, over againft New York, and was the firf planted of any of this tract; moftly inhabited by Dutch. See New rork.

Berxshire, a county in Penfylvania whofe length is very great, bounded on the S.E. by Philadelphia and Chefter counties, N. E. by Northampton county, and S. W. by Cumberland and Lancafter counties.
BERKLEY, the name both of a town and county in South CaroHina, lying to the N . of Colleton county, near Cowper and Athley rivers. On the N . is a little river ealled Bowall-river, which with a ereek forms an inland; and off the coaft are feveral inlands called Hunting-ifands, and Sillwent'sband. Between the latter and Bowall river is a ridge of hills, called the Sand hills. The river Wando waters the N. W. parts of this county, and runs into Cowper fiver, both uniting their freams with Ahley river at Charles-town.

BERMUDAS, a clufter of fmall illands a confiderable diftance from the continent. Hither retired feveral of the parliament party after the Reftoration; and Waller the poet has given a very pretty poem on them, it being the place of his flight. They are not altogether 20,000 atres, very difficult of accefs, being, as Waller exprefles it, walled with rocks. As their coafts are dangerous, fo their founds and harbours difficult of accefs, their entrances being narrow, and hoaly; but what renders thefe illands ftill more dangerous is the current, which fets to the N. E. from the Gulf of Florida, which is remarkably firong here. The air extremely pleafant ; and its $e$ fituation invited the great rkley, bithop of Cloyne, to folqueen Anne for founding

## BER

an univerfity here, the plan of which that great genius had excellently well modelled; but the queen was diverted from this pro. ject by the parties of her miniflers. The chief bulinefs here ufed to be that of building floops, and other fmall craft, for the trade between North America and the Wcी indies; which are built of cedar, and are very durable, as no worms will penetrate them. The founds and furrounding feas, are well fored with fifh, and ambergrife is fometimes found among their rocks in lumps of confiderable bignefs. They fend nothing to England; though formerly, when the Bermudas hats were brought into fathion by the bihop, they got a good deal of caih from England. The hats were very elegant, made of the leaves of palmettocs; but the trade and the fathion went togegether. The foil is negleeted, and their beft production is cedar, with fome white-fone, which they fend to the Weft-Indies. Their whites are about 7000, the mulattoes and blacks are about 6000. The blacks bred here are the beft in America, and as ufeful as the whites in navigation. The people of Bermudas are poor but healthy, contented and very chearful. It is well adapted to the cultivation of vines, and might be worth while even for the legiflature to encourage fuch an ufeful improvement. They are called Somer-itlands, not from their pleafant or warm fituation, but from Sir John Somers, bart. who was Thipwrecked here; and was the fecond after John Bermudas, in 1503 , that improved the difcovery of them. The number of this clufter is computed to he about 400 . They are difant from the Land's-end 1500 leagues; from the Madeiras 1200, from Hifpaniola 400, and 200 from Cape Hattaras in Carolina; which lalt is the neareft land to them. Latm 32,15 . long. 64,8 .

## B I L

Bern, New, a fmall town in the county of Craven, in South Cnolina, lying on the fonthern bank of the tiver Pamtione, or Pantego. Lat. 35, 15 . Iengitude 77, 30.
berry - Ielands, a fmall clafter of iflunds, on the N. W. puint of the Great Bahama Bank, in the Channel of Providence. Long. 75, 40. lat. 25,50 .

Bertie, a maritime county in North Carolina, in the dilfrict of Edenton, xith the Roanoke its S. boundary, and Albemarte found on the E. In it is fituated the Indian toner of Tufcaroraw.

Berwick, a iown in York county, Perfylvania, about 7 miles N. of Hanover, and 16 W . of York.

Bethefema, a v:llage in the coumit, of Orange, in the province of New York; very fruitul in pafture ant makes large quantities of excellert butter.

Bethlehem, a town in Northampon connty, Penfylvania, 5 miles E. of Northampton, and io S. W. of Ealton, and ftands on a branch of the Delawar river.

Beverley, a maritime sown in New Enghand, in the province of Maffachufets-Bay, and county of Effex, fituated on the s. of Cape Ann, and the N. fide of Burley Bruok, 2 miles North of Salem.

BiequeIsland, or Boriquen, or Crabs isle, one of the Virgin Ines, 2 leagues from Porto Ricn, 6 leagues long, and 2 broad. The Englifh fettled there $t$ wice, and have been driven away by the Spaniards, whofe interelt it is to let it remain defolate. It has a rich foil, and a good road on the S. fide. Lat. 18, 2. long. 64, 30. See Crabs I/le.

BIDDEFORD, a town in the county of York, Province of New Hamphire, in New - England, near the mouth of Sako river and bay, 10 miles $N$. from Wells, and 20 S. from Brunfwick.

Billerika, a fmall town is

## B L A

Middlefex county, Mafachufetse Bay, on the banks of the river Concord, about 6 miles W. of Wilmington, and 5 N . of Bedford.

Bizds Feys, a rock or inand among the $V_{i} e^{\text {in }}$ lnands, in the Weft Indies. It is tound, and fitmated about a leagues $S$ of St. John's ifand, and has its name from the quantities of birds which refort there. Long. 63, 20. lat. 17, 55 .
bimint Isle, one of the Lucaya or Bahama Iflands, on the W. fide of the Great Bank, near the Gulf of Florida, and has 2 good harhour.

Biscay, a province of Mexico, abounding in filver mines. It is bomeled on the N. by Mexico, and on the W. by Florida.

Black River, an Englifh fettement at the mouth of th: river ' 1 into, 20 leagues to the $\bar{E}$. of Cape Honduras, the only har bour on the Coaft of Terra Firma, from the itland of Rattan to Cape Gracias a Dios, and was for more than 60 years the refuge of the L,ogwood Cutters, when the Spaniards drove them from the forefls of Eaf Yucatan; which occafioned adiventurers of different kinds to fix here, where the coaft is fandy, generally low and fwampy, with mangrove-trees: higher up, near the rivers and lagoons, which are full of fin, the foil is more fertile, and produces plan. tations, cocoa-trees, maize yams, potatoes, and feveral other vegetables; and the paffin of drink ing rum has made then begin to plant fugar-cancs. The forefts are full of deer, Mexican fwine, and game. The hores abound with turtle, and the woods with mahogany, zebra wood, farfaparilla, \&c. and indeed the whole fertlement flourilhes foontaneoully without cultivation.

Bifden, a cominty of North Carolina, in the diffrict of Wilmington, and is the boundary councy to South Carolina.

## B O N

Blanco, an inand 35 leagues from Terra Firma, and N . of Margarita-Ifland, in the province of New Andalufia. It is a flat, even, low, uninhabited ifland, dry and healthy, moft of it favannas of long grafs, with fome trees of lignum vitx. It has plenty of guanoes. Lat. 11,45 . long. 63,36 .
Blandford, atown in Prince Gcorge's county, Virginia, on the S. bank of a branch of James siver, 2 miles E. of Peterfburg.

Bolinspooke, a town in Talbot county E divifion of MaryJand, on the N. W. point of Choptank river, Chefapeak - bay, 5 miles E . of Oxford.
Bosaire,anifland,ammof uninhabited, on the coaft of Venizueha. in the kingdem of Terra Firma It lies about 20 leagues from the continent, and 14 E . of Cn maço, and belongs to the Dutch. of is about 18 leagues in compafs, tas a good bay and road on the 5. W. fide, near the middle of the hiand. Ships that come from the caftward make in clofe to fhore, and let go anchor in 60 fathorn deep water, within half a cable's length of the thore; but mult make faft a-thore, for fear of the Bud-uinds in the night driving her to fea. There are only a few houfes, and about a dozen foldiers, who do little or no duty. There is a fort, with five or dix hedian families, who are hufbanden, and plant maize and Indian eorn, fome yams and potatocs. There is a great plenty of cattle tere, particularly goats, which Wey fend to Curaçoa, falted every year. There is a falt pond here, Where the Dutch come in for glt. Lat. 12, 10. long. 67, 30 .
Bonavista, a bay, cape, and prt on the E. fide of Newfoundhnd, where the Englifh have a fortlement, and fages are erected Er the fifhery, which is carried on fere with great fuccefs. Long. 13, 5. lat. 49, 5 .
Boriquin or Crabs-Island.

## BOS

Boston, lately a very notery and opulent trading town, the metropolis of New-England, in North-America, in the county of Suffolk, till the town was profcribed, and port removed by the Englith parliament, April 4,1774 , for refufing a tax on tea, which they deftroyed in 1774. The Kings forces in a great meafure defaced the town, by pulling down feveral buildings to fupply themfelves with fring during the late contefls; hefore which it was the largeft and moft confiderable city of all the britifn empire ind America; and was built the latter end of the year 1630 , by a part of a colony which removed hitherto from Charles-Town, and ftands upon a peninfula of about four miles circumference, withir 44 miles of the bottom of Maffachufets Bay. It was greatly damaged by an earthquake, on Oct. 29,1727 . It is the molt advantageoully litusted for trade of any place in Nerth-A inerica; on the N. fide are a dozen fmall iflands, called the Brewfers, one of which is cailed Noddle's-ifland . The only fafe way for entrance into the harbour is by a channel fo narrow, as well as full of iflands, that three thips can fcarce pafs in. a-brealt; but there are proper marks to guide them into the fair way; and within the harbour there is room enough for 500 hips. to lie at anchor in a good deph of water, where they were covered by the cannon of a regular and. very frong fortrefs now in ruins. At the bottom of the bay is a very noble pier, near 2000 feet in length, along which on the $N$. fide extended a row of warehoufes. The head of this pier joins the principal freet in the town, whicis is, like moft of the others, fracious and well buite. The town had a fine and friking appearance: at entering, as it lies at the very bottom of the bay, like an: anmphitheatre. It has a town-houfes, where the courts met, and: the ean

## B O S

change kept, large, and of a tolerable tafte of architecture, Round the exchange are a great number of bookfillers thops, which, till lately, found employment fur five printing-prefles. 'There are ${ }^{19}$ places of worthip, 3 only of which are cpifcopal, and 7 are for diffen. ters, which are lofty and elegant, with towers and tpires: and it contained about 6000 houfts, and at leaff 30,000 inhabitants. That we may be enabled to form fome judgment of the wealth of this city, we mult obferve, that from Chifinmas 174.7, to Chriftmas 1748,500 velfels cleared out from this port only for a foreign trade, and 430 ware entered inwards; to fiy nothing of coatting and fithing veffels, both of which were numerous to an uncommon degree, and not lefs than icco. It received damage by a fire to the amount of 300,0001 . March 20, 1760; and by a terrible form in Ang. 7773 . Indecd the trade of Now-England was great, as it fupplied a valt quantity of goods from within itfelf; but was yet greater, as the people in this country were in a nianuer the carriers for all the colcnies in North-America and the Weft-Indies; and even many parts of Europe. The home commodities were principally mafts and yards, for which they contracted largely with the royal havy; alfo piteh, tar, and turpentine; flaves, lumler, and boards; all forts of provifions, beef, fork, butter, and cheefe, in vaft quantities; horfis, and live cattle; Indian corn and peafe ; cyder, apples, hemp, and flax. Their peltry or fur trade was not fo confiderable. They had a noble cod filhery upon the coalt, affording employment for a vaft number of their people: they were enabled by this branch to export annually above 30,000 quintals of choice cod. fifh to Spain, Italy, the Britih iflands, GreatBritain, the Mcliterranean, \&c. and about 20,000 quintals of the

## B O S

refufe fort to the Weft-Indies, for the negroes.

The great quantity of Spirits which liey diftilled in Botton from the molafles reccived in return from the Weft-Indies, was as furprinung as the cheap rate they vended it at, which was under two hillings a gallon. With this they fupplied alnoolt all the confumpion of our colonies in NorthAmerica, the Indian trade there, the valt demands of their own and the Newfoundland fifhery, and in a great meafure thofe of the African trade. But they were more famous for the quantity and cheapriefs than excellency of their rum. They were almont the only nne of our colonies which nearly fupplied themfelves with woolen and linen manufactures. Their woo!en cloths u ere ftrong, clofe, but coarfe and fubhorn. As to their linens, that manufacture was brought from the N . of Ireland by fome prefbyterian artificers, driven thence by the feverity of their landlords, or rather the malter workmen and employers; and from an affinity of religious fentiments they chole New-England for their retreat. As they brought with them a fund of riches in their kill of the linen mantifastures, they met with very great encouragement, and exercifed their trade to the great advantage of the colony. They made large quantities, and of a very good kind; their principal fettlement was in a town, which, in compliment to them, is called Londonderry.

Hats were made in New-England, and which, in a clandeftine way, found vent in all the other colonirs. The fetting up thefe manufactures was in a great marter ueceflary to them; for as they had not been properly encoaraged in fome faple commodity by which they might communicate with Great-Britain, being cut off from all other refources, they mult have either abandoned the

## J S

: Wen-Indies, for
uantity of Spirits filled in Botton les reccived in re-Weft-Indies, was the cheap rate they which was under rallon. With this Imont all the concolonies in Northndian trade there, ads of their own foundland fifhery, meafure thofe of de. But they were or the quantity and excellency of their ere almont the only onies which nearly felves with woolen nufactures. Their nere Atrong, clofe, d fubhorn. As to lat manufacture was the N . of Ireland byterian artificers, by the fevenity of ds, or rather the en and employers; affinity of religious ey chole New-Engretreat. As they them a fund of ir fkill of the linen they met with very gement, and exerle to the great advanolony. They made ies, and of a very neir principal fettlea town, which, in to them, is called
made in New-Engo ich, in a clandeftin: ent in all the other he fetting up the efe was in a great matto them; for as they 1 properly encouraghaple commodity by might commonicate Britain, being cut off her refources, they ither abandnoed the

## B O S

ensintry, or have found means of cin loying their own kiil and induty to draw nut of the neceffaries of life. The fame necelify, tosecher with their being pollefled of materislsforbuilding and mend. ing thips, made the ${ }^{\text {a }}$ the carriers for the nther colonics.

This laft article was one of the moft confiderable which Bofton, or the other fea-port towns in New-England carried on. Ships were fometimes built here upon commilfion, and frequently the merchants of the country had them conflucted upon their own acconnt; then loaded them with the produce of their country, naval Aores, filh, and filh-oil, principally.
They fent them out tiponathaling voyage to Spain, Portugal, or the Mediterranean; where, having difpofed of their American cargo, they made what atvantage they could by freight, until finch time as they could fell the veffel herfelf to advantage; which they feldon failed to do, receiving the valuc of the veffel as well as the freight of the goods which from time to time they carried, and of the firt home-cargo in bills of exchange upon London; for as they had no commodity to return for the value of above 100,0001 . which they took in various forts of goods from England, (except what naval ftores they had,) they were obliged to keep the balance fomewhat even by this circuitous commerce; which though not carsied on with Great-Britain, nor with Britilh veffels, yet centered In its profits, where all the noney made by all the colonies did center at laft, namely in London. There was a report made by way of complaint to the legillature of this circuitous, though to them neceffiry commerce. It was defired that the exportation of lumber, S. to the French colonies, and the portation of fugars, molaffes, E. from thence, might be fopt. In the other hand, the northern lonies complained that they were pollefled of any manufactures,

## B R A

or naple commodity; and being cur off from this circuitous commerce, they could not purchafe fo many articles of luxuiy from Great-Britain. The legifiture took a midale courfo: they did not prohibit their exporting lumber, \&ec. to the French colonies, har laid the imports from thence, as fugars, molafles, \&c. under a confiderable duty; for they wifely forefar that the French would have recourfe to their own colonies for lumber, by which the Boftonians would be cut off from fo valuable a branch of trade and navigation; and that the latter, being driven to fuch freights, might have been alfo driven to fone extremities.

By confitering the fate of fhipbuilding, the principal branch of Boflon, we fall vifibly perceive a great decline in that article, which lattly affected her intimately in all others. In the year 1738 , they built at Bofton 41 topfail veffels, burthen in all 6324 tons. In 1743 they built 30 ; in 1746, but 20 ; and in 1749, but 15, making in the whole only 2450 tons; an aftonifhing decline in about so years.

There was a light houfe erected on a rock for the flipping, but it has lately been deltroyed, as has the fortifications. The government was directed by a governor, a general court, and aflembly, to which this city fent four members. The independent religion was the moft numerous, and the proteffors faid to be 14,000 ; and out of 19 places of worlhip, fix were for this profeffion. Latitude 42, 25. long. 71, 10.

Bradpord, a fmall town in New-England, in the province of Maflichufets-Bay, and county of Effex, 'near a branch which runs into Merimak river, below Mitchells Falls.

Braintrfe or Brantree, a town in Suffolk county, in Maf-fachufets-Bay. It fands at the bottom of a ihallow-bay, and has no harbour, but is well watered

## B R I

with fprings: the river Smelt runs through it, and about a quarter of a mile S. runs the river Stony.

Brandon Harbour, is fituated on the $N$. fide of LongIfland, New-York, 9 miles W. of Smithtown, and the fame diftance from Hampftead Plain.

Brass-Island, one of the fmaller Virgin-lllands, fituated near the N. W. end of St. Thomas, on whom it is dependent.

Brentrord, a town in Connecticut, the county of New-Ha. vell; confiderable for its ironworks. It is fituated on the fide of a river of the fame name, which runs into Long-Ifland Sound, so miles Ealt from Newhaven. Longitude 55, 15. Latitude 41, 15 .

Bridgetown, the metropolis of the ifland of Barbadoes, in the Weft-Indies, lying in the S. W. part of the ifland, and in the parifh of St. Michael. It is fituate on the innermoft part of Carlifle-bay, which is large enough to contain 500 hips , being a league and half in breadth, and a league in depth; but the bottom is foul, and apt to cut the cables. The neighbouring grounds being low flats were often overflowed by the fpring-tides, and are moft of them fince drained. The town lies at the entrance of St. George's-valley, which runs feveral miles into the country. It fuffered greatly by a fire on Feb. 8, 1756, May 14, 1766, and Dec. 27, 1767, when the greatent part of the town was deftroyed; before which time it had about 1500 houfes, moftly brick, very elegant, and faid to be the fineft and largeft in all the Caribbee-I flands, the greateft part of which have been rebuilt. The Atrects are broad, the houfes high, and there is here alfo a Cheapfide, where the rents are as dear as thofe in London. It has a college founded liberally and endowed by Colonel Codrington, the only inGitution of the kind in the Weft. Indies: but it does not appear

## B R I

that the defign of the founder has had the fuccefs that was expected. Here are commodious wharfs for loading and unloading goods, with fome forts and caftles for its defence; but the town is fubjed to hurricanes. As the wind generally blows from the $\mathbf{E}$. or N. E. the E. part of the town is called windward, and the $W$. part leeward. The royal citadel, called St. Ann's fort, coft the country 30,0001 . On the E. fide of the town is a fmall fort of eight guns, where the magazines of powder and flores are kept by a Atrong guard. The number of militia for this town and St. Michael's precinct is 1200 men , who are called the royal regiment of foot-guards. This is the feat of the governor, council, affembly, and court of chancery. About a mile from town to the N. E. the governor has a fine houfe, built by the affembly, called Pilgrims: though the governor's ufual refidence was at Fontabel. The other forts are to the W. James's-fort, near Stuart's-wharf, of 18 guns : Willoughby's, of 20 guns: three batteries between this and Need. ham's-fort,of 20 guns. The church is as large as many of our cathedrals, has a noble organ, and 2 ring of bells, with a curious clock. Here are large and elegant taverns, eating-houfes, \&e. with a porthoufe; and packet-boat shave been eftablifhed here lately to carry letters to and from this place monthly. Lat. 13. 20. Long. 60. 0. See Barbadoes.

Bridgewater, a fmall town in the county of Briftol and colony of Plymouth, in MaffachufettsBay, New-England, near Townriver, which empties itfelf into Narraganfet-bay, Rhode-I Iland. It is about 5 miles N. E. from Raynham, 10 W . from Duxbury. Briditington. SeeBurlington.

Brookline, a village in Suffolk county, Maflichufets - hay, between Eambridge and Roxbury, about 3 miles W. of Bofton. Brunswick, a town in the equn:y of the fame name, in the rict of Wilmington, in Norch-

## B U R

Carolina, of which it is the principal. It is fituated about 5 miles E. from the Atlantic, on the river Cape Fear, is the belt buile in the whole provin ee, carries on the moft extenfive trade, and has a collector of the cuitoms.

Brunswrck, a town in the county of York and province of Mallachufets-bay, in New-England, in the bay of Cafco. It is the county-town, and is 13 miles from Falmouth, and 53 from York.
Brunswick. See New Brunfwick.

Buck Island, one of the leffer Virgin Illes, fituated on the E. of St. 'Thomas, in St. James's Paflage. Long. 63. 30. Lat. 18. 15.

Buckingham, a county in the province of Penfylvania, S. W. from Philadelphia. It is feparated from Jerfey by the Delaware river on the S. E. and N. i.. and from Northampton connty on the North.

Buils, Bayof, or BaboulBay, a noted bay in Newfoundland, a little to the fouthward of Si. John's harbour on the E. of that inland. It has 14 fathom water, and is very fafe, being landlocked. The only danger is a rock 20 yards from Bread-andCheefe Point, and another with 9 feet water off Magotty Cove. Lat. 50,50 . long. 57,10 .

Burcingion, a county in Weft-Jerley, near the boundary line of Eafl-Jerfey; in which its capital town Burlington is on its W. Ghore.

Burinngton, the capital of Weft-Jerfey. It is fituated on an ifland, in the middle of Delaware river, oppofite to Philadelphia. The town is laid out into $f_{p a c i o u s}$ ftreets, and here the courts and affimblies of Weft-Jerfey were heid. It is dirested by a gover. nor, a council, and affembly; was begun to be planted with the other towns from 1688 , and continued improving till 1702 , and

## C A L

from thence till now. Its fituation on the river, and contiguity to creeks and bays, has naturally inclined the inhabitants to fifheries. The country almunds in all forts of grain and provifions, particularly flour, pork, and great quantities of white peafe, which they fell to the merchants of New-York, who export them to the Sugar-IMands, They have alfo a trade in furs, whalebone, oil, pitch, and tar. This town formerly gave name to a county. It has a town-houfe, a handfome market-place, two good bridges over the river, one called London-bridge, the other Yorkbridge. But the court of affem$\mathrm{bly}, \& \mathrm{sc}$. and that of the governor, is in the town of Elizabeth, in the county of Eflex, which is by that the moft confiderable town in the two provinces. It carries on a brik trade by its eafy communication with Philadelphia, through the river Selem, which falls into the bay of Delaware. Lat. 40: 5. long. 74, 30,

Bustard River, in the province of Quebec, which runs into the rivers St. Laurence, in a bay of the fame name. It runs a great way inland, and has communication with feveral lakes; and at its mouth lies the Oziersinlands. Longitude 68, 5. Latitude 49, 20.

Bure, a county in N. Carolina, in the diftrigt of Halifax, to which diftrict it is theW.boundary.

## C

CAledonia, a port in the Ithmus of Darien, in the Gulf of Mexico, 25 leagues N. W. from the river Atrato. It was attempted to be eftablifhed 1698, but the unhealthy fituation of the climate deftroyed the infant colony.

California, a peninfula in the Pacific Ocean, in North-America, wathed on the E. by a gulf of the fame name, and on the W. by the Pacific Ocean, or Great South-Sea, lying within the three capes, or limits of Cape San Lu-

## C A M

cas, the river Colorado, and Cape Blanco de San Sebaltian, which laft is its fartheft limit on its weftern coalt which has come to our knowledge. The gulf which wafhes it on the E. called the Gulf of California, is an arm of the Pacific Ocean, intercepted between Cape Corientes on one fide, and Cape St. Lucas on the other; that is, bet ween the coaft of NewSpain on the N.E. and that of California on the W. The length of California is about 300 leagues; in breadth it bears no proportion, not being more than 40 leagues acrofs, or from fea to fea. The air is dry and hot to a great de. gree ; the earth is in general barren, rugged, wild, every where over-run with mountains, rocks, and fands, with little water, confequently not adapted to agricul. ture, planting, or grazing. There are, however, fome level, wide, and fruitful tracts of ground 10 the W. of the river Colorado, in $35^{\circ} \mathrm{N}$. latitude, plenty of water, delightful woods, and fine paftures, which is not to be faid of the peninfula taken in general; for the greatelt past is not known to us, being unconquered and por. feffed by the wild Californians and favages.

Caieiaqua, a town and harbour at the $S$. W. end of $S t$, Vincent, one of the Caribbec. Illands. The harbour is the beft in the ifland, and draws thither: great part of the trade, and the principal inhabitants of the ifland,

Calvert, a county in the province of Maryland, bordering on Charles county in the fame province, from which it is divided by the river Palufcent, as alfo from Prince George's county. The capital of this county is called A. bington.

Cambridee, a town in the county of Middlefex, the pro. vince of Maffachufets - Bay, in New-England; flands on the N. branch of Charles - river, neas Charles-Town, feven miles N.W. Charies-Town, reven miles N. W.
of BoIton. It has feveral fit

## C A M

houres, but is buile very irregular. It changed its old name of Ne'ston for that of Cimbridge, on account of the mivelfity called Harval! college, which confin? ot - Spacious rolleg.es bili of brick, called Harvard Hollis, S:oughson, Maflachute:s. It was projected in 1630, and was at ri' it no more than a fchola illuthis, or academical free-fchonl, till May áoso, when it was incorporated by a charter from the goverument of Mailachufets coleny; fo that by donations from feveral learned patrons, namely, archbithop Uiher, Sir John Maypard, Sir Kenelm Dighy, Mr. Baxter, and Mr. Thicophilus Gale, fellow of Magdalen college, there were, before the accerfon of Queen Anne, above 4000 books of the molt valuable authors. The college conGilted of a prefident, five fellows, 4 tutors, a librarian and butier, and a treafurer, but the latter had no voice in the government. There was an additional college erceted for the Indians, but, being found impracticable in its intention, was turned into a printing-houfe; the whole of which was burnt down in 1764, and rebuilt by public contribution; but in 1775 was converted into barracks for the foldiers, when the fudents were obliged to relinquifh their ftudies as well as apartments. Lat.42, 25 . long. 71,11 .

Cam-Isiand, one of the fmaller Virgin-1hes, in the WeftIndies; fituated N. of St. John's, in the King's channel. Longicude 63,25 . lat. 18, 20.

Camben diftrist, in S. Carolins, is hounded by the line Which divides the parifhes of St. Merk and Prince Frederick, Sansee, Congaree, and Broad rivers, by a N. W. line from the N. er of Williamburg townto Lynch's creek, and from ce 30 degrees $W$. till it interthe provincial line.
mdin town, in Frederickftownftip, on the $N$, fade

## C A M

of the Wateree river, which empties it felf into the Santee river, and by that has communication, and carries on a trade to different parts of Carolina. It has a court-houfe, and provides one of the regiments of militia.

Campeachy, a town in the audience of Old Mexico, or New Spain, and province of Yucatan, fituated on the bay of Campeachy, near the W. thore. Its howfes are well-built of flone: when taken by the Spaniards, it was a large town of 3000 houfes, and had confiderable monuments both of art and indnflry. 'There is a good dock and fort, with a governor and garrifon, which commands both the town and harbour. The Englilh in 1659 formed and took it only with fmall arms, and a fecond time, by furprize, in 1678, and a third time in 1685 , by the Englifk and French buccaniers, who plundered evers place within 15 leagnes round it, for the face of two months; they afterwards fet fire to the fort, and to the town, which the governor, who kept the field with 900 men , would not ranfom : and, to compleat the pillage by a fingular piece of folly, the French buccaniers celebrated the feaft of their King, the day of St. Louis, by barning the value of 50,000 . fierl. of Campeachy wood, which was a part of their thare of the plunder. The port is large, but thallow. It was a flated market for logwood, of which great quantities grew in the neighbourhood, before the Englifh landed there, and cut it at the ifthmus, which they entered at Triefla-inand, near the bottom of the bay, 40 leagues S.W. from Campeachy. The chief manufacture is cotton closh, Lit. 15, 40. Long. 91,30 .

Canada. The limits of this large country are fixed by an act of parliament in 1763 as follows: The North point was the head of the river St. John on the Labrador coalt; its Wefterumoft point

## C A N

the South end of Lake Nipifin ; its Southernmoft point the $45^{\text {th }}$ parallel of North latitude, crofling the siver St. Laurence and Lake Champlain ; and its Eafternmoft at Cape Rofiers in the Gulf of St. Laurence; including about 800 miles long, and 200 broad ; which boundaries in 1774 were extended Southward to the banks of the Ohio; Weflward to the banks of tbe Miflilfippi; and Northward to the boundary of the Iludion's-Bay Company.

As its extent is fo great both in length and breadth, its temperature, climate, foil, \&c. cannot but vary accordingly : all that part which was inhabited by the French, and which is nofllyalong the banks of the great river St. laurence, is, generally fpeaking, exceffive cold in winter, though hot in fimmer, as mot of chufe American tracts commonly are, which do not lie too far to the Northward. The reft of the comintry, as far as it is known, is interfected with large woods, lakes, and rivers, which render it ftill colder; it has, however, no inconfiderable quantity of fertile lands, which, by expetience, are found capable of producing corn, barley, rye, and other grain, grapes, and fruit, and, indeed, almoft every thing that grows in France; but its chief product is tobacco, which it yiedds in large quantities. The foil, altogether, produces as follow:-White and red pine trees; four fecies of fir ; white cedar and oak; the free, mongrel, and baftard aft-trees; male and female maple; hard, foft, and fmooth walnut-trees; beech-trees and white wood; white and red elme poplars; cherry and plumb trees; the vinegar and cotton trees; and the white thorn: fun-plants, gourds, melons, capillaire, the hop-plant, alaco: tobacco, turkey-corn, molt forts of European grain, fruits, \&c.

The animals are, deer, bears, fags, martins, buffaloes, porcu-

## C A N

pines, rattle-fnakes, foses, ferrets, hares, otters, wild-cats, ermines, goats, wolves, beavers, fquirrels, \&c.-Eagles, falcons, tercols, gothawks ; grey, red, and black partridges with long tails; turkies, fnipes, and varicty of water-fowl, \&c. Canadian wood. peckers, larks, \&ec.-ln the lakes and rivers are feawolves, fea. cows, porpoifes, lencornets, fea. plaife, falmon, turtle, lobfters, fturgeons, giltheads, tunny, lam. preys, mackarcl, foals, anchovies, \& .

There is likewife plenty of ftags, martins, wild-cats, and other wild creatures, in the noods, be. fides wild-fowl and otier game. 'The fouthern parts, in paricular, breed great numbers of wild bulls, deer of a fimall fize, divers forts of roelucks, goats, wolves, \&ic a great variety of other animals, both wild and tame.

The meadow-grounds, which are well watered, yick excelicr: grafs, and breed great quantit:is of large and fimall cattle; and, where the arable land is well na. nured, it produces large and rich crops. The mountains abourd with coal-mines, and fome, w: are told, of filver, and other me. tals, though we do not learn that any great advantage is yet malt thereof. The marhy grounds which are likenife very exterine fwarn with otters, beavers, ar: other amphibious creatures; ar: the rivets and lakes with filh c all forts.

The lakes here are both larg and numerous; the principal which are thofe of Erie, Madis gan, Huron, Superior, Iion tenac or Optavia, Ontario, Nap fing, Temifcaming, befides other of a finaller fize; fome navigab by veflels of any fize, as are :"? their communications, except the between Erie and Ontatio, whe is a ftupendous cataran, cali the Falls of Niagara. The wat is about a mile wide, crofled by rock in the form of a half-moo:

## A N

nakes, foxes, ferters, wild-cats, erwolves, beavers, - Eagles, falcons, vks; grey, red, and es with long tails; es, and variety of ec. Canadian wood;, \&c.-lin the lakes re fea-wolves, fea. res, lencornets, fea. in, turtle, lobfters, theads, tunny, lam. rel, foals, anchovies,

C A P
The perpendicular fall is 190 feet; and fo valt a body of water mithing down from so great a height, on rocks below, with prodigious reboundings, Itrikes the beiolder with inexpreffible amazement; the noife may be heard upwards of 8 ; iriles. The largeft of the lakes is that which they name Superior or Upper Lake; which is fituate the farthert $N$. and is reckoned above 100 leagues in length, and about feventy where broadef, and hath feveral confiGiderable iRunds in it; the chicf whereof are the Royal Ille, Philipeau, Pont Cartrdin, Maurepas, St. Anne, St. Ignatius, the Conerre or Thunder liland, and 2 large number of fmatler ones, efpecially near the coafts.

The whole country ahounds with very large rivers, which it is endlefs to enter into a detail of. The chief are, the Ourtanais, St. John's, Seguinay, Defprairies, and Trois Rivieres, all running Into the great river St. 1,surence; alfo the ohio. The two principal are thofe of St, Laurence and the M:Mifippi; the former of which abound; with no lefs variesy than plenty of fine fifh, and seceives feveral confiterable tivers in its courfe. The entrance into the Gulf of St. Laurence lies befiween Cape Ray, on the ithind of Ne:t foundland, and the N. cape in that called the Royal lland, more commonly Cape Breton. That of the Mifffippi, which sans through the greatelt part of the province of Louifiana from 14. to $S$. is called by the French the river of St. Louis, and by the natives Mifchifpi, Miffrippi, thit Mefchagamifis, on account the valt tract of ground which overfiows at certain feafons; ad by the spaniards alfo calded a Yalifda, from the prodigious hantities of timber which they and down upon it in floats to the a. It is navigable above 450 fagues up from its mouth. The ring head of this river is not
yet fatisfactorily known ; but it is certain, that it dicharges iffe'f into the Gulf of Mexico by two branches, which form an illand of confiderable length.
Canada, in its largen fenfe, is divided into eaftern and weflerin, the former of which is commonly known hy the name of Canadi, and the latter, which is of latcr difcovery, Louiflana, in honour of the late Lewis XIV. Sec L.onifinna. The capital of Canadd, properly fo called, is $\mathscr{O}^{2}$ ubbc. which ife. The number of inhabitants in 176; was 45,000 , but fince then they liave encreafed very confiderably. Iis trade employed $3+$ hips and 400 feamen. The exports to Great - Britain, confifted of fkins furs, ginfeng, finake-root, capillaire, and wheat, all which amounted amually to 105,500, which was nearly the amount of the articles fent from England to them.

Canso, an illand in Nova Scotia, in which there is a very good harbour threc leagues deep, and in it are feveral fmall iflauds. It forms two bays of fafe anchorage. On the continent near it is a a river, called Salmon-river, on account of the great quantity of that fill taken and cured here: it is belic ed :o be the beft fifhery in the world of that fort. The town of Canfo vas burnt in 1744, by the French from Cipe Breion; but fince our acquifition of Cape Breton in 1758, they are under no apprehention of the like danger. Lat. 45,18 . long. 60, 50.

Canterbury, a town in Connecticut, New Enghand, a mile E. of the river Thames, and 2 miles N.E. of Plainfield, bothin Windham county.
Cape caeton, a very confiderable inand, in the Gulf of St. Laurence, in North America, belonging to the Eaglith. It was taken in 1758 by admiral Bofcawen and colonel Amherft. The Ateight of Franfac, which feparates it from Nova Scotia, is 2005

## C A P

more llan a league in breatlh, and is about 20 lcagucs from Newfoundland, with which it forms the entrance into the Gulf of St, Laurence. This fine illand properly belongs to the divifion of Nova Scotia, and was the only part which was ceded by treaty to the Englifh. It is ahout 140 miles in length, full of noun. tains and lakes, and interfocted bya vaft number of crecks and bays, nearly mecting each other upon every fide, which feems very ninch to retemble the coall and inland parts of molt northern countries, fuch as scotland, Ireland, Denmark, and Sweden, who have fich thores and infular lakes. The foil is fufficiently fruitful, and in every part abounds with timber. In the monntains are coal pits, and on the thores one of the noft fruitful filheries in the world, with excellent flax and lemp. It abounds in all manner of pature, and in all forss of cattle and poultry. The harbours are all open to the E. going round to the fouthward for the fate of 50 leagues, beginning with lort Dauphin, quite to Port Thouloure, near the entrance of the Atreight of Iranfac, at the infise of which you meetinmediarely uith Port Thouloufe, which lies between a kind of gulf called Little St . Peter and the ifles of St . Peter. The bay of Gaharon, the entrance of which is about 20 leagues from St. Peter's ifles, is two leagues deep, one broad, and affords good anchorage. It is fituate from $45^{\circ} 20^{\prime \prime}$ to 47 N . lat. and from 59,30 , to $61,20 \mathrm{~W}$. long. See the article Louiflboirgh.

Cape-Cod, a: promontory, which forms a fine harbour on the coart of Maflachufets - Bay, and forms one of the countics of that province under the name of Barnftaple county. It circum. fcribes barnftaple-bay, and has been formed liy the coil and recoil of the tides, rolling up filt and fand, Many alerrations have

## C A P

been made, and are continually making on the li. coalt, at the back of this promontory, and a long point of fand has heen formed into bolid markh-latd within 40 years paft, at the $S$. point ot it, called George's Sand. It has its name from the guantily of cod-filh caught on its coaft, and the biy is capable of containing 1000 largo veffels with fafery.

Cape-fear, an headland in North Carolina, near which is Johnfon's - Fort, in Brunfick county, in the ciftrict of Wilmington, which gives name to a conliderable river of two brasehes that extend in North Carolina.1.at. 78, 25 . lat. 33, 40 .

Caleffrancois, the capital of the French divition of the 1fand of St. Domingo, in the Weft Indies. It is fituated on a Cape on the $N$. fide of the illand, at the edge of a large plain 20 leagues long, and, on an average, four broad, letween the fea and mountains. There are few lands better watered, bu: there is not a river that uill adnit of a lloop above 3 miles. This space is cut throigh by fraight roals, 40 feet broad, conitantly lined wibh hedges of lemon-trees, intermixad with long avenues of lofty trecs, which lead to plantations, which produce a greater qumtity of fugar than any country in the world. The town, which is fituited in the moft unhealthy place of this extenfive and beautiful plain, confifts of 29 ftraight, narrow, and dirty frects, divided into 226 allotments, which comprchend 8 so houfes. The governor's houfe, the barracks, and the King's ma. gazine, are the only public buildings which attract the notice of the curious; but thofe that deferve to be confidered by the humane, are two hofpitals called the Houres of Providence, founded for the fupport of thofe Europeans who come bither without money or merchandize. The women and mea reccive Separately all the fub.

## C A P

## C A R

fiftence that their fituation requires, till they are engaged in employnnents. This eftabibithment is ouly to be equalled at Carthage. na, in all the Well Indies; and to it is imputed, that fewer die at this town than in any other which itands on the coaft of this illant. Thic harbnur, admirably well fruated for thips which come from Europe, is only open to the Nothth, from whence it can receive no dirnage, its entrance being frinkled over with reefs, that break the force of the waves.

Cape Hatteras, a headland on a bank of the fame name, off North Carolina; which bank inctofes banticoe Sound. Long, 76, to. lat. $35,5$.

Cabe Look-out, a headland of the comply of Carteret, In the difiria of Newbern; on a bank of the fame name, that inclofes Core Sound. Long. 77, 10. lat. 34,30 .
Cabs May, a county, and the mont S. point of land, in W. Jerfy. Cape St. Nicholas, a principal town and cape on the *. W. corner of the Erench Divilion of St. Domingo, in the Weal Indies, where is a harbour equally fine, fafe, and convenient, about 2900 yards broad at the enitrance, where fhips of any burShen may ride at anchor in the bafon, perfectly fafe, even during - hurricane. siace the late peace It is become of impertance, the houfes have been all rebuilt, and, confequence of its being declared a free port, the inhabiliants receive a fublitence, which the adjacent country could not fupply them with. Their houfes are now well-built, and the town divided into feveral freets, all fupplied by currents of runningafter: it confifts of 400 good houfes, befides a large fure-houfe the navy, and hofpital, and eral public buildings; 500 nees are conitantly employed on fortifications; and, when thore the town and adjoining batteries
are compleated, they are to begin a citadel on the N. point, which is to the mounted wih too pieces of cannon. For the conveniency of trade eflablibihed in this port, an excellent carriage road has been made hetween the Mole of St. Nicholis and Cape Francois. In 1772 the number of vellets cleared ontwards amounted to between 2 and 3 co for North America, and for Europe 400 . Its environs produce tugar, indigo, cotton, and confice.

Caperay, the S. W. point of Newfoundllaud, F. N. E. 20 teagues from Cape Breton, and 22 lagnes to Bird Allands, in the Sinf of St. Laurence. Long. 59, 15 . lat. 47, 40.
Capacers, a province on the Tema firma, bounded on the N . by the Carribleas: Sea, on the F. by the provinc of Cumana. on the s. by New Granat", and on the v". Vy Venezula. This coaft is borired in its greatelt length by a chain of mountainz, running $E$, and W. and divided into a number of very fruitf:l vallies, whore dirction and opening are towards the N . it hastivo maritime fortified towns, Puerto Cabelo and La Guayra. 'The Duteh carry thither all sirts of European goods, effecially linen, making vall returns, efpecially in filver and cocua. They trade to it a litile from Jamaica; but as it is at fecond hand, it cannot be fo profitable as a direct trade from Europe would be. The cocoatree grows here in abundance, and is their chief wealth. The tree has a trunk of about a foot and a half thick, and from feven to eight fect high, the branches large and Spreading like an oak: the nuts are enclofed in cods as large as both a man's fifts pur together, and refemble a melon. There maly be commonly 20 or 30 of thefe cods on a tree, which are about half an inch thick, brittle, and harder than the rind of a lemon. They neither ripen,

## CAR

nor are gathered at once, but t: ke up a month, fome ripening befort uthers. When gathered, they are laid in feveral heaps to fwat, and then burfting the thell with their hands, they extraft the nut, which is the only fubftance they contain, having no pith about them. They lie clofe flowed in rows like the grains of maize. There are generally 100 nuts in a cod, which are big or fmall, in proportion to the fize of the cod. They are then dried in the fun, they will keep, and even falt water will not hurt them. There are from 500 to 1000 or $20 c o$ in a walk, or cocoa planta-. tion. Thefe nuts are paffed for money, and are ufed as fuch in the bay of Campeachy. Latitude 10,12 . long. 67 , 10.

Caribbee-lsiands, a clufter of : Alands io the Atlantic 0 cean, fo called from the original inhabitants being faid, thongh very unjufly, to be cannibals. The chisef of trefe illands are St. Cruz, Sombuco, Auguilla, St. Martin, St. Bartholomew, Barbuda, Satia, Eulfatia, St. Criftopher, Nevis, Antigua, Montferrat, Guardaloupe, Defiada, Maragalinte, Dominico, Martinico, St. Vincent, Barbadoes, and Gra-nada.-See each under its proper article.

Carinacou, one of the Gra-nadilla-Iflands, in the Weft-Indies; the fecond in fize; about 4 leagues from Granada, and was the only one the French had cultivated before it was delivered so the Englifh, 1763. It has a fine harbour, which is as fafe, large, and convenient as any in this part of the world. This ifland produces a great quantity of cotton, and is very fertile, but has no fpring of frefh water.

Carliste, the principal town in the county of Cumberland, in Penfylvania. It is fituated on a bratich of the Sufquchannahriver, from which later it is diftant about 32 miles. It has con-

## C A R

fiderable trade, and contains above Eco inhabitants, and is aboat 28 miles N. W. of York.

Cariog, a town of Varagua, in New Spain, fituated 45 miles S. W. of Santa Fe. It ftands on a large bay, before the mouth of which are a number of fmall iflands, entirely defert, the natives having teen fent to work in the mines by the Spaniards. Latitude 7, 40 . long. 82, 10.

Caroi.ina, part of that valt tradt of land formerly called Florida, bounded on the N. by Virginia, on the S. hy Georgia, on the $W$. by the Miffifippi and Lovifiana, and on the E. by the Atlantic Ocean. It lies between the lat. of 33 and 37 . long. 76 , and 91. and 700 miles long, and $33^{\circ}$ broad. It is now divided into North and South Carolina.

Divifion of the Province of South Carolina into diflricts.

Charles town diltriat includes all places between the north branch of Santee river and Com-bahee-river and the fea, including the illands by a line drawn from Nelfon's Ferry diredtly towards Marr's Blutf, on Savannah-river, until it ine erfects the fwamp at the head of the S. branch of Com-bahee-river.

Beaufort diftrict includes all places to the fonthward of Com-bahee-river and the fwamp aforefaid, between the fea, including the iflands, and the faid tine ro be continued from the main fwamp a forefaid to Mathews's Bluff on Savannah-river.

which divides the parifhes of St . Mark fron the parith of PrinceFrederick, which is continued in the fame courfe acrof's Pedee to the North-Carolina boundary.

Camden diftrict is bounded by the faid line which divides the parihes of St. Mark and Prince Frederick, Santee, Congaree, and Broad tivers, and by a north-weft lime from the northernmoft corner of WilliamBurgh townhhip to Lynch's creek, and from thence by that creek, and a line drawn from the head of that creek upon a cuurfe north, thirty degrees weft, until it interifets the provincial line.
Cheraws diftrict is bounded by the faid laft-mentioned line, the provincial boundary, and the line dividing St. Mark's and Prince Frederick's parithes, which is continued until it interfects the northern provincial line.

Nincty-fis diltriat extends to all other parts of the province not already defcribed.
In thefe ditricks are the following counties:

In South Carolina:- Charles-Town,—Berkeley,-Granville,-Craven-Colleton-Urangeburgh Cheraws, - Ninety-fix,-Camden

North Carolina is divided into diftricts as follows :
Wilmington, which contains the connties of New-Hanover, Brunfuick, Bladen, Onfow, Duplin, and Cumberland.
Newbern contains the counties of Craven, Carturet, Beaufort, Hyde, Dolbbs, and Pitt.

Edenton cuntains the counties of Chowan, Perquimons, Pafquotank, Curanuck, Berric, Tyirel, and Herif id.

Halifax cuntains the counties of Nurthampton, Edgecumbe, Bute, and Johnflon.
Hilliborough contains the counties of Orange, Granville, Chatham, and Wake.
Salifoury contains the counties

## C A R

of Rowan, Mecklenburgh, Anfon, Tryon, Surry, and Guildford.
Formerly the coaft of N. America was all called Virginia. The province properly fo called, with Maryland and the Carolinas, was known by the name of South Virginia. By the Spaniards it was confidered as part of Florida, which country they would have to extend from New Mexico to the Atlantic Occan. They firft difcovered this large country; and, by their inhumanity to the natives, loft it. The Spaniaris, no more than the French, paid any attention to this fine country, and left it to the enterprifing Englifh, who, in Sir Walter Rawligh's time, projected fettlements there; yet, through fome unaccountable caprice, it was not till the reign of Charles 11. in 1663 , that we entertained any formal notions of fetting that country. In that year, the Lords Claremdon, athemarle, Craven, Berkeley, Aifley, afterwards Shatbary, sir Cieorge Carteret, Sir Will:am Ecrkeley, and Sir Geo. Colleron, from all whicls the different comnties, rivers, towns, \&c. were called, obtained a chatter for the property and jurifdiction of that country, from the 31t degree of N. latitude, :o the $3^{6} \mathrm{~h}$; and being invefted with fuil power to fettle and govern the country, they had a model of a conflitution framed, and by a body of fundamental laws compiled by that famous philotopher Mr. Lock. On this plan the propiletors flood in the plaee of the king, gave their affent or negative to all laws, appointed all offiecre, and beftowed all titles of dignity. In his turn, one atways actel for the re?t. In the province they appointed twn other branches, in a good meafure analagous to the legifature in England. They made three ranks, or rather claffes, of nobility. 'I he loveft was compofed of Lutie

## C A R

whom they called barons, and to whom they made grants of 12,000 acres of land. The next order had 24,000 acres, or two baronies, with the title of eafignes, anfwering to our earls. The third had two cafignefhips, or 48,000 acres, and were called I. andgraves, analagous to dukes. 'This body formed the upper houre, whore lands were not alienable by parcels: the lower houfe was formed of reprefentatives from the feveral towns and counties. But the whole was not called, as in the other plantation, an affembly, but a parHament. They began their firf fettlement between the two navigable rivers, called Aflcy and Couper, and laid the foundation of the capital city, called Charlestown, in honour of King Charles. They expended about 12,0001 in the firf fettement; and ohererving what advantages other colonies derived Irom opening an harbour for refugees of all perfuztions, they by doing fo lirought over a great number of diffenters, over whon the then government held a more fevere hand than was condiflent with the rules of true policy. Thefe, however wife appointments, wtre in a manaer fruftrated by the difputes between the church men and diffenters, and alfo by violent oppreffions over the Indians, which caufed two defructive uars with them, in which they conquered thofe natives, as far as to the Apalachian mounrains. The province then, by an adt of parliament in England, was redemanded, and put under the protection of the crown; except the eighth part of the Earl of Granville, which he referved, the other proprietcrs accepting of about 24,0 col. Carolina was fince dieided into two diftinct governments, South and North Carolina, in 1728; and in a little time firm peace was concluded between the finglifh and the neighouring Lediars, the Cherokees and the

Catanbas, and fince that time it has advanced witt an aftonifhing rapidity. 'This is the only one of the provinces on the continent :hat is fubject to hurrieanes. The country where they have not cleared, is, in a manner, one foreft of all kind of trees. But its chief produce, the beavers of Carolina, are deftroyed here, as they are in Canada and elfewhere, by the encouragement the Indians received to kill them. As the land abounds with natural manure, or nitre, fo it needs no cultivation in this refpect; and what is Itrange; indigo in its worft lands grows to a great advantage. Their ground does not antwer fo well for wheat, which they are fupplied with from New-York and Penfylvania, in exchange for their fine rice, in which they are unrivalled. The climate of thefe provinces is nearly alike, and much the tame as that of Virginia; excepting that the fummers are longer, and more intenfely hot, and the winters thorter and milder; fo that, tho' now arid theis a fudden cold comes on, the frofts are never flrong eneogh to refif the noon-day warmth. The fuil is various: near the fra it is marthy, lying low ; and, indeed, the lands of Carolina are a perfest plain for Eo miles within land, frarcely a pebble being to be found; however, in proportion to the diflance from the fea, their fertility increafes, till they are exceeded by none, either for that or picturefque beauty: The chief prow ductions are, indigo, olive, vine, hiccory, oak, walnut, orange, citron, pine, cyprefs, faflafras, caffia, and white mulbery trees for lilkworms: farfaparilla, and pines yielding rofin, turpentine, tar, and pitch; alfo a tree diftilling an oil very efficacions in the cure of wounds, and another yielding a balm nearly equal to that of Niecca; rice, tobacco, wheat, Indian* corn, barley, oats, peale, beans,

## R

ce that time it an aftonifhing s the only one on the continent urrieanes. The y have not clear$r$, one foreft of But its chief ers of Carolina, , as they are in jere, by the enIndians received he land abounds ure, or nitre, fo ation in this ref; ftrange; indigo grows to a great ir ground does vell for wheat, plied with from Penfylvania, in ir fine rice, in mrivalled. The ovinces is nearly the tame as that epting that the iger, and more nd lhe winters er ; fo that, tho' dden cold comes re never flrong the noon-day fuil is varions: s marfhy, lying d, the lands of erfest plain for land, fcarcely a be found; howin to the ditlance cir fertility inare exceeded by that or pictuThe chief prod go, olive, vine, hut, orange; ci, rafldfras, caffia, y trees for lilklla, and pines urpentine, tar, ree diftilling an in the cure of cher yielding a to that of Mecwheat, Indian* , peaft, beans,

## C A R

hemp, flax, and cotton; great quantities of honey, of which are made excellent ¢pirits, and mead as goot as Malaga fack. The great ftaple connmodities are indigo, rice, and produce of the pinc. Indigo and rice S. Carolina has to licrelf; and, taking in North Carolina, thefe two yield more pirch and tar than all the rell of the colonies. Rice formed once the Aaple of this province; this makes the greatef part of the food of all ranks of people in the fouthern parts of the new world. In the northern it is not fo much in requeft; and this one branch is computed to be worth 150,000 . a year. It is faid great attention to in S. Carolina, where it is cultivated to a very confiderable advantage, particularly at Charles-town. There are in the two provinces which compoie Carolina, the following navigable rivers, and innumera. ble finaller ones; viz. Roanoke or Albemarle, Pamticoe, Neus, Cape Fear or Clarendon, in N . Carolina; Pedce, Santee, in S. Carolina; ail which, tho fwarming with filh, abounds with troublefome cataracts, which inpede navigation. - Along all thefe countries, the Atlantic Ocean itfelf is fo thallow near the eaftern coults, that no large Mips can approach them, but at a few places. In this divifion are the following capes: Hatteras, Look-out, and Fear. There are but few harbours, viz. Roanoke, and Pam. ticoe, in North Carolina; Winyaw or George-town, Charles-town, and Port-Royal, in S.Carolina; all whofe rivers rife in the Apalachian mountains, and run into the Atlantic Ocean. On the back parts are the Cherokees, Yafous, Mobille, Apalachicola, Peart rivers, \&c. the two firtt of which fall into the Miffifippi-river, the others into the Gulf of Mexico. North Carolina is not fo wealthy as South, but it has more white people. Edenton was the capital of North

## C A R

Carolina, but it is now only a village ; from thefe colonies fome famples of filk have been produced, equal to the Italian; but the fudden changes from heat to cold, which fometimes happen here, difagree with the worms. The making of wine has been of late years introduced; and, with proper management, it is thought, cannot but fucceed.

The value of the exports has amounted, for fome years paft, to near half a million terling annually. In the year 1734, the value of the exports was computed at little more than $100,000 \%$. fterling.

The number of veffets cleared out at the Cuftom-boafe, inCharlestown, in 1772, was four hundred and thirty-one; is 1773, fivehundred and feven. In 1734, the number of veffels cleared out was rwo-hundred and nine; and in 1736, two-hundred and feventern.

In the year 1770, the number of dwelling - houtes in Charlestown was twelve-hundred and ninety-two.

In the fame year, the number of white-inhabitants, in Charlestown, was five thoufand and thirty.

The number of negro and other Gaves was 6276; free negroes. mulatoes, \&c. 24. Total 6,300.

The number of men in Charlestown, (December, 1773) on the militia muiter-roll, was upwards of 1400 , and the number of inhabitants is computed at fourteen thourand.

The number of men on the feveral militia mufter-rolls throughout the province, in 1773, was about 13,000 ; and the total number of white inhabitants calculated to amount to about fixty-five thoufand.

In 1770 the number of negra and other flaves, exclufive of thore in Charles-town, amounted to 75,452; free negroes, \&c. 135 ; great numbers have been frice

## C A R

imported, and the whole number of negroes, mulattoes, \&c. now in the province, is eftimated to be upwards of an hundred and twenty-houfard. The number computed by the Congrefs, in 1775, was $225, c c o$ inhabitans.

The fums neceflary for defraying the annual expences of government, are raifed by a poll-tax on ीlaves and free negroes, a tax on land, value of town-lots and buildings, monies at intereft, or arifing from annuities, fock in trade, and the profits of all $\mathrm{f}_{\mathrm{d}}-$ culties and profeffions, the clergy excepted, fastorage and employment, and handerafis trades; which is called the general tax. In the law paffed 1768, to raife the fum of $105,773 \mathrm{l}$. 9 g . 6 d. the proportions were as follows, being what are generally obferved, viz. naves and free negroes, the head 12s. 6d. lands, the 100 acres 12 c . 6d. fown lots and buidings 6 s . $\mathrm{g}^{\prime \prime}$. on every iccl. value; monits at intereft 6s. 3d. the rocl. annui ties 25 . on every 100 . Thock in trade, profirs of faculties and profeffions, \&c. 6s. 3t. on every 1001. The general tax collected in 176 g , was $14^{6}$, 19gl. 1s. 54. and the laft collected, viz. in 1771 , was 102,1111. 13!. 11 ! .

The annual expences of government in 1767, amounted io 151,3:71. 95. 3d. and in 1763 104,4401. 19:. 3n. The Ripends of the efablibed clergy, farochial charges, \&cc. amounting to about $18,0 c o l$. per annum, are not included in the above fums, being charged to the gencral duty fund. The falary of the chief juftice, affiftant judges, and at-torney-general, now make an addition of 15,400 . per annum to the expences of government.

In 1772 , the produce of the feveral country duties was 97,8041 . 145.6 d . but this was a larger fum than they had produced for Come ycars preceding; the increafe arofe from the great number of negroes imported in that year.

## C A R

The amount of the poor-tax raifed in Charles town, in 1769 , was 7 cool , the next year 8ocol. and in the two fuccecding years goool. each year. 'The poor tax laifed in the fame manner as the gencral tax.

In North Carolina the number of taxables in the year 1770, was upwards of 5S,000; in 1774, 64,000. The number of negroes and mulattoes is computed at about 10,100 .

Carteret, a maritime county in the diflrift of Newbern, $N$. Carolina, whofe principal fe:fort is Eeaufort. It has the river Nufe and Pamticoe Sound on the $N$. and the ifa furrounds the $F$. and the S. parts of it: and it is hounded on the W. by Onflow and Craven counties.

Carthagena, a large city of the capital of a province of the fame name, in the Terra Firma, It was founded in 1527.

Fromi feveral natural advantuges, particularly that of its fine fintation, it was raifed into an crifcoral fice. Thefe advantages foon cxrited the envy of forei, ners, farticularly the French, who iuvaded it in 1544. The fecond invader was sir Francis Drake, in 1586 , who, after pillaging it, fet ic on fire; but it was harpily refcued from the flames liy a ranfem of 120,000 ducats fad him by the neighbouring colonics. It was invaded and pillaged a third tince by the French, under Monf. de Pointis, in 1597 , when their booty was 2,5 c0,000l, fterling.

The city is fituated on a fand; ifland, which, forming 2 narrow potages on the S. W. open a communication with that part callcd Tierra Bombe. As far as Bocca Chica on the $N$. fide the land is fo narrow, that before the wall was begun the diftance from foa to fea was only 70 yards, but afterwards the land enlarging by moans of the wall, it forms anve ther iflaud on this fide, and the

## CAR

Whale city is, excepting thefe two places, which are very narrow. entirely furrounded with water. Eaftward it communicates, by means of a wooden bridge, with a large fuburb, called Hexemani, built on another ifland, which comminieates with the continent by another wooden bridge.

The fortifications both of the city and fuburbs are conftructed in the modern manner, and lised with freeftone.

The garrifon in time of peace confifts of ten companies of regulars, each containing 77 men , officers included, befides feveral companies of militia. The uhole city and fuburbs are commanded by the caftle of St. I, azaro, which lies on the fide of Hexemani on an eminence; from whence and other adjoining hills there is an enchanting view of the county and coaft, to an immenfe diftance.

The city and fuburbs are well laid out, the freets being ftrait, broad, uniform, and well paved. The houfes are moftly built of Aone, and have but one Rory. All the churches and convents are of a proper architecture ; but there eppears fomething of poverty in the ornamental part, and fome want what even decency might require.

Carthagena, together with its Ruburbs, is equal to a city of the third rank in Europe. It is well peopled, though moft of its inhabitants are defeended from the Indian tribes. As no mines are worked here, moft of the money feen in this part is fent from Santa Fc, and Quito, to pay the falaries of the governor, officers, and garrifon.

The governor refides in the city, which till the year 1739 was independent of the military governments. In civil affirs an appeal lies to the audience of Santa Fe ; and a viceroy of Santa Fe being That year created, under the tirfe of Viceroy of New Granada, the Bovernment of Carthagena beFame fulbect to him alfo in military affairs. The firt viceroy

## C A R

was Lieutenant general Don Sebafian de Efclava, the fame who defencled Carthagena againft the powerful invafion of the Englifh in 1741, when after a long fiege, with 25 hips of the line, 6 fireMips, 2 bomb-kctches, and troops enough to have then conquered half America, they were forced to retire.

Carthagena has alfo a bihop, whofe fpiritual jurifdiction is of the fame extent with the military and civil government. Here is alfo a court of inquifition, whofe power is very extenfive.

Carthagena bay is one of the beft in this country. It extends two leagues and a half from N . to S. and has fafe anchorage, though the many fhallows at the entrance make a careful feerage neceflary. The entrance into the bay was through the narrow Areight of Bocca Chica, or little mouth, but fince the invafion of the Englith a more commodious one has been opened and fortified. Towards Bocca Chica, and two leagues and a half diftant feawards, is a hoal of gravel and coarfe fand; on many parts of which there is not above a foot and a half of water.

The bay abounds with great variety of fin ; the molt common are the Thad and the turtle; but it is alfo infefed with a great number of harks. In this bay the galleons from Spain waited for the arrival of the Peru fleet at Panama ; and on the firft advice of this, they failed away for Porto Fello; but at the end of the fair held at that town, return into this bay, and after victualling pust to fea again immediately. During their abfence the bay was very little frequented. The countryveffels, which are only a fow bilanders and feluccas, Itay no longer than to careen and fit out for fea..

The climate is very hot. From May to Noveinber, which is the winter here, there is almort a continual fucceffion of thunder, rain, and tempefts; fo that the ftreet:s

## C A R

have the appearance of rivers, and the country of an ocean: from this, otherwife fhocking inconvenience, they fave water in refervoirs, as the wells fupply them only with a thick, brackilh fort, not fit to drink. From December to April is here the fummer, in which there is fo invariable a continuation of excefive hear, that perfiration is profufe to a degrce of watte; whence the complexions of the inhalitants are fo wan and livid, that one would imagine them but newly recovered from a violent fit of ficknefs : yet they enjoy a groal fate of healih, and live even to 80 and upwards. The fingularity of the climatic occafions diftempers peculiar to the place: the moit fhocking is the fever, attended with the black vomit, which moflly affects frangers, and rages among the feamen; it lafts abcut threc or four days, in which time the patient either recovers or dies, as it is very acute, and on recovery is never troubled with it again.

Another diftemper peculiar to the inhatitants is the leprofy, which is common and contagiou:: nor is the itch and harpes lefs frequent or communicative, and it is dangercus to attempt the cure when it has once gaired ground; in its firf flage they anoint with a kind of earth, called Maquimaqui. The little fnake is particular to this climate, which caufes a round inflamed tunour, which often terminates in a mortification. Spafms and convulfions are very common here, and frequently prove mortal. The principal trees for fize are the caobo, or acejou, the cedar, the maria, and the ba!fam tree. Of the firft are made the canoes and champagnes ufed for filhing, and for the coaft and river trade. The reddifh cedar is preferable to the whitifh. The maria and balfam trees, befides the ufefulnefs of their timber, which, like the others, are compact, fragrant, and finely grained,
difil thofe admirable balfams called maria-oil and balfam of Tolv, from an adjacent village, where it is found in the greateft quantities. Here are alfo the tamarind, medlar, rapote, papayo, gualo, canno fillolo, or caffia, palm, and manzanillo; moft of then! ; roducing a palatable, wholefome fruit, with a durable and variegated wood. The manzanillo is remarkabie, as its fruits are poifonous, the antidote common oil; but the wnod is variegated like marble. It is dangerous even to lie under this tree.

The guiacum and ebony trees are equally common here; their hatdneis almoft equal to iron. The ferfitive plant is found in great plenty. The bejuco, or bind-weed, here, bears a fruit called habilla, or hean, very bitter, but one of the molt effectual antidotes againft the bites of vipers and rerpents. Perfons who frequent the woods always eat of this valuable habilla, and then are no way apprehenfive from the bite, though ever fo venomous.

The only tame animals here are the cow and the hog: the fith of the later is faid to exceed the beit in Furope, while that of the former is dry and upalatable, as they cannot fatten through the exceeffive heats. Poultry, pigeons, partridges, and geefe, are very good, and in great plenty. There are alfo great quantities of deer, rabbits, and wild boars called fajones. The tigers make great havock among the creatures. Here are foxes, armadillocs, or fcaly lizards, ardillas, fquirrels, and an innumerable variety of monkeys.

The bat is here very remarkabie; for the people, on account of the hear, are obliged to leave their windows open all night, at which the bats get in, and open the veims of any part that is naked ; fo that from the orifice the blood flows in fuch quantities, that their feep has often proved their paflage to eternity. Snakes,

## R

## C A R

## C A R

vipers, centipes, and all other poifonous repiles, are here as common as in other parts.

Burley, wheat, and other efculent grains, are little known. Maize and rice, of which they make their bollo, or bread, abound even to exeefs. Plantations of fugar-canes abound to fuch a degrece, as greatly to lower the price of honey: and a great part of the juice of thefe canes is dittilled into fpirits: thefe grow fo quick as to be cut twice a year: Great numbers of cottontrees grow here.

The cacso-trees, from which chocolate is male, excel here. This is the mott valuable trealure which Nature could tave beitowed on this country. Among the fruits, which refemble thofe of Spain, are the melons, waternielons, called patillas, erupes, oranges, medlars, and dates : the grapes are not equal to thore of §pain, but the medlars far exceed them. The fruits peculiar to the country are, the pine apple, which, from its beauy, finell, and talte, Is ityled. by way of prefererce, the queen of fruits ; the papapayas, gunabanas, guaybas, fapotes, mameis, plantano: cocos, and many others. The common fength of the pinc-apple is wially from five to feven inches, and the dameter acar its balis three or four.

Lemons are fearec; but that defect is remedicd by a luxuriance of limes. As grapes, almonds, ind olives, are not natural here, the country is deftitute of wine, oil, and raifins, with which it is upplical from Europe.
The bay of Carthagena is the ift place in America at which the alleons were allowed to touch, nd hence it enjojed the firtifuits of commerce by the public les made there. Thofe fales, pough not accompanied with all he forms obferved at Porto-Bello ir, were yet very confiderable; r the sraders of Santa $F e$, lo.
payan, and Quito, laid out, not only their whole flock, lut alfo the monies entrufted to them by commiffion, for feveral forts of goods, and thofe species of provifions which were molly wanted in their refpective countries. The two provinces of Santa Fe and Popayan have no other way of fuppiying themfelves with thofe provilions but from Carthagena. Their traders bring gold and filver in fpecie, ingots, and duft, and alfo emerals; as, befides the lilver mines worked at Samta Fe , and which daily increafe by frefh difcoveries, there are others, which yield the fineft emerals: but the value of thote gems being now fallen in Eurore, and particularly in Spain, the trade of them, formerly fo confiderable, is now greatly leffened, and confequent 1 y the reward of finding them. All thefe mines produce great quantities of gold, which is carried to Coco, and there pays one fifth to the King. This little fair at Carthagena occationed a great quantity of thops to be opened, and filled with all kinds of merchandize, the proñt parily refulting to Spaniards, who ufed to come in the gallicons, which is now at an end.

The produce of the royal revenues in this city, being not fufficient to pay and fupport the governor, garifon, and a gre t number of other officers, the deficiency is temitted from the treafilres of Santa Fe , and Quito, under the name of Situado, together with fuch monies as are requilite for keeping up the fortifications, furnihhing the artillery, and other expences necellary for the defence of the place and its forts. Lat 10,26 . long. 77,22 .

Cartago, the capital of Colta Rica in New Spain, fituated ten Icagues from the North and 17 leagues from the South Sca, having a port in each. It was formerly in a much more fouriming fate than at prefent, Several sicio

merchants refided here, who carried on a great trade to Panama, Porto Bello, Carthagena, and the Havannah. It had alfo a governor, and was the fee of a bifhop; but at prefent it is only a mean place, has very few inhabitants, and hardly any trade. Latitude 9,15 . long. $8_{3}, 16$.

Carvelof St. Thomas, 2 rock between the Virgin Illes, E. and Porto Rico on the W. At a fmall diftance it appears like a fail, as it is white and has two points. Between it and St. Thomas pafies Sir Francis Drake's Channel.

Casco Bay, in the county of York, in the province of New Hampthire, New England. This lay, if reckoned from Cape Flizabeth to Small Point, is 25 miles wide, and about 14 deep; is a mont beautiful bay full of tittle inlands. Brunfwick ftands on the N.E. cove of it, and Falmouth, a fweet pretty town, on a moft delightful fcite at the S. W. end of it, which is now no more, being deftroyed in January, 1776, by the Britifh forces, for refufing to fupply them with naval itores. Lat. 44, 10. long. 69, 35 .

Cat-Island, or GuaNAHANI, one of the Bahama Illands. It was the firft difcovered by Columbus, on Octoher 11, 1492, to which he gave the name of St. Salvadore. It lies on a paticular bank to the F . of the Gireat Bank of the Bohamas, from which it is parted by a narrow channel called Exuma Sound. Long. 74, $3^{\text {c. lat. } 24,30 .}$

CAECA, a river in the inthmus of Darien, whoic fource is in common with that of La Medalena in the Lake lapas, near the 8ih degree of S. latitude, and which about : sleagues from Carthagena falls into this laft river, after a courfe of 160 leagues, nearly in the fame direction.

Cavallo, a fea-port town in the province of Venezula on the Terra Firma, or Ifthmus of Darien, 25 miles N. E. of St, Jago

## C H A

de Leon. It was attacked by commodore Knowles, but without any fuccefs. Lat. 10,15 . long. 68, 12 .
Caymans, three fmall Inands, 55 leagues N. N. W. of Jamaica; the moft foutherly of which is called the Great Caymans, which is inhabited; its filuation is very low, but it is covered with high trees, and habitable part is about half a mile long. It has no harn bour for lhips of burthen, only 3 tolerable anchoring-place on the S. W. The number of inhabitants is about 160 , who are defcendants of the old buccaniers. They have no clergymanamongt them, but go to Jamaica to be married. This little colony is undoubtedly the happieft in the Wefl Indies: the climate and foil, which are fingularly falubrions, render thefe people healliy and vigorous, and enable them to live to a gras age. The Little Cayman pro. duces plenty of corn and vegetables, hogs and foultry, much be. yond what is wanted for their own confumption. They have alfo fugar-canes, and plenty of good water. 'I heir principal em. ployment is fifhing for turtle, and piloting veflels to the adjoining iflands. The turtles, of which they have great pienty enable them to fupply Port-Royal and othat places with great quantities. Ite Great Caymans lics in lat. $15,4^{3}$. long. So, so.

Chagre, 2 rivet in Sowh America, and empirc of Perv. It was formerly called Lagortas, from the number of alligators in it ; has its fource in the mountains near Cruces, and its mouth in the North-Sea, in lat. 9. Its entrance is defended by a fort, built on: fleep rock on the E. fide near the fea-fhore. This fort has a como mandant and lieutenant, and the garrifon is draughted from Pana. ma, to which you go by this river, landing at Cruces, about 5 leagus from Panama, and from thence one travels by land to that cilge

Oppofite to Fort Chagre is the royal cuftom-houfe, where an accoment is taken of all goods going up the river. Here it is liruadeft, being 120 toifes over; whereas, at Cruces, where it begins to he navigatile, is is only 20 toifes wide: from the town of Chagre to the mouth of the river is 21 miles, or feven leagues, and the bearing N. W. wefteriy; but the diftance meafured by the windings is 43 miles. There is at Cruces an alcalde, at the cuftom-houfe.

Chambers, a town in Cumherind county, Penfylvania, fitwated on a branch of the Potowmack river, in a trading pach irom Maryland toCarlifle, from whence it is diftant $3 . W$. about 35 miles. Champlais, a lake on the N . borders of New-York; and on the W. of Canda, where are feveral forts. Lat. $+4,10$. Long. 73, 10. Charies, a town in the E. Hivition of Maryland, on the Bottom of Cheafapeali-hay, near the entrance of Sufquehannah ritur.
Charles-cape, apromontory, mentioned in Capt.James'sVoyage. lat. 66, 00. Long. S7. 22. Charees-town, in St. Masy's county, Maryland, is fituated on the N. bank of the Yotowmack tiver, 42 miles S. W. from Annaspolis, and 22 from Bethaven. Charles-town di!trít, in S. Carolina, includes all places between the N. branch of Santee tiver and Combahce river and the fea, including the inands by a dine drawn from Nelfon's Ferry tairectly towards Marr's Bluff on Gavannah river, till it interfects The framp at the head of the $S$. branch of Combahee river.

Charles-town, the metroolis of Charles-town county in outh-Carolina, and indeed the only valuable town in this or North-Carolina, is one of the firft n North-A merica, for fize, beau$y$, and traffick. It is fituated on neck of land between two naviable rivers, A.hley and Cowfer;

## C H A

but moftly on the latter, having a creek on the N. fide, and another on the $S$. The town is regno. larly built, and pretty Atrongly fortified, both by nature and art. It has fix batlions, and a line all round it. Towards Cowper river are Blake's-battion, Granvilic's. batton, a half-moon, and Cra-ven's-baltion: on the S. creek are the palifatoes and Athicy'sbaltion: on the N. a tiar: and facing Aftaley river are Colletonbaltion and Johnfon's covercd halfmonn, with a draw-hridge in the line and another in the half-moon; Carteret-!altion is the next to it. Befides thefe regular works, another fort has been erected upon a point of land at the mouth of Ahley river, which commonds the channel fo well, that Mips cannot eafily pafs it. The battions, palifadoes, and foffe next the land having been nuch damaged by a hurricane, and reckoned to be of too great an extent to he defunded by the inhabitants, Governor Nicholion caufed them to be demolifhed; but thofe near the water fill fubfift, and are in good repair. This place is a market-town, and to it the whole product of the province is brought for fale. Neither is its trade inconfiderable; for it deals near 1000 miles into the continent. However, it has the great difadvantage of a bar which admits no hips ahove 200 tons. But this bar has 16 feet water at low tide; and af:er a Mip has get clore up to the town, there is goord riding. And the harbour is defended by a fort, called Johnfon'sfort, and about 20 guns in it, which range level wi:h the furface of the water. Ahley river is navigable for hilips 20 miles above the town; and for boats and pettyaugers, or large canoes, near 40 . Cowper river is not practicable for Phips fo far ; but for boats and petyaugers much further.

I'he fituation of Charles-town is very inviting, and the country

## C H A

nbout it agrecable and fruitful. The highuays are extremely drlightful, efpecially that called Eroad-way, which for three or four mike makes a road and walk So charmingly green, that $n$ : art could make fo plealing a fight for she whole year.

The ltrcets are well laid out, the houfes large, fome of brick, hut more of timber, and genesally fafhed, and let at exceflive rents. The church is ipacious, and executed in a very elegant tatte, excceding every thing of that kind in North-A merica, having three illes, an organ, and a g.llery quite round. There are nueeting-houfes for the feveral denominations of diflenters; among which the lirench proteflants have a church in the main ftreet, It contains about 800 houfes, is the fiat of the governor, and the place where the general atiembly and court of judicature are held, the public offices $k e p t$, and the lufineis of the frovince tranlacted. Here the rich people have handfome equipages; the merchants are opulent and well bred; the reople ase thriving, and expenfive in drefs and life; fo that every thing confpires to make this town the politelt, as it is one of the richeft in America. In this sown is a public library which owes its rife to Dr. Thomas Bray, as do mont of the American librarics, having zealounly folicited contributions in England for that pur pofe. Charles - Town received confiderable damage by a hurricane, September 15, 1753, as did the fhipping in the harbour. The beft harbour of Carotina is far to the $S$. on the borders of Georgia, called Port rojal. This might give a capacions and fatc reception to the largeft Acets of the greatent bulk and burden; yet the town which is calied Beaufort, in Port-royal harbour, is not as yet confiderable, but it lids fair for becoming the firn trading town in this part of America. Ihe import trade of South

feurces, two on each fide of Moollill, Naponfet, and Mafhapoog, which runs N. E. a third frings from the high elevated track s. of the islue-Hills; thefe all join at Doadham, and form Charles River; from thence it runs W. over talls at S. W. end of !rooklin-Hills, till it comes near Framingham Pond; it then runs N. W. to Canibridye, where winding round in a S. W. courfe, it fall's into Bofton Harbour.

Charles-Town, in the courty of Middecex, in the provinse of Maflachufets-Bay, in Ne.s England, fienated at the angulur point formed liy the two enrances of Charles and Miftic rivers, a hear, populsus, well built trading town; but was deffroyed by the Englith troops, June 17 , 1775, at the batile of Bunker'sHill, which was clofe to it, to precent the Provincials annoying them from the houlfes. It took up all the fpace between Mificriver and Charles-river, which loft fepiatated it from Bofton, as the Thames does London from Souhwark, and is as depcondent upon, and in fome fenfe a part of it,
$\therefore$ as the latter is of the metropolis of Great Britain. It had a ferry over the river; fo that there was hardly any need of a bridge, except in winter, when the ice sould nether bocar not atimit of a boat. The proprietors ont of the profits ware obliged by law to pay 1501 . Alcring, to Havard College, in the neighouring town of CamLridge. Theugh the river is much broader atiove the town, it is not wider at the ferry than the Thames between London and Souithwark. It was nearly half as large as Boitos, and capable of being made as ftron!, flanding as that did upon a perininfula. It was boih a market and county-town, had a good large church, a market piace in a handfome fquare by the tiver fide, fupplied with all neEefliary provifions both of feh Find filh, and two long frects
lealing down to it. The river is navigable, only for fimall craft, and runs feveral miles up the country. Lat. 42, 26. lung. 7/d 5.

Charleg-Town, the ouly town on the illand of Nevis, one of the Cariblees, in the W. Indies. In it are lirge houfes and well furnithed thops, and is defended by Chailes-fort. Here thair market is kept every Sunday from funrife till nine o'clock in the forenoon, when the negroes bring to it Indian corn, yams, gardenftiffs of all forts, \&c. Iron-wool and lignum vita are purchafed by tine planters of this illand, as well as thofe of St. Chriftopher, from the iflands of Defcadi, St. Bartholomew, Sunta Cruz, in order to ferve as pofts for theis fugar-houfis, mills, \&c lin the parith of St. John, on the S. fite of Charles-town, is a large fout of fulphureous ground, at the upper end of a deep chafm in the carth, commonly calied Sulphur-gur, which is fo hot as to be felt through the foles of one's Mlors. At the foot of the declivity, on the fame fide of this town, is I fmall hot river, called the Bath, fuppofed to proceed from the fail gut, which is not aloove three quarters of a mile higher up in the comntry. its courie is at leaft for half a mile, and afterwards lofes itfelf in the fands of the fea. At a particular part of it, towards the fea-fide, a perfon may fet one foot in a fpring that is extreme'y cold, and the other at the fame time in another that is as hot. The water of Blackrock pond, about a quarter of a mile N. from Charlestown, is milk-warm, owing to the mixture of thofe hor and cold 'prings: yet it yickls cexcellent filh; particultiriy fine eels, filver filh, whirh has a bright deep body eiglit inclies long, and taftes like a whiting: aifo nim-guts, as having a head too large for the fize of its body, which is from ten to

## C H A

twenty two inches long, and in sufte and colour like a gudgeon.

A prodigions piece of Nevis. mombain falling dnwn in a late curthquake left a large vacuity, which is fill to be icen. The altitude of this momntain, taken by a quadrant from Charles-toxn hay, is faid to be a mile and a half perpendicular, and from the faid bay to the top four miles. The reclivity from this mountain to the town is very feep half-way, but afterwards eafy enough. The hill, here called Saddle-hill, as appsaring at the top like a faddle, is higher than Skiddaw-hill in Cumberland, in the North of England. Sce Nevis. Latitude 16,5. long. $6 \mathrm{r}, 55$.

Charteton.Island, or Charles-istiand, is fituated on the ealtern- hore of Lahrador, in that part of Norch America called New South Wales. Its foil confifts of a white, dry fand, covered over with a white mofs, abounding with juniper, and fpruce-trees, though not very large. This ifle yields a beautiful profpect in fring to thofe that are near it, after a voyage of three or fonr months in the moft uncomfortable feas on the globe, and that by reafon of the vaft mountain of ice in Hudfon's-bay and Areights. They are rocks petrified by the intenfenefs of the continual froft ; fo that hould a thip happen to frrike againft thefe, it is as inevitably dafled to pieces as if it tan full upon a real rock. The whole inand, fpread with trees and branches, exhibits, as it were, a benutiful green turf. The air even at the boltom of the bay, though in 51 degrees, a latitude nearer the fun than I.ondon, is exceffively cold for 9 months, and the other three very hot, except on the blowing of a N. W. wind. The foil on the E. fide, as well as the W. bears all kind of grain: and Some fruits, fuch as goofe-herrits, fraw-berries, and dew-berrits, grow about Ru-

Here they have achiotte, which the sia-

## C HI

tives mix with their chocolate to give it a bright colour ; likewife eoleworts, or cabhage-urees, fo Jarge that birds build in them ; and yet they are fwet and tender. Here are molt forts of wild and tame fowls, and very beaurifu! parrots; alfo a bird called toto, fmaller than a pigeon, with green feathers, which the Indians take for its fine tail, but let it go again after they pulled its fealhers out, it being held a cafial crime by their law to kill it. It abounds with cattle of all forts, fheep, goats, and fivine from Spain, having melliplied here furprifingly; efpecially a breed of fine horfes, fo valuable, that they fend their colts to Mexico, thongh 500 miles off. Beafts of prey, as fions, leopards, lygers, \&c. are rere in abundalice, wih foxes, rabbits, and wild logs. In this province alfo is plenty of fnakes, particularly in the hilly parts, frome of which arc 20 feet long, others are of a curious red colour, and Atreaked with white and black, which the natives wear aboun their necks. Here are two principal towns called Cliapa: which fie. The Chiapefe are of a fair complexion, couricons, \&reat mafters of mufic, painting, and mechanics, and obedient to their fuperiors. Its principal river is that of Tabafco, which running from the N . crofs the country of the Quelenes, at latts falls into the fea at Tablafeo. It is, in Mort, well watered; and, by means of the aforefaid river they carry on a fretty brik trade with the neighbouring provinces, efpecially in cochineal, and filk; in which laft commodity the Indians employ their wives for making bandkerchicfs of all colours, which are bought by the Spaniards and fent home. Though the Spaniands reckon this one of the pooreft countites belorging to them in America, as having no miuse or fatel of goid, nor any harbour on the Soubia-Sea, yet is

## C H I

larger than molt provinces, and inferior to none hut Guatimala. Uefides, it is a place of great importance to the Spaniards, becature the ftrength of all their empine in A merica rlepends on it; and into it is an eafy entrance by the river Tabafco, Puerto Real, and its vicinity to Yucatan.

Chiafa, the name of two towns in the above province of the fame name; the one is fometimes called Cividad Real, or the Royal-city, and the other Chiapa de los Indos, inhabited by Spaniards. Cividad Real lies 100 leagues N.W. from Guatimala, is a bithop's fee, and the feat of the judicial courts. It is a very delightrul place, fithated on a plain, and furrounded with mountains, and almo!t in the middle betwixt the North and South-Seas. The bihop's revenue is 8000 ducats a year, and the cathedral is a beantifill Amolure. Here are fome monaftries; but the place is ne:ther populous nor rich. Its chief trade is in cocoa, cotton, wool, fugar, cochincal, and pedlars finallwares. The friars are the principal merchants here for European goods, and the richeft men both in the town and country. The Spanifh gentry in this place are become a proverb, on account of their fantaftical pride, ignorance, and poverty; for they all claim defcent from Spanifh dukes, who were the firt conquerors, as they pretend, of this country. Latitude ${ }_{17}$. Iong. 96,40 .

Chiapa, the other town in the above province of the fame name, is diftinglifhed from that called Cividad Real, by the appellation of Chiapa de los Indos, that is, as belonging to the Indians, who are about $20, c c 0$. It is the largeft they have in this country, lies in a valley on the river 'Iabafco, which abounds with filh, and is about 12 leagues difant from the former, to the N. W. Bartholomew de las Cafas, bihop of Chiapa, having complained to the
rovinces, and at Guatimala. lace of great paniards, beof all their lepends on it ; y entrance by Puerto Real, iscatan.

court of Madrid of the cruelties of the spaniards here, procured the people great privileges, and an exemption from havery. 'This is a very large and rich place, with many cloifters and churches in it: and no town has fo many Dons of Indian blood as this Chispa. On the river they have feveral boats, in which they often act fea-fights and fieges. In the town are frequent bull-baitings, horfe-races, Spanilh dances, mufiek, and plays. And when they have a mied for a fealt, they think nothing too much to fpend on the friars, \&c. In the neighbourhood are feveral farms well llocked with cattle, and fome figarplantations. The days here are fo hot, that both the friars and In!lins wear towels about their necks, in order to wipe off the comtinal fweat: but the cverings are cool, and fpen: in walks and girdens near theriver-fide. Whert is brought bore from the Spanint Chiapa, and of it they make hard bifcuit. Thefe the poorer fort of Spaniards and Incians carry about, in order to exchange them for cotton, wool, \&x.

Chilmark, a town in Martha's Vineyard, Plynouth colony, Nuw Eugland, whofe chicf inha. bitants are fifhernen, It is fituated at the S.W. part of the illand, on a fratil creek, and about 8 miles W. of Tifbury.

Cн oco, feveral mines of filver in Mixico.

Chowen county, in the diftrict of Edenton, in N. Carolina, in a fwampy foil, heing furrounc:ed by water, viz. E. by Pequiman's river, S. by AlbemarleSound. W. by Chowen river; and in it flands the towns of Hertford and Edenton.

Christiansted, the principal town in the Mand of Santa Cruz. It is fituated on the N . fide of the ifland, in a fine harbour. It is the refidence of the Dinifh Governor, and is defended bya ftony fortreis.

## C H R

St. Christopher's or St. Kitres, an illand in the WeftIndies, the principal of the Caribbees, which gave birth to all the Englith and French colonies there. It is $1 g$ leagues $W$. from Antigua. The French and Englith arrived here the fame day, in 1625 ; they divided the ifland between them, agreeing, however, that hunting, filhing, the mines and forefts, fhould be in common. Threc ye^rs after their fettling the Spaniarls drove them away; they foon returned, and continued to live in good harmony till $\mathbf{1 6 6 6}$, when war being commenced between England and France, St. Chrifapher's became, at diferent feriods, the feene of war and bloodfaed for hali a contury. In 1702 the French ware entirely expeiled, and the peace of Utrecht confrmed this iflund to the Englifh. This illand is about it lagnes in cireat, the length being about 5 , and the breadth one league and a half, except towards the S. where it is narrowed into an ithmms, which joins it to a head-land, atoout a league long, and halt a ieague broail. It contains in the whole about 68 fquare miles. The center of the illand is taken us by a great number of high and barren mountains, interfected by rocky precipices almont impafable, in many places of which iffie hot fprings. Mount Mifery, which feems to be a decayed volusno, whore head is in the clouds, is the higheft of all there mountains, its ferpendicular height boing 3711 feet; at a little diftance it bears the refemblance of a man carrying amother on his back. The affemblace of thefe mountains arakes St. Chriftopher's appear, to thofe who approach by fea, like one huge mountain, covered with wood, but they find, as thes come nearer, that the craft grows eafier, as well as the affent of the mountains, which rifing one above :nother; arc cultivated as high as polfible.

## C H R

The climate is hot, thotgh, from the beight of the coun'ry, much lefs than might be expected, the air pure and healhby, but unluckily filiject to frequent forms and hurricanes, as well as earthquakes. In Aug. 30, 1772, they experienced a moft dreadful form, which did immenfe damage in that and the adjoining iflands.

The foil in general is light and fandy, but very fruifful, and well watered by feveral rivulets which run down both fides of the mountains; it produces plenty of manioc, a quantity of eatable roots, vegetables, fruits, \&c. as well as excellent timber. 'I he whole ifland is covered with plantations, well managed, whofe owners, noted for the fiftinefs of their manners, live in agreable, clcan, and convenient hatitations, which are in gencral built with cedar, and their lands hedged with orange and lemon trees. 'ilhe ulowh of their phataions take u; 44.000 acres; and it is afferted hano of $y$ 24,000 are fit for cancs, bet the fugar is excellent.

They have two confleratie towns in the iflane, the principad of which is Baffeterre, formely the capital of the French purt. The other is called Sanciy Puin, and always belonged to the Englim. There is no harbcur, nor any thing that has the appeatance of any; on the contrary, the funf is contmually beating on the fandy 0 ore at the fow places fir to land at ; which not only prever.ts the building of any key or wharf, but renders the landing or $\mathrm{hif}^{\mathrm{f}}$ ping goods inconvenient, and fiequently dangerous; they have been obliged to adopt a purticular method to embark or put the heavy goods, fuch as hegiteads of fugar and rim, on board; for which purpofe they ufe a fimail boat, of a particular conftruction, called a mofes: this hoat tets off from the thip with fome active and expert rowers; when they fee what they call a lull, that is, an
abatement in the violence of the furge, they peth to land, and lay the fices of the mofes on the flrand, and the hoghead is rolled into it; and the fame precautions are nfed in conveying it to the thip. In this incomeniest and very hazardons manner fugars are conveyed on board by fingle hogfheads; rum, and other gnoods that will hear the water, are generally foated to the thip, both in carsying to and bringing from the hip. Calculators differ very much in their accounts of the population of this ifland; fome make the whole number of its inhabitants only amount to 7000 whites, and 20, cco blacks; others make inem 10,0co whites, and j0,000 blacks; however, it is certain that this is one of the iflands belonging to the Englith, where there is the leaft difpropartion between the matlers and haves. In 1770 the e:pertations of $t 1$ is illand amounted to ahove 4 :9.ccol. A. rling in figar, motatles, and rom, and noar Sccol. fir cotor.

The ptble affars are adminifered by a governor a council, and an affinuly chefen from the rine pariftes into ubich the illand is civided, and have each a large and handfome church. It has riceived inimenfe damage by feccial forirs.

Churghill-River, a large fream in New South W'ales, ore of the northern countrics in A. merica; at the mouth of which the Hudfon's-bay company have a fort and fetticment. It li in about lit. 59, and long. 95. an trace here is increafing, being at too great a diftance from the Ficreh for them to interfere with it. In he jear 174.2 it ammunted to $20,0 c o$ beaver kins, wien atout 100 upland Indians came thther in their canoes to trade; and about 200 northern Iudians bre ught their furs and kins upon fledges. Some of them came down the river of Seals, 15 leagues fouthward of Cicchill, in theis
violence of the to land, and lay : mofes on the oghead is rolled fame precautions eying it to the conveniert and ranner fugars are d by fingle hogfother gnods that er, are generally , hoth in carryig from the hip. very much in he population of make the whole inhatitants only 0 whites, and hers make inem d;o,ccoblacks; rtain that this is ds belonging to re there is the in between the . ## C L A

canoes, and brought their furs from thence by land. 'To the northward of Churchill are no beivers, no fuch ponels or woods being there as thofe animals chinfe to live in, or feed upon: but they have great numbers of martens, foxes, bears, rein-deer, buffaloes, and other beafts cloathed with rich furs. The country is moftly rocky, and covered with white mofs, upon which the rein-deer, or cariboux, feed; as alfo the moofe, buffaloes, and fome deer. Here is a great deal of fmall wond of the fpruce, or fir kind, neur the old factory. But the wood improves as it is farther up the river from the bay, where they have juniper, birch, and popJar. And more foutherly the timber is large, and they have there a great variety of trees. They labour under great inconveniencies at the company's new fort, which ftanding on a rock without fhelter, clofe by the flhore, and furrounded with fnow and ice for eight months of the year, is expofed to all the winds and ftorms that blow. Here is no conveniency for grafs, hay, or gardening: and yet they had four or five horfes, and a bull, with two cows, near the factory, for feeding of which they were obliged, in winter, to bring their hay from a marlhy bottom, fome miles up the river. It is fuid that there is a communication het ween the rivers of Churchill and Nelfon, at a great diffance within land; or a very fhort land-carriage between them. For the Indiuns who trade here, tell the Englith, what chicfs, with their followers, go down to Nelfon, or Albany rivers.

Cinaloa, a province in the andience of Guaddlaxara, in Old Mexico, or New Spain; it is the mot northern in the audience, and Aretches out the fartheft to the W. It has the gulph of California on the W. the province of Culiacan on the S. and the king,
dom of New Mexico on the $N$. and E. From the S. E. to the N. E. it is about 100 leagues; and not above 40 where broadert. On the E. fide it is bounded by a ridge of high craggy mountains, called Tepecfian, 30 or 40 leagues from the fea; from which rin feveral finall rivers, whefe banks are inhabited by the natives for the fake of fifing. The air is ferene and heality ; and, befiles paltures, abounds with cattle of all kind; the foil bears all forts of fruit and grain, particularly Indian wheat, as alfo cotton, with the manufacture of which the natives cloath themfelves after the Mexican fafmion, both fexes wearing very long liair. They are a tall, lutty, and warlike people, formerly ufing bows and poifoned arrows, with clubs of hard wond; and buckles of a red wood. The Spaniards found a great deal of difficulty in fubduing them.

Cividad Real., or Royal City, in the province of Chiapa, and audience of Guatimala, in New Spain, or Old Mexico, 10 leagues N. W. from the town of Guatimala. It is a bihoprick, and feat of the courts of juftice. It lies in a plain, between the North and South feas; inhabited by Spaniards, and a few Indians. See Cbiapa.

Clarendon, a county of Carolina, to the $N$. of Santceriver. In this county is the fsmous Cape Fear, at the mouth of the fiid river. A colony from Barbadoes formerly fettled hereabouts. See Carolin.a. The Indians in this neighbourlood are reckoned the moft barbarous in all the province. In this county is Waterey-river, or Winyann, about 25 leagues from Ahterriver, being capacions enough to rective large veffe's; but inferior to Port-Royal; nor is it much inhabited. Between this and Cla-rendon-river is ano:her fmall one, called Wingen-river, and a little fettement which has the name of

## C O L

Charles-toan, and is but thinly inhabited. In the maps we find a town here, called Brunfwick. town, on the fea-coaft, in lat. 34, 3 .

Coban. See Trra Paz.
Corham, a town on the $S$. bank of James-river, Virginia, oppofite James-town, 20 iniles N. W. of Suffolk.

Совняm-IsLe, mentioned by Captain Middleton in the journal of his voyage for finding a N. E. patfige. lis two extremities bear N. by F. and E. by N. lying in lat. 6 ? , and long. from Churchill, 3, 46. which lie takes to Lie the fame which Fux ralled brook Cohbam.

Coflanzy, a river of Weft Jerfiy, and, though fima!, is yet deep, and navigable for fmall craft. On it is a town of the fame name, ic or 2 miles up the river, containing about 80 familics, who fellow the fifhery.

Colchester, a town in Faitfax county, Virsinia, on the N. fide of Occequan - river, a branch of Potownack river, 16 miles S. of Bilhaven, and 12 N. F. of Lumfries.

Conima, a large and rich town or Mechoacan, and NewSpain, fituated on the South-Sea, near the boters of Xalifco, and in the mont pleafant and fruitiul valley in all Mexico, producing cocoa, callia, and other thirgs of value, hefides fome gold. Jampier takes notice of a volcano near it, with two harp peaks, from which fmoke and flame iffue continually. In the neighbourhood grows the famous plant oleacazan, which is reckoned a catholicon for reftoring decajea ftrengtu. and a fpecific againf all forts of po:fon. The natives apply the ieaves to the part affersed, and judige of the ficcefs of the operation by their flcking or falling off.

Colleton, a county of Carolina. 1 t is fituated to the N . of Granville county, and watered by the river Stono, which is joined

## C OM

by a cut to Wadmonlaw river The N.F. part is full of Indian fettlements; and the Stono and other rivers form an ifland, called Boone's Jlland, a litile below Charles-own, which is well planted and inhabited. 'The chief rivers in this comnty are Nortt Ediftow and Sourh Ediftow. For two or thice miles up the latter, the plantations are thick on both fides, and they con itive for three or four miles higher on the N . fide; and these the river branct:ingou! mets with North-Ediflow river. Ihis county is reckoned to have 2 co fretholders who vote for allemblymen, and fond two members.

Collekado, a river in the moll northern part of Californiz. -Sce Califurnia.

Commanues, one of the fmall Virein lifes ituated to the N.N.E. of 'Tortula, Longitude 63. lasitude 18,25 .

Compostella, the molt confiderable city, though not the capital, of the province of Xizlifcho, and audience of Guata. laxara, in New Spain. It is fillated near the South Sea, ahout 30 miles N . of it. This is a rich town, and has feveral mines of filver at St. Pecaque, in its neighbourhood, where the Spaniards kecp many hundred llaves at work in then. But the city is in a bad fituation, the foil being fo barren, that there is no palture for cattle, nor the necullary materials for building houres; and the air is fo bot and moift, that it breeds feveral infects. The Spaniards built Compoltella in 1531 , and made it a bifhop's fea; sut becaule of its bad air, it was transferred to Guadilaxara. The Spaniards are not very numerous throughout this ahole audien.ce, except in the two cities of Guadalaxara and Compoftclla. The Melt'zo's, indeed, make a confiderable figure both in regard of nun:ber and eftate. But the bulk of the people are the natives,

## CON

## COO

who in general are well treated here, as being braver and more polite than any of their countrynien, and well afficted to the Spawiards, efpecially their priefts, tho fir from being fuch flaves to them as in other parts of New Spain. Lat. 21, 4. long. 107, 0.

Cona, an inand near the coaft of New Andilulia, on the Terra Firma, in America.

Concoxd, a finall town near Bofton, in New England, in the province of Mafachufets-Bay, and county of Middlefex, near which was the firlt attack of the King's troops on April 10, 1775. It is fruated on the river Concord, over which it has a bridge.

Connecticutriver. This river rifes in lat. 45,10 , in long. $7 \mathrm{t}, 30$, in a fwampy cove, and at ten mi'cs diftance, having tumbled over four feparate falls, proceeds to a fmall diftance from St. Francis's Waters, from it proceeds over feveral falls to Rockingham townhip, where it palfes with great rapidity between two rocks not $j o$ feet afunder, and, after forming an extenfive bafon, continues the courfe nearly S. between the new fettlements, and forms the boundary line between the provinces of Maffachufets-Biy and New-York, over fevera! falls, and entering the province of Conn Eficut, proceeds to Hertiord tosin, very near which the tide flows, and where it meeting with a level comery, leaves its traight courfe, and becomes more crooked. Hence for $3^{5}$ miles, ruming by Weatheraficld, Kenfington, Middleton, Haddam, and Durhim on the W. Glaffenbury and Windham or the E. ruas into Long Ill and Sound.

Connecticut, a province in New England, (comprehending New Haven, though daaned a county, bounded on the W. by New York and Hudfon's river, divided from Long Ifland by an arm of the fea fouthward; it has Rhode Ihand, with part of Maf-
fachufets colony, on the E. and the refilue of Mafichafets on the N. The Connetticut river, which is one of the largett and beft in New England, runs through the heart of it, dividing iffelf into different parts, and is navigable above 40 miles for hips of burthen, and many more for fmaller veffels. The country on both fides the river abounds with timber, and it is here that they produce fo great a quantity of tar and turpentine as to require numbers of hands to extract it. The buftnefs of the people here is, befide filheries, that of timber-felling, or cutting tiniber for knee-timber, plank for Mip-building, deals, buulks, and rpars for houfes, malts and yards tor hips. And the new-England merchants fent a prefent to Charles II. of feveral malts fo large as to ferve for firftrates. The great floats of this timber brought down this river have very much improved their navigation. Several forts of metals have been found here, as lead, iron, ropper. The ironmines are ftill worked, and greatly imprived; lut the attempts to raife a thock for working the lead and copper have failed. The colony is populous and increafing, containing about 1g, , 00, people. This colony is divided into the coanties of Windhan, Hertford, Litchfeld, New London, NewHaven, and Fairfield. Lat. 42, 10. long. 72, 50 .

Connestigucune, a fettlemout a little to the N. of Albany, in the county of that name, and ro the Eaftward of Schenectady or the Mohawh's river, which a litele lower tumbles down a precipice of about 70 feet high.一Sec Alliany.

Cuoper's Islavd, one of the leffer Virgin lites in the Weit Indies, fituated on the S. W. of Ginger Inand. It is about five miles long, and one broad; but not inhabited. Long. 62, 57. lit. 18, 5 .

## COW

Corcas, or Grand Corcas, an inand almon in the form of a crefcent, N . of St. Domingo, in the Windward Paflige, about 7 leagues W. of Turk's lfland, and about 20 E. of Little Inagua, or Heneagua. Long. 70, 55 , lat. 21,55 .
CORNWALL, a town in I, itchfield county, Connecticut, near the Strat ford river, in miles $S$. of Salinhury, and 7 N. of Kent.

Costa Rica, a province of Ntw Spain. It fignifies the rich coaft, and is fo called from its xich mines of gold and filver, thofe of Tinfigal bcing preferted by the Spaniards to the mines of Potof; ; but otherwife it is mountainous and harren. It is bounded by Veraguas province on the S.E. and that of Nicaragua on the N.E. It reaches from the North to the South Sea, alont 90 leagues from E. to W. and is 50 where broadeft from N. to S. It has much the fame productions is its neighbouring provinces. The foil in fome parts is good, and it produces cocoa. On the North Sea it has two large convenient bays, the moft wefierly called St. Jercm's, and that near the frontiers of Veraguas called Caribaco; and on the South Sea it has feveral bays, cepes, and convenient places for at chorage.

Courtiand, a manor in the county of W'cfl Clicfer, and province ef New York. It iends a member to the General Aflembly - See 1 def Chifler.

Courtlasd, a town in the alove manor, on the S. bank of the Hadion river, on sia Anthony's Nore, 40 miles uff New York.

Cowetta, ainun of Georgia, to which General Ogientiorpe had travelled, and is not lefs than sco miles from Frederica. It belongs to the Greek Indians. And here the faid General conferred not only with the chiefs of all the tribes of this nation, butalfo with the deputies of the Coctaws

## CRE

and Chickefaws, who lic berween the Englifh and French fettie. ments, and made a new treaty with the natives of the lower Crceks more ample than the former ones. Lat. $3^{\circ}, 20$. long. 90, 10.

Cows-Tsland.-See Vachc. Crabs-Isle, or Boriquen, an inland fituated on the S . fide of Porto Rico. It had the for. mer name from the buccaneers, as alounding with all kinds of that hell-fifh. It is a fine large ifland, in which are hoth hills and vallies, planted with orarges and citrons, and the Englifh fettled on it in the year 1718; but is now quite defirt: for the Spaniaris, not liking fuch neighbours, furprized and took the piace in 1720 , and carried off the women and children to Porto Rico and St. Domingo. Lat. 18, 10. long. 64, 10.

Craven, a county in the province of S. Carolina, lying along the banks of the river Congaree, or Santee. It is pretty well inhabited by Englifh and French proteftants. In this county is Sewee river, where fome families froni New England fetted. In 1706, the French landed here; but were vigoroufly oppofed by this little colony, who heat off the invaders, baving forced then to leave many of their companions dead belind them. In this county are no towns, only two forts on the Southotn bank of Santce river: the one, called Shcriningh fort, is about 45 miles above the mouth of the rivcr; the other called Congaree, an Englifh fort, which ftands 65 miles above the former.

Craven County, in the dif-' trict of Newbern, N. Carolina, in which flands Newbern, the ca. pital of the province, through which runs the river Nufe, the N. houndary from Pitt counts. Fort Barnwell alfo flands on the fame river, in this county.

## C U B

dians, a people of Georgia, whofe King, Tomo-Chichi, with his Queen and fon, came over to England with General Oglethorpe in the year 1734. There are nations both of the Upper and L.ower Creeks; a country fo called from its being interficted with rivers, and extending frum the river Savannalh to the lakes of Florida, the Cherok ces mountains, and the river Couff.
St. Croix, a river in Nea contia, the F. houndary of Mallachuret-Byy province.
Crougen lstand, a fmall infond in the Whatwar! Paffige, wh.ere the lhipping frequenty take in sood and water. It lies E. of Long Inme, and is reckoned among the Bahama Inands.
Crow. P Ponve, a fort built by the French, in the province of New York. See New York.
Cuba, the moft confiderable intard of the Great Antilles, and one of the fineft in the uaiverfe
It lies itretched out from W. to E. having Florida and Lucayos on the N. Hifpaniola on the W. Jamnica, and the fonthern continent, on the 3 . and the Guit of Mexien on the E. It lics between 19.30. and 23 . of N. hatiade, and betwech 74 . and $S_{7}$. of $\$$. long bude. It is 22 lexgues in lengeh, and in the broadefl part, which is toward the fland of Hifpaniola, to leagues; in the narroweft about I 2 , leaving hetween its thares and the fouthern tiats of Florida, a chamel of about 22 leagues, througl which the waters tun with great rapiuty into the Allantic ocean.
It lies within the Tropick of Cancer, and is by far the moft temperate and pleafant of all the Antilles. The liuropeans, who are gencrally troubled with the heat of thefe parts, confefs themfelves agreeably refrefhed by the cooling winds, which blow morning and evening throughout the indand.

This ifland is divided into three

## C U B

grand diftiets, which have each a commander, all under the governor of the Havanna, the capital of the principal dittrict as well as of the inand. The chicf place of the fecond is Spiritusimto, a little town in the inland part, whore port is another fmall town called La Trinidad, on the S. fide of the illand. The third is that of St. Jugo, at the cantern extremity. 1 his inaud is 13 leagues from St. Domingo, and the itrait betwecia them is known by the name of the Windward Panige.

As to the foil, it differs pretty much in the feveral parts of the ifland. All the weltern part of the country is plain, and, if it were properly cultivated, might be fruitful. The canern part is exceedingly mountainous, and from thene there runs a chain of hills almoft through the whole ifland; but the farther W . you go they are the lefs rough and barren. From thefe hills there run down to the North, and s. many rivers, and amongt them fome pretty confiterable mes, which, befiles their beftowing verdure and coolnefs as they pats, are full of filh, and aligators, of which there are thought to be more than in any other part of the world. The greateft incon:eniuncy in Cuba is its being overgrown with woods. Anongt thefe, however, there are fome very valuable trces, particularly cedars of an enormons fize, and other forts of odoriferous wood. Birds there are of all k:nds, more than in any other of the innais.
'This inand was difcovered by the famous Cliritopher Columbus, in 1492, who had a very night view of it, which jet was fatal to the natives, for they having prefented him with gold, fome pisces on which he carried into Spain, it occafioned an immediate refolution to fittle in it. This was periformed in 1518, by John Velufquez, who tranfurted hither about 500 foot, and 80 horfe,

## C U B

who did not lofe a fingle man; the Indians, being mild and peaceable, fubmitterl themfelves with eagernefs to the Spaniards, who fonn in return exterminated them, to the amount of 500,000 . The breed of European cattle, introduced by the Spaniards, and became wild, has fo multiplied in the immenfe woods that it is now become one of the principal riches of the illand, and they export above 12,000 hides annually to Old Spain. The mountains abound in mines of all kinds; however, they only work thofe of copper, which are in the ealtern part of the ifland ; the produce of them ferves for cafting all the cannon the Spaniards make ufe of in the Weit Indies, and a great part of thofe they have in Europe.

This ifland has great conmeniences both for making of falt, and catching of filh, which are principally barbel and had. It has mules, plenty of horfes, theep, wild boars, hoos, and cattle of a larger and beiter bireed than any other part of America; wild and tame fowl, parrots, partridges with blue heads, and large tortoifes. Their hores alfo abound with fea-fow: particularly 2 fort of cranes which are white when young, and of vartous coburs when old. Here are yuarries of flints, and fomutains of hitumen, which is wfed in ealking ीhins millead of pitch, as well as in medicinal compolitions.

Abundance of tobreco, beth in Icaf and funfl; is exported hence to New Spain, Coftil Rica, and the South-Sca, beficles what is thipped for Old Spain, sc. in Europe. Another of its trading commodities is Campeschy-wood, and fately they have introduced the cultivation of coffec, and it is computed to have 25,000 flaves, and $30,0 c o$ mongrels, independent of thofe in the capital Liavanna.

However, from the depopulation of Culia, the improvements on it ase not to genetal, nor fo

## C U L

good in their nature and tendency, as in our illarids. Here are more churches than farms, more prie!ls than planters, and more lazy bigots than ufeful labourers. And to this it is owing, that fo large an ifland, with a luxuriant foil, befides food for its inhabitants, which is more eafily produced and ohtained here than perhaps in any other part of the world, here being forefts with pienty of venifon, hefides the cattle above-mentinned, does not produce for exportation, including even their hides and tallow, tobaceo and fnuff, \&e. near the value of our little inand of Antigua. A flom in July 1773, did confiderable damage in this inland.

The ci'y of St. Jago de Culha is the mon ancient in the in and, and is, generally fpeaking, eftecmed the capital, though now the governor refides at the Havanna, and only fach of the Spaniards as have eftates on the ifland, and arecontented with their polfeffors without meddling much in trade, inlabit his place, which has a declining afpect, and prefertes rnly the ruins of its formet gras. nef. Yet even this city has a noble, fafe, and enmmodicus pirr, inferior to the Havanna only in its fituation, that being on tix N. W. fide of the ifland, toxards the channel of Baliama, whereas St. Jago de Cuba lics on the N. F. and commands the Windward Paffige.

Cubagua, an inand of Terra firma, from whence it is parted hut by a ttrait of 65 mites from Paria, or New Andalufia. It imas difarered by Columbus in $540^{\circ}$; it is abont 9 miles long; and its fibery produces the greaten num. ber of prearls, but they are not of tie largen fize. It lies in Latitude 11,45 . long. 64,12 . has buta few inhabitants, and is fubject to Spain.

CULiACAN, a province of Geadalaxara, in the andience or kingdom of New Galicia, :a Old

## C U M

## CUM

Mcxico, or New Spain. It has the province of Cinalua on the N. New Bifcay and the Zacalacas on the E. Chiametian on the S. anis the gulf of Californid on the W. itslength, according to Moll, is o leagnes, and breadth 50. The sanfuns make its lengeth 270 milcs. It abounds with all forts of fruit. When this country was firft difeovered by the Spaniards , they found houfes here built after a llange manner, and full of ferpents hiifing at fuch as came near. Tlefe were often worhipped by the natives, who alleyed that the devil frequently appeared to them in that ihape. The great river La sal in this country is well inhahited on each fide. According is Dampier, it is a falt like, or biy, in which is good riding at anctior, thongh it has a narrow entrance, and runs 12 leagues $E$. and parallel with the hoore. Hele are feveral Spanih farms and faltponds about it ; and 5 leagues from it are two rich mines, workcd by laves belonging to the citizens of Compofella. Here alfo is another great river, whofe banks are fuil of woods and paRures. Gazman, who firf difcovered, or at leatt fubdued this part of the country, called it Mugeres, or the Women's-river, as he fuw a great number of women here; which gave occafion to the fable of Amazons living in this country. On this river he built a town, to which he gave the name of St. Michael ; which fec.
Cumana, or Comana, the cepital of New Andalufia, a province of Terra Firna. It fomelimes gives its name to the province. The Spanards built this city in 1520 , and it is defended ly 2 firong caftle. This town flands near the mouth of a great lake, or branch of the fea called Laguna de Carriaco; about which are reveral rich towns; but its mouth is fo fhallow, that no fhips of burthen can enter it. It has bue Sew inhabitants and litcle trade.

The privateers were once repulfed at Cumana, without daring to attenpt it any more, being the only place in the North-Scas they had in vain attempted. It is fituated three leagues $S$. of the North Sea, and to the S. W. of Margaret:a illund. lat. 9, 55. long 65, 3 .
Cumanagate, a finall town inabay on the conft of Terra Frma, in the Wen-Indies, in the province of Cumana, or Andalufia. It is fituated on a low flat more, which abounds with oylters that produce pearls.

Cumberland Bay, in the moft northern coun rics of Americi. Its mouth lics under the polar circle, and runs to the N. W. and it is thought to commuricate widh Baffin's - hay on the N. In the cod of Cuniber-land-bay are feveral fiadl inands, called Cumbertand Itlands. None but the Englifh, as Martinicre obferves, call that bay Cumber-land-bay; and De Life dues not mention it.

Cumbrriand county, in Weit Jerfey, has the Delawarbay, on the S. and W. of the county, and Greenwich is the county town.
Cumberland, a county of Manachufets-Bay, formerly the territory Sagodock. See the art:cle Man.
Cumberland, a county in Penfylvania, the largeft and moft weftern in the whole province, and is very mountainous.
Cumberland, a town in New Kcut county, Virginia, on Pamunky-river, 17 miles S. E. of Newcafle, is W. of Delawar, and 26 N. W. from Williamsburgh.

Cumberland Istand, in Georgia, is about twenty miles $S$. of the town of Frederica. On it are the two forts called William and St. Andrew's. The former which is at its $S$. end, and commands the inlet of Amelia-found, is Atrongly pallifadoed and defended by eight pieces of cannou.

## C U R

barracks are built here for 220 menl, befides fore-houles. With. in the pallifadocs are fine fprings of water, and a timber-houle, with large magazines under it for amunition and provifions.
Cumberiand-Harbour, in the S. E. part of the inand of Cuba, one of the Great Antilles, was formerly called Walthenam. But admiral Vernon, and general Wentworth, who arrived here with a fquadron in July, 1;41, made an encampment on Thore, where they built a fort, giving it the prefent name, in honour of the duke of Cumberland. It is one of the finef harlours in the Weft-Indies, capable of thetering any number of hlips from hurricanes : it lies in a wholefome country, abounding with cattle and provifions, amd a fine freflwater river, which the admiral called Angufla, and is navigable for feveral leagues. Thisharbour is about 20 leagues E. from St. Ja, de Culsa, with thick woods mollIy all the way to it. Here the Englifh furces having flayed till almon the end of Noveniler following, were, by reafon of the ficknefs among them, extremely dimimithed, and being obliged to guit the inand, were carried back to Jamaica. Lat. 20, 30. long. 76, 50.

Cuxagao, Curassow, or Qiferisao, one of the Letward or Little Antilles Iflands: it is the only inand of importance which the Lutch poffirs in the WeftIndies. The northmon point of this illand liss abont 20 leagues from the main, or Terra Firma, N. E. of Cape Roman. It is about is leagues in length, and 4 broad. The illand is almoft every where ragged and fony, as well as barren, and very badly watered; neither is its climate healthy or agreeable, and does not produce fufficient to maintain its inhabitants 24 hours, jet by the regulation of its maflers, there is no place 'n the Weft Indies where

## C U R

want is tefs felt. On the s. fide near the W.extremity is a good harbour, called Santa Barbara, but its principal one is about three leagues from the $\mathbf{S}$ E. end, on the N. fide of it, where the Dutch have a very good town and ftrong fort, called St. Joris's-Bay. Ships bound in thither mult be fare to keen eofe to the menth of the harbou", and have a rope ready to fend one end a-fhore to the fort: for there is no anchoring at the entrance of the harborr; but being once got in, it is a very fecure port, either to carion or lie fafc. At the E. end are two hills; one of them much highes than the other, and feepeft towards the N . fide. It has another yiod bay on the W . nearthe middie of the ifhand, called St. Mar-tha's-Ray. Alfo Bay Br. Ann, near the S. W. end, which is dePended by Fort Amflerdam. Some merclants have cretted fugarworks, which formerly was all patlure-land for cattle. Here are alfo fome plantations of rotatoes and yams; and they have nill great numbers of cattle on the finand. But it is not fo much eflecmed for its produce, as its fituation for trade with the Spanif continent ; for the Dutch fimuggle confiderably with the fettlements of that nation on the 'Terra Firma, Fornierly the harbour was never without hips from Cartha. gena and Porto Bello, which ufed to biy of the Dutch about icco or 1500 negroes at a time, befides great quantities of European commodities. But of late that trade has fallen into the liands of the Englifh at Jamaica. Yet fill the Dutch have a valt tralle all over the Weft-Indies, fending from Holland thips of gond force which are laden with European goods, wherchy they make very profiahe returns. Latitude 12,0 . long. 68, 0.

Currituck, a maritime connty, in the diffrict of Edinton, in North-Carolina. It is joined

## D A R

10 the main land, by an ifthmus, being firrounded by water, viz. on the E. hy Currituck Sound, on the S. by albemarle Sound, and W. by Norith river.

Cuzrituck, a fea-port trwn in North-Carolina, in the county of Currituck, at which place is a cultom-honfe, with a collestor. It tands ont an in ind, and has an iniet and found of the fanne same a little South of it.
Cuzumet, an ifland in the province of Yuc. $t$ in, and audience of Mexico, in South America, in the bay of Honduras, is leagues long, and five brod. The adrenturers who ufed to tonch here, when they went upon difcoveries from the ill: of Cuba, called Santa Cruz, from its chief towt. lies four leagues to the E . of the Lake of Bicalal, in Latitude 19. long. 87.

## D

DAngury, a town in Fairfield county, Comne (icut, on a branch of the river Strationd, 10 miles N. E. of Rid?efield, 7 miles E. from New-town, and 13 S. of Ne:v Fairfiedd.

Darife, Isthmus of, or Terra Firma, properly focallel, is that country lyiug between the Gulph of Dirien and Mexico, or New Spain, along the coaft of the North and South Seas. It is thet narrow neck of land which joins South and North America rogether; and otherwife called the Itthmus of Panama, or of America. On the W. fide, its fouthern coait extends to long. 83. W. fron London; but its nothern does not extend heyond longitude 82. Begond the great river Darien the land fpreads ta F. and N. E. as that on the other fide does to the N. and N. W. fo that it cannot any further be called an ithmus. It is moftly comprehended between lat. 5 and 10 , and near 300 miles long. But its breadth in the narrowedt pars is

## D A R

ahout 55 or 60 miles from fea to fe:.

On the N. and E. it is ruffim cien'ly hounded by each of the vall oceans. Anil confidering that this is the narrowett land which disjuins them, and how great the compars is which mult be ferched from one thore so the other by fea, baving North and South Ainerica for each extreme, it is of a very fiapular fination, beingextremely pleafint and arocuable.

Nor docs cither of the oceans fall in at onec upon the thore, hut is intereepted by a great many valuable in mids that diz featered along each coal. Thofe in the gulf of Darien are principally ihree, viz. Gokden-ifland; another, the bingelt of the three, and the illand of Pines; betiles thefe, are the samballoes-iflouds, great numbers of them dillemmated in a row, and collaterally at very uneyn.l dilances.

The land of this continent is of an uncqual furface. The vallics are generalty watered with rivers, brooks, and perennial frings. They fill fome into the N'. and others into the South Sea; and mont of them take their rife from a ridec of high hills, running the longth of the inhmus parallel to the thore; thefe are of an uncyual breadth, and rend along, bending as the itthmus $i \cdot-$ felf does. It is mofly neareft the North Sea, feldom above 10 or 15 miles diftant from it.

On the North fide the country is every where fo covered wi:h woods, that it is all one continued foreft. Some of the rivers which water this country are inditterenily large, though feir of them navigable, having bars and thoals at their mouth. On the North coaft the rivers are, for the moft part very finall: for, rifing generally from the main ridge, which lies near the fore, their courfe is flort. The river of Darien is very large; but the depth at the entrance is not anm

## D A R

fwerable to the widenefs of its mouth, though further in it is deep enough. I he river of Chagre is pretty confiderable: has a long winding courfe from the $S$. and E. part of the ifthmus, its fource being at a pretty great difrance from its mouth. The foil on this N. coalt is various: generally it is good land where rifing in hills; but towards the fea are fwamps. The hore of this coaft rifes in hills directly, and the main ridge is about five or fix miles diftant. Caret-bay has two or three rivulets of fre:h water falling into it. It is a fmall bay, and having two little inlands lying before it, make it an indifferent good harbour, and it has ciear anchoring-ground, without any rocks. The inlands are fretty high land, cloathed with a variety of trees.

To the ealtward of the promontory at the entrance of the river Darien, is another fine fandy bay.

The province of Darien is of great importance to the Spaniards, and the feene of more adtions than any in America. From its filuatinn both on the North and South Seas, the gold fands of its rivers, and the treafures of Pcru, which are brought hither, and imported into Old Spain, have induced feveral adventurers to make attempts on Panama, Porto Bello, \&c. The country is extremely het, and the low lands are overflown with continual rains. The mountains here are fo difficult of eccofs, that it takes up feveral days to crofs them, though the diflauce be inconfiderable. From the tops of fome of thefe the Spaniards firt difcovered the $S$. or great Pacific ocean, anno 1513, and called it the South-Sea, in regard they croffed the ifthmus from the North-Sea: though in fact the Pacific Ocean lies W. of the main-land of America. The - principal towns of Darien are Pa is ara and Pato Bello; which fee.

Dartmouth, a maritime town in Briftol county, in Plymouth colony, New - England, fituated on Akulhnet river, Clarke Cove. It is about five miles S.W. from Rochefter, near 8 South of Dighton, and but 12 E. of Tiverton.
Davis's-Strait, a very nar. row fea. Jying between the North main of A merica, and the wefterncoaft of Greenland; running N.W. from Cape Farewell, lat. 60. N. to Baffin's - bay, in 80. It had its name from Mr. John Davis, who firft difcovered it. For in the year 1585 , he undertook, with two barks, to fearch the N. W. coaft, and came to the S. W. cape of Greenland, in lat, 62. where the frait firf begins; and he called that Cape Defolation. Here he found many pieces of furs like that of beavers and wool; and exchanged fome connmodities with the natives, who often came to him in their ca. noes, bringing him ftag-ikins, white hare Ikins, fmall cod, mufcles, \&c. He afterwards arrived in lat. 64, 15 . where was found a great quantity of fuch fand as Forbither had before bronght into England. He ftecred thence to 1at. 60, 40. and as far as Mount Rawleigh. In 1586, he made a fecond voyage to the fame coalt, fearching many places towards the $W$. and next year in a third voyage, he came to lat. 72, 12 , He gave the name of Londoncoaft to the land on the E. fide, which is the coalt of Grcenland. Davis's - ftrait extends to long. 75. where it communicates with Baffin's - bay, which lies to the North of this Atrait, and of the North-main, or James's-ifland, -See Baffin's-bay.

DaUPHIN, isceor, a fmall fettlement, about 70 leagnes $E$. of the mouth of that of the Miffifippi. This ifland is fituated on the river Mobile, it is five leagues in length, but of a fmall breadth. Not a tree is to be feen

## D ER

in one half of this ifland; and the other is not much better. The fort, and the only village or dwelling-place which remain on it, are fituated in the wettern part of the inland. Between L'Ife Dauphine and L'Ille Corne, which is a league diftant from the former, is but little water. At the extremity of the latter is another very fimall ifland, called L'Ifle Ronde, on account of its figure.

Deadham, a town in Suffolk county, Malfachufets - Bay, five miles E. of Natick, with the Charles river between them, and about 12 miles S.W. from Bofton.

Dead-Chest Inhad, one of the finaller Virgin Illes, fituated near the E. end of Peter's Ifland, and W. of Cooper's Ifland.
Deerfield, a town in Hampthire county, Malfachufets-Bay, on the W. fide of Connecticut river, near where it branches off on the W. and is called Deerfield river.

Delawar, a town on the point between Pamunky river W. and Mattapony E. where they run into York river, Virgiuia. It is in King William's county, 20 miles N. of Williamfurg.

Delawarte, a river of Penfylvania. It rifes far N . in the country of the Iroquois; takes its courfe to the fouthward, and, dividing this province from that of New Jerfey, falls into the Atlantic Ocean between capes May and Henlopen, forming at irs mouth a large bay, called alfo Delaware. This river is navigable for above 200 miles, but has a cataract or fteep water-fall in it above Briftol, which renders its navigation impracticable northwards of the county of Bucks.

Derby, a town in Newhaven county, Connecticut, 14 miles N. W. of Newhaven, and 10 from Stratford.

Derby, a town in Chefter county, Penfylvania, fituatel on Derby creek, which runs int, the Delaware river near Chelter, from

## D O B

whence it is diftant but 7 miles, and 5 from Philadelphia.

Descada, Desirada, or Dfisiderada, the firt of the Caribbee Inands difeovered by Columbus in his fecond voyage, anno 1494, whea he gave it that name. It is fituated in the AtLantic Ocean, 3 leagues $E$. from Guadeloupe. The Spaniards inake this in their way to America, fometimes, as well as Guadeloupe. It looks at a diftance like a galley, with a low point at the N. W. end. Here are fand-hills on the N. end of it, full of red veins. In fome parts it is fruitful, and well cultivated with cotton; in others barren, and deftitute of trees. It breeds guanas, and a multitude of the fowls called frigats. \&c. There is a very deep cavern in this ifland, which is almott full of bones, relics of the ancient Indians. It has no water, except in ponds. It is three leagues in length, but one in breadth. I, at. 16, 36. long. 60, 3 c.

Devil's-MuUth, a name given by our failors to a volcano near Leon de Nicaragoay, a city of the province of Nicaraguay, in New Spain. It is fituated on the fide of Nicaraguay lake, which, according to fome, may be feen from the North Sea, or at leart a great way in the lake towards that fea. It has a frighiful appearance, being cleft down almoft from the top to the bottom, like a broken faw. Lat. 13, 10. loug. 65, 10.

Diamond or Round Is land, one of the Granadille Illands, in the Weat Iuries. It is filuated betureen Grenadi and $\mathrm{Ca}-$ rituacat, but is not inhabited, as it has no frelh water, though otherwife, for its fize, fertile.

Dighton, a town in Briftol county, Plymouth colony, NewEngland, one mile E. of the Sta-tion-tree on Titiguit river, and 5 S.W. of Raynham.

Dobas County, In the diftrict of Newbern, North Carolina, is

## D O M

divided on the N. from Pitt's county by the river Nufe, and has Eraven county E. and Duplin county $S$.

Dogs-Istiand, one of the fmaller Virgin Jfics, fituated on the W. of Virgin Gorda, and E. of 'rortula. Long. 62, 55. lat. 18, 20.

Domingo, St. or Hispaniola, one of the Large Antilles Iflands, in the Weft-Indies. It partly belongs to the Spaniards, and partly to the French. The natives ftiled it Aitii, and the Spaniards, when Chriftopher Columbus firft dificovered it, in 1492, called it Hifpaniola, or the Spanifh Ifland. The city, which he founded in 1494, being dedicated to St. Dominic, the name was firfe extended to that quarter of the ifland, and in procels of time to the whole; fo that it is now generally called in our charts, \&. Sit. Domingo. It is fituated in the middle between Cuba and Jamaica on the N.W. and S.W. and Porto Rico on the E. and leparated from the laft only bya narrow channel. It extends from lat 17,37 , to lat, 20. and from long. 67, 35 . to long. $7 \mathrm{it}, 15$. being near 400 miles from W. to E. and almoft 120, where broadeft, from N. to $S$. Some reckon it 300 leagues in circuit, excluifive of its bays, creeks, \&c. which, it is thonght, would make up 200 more. It is diftant from Cuba but 13 leagues, which frait is called the Windward Paffage. The climate here is extremely hot, but cooled by winds that blow at certain feafons. It alforains exceffively at fome times, yet not at all places alike. Tho' the climate agrees but badly with new-comers, yet they live here in good health, and to a great age, many of the inhabitants exceeding 8o, and fome reaching to 120 years.

This illand, which, next to Cuba, is the largeft of all the Antilles, is allowed to be the -suof fruitful, and by much the

## D OM

pleafanteft, in the Weft Indies, having vaft forclts of cabbagetrees, palms, elins, oaks, pince, the jenipali, caramite, acajon, and other trees till taller and larger, and the fruit more pleafing to the eye, and better tofted than it the oiticr iflands; pariculatly ananas, bananas, grapes, oranges, lemons, citrons, toronias, limes, dates, and apricots. Here are all the birds common in the Weit Indies; as alfo the murkettoes, and fire-fies. In the meadows, or favannatis, are innumerable herds of black cattle, which belong to the country. There are a fufficient quantity of horfes in the French part of the iliand 10 fupply all their neighbouring colonies, befides wild horfes and wild hogs of the breed firt brought over by the spaniards. The hunters fhoot the beeves for their hides, as they do in Cuba; and, with regard to the pork, they frip the fleth from the bones, and jerk it as they do in Jamaica. Scarce a country in the world is better watered, either by brooks of navigable rivers, which are all full of filh, as the coalt is of crocodiles and tortoifes. Its priacipal river is called Ocoa. In the fands of the rivers they find gold-dult; and the inland has many mines of gold, filver, and copper, which, though fornerly wosked with great profit, yet the Spaniards have found themfelves too weak to carry them on to advantage, and take all the care they can to conceal them from others. The principal commoduties of this ifland are hides, fugar, indigo, cotton, cocoa, coffee, ginger, tobacco, falt, wax, ambergris, various forts of drugs, and dyers wood. What corn they have ripens at fuch different times, that it cannot be reaped with any profit. The numbers of French on this fide is faid to equal, if not exceed, that of the Spaniards; though both together are yery far Jhort of what the

## D O M

inand is capable of maintaining. In 1726, the inhabitants were computed at 30,000 whites, and 100,000 negroes and mulattoes, namely Creols and Meftizoes, whofe daily allowance is potatoes, though they have leave to keep hogs.

The Spaniards, by degrees, conquered the natives; and in batthe, and cold blood, defiroying $3,000,000$ men, women, and clilidren, As this inland was among the firt difcovered by the spauiards, fo it was the centre of their commerce in thefe patts; and as they had been for many years fole poffeflors of it, it was for fome part of the time a very flowifhing colony. But after the conqueft of Peru, and the confiderable additions made to the territories on the continent of North America, they neglefted this inand, which encouraged the French, about the middle of the laft century, to fix themfelves on its ${ }^{-W}$. part, where they have improved the fettlements.

In thort, the frequent defcents both of the Englifh and French on the W. pait of the illand, by degrees obliged the Spaniards to abandon all that patt of it to the W. of Monte Chrifto on the N. and Cape Mongon on the $\mathbf{S}$. The French, indeed, had no legal fettement here till 1697, uhen the Spaniards yielded the W. half of the ifland to them by the treaty of Ryfwick; the boundaries between them and the French were fetted by a line driwn acrofs the country from No to S.
For many years its principal trade confifited in tobacco, in which from 60 to 100 hips had been employed; but that funk to nothing upon the eflablifhing an exclufive farm of this commodity in France: and afterwards fugar became the flaple-commodity of the ifland, and generally it yields three or four fhillings a huadred more than that of any

## D O M

among the other iflands. In 1726 it was computed here were 200 fugar-works; and one year with another the ifland made 400 hogfheads of 500 weight each, and that it yielded annually to the French 200,0001. and the indigo is reckoned to produce near half as much.
The colony of the French here is allowed to be the moft confiderable and important they have in thefe parts; and would become much more fo, could they get a celfion of the other part from the Spaniards, which they have extremely at heart. They are al". ready poffeffed of fo many noble harbours and forts as gives them an opportunity of difturbing and ruining the commerce of any nation which they happen to be at war with. And indeed fo mary harbours are all round the ifland, that failors can fcarce mifs of one in which they may have frech water and propificns.
The part of the ifland belonging to the French is under a General of their own country. It begins at a large plain, called Bahaia, on the N. fide of the ifland, and about 30 miles $\mathbf{E}$. of Cape François: and extending all along the coall from thence to the $W$. reaches on the S. fide as far as Cape Mongon ; meafuring all the bays, crecks, \&c. cannot be lefs than 300 leagues in circuit: but, exclufive of thofe windings, it is 215 from Cape François on the N. to that of Mongon on the $S$. On the W. fide from Cape Lobos_to that of Tiberon, where is a round black rock, which is the moft Weflern point of the whole ifland, are four harbours larger and better than any in England From Cape I'iberon to that of Donna Maria on the fame fide, but 25 miles to the N . are two more excellent harbours ; and from this cape to that of St. Nichotas on the N.E. which is itfelf a large, deep, fafc hurbour, 12 more, each of which lies near the

## D O M

ennflience of two or three rivers. The French governor-general has under him the governors of Cape François, St. Louis, or L'lle de Vache, and thofe of Port l'dix, and Petit Guaves. The moft noted places in the French patt of St. Domingo, as they lie from the S. W. to the N. E. are Sr. Louis, Vache, Donna-Maria-bay, Fond de Negros, Petit Guaves, Leggane, feveral defert iflands in the bay called Cul de Sac of Leogane, the largelt of which is called Gonave, La Petite Revicre, L'Efterre, Port Paix, Care St. Nicholas, Tortirgas or Tortudas ifland, and Cape François.

Tlie E. part of this inland, in the pofleflion of the Spaniards, is the largelt. The commodities of the whole colonies of France in Si. Domingo amounted in 1764 to 80 millions xeight of rough fugar, 35 million of refined fugar, and $1,88 \mathrm{c}, 0 c o \mathrm{lb}$. of indigo; at the fame time they gathered 7 million weight of coffee, and one million and half of cottor. Ahove half thefe were the produst of the N. coalt alone; the reft came from the Weft and South. There was, befides, this difference, that the indigo and cotton were chiefly from the S. and W. and the fugar and coflee from the North.

In 1764 this ifland had 8,786 whites able to bear arms; 4,306 inhabited on the N. 3,470 on the W. and 1,010 on the S. coalts; from hence, according to the general method of calculating, the uhole of the whites was above 35,000 . To thefe were to be added 5,817 mulattoes, or free negroes, who were enrolled. The negroes were 206,000 , and difperfed in the following manner: 12,000 in the nine great towns; 4000 in country towns; 1000 in raifing vegetables; and 180,000 in the culture which produced the commodities for exportation. After this enumeration, in 1767, 5 1,567 negroes were imported in 171 French Ihips. The deficiency

## D 0 M

of dead ones has been more than fufficiently rupplied by thofe in. troduced in a clandelline trade, and it is confidently aferted, there are not lefs than 250,000 now in the French divifion only; and the cuiture of the land has encreafed proportionably The culture of indigo is diminifhed, but there are 40 new fugar-plantations; fo that they reckon 260 in the N . divifion, 197 in the W. and 84 in the South. There are alfo fome plantations of cacao raifed in the woods. In 1767 there were ex. ported by the French from this ifland 124 millions weight of figar, $1,769,562 \mathrm{lb}$. of indigo, $150, \mathrm{cco}$ lb. of cacao, $12,197,977 \mathrm{lb}$. of coffee, $2,965.920 \mathrm{lb}$. of cotton, 8,470 packets of raw hides, 10,350 fides of tanmes hides, 4,180 hogiheads of rum, and $21,10+$ hogf. heads of molafles, all which was regiftered at the cuftom-houfe, and exported in 347 hips. To which may be added a fixth more, that was fmuggled out; and $y$ tt :hore well verfed in the ifland fay it will produce a third as much more; cf fuch prodigious value is this ifland.

Domingo, St, the capital of the above illand, firt built by Columbus on the S. fide of it, and fituated at the mouth of the river Ozama, or Ifabella, in a fine plain, which fhows it to a great advantage from the fea. Bartholomew Columbus, brother to the admiral, is faid to have founded it in the year 1594 , and gave is the name of Domingo, or Dominick, in honour of St. Dominick. It was taken by Sir Francis Drake, in 1586, who held it a month, and then burnt a part of it ; but fpared the reft for a ranfom of 60,000 pieces of eight. It foon recovered itfelf; but the trade, which was confiderable in fugar, hides, tallow, horfes, hous, and caffia, has decayed fince the Spaniards have been tempted by later difcoveries in Mexico, \&c. Neverthelefs, it ftill makes a good

## D O M

figure: and its inhabitants, including the negroes, \&c. are thought to exceed 25,000 ; and fome reckon them many more. They are Spaniards, Meftizoes, Mulatioes, and Albatraces, and of thefe a fixth part is fuppofed to be Spaniards. St. Domingo is a large well-built city, a good port, and it has feveral ftructures more magnificent than is ufual in the Weft-Indies, efpecially thofe of the King of Spain's collectors. Here is a Latin fchool, and horpital with an endow ment of 20,000 ducats per annum, befides an univerlity. Here is a fine cathedral, feven large monafteries, and two nunneries, befides a mint, and a college, with a revenue of 4000 ducats, It is the fee of an archbihop, whofe fuffragans are the b:hops of La Conception in this ill:nd, St. John's in Porto Rico, S'. Jago in Cuba, Venezucla in New Caftile, and of the city of Honduras. Here alfo is the refidence of the governor-general of the Spanith Indics, and of the jollges of the royal courts; which makes it the fupreme fat of juitice, as it is the mon eminent royal audience of the Spaniards in America; fo that the lawyers and the clergy keep this city frem utter decay, fince the deleinfion of its trade. The greatelt part of the commerce carried on by the Spaniards of this ifland is however from this port, which has 1 j fathom water at the bar; it is life and large, and defended hy feveral batteries, wi.h a calle at the end of the pier, whic! has tuo lialf moons within $i$, and reaches by two bulwarks to the river. On the utmott hore, near the S. bulwark, flands a round tower. The prefident from old Spuin lives in a houfe in this city that is faid to have been built and occupied by Columbus himfelf. To this officer, on account of prior fettlement, appeals are brought from all the Spanih Welt-India intads, as formerty they were from

## D O M

every province of Spanih America ; and his fentence is definitive, unlefs it is called by a particular commiffion into Old Spain. As he purchafes his place, he confequently exceutes it with opprcfion.

St. Domingo is built of None, after the Spanifi model, having a large fyare market-place in the middle, about which flands the cathedral, and other public huildings. And from this fquare the principal ftrcets rua in a dirct line, being croffed by others at right angles; fo that the form of the town is almott quadrangular; and it is moft delightfully fitiated betucen a large navigable river on the W. the ocean on the S. and a fine fruitful country on the N . and E. Lat. 18, 25. Long. 6g, 30 .

Domintca, the laft of the Leeward Caribhee Illands, taking them from N. W. to S. E. but the Spaniards call it the laft of the Windward Inands. It is fituated much about half way betwixt Guadaloupe on the N. W. and Martinico on the S.E. 15 leagues from each. It exiends from N.W. to S . E. and is about $8 \frac{1}{2}$ leagues in length, and near 4 where broadeft. It derives its name from the firf difcovery of it being made on a Sunday, Nov. j, 1593, by Columbur.

It is divided, like Guadaloupe, Martinico, and fome of the other Caribbee iflands, into the Cabesterre, and Baffe-ture; and the foil is much of the fame nature. Its appearance is rugged and mountainous, cfpecially towards the fea, but the afcents eafy. The fo:l is good; and the flopes of the hills, which bear the freit trees in the world, are fit for the production of our plants: fo that fome have reporied it to be one of the beft of the Caribbees for its fruitful valleys, large plains, and fine rivulets: and with cufe and certainey all the productions of the other Weit-India iflands may be cultivated here. The Cabes-terre is watered with a great number of

## D O M

frefl-water rivers, which abound with excellent fifh. Only two or three places in that caller the Baffe-terre are tolerable; the principal of which is called the Great Savannah, and fituated nearly in the middle of it; namely the tract from the point facing Martinico, to that which is oppofite to the Saints. It produces ananas, mandioca, caffava, bannanas, and the finent tigs, which are left to rot on the ground, all but what they eat with their food; and thefe they gather before they are ripe. They have potatues and ignamas in abundance, with a great deal of millet and cotton. Here are great numbers of hogs, ring doves, partridjes, and ortolans. They tireed hogs and poultiy; and of the former are two forts of wild ones, defcended from thofe that firf came from France and Spain. Here are the fineft cels in thie world ; but the Caribbeans never eat them.

The Caribbeans having, for the moft part, retired hither, as they were driven out of the other iflands by the Europeans, are confequently more numerons hiere than in any of the reft. The anchorage is good all round the coalt of Dominica; but it has no port, or bay for retiring into : and all the advantage it has is the thelter which hips find behind fome of its capes. The French lave always oppofed the attempts of the Englifh for fettling on this illand, hecaufe it would enable them in time of war to cut off the communication bet ween Martinico and Guadaloupe. The climate is remarkable hot, even for this part of the world, though the air is pure and very thin. Among the mountains it is imagined there is a gold mine, and two more towards the $S$. end of the ifland called Sonffrieres, from the plenty of fulphur they contain. They have alfo feveral fprings of mineral waters, whofe virtues are highly extolled. Its forefts afford

## D 0 R

an inexhauntible quantity of rofe. wood, fo efteemed by cabinetmakers. Dominica is divided into ten parimes, 7 to the leeward, and 3 to the windward. On the leeward coaft is the capital. L.at. 15,30 . long. $60,30$.

Dorchester, a little town of Berkley county, on the confines of Colleton county, and province of Carolina. It contains about 350 fouls: and in it is an inde. pendent meeting-houfe. Latitude 36, 10. long. 79, 20.

DORCHESTER, one of the 5 countics on the E. fide of Delaware - bay, in the province of Maryland. It is fituated to the S. of Talbot county. Its pincipal parih bears alfo the fame name, where the county-court is kept. The land here lying to the N. fide of Nantikoke-river, beginning at the mouth of Chicka-coan-river, and fo up to its fource, and from thence to the head of Anderton branch, and down to the N. W. fork, and to the mouth of the faid Chickacoanriver, was, by an act of the arfembly, anno 1698 , declared 10 belong to Panqualh and Aunatoluquem, two lidian kings, and the people under their govern. ment, their heirs, and ficcedfors for ever, to be holden by, the lord proprietary, under the yearly rent of one heaver-fxin. Mere indian towns are in this, than in any other of the cournics.

Dorchester, a namitice town of Stifiolk county, in New. England. It is for magnitude the next to Bofton, from wherice it is diftant about 3 miles, ard huils at the mouth of two fmall rivers, contiguous to the fea-fide. Befure the prefent troubles, it fent four members to the affembly, and had two fairs, the one on the fourth Tuefday in March, and the cther on the laft Wednefday in October. From hence it was that Botton was bombarded previous to the departure of tle Britih troops under General Howe,

## R

## E N G

lles between Jat. 41 and 46 , and long. 67 and 74. Though NewEngland is fituated alinoft 10 degrees nearer the fus, than we are in England, yet the winter begins carlier, laft: longer, and is incomparably more fivere than it is with us. The fummer again is extremely hot, and more fervently fo than in places which lie under the fame parallels in Europe. However, hoth the heat and cold are now far more moderate; and the conflitution of the air, in all refpests, far better than at the firit fettement. 'The clearing away of the woods, and opening the ground every where, has, by giving a free paflage to the air, carried of thofe noxious vapours which were fo prejudicial to the health of the firt imhabitants. The temperament of the iky is generally, both in fummer and winter, very fteady and furene. Two months frequently pafs without the appearance of a cloud. Their rains are heavy, and foon over.

The climate of New-England, compared with that of Virginia, is as the climate of Somth-Britain is to that of North-Britain. NewEngland being, as has been faid, nearer to the equinoctial line than the old, their days and nights are confequently more equal. The fun rifes at Bofton, on the longelt day, June 1ith, 26 minutes after 4 in the morning, and fets at 34 minutes afier 7 in the evening. And on December 13, which is the fhorteft day, it rifes at 35 minutes after 7 in the morning, and fets at 27 minutes after 4 in the afternoon. So that the longeit day in New-England is abour 15 hours, and the thorteft about 9 .

This country, when firt vifited by the Englifh, was one great foren, the Indians having cleared a fmall fpot here and there for corn; but every three or four miles our countrymen found fome fruitful valleys and brooks. The land next the fia is generally low, and
and in fome parts marfhy; but further up it rifes into hills, and en the N. E. it is rocky and mountainous. Abont Maflachufets-Bay the foil is as fat and black as any part of England; and the firlt planters found the grafs in the valleys very rank for want of cutting. But the uplands are not fo fruitful, being mottly a gravelly and fandy foil, inclining to a clay.

Few countries are better watered with Springs, rivers, and lakes. though the latter are not fo large as thofe to the N. and W. Of its rivers, which all abound with filh, the Connecticut, Thames, Narraganfet, Pantucket, Piguakket, Concord, Patuxet, Merimack, idictaqua, Sawko, Cafco, Kennebeck, and Penobfcot, are the largen.
'lo the conveniency of fo inany fine rivers, the number of large populous towns in this country is juitly afcribed: and in the tracts between the rivers are fo many brooks and fprings, that there is hardly a place but freth water may be had, by finking a well within 10 or 12 . feet of the furface, and luch water as is generally good.

The moit remarkable capes and points from S. to N. are Pemtquid and Small Points, Cape Eli. zabeth, Black Point, Porpus and Nidduk, or Bald-hearl capes, York Nubbles, Lock's Poinr, Great Boar's-head, Pigeon-hill, Cape Ann, Nahant, Pullein's, Alderton, Marhhield, Gurnet, Monument, and Sandy Points, Mur-ray's-cliffs, Sandy, Relinfgate, and Race Points, Cape Cod, Head of Pamet, Cape Malabar or Sandy Point, Goofeberry Neck; Ninigrct, Quakhoragok, Watch, Black, Pipe-Itaves, and Hemunafic Points, Sachem's Head, South, Long-Neck, and Elizaberh Points, and Lion's Tongue; a!fo Cafe Poge, and Gay-Head, in Martha's Vineyard.-Bays chiefly to be noted are, l'enobicot, Kennebek, Caßko, Sawko, Wells, the great bay of Malfachufets, Cape-

## E N G

Cod-bay (including Plymouthbay), Buzzard's and Narraganfet tas; to which may be added the Icvil's - Belt, or Long - Inand Scund, between that iffand and Connecticut, and Winipiffoketpond, in New-Hamphire, The coves and inferior bays are, Merrymeeting, Muffequoif, and Harratekket bays, Broad-cove, Exeter ond Little bays, Sandy-cove, Nahant, Oyfter-river, Falmouth and Nalkytukket bays, Elark's - cove, Nahantik, Guilford, and Fairfield bays, 'Tarpaulin and Homes's coves in Martha's Vineyard ifland, and Tarpaulin-cove in Nathawnilland (one of thofe called Elizabeth). Its principal harbours are, Winter, Yifcataqua, Cape Ann, Bofton, Konohaffer, Scituate, Yarmouth, Slokum's, New - haven, Ship, and Old Town (in Martha's Vineyard-ifland).

The foil of New-England is various, but heft as you approach the fouthward. It affords excellent meadows in the low grounds, and very good paflure almolt every where. They commonly allot at the rate of two acres for the main. tenance of a cow. 'The meadows, which they reckon the beft, yiold about a ton of haj each acre. Some produce two tons, but then the hay is rank and four. This country is not very favourable to any of the European kinds of grain.

The wheat is fubject to be blafed; the barley is an hungry grain; and the oats are lean and chaffy; but the Indian corn, called maize, which makes the common food of the loweft fort of perple, flowrihes here.

About 6 quarts of feed is fufficient for an acre, which, at a medium, produces about 50 bllShels. The New England people mot only make bread of this grain, but they malt and brew it into a beer, which is not defpicable. 'The greater part of their beer, however, is made of molafles hopped, with the adti:ion, fome-

## E N G

times, of the tops of the frruce. fir $\ln f u l e d$.

Theg ralfe a large quantity of flax ; and have made eflays upon hemp, which have been far from unfuccefsful.

They have great plenty of all forts of roots, as curnips, parfinipe, carrots, radifhes much larger and richer than ours, though their feeds came originally from hence; fiore of onions, cucunibers, and pum. pions. But the feed of the watermelons, and fquahes which grow here in great plenty, is trought from Portugal, to which the irs. ders here have all along fent great quantities of fill.

They liad a variety of fruiss of their own growth, before the Englith arrived here; particalarly grapes, currants, Arawberries, rafpDerries, hurteberries, whitethornliaws as big as our cherries, chef. nuts, walnuts, fmall nuts, filberts, and many more ; as allo forrel, water-crefles, favory, and the like falad and pot-herlss ; befides otters for phyfic, and feveral forts of puife, hut efpecially kidnes. beans; and without doubt thofe vegetables have been fince improved. The peaches here are large, all thandard, and the fruit better than ours; and they commonly bear in three years from the ftone. They have alfo great plenty of apples, with which they make large quantities of cyder; fo that, in 1721, at a village near Bofton of about 40 hollies, they made near $30 c o$ barrels; and fome of their apple-trees yield fix or feven barrels, at the rate of cight or nine buthels to the barrel. Here was a pearmain-tree, which, a foot from the ground, meafured 10 feet 4 inches round, bore $3^{8}$ bulhels of fine fruit.

Their horned catile are very numerous, and fome of them very large. Oxen have been killed there of 1800 weight. They have alfo great numbers of hogs, and thofe excellent; and fome fo large as to weigh 25 fcore, They have

befides a breed of fimall horfes, which are extremely hardy. They pace naturally, though in no very graceful or eafy manner ; hut with fuch fivifuefs, and for folong a continllance, as muft appear almolt incredible to thofe who have not experienced it. The have a great number of theep too, and of a good kind. The wool is of a traple fulficiently long; but it is not fo fine as that of Old England. They, however, manufacture a great deal of it fuccefffully. Cloths are made of it, of as clofe and firm a contexture, though not fo fine, as our belt drabs, being thick, and fuperior for the ordinary wear of country people to any thing we make in England.

There are in many parts mines of iron ore, and fome of copper; notwithltanding which mont of the iron ufed there is brought from the more Sourhern provinces in pigs; and none of the coppermines have hitherto been worked. They have great quantities of bogiron, which is ufed for catt metal, and much efteemed.

The people, by their being generally freebolders; and by their form of government, have a very free, bold, and republican fpirit. In 110 part of the world are the ordinary fo independent, or poffefs fo many of the conveniences of life. They are ufed from their infancy to the exercife of arms; and they have a militia, which, as fluch, is by no means contemptible, and in feveral fkirmifhes lately have proved themfelves good foldiers. This, too, is much the beft peopled of any of our colonies upon the continent. It is judged that the four provinces it comprifes, namely, Maflichufers-bay, Connedicut, Rhode-Ifland, and New-Hampihire, contain upwards of 600,800 fouls. Thefe four governments are confederated for their common defence. The moft confiderable of them, for riches and number of people, being $200,00 c$ of the latter, though not

## E N G

for extent of tersitory, is Maga-chufers-bay.
'Ihough in all the provinces of New-England ase large towns. which formerly carried on a confiderable irade, the chief one was Bollon, the capital of Mallachu-fets-bay, and till lately the firit city of New-England, and of all Nurth-Ainerica. See By/ton.

For the towns of New. Enyland fie the different provinces, viz. New-Hamppilict, York, M, Jachu-fots-bay, Rhode-If.and, \&c.

We derive our rights in America from the difcovery of Sebaftian Cabot, who fift made the Northern continent in 1497. It was, in general, called then Newfoundland, a name which is now appropriated to an inland on its N.E.coaft. It was a long time before we made any attempt to tectle in this country; Sir Water Raleigh thewed the way, by planting a colony in the Southem part, which he called Virginia.

Early in the reign of King James I. a colony eftablifhed itfelf at a place which they called New Plymouth. They were but few in number: near half of them perifhed by the feurvy, by want, and the fiverity of the climate. But thofe who furvived, not difpirited with their lofles, nor wilh the hardhips they were ditl to endure, and finding themfelves out of the reach of the Spiritual arm, reduced this favage countiy to yield them a tolerable livelihood, and by degrees a comfortable fubfiftence.

This little fettlement was made in the year 1621. Several of their brethreat in England took the fame methods, whereby the colony of puritans infenfibly increafed; but they had not extended themfelves much beyond New-Plgmouth. In 1629 the colong began to flourih, fo that they foon became a confiderable people. By the clofe of the enfuing year they had built four towns, Salem, Durchefter; Charles-town, and Boiton;

## ENG

Thofe who found themiflves uneafy upon a religious account in England, and frueral on account of the then profitable trade of furs and k ins, and for the fake of the fihheries, ware invited to fettle in New-tingland. But this colony received its principalaffitance from the difcontent of feveral great men of the puritan party, who were its protectors, and who entertained a defign of fettling among them in New-England, if they thould fail in the meafures they were purfuing for eftablifhing the liberty, and seforming the religion, of their mother-country. They folicited for grants in New-England, and were at a great expence in fettling of them. Anoongt thefe patentees we fee the L.ord Brooke, the Lord Say and Scal, the Pelhams, the Hampdens, and the Pyms. And Sir Mathew Boynton, Sir William Conftable, Sir Arthur Hallerig, and Oliver Cromwell, were actually upon the point of embarking for New - England ; when archbifop Laud obtained an order for puting a flop to thefe emigrations.

The part of New-England called Maffachufets. Bay had now fettlements very thick all along the fea-hore. Some flips from theíe were planted in the province of York and New-Hamphire, being torn from the original ftock by that religious violence which was the chief characteriftic of the firt fettlers in New-England. The pateritecs laft mentioned fettled upon the river Connecticut, and eftablithed a ftparate and independent government there; fome perfons having before that fixed themfelves upon the borders of this siver, who fled from the tyranny of the Plymouth and Muffachufets colonies.

For a confiderable time the people of New-England had hardly any regular form of government. By their charter they were impowered to eflablifh fuch o der, and make fuch-aws, as they fleafor,

## E NG

provided they were not contraty to the laws of England; a point not eafily reitied, as they who com. pofed the new colonies were of a contrasted way of thinking, and moft violent enthuliatls. They adopied the books of Mofes as the law of the land; but the firf laws grounded upon thele have fince fallen into difufe.

As to religion, it was, as has been faid, the puritan. And as foon as they found themfelves at liberty in America, they fell into a way very little different from the independent mode. Some of there people fettled themfelves to the Southward, near Cape Cod, where they formed a new government upon their own principles, and built a town, which they called Providence. This has fince made the fourth and fmalleft, but not the wort inhabited, of the New-England governments, called Rhode-Inand, from an illand of that name forming a past of it.

The Britifh and India commodities annually imported into this colony, till the commencement of the reefent troubles, u ere eftimated at nearly $395,0 c o 1$. and the exforts to Great-Britain at 370,0col. but their fhip-building and fifhery trade was on the decline.

In their wars with the Indians the people of New-England Mewed very little conduct : and though they prevailed in the end, in a manner, to the extirpation of that race of people, yet the Indians had always great advantages in the beginning; and the meafures of the Englifh to oppofe them were for the molt part injudicioully taken. Their manner too of trearing them in the beginning was fo indifcreet, as to provoke them as much to thofe wars as the French influence has done fince that time.

English Harbour, one of the ports of the illand of Antigua, in the Weft-Indies. It is the beft port in the ifland, and is fituated on the South fide; and at a great expence has been rendered fit to

BOUR, one of Ind of Antigua, - It is the beft and is fituated and at a great rendered it to.
reseive the largef thips of war, who find there a dock-yard with thores and all the materials for repairing and careening. It is but a finall diftance from the town and harbour of Falmouth.

Eries, a nation of Indians in Canada. About the year 1655 they were extirpated by the Iroquois : and though the beginning of the war did not turn out in favour of the latter, yet they were not at all difcouraged by it ; and at laft they got fo much the advantage over the Eries, that were it not for the great lake which to this day bears the name of that nation, one would not have known that they ever exifted. This Eric-lake empties itfelf into that of Ontario, by a canal called the Leap of Niagara.

Escatari, a fmall ifland about five leagues N . of Louifbourgh, in the illand of CapeBreton.
Eskimaux, oresquimaux, one of the fiercelt people of all North-America. They dwell on its moft Eallern verge, beyond the river of St. La;rence, and fpread themfelves up $N$. and E. into the large track called 'Terra de Labrador, oppofite to Newfoundind, from lat. 50 to 64. and from long. 59 to 80 . They were at firft difcovered by the Danes, who did not think it worth their while to make any fettlement, or even carry on any traffick among them. Their name is fuppofed to be originally Efquimantfic, which, in the Albenagin dialect, ignifies eaters of raw feth; they being almoft the only people in thofe parts that eat it fo, tho' they ufe alfo to boil, or dry it in the fund. By the complexions, cultoms, language, \&c. they feem to he a quite different people from all the other Americans, and probably are defcended from the Groenlanders; but they are of fo favige and brutal a nature, that no European nation cares to claim kindred with them, And fuch as

## ESK

trade among them for furs, the only commodity they bring down from the inland, and exchange for knives, fcillars, pots, kettles, \&c. are obliged to keep them off at ftaff's length, and not fuffer them to come in too great numbers; for when they do, they make no fcruple of plundering, inftead of bariering. They hate the Europeans, and are always ready to do them fome mifchief; fo that they will come to the water-fide, and cut their cables in the night, hoping to fee them wrecked upon their coaft againft the next morning.

They are generally tall, fout, and nimble, with a lkin as fair as that of any European, becaufe they always go covered, even in the hotteft weather. Their hair and beards are either fandy or brown, and very bullay; and the hatter, (thofe being almott the only people of this country who have any) grows up almolt to their very eyes; which gives them a very dreadful look; at leaft one is at a lofs to difcover the features of their face. They have fimall eyes, that look wild, large and very dirty teeth; hair commonly black, fometimes brown; very much difordered, and a brutal appearance all over. Their manners and character do not be'ye this bad phyliognomy. They are fierce, wild, diftruafol, reftlefs, and always difpofed to do Itrangers a mifchief, who ought to be contimually on their guard againft them. With regard to their genius, fo little traffick is carried on with this nation, that one knows not yet what particular bias it is of. However, they have always enough for doing mifchief.

They make themfelves fhirts of the wind-bladders, guts, and fkins of fin, which they few in Ilips neatly enough ; but they come down no lower than the middle with the men, and down to the knees with the women : over that they wear a hort jacket, made of the \&kins of bears, or other wild

## E S K

creatures, as alfo thofe of dogs, and fea calves, with a cape hanging behind, which they throw over their heads in bad weather, fo that fearce any part of their face can be feen. 'They wear alfo breeches and boots made of the fame fkins, with the fur inward; and the outfide they adorn with fable, ermine, or other fine fkins. The men's jackets come down only balf to the thighs, and thofe of the women, below the calf. Both are tied with a girdle, to which they commonly hang fome trinkets made of fifh or other bone, or fuch other toys as they barter with the Europeans. In fummer they live in huts in the open air, but in winter they withdraw to their caverns under ground. The French at Revelal times, built fome forts and little towns on their frontiers, fuch as Cartier, St. Nicholas, Chichequedec, Port Neuf, and Port Beall, \&c. in hopes of civilizing, and introducing a traffick among them, as well as for the fecurity of the miffionaries who were to convert them to chriftianity. But they were found fo thy and inciocile, that thofe fettlements have fince fallen to decay.

They are reckoned to be fo numerous as to have at leaft $30,0 c o$ fighting men; but they are fo cowardly, that 5 co Cliftinos of Hudfon's-Bay, commonly beat 5 or 6000 of them. They are dangerous at fea, as well as land; and with their canoes, into a fort of which they fometimes can throw 30 or 40 men, they fo infeft the cod and other fifheries, that the Malowins on the N . and the Spaniarcis of Pcrto Chova, are forced to arm fome of their barco longos, in order to protedt their fifhermen; they maling nothing of crofling over into Newfoundland, by the flraits of Beltifle, which are about feven leagnes broad: but they feldom venture further.

The Efquimaux are ;ured to
drink falt water; and frequently they have no other. This, how. ever, is not rea-water, but got from fome brackith ponds, fich as are fometimes to be met wilh far up in the country.

By fome Danif veffels which, in 1605 , failed pretty high beyond Hudfon's - Bay, we learn that they met with little men, who had fquare heads, a tawny complexion, and large protuhe. rant lips: thefe eat both flefl and fifl quite raw, who could never take to bread, or drink boiled victuals, and fill lefs to wine; drank whale-oil as we do waier; and devoured feeh by way of dainty.

The canoes of thefe pigmies refemble a weaver's fhuttle, being ten or twelve feet long. They are conftructed of pieces of whalebone, about the thicknefs of one's finger, covered on both lides with the fkins of feals, or fea. calves, fewed together with finews: two other ikins cover the top of the canoe, fo tohat only an opening is left in the middle for the rower, and he draws it clofe round his loins like a purfe; fo that being fet down, and thus faftened by the middle, they do not receive onedrop of water into the canoe, though the waves fhould roll over their heads, and be fometimes furrounded with them every way. The flrength of thefe machines confifts in the two ends, where the whalebone is well faftened together by the extremities; and the whole io compact, and well fewed, that thefe fmall veffels can weather out the moft violent forms. In there canoes, only one man generdlly manages each, in which he his fitting, with his legs extended, his fleeves tied clefe abont his wrifts, and his head wrapped in a kind of cowl faftened to his jacket: fo that whatever happens, the water cannot penetrate it. They hold with both hands an oar, bread at cach end, and bs-

## K

and frequently er. This, how. t-water, but got kifh ponds, fich ; to be met with ntry.
in veffels which, pretty high beBay, we learn with little mon, heads, a tawny large protube. eat both flefl and who could never or drink boiled II lefs to wine; as we do waier; efh by way of
f thefe pigmies r's Thuttle, being eet long. They pieces of whalehicknefs of one's on both fides of feals, or fea. -together with her ikins cover toe, fo toblat only eft in the middle nd he draws it ins like a purfe; down, and thus middle, they do op of water into igh the waves heir heads, and rrounded with

The ftrength confifts in the the whalebone ogether by the the whole io Ill fewed, that Is can weather ent ftorms. In one man geeach, in which 1 his legs exfied clefe about s head wrapped faftened to his tever happens, fenetrate it. both hands an end, and bs-

## EST

tween five and fix feet long, which ferves at the fame time as all oar, rudder, and balance, or counterpoife. In thefe canoss the pigmies are very dexterous, and move very fwiftly.

The Efquimaux, who whe th: fame fort of canoes, have alfo other veffels, which are larger, and nearly refembling the deckeid chaloups among the French. The ribs of thefe are made of wood, but covered with the fame Ikins as the other. They carry about 150 perfons, and go either with fails or oars.

The Efquimaux are the only natural inhabitants ever feen on the coalts of Newfoundland, who purs thither from the main-land of Labridor, in order to hunt, and for the fake of traffic with Europeans. One of their women was brought to England and prefented at court in the year 1773 .

Eskimaux, or New-Britain, and terra de LaBRADOR, is the country of that peaple bearing the firt name, fituated as above defcribed. It was yieided to Great-Britain by the peace of Utreche, in 1713. But no colonies have been fent thither from thefe kingdoms, a few fmall fettlements at the bottom of Hadfon's-bay excepted. Here the Indians and Canadians hunt for furs, though they have no colonies in the country.

Essex, a maritime county of Maflichufets-bay, New-England, the molt N . of the whole province, through which runs Merimack: river, and its eaftern point to the Atlantic is Cape Ann. The principal town in this county, Salem, is now the capital of the province, fince the port is removed from Bofton hither.

Essex, a county in NewE. Jerfey, whofe principal towns are Elizabeth and Newark.

Estapa, or Estape, a town belonging to the province of Tabafco, and audience of Mexico, in New Spain. It is me:ationed

## EUT

by Dampier as fituated on the river rabafco, four leagues beyond Villa de Mofe. It is faid to be a place of good trade; and fo frong, that it repulfed captain Hewet when he attacked it with 200 defperate buccaneers.

Esther-town, a town in Lancafter coanty, Penfylvania, fituated on the E. bank of the Sufyuthannah - river, so miles S. W. of Middle-town, and 12 miles N. E. of Carifine.

Estechimines, favage nations confining on Nova Scotia. See Malecitics.

Eustace, or Eustacia, Island of, called alfo Metanzis, or Slaughter, (from a butchering made on it by the Spaniards). It forms, with a long point of land, the entrance to the harbour. of St. Augultine, in Florida. This inand is long and narrow, confifting principally of fand and buthes, and but one mountain, of about 20 miles in circuit.

St. Eustatia, or Eustathius, one of the Carribbes Inands. It is about 5 leagues in circuit, is properly a very fteep mountain, which feems to rife out of the fea, in the fhape of a fugar-loaf. It is fituated in the Atlantic Ocean, in America, Give miles W. from St. Chriftopher's; is a very fine, well cultivated ifland, fubject to the Dutch, and fomething larger than Saba, which has the fame matters, between which and St. Chriftopher's rans a narrow channel. It has no harbour, only an open road on the W. fide. Its principal product is tobacco, which is planted all round the mountain, hy the Dutch, who are well fortified here; and have roco white people, befides 1500 negroes: they produce near $60,000 \mathrm{lh}$. of fugar here. With regard to fituation, it is reckoned the trongeft of all the Caribbee Iflands, here being only one good landing-place, which may be eafily defended by

## EUS

a few men; befides, the harbour is commanded by a fort, mounted with guns : only the very top of the monntain is covered with wood, all its circuit elfe being manured, and planted. Though the faid top looks as if it was bar. ren; $j^{\prime 2}$ on it is a pretty large plain, where wild beafts harbour. Though in this ifland are neither fprings nor rivers, they never want proper fupplies of water from their ponds and cifterns. In the ifland is only one church; but feveral ftore-houfes, well furnihed with all neceflaries, pirticularly the commodities of Europe. The air here is healthy; but fubject to terrible thunders, earthquakes, and hurricanes: the laft of which generally happen in the months of Auguit and Sept. to the frequent ruin of their houfes, plantations, and hips. It is faid that even the birds fore fecing, by inftinct, the approach of thefe hurricanes, lay themfelves flat on the gronnd; and the rain which precedes them is always bitter and falt.

The Dutch took poffeffion of this ifland in the year 1635 , the property of which the States granted to fome merchants of Fluhing, who foon fettled a colony on it of about 600 families, or, as Come fay, 16 co perfons. In 1665 , the Englif, from Jamaica, turned the Dutch out ; but it was foon retaken by the Durch and French, then united in war againh the Englith; and the French placed a garrifon in it. Eut by the treaty of Breda it was reflored to the Dutch. In 1689, it was taken from them by the French; and from thefe it was taken the very next year by the Engtim, under Sir Timothy Thornhil!, having had only 8 of his own men killed or wounded in the attack, though the fort was mounted by 16 great guns, and furrounded with a frong double pallifado, and defended on one fide by a deep ditch, and a nar-

## F A I

row bridge over it to the gate, which admitted but one man at a time. The ifland heing again reitored to the Dutch, by the treaty of Ryfwick, they have remained ever fince in the quiet folleffion of it. Here they have alfo fine fields of fugar-canes, This ifland, as well as Curaffoa, is engaged in the Spanifh coutraband trade, for which, howeever it is not fo well fituated. The ifland lies in latitude 17,29 . long. 62, 56 .

Exeter, a town in the pro. vince of New-Hamplhire, in New England, on the W. branch of the lifcataqua river.

Exeter, a town in the courty of New Hanover, in N. Carce lina, fituated on the N. E. branch of Cape Fear river, about 30 miles from Wilmingion, and 22 from the New river.

Exuma Iste, one of the Bahama Ifles, fituated on the E. of the Great Bank, between Stocking Ines, on the S. W. and Long Ifle, on the E . it is now uninhabited except by two familics, jet is one of the beft of the Buhamas, not only for its fertility, but for the excellency of its anchoring. places in the found to which it gives name, where all the Britifh navy could ride in fafety. The only fugar plantation which has ever been attempted here, was abandoned laft war. It lies undes the tropic of Cancer. L.ongitude 74, 30, lat. 24, 30 .

Exuma Sound, lies E. of the Great Bahama Bank, between it and the ifle of Guanahani, Lat. 24. long. 75 .

## F

FAirfield, a county on the coaft of Connecticut, NewEngland. Faisfield was formerly the Molegin territory, and was in part planted by the Du'cl. It is bounded all along to the South by the province of NerYork; by New Haver to the N. E. and New-York to the

## FAL

S.W. The inland part of the country, about eight or 10 miles from the More, is full of hills and fwamps, which are uninhabited; but ufed to have good game, and confequently a trade of furs. Moft of the towns are built in fmall crecks; but not much noted for trade.

Falkfield, a town or rather village of the county jut mentioned. It is fitmated in a creek on the fea-coaft. Lat. $41,16$. long. 72, 12.
fallen City, or Old JeQusalem, a range of rocks among the Viigin Ines in the $W$. Indies, S. W. of Virgin Gorda. Long. 62, 53. lat. 18, 10.

FAIMOUTH-TOWN and Harbour, in the Ifland oi antigua, in the Weft Indies. It lies on the S. fide of the Illand, and is defeaded by two forts, which have a magazine.

Falmouth, a fmall town in the county of York, and province of Maflachufets - Bay, in New England, which was deftroyed, Jannary 1776, by the Britith forces, for iefufing to firpply fores when demanded. It confifted of 600 families, and was divided into 300 narifhes; New Calco, Sapoodock, and Stroud Water. The principal part of the town was fituated on a neck of land Aretching out L. from Stroud Water, and formed a kind of mole to the Little Cove within it. This part confilted of a church and townhoufe, withabout 112 houfes. It was laid out in lots forming two ftreets parallel to the harbour, and five at right angles to them; on which a oreat number of buildings were carrying on. 'The harbour was extremely fine, large and commodious, and malts and naval ftores were loaded here. 'There was much trade carried on from thence to the Welt India 1 lands, and many hips were built here.

Falmouth, a town and bay, at the $\mathrm{S}, \mathrm{W}$. extremity of the

## FES

peninfula in Barnftaple county, Plymouth Colony, Nciv England, 16 miles S. W. from Sandwich, and 5 N. E. from NawhawnIland, at the mouth of Buz-zards-bay, one of the ElizabethInands.

Falmouth, a town in King George's county, Virginia, on the N. fide of the Rappahanock river, 5 miles N. of Frederick fburg, and 29 S. of Dunifries.

Farewell Cape, the moft foutherly headland of Gro:nland, at the entrance into Davis'sAraits. Latitude 59, 37. long. 44, 30.

Farmingham, a town in Herfford county, Connecticur, N. of New Cambridge, and W. of Hertford.

Fe d'Antiochia, Santa, the moft northern town of Popyan, a diftriet of Terra Firma. It is fituated about 200 miles to the N. of Popyan city, near the confines of the province of Carthagena, on the banks of the river Santa Martha, and near 180 miles to the S. of its conflux with the Magdalena. Thither the inhabitants removed from another town called Antiochia, which was 15 leagues diftant from it; and now but fmall, and thinly propled; whereas Santa Fe d'Antiochia is a confiderable place, being the capital of a government called the andience of Santa Fe . Ihis town had the addition of Antiochia annexed to it, to diftinguilh it from Santa Fe deBogata, S.America.

Fe, or Foy, Santa, a place in the middle of Veragua, a province in the audience of Guatimala, where the King of Spain keeps officers for ca!ting and refining gold. It ftands at the fource of a river which rans into the NorthSea.

Fe, Santa, the capital of New-Mexico. It is fituated 130 leagues from the fea, near the fource of Rio del Nort, which running a great way through the coun:ry fouthward, and then

## FLO

hending eaft, falls into the gulf of Mexico. Baudrand makes it nine leagues from that river. it is faid to be a rich city, regularly built ; and is the fee of a bihhop, who is fuffragan to Mexico, as well as the feat of the governor of the country, who holds his pott for five ycars, and is then fucceeded by another. By fome it is called Santa Fe de Granada, and hy others New Mexico, Latitude 7, 29. long. 77, 20.

Fishers Isiand. It is fituated about 5 miles from the coaff of Connecticut, near the mouth of the 'Thames river; it is $E$. and $W$. near 5 miles long, and about 1 and $\frac{x}{2}$ broad N . and S .

Florida, a country fituated on the E. fide of the Miffifippiriver, and extending to the frontiers of Carolina and Georgia, and forms an extenfive peninfula from lat. 25 to 31. This was difcovered by the Spaniards in 1512, and by the cruelties exercifed on the natives, it foon became a defart, and the fmall number of fettlements Spain formed here, which they never peopled, ferved lefs to make any advantage of the country, than to hinder another nation from fettling in it; and the was obliged, in 3763, at the peace, to yield it to Great-Britain, who divided it into colonies or governments, under the name of Eaft and Weft Fiorida, whofe limits wore fetted by proclamation, Oct. 7, 1763.
Fi.orida, East, comprehends all the reninfula; it is bounded on the N. by Georgia, and on the $\mathbf{w}^{\prime}$. by the river A palachicola. It contains 12 million of acres, which is ahout the quantity of Ireland. Its roil, except in the middle, is very low, and cut into lakes and rivers full of fing; the trees which cover it are not clofe zogether, as in the American for refts, but at a diffance from each other without any underwood, I he thores are fandy or marhy to a great difance withing laud. The

## FL O

agitation of the waters violently attacking with a continual force its fouthern extremity, which they inceflantly wear away, has divided it into a great number of inands, krys, banks, and rocks, whofe mafs bending from the W. to. wards the N . has followed the direction of the current. Thife feparations, in which are formed feveral channels for fmall vefiels, were named by the Spaniards The Iflands and Keys of the Martyrs. Befides, the fituation of this co. lony between two feas renders the air colder, and the rains more frequent, than in the neighbouring parts of the continent. The mildnefs of the feafons, and the wholefome quality of the climate, he. came a proverb among its filt mafters, who ufed to refort thither from the Havanna, Vera Cruz, and feveral other places, for the recovery of their impaired healhs. The country abounds with all forts of timber and fruit trees, efpecialiy oaks, firs, pines, but thefe laft without bearing fruil, nut trees, fmall cherry trees, ruv. berry trees, both white and red, which here grow much larger than in any other part of America, ma. hogany, walnut, maple, afh, len. tifques, limes, cheinut, cedar, lavrel, and ralm-trees, with vines, which grow raturally, of which laft is a kind whofe grapes are larger hetwixt the two tropics; and it is reckoned as good as our manchet, and fix times cheaper. Alfo others that ferve for dying, as funic, braziletta, logwond, \&e. the fallafras and tolu-tree ufed in phyfic ; the magnolia, tulip laurel, the tupelow-tree, \&c. are le. come the greateft ornaments of gardens; and other Chrubs which may become of great confequence in trade, fuch as the myrtle-wax fhrub, which grows in every foil, the opuntia or cochineal figerree, the fenna hrub, \&c. to this may be added, that Eaft-Florida hal the greateft part of the fruitrtree of the New World, and almon ad

hunting. It appears that few favages inhabit this part of the country. But this coaft is the kingdon, as it were, of oyfters, as the great bank of Newfoundland, the gulph and river of St. Laurence, are that of cod and haddock. All the low lands on the coalt, as far as they can lie approached, are bordered with mangler-trees, to which adhere a prodigious yuantity of fanall oyIters, of an exquifite tafte. Others a great deal larger, and not fo delicious, are to be met with in the fea; and that in fuch numbers, that they form fhelves therein, which at firt one takes for rocks level with che furface of the water.

West florida is feparated from Eaft Florida by the river Apalachicola on the Eaft, hy the Gulf of Mexico on the South; on the North, by the 3 Ift parallel of latitude; and on the Wert, by the lakes Maurepas and Pontchartrain and the river Miffifippi. It is a long land of more than 80 leagues, in which fettlements are enclofed, yielded to Great-Britain at the peace in 1763 . The climate is very hot, damp and unhealthy, particularly near the fea; the Strand takes up a great depth, it is a white and dry fand. As you advance into the country, which is tolerably even, the climate becomes more healthy, and the lands more fruitful; they get every year two harvelts of maize, and have very good paftures with plenty of cattle. The trees and plants are nearly the fame as in Eaft Florida, but this affords feveral articles which are wanted there. The inland parts are alfo much better.

Pearls are to be found here in great abundance; but the Indians value our beads more. Upon the whole coalt, for 200 leagues, are feveral vaft beds of oyfters; and in the frefhowater lakes and rivers is a fort of hell-figh between a mufcle and a pearl-oyter, in

## FLO

which is found abundance of pearls, and many larger than ordinary ; and on the coall they often gather ambergris. Here are two forts of cochineal; one the wild fort, which is far Inferior to what is cultivated in the gardens and fields; and the plant of which indigo is made, is very common in molt of the S. parts of this province. Here is to be found alfo, efpecially after high S. winds, a fort of fone-pitch, which the Spaniards, who call it copea, moillen with greafe, and ufe it for their veflels in the nature of pitch; than which they fay it is much bedter in hot countries, it not being apt to mel-. The high grounds contain mines of copper, iron, lead, and coal, and they find orpiment and fandarac in feveral places. Great part of the inhahitantsare French, who build Mips and cultivate rice, cotton, and indigo. Their cotton is very fine, of a hright white, and their indigo is more brilliant than that from St. Domingo. The inhabitants of this colony amount to about 6coo; but they have lately increafed rapidly towards the Minfifipi. At prefent their chief trade is in furs and wood for dying and building. In 1768 their exports amounted to 30,495l. the year following to 10,806. In 1770 30 veflets enter $d$ their ports, and they fitted out 4 I .

On the banks of the Miflifippi are feveral fiprings and lakes, which produce excellemt falt. The plants producing hemp and flax are very common in this country; and that fort of filk-grafs, of which are made fuch fluffs as come from the Eaft Indies, called berb-ftuffs. Vaft flights of pigeons come hither at certain feafons of the year, for above a league in length, and half as broad; which roolt on the trees in fuch numbers, that they often busak down the branches, In
many places are mines of pit-coal, and iron-ore is often found near the furface of the carth, whence a metal is extrakled litile infe. rior to ftecl. Here are alfo fome mines of quicklilver, or rather the mineral from which it is extracted, and only ufed by the natives to paint their faces and hodies in time of war, or high fer. tivals.

With regard to the rivers which do not communicate with the Miffilippi, only two large ones are betwixt it and the perinfula of Florida, namely, the Coza, Confli, or Mobile, and Palache. The diftance between thefe two rivers to the E, is about 190 miles; and the coaft between them is very deep and bold. The chicf har. bour betwixt them alfo, and indeed the beft upon all this coaft of the Gulph of Mexico, is Penfacola. The other places in Flo. rida may be feen under the re. Spective names.

Forbisher's Strait, fo called from the difcoverer of it, Martin Forbifher, who in the year 1578 found it out, in lat. 62 N. when he went a voyage in quelt of Groenland; and from thence, forcing his way through the ice, he arrived at a place in thefe northern countries, which he called the Countefs of Warwick's Sound, where he defigned to build a fort; but part of the timber which he brought from England being loft, he returned home, loaded with a glittering fort of fand, which he bad imagined to contain gold. (See Groenland.)

Fordham, a manor in the county of Weft-Chefter, and province of New-York.

Fortr-Royal., the capital of Granada, one of the Caribbee Illands, in the Weft Indies, which lies at the bottom of a facious harbour, that is capable of containing 25 hips of the line with eafe and in perfeet fecurity. It is fituated at the $S, W$, end of the

## FRA

inand, where the reat of government is fixed, which retains the French divifion of the ifland into 7 quarters or prifihes.
Fort-ROYAL, one of the principal towns in the inand of Martinien, in the Weft Indies. It is the feat of government in the illand; its ftreets are regular, and houf s agrenble, and the inhabitauts aldicted to luxury. To the $E$ of the sown, on a neck of lind, is an irregular fort, badly buitt, and worfe deligned, which gives name to the town it poorly Absends. Since the perce the French have built a citudel, which has ent 325 cool. Aerl. Its harhour, where the men of war winter, is oase of the beft in the weft Indies.

Franckgort, a town of Phihallphit coun'y, P'enfylvania. J : is as weil built, and as large, as Briftoltown, in Buckingham county. The inhabitants were at firf Swedes and Dutch, who had dwelt in feveral places of Penfylvania. The former fettled thensfelves principally on the creeks near the frefhes, and the latter planted near Oxford, upon the bay. At Franckfort is a Church-of-England congrega:ion; and in the town are about So families. It is about 4 miles E. of Philadelphia, on a branch of the Delawar river.

Francis, Lake of, St. in the river of St. Laurence, belonging to Canada. It is 7 leagues long, and at moft 3 in its greatef breadth. The land on both fides is low, but apparently pretty good. The road from Montreal to it lies a listle to the S. W. and the Lac de Sr. François runs W.S. W. and E. N. E.

Francts, St. at the weftern extremity of Lac de St. Pierre, in Canada, is a vaft number of ines of all dimenfions, called De Richelieu. In turning upon the left, as one comes from Quehec, are particularly fix iflands; which

## FRE

border a deep neek of land, ined which a fine river difcharges itfelf, whofe fource is in the neighbourhood of New-York. The ifles, the river, and the whole country watered by it, all go by the name of St. Francis. Each of the iflands is upwards of a large quarter of a le:gne in length, but of unequal breadth; but the greateft part of thofe called De Richelies are finaller.

In the river of St. Francis, and at its month, they catch excellent filh. In winter they make holes in the ice, throngh which paffing rets five or fix fathoms in length, they foldom draw them empty. The fith which they commonly take are, barbel, filt-fih, achigans, mafgai:onge a, a fpecies of pike with a head larger than that of ours, and a mututh under a cronked front. The foil of St . Francis, if we may judge of it by the trees produced on it, and the litile which has titherto been cultivated, is very good; yet the inhabitants are poor.

Francoise Cape, in St. Domingo. See $H$ Spaniola.

Franks-Town, in Cumberland county, Penfylvania, fituated amond the motartains at :lie N. W. ex:remity of the province, 22 miles S. W. of Huningdon. on the fame river, $u$ hich runs into the Sufyneliznnah.

Ifrayles, an ifland near the coalt of New Andalufra, on the Terra Firma.

Frederica, fo called from Frederick late Prince of Wales, a town of Georgia. It is fituate: in the middle of St. Simon's inind, near the coan. Round the place are good fortifications, at the moath of the river Abatamba, particularly a regular fortrefs, ftrengthened by four baftions and a fpur-work, towards the river, mounted with reverd! pieces of canrion. Here is a maginracy as at Savannah, the capital of the province, fugported:

## FRO

at the expence of the truftees for the colony of Georgia.

In 1742, the Spaniards, having invaded St. Simon, took the fort of that name; but, upon marching to befiege Frederica, were repulfed, and foreed to quit the enterprize. This illand is 13 miles long, and 3 or 4 hroad, 20 leagues N. of St. Augutine. The fort of St. Simon is 7 miles from the town. Befides this are feveral fimall ifands in the month of the river, fortified. Lat. 31, 12. long. $8 \mathrm{I}, 42$.

Frederick's-Town, or Winchester, an inland town in Frederick's county, Virginia, near the head of Opeckon creek, which runs into the Patowmack river.

Fredericksburg, a fown in Sporfylvania, Virginia, 5 miles S. of Fialmouth, $10 \%$ N. of Wilfianfloarg, on the s. bank of the Reppahannock river. It is 20 miles S. E. to Port-Royal, 52 S. E. to Hobb's. Hole, 6 t to Bilhaven, 84 N. W. to Wiachefter.

Freehold, the chicf town of the county of Monmouth, in New F. Jerfey.

Frousac Chaneme, a flrait lying between Nova Scotia and Cape Preton, which is no more than 5 common French leagues in length by it in breadth.

Frontenac, a fort built by the French. It is fintated in Catnada, on the river St. Laurence, abont sco teagues above Quebre, and at ahout a haort lague from its mouth where it difcharges it. felf on the lake Ontario, or Pretty lake, called alfo Frontenac. It was erceted with a view to fupprefs the ravages of the Iroquois. The winter about this place is much fhorter than at Quebce; and the foil is fo well cultivated, as to prodnce all forts of European and Indian corn, with other firuits. The fort at firf was but indifferent, being only furrounded with mud banks and palli-

## F U N

fades; but afteruards its walls, baftions, and other fortifications, were built of equare Rone, fonnt here in great plenty, and ready polifhed by the beating of the waves of the lake, on the N. file of which it is erected. It is a fquare of 4 battions, a quarter of a league in circuit. Its filuation, indeed, has fomelhing in it that is very agrecable : the banks of the river prefent every way a landfcape beauifully variegaced; as likewife does the entrance into the lake Ontario, which is fown with intands of dificiont magnitudes, all well wooded, on a perinfula; and near it is a gool haven, where all forts of velds may risle in faftey. Sonce of the colunics which came hithor, brought with llem feveral forts of homed cattie, firal, and oifer ufefui animals; fo mbat there is no want of any thing : and, befides, the fortifations are greaty improved. But the misturiane is, that the advantageons com. munication between this lake, Montreal, and Qieliec, is fomewhat dificult an:I dangerous, on account of the river being full of rects and waterfals, and may be eafily obilruged by the ambufcades of the Iroqnois, who lie on each fide : fo that the French abandoned the fort, and damaged thofe works which they could not demolith, in the year 1689. But fince that time they retcok and repaired the place, and were in quiet polfeflion of it till the Englifh, under the command of Colonel Bradfrect, look it in the year 1759, 10 whom it was confirmed at the peace in 1763 .

Fundy-Bay, a large bay on the coaft of Nova Scotia, runring above 200 miles into the land, from Cape sable, the molt fouthern point of Nova Scotia, to the ifthmus which joins that province to the continent. The mourh of it lics in lat. 43, 12. long. 66, 40.

## N

xards its wal!s, er fortifications, are flome, found enty, and rearly beating of the , on the N. file rected. It is a nis, a quarter of Its fituation, lhing in it that : the banks of

## GAN

## G

GAbORI, BAY of, is on the S. E. coaft of Cape Breton. The entrance into it, which is 20 leagues from the ines of Se. Pierre, is al league in breadth, and lying between iflands and rocks. To every one of the former veffils may approach very near ; fome ftrelch themfelves into the fea abont a leagne and a half. The degth of this bay inland is two leagues, and here is good anchorage.

Galette, la, a neck of land in the river St. Laurence, belonging to Canada. From the puint oppofite to lifle de Montreal a road might be made to Galette, by which means 40 leagues of navigation would he avoided, which the waterfals render atmofi impracticable, and always very tedious. The land about la Galctte is very good; and in two days time a bark may fail from la Galette to Niagara, with a good wind. L, Galette is a league and a half above the fall valle il Ics Galots..

Galots, a waterfal fo called; whith lies in the river St. Laurence, in Canada. It is the laft of the cafcades here. Betwixt the neck of land la Galette and les Galots is an admirable country, and no where can be feen finer forefts.

Galots, b'isteaux, an inamd in the river of st. Lamrence, in Canada. It is fituated 3 leagues beyond l'ifle aux Cherres, in lat. 43, 33 .

Ganos, a place in Canada, where the Ohio or Fair river juins that of St. Laurence. It is 6o leagues above the mouth of the latter, and 10 leagues more ly land to the right hand, before one comes to the Ohio.. At Ganos is a fpring, the water of which is like oil, and talles ferruginous. A little further is ano-

## G A S

ther of quite the fame nature, which the favages make ufe of againlt all forts of pains.

Gardiner's Island, a fmall inand about 5 miles long, and one broad, at the E. end of Long Inind, Nex York, on which are two pretty villages.

Gaspe, or Gachere, the Bay and Headiand of, lies a little to the S. of Cape des Rofiers, in Canada. Below this bay one fees a fort of ifland, which in reality is no other than a fleep rock, about 30 toifes long, 10 ligh, and 4 broadi. One would take it for the point or nope of an old wall; and it is aflured, that it was formerly joined to Moust Joli, which lies oppofite to it on the continent. This rock has in its middle an opening in the form of an arch, through which a Bifcayan chaloupe may pafs under fuil ; and on this account it has had the name of lifle Percie. The natives of the diftrict of Gafpé are commonly diftilguifhed by the names of the rivers along whofe banks they live, the three principal of which are St. Jean, Rifligonetie, and Mizamiche, or Miramichi, and by the French St..Crois. Thicy are tall and well fhaped, cisil. and hofpitable; and lheir women. handiome and chafte.

With regard to Gafpe itfelf, it is not remarkable for any thing, only that it takes its name from the bay on which it is fituated, and which lies bictween the Cape: des Rofiers, and lifile Percée, or theHollow Ifland, aboye mentioncd. Befides this bay, are two other noted oncs upon the coalt, name-If, des Chaleurs and Campfiens ;i; all which are moftly frequented by filhermen, who commonly catch falmon, jack, cod, porpoifes, and the like..

GASPE, the capital of a terrimtory called Gafrefia, in Canarla. Proper, extending itfelf along the: cafterr coalts of this province,

## G E O

from Cape des Rofiers, at the mouth of St. Lawrence river, to anotiler promontory which lies oppolite to Cape Breton, about 110 leagues, and Areiches much further inland.

Gemesie, Fort of, in the river of St. John, after the taking of Peutaguet, in 1674 , by 110 men under the command of an Finglithman in a Fiemih corfair, by furprize, fell eafily into our hands fron after.

Cieorgia, a large tract of land between Carolina and Florida. It is feparated from SourhCarolina by the river Savannah oll the N. has the Atlantic Ocean on the E. is bounded by the Mifffippi on the W. and parted from the Floridas on the S. Its extent is 170 miles from N. 10 S . near the fea, hut widens in the remoter parts to above 150 . It is divided into the following counties, viz. Savannah, which contains rie capital touns of Savannah and Ebenczer; Halifax, has the town of Queenflorough; Augulta, which has Augulta and Wrightßorough ; and Southern, which has Sunbury, a port of entry, and Frederica.

George II. was pleafed to grant a charter, dated the gth of June, 3732, conftituting a corporation under the name of Truftees for eftablifhing a colony in Georgia; which included all that country fituated in South-Carolina, which lies from the moft Norihern ftream of the river Savannah, along the coaft, to the mof Southern Aream of the Alatamacha, and W. from the fources of the faid rivers, refpectively in dirceी lines, as far as the South or Pacific Sea. Georgia is but indifferently peopled, tho' it is now upwards of 40 years fince its firft fertlement, Not one of our colonies was of fo flow a growth, though none had fo much of the attention of the government, or of the people in geseral, or raifed fo great expecta-

## GEO

tions in the heginning. Tlicy export fome roris and lumter is the Wefl-Indies, they raife fonce rice, and of late have goue with fuccefs into indigo.

After paffing the bars, thips meet with a fecure and commodious harbour in the mourls of the Savannah river; and to the S. of it is a fill more capacious road, called Tcky-found, whire a large flet may anchor in between 10 and 14 farhoms water, being land-locked, and having a fafe entrance oves the bar. The tide of flood generally rifes on this coaft to feven feet.

This country produces Indian corn, as alfo wheat, oats, and barley, of which the two laft grains grow heft. Very good wheat is likewife reaped in May; and they mow the grafs in Junc. Here are potatoes, pumpkins, water and mulk melons, cucumbers, all forts of Englifh green peate (which, with proper care and culture, nay lie had almon the whole jear round), and garden-beans, but the Windins fort will not flourih here:- Indian peafe, all forts of falading the year round, and all Sorts of fweet herbs and pot-herbs. Here are nectarines, plumbs, and peaches; which threc, efpeciaily the laft, are almoft as common as apple-trees are in Herefordihire, The plumbs are ripe the heginning of May; peaches and nectarines the latter end of June. Here are no hazle-nuts, but chincapins very fweet and good; wild grapes in abundance, which are ripe in June; as alfo four or five forts of good wind-berries; prefimmins, much like ouy medlars; wild cherries, that grow in fprays like currants, and are not much larger, but tafte like a fmall black cherry, and are ripe in Map. Here are a few Englifh cherries in the gardens and orchards; alfo apple, pear, and a few apricot trees : many of the apple-trees bear twice a year ; but the latics
inning. Thier and lumber for hey raife tonne have groue with . the bars, Mips re and commo. the mouth of er ; and to the more capacious $y$-found, whire anchor in be. fathoms water, I, and having a the bar. The ally rifes on this
produces Indian $t$, oats, and bare two laft grains good wheat is May; and they Junc. Here are ins, water and unibers, all forts peate (which, nd culture, nay the whote year n-beans, but the II not fourif fe, all forts of round, and all s and pot-herbs. s, plumbs, and hree, efpecially It as common as Hereford ©hire. ripe the beginaches and necend of June. -nuts, but chinand good; wild nce, which are lfo four or five d-berries; pree our medlars: grow in fprays are not much e a fmall black ripe in May. lim cherries in orchards; alfó a few apricot he apple-trees but the dattes

## GEO

csop is rmall. Here are great quatities of white malberry-irces, the fruit of which is not to compare with thote of Eugland, tho the leases are the bett food for the filk-worms. Olives thourith here i: the greareft perfection ; and fo da oranges, cipecially in the $s$. part of the province, where an orange-tree has been known, in feven years, to rife is teet from the rout to the branches. The chief timber-1rees arc, pines in abundance, lix or feven feccies of oiks, hiceory, black walnut, cedat, white and black cyprefs, white and red laurels, bays, myrtle, of whofe berries they nrake candles ; fatheras, an infufion of which makes good drink; beech erees, and many others which have no particular mame. Ita fome places here the land is as good as any in England, were there but hands smough to cultivase it.

This comntry affords a great deal of wild game, paticularly in winter, from Nov. to March, fich as wild geefe, ducks, teals, and widgeons, wild turkeys from 20 to 3 c pounds weight, turtle-doves in abuadance, curlews, fand-birds, woodcocks, and partridges, but much fmaller than in England; deer, a creature between a rabbir and a hare, which is very good cating : and, when it is very cold weather in the Northern parts of America, here are vaft gights of wild pigeons, which are very cafy to thoot. The chief game here in the fummer feafon is deer and ducks. Here are many tygers, but finall; and bears, the flefh of whofe cubs eats like that of young pigs. Here are wild cattle, and wolves, that ofteco run away with the calves of the tame ones. In the woods are abundance of frakes, but none venomous, except the rattle-fnake. In the rivers are abundance of tharks and alligators. Here is plenty of fifh. With regard to lhell-fifh, here are oylters innumerable, but not fo good as

## G E O

the Engli/h, crabs, clams, murcles, conchs, and very large prawns.

Of all manufactures, none leems fo practicable, and withal io beneficial here, as the raifing of filk, the foil of Georgia being extreme. ly proper for the culture of mut-berry-trees, and the climate no lefs agrecable to filk.worms. The principal rivers are the Savannah, Allaniaha or George, and St. Mary's, in (icorgia, the laft dividing it from Vlorida; and its chicf harbours afe the mouths of the rivers Savannah and Altamaha.

The following account of the exports for twenty-thrce years, Phews the progrefs of the trade of the province: In the firlt columa is the year, the fecond containg the number of vefleds cleared, and the third the value in fterling money of the exports in each year:

| 1750 | 8 | 26041 |
| ---: | ---: | ---: |
| 1751 | 11 | 3810 |
| 1752 | 17 | 4841 |
| 1753 | 23 | 6403 |
| 1754 | 42 | 9507 |
| 1755 | 52 | 15,744 |
| 1756 | 42 | 16,766 |
| 1757 | 44 | 15,649 |
| 1758 | 21 | 8613 |
| 1759 | 48 | 12,694 |
| 1760 | 37 | 20,852 |
| 1761 | 45 | 15,870 |
| 1762 | 57 | 27,021 |
| 1763 | 92 | 47,551 |

Of the exports in 1772 about 20,0001. was from Sunbury, and the reit from Savannah.

The number of white inhabitants is very uncertain. The number of negroes and other flaves is fuppofed to be 14,000 ; that of free negroes, mulattoes, \&c, very inconfiderable,

## GER

The fum granted in 1793, to defray the expences of government for the three preceding years, was 5171 1. 1 5s. $10 \frac{1}{2} \mathrm{~d}$.; to raife which, every 100 acres of land, and every flave, was taxed 2s. 6d. goods imported, 7 s . 6d. per cent. which are the principal articles; other fmaller articles were taxed in proportion.

The principal town of Georgia is Savannah; which fee.

George Town Diftrict, in S. Carolina, includes all places between Santee river, the fea, and the line which divides the parithes of St. Mark ąnd Prince Frederick, which is continued in the fame courfe acrofs Pedec river to the N. Carolina boundary,

Grorge Town, a fea-port in the above diftrint, at the mouth of the Pedee river, and has a good habbour of its own name, where refides a collector, dxc. to receive the duties; at the mouth of which is Craven Inand.

St. George's Town,a town in Newcafle county, Deld*ar, Penfylvania, 9 miles N. of Noxan, and 10 S . W. of Newcantle.

St. Gyorge's Town, the capital of the ifland of Granada, in the Weft Indies. It began sis be conftructed. fince the peace of 1762, and was defiroyed in 1771, by a dreadful fire, and on Nov. 1. 1775, again fuffered the like misfortune, when, as the houres, which were become very numerous, were buile monly of wood, they were all dellroyed, to the lofs of above 500, ccol.
St. Geofer's River, in the county of Lincoln, in the province of New Hampfire, NewFingland. It is' 2 leagucs S. W. from Penohfoot-Bay, and is a mile uide at the nouth, on which is a fort of the fame name, 2 miles above which the navigation is obfrueted by feveral fails.

Germantown, in the county of Philadelphia, and prosince
of Penfylvania, is the moft confiderabic place, next to the city of Philadelphia, in all this country; and is a corporation, confliting of High and low Dutch: in it are between 2 and 300 houfes: peachtrees are planted all along hofore the donrs; and the town is very pleafant, and well cleared from trees : 5 miles $N$. from Philadelphia.

Ginger Isfand, one of the fmaller Virgin llles, fituated between the Round Rock on the N. and Conper's Ille on the S. heween which is the King's Channel. Long. 62, 53. lat. 18, 5 .

Glassenbury, a town in Hertford county, Connceticut, about $>$ mile E . of the Connentiart river, 4 miles S.E. of Wetherfield, and 8 miles N.E. of Hadham.

Glocegter, a county and town in W. Jerfey, not above 4 miles from Philadelphia, on the river Delawar.

Glocester, a maritime town in the county of Effex, Maffechu-Sots-Bay, New Encland. It is fruated on the iflimus of the peninfula that forms Cape Ann.

Giocester, a maritime town in Glocefter county, Virginia, on a point of land the $N$. fide of York River, which is de-. fended by a fort oppofite York city.

Gois River, according to Wafer, lies to the fouthuard of the river Santa Maria,: in the Terra Firma, or Ifthmus of Darien, attording gold-dult in great flenty; whence it has obtained its name.

GOSTEN, a village in the county of Orange, and province of New York. It is fruitful in cattle, checfe, pafture, and butter. Near it are woods of ${ }^{\text {' }}$ white cedar and black walnut-trees.

Goyogouin, the third canton of Nova Scotia, bordering on New York to the wefturard; and hence, with thofe of Onneyouth,

## G O Y

Onantagne, and T'fonnouthonan, following each other in order, are called the Upper Cantons, unlefs they have been fo denominated from meeting with them in the arrangement as one goes up the river of St . Laurence, and the like Ontario, through which that river runs. This canton of Goyorrouin furpalfes all the others in the goodnefs of the foil, and mildnefs of the climate : and the imhabitonts appear the moft cractable amonght all the Iroquois.

Over the whole extent of thefe five cantons, our European fruittrees may be cultivated with fuccefs : feveral grow of themfelves there without culture; and others are to be found there which are unknown to us. The forelts in thefe parts abound with chefune and fillert-trees of all forts: the onc bears a fruit which is quite midd, and the other very bitter : but pulfing them though ahes, a good oil is extranted from then by means of 2 mill, fire, and water, in the fame manner as we do from linfeed. In reveral places are cherries without kernels, very gnod to eat ; alfo a tree, the bloifom of which refembles our whice lilly, and its fruit of the fize and colour of an apricot, with the tafte and fimell of a citron.

Here is alfo a wild citron-tree, which is very forall: its fruit, of the magnitude of a china-orange, is very ayreeabie to the talte, and very refrefhing: it illues from the mid.lle of two leaves, which are of the furm of a heart ; but the root of this plant is puifon. Here are apple-trees, the apples on which are of the figure of a goofe-egg, and the feed a kind of bean : this fruit is fweet-fcented, and very delicions: it is a dwarf-tree which requires a rich and moilt foil: the Iroyuois have brought it from the country of the liriez. Thefe diftricts have a great many roots which are fit for dying, and fome

## G R A

of them give a very lively colour. See Iroquois.

Goyogouins, Bay of, in No:a Scotia, lies 10 leagues from the river of Onnontagne. All the coalt in this face is intermixed with marfhes and tigh grounds a little fandy, covered with very fine trees, efpecially oak. A peninfula well-wooded frecthes out to the middle of a bay, and forms a kind of theatre. On the lef: hand, at entering it, one perceives in a corner a lit le ifland, which hides the mouth of a river, by which the Goyogouins go duwn into the lake.

Gracias a Dios, a lown belonging to the province of Honduras, or Comaiagua, and audience of Guatimala. It is firnateld at the mouth of a river upon a rucky mountain, which has fome gold mines in its neighhourhool; and it was buile the fane year as Vallidolid the capital, from which it lies about 27 leagues to the $W$. for the fecurity of the miners.

Granada, Island of, or Grenada, one of the Caribbee lhands. It is fituated in latitude 12, 10. and longitude 43, 40. aboit 20 leagues N . W. of Tobigo, and 20 N. of New-Andahulia, on the continent of America, to which this is the nearef of all the French illands in the Antilles, 30 leagues S. W. of Barbadoes, and 70 from Martinico. Iis extent from $N$. to $S$. being 9 leagues in lengit, and 5 where broader, it is twice as large as St. Chrillopher's, and about 24 leagnes in compats.

This illand, has a chain of mountains, fome of which are very high, croffes it from N. to S. It enjoys a gond air; and has a foil io fruitful, that all the trees upon it, hoth for fruit and timber, are better, Araighter, taller, and lirger, than thofe in the neighbouring iflands, the cocosm tree exceptel, which does not grow to high here as in the ather

## G R A

## G R A

neighhouring iflands. The mort remarkable tree in this ifland is the L,atim-tree, which, has a tall trunk; and, inftead of loughs, bears leaves, like fans, in long flalks, which, growing together in bundles, ferve for the roofs of houfes. Herc arc falt-pits, and plenty of armadillos, whofe flef is as good as mutton, and is the principal food of the inhabitants, befides tortoifes and lamantins. The coaft has abundance of fine vallies, watered with good rivers, moft of which iflice from a lake de the top of high mountains in the middle of the ifland: and one of them runs into the fea on the S. W. whore the fhare is low, with good anchorage at the diftance of 12 leagues; but an exceeding ftrong curent, which both chlis and flows in a few hours. Round the ifland are feveral little bays and liarbours, which ferve for mooring of fhips, and landing of poods, and fome of the harbours are forified. The whole E. coaft is very fafe clofe by the fore, and the ifland is not fubject to hurricanes. In hort, the foil is capable of producing all the commodities of the climate. Its particular articles, befides catile and wild fowl, are fugar, ginger, indigo, and tobacco, with millet and peafe. Along the fhore run mountains, and alfo about the harbour, where the habitations are; but all the reft is a very fine country; and here is good travelling either for horfes or carriages.

Its pilincipal port, called Fort Royal, fands in the middle of a large bay on the $S$. W. fide of the inand, having a fandy bottom, where 25 fhips of the line may ride fecure fiom florms; and the larbour will contain aco hips of rcootons, moored. Near the harbour is a large round bafon, parted from it by a fand-bank, which, if cut, uolld hold a vaft number of veffels: by reafon of this bank
large fhips are obliged to pafy within 80 paces of one of the two little mountains at the mouth of the harbour, and about half a mile afunder. Upon one of thefe a French engineer crected a fort, with a half-moon in front, and other regular works, all of good ftone.

The Dominicans have a fettlement 4 leagues $N$. of the fort, which is upwards of a mile in breadth: through the middic of it runs a large river, abounding with ecls, mullets, and cray-fifh; as the adjacent countries do with parcridges, wood-pigenns, ortolans, thruhes, parrots, \&c. The people here are fulbjet to obitinate fevers, which turn fometimes to a dropfy.-One third of the ifland is not culivated; and wo' a grtat part of 11 is fare is taken up by monnains incarable of being ploughed, yot many places remain to be cultivated by induftry: however, the whole expor s of Granada in 1770 were more ihan 506,0001. netling. Before the year 1763, this was a neutral ifland, when the Englifh became poflefled of it by the peace. In 17', 1 this ifland received a very confiterable lofs by a fire at $\mathrm{St}_{\text {. }}$. George's town, the capital of thee ifland, which it had farcely recovered before another happened, Nov. 1. 1775, which burnt down the whole town, and the lofs was eftimated at above 500, cool. Lat. 12, 21 . long. $6 \mathrm{r}, 36$.

Granada, New, a prarince of Terra Firma. It borders on Carthagena and St. Martha's on the N. Venezula on the E. Popayan on the $S$. and Darien on the W. Its length is reckoned to he 130 leagues, or 390 miles, and its breacith about 30 leagues, or 90 miles. It is furrounded with favage nations, who inhabit a very hot country; though New Granada, enerally fpeaking, is cold, or at leaft temperate.

The natives uie maize, or the

## G R A

cafisa root, inttead of bread.They have plenty of falt, which they fell to great profit in the neighbouring countries, particularly thofe fituated in the mountains, and along the river Maydalena. 'They have fore of game: the lakes and rivers abound with filh. The natives are tall, and wear black, white, or variegated cloaks, which they tie round the waift with a fafh. They adorn their heads with ftrings of painted flowers very ingenioully made of cotton. The country abounds with gold and filver mines; and as they have fore of horfes and mules, they fend a great many of them into Peru. The country abounds with patture, wheat and other grain, and likewife with fruit.

Giranada, a city in the province of Nicaragua, and audience of Guatimala, in Old Mexico, or New spain. It is fituated on the S. fide of the lake of Nicaragua, 60 miles S. E. of Leon; where the Spaniards have mills for the making of fugar, canes abounding in that neighbourhood. It is defended by a caflie, is more populus and better buitt than Lcon, and the inhabitants carry on a trade both to the Noth and South Seas. It is the moft frequented of any town in all Gilatimala, as the merchants of Guatimald difpatch their goods from hance by the way of Carthagena. This town was taken in I6So by French and Englifh freebooters, who fet fire to it. The intermediate country, lying between this city and Leon, is very fruitful and pleafant. Near Granada, on the fide of Nicaragua lake, is a volcanso which may be feen from the North Sea, or at leart a great way in the lake towards that fea. It is a frightful hill, being cleft down almort from the top to the bottom, like a broken faw, and our failors call it the Devil's Mouth. Granada lics 5I miles

## G R A

W. from the city of Mexico. Lat. 11, 25. long. 89, 12.

Granadileas, or GrenaDileas, a knot of dangerous illands and rocks near the Leeward Illands, where the greatert channel is but 3 or 4 leagnes broad. They lie about the 18 th degree of latitude, and are a range of fmall illands and rocks dependent on Granada, This archipelago, whofe length is about 34 leagues, contaius 23 iflands fit to produce cotton, coffee, indigo, and even fugar. The air is healthy, but there are no running fprings of freth water. The molt confiderable at the N. end of the chain is not above 2 leagues from St. Vincent, and is called Becouya, or Bequia, but the French called it Little Martinico. Befides this, there are the illands of Mokitos and Cannaouan; Frigate ifland, and Union inland, are between Becouya and Cariauacou. The Grifon, and the Diamond or Round ifland, are the two principal ones among thofe which fill up the interval hetween Cariauacoul and Granada.

Granvilee County, the moft fouthern fubdivifion of $S$. Carolina, of which the other 3 are Colleton, Berkley, and Craven. It is fituated along the river Savannah, and rockoned the moft convenient and fruitful part of all Carolina. Here a colony of Scots fetied under Lord Cardrofs, but were oblige.l to quit it for fear of the Spaniards; fo that the country continued uninhabited by any Europeans till the year 1732, when one Monf. Purry, a gentleman of Neuf Chattel, in Switzerland, being encouraged by the Government both in Eugland and Carulina, undertook to fettle a compary of Swifs there: and accordingly 172 perfons were tranfported thither the aforefaid year, who ware foon followed by a great many more; fo that in a very little time the

## G R E

colony confifted of above 300 perfon:. They fettled on the northern bank of the river Savannah, where they built a town, which they called Purryburgh, about $3^{6}$ miles above the mouth of the river. The fide which M. Purry pitched on is in lat. 32,20. on a fpot of ground formerly called the great YamafeeBluff.

In the county of Granville is the river May, which joining with the river Cambage, forms, together with the fea, the inland of Edelano. The country lying upon the banks of the May was formerly inhabited by an Indian nation called the Veffoes. In it alfo is a pleafant lake, and delightful valley. Port-Royal river lies about 15 miles to the northwards of the river May: it has a bold entrance, and 17 feet in depth on the bar at low water. The harbour is large, commo dious, and fafe for fhipping; and it runs up into a fine fruitful country, preferable to any other parts of Carolina. It fpends itfelf, by various branches, into other large rivers. This port lies not above 180 miles from St. Augultine.

Granvile County, in the diftrict of Hilliborough, in N. Carolina, and is one of the moft $N$. fubdivifions of the province. It is divided from Virginia in fome farts by the river Roanoke, by which it has communication with the fea.

Gratias a Dios, or Gracias a Dios, the bame Colum: bus gave to a cape of Honduras, in Mexico, upon his meeting with $a$ favourable wind. It is filuated in lat. 14, $3^{6}$. long. $8 \div, 12$.

Green Island, or Serpent Mand, one of the lefter Virgin Ines, which is claimed by the Spaniards, and fituated near the E. end of Porto Rico.

Grefnwich, a sown in Greenwich townhip, Rhode lland, on

## G U A

the W. bank of Narraganfet-bay, oppofite which is Hope Illand.

Grefn wich, a town in Weft Jerfey, in Cumberland county, 15 miles $S$. W. from Salem, and 34 S. of Philadelphia, about 4 miles from the Delawar river.

Greenwich, a town at the W. extremity of Faiffield county, Connesticut, 3 miles $W$. from Rye, and 7 E. from Stamford, on the coalt of Long-Inand Sound, off which lie Patrick's Ines.

Grenama. Sec Grmada.
Grison, one of the fmaller Granadillas Iflands. It is fituated between Diamond ifle and Cariauacou. It is not inhabited, having no frefh water.

Groton, a town in Middlefex county, Mallachulets - Bay, about 24 miles N. W. from Cambridge, at the head of a branch of the river Merimack, in the great road to Peterfourg, in New Hamphire.

Groton, in New London county, Connecticut, New Fingland, about 2 miles E. of the river Thames, and the fame $N$. of the fea-coaft, off which lies Fifher's Illand.

Guadalaxara, one of the three diftrifs, governments, or courts of audience, into which Old Mexico, or New Spain, is divided: the other two are Mexico and Guatimala. This alldience is alfo called the kingtom of New Gallicia. It lies the furthent to the N. of the three aum diences of New Spain, though fituated on the coaft of the South Sea. Its extent is between lar. 20 and 25. On the $E$. and $S$. it is bounded by Panuco, with feveral provinces of the audience of Mexico ; on the N. by the kingdom- of New Mexico; and on the W. it is walhed by the South Sea and the Gulph of California, on the coalt of which laft it fretches above 200 leagues from S. E. to N. W. but within land it is very irregular, and the

## G U A

N. part, efpecially, is very narrow; yet in fome places it is reckoned 500 miles broad.

Its climate differs much, according to its fituation, being partly in the Temperate, and partly in the Torrid Zone: yet it is much more temperate than any other part of New Spain ; and in the general it is reckoned healthy: fo that it is common for people to live here to 100 years of age: but it is much infefted with gnats, bugs, and other vermin. The foil is moflly mountainous and wooly: fo that the coalt looks like a defert. It is faid, that the Spaniards have quite forfaken the coalt on purpofe, that, if frangers frould land, they may not find any temptation to ftay, becaufe, befides the fiiver mines in this province, fome of gold have been lately dificovered, which are of very great value: and they chare to trantpurt the ore on mules to Mexico, rather than run the rifk of expoling fo valuable a product to be intercepted by foreigners, if they ventured to fend it in findill veflels by fea. With regard to the relt, the country is pretty fruitful; and it prodices Europea: and Indian grain fo plentifully, that the latter yields a hundred-fold, and the other two hundred: but it is often deatroyed by locults, and valt numbers of pyes no harger than farrows, as their olives are by ants. In this country are all forts of fruits, herbs, and roots, better than thofe in Europe; plenty of fugar-canes, cochineal, and bees faid to be without fings. The paftures abound with all forts of cattle; and the woods with venifon, pine and oak trees; yet they are infefted by wolves and foorpions. Here is a medicina! pepper, which cures all fores; green fones, alfo, faid to be a feecific againtt the gravel, fragrant flowers, valuable drugs, and rich mines of filver, copper, aud

## G U A

lead. On the coalt alio is a good pearl-filhery. The natives are fubte, treacherous, and lazy: they are armed with bows and arrows; and often attack the Spaniards from the woods, except when the Spanifh officers are in conjunction with their caciques in the government. The better fort of Spaniards' live here by trade, and are mafters of the filver-mines : the others following tillage and grafing.

Such of the natives as pretend to be civilized, are very indolent and lazy, and will not work but for great wages. Their apparel is a hirt, andfquare eloak of cotton, faltened with two buttons before: they have drawers and coverlids of the fame, and lie upon flags and matts made of thefe: they wear green ftones and fhells about their necks, arnss, and legs. Their chief recreation is dancing to the found of a hollow Itick. Horfe-flefh, and maize-cakes, are their principal and molt delicious dainties; and chocolate and magney-wine, their favourite liquors.

This audience of Guadalaxara is fublivided into the following feven provinces, as they lie from S. to N. namely, Gialalaxara Proper, Xalifco, Chiametlan, Zacateens, New Bifcay, Cuiliacan, and Cinaloa; all which fee.
guadalaxara Proper, which is the principal province, and gives name to the whole audience, is bounded on the $E$. and S. by the province of Mechoacan; on the N. by that of Xalifen; ard a coruer of it wafhed by the Pacific Ocean on the W. Notwithflanding its fituation under the Torrid Zone, it is healthy, temperate, and fruinful; producing not only good timber, but European and Indian wheat in great plenty, and all the fruits found in both countries; belides the valt treafures of filver commonly taken out of its mines. It is not above

## G U A

go leagues either in length or breadth.

Guadalaxara, a city of Mexico, and capital of the latt mentioned province, bearing its name, or of New Gallicia. It is the head of the audience, the feat of the royal courts of juftice, and a bihop's fec of a confiderable revenue, which is a fuffragan to Mexico. It is a large, populous, and ueat city, flanding very pleafantly on the banks of the river Baranja, or Efquitlan, which ifliues from the lake of Mechoacan, whence it goes with a rapid Aream towards the N. W. and at 4 leagues from this city it has a very high fall, after which it liaftens into the Pacific Ocean, between Xalifco and Chiametlan. It is no where fordable; fo that the Spaniards crofs it in boats The lake of Chapala, which is faid to be 40 leagues in circuit, lies on the S. fide of this city. In this city are feveral churches, befides its ftately cathedral, and fome convents for both fexes. It is reckoned to lie 262 miles $W$. of the city of Mexico; and flands in a plain which is not only watered by the above-mentioned river, but by feveral hrooks and frings that make it productive of great ftore both of corn and grafs. Abont 5 leagucs from it is a momntain of a prodigious height, and fo feep ihat no beafts of burthen can climb it; and all the other mountains about it are crag$f y$, and full of large pine and oak trecs. It lies in latitude 20,51 . long. 108, 20.

Guadaloupe, one of the Jargett of all the Caribbees, in that divifion of them called the Leeward Inands, It is fituated in the Atlantic Ocean. It was fo called by the great Columlaus, who firt difcovered it, from the refemblance of its mountains to thofe of that name in Old Spain: the Caribbeans called it Farukeria, or Carriceura, As fron

## G U A

as Columbus landed here, he and his Spaniards were attacked by a fhower of arrows, thot hy the women on the inand, who were foon, however, difperfed by his firc-arms: upon which his men plundered and burnt their houfes, or huts, where were found great quantities of honey, wax, iron, bows and arrows, cotion fpun and unfpun, cotton-hammocks, and looms for weaving; together with pompions, or a fort of pine-apples, maftic, aloes, fandal, ginger, frankincenfe, a fort of cin-namon-trees, and various fruits and herbs different from ours. The birds he faw here were large parrots, partridges, turtles, and nightingales; befides daws, herons, falcons, and kites. He found the houfes here better and fuller of provifions than any he had feen in thefe illands. A vojage made to Guadaloupe by the Spaniards, in 1625 , gives the following account. The naked Barbarians of this, as well as the other iflands, ufed to be very impatient for the arrival of the Spanifh flects once a year: they reckoned up their months by moons; and when they thought the time drawing near, prepared fugar-canes, plantanes, tortoifes, and other provifions, in order to batter with them for iron, knives, and haberdahery-wares. The Indians had round canoes like troughs, painted with the Englih, Detch, and French arms; this being then a common port for all nations that failed to America, The hair of the natives hung down to the midde of their backs, and their faces were flafhed and pinked. They had thin plates dangling at their nofes like hog-rings, and they fawnid like children ypon the Spansasis.

It is upwards of 60 miles along, and about the fame breadth. This ifland is 25 miles N. W. of Marigalante; and it is reckoned to be $6_{5}$ miles $N$, of Martinico,

## G U A

e and by a $y$ the were y his : men oufes, great iron, in and , and $r$ with se-ap-gin$f$ cinfruits ours. : large and heHe © and ny he pe by es the naked as the ry im. the they epared doifes, ler 10 nives, The like glifh, this or all erica. down , and pink-danings, !dren

Till the year 1759 , it was fubject to the French; when Commodore Moor and General Barrington entirely reduced it to the obedience of Great Britain. Guadaloupe is the largett and one of the fireft inands which belonged to the French in thofe parts; being, near 60 leagues in circuit. It is divided into two parts by a channel not a league and a half long, and from $3^{\circ}$ to 8 yards broad, called the Salt-river, navigable !or barks of 50 tons burthen; which runs N. and S. and communicales with the fea on both fides, by a large bay at each end, of which that on the N . is called Grand Cul de Sac, and that on the S. Petit Cul de Sac. The E. part of the ifland is called Grande Terre, and is about 19 leagues from Antigua point on the N. W, to the point of Guadaloupe on the S. E. and about 9 leagues and $\frac{1}{2}$ in the middle, where broadeft ; and about 50 leagues in circuit. The W. part, which is properly Guadaloupe, is fubdivided by a ridge of mountains, into Cabes-terre on the W. and Baffe-terre on the E. This is 13 leagucs and $\frac{1}{2}$ from N. to S. and 7 and $\frac{1}{2}$ where broadeh: and 35 lcagues in circuit. Both parts wouid be joined by an ithmus a league and a $\frac{1}{2}$ in breadth, were it not cut through by the faid cana!. The cold on thofe rocks fuffers nothing to grow but fern, and fome ufelets trees covered with mofs. Towards the S. point at the fummit of them, rifes fo high as to be loft out of fight, in the midalle region of the air, a mountain called the Sulphur Mountain, which exhales, out of an opening 100 feet wide, a thick and black fmoke, mixed with Sparks, which are vifible in the night. Out of thefe mountains run a great many freams that carry fruitfulnefs into the plains which they water, and temper the buraing air of the climate. The

## G U A

Whole inand is divided into 22 parihes, 14 in Guadaloupe, and 8 in Grand Terre. Grande Terre is deflitute of fref water, and 25 leagues in compafs: both inlands. together about 60. The Salt-river is about 50 toifes or 300 fett over at its month, towarls the Great Cul de Sac, from whence it grows narrower; fo that in fome places it is not alonve go icet over. Its depth is likewife as unequal as its breadth; for in fome places it will carry a hip of $j 00$ tons, and in others hardly bear a veffel of 5c. It is a fmooth, clear ftream, from the one Cul de Sac to the other, and finely maded, for the moft part, with mangroves.
The air is very clear and healthy, and not fo hot as in Martinico. Here is alfo pleaty of water, and as good as the foil is rich; which laft is not inferior to that of Martinico. It is as well cultivated, and fortitical with equal frength. Its produce is the fame witia that of Marininico, and its export of fugar is as great, befides indigo, cotton, and thofe other commodities produced in all the inands of that part of America called the Wen Indies.
The chief product of the foil, is callida, oobacco, caffia, bannamas, pinc-apples, flore of rice, maize, and potatoes. Soinc of the mountains are overgrown with trees; and at the foot of others are large plains, watered by frefh and fieet fieams. Here are feveral boiling hot fprings; particulaty one to the W. fide near the ifland of Goyaves. The two gulphs called the Culs de Sac, abound with tortoifes, harks, pilots, and the other fifh common to thefe feas: and here is abundance of thofe called land-crabs, wi:h fwarms of mufyuitos and gnats.
The forts of this ifland, are, 1. Fort Lewis in the Grande Terre , on the E . lide of the bay called Petit Cul de Sac. It is too 12

## G U A

high to defend the veffels that anchor at the botton of it; and therefore they have erefted a redoubt below it, with a battery of lix guns, which play into the road. From this fort may be feen not only the greatefl patt of the Caber-terre, and Grand Cul de Sar, and many fmall inands in the Petit Cul, with the iflands of Xaintes, luat alfo the mountains of Dominica in clear weather. 'This fort lies in the parim of Goficr, on the Grande Terre. Certain ahyfles are in the Grande Terre, which are great indentures made in the land by the fea, affording fhelter for veffels, in very derp water, from the hurricanes or an enemy; and where they are moored to pulmetto-trees on eacl: fide.
2. The Great Cul de Sac contains a bafon five or fix leagues in length, from the point of Grofle Morne, in the Bafle Terre, to that of Antigua, in the Grande Terre. It is alfo nearly three leagues in the hroadeft part, and at leaft one in the narroweft; with fafe iding for thips of all rates.
3. The Petit Cul dc Sac is a populous, well cultivated, and trading parifh, to the N . of that of Goyaves: and both are in the Cabes-terre, on the E. fide of (iaudaloupe Proper. Here are no lefs than eight rivers, befides near as many brooks that run into the fea in the fpace of four leagues, betwixt the river of Coin, which is to the W. of the Salt-miver, and the Brick-kiln river.

Ginger comesupextremely well in the E. part of Gaudiloupe Proper, betwixt the Great Cul de Sac and the river of Cabes-terre; and though the climate of thefe iflands is very hot, the people cat a vaft quantity of it, even when green. The Cabes-terre river, called the Great river, is in fome places 180 feet wide. Its water is very clear; but almoft impaffable by reafon of numerous rocks.

## G U A

The next river to the S . is the Grand Carber, and a little furthes is the Grand Bananiers, that terminates the quarter called Cahesterre, which is by much the finct part of the ifland. For from this river to the Grofs Morne, where begins the Grand Cul, it is a very even country, near 20 leagues in extent by the fea-fide; which is only a league in fome places, and at moft but four from the noontains.
The quarter of the Trois Rivieres on the S. E. fide is four: miles lroad, with a good toil for fugar-canes, and feveral confiderable fertemenis. They have here at the S. end, what they call the Old Fort, for the fecurily of the coan, which is vely even, has good anchorage, and fmooth water; where, thoutd an enemy make a defcent, and roflifs themfelves of this part, they might cut off the communication betuixt the Cabes-terre and Bafie-terie, and fo make themfelves mafters of the whole. In the filphur mountains is a redoubt called Dos d'Afne, to which, upon a detcent, they fend their beft effects, wives, children, \&c. But the country here is fo full of wonds and precipices, that a hand ful of men might keep off an army.

The river of the Galleons on the S. W. fide, where is another fort, is a confideralile river; and when fordable, the only parfage from the Cabes terre to the Bafleterre. Here is exce!lent anchorage, but the watter taftes of fulphur and vitriol, canfing fluses.
The chief fort of the whole inand is that at the town of Baffeterre, two leagues $N$. from the point of the old fort; which at the firf peopleing confifted of two confiderable towns, one clofe by the river St. louis, or the Riviere des Peres, i. e. the Jacobite Friars river; the other on both fides of the Bailiff river, where was at firft a chapel, now turned

## G U A

## GUA

to a parachial church. But the former having been carried away twice by the inundations of the siver in hurricanes, the inhabi. tant; removed towards the fort, where they built the town of St . Louis, which is now the principal town of the ifland, having feveral churches, monatteries, \&c. and a cattle with four bulwarks, befides a fort on a neighbouring mountain: yet it has heen ruined more than onec. In 1691 it was burned by the Englih, together with fome other forts; and when entirely rebuilt, it was carried away by an inundation of the river Bailiff. It was hegun to be rehuilt when the Englifh burnt it again in 1703, together with Magdalen and other forts. A confiderable addition is planned to be added to it, called Le Bourg, which will make it the hanfomelt of any in the colony. This fort fands upon higher ground than the town : its walls are wathed on the S. E. by the river Galleons; on the S. W. it faces the fea, be. ing only 100 paces from it; and on the N. W. fide it lonks towards the town and the mountains. The moit confiderable part of the town is between the fort and tite river of Herbs; and this is properly the town of Baffeterre; and that which extends from the river to the brook of Biltan, is called the town of St. Francis, from a church and convent of Capuchins in it. In May, 1759; by the unanimity between Commodote Moore and General Barrington, together with the great valour of the Britih troops, this ifland came gradually, and in a very hort time, into our hands; as did that of Marigalante foon after; but by the Peace in 1763 it was returned to the French.

Betwixt the river Bailiff on the W, and the great river of Goyaves, or St. Charles, on the E. are the ruins of another fortification deflroyed by the Englif in 16gt,

All the ground between the Bai. liff river, and that of Pleflis, is called the Marth of St. Robert.
The top of the Sulphur mountain, to which you mult pafs over lhe river St. Louis, is bare, without any thing but fern, and fome forry lhrubs full of mofs. From hence may plainly be feen not oaly Dominica, the Xaintes illands, and Marigalante, but a clear view of Martinico one way, as well as Monitrrat, Nevis, and the neighbouring illands, the other. Round the hill are burnt fones and whitih a hes, which fmell ftrong of fulphur. Thefe increafo the higher yon afcended; and at the top, which is a valt rugged pla:form, covered with all fizes of brnt fones; fmoke ifflues out from fundry clefts and chinks. On the E. fide of the mountain are two mou:hs of this Sulphur pit, one of which was oval, and judged to be about 100 feet in its greateft diameter; every now and then emitting thick clouds of fmoke, with farks of fire. 'rhe negroes who fell brimfone fetch it from this mountain. About 200 paces brelow the leaf and loweft mouth are 3 little pools of very hot watcr, 4 or 5 paces afunder, the biggeft of which may be about 6 feet in diametcr. Its water is very dark-coloured, and fmells like that in a fmith's forge. The fecond is whitifh, and has the tafle of alum, 'The third is blue, and of a vitriolic tafte. Here are alfo feveral fmall fprings, which, uniting, form divers rivers or torrents; one of them, called the white river, from the athes and fulphur covering it, falls into that of St. Louis. The middle and bottom of this hurning mecuntain are as different from the top as if in quite another coumry, being covered with a delightrit verdure of tall trees and herbage, watered with abundance of ivivuLets, and very carefully cutivated.

The French, when they ferthat

## G U A

here in 1635 , began loy attacking the Cariblis, who poflefled the illand. This war was followed, during threc years, by a horrible famine that alnooft deftroyed the infant colony; the inhabitants were reduced to cat grals, and to digs ip the dead corps to live on. Aficr the fannine fucceeded incurfions of encmies, difutues among the chiefs and planters, and fome echer fad difafters, which almon brounht this colony to ruin, and prevented it from making any progrefs, fo that at the end of 60 yeals the mother-country hardly perceived the exiftence of the colony. The fuccefs and profperity of the illand cannot be dated before the peace of Utrecht. At the end of 1755 , Guadaloupe conpained 9624 whites, and $41, c 00$ fives. The amount of its faleable goods was produced by 334 fugar-plantations, 15 fquare fields of indigo, 46,840 cacao-tress, 11,700 tobacco-plants, $2,257,725$ of coffee, and $12,748,447$ of cotton. For its provifions they cultivated 29 fyuares of rice, or maize, and 1219 of potatoes and yams, $2,028,520$ bananas, and 32,577,950 holes of manioc or callada. The cartle confifted of 4946 horfes, 2924 mules, 125 affes, 13,716 horned bealts, 11,162 Theep and goats, and 24.55 fwine. The principal article is caflada or manioc, of which they make bread, and of this plant there is more cultivated here than in all the Englifh inands taken toge:her. In 1763 it was rendered independent of Martinico, and had a governor of its own appointed, and has Defirade illand and Marigalante annexed to it, as well as Xaintes. In 1767 Guadaloupe contained 11,863 white inlabitants, 752 free blacks, or mulattoes, 72,761 月avis, in all 85,376 perfons. lis cattile confinted of 5050 horfes, 4854 mules, wiffes, 17,373 horned beafts, 14,895 gesp and goats, and 2669 fivine.

## G U A

For provifions it had $; 8,4,6,2,18$ holes of manioc, $2,810,262$ b, natlas, 2118 fquares of land with yains and potatoes. Among, ins plantations were 72 anatlas, 327 calfia-'res, 134.2 e 4 cacaotrees, 5,831,176 coffici-tries, 12,156,769 plants of cotton, 21,474 fyuares of land with fugar-canes. The woods take up 22,097 fyllates of land; there are 20,247 of paflure or favannas, and 6405 uncultivated or abandoned, 1582 plantations of cotton, coffee, cacao, and provifions; 401 of fugar-canes, which employ 140 water mills, 263 moved by oxen, and in by wind.

Its productions, with thofe of its dependencies, amount annually to 46 million pounds of fugar, 21 millions of coffer, 320,000 of cotton, and Soco rucao.

Guan Abacoa.-See Havannab.

Guanahani, or St. Sai-vador, now Catt-Illand, one of the Bahamas; fituated in the Atlantic Ocean. This was tle firft land which Columbus difcovered in the year 1492, whence tie called it St. Salvador, his crew having given :hemfelves over for lof in an inmenfe ocean, till they faw this inland. It lies in lat 24,10 . long. $76,12$.

Guarico, a town fituated on the N. fide of St. Domingo, one of the Antilles iflands, in the Atlantic ocean. It is alfo called Cape Françuis, and lies in lat. 19, 55 . Jt is near half a league in length, and contains about 14 or 1500 inhabitants, being a mixture of Creols, Eiropeans, Negroes, Mulattos, and Calts. Here is a church, a good fquare, a college of Jefuits, a nunnery, an hofpital, and a convent of religious. The town lies open, withont any other defence than a fingle rampart: but it is well gatrifoned within.

The place is extremely well cultivated, being fown with every fpecies of giain. The fervile

## G U A

work is all done liy negrocs, and the people here are rich enorigh to fend large returns to firance for the faropean commotitics brought hither. Thegrounds here are laid out in plantations of file gar, indigo, tohaceo, and coflee; the joins produce of which is to large, that 30,000 tons are annually exported to Frince. It is in thefe refpects a very contiderable colony to France, no lefs than ico fail, finall and great, coming annually from France, from 150 to 500 tons, to Guarico. All thefe thips come loaded with goods and provilions; and every one returns with 30 or 40,000 dollars in fpecie. Thofe only which go from Guarico, exclutive of the cargo, which confills of the produets of the colony, carry to France every year half a million of dollars. Not one fourth part of the cargo of fo many fhips can be confumed in this colony and its dependencies; and confequently it mult find a great account in its trade with the Spanifh fetlements, as the Havannah, Carraccas, Santa Martha, Carthagena, Terra Firma, Nicaragua, and Honduras.-See Cape Frall$\mathrm{g}^{\mathrm{j} i \mathrm{i}}$.

Guastaca, or Panuco, (which fee,) a province which borders on New Leon and Mexico, in which province they gather cochineal and feveral grains, and it abounds with very rich filver mines. All the Mores are low, overflowed, unhealithy, and full of falt markhes; in other refpects it is like Tlafcala.

Guatimala, Audience and Province of, in New-Spain, is above 750 miles in length, and 450 in breadil. It is bounded on the N. by Chiapa and Verapaz; on the S. and W. by the South-Sea, and on the E. by Honduras. It abounds in chocolate, which they make ufe of inftead of money. It has 12 provinces under it; and the native

## U A

Americans, ader the dominions of Spain, protef chrilativity; hut it is mixed wish ag at many of their own fuperflitions. There is a great chain of high mountains, which run acrois it from E. in W. and it is fubjedt earthurakes and forms. It is, however, very fertile, and produces great quantities of chocolate, cochineal, cotton, and indigo. The merchandize of this province are generally conveyed to the port of St. Thomas, in the bay of Hondurds, to be fent to Europe. The way acrofs this province to the South-Sea is about 65 leagues, and is the next to that from Vera Cruz to Acapulco.

St. Jago de Guatimala wis the capital of the whole audience; a Jarge and rich town, with a bithop's fee, and an univerfity, but it was fwallowed up by an earthquake in April, 1773. It contained about 60,000 inhabitants of all colours, and was immenfeJy rich, but there are no traces of it lefr. The lofs was eitimated at 15 millions fterling, in merchandize; and it was the third city of the Spanifh empire in America.

Guatimaina, the Volcano of, is a mountain which throws ous fire and fmoke. St. Jago de Guatimala was almoft ruined by it in 1541. It was rebuilt at a good diftance from this dreadful mountain, which totally denolilhed it in April, 1773.

Guaves Petit, in St. Do. mingo.-See Hifpaniola.

Guaxaca, a province belonging to the audience of Mexico, or New Spain. It reaches from the bay of Mexico on the N. to the South Sea on the S. having the province of Tlafcala on the N. W. and thofe of Chiapa, Guatimala, and Tabarco, on the E. It extends nearly 95 leagues along the South Sea, 50 along the bay of Mexico, and near 120 , fay fome, along the confines of Tlaf-

## G U A

enla, but not above 50 on thofe of Chiapa. The air here is good, and the foil fruifful, efpecially in mulherry-trees; fo that it produces mote filk than any prorince in America. Except the valley of Guaxaca, the greatelt part is mountainous, yet abounding with wheat, cattle, fugar, cotton, honey, cocon, plantines, and other fruits. It has rich mines of gold, filver, and lead; and all its rivers have gold in their fands. Cafla, cochineal, cryftal, and copperas, abound alfo liere. Were the people of this province indullious, they might be the richent in the Weft fidies; but they are accursomed to a lazy life liy the clergy, who have 120 monatieries, bcfides feveral hofpitals, fehools, and other places of public charity: infomuch that the lindians purchafe provifions principally by the gold which the women pick up in the rivers. This province was formerly reckoned to contain 150 confiderable towns, befides upwards of 300 villages ; but now it is faid to be thinly inhabited. Great part of the effates belonging to the Cortez family lie in this country. The leafl difficult pafs from one fea to another is through this province by the tiver Guazahualcos to the port De la Ventofa, in the gulf 'liequantepec. The mountain of Cocola, which feparates this province from Tlafcala, has mines of gold, tilver, cryftal, vitriol, and different forts of precious ftones.
The vanilla, a drug ufed as a perfume to give chocolate a flavour, is the produce of Guaxaca. It grows, indeed, in divers parts of Mexico, bit no where fo plentifully as in this province.

Guaxaca, the capital of the laf-mentioned province bearing its name, in New Spain. It is the fee of a bifhop, and the refidence of a governor. It lies 120 miles W. of Spirito Santo, and 230 S. of the city of Mexico, 132 in the fame dircction from

## G U I

the gulf of this laft name, and S. of Vira Cruz, in the delightful valicy of Guaxaca, which is 18 miles in length, and 12 in lincadth, and in the road leading through Chiapa io Gua'mala.Here is a very farely cathedral, and it contains feveral thoufand familics, hoth Spaniards and Indians. Of the former are feveral which are rich, and defeended from the old Spanifh governors. This, though a middling city, and but indifferenily built carries on a confiderable trade both with the North and South Seas. The river here is not fortified; fo that fmall vefficts might cafily fall up and fubdue the country. The beff chocolate in America is made hicre by the nuns, and exported from hence to Spain. In this valley, which Charles V. of Spain gave Cortez, with the tille of Marquis del Velle, are feveral rich towns, cloifters, and churches; with an excellent breed of horfes, and great herds of black cattle and theep, which furnifh the clothiers of Los Angelos with wool, and Spain with hides. The Creolian clergy here are as great enemies to the Spanih clergy as the native Americans are. Accord. ing to fome, the proper name of Guaxaca is Antiquera; but this laft others make a feparate town, and binhop's tee alfo, fituated abeut 80 miles to the $\mathbf{8 .}$ W. It is faid to have a flately cathedral, adorned with many large and high pillars of marble, each of which is as one entire flone. Jt is fituated in lat. 18, 2. long. sor, 10.
Guiara, a town of Terra Firma. It has a harhour on the Caracoa coaft, 212 miles E. of Maracaibo; where, in the years 1739 and 1743 the Englif were twice repulicd, and lof fome men in attacking this place. It lies in lat. $10,39, \mathrm{~S}$. long. 66, r .
GUiLDFORD, an inland county in the diftrict of Salibury, in N, Carolina,

# H A M 

## H

HAcila, Rio Dera, on the coalt of Terria Firma. The spaniards formerly called it Nueftra Senora de los Neieves, and af crwards De los Remedios. It is fituated on the banks of the river of the fame name, namely, Rio de la Hacha; and but a fiort mille from the fea-coalt upon a little hill, and containing not much abuve 100 honfes. It lies about 246 miles E. of Carthagena. It is firuated within the government of St. Martha, and is the fecond ci:y of the province. It is but fmall, but fortified, and the Indians about it do not acknowledge the yoke of the ipaniards; they are generally Mepherds, and breed valt flocks in their fruitful pantures which their plains and mountains afford them.

HaDHaM, E. and W. two towns in Hareford county, Connecticut, near the lanks of Connecticut river. E. Hatham is S. E. 9 miles from Middletown, and the fame ditance $E$. from Durham.

Hadiey, a town in HampThire county, in MalfachufetsBay, on the E. bank of Connceticut river, where it almof furms an inand.

Halifax, a lown in the diftrict of Halifax, in N. Carolina.

It is fituated on the banks of the Roanoke river, which runs into Albemarle Sound.

Halifax, the capital of Nova Scotia, on the W. Gide of the harbour of Chebueto, which, tho' founded fo lately as in 1747, is now a confiderable place, with above 1000 houles, laid out in regular handfome freets. It is the refidence of the Governor and other officers, and carried on a confiderable trade. Here the Br:tifh troaps retired when they evacuated Gofton in March, 1776.

Hampshirf, a county, the weftern extremity of Mallachu-

## HAV

Sets-Bay, through which Connecsicur river runs; and it is the leall cuitivated of any of the counties of this province.

SAMPSTEAD and HiGHGatre, two villages, inland, luelonging to Georgia. They are abont a mile afunder, and 4 miles from Savannah, the capital of the province. The inhahitants apply themfelves principally to gardening, and fwpply the town with griens, pot-herbs, roots, \&c.

Hanpron, a maritione town in Elizaheth county, Virginia, at the hottom of a bay near the mouth of James river, 15 milcs S. E. from Yurk.

Hampron, East and South, lwo towns in long Inins, in the province ni New York, and county of Suffolk, on the S. E. cualt.

Hanover, a town in York county, Penfylvanis, 17 miles S. W. of New York, 7 S. of Berwick, and the fatne diflance N . from the limits of Maryland.

IIArley, a village in the councy of Ulfter, in the province of New York.

Hartaord, a town in Chowen county, and diftrict of Edenton, in N. Carolina. It is fituated on Perquimans river, which empties itfelf into Albemarle found, from whence it is diftant about 15 miles S. E. and about 13 N. from Edenton.

Hartaord.-See Hereford.
Harivich, a town in Barnnaple county, Plymourh Colony, New England, on the $N$. fide of the peninfula, on a fmall creek of Cape Cod or Barnflaple bay. It is fituated near the nidde of the peninfula, 6 miles W . of Eaftham, and io from Chatham.

Hatpieid, a town in Hampthire county, Maflichilfets-Bay, on Mill river, which ruas into Connecticut river. It is 5 miles N. F. from Northampton, and 4 from Hadley.

Havannah, a city fituated on the N. W. part of the illand

## H A V

of Cuba, one of the Greater Antilles, at the entrance of the gulf of Mexico. The city and port of Havannah flands 191 miles almoft directly S. of Cape Florida, and confequently commands the gulf of that name. It was built in 151s. It was originally called the port of Carennas; afterwards, uhen the city, by its alecration of fice, and encreafe of wealth, giev confiderable, it was called St. Chriftopher of the Havannah. In 1536 it was taken by a French pyrate, and was of fo inconfiderable a value, that it was ranfomed for 700 pieces of cight. It was taken fometime after by the Englih. and a fecond time loy the Erench; nor was it till the reign of Philip II. of Spain, that the importance of it was thoroughly underfond, and any carc taken in fottifying it. What was then done proved not fufficicut, and molt of the fortifications ucre in a very bad condition when Franeis Coreal was there in 1666 ; and very little better when he vifited it again, 20 years afterwards. Since the acceffion of the Houfe of Bourbor to the throne of Spain, more pains have been taken ahout it, and therefore we thall defcribe firf the city, and then the port, in the condition they now are.

The city of Havannah, according to the laft and exact map of thefe parts, lies in 23,10 , of lat. and confequently within 22 of the Tropic of Cancer; and its long. from London is 82, 13. It flands on the N. firte of the ifland, and W. fide of the harbour, in a very beautiful and pleafant plain, having the fea tefore it, and being furrounded on all fides by two branches of the river Lagida. The buildings, tho' low, are built of foue, and make a very good appearance, though but meanly furnifhed. Here are feveral handfome churches, monateries, and hofpitals. The churches are rich and magnificent, that dedicater

## H A V

to St. Clara having 7 alrars, all adorned with plate to a great value; and the monaftery adjoining contains 100 nuns, with their fervants, all habited in blue. It is not a bifhop's fea, though the biThop generally refides there; but the cathedral is at St. Jago, and the revenue of this prelate not lefs than 50,000 pieces of eight per annum. I he number of inhabitants in this ciry are about 15,0co. One part of the ifland is under the jurifdiction of this city, as the other is under that of St. Jago; but the diftrict belonging to the Havannah is by far the beft cultivated, and has the moft iowns and villages in it; and thefe are not above 6 in number.

The port is not only the bef in the Wefl-Indies, but perhaps one of the fineft in the univerfe. It is fo capacions, that reco fail of mips may ride there con:modion:ly, without either cable or anchor; and there is, generally fpeaking, 6 fathom water in the bay. The entrance is by a channel dbout 2 fouths of a mile in length, which is pretty narrow, and of difficult accefs to an enemy, being well defended by forts, and platforms of guns; which is rendered more difficult fince 1762 , when the governor ordered threc men of war to be funk there; and through it you come into the bay, which lies like a bafon at the botom of it, with a fmall ifland at the E. corner thereof. At the entrance of the channel there are 2 frong caftles, which are fuppofed to be capable of defending the place againft any number of mips. The firf of thefe is called the Moro, and ftands on the E. fide of the channel. It is a kind of a triangle, furtified with baftions, on which are mounted about 40 pieces of canmon, itiled the twelve apoftles, almof level with the water, and carrying each a ball of 36 pounds. On the other fide of the chan-

## H A V

nel ftands a frong fort, called the Punta, a regular fquare, with good baftions, well mounted with cannon; which fort, \&c. Atands fo very high above the level of the fea, that it is impoffible for the largeft thips to batter them. Between this city and the fea there is a watch-tower, where a man fits in a round lanthorn at the top, and, on the appearance of thips at fea, puts out as many flags from thence as there are fail. The third is filed the fort; it is a fmall, but ftrong work on the W. fide, towards the end of the narrow channel, with four large baltions, and a platform, mounted with 60 pieces of heavy cannon. Befides thefe, there are two forts, one on the E. fide, called Cajemar, the other on the W. called the fort of Chorrera, of 12 guns each. The governor has a very numerous sarrifon, this being the key of the Weft-Indies.

The commerce in this port is the moft confiderable of any in America, and for the fake of perfpicuity we will divide it into the particular conmerce of the ille of Cuba, and into the general by the regifter-fluips. The former confifts in hides, fugar, tobacco, ginger, maltic, aloes, farfaparilla, other drugs, and great quantities of tortoife-fhell. It mint be obferved, that the commerce of the illand of Cuba is not entirely confined to the Havannah, but extends itfelf to other ports, particularly St. Jago, where there are frequently many little veffels from the Canaries, and other parts, which trade entirely for the commodities of the country. As to the general commerce, this port is the place of rendezvous for all the Mips, particularly from Porto Bello, and Vera Cruz, which return into Spain from the Indies; fo that there are frequently 50 or 60 fail in the port at once. While they ride here, there is a fair kept on hore, where they trade

## H A V

for immenfe fums; and with fo great honour, that it is faid they never open the bales, but take the goods according to the bills of parcels, wihhout any infpection. While the fleet is in the bay, provifions are exceffively dear on fhore, and money fo plenty, that a Spaniard expects half a piece of eight a day from a male Rave, and half fo much from a female, out of what they earn by their labour. The fieet generally fails from thence through the channel of Buhania, in the month of Sept. and is the richelt in the world, fince in filver and merchandize there is feldom lefs than $30,000,000$ pieces of eight on board, or $6,750,000$ pounds of our money.

The town of Havannah is not 2 miles in circuit; and the number of inhabitants does not exceed 15,000 fouls, confifting of Spaniards, mulattoes, and negroes, befides the garrifon, the governor of which is ttiled Cap. tain-general of the iflind. It belongs to Spain. Havamah lies 18 leagues from Cape de Sed, which is a promontory on the N . fide of the ifland. The heat here is extreme, and more intolerable even in the night than in the day time. This port with the Spanifh Heet of war, and 25 merchantmen, who had taken refuge there, the forts, the city, its immenfe magazines, 3 millions of piafters, \&c. were all taken, Ju!y 30, 1762, by the Ensliih, after a fiege of 29 days, by 19 hips of the line, 8 frigates. and 10,000 men, under admiral Pocock, and the earl of Albemarle. The Spaniards, having reenvered it at the peace, rebuilt the Moro Caltle and the Fort Punta, befides other immenfe works, the expence of which is incredible; all which will not defend the place fo much as its pernicious climate.

Haversow, a town in New York, on the W. bank of Had-

## HER

fon's siver, in which it has a fine bay, 35 miles N. of New-York.

Haverill, a town in Eflce county, Maflachufets-Bay, NewEngland, on the river Merimack, and near Mitchell's Falls.

Hayes Island, in New South Wales, formed by the rivers Nelfor: and Hayes, which, after running a little way together, feparate again. The molt northern is fill called Nelfon river, near the month of which ftands Fort York, by the Fiench called Bombon, as alfo is the river Nelfon. The moft fouthern branch is called Hayes river by ti:e Englifh, and St. Therela by the French. On either branch, the fream is fo gentle that large velfels and ftallops might be built there to carry bulky goods, and alfo return againft. the flrean without any difficulty.

Fiendric, a town at the W. end ot Long Inand, New-York, firuated in Queen's connty, on the coalt of the Narrows, 10 miles N. E. of Redford, and 7 miles N. of New-York.

Henrico, a county of Virginia, on the N.E. coalt of James river.

Henry Capr, the S. promontory of Virginia. It is lituated at the entrance of the Cheafa-peak-Bay. Lat. ${ }^{2} 6,57$. Iongitude 76, 23 .
hertaord, or Hartford, county in the diflrict of Edcnton, N. Carolina.

Hertapord, a county of Connecticut, bounded on the N. by Hamphire, in Mallachulets-Bay, W. by Litchficld county. E. by Windham county, and S. by NewHaven and New-London cotnties; having the liver ruaning through it.

Hektrord, the chief town of the foregoing comnty, is fituated on the ll eftern bank of Connedicut river, near the ecnter of the county, not 6 miles N. W. of Gludenbury, 14 miles N. E. of

## H I S

New Cambridge, 6 miles S. of W. Windfor, and 17 miles W. of Mansfield.

Heve, or La Haive, a port of Nova Scctia, where the French had a fort defended with pallifades, which the Englifh took by capitulation, with the lofs of fome of their people and their commander, in 1712.

HIGHLANDS, a range of mountains, flretching weltward from Hudion's river, dividing the county of Ulfter. in the province of New York, from that river; they are cloathed thick with timber, and abound with iron-ore, ponds, and fine flreams for ionworks.

Hispaniola, or St. DoMINGo. See Domingo.-One of the Antilles Iflands, in the Atlantic Ocean, in A merica. It is fituated between lat. is and 20 , and between long. 67 and 74 ; is upwards of 4 co miles long from E. to W. and 124 bread from N. to S. The ifland partly belongs to the Spaniads, and partly to the French; which latter (their buccaneers having fettled there before) obtained a legal right to their mare of the illand by the ceffion which the Spaniards made them of the N. W. part of Hiffaniola, by the treaty of Ryinick in 1697 ; the beft and woit fertile part of the beft and noutt fertile illand in the Went Indics. This is the principal fettement of the Fronch in all America. The country is mixed; pretty mountainous in fome parts; bot many of thefe mountains are fertile, and covered with finc wods. Others, which are barren and rocky, had anciently mines of gold: they are not worked now; though it is judged they net only contain thole of gold, but mines of filver, copper, and iron. But the French think their labour better beflowed on the culture of the plains for the rich comnoditits which vend fo well in Europe.

## H I S

This country has likenife prodigious fine plains of a valt extent, and extreme fertility, either covered with noble forefts of timber and fruit trees, excellent in their kinds, or filled with valt numbers of horned cattle, heep, 27 d hogs. The air of Hilpaniola is the moft heal:hy in the WeftIndies. The country is admirably watered with rivulets as well as navigable rivers. And it is no wonder therefore that this active nation, in poffeffion of fo extenfive a country, has reaped from it prodigious advantages. In the year 1726 , on this inand were no let's than 100,000 negroes, and 30,000 whites ; they made 60,000 hod theads of fugar of 500 wt . each; their indigo was half as much in value as their fugar; they exported large quantities of cotton; and they fent befides to France caca and ginger in tolerable plenty. Since that time they raife coffee hise t) a very great amount. Suppofe the fugar at 20 thillings the hundred, the whole muft yield 300,000 terting. The indigo is tomewhat fallen it its price fince; hut as it has increafed largly in its quantity, it is not too much to value it at $100,00 \mathrm{c}$. If to hiefe we add the proluce of cotton, cacao, ginger, and hides, it will not be too nuch to allow roo,000l. more; fo that at this rate her thare of the inand is wo th to France 550,000). flerling. Rut ronfitering that thefe feveral articles have greatly increafed fince that time, it will ath he exceffive to rate the value of this colony at 750,000 '. Aerling a ye.r.

The largeft towin in the French part of Hifpuniola is Cape Françife, which is fruated on the northern part of the ifland, upon a very fine harbour. It is well built, and contains about 8000 inhabitants, blacks and whites. But though this be the largeft town, L.eogane, on the weflern fide, is a good port too, and a place of confiderable trade, being the feat

## HEW

of government, which here is lodged in the hands of a governor and the intendant, who are mutually a check upon each other. There are, befides, two other towns confiderable for their trade, Petit Guaves on the W . end of the ifland, and por: Louis on the S. W. pirt.

The E. part of this if and is in the poffition of the Spaniards; and this is the largett part, and has mont towns. Their capital is St Domingo, which was built firft by Coiunbus, on the S. fide of the ifland, at the month of the river Hayna, or lfabella, as our maps call it, in a fine plain, which hows it to great advantage from the fea. In 1586, Sir Francis Drake took it, who held it a month, and then burnt part of it, but fared the reft for a ranfom of 60,000 pieces of eight. This and leveral other places were quitted in the reign of Queen Elizabeth, as being judged unpolitic then to keep them. How: ever, Cromwell thought otherwife; for he fent his generals Penn and Venables, with tho greateft force the Englifh ever had in thofe feas, in order to porfefs themfelves of St. Domingo; of which being difappointed, they af erwards, in 1654 , reduced $\mathrm{J} \mathrm{d}-$ maica. The trade of St. Doningo, which was a confiderable one in fugar, hides, tallow, horfes, hogs, and caffra, has decayed fince the $S_{\text {Faniards }}$ have been tempted to Havannah and other places: yet for all that St. Domingo makes a good gigure, and its inhalitants, including Negroes, \&c. are thought to exceed 25,000: thefe confift of Spaniards, Meftiz:ess, Mulattoes, and Albatraces, of all which number a fixth part is fuppofed to be Spaniards.

Hewxevi, a village of Canada, confifting of between 25 and 30 houfes well built, with a fort, where was a governor and a garrifun. It was takea by the French in the year 1708.

## H O H

Hillsborough, a town in the county of Orange, and diftrict of Hilliborough, N. Carolina. It is fituated near the head of the Nufe river, on a branch of the Same.
Hill-Town, in Chefter couney, Penfylvania, is near the center of the county, 28 miles W. of Philadelphia, and 20 N. from Wilmington, in Newcafle county, Delawar, and 21 miles N. W. from Chefler.

Hingham, a town of Suffolk county, Maflachufets-Bay. fituated on a fouthern creek of Bofton harbour, on the banks of the siver Way, 5 miles W. of Konohaflet, and the fame diftance $E$. from Weymouth.

Hobes-Hole, a town in Effex county, Virginia, on the W. bank of Rappahanock river, 15 miles N. E. from Walkerton, 32 S. E. of Port-Rogal, and 67 N . of Williamßurg.
HochelagA, a village of wild Indians in Carada. It is pretty large, and fituated in the ifland at this day known under the name of Montreal. It is of a round figure, and 3 rows of pallifadocs inclofe about 50 huts, each upwards of 50 paces in length, and 14 or 15 in breadth, and made in the form of funnels. The entrance to this inclofure is by one gate, over which, as well as the firt row of pallifadoes, is a fort of gallery, the afcent to which is by a ladede, and it is plentifully provided with flones and fints for the defence of the place. The inhabitants of this village fpeak the Huron language. It is fituated at the foot of a mountain called Montroyal, now Montreal.

Нонio, or Ohio, a famons siver, having its fource in the Apalachian mountains, near the burders of Carolina and Virginia; and after a $S$. W. courfe falls into the river Miffilippi, of which it is reckoned the principal aream. - Sef Obie,

## H O N

Holifston, a town in Middit fex county, Maffichurits-Bay, about 4 miles N . from Medway, and the fame diftance S. W. froms Sherborn.
Hondubas, or Comatagna, a province of Old Mexico, or New Spain, which, including the country of the Moikitoes, is fituated between lat. 12 and 13 , and between long. 85 and 94. It has the bay bearing its name, and the North Sea, on the N. and E. is bounded by Nicaragua and Guatimala on the S. and by Vera Paz on the W. It extends E. and W. along the North Sea above 130 lengues, and in íome places is near 60 leagues over from $N$. to S. but it is narrower at bothends. The Spaniards claim this country; but the Englin have been long in poffeffion of the logwood tract in the Bay of Honduras, cuting large quantities of it there every year. And the Mofkito Indians to the E . of this province have entered into treaties with the Englif, reccived them into their country, and done them feveral ferviees, Beffides, the Spaniards have no forts in this bay, or in the country of the MoRitoes, only 2 fimall towns,
This country confifts in general of hills and deep dales, and has a gocd air. It is rendered the mere fruitful by the inundations of its rivers about Michaelmas, when the natives convey the water by canals to their fields and gardens. The foil in many paris bears Indian corn thrice a year. It alfo yields European wheat and peafe, cotton-wool, called vir goion, \&c. has excellent pafture, with honcy, wax, and abundance of all ferts of provifions, befides mires of gold and filver. It produces alfo great quantities of extrordinary large gourds or calabafhes, which the Hifpaniola Indians call H 'bueras. And the firft difcovercr, feeing many of them float along the soaft, called it

Golfo de Hibueras, and the province itfelf Hibuera; yet afterwards, finding very deep water at the great cape of this country, they called it Cabo de Honduras, i, e. the Promontory of Depth, and the country iteelf Honduras. The vineyards bear twice a year; for inmediately after the vintage the vines are cut again, and the fecond grapes are ripe before Chriftmas.

Honduras, bay of, noted for cutting of logwood, as that of Campeachy formerly was. It lies in the province of the fame name, betwixt C.ape Honduras, in Lat. $15 \frac{1}{2}$, and Cape Catoche, the eaftermolt point of Yucatan, in lat. $21 \frac{1}{2}$. Moll makes the diftance between thefe espes above 270 miles. The great lake of Nicaragua has an outlet into it by a river called Rio de Anuzelos, or Angelos, only navigable by fmall craft. In this bay are feveral fmall iflands, particularly the Pearl Iflands, a little to the N. but the pearls fihed up there are not in fueh quantities as formerly, nor fo large. Into this bay runs alfo a fmall river from the province of Veragnas, called by the Spaniards Rio de Sucre, i. e. Sugar river, from the firgarworks here, with which the country fo abounds, that, dij not the Spaniards confume large quantifies of it in fweetmeats and preferves, \&e. they might fend feveral hip-loads of fugar into Europe.

The country where the Englifh cut their logwood is all a fiat, and a great part of it a morals, with feveral lagunes, which are very often overflown. In the dry feafon, when the cutters have found a good number of trees, they build a hut near them, where they live. After cutting down a tree, they chip of the bark and lay it in heaps, marking paths to each, that, when the rains come which overnow the ground, they

## H O N

are as fo many channels, where they go with fimall currents and land them, bringing them fometimes 30 niles to the barcaderas, whence the buyers fetch it at 3 l. its. 6d. Iterl. a ton. Juring the floods, the cut:ers dwell at the barcaderas, which are $4^{2}$ miles up the river, where they have huts built on high banks to fecure them from the floods. As foon as they have notice of any veflel's arrival at the mouth of the river, they Hock down to purchale whatever they want.They amount to 15 or 1600 men, bat furm no regular colony; yet they chure a chicf, who cannot have lefs authority. luxury, or emolument, or whofe fubjects are more difobcdient.

The quantity of wood annually furnifhed by the Bay has been valued at 20,000 tons. The Englifh exiort only about 6000 , whofe trane is carried on in general by North American hips, who fupply the Bay with what merchiandize they wans; but the principal branch of the trade is carried on by the Dutch, whofe annual clear profit amounts to above $90,0=01$. fterl. The Bay is Sprinkled with an infinity of thoals, rocks, and clufters of drowned iflands, which abound with great plenty of green turtles. There are feveral chan. nels between them, among which a thip hould not renture without an experienced pilor.

Some trees of the logwood itfelf grow very tall and fraight; though montly low and crooked. They bear a fmall leaf, and have a prickly underwood, like our white-thorn in both thefe refpeds. It bloffoms and bears fed ; which, by falling off, fows the ground from which it Springs up, and its vegetation is mach forsarded by the inundations bringing the foil over it. All the rivers and crecks in the Bay of Hondtras not only fwarm :with alligators and guans, but fith alfo.

K 2

## H U D

Among other fowls they have guams, confos, Mufoory ducks, whifling ducks, fomewhat larger than cur terl, and as good to eat, cockatoos, macaws, parrots, twopenny chicks, double and fingle curlews, and crab-catchers.

With regard to land animals, here are wild deer, but fmall and lean, tygers, and monkeys. Among the litlle iflards in the Bay are great numbers of green turtle, mofly catched in nets. The manatee is alfo frequently met with here; and that called the jewfith, which exceeds all the reft in grodnefs, is thaped fomething like a cod, but thicker in proportion, and much better cating. They have very broad fcales, and fome of them weigh 801 .

The principal rowns of this province are, Valladolis, or Comaiaga, which is the capital; Truxillo, or Trugillo, Gracias a Dios, St. Pedro, Porto de Cavallos, St. Jago, with the inland of Ruatan, or Raltan.

From Cape Gracias a Dios, the moft eafterly promontory of Honduras, the land falls iff due $s$. forming another great bay, which runs along the coalt of Nicaragua, and then bends again F. by N. to Nombre de Dios and Porto Beilo.

Hooper's Istand, a long narrow ifland in Cheafapeak bay, Maryland, oppofite the entrance of Patuxen river.

Hougue, La, a linde fort fituated two leagues beyond the Havanna, in the ifland of Cuba. From hence we begin to difcover Le Pain de Matance, a mountain whofe top refembies an oven or a loaf. It ferves failors to know the bay of Matance by, which is ahout 14 leagues from the Ha vannah.

Hudson's Bay or Strait, the N. fart of Canada, where the Erglifh company of the fame name have feveral fettements and forts, whe, by their agents, carry
on here a tratfic with the natire Indians for beaver- k ins and other valuable furs to a confiderable amount, being one of the moft profitable trades our merchants deal in. But the garrifons and forts here feem not to be of a Arength fufficient for holding out long againft an atrack. This Bay is abont 300 leagues wide from S. to N. but above $5 ; 0$, by reckoning from the bottom of James-bay, in lat. 5 r, to that of Repulfe-bay, in lat. 67, 10. Its breadth is unequal, being abont 130 leagues where hrnadelt; but it grows narrower both to the fouthward and northward, heing not much above 35 leagues brozd in fome places. At the mouth of Hudfon's Bay is Refolution ifland, alro Mansfield ifland; and in the Strait are Char'es ifland, Saliftury inand, and Notirgham ifland. From Refolution ifland to Care Diggs, at the entrance of the Bay, is about 1 so leagues in leng.h. The land on ho:h fides, namely, Labrador and North Main, are inhabited by favages, of uhich we have little or no kncwledge. That part of the Bay on the W. fide, in about lat. 57 , is called Button's bay; and the eaftern part, from lar. 55, 15. to lat gr, and the mot fouthern part, are called James's bay. 'The coaft from Cape Hen-rietta-Maria, in lat. 55, 15 , where James's bay begins, to the bottom of the bay, is about sco leagues, and of much the fame breadith all the way, being betueen, 50 and to leagues over.

On the eaftern hore, or Labrador coatt, lie feveral iflınds, called the North Sleepers, the Weft Sleepers, Baker's Duzen, Betchirr's Iles; and in James's bay are Bear ifland, Viner's ifland, Charlton illand, Cape-Hope ifland, \&cc. All the country fioni Button's bays. and E. as far as Labrador, is called New Sonth Wales.

siver whofe fource has not been difoovered. Kumning louthward, it approaclies the Mohawk's river, within a fuw miles of Sacoundatiga. In general we know that it has its fource in the mountainons country between the lakes Ontario and Champlain. From its approach near Sacomodanga, it runs N. and north-eafterly towards lake St. Sacrament, uow lake Gerse, within 10 miles of $\mathrm{i}:$. The courfe then to New-York is very uniform, being in the main S. 12 or $15^{\circ} \mathrm{W}$. The difiance from Alhany to lake George is computed at $\sigma_{5}$ miles. This river in that in:eival is navigable orly to batteans, and interrupted by rf:s, which occafion two pontages of half a mile each. In the pirf fage from Albany to Fort Edward the wholelind-carriage is 12 miles. There are 3: roaes from Crown. Puiat to Hallon's siver, in the way to Allany; one through lake George; another through a branch of lake Champlain, bearing a fouhern courfe, and terminating in a baion, feveral miles E. of lake Gcorge, called the South bay. The third is by afcending the Wood-creck, a hallow Areain about 30 yards broad, which coming from the S. E. emptics itfelf into the $S$. branch of the lake Champlain. The place where there routes meet on the hanks of Hudfon's river is called the cor-rying-place. Here Fort Edward is buite ; but Fort Henry, a much Aronger garrifon, was erected at the S. end of lake George, after the repulfe of the French forces inder the command of Baron Dickaw, on the 8th of Sept. 1755. The paflige through the highlands is about 16 miles $;$ the tide flows a few miles above Albany. The navigation is. fafe, and performed in hoops of 40 or 50 tons burthen. About 60 miles above the city of New York the water is frefh, and in wet feafons very low, and abounds with tasicty of fib.

## HUR

Hummeiss-Town, a town in lincalter councy, Penfylvania, fituated on the Great Swatiw:o creck, 7 miles from the Suquehamsh river, 5 N. of Middletown, 16 W . of Lebanon, 19 S. F. of Manhein, and $\delta_{5}$ from rhilalelphia.
hunterion, a county in New-jerfy, near the Delaware river, the principal town of whicly is Trenton.

Huntingdon, a town near the N. W. extremity of Cumberland county, Penfylvania, fituated on the fariata river, a branciz of the Sutquehannah river, 22 miles N. E. of Frınks-town, 1 r miles N W. of Fort Shirley, and 60 from Carlinle.

Huntiscidon, a town int Long-Inand, New-York, in King's county divifion, on the N. lide, at the bottom of Brandon harbour, 7 miles $W$. of Smith-town, the fane diftanc: E. of Oyterbay, and N. of Hampteal-plain.
ifuron, Lake of, a large colluction of inland waters, in Caliada. It lies between lat. 43 and 46. and between long. 84 and 89. This lake communicates with lake Michigan or llinois hy a ftrait, and is 350 leagues int circuit. It is in the frym of a triangle. The lands about this lake are called the country of the Hurons.

Hurons, favages inhabiting the country contiguous to the lake of the fame name, in Canada: their true name is Yendats.

The councry inhabited by there people, at the beginning of the hutt century, had the lake Erie to the S. dhe lake Huron to the W. and lake Ontario to the E. It is ficuated between lat. 42 and $4_{5} \mathrm{~N}$. Here they have a good many cantons, or villages; and the whole nation fill confifts of between $4 \alpha$ and 50,000 fouls.

In this country are large meadows, which would bear wheac and all other grain that thenatives would fow in them. T.af fortas

## J A G

are full of very beau:iful trees, efpecially cedars of a prodigionis magnitude, and proporionable tallnefs. The country is well watered, and the water is very goot. Here are fome flones that can he fufed like metal, and contain veins of filver.

This comery is we!l fitmated for commerce: whence, by means of the lakes with which it is almolt furrounded, it wowlit be an eafy matter to pulh on difcoveries even to the extreme parts of NorthAmerica.

Hyde, a maritime county in the diffrict of Newbern, NorthCarolina.
Jago de Leon, Sant, a Rowil of Venezuela, a province ot Terra Firma, in South America. 1 l is fituated about 18 miles from the fea-coaf to the $S$. To it are two ways from the fea; the one fhert and eafy; but rray he eafily guarded by a few people, being about the middle pent in by inicceffible mcuntains and groves, fo that it is hardly 25 feet broad: the other road is through craggy mountains and precip:ces, which the Indians generally ufe. Afer pafling thofe mountains is a plair in which the town is built. In 3599, the Englifh took this town, after making themfelves mafters of the Caraccas.

Jago de Guatimala, St. one of the principal towns of New-Spain, the capital of the province of Guatimala. The old city was utterly deftroyed by a hurricane and earthquake in 1541 , when 10,000 Spaniards lon their lives. It was built at the bottom of a volcano with two tops, from one of which iffued fire, and from the other water. It was rebuilt in 1550 , in a fine valley, on a river, about three leagues from the volcado, and was again totally defroyed by an earthquake in A pril, 1773; before which melancholy accident it was the refidence of the frefidents, the feats of the royal courts, and of a tich bifhor,

## J A G

fuffragan to Mexico. It had an univerfity, and was the center of commerce in all thofe parts. It contained ahout $80 c o$ families : and the citizens carried on a confiderable trade through all the provinces of Mexico, and even into Pern, ly the ports of $1 . a$ Trinidad and Realejo. Its trade with Spain was from Golfo Dolce. The principal commodities in which they dealt were hides, indigo, anatla, fylveftcr, cochineal, cocoa, \&c. And indeed no city could ftand more commodioully for an extenfive trade, and be fafer from pirates and privatecrs, lying 8 leagues from the SouthSea, and about 40 from the Gulf.h of Mex:co: yet fill was liable to frequent earthquakes, as weil as to eruptions from a neighbouring volcano, which birns mort fircely during the rainy feafon, and throws out huge ithnes and pieces of rock. This mountain is feen a great way off at fea, it being 9 miles high. The cathedral and parith ch:urches here were extremely rich; and here were aifo. 2 fine monafteries, befides a gond horpital. The valley in which the city food was about 2 miles and $\frac{1}{2}$ broad, opening a lietle beyond the old town into a wide champaign towards the fea. Though it was furrounded with mountains, yet there were good roads over them.

The government of the adjacent country, and of the provinces of Honduras, Soconufco, Vera Paz, Nicaragua, Cofta Rica, and Chiapa, was fubordinate to the chancery here, which confifted of a prefident, who had as great a poucr as the viceroys of Peru and Mexico, alfo of fix judges, the King's altorney, and two chief juftices. 'I hey had all handfome falaries, which thiy very mich increafed by trading and bribes. The univerfiny here was founded, in 1624, by Philip IV. joined to the Dominican convent, allatily pile, with a jearly

revenue computed to be at leaft 30,000 ducats; and its treafluy would have made is $100, \mathrm{co0}$. The numnery of the Conception confifted of 1000 women, inchuding fervants and feholars; and they received none but tuch as brought with them from 500 to 1000 ducats. Lat. 14, 10. Long. 92, 18. Jago de Nexapha, tota town of Gitaxaca, one of the provinces in the audience of Mexico. 1t has the addition of Nexapha from the valley in which is is frsuated, on the fide of a river, which falls into the Alvarado, 18 miles $S$. of Ildefonfo. It has a convent of Dominicans, much euriched by prefents of votaries, who come far and near to fee an image of the Virgin Mary, and its pretended miracies.

Jagodelos Valees, St. a town of Panuco, a province of New-Spain. It is fruated 5 leagues S. W. of Panuco city, on the river of the fame name. Here the Spaniards have a garrifon, and in its neighbourhood are falt-works.

Jago de Cuba, St. once the capital, thongh not the molt confiderable town of the illand of Cuba. It is fitua!ed at the buttom of a fpacious bay, on the $\therefore$. fide of the ifland, about 2 leagues from the ca. The entrance into this bay is nurrow for feveral miles; but within it are little iflands forming a mol commodious harbour, and thelter from ftorms. It was built by Velafquez, the firt conqueror, who made it the feat of his government. The city is ftill the fee of a bifhop, with a cathedral, where the canens are refidentiary, but the mitred head refides at the Havannah. It had once a good trade: but this is alfo removed to that city; fo that St. Jago has dwindled almoft to nothing; though it has jurifliction over one half of the ifland. After the Englifh had left the ifland, about 400 men were

## J A M

time in repairing its fortifications. Within 3 leagues of it, at Covory, is a rich copper mine. In 1766, a terrible earthquake happened here, which did conlderable damage. Latitude $20,15$. long. $7^{6}, 40$.

Jago de la Vega, St. conmonly called Spanith-lown, the capital of the illand of Jamaica. It is fituated 5 miles N . of Port-Paflage and the bay of Port-Royal. It is the refidence of the governor, and the general affembly and courts of juftice are held here. It is a fmall city, with about 20 streets and 4000 inhabitants, in a healthy lituation; and the greateft part of the inhabitants are people of fortune, or rank, which gives it the air of fpleader and magnificence; hut lieing 2 leagues diftant froma the fa, is dellituse of trade. It is has a very handfome church, a chapel, and a Jews fynagogue: but the principal builating is the governor's houfe, one of the handfomeft in all America. It received great damage from a ftorm, July 16, 1772, when the hailitones were as large as oranges. Lat. 18, 26. long. 76, 32 .

JAMAICA, one of the principal towns on Long Illand, or Nafiau Ifland, belonging to Queen's county, in New York. It is fituated on the W. fide, 8 miles from Hampitead, and the fame diftance E. of Bedford, and has a church in it.

Jamasca, one of the Greater Antilles, in the Weft Indies, and fituated in the Atlantic Occan This ifland being difcovered by Columbus in the year 1494, in his fecond voyage from Spain to this part of the world, he changed the name of Jamaica to that of St. Jago, which it retained while it was in the hands of the Spaniards; but they were difpoffeffed of it, in 1655 , by the Englifh, with a feet primarily defigned fos the reduction of Hispaniola, un-

## J A M

der the command of Penn and Venables: it yielded without much oppofition, and recovered its old appellation. Afterwards the Spaniards ceded the inand to the Britilh court. The whole people on the ifland did not exceed 3000, including even the flaves, who were 1500 . Scon after the Reforation of Charles II, this coluny had encreafed the number of its inhabitants to 18,000 , who had almoft no other trade but their depredations on the Spaniards; but they foon after began to make figgar and plant cacio-trees, and ered falt works.
'This is the largett of all the Englifh ifland-coloniss, and even of any of the Greater Amilles, except Cuba and Hitpaniola. It extends itself between lat. 17 and 18,27. and between long. 76 and 79. Fo that it is about 140 miles in length from Point Negril on the W. to Point Morant on the E. and 60 in breadth where broadeft, namely, from Gatlina Foint on the N. to Portland Pitch on the S. but, it being of an oval form, i: grows narrower towards each elld. The acres it contains are computed at $4,000,000$; of which, fome fay, one half is planted, and others 1,500,000.It is placed in a moft happy fi:tuation at 36 leagues to the S .. of Cuba, and 39 to the W. of St. Honingo. The difpoftion and number of its harbouss enable it to trade with either of the iftands of the Weft Indies or the continent. It has about 16 principal harbours, befides 30 biys, roads, or good anchoring-plucs.

It is divided by a ridge of mountains which runs through the whole illand from E. to W. 'The eaftern part are called the "' Blue Mountains." They contain the fprings of fine rivers, ftored with fifh of various kinds; and many of them navigable by canoes, in which fugars are carred from the plantations to the

## J A M

sea-fide. In feveral diftrixts they go by feveral names, being crowned with trees of almoll too various kinds, particularly cedars, lignum vita, mahugany, \&c. evis verdant, forming groves and cool retreats. The lisps of come of the mountains are higher than others; on each fide of the ridge ate others much lower, which, with the woods on their brows, and the little plantations on their fides, form at fea a very agrecable proficet. 'Thefe mountains conlift either of rock, or fiff clay. The vallies too are always veldant, being enhellihed with plantutions curiouly laid out, and producing the richeft plants in the univerfe. Several of its rivers difappear, or alier their couric, afier a flurm, and lofe their nances; and fonse of them run for many miles under ground, and then emtrge again. In fome parts of the ifind, indeed, where it feldum rains, the water is brackifh and unwholefonie. The number of rivers in this inand, Sir Hans Sloane reckors to be near roo. Thefe may more properly le called torrents; for they come precipitately down the mountains, muning but a few miles before they fall into the fea, and carrying with them in their courfe harge ftones, pieces of rock, and timber, generally much clay or earth, which fouls the water; but this, aficr fettling fome days in jars, proves good. One frequenty fees cataracts in the rivers among the mountains 50 or 60 feet high. Spring-water remote from the fea is preferred to that of rivers or ponds. The well-water near the fea, as particulurly at Port-Royal, is brackih, and occafions fluxes and other difeafes to fuch as drink. is. Some fprings is this ifland, as well as rivers, petrify their channels, and fop their own courfe. The mof remarkable river of this kind is at Abraham's plantation on the N. Fide of the
iflana the $E$ buth whic fuce bethi gripe coun der $t$ tom, fen, 1 whic calle is $m$ the muif heat in 8 the

illand. Near Port Morant, in the E. part of the ifland, is a hot buth in a wood, the water of which has been ured with great fuccels, by drinking as well as buthing in it, for the cure of the gripes, the common difeafe of the conutry. In a level ground, under the hills in Cabbage..' ree bittom, about two miles from the fot, rife a great many falt-fprings, which, uniting, form what is called the Salt river. Here falt is made in the ponds into which the fea-water comes, where the moifture being exhaled by the heat of the fun, leaves the falt in great plenty, particularly at the ponds about Oid Harbour, \& $\cdot$. It is not perfenly white, nor granulated, but is in large lanps, with a calt of red in it. Here alfo are many lakes, one of which, called Rio Hoa, receives a preat deal of water by a river, with no vifible outlet to it.

The clinate of Jamica is more temperate, and the weather more virious, than in the Caribluee Iflads : and there is no country between the Tropics where the heat is lefs troublefome, the air being continually cooled by breczes from the $E$. frequent rains, and nocturnal dews. The E. and W. parts of the inland are not fo agreeable, on account of the thick forefts there, as the $S$. and $N$. parts, which are not only more open, but mach lefs fubject to ftorms of wind and rain. The air in the mountainous parts is cosler. Though it rains frequently in January, yet May and Onober or November are thofe diitinguihed by the name of the winter-months, on account of the rain and thunder, more violent at fome times than others; and fometimes the rains latt for a fornight together, without any intermiffion, laying the level grounds feveral inches under water, and renderitrg the roads almoft impaffable. All the year round,

## J A M

the mornings are exceffively hop. till about eight oclock, when the eafterly breezes begin to blow. Thefe are cilled the Ductor, the people, while they latt, being able to ftir about their bufinefs, and the Negroes to work in the fields. Thefe gales gently approach the fhore, the fea before them coming on as finooth as c.un be imaginel. In half an hour after the breeze has reached the fhore, it fans pretty brikly, and gradually increafes till about 12, when it is generally frongelt, and latts till 2 or 3 , when it begins to die away till about 5, when it is quite fent, and returns no more till next morning. Ahout 8 in the evenins begins a land-breeze, whichblows 4 leagues into the fea, and continucs in-creafing till 12 at night; after which it decreafes till 4 in the morning, when no more of it is to be feit till next night. The fea-breeze is more violent at fome times than others; and particularly at the change or full-moon, when it gains very much on the land-winds. Aud in December, January, and February, when the N. winds reign, they blow over the ridge of mountains with violence, and hinder the fea-breeze, which blows ftronger and longer near the fea, as at Port-Royal, or Paffage-Fort, than withinland, as at Spanih - Town: as, on the contrary, the I:nd-wind blaws harder at the town than it does at Paflage-Fort or Port. Royal. As the tride-wind between the Tropics comes not direetly from the $E$. but varies from N. E. to S. E. according to the place and pofition of the fun; fo the fea-breeze here has. the like variation, not coming, alivays from the fame point. On the contrary, the land-breezes come always from the ridge of monntains, and from the fame point of them, on the $N$. and S. fides. Sometimes the fed-brecze

## J A M

hows in the winter-months 14 days and nights together; and then no clouds gather, but dews fall: but, if a N. wind blow, which it fometines does full as long in the ninter-months, then nou dew's fall, no clouds gather. In the vallies among the mountains neither of thefe breezes has aty great influence; but the N. winds often blow down trees. The land-wind blowing at night evety way at once, and the fealirceze in the day-time, no hip can come into port, except in the day; nor any go out, but foon afier day-break. The N. winds come in when the fun is neareft the Tropic of Capricorn, and confequently mof to the S. 'This is a very cold, unhealthy wind, and is moft violent in the night, when it has the additional force of the land-wind. It checks the growth of the fugar-canes, and all vegetables, on the N. fide; but it is hindered by the ridge of mountains from venting much of its fury on the $S$. where it is feldom eccompanied with rain. The S. winds bring the moft lafting rains; byt none from the land are lafting on the $S$. fide. Storms ufed to be very rare here, till within thefe 70 or 80 years, that terrible hurricanes and earthquakes have extremely incommoded veffels on the coaft. The nighes here are fometimes pretty cool, the fun being fo far under the horizon, that fcarce any re flected rays enlighten the atmo Sphere, which caufes an increafe of the cold. Every night here are piercing dews, which are reckoned very unwholeforne, efpe. cially to new comers, who are 100 apt to expofe themfelves: but in the plains or fandy places near the fea, there are few, if any fogs. The rains are vioBent, and the drops very lafge. The tides are fearce difcernible, their increafe or decreafe depending moftly on the winds, and not

## J A M

according to the age of the moon. The days and nights here are almoft of an equal length all the year round; the longeft day of all being a little above 13 hours, and the night proportionalily. The twilight is not above thice quarters of an hour.

The montlis of July, Auguft, and September, are called liurricane months, in which fearcely a year but fome fuch ftorni happens in a greater or lefs degrec. The frong winds from the N . bring forms of very large hailRones. It lightens almoft cvery night, but without much thunder; which, when it does happen, roars very ierribly, and often does a deal of damage. Earthquakes here are hut po cominon, as well as in Hifpaniola, and commit dreadful devaltations in this illand, partieukarly there of 1688 and 1 fig2; as did a f.ic not long after, that burnt down almoft the whole remaining town at the point called Port-Ropal, which has never fince been rebuile; and moft deftructive hirricanes, one in 1712, and another, accompanied with an earthquake, in 1722. The vallies in Jamaica are very level and fmooth, without rocks or ftones, or fearctiy any rifing; and the mountains very fteep, and fome of them impaflable, being fiurounded on both fides by deep channels caufed by the violent rains.

This ifland is fo far from being all over cultivated, that it has as much lying walte as would produce about three times what it does at prefent. One third cf the ifland is uninhabited. There are plantations round the inand; bat noise at any great diftance from the fea, and even one half of the ground in there is over run with wood. The foil in fome places is fo fertile, that one acre has been known to yield feveral hogheads of fugar: yet here and there are favannahs, or large plains, where
the maiz after grow the i to ho quite ther good the nonll place filt the $S$ fands of th white Jying whic that their In a rank,

the Indians ufed to plant their maize, and where the Spaniards afterwards bred their catile, grafs growing there in fuch pleaty, that the inliabitants have been forced to hurn it: fo that now they are guite bare and barren. In all 0 ther parts, however, the foil is gnod and fruitful, efpecially in the northern parts, where the mould is blackifh, and in many places mixed wihh potiers-earth: hut in others, efpecially towards the S. I.. the toil is reddifh and fandy. Jamaica, as well as molt of the fugar-illands, has a fort of white chalky fioi, called marle, lying ewo or three feet deep, which is of fo hot a quality, and that fo increafed liv manure, that their crops in all dry feafons fail. In a wet year the leaves grow rank, and never come to maturity.

The natural productions of Jamaica are fugar, rum, ginger, cotton, coffee, indign, pimento, called all-fpice, or Jamaica pepper, coera, feveral kinds of woods, fome medicinal drugs, and tobaceo; hut this lan of fo ordinary a fort, that it is only culivated to ferve the negroes, who are palfionaicly fond of it. Jamaica bears no fort of European grain : get it produces maize, or Indian corn, Guinea corn, peafe of varicus kinds, bat none like ours, except fome Englifh peafe in gardens, with cabhaces, and a variety of roots. Fruits grow here in great abundance, as the Seville and China orange, the common and fiwect lemon, haddocks, citrous, poinegranates, nuamies, fourrops, papas, pine-apples, cufterdappleś, Alar-apples, prickly-feare, Alicada-pears, pompions, melons, gunvas, ad feveral forts of herries to be found every where in the woods. But our common appletrees, it is obferved, will not grow here, or at leaft only in very few places, as may be faid of other fruits which profper more in colder climates,

## J A M

Some of its productions deferve a more particular defeription : among thefe, pimento and fugar, with fonse others as follow, claim the principal regard.
'l'hey have liere the wild cina-mon-ifee, the bark of which is fo ferviceable in medicine; the manchenille, a moft beautiful tree to the eye, with the fairett apple in the world, and, when cut down, a very fine ormanental wood forthe joincrs and cahinet-makers; but the apple and juice, in every part of the tree, constain one of the rankeft poifons. Here is the mahogany, which is in fuch general wife with us; of which in 1;70 they exported to England to the value of 50,0001 . ferling. The cablage-tree, a tall plant which has been known to grow 270 feet Hgh, famous for a fubftance look. ing and rafting like cablage, which grows on the very top, and produces but one in a year; for the extreme hardnefs of its wood, which, when dry, is incorruptihle, and hardly yields to any tool. The palma, from which is drawn a great deal of oil, much efteemed by the negroes both in food and medicine: the white wood, which never breeds the worm in thips: the coap-tree, whofe berries anfwer all the purpofes of wathing ; the mangrove and olive-bark, ufeful to tanners; the fu!tic and red-wood, to the dyers.; and lately the logwood. Their forefts alf, fupply the apothecaries with gna:cum, farfaparilla, china, caffia, andiamarinds; they have aloes too; and do not want the cochineal plant.

The who!e produce of the inind may be reduced to thefe general heads, viz. fugars, of which ihey export near 800,000 hogheads; 30,000 puncheons, or three million gallons of rum ; and 300,000 gallons of molafles; 3,000,000 pounds weight of pimento, or Jamaica pepper; 500 bags of ginger of 500 lb , weight each; 1000 bags

## J A M

of cotton of 180 lb . weight each; and 800 calks of coffee of 3001 b . weight each ; the indigo, formerly much cultivated, is now inconfiderable. With thefe they fend home a confiderable quantity of drugs for dyers and apothecaries, fweatmeats, mahogany and manchenille plank. But fome of the mon confiderable articles of their trade are with the Spanilh continent of New Spain, and Terra Firma; for in the former they cut large quantities of logwood; and both in the former and latter they drive a large and prefiable trade in negrocs, and all kinds of the fame European goods which are carried thither from Old Sfain by the flota.

Few colonies in America are fo well Rored with catle as Jamaica. Their horfes, affes, and noules, are very cheap; the oxen and cows are large; and there would be much greater quantities of thefe, only that the Englifh mind planting more than grafing ; fo that they are fupplied with fleh from the northern colonies, as well as the Leeward IMands. Their fheep are generally large and fat, and the flelh good, but the wool is worth nothing. Here is an abundance of goats, or calirctos, rabbits and hogs; and their pork is as good as that of Barbadoes: but hereare no deer nor hares.

Their bays, roads, and rivers, abound with excellent filh of all kinds; but the tortoite is by much the mott valuable, both for its theli and filh.

Here are all forts of fowls, wild and rame; and more parrots than in any of the other illands; hefides parroquets, fnipes, Guineahens, pigrons, turkeys, geefe, ducks, and poulsrs. The pelican is about the fize of a goote, and lives on the fmall fifh it picks out of the fea; its wings will extend feven or eight feet.

The fire-flies, a fpecies of cantharides, fo called, as contracting

## J A M

and expanding their light as they fly. They look green in the daytime, but glow in the night, even Some days after they are dead.

Here is a great variety of birds; but the moft remarkable is the colibry or humming-bird.

On the 7 th of June 1692, one of the molt violent earthquake: happened at Jamaica that perhaps was ever felt, by uhich Port Royal was almont entirely deflioyed. The number of people who fcrifhed on this dreadful day was upwards of 30,000 ; and a geseral ficknefs happened after it, which cut off a great many nore. Though Jamaica fuffered mont by this earthquake; yet it was fult muchabout the fame time in noft farts of the world. In the year 1703 was an univerfal fickncis in Jamaica, which carried off abundance of people : and about the beginning of the following year the whole town of Port Royal was burnt to the ground in cone afternoon; but, by the help of the men of war's benats, molt of the merchants faved their bcohs and money, and fome of them confiderable quantities of merchandize.

Auguft 28, 1712, arofe a hurricane here, which lafted from 8 at night till 2 in the morning, whercby 14 ft :ips belonging 10 the ifland were loft, logether with others from London and Briffol, and 400 of their creus drouned.

On the 28th of Augult, 1722, happened another hurricane in Jamaica, almoft as minous as the earthyuake of 16 g. 2. The inhiabitants were fut into a terrible cortnernation the day brfore, liy a prodigious fuell of the fea. The hurricane began, with a virlent rain, next merning at 8, and held till 10 at night. Near half of the houfes at Kingtion were thrown down or fhattered. 'The uharfs at Port-Royal were all deftioyed, and moft of the fugars and olher commoditics walhed away. Of

## J A M

26 top-fiil veffels, and so floops in the harbour, only 10 were to be feen after the hurricane, and of thefe only 5 or 6 repairable. Though the town-wall of PortRoyal was 9 feet above the furface of the warer, and 7 feet thick, the fea broke over it, carrying vaft numbers of large fones along with it. In flort, above half the town of Port-Royal was deflroyed, and near 400 lives loft.

The whole in and is divided into 19 diftrifts or parikhes, which fend each two mernbers to the affembly, and allow a comperent maintenance to a minifer. The parihhes are, St. Catherine's, PottRoyal, Kingitom, St. Doroth's's, Clarendon, Vere, St. El'zabeth's, $W^{\text {refthoreland, St Amb's, St. }}$ 'Thomas in the Eaft, St. Andrew's, St. John's, and St. Thomas in the Vale; which have each a parochial church. St. Catherine's, Clarendon, and St. Anne's pdrithes, have alfo each a chapel of eafe; but the parifhes of Hanover, St. George, St. James, St. Mary's, and Portland, have neither charch nor chapel.
In the year 1736 , there werc fix forts in Jamaica; namely, Fort Chartes ac Port-Rnysl, the mekport at the entrance et Kingiton harbonr, a fort at Por-xentons, For'-Wilfam, Fort-Morant, and a tor: in Carlife-bay. The turecs of the inand confified ther of 9 regiments of militia, horfe and foot, consaining ahout 3000 men , which are under the diretion of officers appointed by the governor, and 8 independent compa. nies inthis Majethy's pay, amounting to 800 .

By the laws of the ifland, every man betwcen 16 and 60 is obliged to inlift in their militia.

This and all the Britifh colonies of America, are under the infpection of the Bifhop of London; but learning is here at a low ebb, there being no pablic fehool in the whole inand, Read.

## J A M

ing, writing, and cafting accompts, is all the education defired.

The adminifltration of public affairs in Jamaica is by a governor, who reprefents the King, a council of 12 , which form the upper ho:sfe, and the 43 reirefentatives of the people, which compofe the lower houfe, and are chofen by the parihes. The whole of the emoluments of the governor in time of peace imounts to 5 coll. per annum, the annual fupply required fiom the colony is about 30.0001 . hefieks 8oool the amount of its revenue; and the total of all the taxes, both puislic and parochial, is nerer athove to oool. per ann.
In 1673 Jamaica contaired but 18,063 inh tbiants, 8564 of whom wee whites, and 9 jo + were blacks. In 1768 they reckoned $17,9+9$ whites, and 166,904 hlacks, ilicluding free negroes and mulattoes. At prefent they elimate the number of plantations and inlabitants as follows : 680 figarplantations; 1ro cotton-works; 100 pimento-walks; 30 gingerplantations; 500 breeding-pens; 600 polini: and provifion places; 150 coffice-plantations; and 8 indigo-works: all which take up andemploy 600,000 acres; 18,000 whines; 170.000 blacks; and ${ }^{135}$, coo horfes, mules, and horned cattle. This number of negrees require a recruit of 60 eo every year. Among the whites, who are all enrolled and form the militia, are reckoned 8 or goo Jews, who are here permitted to poffies ellates. The commerce of J maica is very confiderable, as well as univerfal throughout Europe and A merica; and the whole of its annual exports are reckoned by a mean proportion at $1,310,0 c o l$. ferling, white the total of the imports amount to only $\mathrm{I}, 054,0 \mathrm{col}$. The amual flate of the llipping of the ifland is about 500, making 58,000 tons, which enipluy 3000 white failors.

## J A M

James'-Bay, the eaftern part, and the moft foutherin divifion of Hudfou's-Bay, in the northern countries of America. The diftance from Cape Henrietta Maria, in lat. 55, 15. where James'bay begins, to the bottom of the bay, is about 100 leagues, and of much the fame breadth all the way, being between 50 and 60 leagues ove:. In James'-bay are Bear-inand, Viner's-i@and, Charl-tou-illand, Cape Hope-ifland, \&c.

James-County, a diftrift of Virginia. It lies to the eaftward of Charles-county, and extends on both fides the river of the fame name. The number of acres it contains amount to 1c8,362, and is divided into 5 parilhes; namely, Wallingford, Wilmington, James-town, Merchants Hundred on the norih fide of the river, and Bruton on the fouth fide.

James-Island. See NorthMain.

James-River, Virginia; it has its rife within 40 miles of the Kanhawa, a branch of the Ohio, and extends as far as Augufta. It has feveral falls, notwithitanding it has a good inland navigation, extends to New Virginia, and empties ittielf intoCheatiapeak-bay.

James-Town, formerly the eapital of James - county, is fituated on a peninfula upon the north ficle of James or Ponhatan river, forty-two miles above its mouth. The buildings in this flace are neither many nor contiguous, their number at prefent not exceeding 70, and thofe principally inhabited hy fea-faring people; the feat of the government and the Courts of Jultice being removed to W'illiamiburg, 8 miles to the north of it, which is a dry and heallly fituation; whereas the water near James-town being brackifh, produced flow and intermitting fevers. It lies in lat, 37, 36. long. 76, 5x.

## J E R

St. James, Greatand lite tic, two of the fmaller Virgin 1fles, fituated in the King's Channel, E. of Tortula, and W. of S. Thomas, between which and them is St. James's-paffage.
Jeky l-Sound, a fmall bay of St. Simon's illand, in the mouth of the river Alatamha, it Georgia. Here 10 or 12 hips of 40 guns may fafely ride, and for its defence a ftrong caftle and battery were crected by General Oglethorpe.
Jersey, New, one of the provinces of America. It was at its fift feulement, in 1682, divided into two provinces, namely, Eatt and Welt-Jeriey; but in Q. Ann's reign were united into onie. It is bounded on the N . by New-York ; li. and S.E. By the Allantic Ocean; W. and S. W. by the Delaware tiver and bay. Lat betw. 39 \& 42. Iong. betw. 74 \& 76. from London, 160 miles long, 60 broad. It now forms one royal government, the king appointing a governor and council, and the freerren chufing the members of the affembly or reprefentative body of the commons. Sometimes the governor of New-York is alfo governor of New-Jerfey, but by diftinet commifions.
The climate of New-Jericy. in general, is fomewhat warmer than that of New-England or NewYork, by reafon of its more foutherly fituation. The produce of boih the Jerfeys is all for:s of grain, with horfes, black-cattle, hogs, furs, fkins, and pipe-flaves. They ufed to export bread, corn, flour, beef, pork, and filh, alfo hemp, fome butter, hans, beer, flax-teed, bar-iron, and lumber, to the Wef-Indies; for which they receive rum, fugar, \&c. in return. They alfo, before the prefent unhappy difturbances, exported furs, Ikins, tobacco, pitch, tar, and other productions to Old England; which they bartered for furniture, cloathing, \&s, The New-

Lite Virgin ShanN. of 1 and

Jerfey fhips alfo often took whales, the oyl and bones of which they fent to England. As the towns generally lie up in the country, the trade was chiefly over land to New-York. There are from 100 to 150 , or 200 familles in one place, great part of which are Dutch. There are in this colony two copper mines, the ore of one, which is on the Paflaick river, foll for 701 . Aterl. perton; and the ore of the other, which is on the upper part of the Raritan, in 1754 , fold for 62l. fterling, per ton.

Jersey, East, the largeft and molt populous of the two, exrends eaft and north for 100 miles all atong thefe coalts, and Hudion's-river, from litule Eggharbour, to that part of Hudion's river which is in lat. 41. and is divided on the $S$. and $W$. from Weft-jerfey. by a line of partiIion paffing from Egg-harbour to "refwick-river, Stony-brook, and
buth branch of Raritan-river. in readth is very unequal, being in fome places much indented by Weft-Jerfey. 'Tis, however, the mott valuable part of the country, and is fubdivided into Monmouth county on the fouth of Raritanriver, Middlefex and Effex counties on the north of it, and Bergen county on Hudfon's-river. ho this divifion are the following counties: Middlefex ; - Monmouth; - Eflex ; - Somerfet; Bergen.

Jersey, West, is not fo well planted as Eaft-Jerley; yet by reafon of its navigable creeks lying at a convenient tiftance, and fome of them running up a good way inland, this province is rendered very commodious for trade. Dr. Cox, wilh propricty, caufed feven coumies to be laid out; but his fucceffors dropped the project, and, till lately, no part of this province had the name of a county, except that called CapeMay county, being a aract betwixt Cape-May, its mofl callerly point

## J ER

of land, at the mouth of Dela. ware-bay, and Little Egg-harbour, dividing the two Jerfeys, On this neck of land are feveral traggling houfes, the principal is Cox'suluall. The falls on Pas faic river deferves particular mens tion. From a confiderable width the clannel becomes contracted to that of about 40 yards, and the current runs with great rapidity till it is crofled by a deep chafin or cleft: here it falls in one eatire fheet, 70 feet perpendicularly ; and one end of the cleft being clofed up, the water rulhes out at the other with incredible vehemence, in an acute angle, to its former direction and breadth. Thirty yards above this is another fall, over rocky ledges, each 2 or 3 feet perpendicular. Moft of the inhabitants are fifhermen, there being a whalery on both mores of the mouth of Delaware-bay, which, together with the river of the fame name, waters all the S. E. the S. and S. W. parts of Weft-Jerfey; and the plantations, fome of which are fo clofe that they are called a town, lie all alony on that hay and river; and molt of then on creeks. Mat-rice-river, betwixt Cape-May and Cohanzy-river, is the largef in all the country; and the latter, tho' oniy a fmall river, is deep and navigable for fmall craft. Ten or 12 miles up the river is a town of the fane name, containing about 80 families. In this divifion are the following counties: Burlington; - Gilocefter; - Salem; -Cumberland;-Cape-May; Hunterdon; - Morris; - Suffex.

There is no eftablimed religion in this province; but here are 22 charches, 57 Englifh and Scotch Prebyterian meeting-houfes, 22 Duich, 39 Qilakers, 22 Baptills, 7 Lutheran, 1 Moravian, 1 Separatilts, and 1 Rogereens mee:-ing-houfe. There are 130,000 inhabitants, including negroes. . .

## I N V

Iflinois, a nation of Canada, dwelling near the lake and river fo named. The latter iffites from lake Dauphine, and after a courfe of above 2 co leagues falls into the great river Miflifippi.

Ileanois Lake, a large collection of warers, lying between latitude 41 , and 46 , and between long. 89 , and 94 . It communicaies, by means of a narrow channel, with Huron lake.

Inagua, Great and IItthe, two iflands in the Windward Paflage, the N. W. end of St. Domingo, and well known among navigators.

Indiank, the rame of a fmall harbour in the ifland of Cape Breton.

Inverness, New, a fettlement of Georgia, fa called from its having been principally peopled by Highlanders, and fervants collected from the town and thire of the fame name in the nor $h$ of Scotland, and cartied from thence by Cap!ain William Mackintolh, in the ytar 1733, by order of the Georgia truflees, and under the command of Copt. Gecrge Dunhar. It lies in the S. part of the prosince, on the river Alatamha, about zo miles from Frederica.

Jонn's, St. an ifland in the Gulf, at the entrance of the river of St. Laurence. It has NovaScotia on the S. and W. and Cape Breton on the E. It is fituated in long. 63. lat. 46, 30. and is computed to be about 100 miles long from $E$. to W. and about 26 broad from N. to S. It has feveral commodious harbours for carrying on the filhery, and abounds with a variety of ufeful timber, and moft kinds of game common to the neighbouring country. This ifland was fo well improved, when in the poffecfion of the French, that it was juftly called the granary of Canad, which it furnined with plenty of $\cos n$, beef, pork \&c. and when taken by the Englith had up-

## IRO

wards of 10,000 head of black cattic, and fonie of the farmers raifel 12,000 bufhels of corn annually. It has fercrâl rivers, which abound with falmon, trour, eels, \&c and the furrounding fea affords plenty of fturgeon, plaice, and mont kinds of Thell-filh. I he ifland is divided into three counties, viz. King's, Quecu's, and Prince's counties, which are fubdivided into 14 parifhes, confifling of 67 townhips, which in all make 1, 363,400 acres, the contents of the ifland. The principal towns are, Gicorgetown, Charlottc-town, and I'rin-ces-town; befides which are Hillf-borough-town, Pownall-town, Maryborough-town, \&c.

Jonas's Sound, the moft northern inlet on the weftern coalt of Sir 'Thomas smilh's bay, lying near the anctic circie, in tar. 76.

Ipswich, New, a town of Fffex county, the moft northerly part of the colony of Mallachu-fets-hay. It lies on the rorihfide of Cape Anne, on the banks of a fine river.

Iroquois, the mort confiderable and beft known of all the Indiars, as well as the frongett and molt powerfut.

Their country lies between lat. 41 , and 44, and extends 70 or 80 leagues from E. to W. From the fource of the river of the Iroquois, to that of Richelien and Sorel ; from the lake of St. Sacrement to the Fall of Niagara; and upwards of 40 leagues from N. to S. namely, from the fpringhead of the river Agnicrs to the Chio, winch, logether with Penfylvania, forms the fouthirn boundaty. It is terminated on the W. by lake Ontario, on the S. W. by lake Erie, on the N. by lake George and the river St. Laurence, and by New-Ycrk on the N. E.
'rhey are divided into feveral contons, the five principal of which are, the 'rfonantovans, 60 -

## J O S

yogoans, Ounotagues, Ounogoats, and Agnicz.

Thefe five nations have each a large village, confifting of mean huts, about 30 leagues from one another, moltly feated along the fouthern coalt of lake Ontario.

St. John, orJuande Porтo Rico, the capital of the illand of Porto Rico, in the Weft-Indies.-Wee Porto Rico.

St. Jонn's, the capital of the illand of Antigua, in the WeftIndies. It is a regular built town, on the W. Thore, with a good harbour of the fame name, whofe entrance is defended by fort James. It is the refidence of the Gover-nor-General of the Caribhec Leeward Illands, and where the affembly of this inand is held, and the port where the greatef trade is carried on, It was fo fourithing as to receive a lofs by a florm to the value of $400,0 c 01$. fterling in 1772.

ST. John's, one of the Virgin Inands, about 12 leasues E. of Purto Rico. It is about 5 miles long, and i broad, fituated about 2 leagues S . of St . Thomas. This is the beft watered of all the Virgin Ines, and its harbour the reputation of being better than that of St. Thomas, but pafles for the beft to the leeward of Antitigua : the Englih give it the name of Crawl-Bay. Notwith ftanding thefe advantages, there is fo little good land in the inind, that its planting and exportations form only a very trifing object.

JOHNSTON, an inland county, in the difrict of Halifax, NorthCarolina.

Jones's-Town, in Lancafter county, Penfylvania, fituated onthe Great Swatavro creek that runs into the Sufquehannah, 9 miles $W$. of Tufpehocken-town, 5 miles N . of Lebanon, and 21 miles E. of Efther-town.

Joseph, St. 2 port on the W. Gide of the inand of Trinidad, on the coall of Terra Firma, and

## J U C

near the mouth of Orinoco river It has a garrifon and governor. but the inhabitants are few, and trade but trifling. It lies in lat. $10,3^{8}$. long. 60,27 , and is fub ject to Spain.

Jucatan,orYucatan,one of the 7 provinces of the audience of Mexico. It is a peninfula, furrounded on the W. and N. by the gulph of Mexico, between the bay of Campeachy on the S.W. and that of Honduras on the S. E. having the little province of Tabafio on the S. W. and that of Vera-Paz in the audience of Guatimala on the $S$. where it is joined to the continent by an ifthmas not 45 leagues broal. This, in all refpects, is a very noble country: it extends from lat. 17 to 21,30 . and from long. 9 to 950

This climate is very warmin fummer, which begins about $A$ pril, and ends in Septentrer. It rarely rains here during the winter feafon, though the weather is to lerably coot, except in January and February, which are almolt as hot as in the middle of fursmer. It is, however, a very healthy country, efpecialiy a large mountainous tract, extending from Salamanca on the W. to the eaftern boundary, where is Cape Citoche, and where the natives live to a valt age. The fouth fide of this ridge is ill'peopled, and worle caltivated, for want of water; but the noth part is very popit lous, being rendered pieafint ty gentle breezes; though the fur is very hot. The days and nights are nearly equal all the year. The foil, when properly cultivated, produces great ynantities of corn, cotton, and indigo. All forts of cattle, wild beafts, lioney, wax, and fowl, are here in great plen$t y$; and on the coaft are found large pieces of amber: but as no mines were ever difeovered in this country, the Eraniards are not fond of making tettlements bere; fo that ir abounts monly wintion

## K E N

dians, fubj. of to the Spaniards, who employ them in making falt in the bay of Campeachy, where they are forced to enciure all the extremitis of the weather, without fo much as a hut to flelter then: they likewife keep their catele, and do cveryonher fervile office for them. This peninfula has very few rivers, but wells without number; and wherefoever they dig up the land, abiundance of fiblls are found, which, with the lownefs of the country, and fhallownefs of the fea about it, has induced many to think that the greacelt part of it was once under waler.

The capital of Yucrean is Campeachy; in the bay of which, and of Honduras, the former lying on the W, and the later on the E. fide of this province, the Englifh cut their logwood. See Ciampashy and Honduras.

## K.

KAP PAS, a favage tribe of Illinois Indians, in Louifiana: they lie a little alove the Sothouis. This nation was formerly very numerous, before the difcovery of the Miffifippi. There is not, perhaps, in all Louifiana, a country more proper for producing all forts of grain ; and it abounds in pafture ficr cattle.

Kenderhook, atown in NewYork, 1 mile E. of Hudion's river, 4 N. E. of Lunenburg, 10 N. of Livingtton, and 35 from Kingfon.

Kenebegriver, the boundary between Lincoln and York counties, in New-Hamphire, NewEngland. This river begins in lat. 45, 20. long. 69, 50. where is a carrying-place to the rive: Chandiere, which enabled Arnold to approach St. Laurence river. It runs nearly $\mathrm{N}_{\mathrm{o}}$ and S . over feveral falls. It has a communication by a carrying-place to the ri.ver Penobfcot, On it is built

## K I N

Fort Halifax, and Fort Wefern, where is a fall, and the head of the Tyde-Water, and where lloup3 of 90 tons burtben can arrive, being 30 miles diltant from Merrymeering hay.

Kent, a town in Litelificht conury, Conncetcut, 9 miles N . of Woodbury, and 7 S . of Cornwall.

Kent, a county in the E. divifion of Maryland, and an illaud of the fame name in Cheafapeak bay.

Kent Island, an ifland iz miles long from N. to S. and 6 from E.to W. in Cheafapeak bay, Maryland.

Kicapous, a favage people of Canada, who, with the Mafiontins, inhabir a very fine country, efpeciaily that which extends itielt $S$. to the Illinois river.

King's, or Pearlisland, a finall ifland in the bay of Panama: it belongs to Spain, and is fanous for its pearl fifhery, and lies in lat. 7, 12. long. $8_{1,} 3^{6}$.

Kileistinons, a people of Canada, otherwife called Criltinavx, or Cieeks.

Kfng's-County, in NewYork, lies oppofite to New-York, on the N. fide of J.ong ifland. The inhabitauts are all Dutch, and, having a good foil near ous markets, are generally in eafy circumftances. The county which is very fmall, is ferrile in every part, and contains feveral pleafant villages.

Kingston, 2 pretty well built and populous town, in the province of New-York, fituated on the banks of Hudfon's or Iroquois-river, about 90 miles from its molth. It is inhabited by Englifh and Dutch, but the houfts are ftraggling, except ahout 100 that are pretty compact ; and thefe, indeed, are the chief part of the town. The river CEfopus, from New-Jerfey, falls into Hudfon's-river, near the tonn, by means of which

## K I N

there is a good communication between the two provinces.

Kingiton, atown of Jamaica, one of the Antilles llands, in the Wefl-Indies. It ftands on the N. fide of Port-Royal bay, in the county of Surry, and is now the capital of the iflind; at leaft the place where molt of the Mipping of Jamaica load and unload: is is at prefent a feparate parifh of itfelf, but formerly belonged to that of St. Andrew's : it is about five miles from Port Royal by water, between which is Fort Paflage, a village of 15 houfes, but not lefs than 15 by land, and withal a very bad road to ic. All the way round by land from Spanifh Town, on the N. W. it is 19 miles, and only 12 another way; namely, $\sigma$ by water, and 6 more by land. It is reated at the bottom of a deep bay on the $S$ coalt, where hips of 200 tons come up to the key.

This town was built in 1692, from a plan of colonel Lilly's, after the great earthquake which deftroyed Port-Royal. It has the harbour of the latter place on the S. W. and Sir William Beefton's lands on the W. and N. This is a pretty town, containing 1665 houfes, well fituated, and daily jncreafing. It is laid out intolittle fquares, with wide regular Areets and crofs ftreets at right angles; being a mile and half long, and half a mile broad. It is the refidence of the moft confiderable merchants, whofe hlips load and unload here : and its inhabitants are 11,000 , among whom are 5000 whites, and 120 ? free negroes and mulatioes: this renders it a place of valt trade; and there are never lefs than 200 veffels in the bay before it, infomuch that it almolt vies with Port Royal. The harbour is fpacious, is capable of admitting 1000 fhips at a time; and the fips lie land locked; but the peninfula which covers them from the fea heing low and narrow, they are not alto-

## LAB

gether fafe from Itorins. It mufters to companies of foot, and 2 troops of horfe, being in all about 11 hundred men. Here is one church, a Jewifh fynagogue, and a quaker's meetinghoule. It fonds three reprefentatives to the aflembly. Here are held the quarter feffions, befides a court of common-pleas every two months; and a receiver-general, naval officer, fecretary, and furveyor of the ifland, are obliged to keep offices here. Upon an average of 20 years, the fhips that go out annually from this port amount to 400. Lat. 17,40. long, 75, 52.

Kingstown, the capital of the ifland of St . Vincent, one of the Caribbee Iflands, which ftands on a bay of the fame name at the S. W. end of the ifland. It is the refidence of the governor, and the place where the aflembly of the inland meet.

Kittery, a town in York county, Malfachufets-Bay. It is fituaied the moft $S$. of the whole county, near Pifkataqua Harbour, between York and Portfmouth.

Konohasset, a maricime town with a harbour, in Suffolk county, Maflachufets - Bay, off which are feveral rocks that bear the fame name. It is fituate: about 5 miles E. of Hingham, and 4 N. of Situate town and harbour.

Kononikut Ifland, in Nar-raganfet-bay, Rhode-lfland, is a long narrow ifland, being above 7 miles from N. to S. and notabove one where broadef.

## L.

LABRADOR, one of the northern countries, called alfo New Britain and Eskimaux. It lies to the S. Wr. of Groenland. It has Hudfon's Straits and part of the Atlantic Ocean on the N. E. and the latter alfo on the E. On the S. E. it is divided from Newfoundland by the ftraits of Belleille; on the

## L A N

S. it has the gulph and river of St . Laurence, with part of Canada ; and on the W. Hudfon's Bay. It extends from lat. 50 to 63 , N. from long. 51 to $79, \mathrm{~W}$. It is almoft of a triangular form, but we have no knowledge of the inland parts of the country, and only an imperfect onenf the coaft. The great poverty and ferocity of the people who live near the feathore, with the exceffive coldnefs of the climate, have deterred Europeans from fettling any colonies here. 'The natives hunt for furs, in which they carry on a traffic with the Europeans. This, with the coalt on Hudfon's Bay, and the neighbouring country, was ceded by France to Great Britain by the treaty of Uirecht, in 1713.

Among all the people known in America, none are fo conformable to the idea conveyed by the word favages as the Efkimaux, who are, in all refpects, a very brutal people. - See Eskimaux.

LABBADOR-LAKES, the name of feveral collections of water in Cape-Breton, which empty themfelves eaftward into the rea, by two channels of unequal breadth, formed by the ifle of Verderonne, or-la Bourlarderie, which is 7 or 8 leagues long.

Lancaster, a county and town in Penfylvania. The county is bounded on the E. by Chefter county, N. E. by Berks county, W. hy Cumberland county, and S. W. by York county. The town is fituated near the great Coneftoge Creek, which runs into the Sufquehannah River; 6 miles S. of Lents, 10 miles E . of the Sufquehannah River, and 60 W . of Philadelphia, and contains above 500 families.
lancaster Bay, a found or inlet on the weftern coalt of Sir Thomas Smith's hay. The furthermolt part lies in lat. 74, 20, N. the molt nertherly is called Alderman Jonas's Sound, and lies in lat. 76. No

## LEO

Lapis Lazuli Rock, 2 fmall rocky illand, almoft covered with the fea, near the coatt of Nova-Scotla. It lies about $3.4^{\text {ths }}$ of a league from the ifle Monano, and hhews the paftage into St. John's river, on the north fide of Fundy-bay, and La Plate.

Lebanon, a town in Lancafter county, Penfylvania, 7 miles N. W. of Heidelbergh, and the fame diflance S. W. of Tulpehocken town, and 6 S. E. of Jones's, and 16 E. of Hummel's town, on a branch of the great $S$ watawro Creek, which runs into the Sufquehannah River.

Leeds, a town in Richmond county, Virginia, on the N. lide of Rappahanock River, 14 miles E. of Port-Royal.

Lefcestre, a town in Worcefter county, Mafiachufets-Bay, 7 miles $W$. from Worcefter, 12 N . of Oxford, and 6 S . of Old Rutland.

Lemaife, fec Maire Strait.
Lents, a town in Lancafter county, Penfylvania, 6 miles $N$. of Lansalter, 7 S . W. of Euphrata, 5 S. E. of Manheim, and 3 miles E. of a branch of the Coneftago Creek, which runs into the Sufquehannah River.

I, zon, a town of the province of Panuco, in Mexico. It has rich mines, and lies 30 leagues N. of Mechoacan, and $55 . \mathrm{N}$. W. of the city of Mexico.

St. Leondecaracas, acity, the capital of the province of the Caracas, fituated on a river, about o leagues S. from the coaft, enclofed by mountains. The valley in which it ftands is a favanna, or meadow, well watered and very healthy, about $\hat{g}$ leagues long and one broad in the middle; whofe only entranee is through a crooked and fteep road. This valley is bordered on the E. by mountains of an immenfe height ; thofe on the W . and S . are not fo high. The city is near a mite long; the houfes handfome and well furnilhed, the itreetsregular, fraight
and right magn

and broad, cutting each other at right angles, and terminating at a magnifient fquare in the center. The number of inhabitazts are about 4 or 5000, moft of them owners of the plantations of cocoas, which 12 or 13,000 negroes cultivate in the ricl vallies, which is the only cultivation they have.
lewis, the principal town of Sulfex, one of the Delawar counties of Penfylvania. It is large and handrome, and fituated on the heautifal bank of a river, the mouth of which forms the harbour. Before Lewis is Cape Hinlopen, or Cape Willam; and 20 miles below that Cape James, the boundary of Penfylvania.

Lewisburg.--See Lou'/bourg.
Lewis, the chief port of Granada, one of the CariblecIllands, in the Wefl-Indies. It ftands in the middle of a large bay on the W. fide of the ifland, with a fandy bottom, where 1000 flips, from 3 to 400 tons, may ride fafe from forms. The harbour is remarkably capaciotis, being fufficient for 100 fail of 1000 tons to moor in. Near the harbour is a large round baton, parted from it by a fand-bank, which, if cut, would the capable of holding a very great number of veffels ; but by reafon of this bank, great fhips are obliged to pafs within 80 paces of one of the two little mountains which are at the mouth of the harbour, and about half a mile afunder. Upon one of the' $e$ a fort has been erected with a half moon in front, and other regular works all of good fone. The fort between the harbour and the bafon is of wood, 25 fect fquare, and encompaffed with a Atrong palifado of entire trees. At the two corners toWards the fea are two little wooden pavilions, in one of which the commander refides. M. Parquet, its firt proprietor, lived in a great wildernefs encompafting the moun-

## I. I M

tain, near the harbour, at the foot of which are magazines buile of l:ricks and timber. The church, which is near the fort, is built of canes laid upen forks, and the infild has the fame mean appearance. In Parguet's time, at every 6th cottage there was a little fentrybox arected, two fories high, to which the inhabitants of every fix habitations retired in the night, to prevent their being furprized by the faviges.
Lexingiron, a fmall town in Middlefex county, in Maflachu-fers-Bay, about 12 miles W. of Charles Town, between which place and Concord, about 4 miles dittant, is the fpot remarkable for the commencement of open hoftilities in the prefent difturbances in that part of the world on April 10, 1775.

Lime, a town in New London county, Connedicut, the coaft of Long lland found, W. of Ncw London, and E. of Saylrook.

Lincoln, a county the moft northern of Malfachufets - Eay, formerly part of the territory of Sagadahok, bounded on the N. by Canada, on the E. by NovaScotia, W. by Cumberland, and S. by the Atlantic. It is laid out into townhips, for which fee the article Main.

Li'scheield, a county in Connecticut, whofe houndary N. is Hamphire in Maffachufets-Bay; on the E. Hartford county; S. Fairfield and Newhaven counties; and, on the W. part of New York.
Litchfield, the capital of the foregoing county, and has Woodbury $8 \frac{1}{2}$ miles S. Kent the fame diflance S. W. and New Canbridge 17 miles S. E.

Livingston, a town on the E. banks of Hulfon's river, New York, 25 miles N. E. from Kingflon, and 5 S. E. from Salifbury.

Lendon, fee Nezu London.
London, a town in the W. divifion of Maryland, 6 S. W. of

## L O N

Annapolis, on the S. bank of the South river.

Long-Island, fometimes called Naffati-ifland, a large inand in the province of New-York. It has Staaten-ifland, and that in which New- York lies, on the N. and N. W. the colony of Connecticut on the N. and the Arlantic occan on the E. and S. It is not above 16 miles in breadih, but 130 in length, fretching itfelf along Fairfield-county, in New-England, near the mouth of Hudfon's river, being furnifhed every where with convenient harbours. A channel of ico miles long, and 12 broad, divides it from the continent. It contains the counties of Suffolk, King's, and Queen's county. The trade which the Englifh drive here is in furs and fkins; tobacco, as good as that of Maryland; horfes, beef, pork, peas, wheat, and all forts of Englifh grain, which here yield a very great increale. Thefe they fend to the fugar colonies, and lave figar, rum, cotton, and indigo, in return. The foil is likewife fo good, that all other fruits and vegetables thrive here, together with flax, hemp, pumpkins, melons, \&e, In the middle of ic is Jamaica or Hamptead plain, 24 miles long, and 4 broad, without a ltick or a ftone on it. It is 20 miles from New-York; Con. necticut oppofite to it; New-Jerfey 30 miles diftant; Philadelphiario; Maryland 130; Rhode-IMand 150 miles; the land fertile enough to fupport an army, without fuccour from elfewhere.

There being an excellent breed of horfes in this ifland, the militia regiment is cavalry; and there were races on the plain twice a year for a filver cup, to which the gentry of New-England and New. Yoik reforted. There are alfo two or three other plains, each about a mile fquare, which are very convenient to the neighbouring towns.

## L O U

Several iflands lie off the coalt, particularly the eaftern; but none of them are inhabited.

They have alfo here a whalefithery, fending the oil and bove to England, in exchange for cloaths and furniture. The other fifheries here are very confideralile.

Lorembec.-Sce Louifourg.
horetro, a fmall village of Chriftian Indians, three leagues N. E. of Quebec, in Canada. It has its name from a chapel built according to the model of the Santa Cafa at Loretto, in Italy; from whence an image of the Holy Virgin has been fent to the converts here, refembling that in the famous lialian fanctuary.

Loretioo, lady of, a place at the diftrict of St. Lenuis, in the ithmus of California; the Indians call it Concho. Here is a finall fort, erected by the miffionaries, confifting of four baftions, and furrounded by a deep ditch.

LOUDON, FORT, a caftic erected in the country of the Cherokees,

Love-cove, a fine opening to the weftward of Whale-cove, in New N. Wales, and the Arctic countries of America, and fuppofed to be the paffage into the South-Sea.

Louis, Fort, a fettlement erected by the French near the mouth of the river Coza, in Fio. rida, about 20 leagues N. F. of the neareft mouth of the Miffifippi, and till the late peace $i: 11763$ the ufual refidence of the principal governor of Louifiana.

Louis, St. the capital town of Guadaloupe, Grand-Terre. It has a fortrefs 3 leagues to the S. E. of the Sale-river, Several confiderable additions have been made to it fince the peace of 1763 , and an additional town planned, to be called Le Bourg, which will be the handfomeft in the colony.

Lovissourg, the capital of the ifland of Cape-Brcton, Its

## L. O U

harbour is one of the fireft in that country, being almoft 4 leagues in circuit, and 6 or 7 fathom water in every part of it.

The anchorage, or mooring, is good, and nips may run a-ground without any danger. Its entranice is not above 300 toifes in breadth, formed by two fmall iflands, and is known 12 leagues off at fea, by Cape Lorembec, fituated near the N. E. fide of it. Here is vaft plenty of cod, and the fifhery may be continued from April to the clofe of December.

It was taken from the French by the Englifh ficet, under Sir Pater Warren, and our American forces, commanded by Sir William Pepperel, in the year 1745, but afterwards reftored to France, by the treaty of Aix-la-Chapelle, in 1748.

It was again taken hy the Eng. lifh, under the command of Admiral Bofcawen and LieutenantGeneral Amherft, on the 27 th of July, 1758, and its fortifications demolifhed.

The town of Louifbourg fands on a point of land on the S. E. fide of the ifland; its freets are regular and broad, confitting for the moft part of ftone hosfes, with a large parade at a little diftance from the citadel; the infide of which is a fine fyuare, near 200 feet every way. On its N. fide, while poif fled by the French, flood the governor's houfe and the church; the other fides were taken up with barracks, bombproof; in which the French fecured their women and children during the fiege. The town is nearhalf an Englifh mile in length, and 2 in circuit.

The harbour is more than half an Englih mile in breadth, from N. W. to S.E. in the narroweft part; and 6 miles in length, from N. E. to S.W. In the N. E. part of the harbour is a fine careening wharf to heave down, and very fceure from all winds. On the

## LOU

oppofite fide are the fifhing ftages, and roon for 2000 boats to cure their filh.

In winter the harbour is total ly impracticable, being entirely frozen up, fo as to be walked over : which feafon begins here at the clofe of November, and lafts till May or June: fometimes the frofts fet in fooner, and are more illtenfe; as particularly in 1745, when by the middle of October a great part of the harbour was already frozen.
'lhe principal, if not the only, trade of Louibourg is the codfilhery, from which valt profits accrued to the inhabitan:s; the plenty of fifh being remarkable, and at the fame time better than any ahout Newfoundland. Their wealth confifted in their ftorehoufes, fome within the fort, and others along the fhore; and in the number of filhing barks. One inhabitant mainta:ned forty or fifty, with 3 or 4 men to each, with a fettled falary, but were obliged to deliver a certain number of llandard filh. So that the cod ftore houfes never failed of being filled againit the time the hips reforted hither with provitions and other goods in exchange for this fifh : veffels alfo from the colonies brought fugar, tobacio, coffee, rum, \&c. and returned loadel with cod : and any furplas, afer Louilbourg was fupplied, found a vent in Canada; the return from which was made in beavers lkins and other fine furs.
l.ouilbourg lies in lat. 45, $55^{\circ}$ long. 59, 50. from the meridian of London.

Louisiana, a country of pretty large extent. It is bounded on the S. by the Gulph of Mexico; on the N. by the river Illinois, and the territories of the Paniaflus, Paoducas, Ofages, Tronorte, Tecagas, Chavanons, and other wild Indians; on the E. by Weft Florida, Georgia, and Caru-

## LOU

lina; and on the W. by New Mexico, and New Spain. It Aretches from N. to S. about 15 deg. namely from lat. 2 ; to 40 ; and fiom E. to W. about 10 or 11 degrees; that is, from long. 86 to 96 or 97 , for the limits are not precifely fixed. M. de Lifle gives it a much greater extent, efpecially on the N. fide, which he joins to Canada : fo Ihat part of it is bounded by New-York, Penfylvania, Virginia, \&c. and on the W. hy the rivers Blavo and Salado.

Notwithffanding the Several attempts of the Spaniards and French to make cetlements in this country, which gencrally mifcarried, it appears that the latter had hardly any tolerable feulements in it tilli;20, except that of Ille Dauphine, on the banks of the Mobile, about So leagues E. of the mouth of the Miffifippi. They indeed increafed their lettlements fince, bothalong fome of the coalts, and the banks of the Mobile and Miffifippi, which are inconfiderable, that of Ille Da:phine and Fort Lewis excepted. In 1769, the French gave up the whole of the country to the Spaniards.

The inhabitants of Louifiana differ in general from thofe of Canada, in being more forightly and active, lefs thoughtfill and morofe; their Chisefs are nore abfolute, and the'r governn ent more polite. Thicy kricw rothing of any infruments made of iron and feel, much leis of fisearms, 'till the consing of the Fiench, all their cutting-tools being very ingenioutly made of flarp flints, and liey ufed them nith cqual dextesity. Their principal ornaments are bracelets, pendants, and col. lars; tome of pearl, but fpoilcd for want of knowing how to bore then.

Severai of the rivers, which overflow at certain feafons, render the country very fleafant and

## L U C

fertile. Nothing is more delightful than the meadows, which are well adapted to agriculture. In fome parts the ground jields three or four crops: for the winter collfifts only in heavy rains, without any nipping frolts.

All the trees known in Europe nourith here, together with a great varicty of others unknown to us; fuch as the tall cedars, which diftil an odoriferous gum ; and the cotton-tree, which is here of a prodigious height.

The whole counsry abounds with variety of game, towl, cattle, and every thing necellary for life.

Louifina abounds with rivers, the rrineypal of which, befides the Miflifippi, are, St. Francis, the river of Oxen, the Bilack river, and the Mobile, which waters one of the finct countries in the world, and forms at its mouth a noble bay.

Lecasas, or banama Isiands, a clufler of iflands in the Atluntic Occan, difcovered hy Colun bus in his long farch after A meric:- - See Ebhoma.

Lucayolstand, one of the Bahama illes, about 70 kagues, F. of the Coan of Florida, and 6 fiom Bahama Ine. It is about 9 leagites long and 2 broad, whofe name has heen given to the whole range. Leng. 78, 5. latitude 27, 27.

LuCAYONFQUE, another of the Bohama lhes in hich lies about 9 leagues further F.. than the former, whofe length is 28 leagues, and breadth 3, and liss North and South.

Lucia, St. liy the French called Sainte Aloufic, from its being difcovercd on St. I.ticia's day; one of the Caribbee Inands, 6 miles S, of Martinico, and 21 N. W. of Barbadocs. It is about 27 miles long, N. and S. and 12 broad. Here are feveral hills, 2 of which being very round and Atecp, are called the Pins-heads of

Am A ncis in red by after of the agues, and 6 about whofe whule tituda

St. Lucy, and were voleanos. At the foot of them are fine valleys. having a goot foil, and well watered. In thefe are tall trees, with the timber of which the planters of Martinico and Barliadoes build their houfes and windmills. Here is alfo plenty of cocan and fultic.

The air is reckoned healthy, the bills not being fo high as to intercept the trade-winds, which always fan it from the E. hy which means the heat of the climate is moderated, and rendered agreable.

In St. Lucia are feveral com. modious hays and harhours, with good anchorage ; paricularly one, called the Litile Careen:ge, one of the principal inducemenis for the French in prefer it to the other Neutral Mlands. This port has feveral united advantages; there is every where depth enough, and the quality of the bottom is excellent. Nature has formed there three care $n$ ning-places, which do not want a key, and require nothing but a capflern to turn the keel ahove-ground. Thirty hips of the line might lie there, theltered from burricanes, without the trouble of being moored. The boats of the country, which have been kept a long time in this harbour, have never been eat by the worms; he vever, they do not exped that this advantage will laft, whatever be the caufe. For the other liarlours, the winds are always good to go out with, and the targett figuadron migh: be in the offing in lefs that a a liowr.

This illand has been poffefled and quitted by the Englifh and French altetnstely, more than once. But at laf the Courts of both mations agreed, about the year 1722, that St. Lucia, together with St. Vincent and loominica, fhoald be evacuated, cill the right to them was amically determined. In 1763 , it was affired to, the French by the treaty of Verfailies. There are alrca-

## MAD

dy 9 parithes in the colony, 8 en the lecwawl, and only $\boldsymbol{s}$ to windward. This preference given to one part of the inatid mare thon another, does not proceed fion the fuperiority of the foll, but from the greater or lefs couveniency in fenling out or receiving thips. A high road made round the iflant, and 2 others, Which crofs it from IE, to W . afford all manner of facilities to carry the commoditiesof the plantations to the barcascerce.

In January, 1700 g , the free in:abitants of the ullad a mounted to 252 F ; the flaves to 102 aio . It hat in cattle $59^{8}$ mules and he:ies, 8819 hoined buafts, and 238 fieep. Its plantations were 1.200 .680 plants of cacao, 2,463880 of coffee, 631 fimares of cotton, and 25 of cines; there were 16 fuger rks going on, and 18 neary compleated. Its produr yielded 112, col. which lig umpavement migit be increafed to 500,0001 . Since Enrope liss acquired poffeffins in the New World, none has been more fivourably treated than the inliabitants of St. Lucia, who enjoy a free trade, and encumbered but with gotroops in the whole in.nd, and pay no tax whatever. It lies in lat. 13, 45. Inng. 6 t .
lumley's Inlet, a gulph of the North-Main, in the dictic countries of Amerisa. It lies on the eaftern coant, and is fituated E. of Whi:ebear-bay.
LyN, a market-lown of Effex county, and $M+$ flachunfet Proper, in New-Fngland. It lies at the bottom of a bay, S. of Marblehead, and near a river, which, at the breaking up of winter, and the melting of the ine and foow, runs into the fed with a very rapid current.

## M.

MAdrfederona, a town and convent of Terra Firma, lituated on the nucr irande

## M A G

The pilgrims in S. America refort in geat numbers to this religious foundation, wnich is there in almoll as great reputation as the Santa Cafl, or Holy Honfe of Loretto, is in Furope; great numhers of miracles being faid to have been wrolight here, by the Holy Virgin, in favour of the Spaninh feers and their filors, who are therefore very liberal in their donations at her flarine. It lies fifty lour miles E. of Cathagena, lat. $10 . d e g . ~ 51 \mathrm{~min}$. long. 76 deg. 15 min.
Magdalfna, a large river, the two principal fources of which are at uo great diftance from the city of $P_{\text {pay }}$, in Terra Firma. Belcazar, by going down this river, found a paffige to the N . fea : and returned to Old Spain, . in order to follicit the tille rif (:overnor of the country which he had difcovercal, conyuered, and peopled. This river, after uniting its waters with the Cance, takes the name of Grande, and falls into the N . fea below the town of Madre ds Popa.

The banks of this great river are well inhabite!, and it has a courfe of above 200 leanue :- Its mouth is much freguented by fmugglers, and convess to Carthagena the productions of NewGranada, viz. gold and grain. A mong many other confiderable places ouits banks are, Malanbito, 'renerife, Talaygua, Moupox, Tamalamejue, \&c.

Magdalen, Cape of, a fromontory in the contre of Canada, where there is an iron-mine, which promifes great advantages, hoth with regard to the goodnefs of the metal, and the plenty of the ore.

Magdalen Isles, in the Gulf of St. Lawrence, long. 61 , 30. lat. 47, 30. They are fituated about 50 miles N . W. of St. 1.awrence's Cape, the N. end of Cape Breton. The principal one is almeft round, aud is 5 milos

## M A I

over each way, and furrounded by rocks.
maguelon, themon wefterly of the three iflands of St. Peter, lying nff Newfoundland. This is notifo high as the other two ; and its foil very insifferent. It is about 3 quarters of a league in length.

Maine, a province of NewEngland, by others made onlya county in the province of Mafia-chufets-Bay, by the name of York Ccunty. It is bounded on the N. E. by Nova Sonta ; on the S. by Maflachufets-Bay; and on the S. W. and N. W. by New Hamphire.
is is divided into the counties of York, Cumberland, and Lincoln, and contains the followi Townhiips:

This and Cornwall being two frontier connties, and chiefly expofed to the Indians, moft ot the towns are defended by regular block-houfes, which are kept in good repair.

Malden.atown in Middlefex county, Matlichufers-Bay, fituated about 5 miles $N$. of CharlesTown, and has a river of the fame name runs by it, which empties itfelf into My(tic river.

Manheim, a town in Lancalter county, Penfylvania, on a branch of a creek which runs into the Sufquehannah river at 10 miles ditance; it is 9 miles N . W. of Lancafter, in W. of Euphrata, and $1_{3}$ S. of Lebanon.

Manitoualim,---See Mantovalin.

Mansfield Island,afmall ifland in the mouth of Hudfon's Bay.

Mansfietd, a townin Windham county, Connecticut, on the river Willimant, which runs into the Thames. It is 5 miles N . of Windham, and 9 S . of Willington, 15 E . of Glatlenbury.

Mantovalin, an ifland in the lake Huron, in Canada. It lies along the nor.hern coaft, is upwards of thirty leagues long, and about four or five broad.

Maracaibo, or Maracaya, a fmall, but rich, city of Venezuela, a province of l'erra Firma, fituated on the weftern banks of the lake of the fame name, about 18 miles from its mouth, and 73 S . W. of the ruins of the city of Coos. It is extremely well built, has feveral Itately houfes, very regular, and

## M A R

allorned with balconies, from which there is a profpedt of the lake, which has the appearanc: of a fea. Here are about 5000 inhiabitants, of which 800 are able to bear arms. It has a Governor fubordinate to the Governor of Terra Firma.. Here is a large parochial church, an hofpital, and four convents. Velfels from 25 to 30 tons are continnally coming hither, with minnfacturos and merchandifes from the places near the lake, which are afterwards put on board Spanifh thips that come hither to buy them. Ships are built at Maracuibo, which trade allover Ainerica, and even into Spain, this place being very commodious for lhip-building. It lies 338 miles $E$. of Rio de la Hacha. Lat. 10, 5 I. Iong. 70, 15.

Maracalbo Lake, or rather Gu!ph, a large collection of waters, on which the town abovementioned is fituated. It is near 60 miles long, and, in fome parts, 90 in breadth, running from $S$. to N . and emptying itfelf into the N. fea ; the entrance of which is well defended by ftrong ferts; but Sir Henry Morgan pafled by them, plandered feveral Spanilh towns on the cnaft, and defteated a fquadron which had been fent to intercept him.

As the tide flows into this lake, its water is fomething brackifh, notwithflanding the many rivers it receives. It abounds with all forts of filh, fome of which are very large. By the navigation of this lake the inhabitants of Ve nezuela carry on a trade with thofe of New-Granada.

Marblegead, a town of Eflex county, and Malfachufer Proper, in New-England. It lies four miles to the S. of Salem, has a finall harbour, but a recky fhore. Here the frcicty for propagation of the Gotpel have a miffonary. It carrits on an extenlive filhery.

## M A R

Margaretta, or Santa Margaritade lascaraccas, an illand of Terra Firma, from which it is parted by a Atrait, 68 miles $W$. of Paria, or New-Andalufia. Columbus difcovered it in his $3^{d}$ voyats. anno 1498. It is about 50 miles long, and 24 broad. The climate is faid in be mhealthy, from the frequent fogs with which the iland is covered.

It prodeces Didinn corn, with the ufual tru'ts of the Torrid zore. The N. parts are high iand, and have a foil proper for fugar-canes, tobacco, \&e. Here are feveral forts of animals. particularly wild hops, with fifh and fowl. It is fubject to Spain, and is remarked for its pear! Gfiery, having produced the fineft ever feen, valued at 25,0001 . Aerling, bought by the king of Spain. The inhabitanis are a mixture of Spaniards and Indians, who are lazy, thievifh, and fuperfitions. This illand is N. of Cubagua, another iflanc. Lat. 11, 46. long. 64, 12.
Marigilante, one of the Cariblee 1flands, in the Atlantic Ocean; fo called from the fhip's name in which Columbus difcovered it, in 1493. It is of an ellipicical figure, 4 leagues and an half from N. to $S$. and 3 from E. to W. It lies near Guadaloupe: from which it is fepareted hy a channel 5 or 6 leagues hroad. It is covered with barren mountuins above half its furface. There are only 2 parihes, the principal at the S . defended by a fort called Batle-terre. It is indificrently waterc. 1 , but produces $8.0,00=\mathrm{Ib}$. of cuffie, a,0,000 cotton, and a million of fugar. Lat. 16, 32. iong. 60, 5 .
maryhas Vineyard, or Dukc's County, an illand near Barnftaple county, Plymouth colony, Now-England, from whence it is diflant only 8 miles s. W. and 76 miles S. of Bofton. Its inhabitants, as well as thofe of

## MAF

Nantacket, another inard, follow the filheries, in which they have great ficcefs. In it are the follouing towns : Sherborn, Chilmark, Tifbnry, and Edgar, the county town. It is one of the counties of Maffachufets-Bay, by He name of Duke's County. It is a very peculiar fpot of ground, heing a triangular piece of meacow ground, hemmed in on the N. W. and N. E. by hilly rocky fides. It fwarms with inhabitants, and is a fettlement of confideration. Lat. 41, 2c. long. 70, 40 -

Martha, St, a province of Terra Firma. It is bounded on the N. by the N. fea; on the E. by Rio te la Hacha; on the S . by New-Granada; and on the W. by the territory of Carthagena. The air is colder here and more purc than in the adjoining countries. The vallies are fertile, and produce maize, with other grains and fruits, efpecially oranges, lemons, pine-apples, grapes, \&sc. alfo a little indigo and cechineal, and fome woods for dying. The mountains, which are known to failors by the name of the Snowy Morntains of St. Martha, produce gold, emeralds, fapphires, chalcedonies, jafper, and curiou 5 marbles. On the coalls, where fmuggling is carried on, arc falt-works, and 2 filheries for pearls. It is abont $3^{n o}$ miles in length, and 200 in breadth, is a mountainous country, and reckoned the highelt land in the world.
Martha, St. a city in the province latt-mentioned, with a harbour on the N . fea, at the month of the Guayra ; about 12. miles N. F. of Curthagena. It is a maritime city, and the refidance of a Governor and Bifhop. The houfes are built with canes, and are very neat. lits harbour is large, convenient, and fafe ; and the environs agreable and fetite. At prefent it contains about $\hat{3} 000$ inhabitants, u ho carry on an exterfive rich trade, and

## M A R

make a preat quantity of cottons, Ituff; \&c. with earihen ware, which is much efteemed. It has a valuable pearl fifhery, wherein a great number of flaves are employed, whore dexterity in procuring t'ie ofters is very extraordinary, inme of whom will remain for a quarter of an hour under water, and will rife with a baket full. Lat. 11, 55. long. 74, 56.
martinico, one of the largeft of the Caribbee, or Windward Inands. It belongs to the French, and is the feat of their Governor-generd of the illands. It is about 60 miles long, and 6 in breadth, and lies 40 leagues to the N. W. of Barbadoes; 22 S . of Guadaloupe. It is croffed by a ridge of lofty mountains, efpecially in the inland parts; from which a number of rivulets flow into the valleys on every fide, beautifying the inand, and rendering it remarkably fruafful. Its bays and harbours are numerous, fife, and commodious; and well fortified. It is divided into 28 parifhes, which contain about the fame number of towns and villages, and two principal towns, Fort Royal and St. Pierre.

The foil is very fruitful, abounding in the fame productions as are common to our iflands in that part of the world. Sugur is the principal commodity, of which great quantities are inade. Indigo, cotton, pimento or all-fpice, ginger: cocao, aloes, plantains, and other fruits common to the Torrid zone, are prodsced here; together with great quantities of colfee, which was firt cultivated in this inand of any in the weftern world. In 1736, there were in the inand 1 1,953,232 coffeetrees; and by fume calculations made concerning the number of inhabitants, as well as the artiticles of culture and trade, the ifund was then in a flate of pro.

## M A. R

fperity much fuperior to what it is at prefent.

The dir at Martinico is hotter than at Guddiloupe : but the hurricanes lets frequent and violent than in thet and fome others of the Caribbee Iflands.

It has no leis than 40 rivers, fome of which are navigable a great way up the country, and never dry; but at times overflow their banks, and fweep away houfes and trees with their current. Belides thefe there are great variet y of Atreams, which, in the rainy feafon, water the dales and favannas. Some of the hiils are cultivated, and others covered with woods, which afford fhetter to will hents, and abundance of ferpents and fnikes. The oobaces growing on the fteep declivities is preferable to that in the valleys.

Refides the diturbances occafioned here by frequent revolts of the native favages, a dreadful earthywake flook it, October 29, 1727, which contimed for 11 hours wi h very little intermiffion; and Shocks were felt for feveral days affer. It was again in Anguft, 1767, in a great meafure deflrojed by another earthyuake, when r 6 co iuhabitants loft their-lives, and a great number of the plantations and huildings were deftroyed. It alfo fuffered very feverely from a hurricane on September 12,1766, and in March 1772, liy an earihquake that deftroyed the French fortifications.

The town of Martinico is the refidence of many mierchants, and is much frequented by thipping, efpecially from Nantes, whofe caryoes are fure of a quick fale here. The harbour is alfo a fafe retreat in the hurricanc feafon; and at the fametimeto windward of all the infands; a circumftance of great advantage to thip; bound to Europe. The charih is only a wooden fructite. $n$ July, 1767 , the illand conesis: $d$ AL 3

## M A R

12.450 whice inhabitants, 1814 tree blacks or malatioes, $; 0.593$ flaves, 443 fugitive negroes, in all 84,817 fouls. The mumber of births in 1767 was a goth part $^{2}$ among the whites, and a $25^{\text {th }}$ among the blacks. The cattle of the colony are compofed of $377^{6}$ hoifes, 4214 mules, 293 afles, 12,736 horned beafts, 975 fwine, an:l 13,544 heep and hogs. For its provillons it has 17,903,596 holes of caflada, $3,509,048$ bananas, 406 fquares and a half of jams and potatoes. The plantations confift of $11,4+4$ fquarcs of land with fugar-canes, $6,638,757$ plants of coffiee, 871,043 of cacao, 1,764,807 of cotton, 59,966 of caflia, and 61 of anatta. The paftures or favannas take up 10,972 fquares of land; there are 11,966 of wood, and 8448 uncultivated or abandoned. The number of plantations for coffee, cotton, cacao, and other objects, is 1515 , there are only 286 where they make fugar. All thefe plantations employ 116 water-mills, 12 wind-mills, and 184 cattlemills. Before the hurricane in 1766, they reckoned 302 of the fimatier habitations, and 15 fugarworks, more than in 1767 . The products of this ifland at prefent are computal at 23 million 1 b . weight of fugar, 3 million lb. of coffee, $600,0 c o l b$. of cotton, and 40,0001 b. of cacaa. Foreigners carry off privately about a 12 th part of the produst of the ifland, and the tett goes to France; for which exportation in $176 E, 143$ veflels were employed. Lat. 14, 33 . long. 60, 54 .

Martin, S's. one of the Cariblee Iminds, fituated in the AtLautic Ocean, between Anguilla on the N. from whence it is fithated a league and a half, and St. Bartholomew on the S. E. 15 miles. It is about 5 leagucs in circumference, wish commotious hays and roads on the N. W. fide. itese ale bcous fa! -n! : , and lates of

## M A R

fult water, which run a great way within the illand; but has no frefh water but what falls from the clouds, and is faved by the inhabitants in cifterns. The falt lakes abound in good filh, particularly turtle ; and the faltwaterpools are frequented hy valt numbers of birds. In the woods are will hogs, turtle-doves, and parrots innumerable. Here are feveral trees producing gums; and plenty of the candle-tree, Splintess of which, when dry and lighted, emit a very fragrant finell. Its tobacco, which is reckoned the beit in all the Cariblece Iflands, is the principal commodity and trade of the inhabitants.

The Spaniards formerly kept a garrifon here in a fort ; but, about the year 1650 , they blew up the fort, burned their houfes, and abandoned the place. Then the Dutch and the French Thared the ifland between them, and they lived very amicably. The French had, however, the beft part of the ifknd; but the fpot where the Spanifh fort flood fell to the Dutch, who erected fine houfes, with large fore-houfes, and purchafed a confuderable number of negroes. But in 1689 , the French were attacked and plundered by Sir Timothy Thornhill; and in July, 1744, driven out by the Englifh, and did not return till after the peace 1763 . They now enjoy about 35,000 acres out of the 55,000 which the whole illand contains. Through this large fpace are feattered about 100 white inhabitants, and 300 blacks; but it is capable of containing 400 white families, and 10,000 flaves. The line of repayation, iying from E. to W. was agreed upon in 1684 ; the two nations figning their treaty on a mountain, which makes itfelf a natural divifion. and has been fince namell, "The Mosuntain of Concond." Their line", in arming a lef! gat to tis Euth,

## MAR

has fufficiently made them amends by the porferfion of the only harbour in the ifland. Theferepul)licans have not, however, profited more from this advantage than the French, fince their divifion cuntains no more than 60 families, and about 200 naves. The two Colonies breed poultry and theep, which they fell to the other inands. They have always cultivated cotton, and lately planted coffee, with fuccefs. Lat. 18, 6. long. 62, 30 .
maryland, oneof the Britifh colonies; it was always reckoned part of Virginia, 'till K. Charles I. made a grant of it to George Calvert, Lord Baltinore, of Ireland; who dying before the patent was made out, his fon finithed it in 1632 . The fettlement of the colony coft a large fum, and was made, at firft, with about 200 perfons, all Koman Catholics, and mon of them of good families: but the proprietary very wiftly introduced a general toleration for all Chriftians: a meafure that grea:ly tended to the flourifhing ftate of the colony.

It is divides, by the northextremity of Chefapeak-Bay, into two parts, calldd the eaftern and weftern fhores; and lies betivetn 1at. $3^{8}$ and 40 . and betueen long. 74 and 78 .

It is dividel in two by the Bay of Chefupeak, into the following counties :
W. Divifion. E. Divifion. Arundel. Baleimore. Calvert. Charles. Prince George. St. Mary's.

Maryland is bounded by PenCylvania on the N. by another part of the fame province, called Delawar, and the Atlantic Ocean, on the E. by the Apalachian mountains on the W. and hy Vir ginia on the S. It is about 140

## M A R

miles long, and nearly the fame in brealth.

The lands next the fea are low, but rife gradually 'tiil they eerminate in the A palachian mountains. Great part of the country was covered with wood, 'till cut and cleared by the planters; but interfperfed with favannas and meadows, watered with feveral fmall freams and springs.

Maryland, like Virginia, has no confiderable toun, and for the fame reafon; namely, the number of its navigable creeks and rivers. Annapolis, however, is the feat of government ; it is fmal!, but beautifully fituated on the river Patuxent : and here is the principal cufton houfe, and about I 50 houfes.

The people of Maryland are of the fanie eftablifhed religion as thofe of Virginia, that of the church of Eggland; but the clergy are here provided for in a mich nore liberal manner.

At prefent the people of Maryland chiefly cultivate tohacco, as they do in Virginia; and the planters live in farms feattered about the country, and have the like conveniency of hips coming up to their very doors, by means of Chefapeak-bay, and its rivers.

Their tubaceo, called Oroonoko, which is Atrorger than that of Virginia, and on that account greatly in demand in the eaftern and northern pars: of Europe, where it is preferred to the fweetfeented tobaceo of James and York rivers, in Virginia, amounts to about 40,000 hoigheads. The ulite inhabitants are about 10,000 , and the negroes upwards of 260,000 .

There is little or no wollen manufacture followed by any of the inhabitants, except what is done in Somerfet county. Their common drink is cyder, which is very good; ant, uhen propely made, not interica to the bell w!ite

## M A S

winc. They bave rum from Barbadoes, wine from Madeira and Fial; alfo beer, malt, and varions forts of wines, from England. Plenty of good grapes grow wild in the woods, but no wine is made from them.

Moft of the Indians live on the eaftern thore. Some of them indeed come over to the other fide in winter, to hunt for deer, in which they greatly delight : and it is very rare that any of them will embrace the life or worhip of the Chriftians. But their number is now inconfiderable, occafioned by the perpetual difcords among themfelves.

The chief bay is Chefapeak, including many creeks.-Numtrous rivers interfect this province, the chief of which are, the Patowmac, Pocomac, Patuxent, Paraplico, Cheptonk, Sufquehannah, Severn, Saffafras, \&c.

Maryland, Penfylvania, and Virginia, enjoy peculiar commercial advantages from their numerous harbours, crecks, and large navigable rivers; but, being deftitute of fortifications, cannot but prove of equal difadvantage in a war, if the enemy be matter of the adjacent feas, who will have it in his power, by thefe means, to carry defolation into the beft fettled parts of the feveral countries; as unhappily may be too foon experienced.

Sr. MARY's, a fmall maritime town in a connty of the fame name, in the Weftern divifion of Maryland, on the E. fide of St. George's river, near St. George's ifland, at the entrance of Patowmac river and Chefipeak bay.

Massachusers-bay, a province, the principal fubdivifion of New-England. It is bounded on the N. by New-Haırphire; on the E. and S. by the Atlantic Ocean and Connecticut; and on the W. by New-York ; producing Indian corn in abundance, though but little other grain. Here is

## M A S

plenty of mutton, beef, pork, fowl, and tifh, with flax and hemp; and the inhabitants are employed in manufactures of linen, woollen, and leather. They build great numbers of hips, having plenty of timber and other materials for that purpofe. They have copper and iron mines, and fome of thelatter are manufactured; hut their fabrics in general, particularly thofe of hats, are difcouraged by the mother-country. They furnifh the fugar-illands with falt provifions, in return for which they take fugar and molafles. They have ftills for making rum, and tome fugar-houfes.

This province is divided into the following counties, to each of which we have annexed the townMips that helong to it.

## M A Y

Befides the above, there belongs to this colony the territory of Sagadok, or York, Lincolin, and Cumberland, (which fee,) with Elizabeth Iflands, viz. Na/hawn, Tinker:, Slokums, Munkejet, Noman's, and Kuttihunt ifles.

The inhabitants of this province are computed at 400,000 , of whom $80,0 c 0$ are capable of bearing arins.

This is by far the moft powerful of the Britilh colonies; to which there has lately been annexed the countics of Cumberland, York, and Lincoln. 'The bulk of the people are of the Independent perfuafion,-See NewEngland.
Massedan, a bay between Acapulco and Aquacara, a port near the Cape of California, where Sir Thomas Cavendifh lay, after pafling the Magellan Straits.

Masterkout, a fmall town in the county of Prince George, in the weftern divifion of Maryland.
matane, a river of Canada, the mouth of which is capable of receiving veffels of 200 tons. All this coalt of the river St. Lawrence, efpecially near Matane, for upwards of 20 leagues, abounds in cod, and niight èmploy above 500 fhalops, or filhing-fmacks, at a time. The fifh is very fine, and fit for exportation to the Straits, Spain, and the Levant. Great numbers of whales have heen feen here floating upon the water, which may be fruck with the harpoon, and prove a very valuable fifhery.

Matthas, St, the weftermolt of the two iflands difcovered by Dampier, on the coalt of NewBritain, and fouthern countries of America. It is about nine or ten leagues in length, mountainous and woody, l.ut interfperfed with feveral favannas, and fome fots which feemed to be cleared.

Mayen'sisland, or John Mayen's Islana, an ifland lying $S$. W. of Spitzbergen, in lat. 71, 23. The fea which walhes its

## M E C

coalt was formerly frequented by. aloundance of whales; but there finh removing further to the $N$. the inand has been forfaken. A very high mountain, beginning near its northern extremity, called Beerenhergen, or Bear-mountain, extends quite acrofs the ifland, and may be feen 30 miles at fea. Here are feveral good bays, and the land is habitable, abounding with filh and deer. But the vaft quantiries of ice floating on all fides, efpecially towards the E. render it abfolutely inacceffible in fring.

Mechoacan, a province in the audience of Mexico. It is hounded on the N. by part of Panuco, and the provinces of Za catecas and Guadalaxara; on the E. by another part of Panuco and Mexico Proper ; on the S. by the latter and the South-Sea, which, together with Xalifico, bounds it alfo on the $W$. and N. W. It extends 70 leagues along the coalt, and fill farther inland.

The climate is extremely good; and the foil remarkably fruitful. In this nrovince are mines of filver, and a few of gold and copper. Among its numerous produtions are the cacao or chocolate nut, the root mechoacan, fcveral odoriferous gums and balfans, farfaparilla, ambergris, vanillas, camfia, \&c.

The natives, now incorporated with the spaniards, learn all kiinds of trades; and are parsicularly curious in making cabinets, and weaving filk: but their greateft art is in naking images of fimall feathers, equal to the mont exquifite painting. The conntry is infened with foxes, fquirrels, lions, wild dogs, and tygers. But it has alfo a numerous breed of excellent horfes for the faddle or harnefs; and produces pleniy of honcy and wax; and the fea and rivers are flored with excellent fifh.

Mechoacan was formerly akingdom, but the Spaniards liave re- at fea. s, and inding e valt on all he E . ible in nee in It is art of of $\mathrm{Za}-$ on the 'anuco the S . h-Sea, Kalifco, V. and leagues farther

## M ER

duced it to a bihopric, in which are about 200 towns of converted natives. The greatelt part of the trade in this province is carried on by land, there being hardly any feaports deferving that name.

Mechoacan, an epifcopal city, and the capital of the province of the fame name, fituated on a large tiver, abounding in fifh, near the weft fide of a lake, about 120 miles W. of Mexico. It is a large place, beautifully decorated with a fine cathedral. and handfome houfes belonging to rich Spaniards, who own the filver mines at Guanaxoato or Guaxafiata.

Mecklenburg, an inland county, in the diftrict of Salifhury, North-Carolina, whofe principal town is Chariotteburgh. It is the moft $S$. limits of the province, as boundary to the Cheraws precinct, S. Carolina.
Medfield, a town in Suffolk county, Malfachufets-Bay, in the midway between Wrentham and Deadham, being 7 miles diffant from each, and about 18 S . W. from Cambridge, near the river Charles.

Medfosid, a town in Middlefex county, Maflachufets-Bay, which ftands near the head of the Myltic river, about 7 miles N . of Cambridge, and 9 S. of Wilmington.
Medway, a town in Middlefex county, Maflichufets - Bay, near the river Charles, on the principal road to Providence, 6 miles N. from Wrentham, and zhout the fame diftance S . from Sherburn.

Mendon, a town in Worcerter county, Maffachufets-Eay, 5 miles E. of Uxbridge, and 4 N. W. from Bellingham.

Merida, the capital of Spanifh Yucatan, a province in the audience of Mexico. It is the Seat of the Governor, and the fee of the himhop, and lies near the nosth fide of the province, be-

## M E X

tween the gulphs of Mexico and Honduras. It is a handfone city, of a fquare form, wilh fraight and spacious flreets, cutting each other at right angles; the houfes are of fone, and their artificial whitenefs is very hurtful to the eyes in this hurning climate. There are alout 30 churches. The greateft part of the inhabitants pars their lives in idlenefs, fupparted by the continual labour of the Indians. It ftands 45 miles fouth of the ocean, and 135 north-ealt of the city of Campeachy. Lat. 21, 38. long. 90, $3^{6 .}$
Merida, atown of Ver:ezucla, a province of Terra-Firma. The foil round his place abounds with fruit of all forts, and there are alfo gold-mines in the neighbourhood. It hes about 54 miles from the lake of Maracaito, and 260 N. E. from St. Fé. The inhabitants carry their fruit and other merclandize to Truxillo.

Merrimfeting-bay, at the fork of Sagadahock and Kenebeg rivers, on which is huilt Richmond fort. It is about 4 miles from point to point, and is about 12 inland from Cafco-bay, in York county, in the province of New-Hamplhire, New - England.
Mesassrppi. See Mififippi.
metaincugnifa, a riact of land which Sir Martin Forbifher, in his third voyage to difcover a north-weft paffage, in 578 , louk poffeftion of in the name of Queen Elizabeth; but has never heen thought worth looking after fince. MExico, called alfo NewSpain, a large province, fubject to the crown of Spain, It forms a powerful empire, and is fubdivided into two parts, Old or South Mexico, and New or North Mexico.
Mexico, Old, is bounded on the W. by New Mexico; on the N. and N. E. by the gulph of Mexico ; on the S.E. by Terra Firma; and on the S. W. by the

## M E X

Pacific Ocean, or South-Sea. It is upwards of 2000 miles in length, and from 71 to 550 in breadth, occafioned, by its indentures, by Several bays on the north coaft, and the gulph of California on the weft.

It is, in general, a mountainous country, chains of high hills running through it from S E. to N. W. lis eaftern fore is a flat plain country, full of morafles, and overflown in the rainy feafon; but fo covered with thickets of bambou, mangroves, and buthes, that the logwood-cutters make their way through it with their hatchets. The barien trees are continually verdant, and thefe that are fructiferous hloffom and bear almoft the whole year round. 'The cochineal infect for dying, of fearlet, is !red here in great quantities. They have pine-apples, pomegranates, oranges, leirons, citrons, figs, and cocna-nuts, in the greateft plenty and perfection.

The prefent ir habitants are native Indians, Spaniards, Creols, Meftizoes, Negrocs, and Muldttoes.

Mexico is governed by a Viceroy from Old Spain, who is def. potic. The forces in this country are not confiderable, nor are there many fortified towns, and even thofe have been taken and plundered by buccaneers of fmall force.

The revenues which the King of Spain draws from this country are prodigious, ariling from the fifth part of gold and filver taken from the mines, the cuftoms, excife, and other impolts, and the rents and fervices by which all lands are holden of the crown.

This is the firl country which the Spaniards ferted on the continent of America; and it l?ill continues their principal colony. It is exceffively hot, lying monly within the Torrid zone, and on the E. coall extremely unhialthy,

## M E X

andencumbered with woods, uhich extend a conficlerable way into the water. The inland couniry is more agrecable, and the air of a better temperament.

The number of horned cattle is, in a manner, Infinice, many of them running wild; and a very confiderable trade is carried on in their hides and tallow; but their fiefh turns to little account in commerce, by reafon of the extreme heat. Swine are 'qually numerous, and their lard is much in requeft, and wied inflad of butter all over the country. Sheep are numerous, but their wool is of no great confideration in their trade, being hairy and fiort. Cotton is here very grod, and in great plenty, of which there are large manufactures, and is the general wear of the inhabitants; the woollens and linens of Europe heing worn only by fersons of come condition. Some frovinces produce filk, but not in fuch abondance or perfection as to form a renarkable part of their export. The go'd and filver of this corntry ergtofs the principal attention of the inhabitans. The con:modities of moft importance in foreign commerce, are cochineal, indign, and cacao; alfo fugar, tobacco, and loguond.
'The trade of Mexico may be confidered as confifting of ihree great branches, hy which it communicases with the whole world: nomely, the trade with Europe, by La Vera Cruz; the trade with the Eaft-Indies, by A capulco; and the commerce of the South-fea, by the fane port.

Old Mexico is divided into thrie diftiets. or governments, called audiences, as having fovereign courts; which, lirugh under the infpection of the Viceroy, decide in all civil or caimimal matters. Thefe ate, 1. Gtiadalaxara, cortaining the provinces of Cinaloa, Culiacan, Chaneplian, Xalifco, Guadalaxara Proper, Za-

## M E X

catecas, and New Bifcay. 2. Mexico, including the provinces of Mechoacan, Mexico Proper, Panuco, Tlaferla, Guaxaca, Tabarco, and Yucatan. 30 Guatimala, which comprehends the frovinces of Chispa, Soconufio, Guatimala Proper, Vera Paz, Hunduras, Nicaragua, Colla Ricca, and Veragua.

Mexico audience is boundel on the N. by New Mexico; on the E. by the North-Sea, or gulph of Mexico; has the South-Sea on the S. and S. W. and on the S. E. fille it joins the provinces of Chiapa and Soconufco, in the goveriment of Guatimala. It lies between lat. 17, 23. wholly in the Torrid zone. Its extent, from the remoteft point of Panuco, on the N. E. to that of Mechoacan, on the S. W. from fea to fea, is 200 leagues; and much the fume from the N. part of Mechoscan, on the N. W. to Chiapa, on the S. E. yet it is hardly 60 leagues from fea to fea acrufs Guaxica; bat this dimenfion is exclufive of the peninfula of Yucatan.

The province called Mexico Proper has Tlafcala on the E. Mechoacan on the W. Panuco on the N. and the Pacific Ocean on the $S$. It is $31 ;$ miles from $S$. to N. and 200 where broadeft, on the coaft ; but narrower towards the $S$.

Mexico, a royal city, archicpifcopal fie, and the capital of the province of the fame name, and of the whole kingdon of Mexico. It flands on an ifland in the middle of a fpacions lake, about 30 leagues in circumference, and is acceflible only by 5 caufeways of a confaderable length. It is of a fytare form, and about 7 miles in circuit ; fome reckon the namber of inhabitants to be about 50 or 60,000 , who are compofed of Spaniards, Mongrels, Indians, Negroes, and Mulattoes; in Mort, men of all the tints that the mixture of white, copper colour, and

## MEX

black, can produce. It is greatly admired for Araight and fecious flreets and fquares, its cool fituation in fuch a bot climate, and its natural flrength. It contains 29 convents, 22 numberics, and a grest number of parith churches, hefides the cathedral. Their enormous riches, and foockiug luxury, can only be paralleleal by the excefs of their fuperitition, and the corruption of their morals.

It is the refidence of the Vice. roy, the feat of the firf audience, and one of the richelt and mont Splendid cities in the world. And though it has no fea-port, nor any communication with the fea by navigable rivers, it enjors a prodigious commerce, and is itfelf the centre of all that is carried on between A nierica and Sul rope on one hand, and betwean America and the Eaft-Indies on the other. The grods from Acapulco to La Vera Cruz, or fiom La Vera Cruz to Acapu!co, tor the ure of the Philippines, and, in a great meafure for the ufe of Peru and I Lima, pafs thro' thisci!y, and cmploy an incredible number of horics and mulcs. Hither all the gold and filver is brought to be coined ; here the King's fifth is depofied; and all that immenfe quantity of plate wrought, which is annually fent into Eturope. The fhops glitter on all fides with gold, filver, and jewels, befides great chefts piled up to the cielings, waiting for an opportunity of being fent to Old Spain, \&sc. The city itfelf is regulatly built, and the houfes handfome, though not lofty. The ornaments of the churches are extravagantly rich, though the tafte of their archirecture is comparitively poor. It is 170 miles $W$. of the gulph of Mexico, and 190 N. from Acapulco. Lat. 20, 15 . long. 103, 12.

Mexico, New, including California, is bounded by unknown lands on the N. by Elo-

## MIA

rida on the E. by Old Mexien on the S. and by the Pacific Ocean on the W. It is a temperate, and in fome parts a fruitful country; shough California is a mountainous, craggy, and barren eract, both in the outer and inner coafts sowards the gulph: and notwithftanding the indefatigable pains of the Jefuit miffionaries, among the natives of this country, for collverting them 10 chriftianity, by fecding them regularly every day, and ufing all the endsaring methods to win them, they feem thill to retain their priftine brutaDity: of which they have given feveral inflances; for after feizing upon a horfe belonging to one of the miffionaries, killing and feafting on him, in a ring round the carcafe, they not long after proceeded to a more thocking extremity, and barbaroully maflacred the fathers Caranco and Tamaral, with many more perfons, fome of whom were natives attached to the miflionarics, who fell into their hands, having totally ruined four other miffionaries, the remaining twelve or thirteen narrowly efcaping the fame fate. The fathers, by their furveys, have found California to be a peninfula, joined to New Mexico on the N. E. near which are pearlfihheries; and thefe feem to be the chief thing valuabl:; tho the paltry natives cannot $b$ : made to labour in queft of that treafure, or any thing elfe. See California.

In Mexico are rich filver mines, the principal of which are thofe of St. Barlic.

Mbamis, a favage nation of Canada, at the bottom of lake Michigan, where they have a villinge at Chicagou, the refidence of the Chicf, or Cacique, who can raife between 4 and 50 oro warriors, and never goes abroad without a guard of 40 foldiers, who keep fentiy day and night round his hut or cabin, while he is there. He feldom appears in person to

## M I C

his fubjes?s, but contents himfelf with figuifying his orders to them by one $n f$ lisoficers.

Mic:lion, ne of the five principal iniot $i$ isiaes of Canarla, Between a funt of the neighbouring continent at Michillimakinac, a Huron fettement, extending itf.lf S. and oppofite. to another, which looks N. is formed a Arait. through which the bake Huron communicates with the lake Michigan.

This is an incommodious place for a fettlement, the cold being exceflive; owing, undouhtedly, to the ufual agitation, by very iempeftuons winds, in the waters of the three lakes among which it lies; the leaft, namely, Michigan, being 300 leagues in circuit, without reckoning the bay Des Puans, 28 leagues more in depth inland, that empties itfelf into it.

The inequality of the tides difturbs yery much the navigation of there lakes; for they are obferved to keep no fort of regularity, and they are pretty ftrong in fome places Near the little ifland of Michillimakinac they rife and fall once in 24 hours, at full and new moon, always running into lake Michigan. It is no lefs certain, that, independently of thefe tides, there is a current which is continually directed from lake Huron into the other; a phenomenon apparently occafioned by fprings, fuch as are frequently to be met with in the open fea.

This current, however, does not hinder the natural courfe of the Michigan, which difcharges its waters into the lake Huron, as well as the Superior lake. The firt of thefe two currents, nameIy, that of lake Huron into lake Michigan, is more perceptible when the wind blows from the oppofite quarter; namely, from the $S$. at which time flakes of ice are feen to be carried from the former into the latter, with as much velocity as a lhip before the

## M I C

 them
## e five

 anada. libourkinac ling itrother, a frait, Huron ke Mi-es place 1 heing edly, to ry tematers of rhich it ichigan, it, with\& Puans, inland,
ides difivigation are ob-regulay frong he little pac they pours, at ays run1. It is endently a current fed from ; a phefioned by wently to fea. does not e of the arges its furon, as e. The s, nameinto take erceptible from the 1y, from res of ice from the with as pefore the
wind. This is known to be exanty the cafe in the flraits of Bahams.
In the channel by which the Superior take throws its waters into the Huron lake there are currents in great numbers under wadter, and fo frong as fumetimes to carry away the filhermens nets: from which it is conjeCीured, that this large lake difcharges a part of its waters into that of Michigan hy means of fubterrancous channels, which it has hollowed for this purpofe, in the fame manner as it is thought tlie Carpian fea conmunicates with the Enxine, and the latter again with the Mediterranean. All this is the more likely, as the Superior lake receives into it at leaft 40 rivers, 30 or 12 of which are as large as the Arait itfelf, and nould not give out fo much waler, by a great deal, as it receives, had it no other outlet than this channel.

The fame thing may be faid of Michigan, which, belides the waters of the great lake, receives alfo into its bofon a valt number of rivers, many of which are very Jarge, and have a long courfe: for, befides the vifible difcharge of its waters into the lake Huron, it muft neceffirily have hollowed allo a fabterraneous paflage for itfelf, as has been faid alrcady of the Superior lake. A difcovery which las been made on this head corroborates the conjecture; nainely, that all the rocks which are found at a certain depth in the trait called the Sault or Fall of St. Mary, are perforated, or parous, like fponge, and many ot them are even hoilow, in the form of grottoes; and this apparently owing to the currents which have been already mentioned.

In failing from Michillimakinae to the river St . Jofeph, at the bottom of lake Michigan, it is found, though the wiad is contrary, that a veflel will go about eight or ten

## M I C

leagues in a day: and this proves that the currents munt increase her velocity. The fame thing has been obferved at entering the bay Des Puals. There is no doult bue the this bay, which has no vifible outlit but on olle fide, difcharges ibself into lake Michigan; and hat the Michigan, which is eire mflanced in the fime mamber as that hay, cenpties its waters into the lake Huron: and the rather as Michien and the hay receive feveral rivers into their bofoms, efpecially the Michigan lake, to which there is an acceffion of a very great number, fome of them not inferior in magnitude to the river Seinc in France. Yet thefe currents are perceivable only in the middle of the channel, by a kind of eddy, or countercurremt, on bohlh fides of their banks, of which an advantage is macke by coaning along near the Thore, as thofe are obliged to do who fill in canoes made of bark.
At firlt they run 5 leagues to the W. in order to gain lake Michigan, and afterwards feering to the $S$. which is the only courfe veffels have to take for 100 leagues (the extent of this lake from N . to S.) till they come to the rives st. Jofeph.

Nothing exceeds the beauty of the country which feparates lake Michigan from lake Huron.
Michilimakinac,afinall inand in the Huron lake of Canada. It lies in lat. 43, 30. Here is only a middlling village, in which, however, a pretty good trade in peltry was carried on till lately, as being the pafs, or the place of rendez vous, for feveral favage nations; but this traffic is removed to Hudfon's-Bay, by the channel of the siver Bourbon.
The fituation of Michillimakinac is very advantageous for the purpofes of commerce. It lies between three great lakes; namely, Michigan, which is 300 leagues in circuit, without faying any N 2

## M I D

thing of the great bay Puans that emptics itfelf into it; lake Huron, which is 350 leagues in circuit, and is in the form of a triangle; and, laftly, the Superior Jake, which is 500. All three are navigable for the largeft barks: and the two firtt are feparated only by a fmall ftrait, in which there is alfo abundant water for the fame veffils to navigate through, withour obffruction, over all lake Erie, as far as Niagara. There is indeed a conmunication between lake Huron and the Superior lake, only by means of a canal of 22 leagues in length, but very much interrupted by cataracts or waterfals: yet fo as not to hinder canoes from coming to unload at Michillimakinac all that they can bring from the Superior lake.See Superior and the other lakes, under their proper names; alfo Canada.

Middeesex, the molt confiderable county in the province of Mallachufets-Bay.

Middiesey County, in New E. Jerfey, which has the provincial town of Perth-Amboy in its diftrict.

Middleton, a tow: in Berks county, Penfylvania, fituated about 3 miles N. from Newman's-town, 7 F. from Tulpehocken, and 12 S. W. from Reading.

Middeleton, a precty good fown of Mommouth, the molt Southern county of Eaft-Jerfey. It confilts of reo families, with cut-plantations of 30,000 ac:er. The fhore near this place, winding like a hook, and being fandy, is denominated Sandyhonk. It lies 26 miles $S$, of P:fcataway.

Mrdoletown, a town in Lancafter county, Penfylvania, on the Great Swatawro creek, 2 miles from the Sufquehannah river, 5 miles $S$, of Hummel'stown, and 10 miles E. of Lifburn.

Middeetow, a town in Hartford county, Connecticut, on the Wi bank of Connecticut siver,

## M I S

14 miles S. of Hartford, and 9 N. of Hadhan.

Milford, a town in Newhaven county, Connecticut, filluted on the W. fide of a creek of its own name, that runs into long-Ifland Sound. It is 4 miles E. from stratford, and 6 W . from Newhaven.

Miliron, a town in Suffolk county, Maffachufers - Bay, fituated on a river of the func name, that runs into Bofton harbour. It is about 7 miles S. of Bofton, 2 from Dorcheffer, and $\sigma$ N. W from Branirce.

Mingan Istands, at the $N$. fide of the mouth of the river St. Laurence, with the ifland of Anticolli S. from whence it is diflamt but so leagues. It is a very fecure harboar for Mips in all weathers, with excellent anchorage and plenty of cod-fing. It is very convenient for the fifhery; has the advantage of a level good roil, and profirable lindian erade; and has its tides rife 10 or 12 feet. They lie in long. 63,25 . lat. 50. 15 .

Misassippi, Meschasippi, or Missisippi. It is bounded on the N. by Cauada; on the E. by the Brisif plantations; on the S. by the gulph of Me:ico ; and on the W. by Louifiana.

Aifo a large river of the fame name with the preceding cuuntry, rifing in Canada, and running io the fouthward, ifll it falls into the gulph of Mexico. It is navigabie, and faid 10 run upwards of 2100 mites, in a very winding courfe; which, as well as the neighbouring countiy, the French poliffed from the ytar 1712 till the peace of 1763 . This river was then fixed on as the bounday $y$ between the Inglifh and Spanilh American dominions, the wavigation of it being left frec to the fubjects of both nations. .

Upon founding the e'tlares into the Millifippi, it wai iound

to have 16 feet water upon the har; after which the Neptune, a fhip juft arrived from France, was im!mediately fent, and the eafily faile! tup the river as far as New Orleans, 24 leagues from the nowuths.
From Fort Creveccur the MifiGppi was entered by tine Sieur Ducan an:l Father Henuepin, who failed up it as far as lat. 46 , where they were fopped by a pret:y high waterfal for the whote breacith of the river, called by them Sault de S. Antoine de Padoule, or St. Anihony of Padua's Leap. The fource of the Miffifippi is Itill unknown; bat it runs almst quite through North America. The lake Alifiniboils is very far from the places where thele two voyagers were ; and it is certain that the French had at that timie no fettlement on the banks of the river which they failed down.
It receives a great number of large rivers in its courfe, as the Uhio (almolt equil to the Danube), the Ouabache (fearely inferior to it), with the great rivers Alibama, Mobite, \&c. fome of which bring down liuch prodigious quantities of mund and flime, that it can hardly clear itfelf in the cuurfe of 20 leagues. It breeds vaft numbers of crocodiles, and other amplibious creatures.. It hath plenty of waterfowl, and the conlery on both fides is preity fertile, and inhabited by a great variety of nations.

It difcharges itfelf by two branches, which form an ifland of a confiderable length. Its mouths lie hetween lat. 29 and $3^{\circ}$, and long. 89 and 90 , being filled with feveral othcr fimail inands.
The country on each fute thefe two mouths is quite uninhabitable, on account of the frequent inundations, as well as barrennefs of the foil, producing nothing but ruhbes ${ }_{2}$ catits $\mathrm{S}_{2}$ and fome kinds

## M I S

of trees, great part of which lie rooted up by the force of the water. But a few leagues higher, to vards the ifland, it is a delightful country, covered with vines and all forts of fruit-trees; the ground producing plenty of Indian corn, pulfe, and other grain, and yielding two crops in the year.

About 60 leagues higher up orr the E. fide, is the river of Yafona, which comes into the Miffifippi 2 or 300 milcs out of the country; and its borders are inhabited by the nations of the Yafones, Tounicas, Kowronas, \&ce. 6o leagues higher is the river and nation of Chongue, with fome others to the E. $3^{\circ}$ leagues higher the Mififippi receives a river which iflues. from a lake ahout 10 miles dif. tant, 20 miles long; and receives 4 large rivers: 1. The Cafqui, or Curites, the mont fouthern of thefe, teing the river of the Cherokces, a mighty nation, among, which are its principal fources. It cones from the 9 . E. and its hexds are anong the mountains Which feparate this country from Carolin:, and is the great road of the traders from thence to the Mifilippi and intermediare places. 40 le gues athove the Chikazas, this river forms four delicate illands, mamely, Tahogale, Kakick, Cochali, and Taly; and thefe have carh a nation inhabiiling them. 2. The river $\mathrm{O}^{-}$ nefpere, which, about 30 leagues. to the N.E. of the lake, divides into 2 branches, of which the moft fouthern is called the Black river; but with very few inhabitants upon either, thefe having been deflroyed or driven away by the Irogunis.. The heads of this river are fituated in that vaft ridge of mountains which run on the back of Carolina, Virginia, and Maryland, through which mountains is a thort paffige to the fources of the great river Poloinask on the E. fide of them.

## M I S

3. The river Ohio, or Hohio, is more to the N . It is a valt river which comes from the back of New-York, Margland, and Virginia. In the hudian language it agilifies a fair tiver, and is navigable for 600 milcs, It runs through the moft pleafant countries in the world, and receives 30 or 12 rivers, befides inimumerable rivulets. Several nations formerly dwelt on this' siver, as whe Chawanoes, or Chcuanons, a great people, who, wilh many others, were totally exirirated by the Iroquois, who nude this river their uftal road, when they entered into a war with the nations either to the S . or W . 4. The moft northerly river, which runs into the faid lake, and which cames, his: tine relt, from the N. E. is the Oualiache, or St. Jercmy's river. 2 g leagues above the Ohio is the great ifland of the Tamaroas, with a nation oppofite to it that goes by its name; and another by that of Catiokia, who dwell on the banks of the Chepuflo. ${ }^{\circ} \mathrm{l}$ leagues higher is the river Checigon, or the river of the Illinonecks, corrupt ly called 1llinois; which nation lived $\mathrm{u}_{\mathrm{F}}$ on this river in about 60 towns, and confifted of 20,000 fighting men, before they were deliroyed by the Iroquois, and driven to the W. of the Mififippi. 'This is a large plealant river, and, about 250 miles above its entrance into the Miflifippi, is divided into two branches; the leffer comes from N . and by E . and its fource is within 4 or 5 miles of the $W$. fide of the great lake of the 11linonecks, or Mcligan. The largeft comes directly from the E. and ilfies from a morafs within two miles of the river Miamiha, which runs into the fume lake. On the S. E. fide is a communication betueten the? tivo rivers, by a land-cartiage of 2 leagues, abere so miles io the S. E. of she lake. "The wurfe of the Clice

## M O B

cagon is above 400 miles, navigable above half-way by fhips; and moll of the relt by loops and barges. ft receives many fmall rivers, and forms 2 or 3 lake: ; one efpecially called Pimeteovi, 20 miles long, and 3 broad, which affords great quantities of good filh. On the S. F. bank of the river Checagou, M. de Sale ereAted a fort, which he called Crevecuur, or Heart-breaker, on accomint of the troubles he met wilh here. The fort flands about half-way betwixt the gulph of Mexico and Canada; and was formcriy the ufual road of the French to and from both, l:it they difcovered a hhorter and eäfier paffage by the rivers Onabache and Ohio, which rife at a fmall diftance from the lake Erie, or fome rivers entering inin it. 8o leagues highier, the Miffifippi receives the Mifconliag, a river refembling that of the lltinonecks in breadh, depth, and courfe; and the country adjacent to its bramehes is alike pleafan: and fruitful. 60 miles before it falls into the Mififippi it is joined by the river Kikapouz, which is alion navigable, and comes a great way from the N. W. 80 miles furiher, almof directly $E$. is a a communication, by land-carriage of two leagues, with the siver Mifconqui, which suns to the N. E. and, after a paffige of 150 miles from the land-arriage, falls into the great bay of . 7 keontanis, or the Puans, which joins on the IV. W. fide to the great lake of the 1 llinonecks. Higher up the Mififippi is the river Chabadeba, above which the Miffifippi forms a fine lake, 20 miles long, and 8 or ro brcad. 10 miles above that lake is the siver Tortoifes, a large fair river, which ruas into the country a good way to the N.E. and is navigable 40 "ills by the largett boats.

of Canata,
and one of thofe confiierable ftreams which fall into the Miffifippi. On its banks is the fettlement of Dauphin lland, about 70 leagues $E$. of the latter river.

Mohaw s , one of the Five Nations of the Iroquois, in alliance with Great Britain. Their country lies between Ntw-York and the lake Ontario.

Of the fame name is alfo a river, which runs through the Mohawks country.

Muna, one of the Antilles Illands, not far from Hifpaniola, and due E from St. Domingo, in the way to Porto Rico; not above 3 leagues in circuit; but is faid to have an excellent climate and foil, bearing oranges, much the largett and fiveft in America, belides other fuit.Here is plenty of good water, and the illand is pretiy populous.

Monatomy, a village in Middlefex county, MaflichufetsBay, 3 miles N. of Watertown, and 4 N . W. of Cambridge.

Monegan island, near the coalt of the county of Lincoln, in the province of New Hamphire, New England. It is fituated between 3 and 4 leagues S. S. E. from Duck harbour, and forms the W. point of Penobfcot bay.

Monmouth, a county of New E. Jeffey, whore chief tow: is Frechold.

Mospex, a large city on the Terra Firma, in the province of Carthagena, in Nest Spain, on the river Magda!ena, which is a place of great trade, and receives the products of New Granaca, by means of that siver, which it conveys to Carthagera.

Montrear, a town of Ca. nada. It thands in an illand of the fame name, in the river St. laurence, and $\sigma 0$ leagies ( $o$ hers fay 100 miles) S. of Ritbec. It is a well peopled place, of an cblong form, the ftreets very ofen, and the houses well brith. ithe

## MON

fortifications are pretty firong, being furrounded by a wall, flanked with in redoubts, which ferve inftead of battions; the ditch is about eight feet deep, and of a proportionable breadth, but dry, encompafing the town, except that part which lies towards the river. It has four gates, one of them very fmall. It has alfo a fort or citadel, the batterics of which command the freets of the town from one end to the other; and over the river St. Peter is a bridge.

The bank of the river St. Lavsrence, on which the town of Montreal is built, rifes infenfibly from the wate's edge to the oppofits part of the town; which is divided into two parts, called the Lower and the Upper Town; tho' the atcent in patfing from the former to the latter is ficarcely per. ceivable. The merchants in geucral refide in the Lower Town; and here is alio the flace of arms, the nunnery hofpital, and royal magazines : but the principal fructures are in the Upper Town; among which are the Recollets convent, the parim-church and free-fshool, the Jefuits church and feninary, the palace of the governor, and the houles of non of the cficers belonging to the garrifon. The Recollets convent is a $f_{f}$ acious finkure, and their communty very numerous. The parih-clurch is lange and wellbuilt, of hewn flone; the freefclicol, which joins to it, very commodious, bet not magnificent. The fefiuits feminary is fimall, but this: church is wetl ornamiented. The governcr's palace is a large building: and the fame misy be faid of feveral others in the town of Mentreal. 'The nun-nery-lioffital is a conmodions flucture, and ferved hy religions Gfers, who originally cane from L.a Fleche, a town of Anjou, in France. Their falon in this building is grata and well-Gitin-

## MON

ed ; and their church is well-built, neat, and convenient.

Without the town, on the other fide of St. Peter's river, are feveral slegant houfes; particularly one belonging to M. de Calliere, and the General Hofpital, called les Freres Charrons, from its being eftablimed by a gentleman of that name, who had affociated with him feveral perfons of piety and learning, for founding fo uffful a charity, and furnishing the country-farifh with fchool-maftes for the inftruction of the Indian children. He had the pleafure of feeing the Ceneral Hofpital eftablifhed before his death, which happened in the year 1719, though his trethren had deferted hin fome time before. The place formerly belonged to the French, but the Entifn took it from them in $1 ; 60$, havirg before made themfelves matters of Quebec. It was taken by the Provincials in 1775 , but rutaken in 1776. Lat. 46, 10. long. 75, 12.

The :lland of Monateal, in which the town of the fame name is built, is about 10 leagies long, and 4 broad, heing very fruitful in corn, and abounding with elegant plantations. It has its name from a mountain of great height, fituated abont the middle of the ifland, which it feems to overlook, like a monarch from his throne, and thence acquired the appellation of the Royal Monr. tain, a name which has been fince giver to the town itfelf, which was originally called Ville Marie.

The river St. Laurence is here about a league in hreadrh, asit its banks interfperfed with trees and fears, containing feveral iflands : fome of which are inhabited, and others in their natural fate, exhibiting to the eye the molt beathtiful profpect. Indeed the banks of the river from Quebec to Montreal are pretty well fettled. The farms lie pretty clofe all the way, and feveral gentlemen's feats lbew

## M O N

themfetves at intervals. The river is not navigatile at Montreal, on account of reveral cataraCts and rocks, which obftruct the paffuge.

Though the lands of Montreal produce Indian corn in aburdance, anci all the vegetables of Europe $\mathrm{H}=$ urifh in it; yet the French bave never been able to eitablifh any Ataple commodity to anfwer their demands on their mother country. Their trade with the Indians produces all tieir returns to that market. The furs of the beaver, with thofe of foxes and racoons, the kins of decr, and all the branches of the peltry, together with what corn and lumber they can fend to the Wefl-Inties, conftitute their whole flock of merchandife. And thefe have been fornd iufficient to render their lives agreeable in this fruitf:l country.
'Titey have wine, hrandy, eloth, linen, and wrought iron from Enrope: and lice Indian tade requires brandy, tobacco, a fort of duffil blankets, guns, powder and ball, kettles, hatchets, tomahawks, :with feveral forts of tops and irinkets. The Indians furply the peltry ; and the Erench have traders, whom they cal! Coureurs de Bois, who, like the original inhabitants, traverfing the valt bakes and rivers, which interfect this counsry, in canoes made of bark, with iricredible patience and indullry, carry their goods into the remoeft parts of America, and difpote of them to nations entirely maknown to us. This in relurn brings the market home to then, as the Indians are by this means encouraged to trade at Montreal ; for which purpofe people from all parts, even thofe who dwell above scoo miles diftant, come to the fair at Montreal, which is annually holden in June; and it fometimes continues for three months together. Many fobemaities arc observed on this ace.

## M O N

cafion ; guards are planted in proper fations, and the governor himfelf affitts in perfon to preferve order among fuch a vaft concourle of favage natlons. Nor are all thefe precautions fufficient, as the favages too often find means of intoxicating themfelves with fpirituous liquors, which produces a teinporary inadnefs, during which they are guilty of the molt enormous exceffes.

Monserrat, one of the Ca-ribbec-INands, and among the finallett of them in the AtlanticOcean. Columbus difcovered it in 1493. It is of an oval form, about 3 leagues long, and 2 in breadth, being 18 or 20 in circuit; and contains about 50,000 acres. It was fettled in 1632 . The firt fetilers were Irifhmen, and the prefent iuhabitanis are their defcendants, or other natives of Ireland fince fettled there, by which means the Irifh lauguage is preferved there, eren among the negroes. The governinent of the illand is compored of a Lieut. Governor, a Council, and an Arfembly of 8 reprefencatives, 2 for each of the 4 diftricts which divide the inand. Its mountains are covered with cedars, \&ce. Its valleys are well watered and frui:ful: but the climate and foil, the latter being light and fandy, tho' haghly fertile, are much the same with thofe of the other illands; as are allo its animals and trade. Its chief produce is indigo, but of a very inferior kind, befides fune fugar, and tite commodities derived from the cane. It is fo furri,unded with rocks, that the ridin!: before it is very precarious aind dangetous on the approach of a tornado, having no haven. It contains about $15 c o$ Europeans, who are mafters of about 12,000 African haves. The exports in 1770 amounted to $30,0 c o l$. to Great - Britain and ircland, and 12,000 to N . America. It has only 3 roads, viz. Plymoulh, Oldharbour, and Ker's-key; where

## M O R

they are obliged to obferve the fame methods as at St. Chriftopher's in loading or anloading the veffels.

On the 2 gth and 30 th of June, 1733, a hurricane happened here, the whole damage of which, exclufive of the fhipping, was reckoned not lefs than 50,000 . currency. It lies 30 miles $S$. W. of Antigna, the fane diftance S.E. from Nevis, and is fulbject to GreatBritain. Latitude ${ }^{17}$, 10. . longitude 62, 100.

Moose River Factory, an Englifh fettlement in New-South-Wales, which has been erceted ever fince 1740. It is built near the mouth of the river Moofe, in lat. 5s, 2S, on a navi. gathle river, which at 12 miles diflance from the fort is divided into 2 branches; the one comes from the fouthward, and the other from the S. W. Upon the fouthern branch thrive all forts of grain, as luarley, beans, and peafe co at the factory, though expofed to the chilling winds from the ice in the bay. Upon the fouthern part above the falls grows naturally along the river a kind of wild oats, and rye like rice. In the woods, at the bottom of the bay at Moofe and Albany, as well as at Rupert's-river, are very large timber-trees of all kinds, oak, 2 h , \&ic. as well as pine, cedar, and fruce. They have exceeding grod grafs for hay; and they ray have eveny where, within land, pulfe, grain, and fruittrees, as in the fame chinnate ia Europe.

The ice breaks up at Moofe factory in the beginuing of March, but higher up about the middle of that month. The river is navigable for canoes a great way up anong the fills. At a confiderable diftance there is one fall of so feet; but above that it is deep aid uavigable a great was. The climate above the fall is very good.

Morris, a county of NewJerfey, bounded on the E, by the

## MOS

Hadfon-river, and on the W. by the Delawar. It is chicfly hilly, nor has any very confiderable town in its limits, but a town of its own name.

Moskito or Musquito, a enuntry of Mexico, between Thuxillo and Hondaras. Lat. 13, 15 . long, 85, 88. It is bounded by the North. Sea on the N. and E. by Nicaragua on the S. and Honduras on the W. This fpace takes in 150 leagues $f$ the fhore, and forms an obtufe angle at Cape Gracias a Dios, having one of its fides expofid to the N. the other to the $E$. The general name of Mokitos is given to all the nations which occupy this extent, as well as the inner fpace between the coant and the higher chain of mountains. The whole of thefe nations topether, are above 30,000 . The Mukitos are the mof numerons and braveft. Their country is one of the mof thealthy and beautifal fpots in the world; and here the Europeans do not fuffer by any of the diforders fo dangerous in the Weft-Indies, and live here to a very old age. The Spaniards, indeed, reckon this a part of the province of Hondnras, though they have no fettlemerts in the Mofkito country.
When the Spaniarls firfl invaded this part of Mexico, they barbzrovily maffacred mot of the natives, u hence proceeds the intuperable averfion of fuch of them as efeaped into the inacceffible mountains agan the Spaniards: and for that reafon they have always readily joined with any Furopeans that come upon their coant in enterprifes againft the $S_{\text {paniards, }}$ part:cularly with the Englifh, who frequently come among thicm.
The Moikito Indians being execlient markfmen. are employed by the Engli,h to frike the mana-tee-fifh; and many of them sail in Englifh vefels to Jamaica.

When the Doke of Absemarle was governor of Jamaica, thefe prople put themelves under the

## M Y R

protection of the crown of Eutgland, and their King received a conmiffion from him. Since which time, when their King dies, the next male heir goes to Jamaica, and receives a commiffion accordingly; but before that he is not acknowledged as fich by his countrymen.
Like all other uncivilized nations they have few wants, and are very indolent : indeed, they never labour but when they are hungry, then they hunt or filh, exercifes in which they are very dexterous. Their country produces woods of feveral kinds for dying and cabinet-work; and from hence we proenre tiger and buck -fkins, but in fmall quantities.
Mioskito island, one of the Smaller Virgin Iflands, in the Weft Indies, fituated near the N . coaft of Virgin Gorda, to whom it is dependent. Long. 63, 15 , lat. 18, 25.
Mount Desart, a litile inland of very high land at the mouth of Penobfcot-Bay, in the county of Lincoln, in NewHamphire, New-England. It is near the eaftern extremity of the province, near Nova-Scotia, in the territory of the Sagadahocks. It is covered on the $S$. fide near the continent with a ffring of little iflands that form a fine fafe harbour ; the entrance of which is on the $E$. where is a middle ground, of which the navigator much be careful. Lat. 68. long. 44, 50. Behind this ifland, which lies near the flore, is a very large opening that forms the bay or mouth of Mount Defart river.

Mountjoy, a manor of Newcaftle country, and Penfylvania, where the firt lime-fore found in America was dag. This whole county is remarkable for its excellent gravel, a thing very rarcly to be inet with on the cuntinent of America,

Myrteeisiand, an ifend in the bay of Naffau, in Florida.See Nalfiau Bay.

## N A T

N.

N
Antucket, an ifland S. E. of the main-land of New-England, 8 c miles S. of Bolton. Near it is one of the mof confiderable filheries in this province, particularly for whales.

This inand is become fo confiderable in its interefls and property, as to formone of the counties of Mallachufets-Bay. It is a hilly, fandy, bare inand, which of itfelf could give fubfiftence to no Crecies $^{2}$ of beings but fifhermen; and is about 14 miles from E. to W. and 4 from N. to $S$.

The town on Nantucket ifle fourilhed in proportion to the traffic the inhabitants carried on, there being 60 or 80 hhips and veffels belonging to its port. Lat. 41, 12. long. 70,10 .

Narraganset, a town and diftrict in Hamplhire county, Maf-fachufets-Bay, 5 miles E. of Sunderland, and 10 W . of Peterham.
Narraganset, ariver which runs into a bay of the fame name near Providence, Rhode-inand.
Nassau bay, or Spirito Sancto, a large bay in Florida. It is about a degree in length from N. to S. containing foar inands, fituated in a linc from S.W. to N. E. for 50 miles, with openings between them a mile or two over. The moft northerly is called Myrtle inand; between which and the continent is the cn trance of the bay. Here are many fprings of excellent water. The bay is I 5 miles broad, from Myrthe infand to a row of inands runsing parallel with the Main-land, and another bay between them fretching 50 or 60 miles to the S. as far as one of the fmaller mouths of the Miffifippi.
Nata, a town in the ifthmus of Darien, a province of Terra Firma, with a harbour in Panama Buy. Here, as in the neighbouring parts, they breed hogs, fowls, catile; they alfo plant maife jur-

## N E G

pofely for fupplying Panama with provifions: it lies 67 miles S . W. of that city. Lat. 9, 12. long. 82, 10.

Naticx, a town in Middefex county, Maflachufets-Bay, on the river Charles, 15 miles S. W. of Cambridge, and 3 miles E.from Sherborn.
Navasta, a fmall ifland in the Windward Paffage, or Arait between Cuba and Hirpaniola, in the W. Indies. Thither the inhabitants of Jamaica come in boats, to kill guanas, an amphibious creature that breeds plentifully at the roots of old trees. They are in the hape of a lizard, with feales, but firmi, white fleh, which, failors fay, makes good broth. Some of them are 3 feet in length.

Navidad, a town of Mechoacan, a province of Mexico, with a harbour on the Pacific Ocean : 156 miles W. of Mexico city, and fubject to Spain. Lat. 18, 51. long. 111, 10.
Nawshawn's infand, one of the Elizabeth Inands at the mouth of Buzzard's. bay, Plymouth Colony, New-England, and is but 3 miles $S$. W. from the peninfula of Barnflaple county, which forms Cape Cod-bay.
Nozareth, a town in Northampton county, Pcnfylvania, $s$ miles N. of Eafton, and 10 N. E. of Bethlchem.

Negada, or Anegaja, one of the Cariblee llands. It is low and defert, being encompaffed with fhoals and fand-banks; and lics 50 miles N. W. of Anguilla. It is called Negada, from its being mofly overflown by high tides. It abounds with a remarkable bird called the collibry, or humming bird. Here are alio painted crabs, that creep down the hills in May, and eat all the herbage, and after going feveral times to wah themfelves, return again. But at a certain feafon the females take to the fea, and there lay their eggs,

## NE V

which, being caft athore and warmed by the fun, prollace young ones, that creep to the woods, and as they grow bigger get up the rocks. They come out of their fhells through an opening at the tail, almoft imperceptible, being only covered with a thin אkin, which at laft becomes as firm as the mells which they have calt. Lat. 18, 6. long. 63 , 5 .

Negril-Point, the moft wefterly cape of Jamaica, Lat. 18, 45 . long. 78.

NEison'sFort, a fettlement on the W. fide of Hudfon's Bay, in Canada, at the mouth of a river of the fame name. It lies 250 miles $S$. F. of Charchill-fort, and $600 \mathrm{~N} . \mathrm{W}$. of Rupert-fort, belonging to Great Britain, and in the proffeffion of the Hudfou'sBay Company. Lat. 57, 12. Iong. 91, 12.

Ne Uetra, or Sir Thomas Roe's Wercome, a narrow Arait between Jat. 62 and 63 . in New North Wales, and the Arctic regions of America.

Nevis, an inand about a league S. from St. Chriftopher's, one of the Caribbees. The inand is about 2 leagues long, and 1 broad, and is only a vaft mountain rifirg to a great height. At the foot of it the foil is very fine and fruitful, and takes up in fome places near half a league in breadth, but decreafes in goodnefs as well as extent, as one approaches the top. Nevis was formerly nore flourithing than at grefent, and hefore the Revolution contanced 30,000 inhabitants: the invafion of the French abotit that time, and fome epidernical diforders, have ftrangely diminithed the number, fince they anly reckon at prefent 2 or 3000 whites, and 6 or 7000 negroes. The productions are nearly the fame as at St. Chrifopher's, and they furpafs thofe in that illand in activity and induftry, as well as in the neatnefs of their houfes, for which they are diftin-

## N E W

guimed in the Weft-Indies. They have three toleratile roads or bays on which are fituated as many towns, viz. Newcaftle, Littleborough or Moreton-Bay, and Charles Town, the capital of the inland. The inand is divided into 3 parifhes, and its trade annually employs about 20 vefkels. The exportation to Great Britain, in 1770 , in cotton and fugar, amounted to near 44,000 I. to NorthAmerica, where they fent molaffes, rum, and lemons, excecded 34,0001. Lat. 61, 55. long. 17,15 .

New Albany, called alio Orange-Fort, in the province of New-York. Here is a ftrong fone fort-See Albany.

New Albion, the name given by Sir Francis Drake to California, in New Mexico, when he took pofleffion of it, anno 1578, in Qucen Elizabeth's name, the King of the country adually invefting him with its fovercignty. -See California, and Mixico, N゙ew.

Newark, a town of Eflex county in New Jelfey. It is the moft compact place in loth the Jerfeys, confifting of about 180 families, with 50,000 acres laid out for cultivation; about 6 or 7 miles N. of Flizabeth, 7 miles $N$. of Staten ifland, and in W. from New-York.

Nfabern, a town in the county of Craven, in North-Carolina, fituated on the E. fide of the river Nufe, which at ahout 30 miles diflance eniptics iffelf irto the Pamtico Sound. It is a vory thriving place, las the refidence of a Governor, and is not âbove 20 miles E. from Fort-Barnuell, on the fame river, and nearly the fame diflance from Bathoull.

New Biscay, a piovince of Guadalaxara audience, in old Mexico, or New Spain. It is bounded by New Mexion, on the N. by part of Florida and Panuco on the k. by Zacatecas on the $s$. and by Caliacan on the $\mathbf{W}^{\text {. }}$ It is

## N E W

ahout 100 lengues from E. to W. and 120 from N. to S. Firom its being well watered, it is fruitful ; and being ficuated a little above the Tropic of Cancer, its climate is temperate. Though part of it is a mountainous, barren fpot, moft of the country abounds with all forti of provifions; and tho' this province is inland, the inhahitants are very rich, not only in corn, cattle, \&c. but alfo in filvermines, and fome of lead. The natives are not yet totally reduced : fo that between the mines of Lacatecas and thofe of this country, they have four large towns filuated in morall:s.
New Brunsw:ck, a town in the county of Brunficick, in New E. Jerfey, fituated on the Karitan river.
New Brunswick, in NewYork, on a $W$, branch of Huilfon's river, 20 miles N . of New. Windfor, and the fame diftance S. of Kingfton.

New Britain, comprehending Labrador, New North and South Wales, \&c. Bounded on the N . by frozen feas and parts unknown. E. Allantic Ocean. S. Canada. W. parts unexplored.

No precife divifions have yet been made in the country forming this great portion of North America ; but it confites, indefinitcly, of New Britain and New South W.des on the S. New Dennark, New North Wales, and Prince Willia:n's Land, on the W. and of unknown artic parts on the Nursh; on the E. lie New or Wetl Greenland, belonging to Denserark, and part of the Atlantic Ocean : the whole inclofing the two vuft bays called Hudion's and Baffin's, with the atiacent fraits, iflands, \&ec. \&c. On the Lands bordering on Hudfon's-Bay, the company fo called (confiring of about io perfons) tave feveral forts and fmall fetlements for the purpofe of defending and carrying on their fur and peliry trade with

## N E W

the Indians, and their filhery; the chief are thofe on the rivers Churchill, Nelfon, Albany, and Moofe. The forts on New Severn and R11pert rivers are deflroyed. The boundary of the Hudfon's-Bay country runs from a certain promontory on the Atlantic Ocean in $58^{\circ} \mathrm{N}$ lat. S. W. to the lakes Miftaffin and $A$ bitibis, then S.W. to lat. $49^{\circ} \mathrm{N}$. and thence due W . indefinitely.
The principal rivers are St. John's, Efkimaux, Monfe, Albany, New Severn, St. Therefas or Hages, Nelion, and Churchill.
A mong others are the following capes : Chudley, Churchill, Dobbs, Hope, and Elizaheth's; with the great bay of fikimaux, Hudfon's (including James's, Button's, Piftol, Wager, Rupert's or Repulfe, the whole length about 530 leagues, breadth from 35 to 1;o), Balfin's - bay, Miftakenbay (in the line of Good Fortune) ; and the ftraits of PelleIne, Hudfon's (between Labrador and the Ille of Good Fortune), Sir Thomas Roe's Welcome, Davis's (hetween James's Ifland and Weft Greenland), Baffin's, and Cumberland.

The fummer begins not till July, and ends in September ; and, as fping and autumn may be faid not to be known here, the reft of the year is winter, which reigns with uncontronled rigour. - The foil is rocky, producing litcle more than fpruce and pine-trees.
The animals are moofe and rein-deer, bears, wolves, foxes, porcupines, mountain-cats, lynxes, martins, beavers, otters, laares, ermines, eagles, hawks, horno wls, fquirrels; all kinds of wild fowl, geefe, ducks, buftards, and partridges. In winter all the birds, beafts, \&c. of theie countries become white as the flow which then every where furrounds them ; and, on the return of fummer, they refume the different co. lours common to them in other

## NE W

parts of the world : nay, what may be thought more afoniming, the dogs and cats carried to Hud-Son's-Bay from England experience the fame changes, and their hair becomes mush longer, fofter, and thicher. In the feas are whales, feals, morfes, cod-fin, and a white firh pielerable to a herring ; in the rivers, falmon, pike, carp, trout, \&c.

Newsuny, a fmall town of Eflex, the northern county of Maffachufets-Bay, pleatiantly dituated at the mouth of the river Merrimack, where abundance of flargeons are caught and pichled. The fociety for propagating the Gofpel have a miffionary here. It lies 34 miles N . of Bulton.

New Cambridge, a town in Hartford county, Conneclicut, on - branch of Conneaticut river, 15 miles S. W. of Hertiord, and the fame diflance N . W. of Middlecown.

Newcastle, a county and town on the river Delawar, in Penfylvania, 30 miles S. W. of Philadelphia. It contains between Gve and fix hundred houfes, well built, and filled with inhabitants, being the fecond place far thate in the frovince; and is 5 miles $S$. of Wilmington.

Newcastle, a town and a callic of the fame name, in Virginia, on the S. W. of Pamunky river, 15 miles S. W. of Walkerton, and so N. W. of York.

Nem Esclasid. -Sec Englamd, Neu.

Newfoundiand, a large ifland, difcovered by John Cabot, in the ycar 1494, and fill in the poilefion of the Eaglifh.

If is of a simuthar form, about the bigseis of Ireland, and 930 miles in circuit. On the N. it is teparated from Terra de Labrador, or New Britain, by the fituts of Belle - lle; on the W. it l.ar sence; and on the S. and E. by the Aibatic Oceano Caje Sacie the moth whathely mint of

## N E W

the iflated, lies in the lat. 46, 45. the moft northern point in 51,30 . and Cape Raye, is weflermoft point, in 47, 35 .
The ifand is full of hills and mountains covcred with pines, fo that the country can be traverfed only in thofe parts where the inhabitints have cut roads through the woods. The trees of this fpe. cies of pine feldom exceed 18 or 20 fect in height, except thofe growing in the valleys, where they are Meltered from the pitrcing wiuds, which often are 40 feet high. The cold during the winter is exceflive hete; and the freft, which are remarkably fevere, fet in about the middle of November, and foon after the harbours and bays are entirely frozer.
The whole circuit of the inand is full of facious bays and harbours, weil thettered by the mountains, except their entrance; fo that veffels he in perfect fecurity. Some of thefe barbours are a league and a half or two leagues in length, and near half a league in breadth; having feveral :ivers and brooks of excellent water falling ino them from the arljacent mountains. They are alfo very near each o:her, being only feparated by a point of land, feldom above two leaques in breadih; fo that the whole coalt of the ifland is a fuccecfion of harbours. But it mift not be imagined that there are towns or villages at cevery harbour ; theté are only to be found on the larger and more commodious bays, where the nature and difpolition of the country are nooll convenicut for a fetthenent, the inhabitans being few in number, confidering tle great extent of the coaft. Codfifhing is the only bufinefs folloucs here ; and the inhabitants, bcfides their dwellings, have large fore-houfes for preparing and lasing up their fin till the time arrives for fending it tuto Exiofe on their own accuunt, or batcring it

for Eurnpean goods, with the thips thut frequent the inand for that purpofe. None of there villages are without a fort or battery for their fecurity in time of war; it being common for fmall privawers to vifit them.

Newfoundland was formerly peopled by a rice of favage Indians, who have fince retired to the continent ; but fometimes pay a vifit to thcir ancient abodes. Thefe Indians penerally live by fibing and hunsing, and both Newtoandland and Cape tireton shound with buflards and wild geefe. Fiere are alfo foxes, bears, heavers, and other quadrupeds inumd in Canad., though noe in wity great. plenty; the continual teareh after them, for the fake of their furs, having greatly leffened their namber.

Notwiblatanding the feverity of the climate, the inheblames are mint deftitute of horned catte, tho' they find it diffisuli to procure fond for then during the feverity of the xinter. The inhabitants have alfo their fmall kitchen-gardens for funmer-herbs; but all the other fpecies of provifions, as Rour, falt, mear, \&c. are browght from other colonies to the fouthward; goods of other kinds are brought from England.

Though all the coants of Newfoundland may be fiid to abound with cod, yet in fome parts it is found in greater pleniy than in others. This is owing to the giality of the hottom; for where it is fand the filh are far more numernos than where it is locky; but if the bottom be muldy, fifh are very fearee. The depth of water mould be alfo confidered; for though cod be found at all depths, yet they are ront taken in fuch pleaty as between 30 and 40 Suthom.

When a fhip has taken her ftation, the is immediately unrigged; and at the fame time a proper glace choten for fecuring the filh, as it is prepared; huts are likewife

## N E W

rin up for the men who work athore, fo as to form a kind of villige ; and at the water's edge a lapge llage or feafold is erected. Here the number of thallops deAined for the filhery is got ready, anl. when the featon is over, teit there till the next year; when he uho frft enters the bay has the privilese of applying them to his own ufe. Fivery thing being ready, the whale Mry's company, officers included, without any exception, are divided into as many clalles as there are different occupations: fome 6 fih, fome cut off the heads, forme gue trie filh, and others have the rare of falting and laying them

The fifhers gn out carly in
ir boats, that they may be at buir fation by break of day, and do net return 'ill the evening, unlefs they hoppen to have loaded their boot before. This fithery is whelly corried on with a hootk; and every boss is provided wist a furiciertciuantity of filhing-tackle, in cafe ef any acctident in breakirg their lines, or lofing their hooks. On their return, the fith is delivered to thofe who open them ; and that this may be done with the greater difpatch, a boy flands by to hatid the filh to them, and take then away when finithed. This work is done in a very methodical manner; for he that beheads them does nothing elfe. They are opened with one cut lengthways, the back-bone and all their entrails taken out, and the offals thrown into the water. While fome open the fith, others are employed in falting, and others in laying them in heaps. The next day, or when the fait appears furciently to have penctrated the filh, they wath them, to take off the foum extracted by the falt ; afterwards, that the water may drain off, they are piled up on littic boards ; then they are Aretched out, one by one, with the thin upwards, for drying, and turned three or four times. When thoroughly dry they are piled up

## IMAGE EVALUATION TEST TARGET (MT-3)

Photographic Sciences Corporation

## N E W

in fmall parcels, that they may not entiselg lofe the heat communicated to them by the firf falt; and now, being falted a fecond time, they are piled up in regular heaps on the flage, where they remain till the time of thipping them. As the boats go conltantly every day, the work of the feveral claffes may be imagined pretty hard and fatiguing. On the reseturn of the boats they immediately begin with opening and falting the filh, which takes up the greater part of the night; and the fincceeding parts of the cutting above-mentioned neceffarily employs them the following day, when the return of the fhallops calls upon them to renew their eafk; fo that they have very few hours left for lleep and refrefhment.

What is called the Great Bank of Newfoundland is, properly fpeaking, a valt mountain under water. about 530 miles in length, and 270 in breadth. The depth of the water is very unequal, from 15 to 60 fathoms. The bottom is covered with a valt quantity of fiells, and frequented by valt fhoals of fmall fifh, molt of which ferve as food to the cod, which are Iere in amazing plenty; for tho' 2 or 300 veffels have been annually loaded with them, during the lait and prefent centuries, yet the prodigicus confumption has not yet leflened their plenty. And we cannot help obferving, that this fifhery is a mine of greater value than any of thofe in Mexico or Peru.

New Fairfield, a town in Fairfied county, Connecticut, on a branch of Stratford river, 14 miles N. of Danbury, 6 miles $W$. of New Milford, and 12 S. W. of Kent, and within 2 miles of the equivalent lands granted NewYork.

## N I C

tween the $l_{d} k$ es Eric and Ontario, This is fuppoled to be the greatent cataratt in the known world, the water tunbling down a precspice near 140 feet high. I he river at the fall is near half a league in bucadth, and the water runs with fuch rapidity a quarter of a league above it, that all beafts attenpting to crofs it are fwept away by the flream, tumble down the precipice, and perifh. Above the fall, in the middle of the river, is an ifland, which divides the water into two ftreams, and in that manner it tumbles down the fall. When the water has reacied the bottom of the fell, jt jumps back to a great heighe in the air, and in other places is as white as fnow, and all in motion like a boiling cauldron. Abundance of vapours likewife arife, reprefenting a thick rmoke, and on thefe, when the fun thines bright, is painted a beautiful rainbow:

Nicaragua, a province of New-Spaili, bounded on the $W$. by Guatimaia Proper, and the South-Sea; on the N. and E. by Honduras and the North-Sea; and on the S. by Cotta Rica and the South-Sea. The winter in this province is rainy and tempeftrous; the fummer exceffive hot, but healthy. It is reckoned the moft woody patt of New-Spain, It produces good flax and hemp, logether with the wood ufed by the dyers in Europe, called Nicaragua wood; but little wheat. It abounds with black cattle and hogs, but fheep are fcarce. Balm. cotton, fugar, American pepper, liyuld amber, and turpentine, are here produced in very great plenty; with which, and the produce of their filver mines, the inhabitanis carry on a confiderable trade with Panama and Nombre de Dios. It abounds in turkeys, and parrots are fo nunterous they are become a nuifance; and the country itfelf is fo pleafant, as well as fruitful, that if is confidered as

## N O M

the garden of America; the hills and fands of the rivers abound with gold, and the ficlus and woods are perfumed; fo that when the Spaniards firf vifited it, they called it Mahomet's Paralife.

Nicker, one of the fmall Virgin-Illands, fituated between Anegada and Virgin Gorda, on the latter of whom it is dependant. Long. 65, 5. lat. 18, 30.
Nicaragua lake, a large collection of water in the province of the fame name, 117 leagues in circumference. The water in it flows and ebts like the fea, is interfperied with feveral illancis, and full of fifa, the infefted with crocodiles. The welt cnd of it is only a few leagues from the Sou:tSea, and it fails into the NorthSea at the port of St. Juan, by a pretty troad chanael, called alfo Nicarspua.

Nicdsa, y pretty large town on the river-Cipanio, near its inflax into the South-Sea, on the frontiers of Nicaragua. 'The inhabitarts fend from thence to Panama falt, honey, naize, wheat, fowls, and the purple juice of a thell-filh found in the bay of $\mathrm{Sa}-$ linas, about 30 miles $E$. of the town. The Spaniards have aifo a pearl-filhery here. Lat 9,50 , long. $85,30$.

Ninety-Six District, South-Carolina, includes the weftern divifion of that colony, whofe boundary is the Savannah-river $S$. Orangeburgh diftrict E. Camden $N$. and the Cherokees W.

Ninety-Six, the principal town of the above diffrict.

Nomans Isle, an ifland 2 miles broad, and 3 long, 5 miles S. of Martha's Vineyard, NewEngland.

Nombrede Dios, a large populous town, a little to the $N$. of the Tropic of Cancer, 60 miles N. of Guadalaxara. The Spanih General who fubdued it having granted the property of fome of the filver mines to the natives, it

## N O R

drew fo many feople hither, that it foon became the molt populous town in the province. Lat. $23,38$. long. 104.

There was formerly another place called Nombre de Dios, fituated on the ifthmas of Darien, but deftroyed in its infancy by the Indians of Darien. Some years after, houever, it was rebuilt, and the inhabitants maintained their ground 'till the year 1584 , when orders arrived from lhilip II. for their removing to Porto Bello, it much better fituated for the commerce of that counery.

Nomrre de Dios bay, a bay in the ifthmus of Darien, at the bottom of which the town of Nombre de Dios food, and in which are the illands cailed Baftimentos. Sce bafizmentos.

NoodeeIsland, a firallifland in Boflon-Harbour, MaflachufetsBay.

Norfotk, a maritime town, in Princefs-Ann county, Virginia, on the s. hank of James-siver, and was burnt by the liverpool man of war, Jan. $8,17,6$, to the amount of 300, ccol. fterliag damages. Tine rents of the houfes and warthoules deftroyed amounted, in 1773 , 10 e cool. in 1774 to 9313, in 1775 to near $10,0 c o l$, in fo fourifhing a condition was its trade.

Northampton, a county and town in Peniylvania. The county is bounded E. by Jerfey, S.W. by Berkfire, and S. by Bucks. The town is 5 miles W. of Bethleham, and 30 E . of Reading.

Northampton, an inland town in Hamphire county, Maf-fachufers-hay, alout 2 miles $W$. of Connecticut-River, and s S.W. of Hatfield.

Northampton County, in the dithift of Halifax, North-Carolina, whore N. E. boundary is Chawer-river, and its S.W. the Roancke river.
Northfield, a town in HampAlire county, Maflichufets-Day,

## NOV

on the E. fide of Connefticut-river, and near the boundary line of New Hampthire, where the new granted townthips commenced.

North-River, a river of Old Mexico, which, after running a long courfe througt the kingdom of the fame naine, falls into the Gulph of Mexico.
Norton, an inland town in New Weft-jerfey, on a branch of the E. branch of the Delawar, 20 miles E. of Philipfburgh.

Norwalk, a town, river, and bay, on the coaft of Fairfield, Connecticut, off which, in the Long-1hand found, are fome fmall inands of the fame name.

Norwich, a sown in New London county, Connecticut, on a branch of the Thames. near the Falls, 15 miles N. of New-London, and ir S. of Canterbury.

Nottingham, a lown in the eatern divifion of Maryland, 6 miles $N$. of Charles and Chefa-peak-Bay.

Nova-Scotia, a province called by the French Acadie. It is bounded on the N. hy part of Canada; E. Gulf of St. Laurence and Atlantic-Ocean; S. AtlanticOcean; W. New-England. Latitude between 43 and 49. longitude between 60 , and 67 . Lengih 350 miles, breadth 250 . Thoush in a very favourable part of the temperate zone, it has a winter of an almoof infupportable length and coldncfs, continuing at leart 7 months in the year: to this immediately fucceeds, without the intervention of any thing that may be called fpring, a funner, when the heat is as violent as the cold was in the winter months; the heat indeed is of no long continuance, the country being wrapt in the gloom of a perpetual fog, long after the fummer feafon has commenced. The foil in mont parts is thin and barren, the corn it prodices of a thrivelted kind like tye, and the grafs intermixed with a cold fpongy mofs. It is 'not, indeed, uniformly bad, there

## NOV

being tracts in Nova-Seotia not inferior to the beft land in New. England.
But however nnpromifing this country nay be, fome of the firt Europeans, neglecting all the delightiul traets to the fouthward, here formed their fettlements. 'The French feated themfelves bere hefore they made any eftablithment in Canada, and increared largely with very little affiftance from Furope; whe:eas the colony we have lately planted there, notwithfanding the immenfe fums expended in its eflablifhment, would, in all probability, fink into nothing, if the fupport of the royal hand was withdraun.
The country round Halifax has a flourifhing appearal.ce, and rewards the labours of the fettlers. Among other particulars it has the follnwing Cafes: Sable, St. Mary, Rofiers, Sambro, \&c.Numerons fmall lakes without names.-Bays (including Fundy, Chenicto, and Green): Gafpee, Chateur, Chenibuto, Verte, Chebudo, \&c.-Rizers: Rifgouche, Nipifiguit, St. John, and St.Croix, (feparating this province from New-England).-In Halifax harbour (in Chebucto-bay), which is capable of contuining 1000 veffels in fecurity.-The harbour of An-napolis-Royal, but for its very difficult entrance, would be one of the fineft in the world.

A ver y confiderable expence attended this fettement, to accomplifh which the Britioh Parlialiament granted, wibin the firt 7 years, for its fupport, no lefs ${ }^{3}$ fum $\operatorname{ll}$ an $4: 5,48+1$. 145. $11 \mathrm{~d} . \frac{3}{4}$, and in A pril, 1775, 43461. ics. 5 d. more was granted. The Britifh exports to Nova-Scotia confifts chiefly of fithing -tackle, rigging for hips, woollen and lipen cloth, to the value of about 26,5001 . annually ; the imports in return are timber, and the produce of the fifhery, to the amount of atoric 33,0001.

## O N S

Noxan, a town in Newealtle county, Delawar, Penfylvania, 21 miles N. of Dover, and 9 S . of St. George's.

## 0

0HIO or Hohio, a famous river, rifing in the mountains on the back of New.York, Maryland, and Virginia, and after a long courfe falling into the Miffilippi. It is the boundary of Quebec governmeat. Its mouth is 1164 miles from Fort Pitt, and near the entrance of the Cherokee-river; it is between 700 and 800 yards wide. The Muikingam - river, which runs into the Ohio, in lat. 39, 10 , is 250 yards wide. The Ohio, from 50 miles above this river to Sioto, is moft beautifulIy interfperfed with numbers of iflands, and in fume places is 700 yards wide. The name is formed from an Indian word, fignifying fair or pleafant, and hence it is often called the Fair River. It ruis through the moft beautiful and fertile countries in the world; and receives 10 or 12 rivers, befides an innumerable number of sivulets, and is navigable above 600 miles.

Omasuos, a jurifdiction in the diocefe of La Paz. It begins almoft at the gates of La Paz , and extends 20 leagues, heing bounded on the W. by the famous lake of Titi Caca. The air of this juriffiction is fomewhat cold, fo that it produces little grain; but that deficiency is abundantly compenfated by the great numbers of cattle fed in its paftures; befides a very advantageous trade carried on in another jurifdiction by the Indians living on the borders of the lake, who are remarkably induftrious in inproving that, advantage.

Omoa, a fmall fortified town, upon the coalt of Honduras, in pollefion of the spaniards. The harbour is excellent for the largeft veffels.

## ORC

Onslow, a maritime county, in the diltrict of Newbern, NorthCarolina, whofe weftern boundary is New-river.

Ontario, Lake, a large collection of frefh waters, above 270 miles in length from E. to W. and 65 in breadth from N. to S. The fortrefs of Ofwego Itands on the fotthern More of this lake. It has a fmall rifung and falling of the water, like tides, 12 or 18 inches perpendicular. The fnow is deeper on the S. fide of this lake than any other, and its water does not freeze in the fevercat winter out of fight of land.

Orange, a county and town, in New-York, on the W. bank of the Hudfon-1iver, $=5$ miles $\mathrm{N}_{\text {i }}$ of New-York.

Orange, an inland county, in the difrift of Hillborough, N. Carolina, in which Hillborough, the county town, is fituated.
Orangeburgh District includes all the places between Savannah, Santee, Congaree, and Broad - rivers, and a line from Nelfon's-ferry to Mathew's bluff, on Savannali-river, to the mouth of Rocky-creek, ou Salud.a-river, and thence in the fame courfe to Broad-river.

Orangeburgh, a county in the above diftrid, wherein ltands the toxn of Orangeburgh, on a branch of the Eddilto-river. It has a court-houfe, and furnifhes one of the regiments of the militia.

Orchilla, an ifland on the coalt of Venezucla, in the North Sea, lying between the inauds of Tortura and Roca. It is divided into feveral fmall inands, the greatell of which, being almoft all low land, is in the form of a crefient, or half-moon. They are all feparated from each othtr by very Gallow canals. On the E. and W. capes are fome hills, and on thefe the goats chiefly feed. On the S. W. fide of the ifiand the water is very deep, and

## $0 \times F$

the thore perpendicular like a wall, for which reafon hips may come very near it. The N. W. frde has hardly any trees or grafs; but on the E. and N. fides plenty of horth. The foil, from its fatnefs, is falt, and coniequently prodices few plants. There is very little freih water on the inand, and the only animals found there are goats and lizards. Lat. 11,40 . long. 66, 42.
Orleans, an ifland in the river St. Laurence, at a fmall diftance below Quebec.

Orleans, New, a town of Lemifiana, fituated beiween the eaftern fhore of the Miffifippi and the Finh river, 24 leagues from the fea. The foil abous it is tich and fertile, and the climate excellent. It is the metropolis of this country, and the refidence of the Governor, Cirand Council, and Currs of Jufice, as well as the grand enporium of Lovifiana. Lat. 30, 5. Ieng.90, 7 .

Osweco, a furtrefs erected on the fouthern bank of the lake Ontario, at the mouth of the Onondaga river. Here the Indians carry on a confiterable trade whith the Englifh, exchanging their Purs for the commodities they are In want of. This trade begins in May, and continues till the latter end of July. It was taken by the Englifh from the French in 1756, and confirmed to them By the peace in ${ }^{1763}$. Lat. 43, 18. long. 76, 30 .

Oxford, a fmall town in the county of 'Talbot, in the eaftern divifion of Maryland, on the N. bank of the Choptank river.

Oxford, a town in Worcefter county, Mafachufers - Bay, 10 miles $S$, of Leicefter, and the fame difance S. W. from Worcefter, 5 W . from Sution, and 6 N. W. from Douglas, on a branch of the French river, that runs into the Thames in Connefticut colony.

Oxford, in New W. Jerfey,

## PAN

on a branch of the E. branch of the Delawar river, 15 miles E. of Philipfburgh, and 7 N . W. of Norton.

## P.

PAchuco, a town of Mexico, 60 miles from the ciry of Mexico. It tis famous for filver mines: Gemelli fays, that in the pace of 6 lengues there are not lifs than a thoufand. One of them, called Trinity, is fuppored as rich as any in Mexico. there having been taken from it in 10 years time only above 40 millions of filver.

Pakepsix, a town on the E. bank of Huaffa's river, 70 miles N. of New York.

Paltztown, a town in New York, 7 miles $W$. of Hulfon's river, and 8 miles N . W. if Pa kepfy.
panama, a large city, buile on the inhmus of the fame name, and on the coalt of the South Sci., The firit difcovery of Panama the spaniards owe to Tello de Guzman, who landed here in 1515. This diffovery was, in the year 1513, followed by the fettl ment of a colony under the Governor of Terra Firma. And in 1528 Panama was corftitured a city, with the ufual privileges. In the year 1670 it was taken, facked, and burned, by John Mcrgan, an Englinh adventurcr. This miffortune rendering it abfolutely neceffary to rebuild the city, it was removed to its prefent fituation, which is ahout a league and a half from the former, and much more convenient. It is furrounded with a wall of freeflone, and defended with a large garrifon of regulars. The houfes were it firtt, in gencral, of wood, laving but one fory and a ti'ed roof. Without the walts is an open fuburb, larger than the city itfelf, and the houles of the fime materials and conftuction. Its

## PAN

Areets both of the city and fulburb are flraight, liroad, and for the moft part paved. Though the loufes were in general of wood, fires were rarely known in Panama, the nature of the timber being fiuch, that, if any fiue is laid on the floor, or placed againt the wall, it is productive of no other confequence than that of making a hole, without kind. ling into a flame; and the firo ittelf is extinguifhed by the a fhes. But, notwithttar. ing this excellent quality in the wood, the city was almont entirely burned down in the year 1737, the goodneis of the imber being unable to fecure it from the ravages of the flames. The fire began in a cellitr, where, among other goods, were great quantities of pitch, tar, naphtha, and brandy; to that the fire being, as it were, faturated with thefe fubflances, food reached the walls, and this fingular kind of wood became a more eary prey to the devouring flames. In this conflagration the fuburb owed its fafety to its diftance from the city, which is above a mile and ${ }^{2}$ quarter. Since this misfortune, it has been again rebuilt, and the greateft part of the houfes of Clone, all kinds of materials for buildings of that kind being here in the greatell plenty.

In this city is a tribunal, or royal audience, in which the Governor of Panama prefides; and to this ennployment the captainfhip of Terra Firma is generally. annexed. Panama has alfo a cathedral and a chapter, confifting of the Bihop and a number of Fretenduries; a corporation compofed of Alcaldes and Regidores; thrce officers of the revenue, under an accomptant, treafurer, and agent; and a court of inquifition, appointed by the tribunal at Carthagena. The cathedral and all the convents are of fone: indeed, before the confagration, feveral of the latter were of nood; but

## PAN

that terrible misfortune fhewed them the necelfity of uling more folid materials.

The harbour of Panama is formed in its road by the fhelter of feveral inands, where fhips lie very fafe, at abont two and a half or three lengues diftance from the city. The tides are regular, and is high-water at the full and change at 3 o'clock. The water rifes and talls confiderably; fo that the thore, lying on a gentle nope, is at low water left dry to a great diftance. The trade of Panama is very confiderable; it is the port where the fhips from Lima, Guayaquil, \&se. unload the trafure fent to Old Spain, and the flaple for the grods brought up the river Chagre. The roads here, though the diftance is but fhort, by croffing the chain of mountains called the Cordillera, are in fome parts fo narrow, that a bealt of burchen can hardly pafs along, and confequently the employing mules in this fervice would be attended with imminent danger.

But this is not the whole of its conmerce. Panama, even during the abfence of the armada, is never without frangers, it being the thoroughtare all going to the parts of Peru ty, the South Sea, as alfo for the coming from thence for spain; to which mult be acided the continual trade carried on by the Peruvian niips, which bring variety of goods, as meal of ditferent forts, wine, brandy, fugar, tallow, leather, olives, oil, and the like. The Chips from Guayaquil bring cacao, and quinquina, or jefuits-bark, which always mets with a quick exportation liere, efpecially in times of peace. The coanting-barks, which make frequent trips from the adiacent ports, fupply the city with hogs, poultry, hurg beef, hog's lard, piantanes, roots, and different kinds of vegetables, with which this city is pleatifully fupgited.

## P A N

The dearnefs of provifions in this city and its diltrist, occafioned by the large quantities confuined, and the great diftance from whence they are hrought, is amply compenfated by the multitude and value of the pearls found in the oyfters growing in its gulph. The firft to whom the Indians made this valuable difcovery was Bafco Nunez de Balboa, when, in his voy:ge thro' Panama, to make further difcoveries in the South Sea, he was prefented with fome by 'lumaco, an Indian prince. At prefent they are found in fuch plenty, that there are few perfons of fuhfance near Panama, who do not employ all, or at lealt part of their flaves in this filhery, which is carried on in the following manner :

The negroes who fifh for pearls mult be both expert fwimmers and capable of holding their breath a long time, the work being performed at the bottom of the fea. Thefe flaves they fend to the inlands in the gulph of Panama, where they have huts built for their lodgings, and boats which held 8 , 10 , or 20 negroes, under the command of an officer. In there boats they go to fuch parts of the gulph as are known to produce pearls, and where the depth of the water is not above 10, $\mathbf{3 2}$, or 15 fathoms. Here they come to an anchor, and the negioes, having once end of a rope faftened about their bodies, and the other end to the fide of the boat, take with them a fmall weight to accelerate their finking, and plunge into the water. (in reaching the bottom, they take up an oyfter, which they put under their left arm; the fecond they hold in their left hand; and the thind in their right : with thefe three oyflers, and fometimes another in their mouth, they rife to breathe, and put them in a bag. When they have refted

## P A N

themfelves awhile, and recovered their breath, they dive a fecond time; and thus continue till they have either compleated their task, or their flrength fails them. E-very-one of thofedivers is obliged to deliver his mafter a cortain number of pearls daily; fo that when they have got the requifite number of oyfters in their hag, they begin to open them, and deliver the number of pearls to the officer, till they have made up the number due to their matter; and if the pearl be but formed, it is fufficient, without any regard to its being finall or faulty. I'he remainder, however large and heantiful, are the negro's own properiy; nor has the mafter the lealt claim to them, the flaves being allowed to fell them to whom they pleafe, though the matter generally purchafes them at a very, fmall price. Sometimes the negroes cannot make up their number, as in many of the oyllers the pearl is not at all, or but imperfectly formed, or the oytter is dead, whereby the peanl is fo damaged as to be of no value; and as no allowance is made for fuch pearls, they mult make up their number with others.

Panama, from feveral accurate obfervations, lies in the lat. of 8, 57, 48. long. 82, 5, 14 .

Panama, Province of, is not only the capital of Terra Firma, but alfo gives its name to a particular province in that kingdom. Molt of the towns and villages of the province of ranamaare lituated in fmall plains along the thore, the relt of the country being covered with enormous and cragey mountains, uninhalited on account of their flerility. 'This province contains 3 cities, 12 villages, and a great number of rancherias or aflemblages of Indian huts, It has alfo feveral gold mines; but they: are greatly negleeted, the Spaniards chufing rather to apply themfelves

$$

## PAR

to the pearl-fifhery, than to the mines, as it affords a more certain profit, and at the fame time is acquired with much greater cafi.
panuco, or Guastica, a province of Mexico, bounded on the N. by New licon, and part of the audience of Guadalaxara; on the E. by the gulph of Mexico; on the $S$. by the province of 'Tlafeala and Mexico Proper; and on the W. by the provinces of Mechoacan and New Bifcay. The Iropic of Cancer croffes this provilnce, which is firuated partly in the lemperate, and partly in the Torrid zone. It is about 55 learues in length, and the finme in breadth. The part neareft 10 Mexico is by much the heft and richef, abounding with proviflons, and having fome veins of gold, and mines of filver. The part adjacent io Florida is wretchedly poor and barren. The country was one of the firft difcoveries of the fumous Cortez, who took a great deal of pains to conquer and plant it ; though it is a country rather fruitful and pleafant than rich; nor has it ever had any great number of inhabitants.
banuco, the cupital of the dillrice of the fame name; it is, the fee a bihop, and fands upon 2 river of its own name, about 17 leagues from the fea, and 60 N. W. of Mexico. It was buile in the year 1520 , by order of Cortez, and called St. Iftevan del Puerto. It contains about 500 families; and the houfes are frong and clean, being built of fone, and neatly thatehed with palinetto leaves. The river on which it Itands is navigable for large thips a great way above the city; but the harbour $h$ is fo large a bar before it, that no mips of burden can enter it; which has proved of bad confequence to the commerce of the place. It lies in lat. 23. 5. long. 100, 2.
paria, Gulfof, a Arait

## PAU

lying between the N.W. part of New Andalufia, or Cumania, and the fonthern fhore of the illand Trinidads. Lat, 9, 12. longitude 63, I .
parham Town and Marbour, on the $N$. fide of the illind of Antigua, in the WeftIndies.
pasamaeuada River, which runs into the bay of the fame name, is the fuppofed boundary between New-England and Nova-Scotia. In and off this bay are feveral fine iflands.

Pasquorask, a maritime county, in the dillrict of Ed:n. ton, N. Carolina, is a very fwampy fiuation, and ligs a river of the fame name, which runs into Albemarle found.
passage, Greatr and Iitttee, two of the Virgin-Illes, near the E. end of Porio Rico, and is claimed by the Spaniards. Long. 64, 5. lat. iS, 10.

Passage-Fort, al fimall town in Jamaica, fituated in the roid between Port-Royal and SpanifhTown, 7 miles S. E. of the latter, and at the moulh of the riyer Cobre, where it has a fort with 10 or 12 guns. It has a bri\& trade, and coatains about 400 houfes, the greatelt part of them houfes of entertainment.

Potamack, a large river, Separating Virginia froa Maryland. It rifes in the Apalachian Mountains, and after a courfe of above 200 miles, falls into Che-fapeak-bay, in the lat. of $37,55$.

Patience Island, in the Ray of Narraganfit, Rhode-1fland Colony, is ahout 2 miles long, and 1 broad.

Paucar-Colea, a jur:fiction in the bihhoprick of La laza, bordering on Chucuito. It is ficnated among the mountains, which renders the air very cold; fo that it produces littic $g$ : ain and efculent vegetables, but abourds in cattle both of the European and American kinds. It has fe-

## PA Z

veral filver mines, and particularly one called Laycacota, which was formerly fo rich, that the nictal was often cut out with a chilfel, but the waters broke in and overflowed the works; nor has any labour and expence been wanting to drain it: but it is now entirely abandoned.

P'act, St, an ifland in the Arait between Newfoundland and Cape Breton. It lies about 15 miles N. E. of North - Cape, a promontory in the ifland of Cape. Breton.

Paz, La, a fmall jurifdiction of the audience of Charcas, Jituated among the inountains, one of which, called Illimani, contains, in all human probability, immenfe riches; for a crag of it leing tome years fince broken off $b_{y}$ a flath of lightring, fich a quantity of gold was found among the fragments, that it was fold for fome time at La Paz for cight pieces of eight the ounce. But the funmit of this mountain being perpetually covered with ice and fnow, no attempt has been made to open a mine.

Paz, la, the capital of the alcue jurifdiction, fituated among the breaches of the mountains, on the fide of a valley, through which a pretty large river flows, and about 12 leagues diflant from the Corcillera. The ground on which it Aands is not only uncqual, but furrounded by mountains. When the river is fwelled by rains, or melted fnow from the Cordillera, its current forces along luge malfes of rocks, with fome grains of gold, which a:e found after the water has fungided. In the year 1730, an Indian happening to wath his feet in the siver, fousind a lump of gold of So large a fize, that the Marquis de Caltel Jucrte gave 32,000 pieces of eight for it, and lent it to spain, as a prefent worthy the curiofity of his fovercign. The ciny of Lad daz is of a middling.

## PEN

fize, and the houfas well buils. Befide the cathedral and the pariftchurch del Segrario, where 2 prielts ofliciate, there are alfo thofe of St. Barbada, St. Sebantian, and St. Peter. Here are alfo religious fraternitics of Francifcans, Dominicans, Augullines, and the Fathers of Mercy ; a college of Jefuits, and a convent and hofpital of St. Juan de Dios; befides a munnery of the order of the Conception, and another of Santa Therefa. Here is alfo a collcge of St. Jerom, for the education of youth, whether defigntd for ecclefiaftical or civil employments. Lat. 16, 10. long. 68, :5.

Penguinisiand, an ifland in the Athantic Ocean, ahout 10 miles to the N.E. of the coalt of Newfoundland. It has its name from the mulitude of birds called penguins, which frequent it. Lat 50, 5. long. 50, 30.

Penobecot-Bay, a large bay in the county of Lincoln, in the province of New-England. The mouth of this bay, which is 2 t miles in breadth, and interfecifed with Several illands, lics in datitude 44, 9. long. 68, 15.

Penobscot-River, a large river in the governinent of Sagadahock, or Lincoln county, NewEngland. It is formed by 3 freams ilfuing from 3 lakes in the fame government ; and, after a courfe of 1.30 miles, falls into Penobfcot-Bay. It has a large ifland at the entrance into the chanmel, called Bethune - ifland. The land is high on each fide this river; and at 35 miles above the mouth the river tumbles for 2 miles over falls, which puts a ftop to all marine navigation; and 2 miles further N. W. there are other falls. In the front of the falls there run acrois the river a row of pointed rocks, that at lowwater appear like pickets acro?s 2 river. For 9 miles above the falls the river has the appearance of a lake 2 miles over, lying N.

and s. being full of inants: this riser and ditrion renaining lant war in porfeffion of the natives, win. der the patronage of the French, in 1759 the governor of Mafli-chutets-Bay took polfeffion of it. and buite a tort, which he called Pownill, and ly it kepe the comtry in fubjection. This was the latt river and diffrict on the N . Americaus coart, which compleated the Britifl cmpire.
pensacota, an excellent harbour on the bay of Mexico, in Wert florida, in leagues E. of Port Lewis and Mobile, and 1;8 W. of the inand of Tortuga. It is a ligge harbour, fafe from a! 1 winds, and has 4 fathom water at its entri:nce, deepening gradally til 7 or 3 . On the W. fide of the larberer thands Penfacola, the capital of the province, defended by a frall itackaded fort of 12 or 14 guns; cai'el st . Mary de Galve, from ir a being ereata.l in the time of the count de Galie. A very frese river falls into the bay of Mexico, on the E. fide of this habbur, after running ahove 100 miles through the country. The land hacre produces plenty of trees, fit for mafts of fhips, and accordingly many of them are cut down and carried to Veta Cruz for that purfofe.
Pensbury, a imall town in the courty of Biekingham, in Penfylvania, fituated on a frrall creek of the Delawir. It was a mantior Mr. Yeun referved for himfelf, and here he built a houfe, and planted gardens and orcluads. The houfe is finely fituated, and the fltiation greatly improved ty the plentations and buildiags.

Pensyi.vania, a forrifhing province, hituated between NewYork on the N. New-Jerfey on the E. Virginia and part of Canada W. and Maryland on the $S$. having no other commun:cation with the fea than by the noush of the river Delawar. It is about 300 miles in tength, and

## PEN

$2 t 0$ in breath ; lying between 38 and 43 degrese of latitude, and $t+$ and 8 longitude. It has but one icmarhable eape, and then is Hindopen: as to harbours or hals, the Deliaw is the chinf. Rivers it has feverat, the not combiderable of whom are, Duthwar, smfochanna, and schuilkill. The Delawar, whefe for.re is far $N$. in the conntry of the Indians c.lled Iropluis, is navigable 120 niles above Mhilaterphia, and would he fo farther but for a catarast in is above Eriftol, which hinders veffels from proceciling higher ; at its mouth it is upwarts of 3 miles broad, and ture than 1 at Philadelphia: the Schuilkill and sufyuchanna rivers rife alfo in the country of the Iroluois, and are navigable far up the comatry: add to this that the largett hecus may ride in fafety in the creeks and coves with which Delawarbay abounds; fo that this provirise is happily circumfanced to catry on a foreign as well as inland trade. It is divided intothe following countics: Philadelphia, Chefler, Bucks, Berks, Nurthainpton, Lancafter, York, a:id Cumberland. On the Delawar are Newcafte, Kent, and Suffix.

This province was granted to the famous William Penn, fon to Sir William Penn, Adniral of the Englifh flect, in the time of Oliver Cromincli, and K. Cha. If. Sir William, as fome revard for his fervices, and in contideration of fundry debts dus to him from the crown, was promifed a grant of this country from K. Cha. IF. but died before he obtained it. His fon did not, for fome time, apply himfelf ftrenuoutly to folicit the grant promifed io his father; but at lengh finding his friends, the Qakers, were harraffed in every part of England by fpiritual courts, he renewed his application to the court, and having obtained his grant, went into America, and purchafed the

## PEN

foil, at a very low rate, of the Indians, its original poffifors. By this cheap ant of juitice at the beginning, he rendered all his future dealings the more eafy, the Indians having conceived very favourable opinions both of him and his defigns. Haviag thus fuccceded in the firit part of his plan, he proceeded to the other, namely, to people the country he had thus obtined. And this was greatly facilitated by the uneafinefs of the Englith Quakers; whon, from thair high opinion of the man, deterbined to follow him over the val Atlantic Ocean to a country uncultivated, and a climate Arange and unkllown. Nor was he himfelf wanting in any thing that had a tendency to encourage his followers; he expended large fums in tranfporting and fupplying them with all neceffaries; and not aiming at a fudden fortune, by felling his lands at a very eafy purchafe. By this means, and the noble charter of privileges he gave the fettlers, the country was foon changed f:om a wildernefs to a garden, and is now one of the moft flou$r$ 'hing colonics belonging to the New-W crld; and ftill called after his own name.

The climate of Penfylvania is very agreeable, and the air fwcet and clear. The fall, or autumn, legins about the 20th of October, and lafts till the begianing of December, when the winter fets in, which continues till March. Fiofty weather, and extreme cold featons, are frequently known here; fo that the river Delawar, though very broad, is oftentimes froze over; but at the fame time tie weatheris dryand healthy. The fpring latts from March to June, bat the weather then is more inconflant than in the other feafons. The hea:s are very great in the montrs of Juiy, Augult, and Septemter, but nixigucd fo much by cool breezes that they are very

## PEN

tolerable. The wind is at S.W. during geat part of the fummer; but gencrally at N. and N. W. in the fpring, fall, and winter ; which blowing over the frozen lakes and fnowy mountains of Canada, is the true caufe of the coldnefs of the weather in the wister feafon.

The foil of this province is, in fome places a yellow or black fand; in fome a loamy gravel ; and in oihers a fat mold, like the vales in England, efpecially near the inland brooks and rivers. The earth is fruifful, fat, and eafy to be cleared, the roots of the trees being but a fmall diftance below the firface of the ground. It is well watered with rivers, and produces every thing which can remder dife agrecable, in the utmolt plenty. In thort, there is no part of North America in a more flourifhing condition than l'enfylvania; nsy, in fome years, more people have tranfported themfelves into this province, than into all the obers. In the year 1729,6208 perfons came to fettle there as paifengers or fervants, four-fifths of whom, at leaft, were from Ireland; fo that it is no wonder that land has greally rifen in its value fince the time of William Penn, it now felling round Philadelphia at 20 years purchafe. Including the Delawar counties, it contains abont $35^{\circ}, 000$ inhahit.nts. There is ro particular religion eftablifhed here, but a fif $h$ part of the inhabitants are Quakers. Before the prefent diltmbances there were annually cuit here 25 veffels, and they exported provitions of all $k$ inds, iron, furs, \&rc. to the amonnt of 705,000 . and their imports from Britain were alocut 6is,ocol.

The foil is extremely frong ard fertile, producing, fpontaneouny, an infinite variely of trees, llowers, fruits, and plants of different fizes; and the mountains are enriched with ore. 'This provisce is cultivated to greater

## P ER

at S. W. fummer; N. ely frong f pontaney of trees, ints of difmountains -I'his proto greater
perfection than any other; and in this itate yields not only great plenty, but great variety of grain; alfo fax-feed, hemp, and various other articles.

It mult be observed here, that in the fouihern the timber is not fo proper for ship-building as in the northern colonies; for in a comparative degrce as they lie nearer to the $S$. the wood becomes lefs and lefs compact, and fulits cafily;-a quality, however, that, though rendering it improper for Mips, makes it fitter for flaves. The land abounds with cattie, and the rivers with fim.

Pentusok, a town in MampGire county, Mafachufets-Bay, the moft W. in the whole county, on a branch of the Honfotonkriver, which emptics itfelf into Long-1 Aland Sound.

PERQuimons, a maritime county, in the diftrict of Edenton, North-Carolina. It has a siver of its own name, which suns into Albemarle Sotind.

Perth-Amboy, the capital of Middlefex courty, in New-Jerfey, io called from James Drummond, Earl of Perth, one of its ancient proprictaries, and PointAmboy, on which it fan is. It is fincly lituated at the mouth of Ra-ritan-river, which here falls into Sandy-hook-bay, and is capecious enough to hold 500 fail of fhips. But though it is fo commodioufly fituated for trade, and veffels might alfo be built very cheap, it is not in a flourifling condition, confifting only of about 40 feattered houfes, befides that belonging so the Governor. Yet the original plan, as laid out by the Scotch proprictors, contains 1070 acres, divided into 150 equal fhares for purchafers to build upon; 4 acres are referved for a market-place, and 3 for a public wharf. And had it been built according to the defign, it would have been one of the fineft towns in North-America;

## PHI

Petara, a town of the prom vince of Guatimala, in New Spain, fituated near the coalt, on the river Guatimala, and 25 miles S. E. of the town of that name. It ftands at the weftern extremity of the valley of Mexico, and is reckoned one of the pleafanteft towns in the province. The river, which wathes it, has a mill ereated on it, which ferves molt part of the valley; and within half a mile of the town is a rich plantation of fagar, the fuil being very proper for producing that commodity.

Peterseurg, a lown ir Prince Gcorge's county, Virginia, on a branch of James river, o:cr which it has a bridge, 16 miles $S$. of Chetter, and 18 miles N. W. of Bermuda.

Detersham, a town it Hampfhire county, MaffachufetsBay, lituated at the fork of the eaftern branch of the river Ware, which runs into Connedticut river; 20 miles $E$. of Narraganfer.

Petrer's Island, one of the Virgin Iflands, which fee.

Perfaguaves, in St. Do-mingo.-See Hepaniola.

PHILADELPHIA, the capital of the province of Penfylvania, fituated on a neck of land at the confluence of the two fine rivers Delawar and Schuilkill. It is laid out in the form of a parallellogranı, or long fyuare, extending 2 miles from river to siver, and compofing 8 long ftreets, interfected at right angles by 16 others, each a mile 11 length, broad, fpacious, and even; with proper spaces for the fublic buildings, churches, and market-places. In the conter is a fyuare of 10 acres; round which the public buildings are difpofed. The two principol ftreets, called High - Areet, and Broad-ftreet, are each 1 co feet in breadth, and moft of the holfes have a fmall garden and orcharc. From the rivers are cut imall canals, equally agreeable año be-

## PHI

neficial. The wharfs are fine and Ipacious; the principal 200 feet wide; and the water fo deep, that a veffel of 500 tons burden may lay her troad-fide to it. 'T he warehoufes are large, numerous, and commodinus; and the docks for fhip-building are fo well adapted to their parpoles, that 20 Mips have been feen on the focks at the fare time. The city at prefent, exclufive of warehoufes and out. houfes, confifts of abcut 3000 houles, molt of them of brick, well-built, and very fpacious; and the number of inhabitatitsamounts to above 18,000 . The original plan is far from being completed; but fo far as it is built, the fructures are erected conformable to it; and the buildings are daily increafing, both in number and beauty: fo that there is great reafon to believe that it will in a few years be one of the finell places in all America.

A great numberof very wealhy merchants inhabit Philadelphia; which is three-quarters of a miie hroad. The ftreets are well lighted, and watched : a pavement of broad foaes run along each fide for font-pafiengers.

Befides the quantities of all kirds of provifions produced in this province, which is brought down the rivers Delawar and Schuilkill, the Dutch employ be$t$ ween 8 and 9000 waggons, each drawu by four horfes, in bringing the product of their farms to the market of Philadelphia. In the ycar 1749, 303 veffels entered inwards at this port, and 29 cleared outwards. There are cultomhoufe officers at other por:s of this province, but the Ereign trade in thefe places is not worth notice. Lat. 40,50 . long. 74.

There are in this city 2 churches, 1 Swedifh, 1 Romifh Chapel, 3 Quaker's meeting-hou fes, 2 Prefby erian, 1 lutheran, 1 Dutch Calvinift, 1 Amabaptif, intid I Moravian mecting-houfe.

## PIS

Phifaderifhia-County, one of the divifions of Penfylvania, to called trom the capital of the whole province round which it lies. It is bounded N. E., hy Buck's coun'y, S. E. by Jerfey, S. W. ly Chefter, and N. W. by Berk's county.

Philifsburg, a town and mancr of New-York, on the E. fide of Hudfon's river, oppofire Orange, about 23 miles $N$. of New-York, and 15 from Stamford, in Connecticut.

Philipsburg, a town in New Weft Jerfiy, on the E.bank of Delawar river, oppcfite Eaton, in Penfylvania.
? Philippina, a fmall town of the province of Guatimala, in New Spain, fituated on a bay of the South-Sea, in lat. 12,50. long. 91, 30.

St. Pierre, the firft lown built in the ifland of Martinico, in the Weft-ludics. It is five leagues S. of Fort-Royal, in a round bay on the W. coaft of the inland. It is the place of commenication betwcen the colony and mother-country. It is the refidence of the merchants, as well as the center of bufinefs; and, notwithfanding it has been reduced four times to aftes, it contains near 2000 houfes. A port fituated along the fea-fide on the Strand is the anchoring-place, but very unhealthy. Ancther port of the toun is reparated from it by a river, and is built on a low hill, which is called the Fort, from a fmall fortrifs which defends the road, which is very good for the loading and umleading the fips, and the facility of coming in and going out; but the Mipping are obliged in winter time to take Shelter at Fort-Royal, the capital of the ifland.

Piscataqua, a siver of the province of New Hamphire, in New-England, which after a courfe of 40 miles falls into Pifcataquaharbour, near Portfmouth, It is

## P L. A

the only port of the province, and for 15 miles has more the appearance of a deep bay than a iver. There is in the mowit of it the ifland of Nexcaftle, $1 \frac{1}{2}$ long, and $1 \frac{1}{4}$ broad. It is navigable $u_{j}$ the firit courfe for hips of any burthen, for 9 miles more up the $W$. branch to Exeter it is navigable for floop:, and alfo up the E. branch to the falls. This river mates the boundary between York and Ne: v Hamphire.

Pascatamay, a town of the county of Middlefex, in New Itercy, conlifting of 90 families, and 40, cco acres of land, fituated on the Raritan river, 6 miles from its mouth.

Placentia, a famousbay and harbour in Newfoundland, greatly fiequented by hips emploged in the cod-filhery. The entrance of it is a narrow channcl, through which but one thip can pafs at a time; but the water is deepenough for the larget, and the harbour capacious enough to hold 150 fail of fhips, which are there fecure againlt all winds, and can filh as quietly as in a river. Before the narrow channel is a road of a league and a half in extent; but expofed to the wellerly winds, which here often blow with great violence. What renders the channel fo narrow, is a ridge of dangerous rocks, which muft be left upon the flarboard fide in going into the bay, and on this ridge the French had formerly a fort, cal. Jed St. Lewi-. The currents are very ftrong here; fo that fhips mut be cowed through the channel. The great Arand, oz drying place for filh, which is about a league in extent, lies between iwo very fleep hils, one of which, on it e S.S. W. is feparated from the strand by a finall rivulet, which runs out of the charnel, and forms a kind of lake, called the Litule-Bay, in which plenty of falmon is caught. I he great ftrand is capacious enough to dry

## P L Y

finh fufficient to load bo hips, Befides this there is another called The Litule Strand, ufed by the inhabitants in drying their filh, which they catch all along the coalt. On both thefe places finh may be laid to dry without any danger. Along the above-mentioned rivulat the French buitt litle huts with branches of pinetrees for diying their fith in rainy weather. Near this are the houfes of the iuhubitants, which form a village called Placentia. Lat. 47, 10. long. 52, 20.

Pat'r County, in the diftrict of Newhern, North-Carolina, is fituated between the Pamtico river N. and Nufe River S. and has Tarrburg its principal town.
plainfield, a town in Windham county, Connecticut, New.En응ad, lituated on the Thames river, 23 miles $N$. of New-London, and 2 S. W. of Canterbuig.

Plymouth, New, Colony, a fubdivifion of the MaflachufetsBay. It extends about 100 miles along the coat from Cape Cod to the northward, and near 50 broad. It was ca'led Plymouth colony from iss firft town being built by the Council of lymouh, in Devonhire, the firt adventurers to this American continent. It is fubdivided into three countics, viz. Briftol, Plymonth, and Barnfaple.

Prymouth, a fubdivifion of the colony of the fame name, fituated in the foushern part of the colony, and watcred by 2 or 3 fmall rivers; the foil in general is r:ch, and conlequently fertile.

Piymouth, New, the capital of the fanc, fittuated near a bay, fu'morly called the guiph of Patuxet, now Plymouth-Bay. It contains about 5-0 fanilies, or 3000 fouls; but the lands adja. cent are not very fruifful. Lat. 41, 56. long. 7c. 30 .

Plymouth, one of the roads in the illand of Monferrat, one of the Caribbee $1 l_{\text {ars }}$ ds,

## P O R

Pocomoak, a river of Maryland, on the E. fide of ChefapeakBay. It rifes erar the borders of Penfylvania, and, after a courfe of 45 miles, falls into Chefapen-Bay, in the lat. of 37,55 .

Pompret, a town in Windhan county, Connceticut, NewEngland, oll the Nathumy branch of the Thames river, 5 miles S. W. of Killingley, and 10 N . of Canterbury.

Port-Angel, a harbour on the coaft of the Soulh-Sea, in the kingrlom of Mexico, in the middle tetween St. Pedro and Compeli•a. It is a broad open bay, with good anchorage, but bad landing. The Spaniards reckon it as good a hasbour as Guatulco. Lat. 13, 32. long. 97, 4.

Port-Marevis, a hatborr on the coaft of the Souih-Sea, in the kingdom of Mexico, a league to the caftward of Acapulco, which thips from Perugenerally frequent to land their contraband goods. Lat. 17, 27. long. 102, 26.

Porto-Bello, a fea- foat town, on the ifthmus of Darien, in the kingdom of Terra Firma, It flands near the fea, on the declivity of a moustain, which furrounds the whole harbour. Mont of the houses are built with wood. In fome the firft flory is of ltone, and the remainder of wood. '1 hey are about 130 in number, but noft of them remarkably fpacious. The town is under the jurifulation of a Governor, with the title of Lientenant-General, as being fuch under the Prefident of Panama.

The town confifts of one rrincipal flect, extending along the Strand, baving feveral others crof. fing it, and running from the declivity of the mountain to the Ahore; together with fome lanes parallel to the principal Atreet, where the ground will admit of it. It has 2 fquares, 1 oppofite to the cuffom-houfe, which is a toneItructure built on the quay; the other faces the great church, which
is alfo of Aone, large and decently ornanented, and ferved by a Vicar and fome other picfls, who are natives of the country. Befides the grat church, there alfo two orhers, one belonging to the Fathers of Mercy, whefe convent is contiguous to it ; the other dedicated to St. Juan de Dios, and was intended for an hofital. The church belonging to the Fathers of Mercy is of ftone, but very mean, and in a ruinous condition; and the convent fo greally decayed, that the religious are obliged to live in the town, differfed in private houfer. That of St. Juan de Dios is a fmall building retembling an oratory, and, like the other, in a very uitsous condition.

At the calt end of the town, in the read ro Fanama, is a quarter called Cuinea, being the place where all the negroes of both fixes, whether flaves or free, have their habitations. 'I his quarter was greatiy crowded when the galltons were at Poito-Bello, moft of the inlabitants of the town retiring bither for the fake of letting their houfes. At the fane time g'eat numbers of mect:anics, who then flock hather from Panama, kdge in this quarter for cheapneff.

Porto Bello, which is but very thinly inhabited, became at the time whon the galleons were there, one of the moll popuious places in the werld. Its fimation on the ifthmus between the South and North Sea, the gocdnefs of its harbour, and its fmall diffance from Panama, have given it the preference to all other places far the rendeavous of the joint commerce of Spain and Peru at its fair; but this trade is difcontim nued.

As foon as advice arrived at Panams that the fleet from Pera had unloaded their merchandize at Panama, the galleons made the beft of their way to Porto Eello, in order to avoid the many dif:

## POR

tempers which affect the feamen, and derive the:r fource from idlenefs. The concourfe of people on this occafion was fuch, that the rent of lodgings was raifed to an exceflive height, the price of 2 middling chamber and a finall clofet, during the fair, being often 1000 crowns, and that of fome large houles + , 5 , or 6003 .

While the feamen and European traders were employel, the land was covered with droves of mules from Panama, each drove confifting of above 100 , loaded with cheits of gold and filver, on account of the merchants at Yeru. Some of thefe were unloaded at the exchange, and others in the fyuare; but, notwithftanding all the hurry and confufion attending fuch prodigious crouds, no lois or difturbance was ever known. He who had feen Porto-Bello at other times, folitary, poor, and a perpetual filence reigning every-where, the harbour without thips, and every place wearing a melancholy arpect, muft he filled with aftonilhment at this fudden change, to fee the buitling multitudes, every houfe crouded, the fquates and ftreets full of bales and cheils of gold and filver ; the harbour full of lhips and velfe's, fome liringing, by the way of the river Chagec, the goods of Peru, as cacao, jefuits-bark, vicuna-wool, and bezoar-ftones; others coming from Carthagena, loaded with provifions: in fhort, a Spot at other times detefted for its deleterious qualitics, became the ftaple of riches of the old and new world, and the feene of one of the molt confiderab!e brarches of commerce in the whole ear:h.

The thips heing unloaded, and the merchants of Pear, together with the Prefident of Panarra, arrived, the fair came under declileration; and for this purpofe the deputies of the feveral parties repaised on board the hip be-

## POR

longing to the commolore of the galleons, where, in the prefence of that commander, and the Prefident of Panama, the former as patron of the Europeans, and the latter of the Peruvians, the prices of the feveral kinds of merchandize were fettled, and the contracts were figned and male public, thit every-one might by then regulate the fale of his effects; and by this means all frime was precluded. The purchates and fales, as well as the exchanges of inoney, were tranficted by brokers from Spain and Pert. After this every merchant began to difpore of his own goods, the Spanilh brokers embarket their cheits of money, and thofe of Peru fent away the goods they hal purchafel by veffels up the river Chagre; and thus the fair of Porto Bello euded.

The harbour of Porto-Bello was difcovered on the 2d of No. vember, 1 502, by Columbus, who was fo charmed with its extenr, depth, and fecurity, that he calle 1 it Puerto-Bello, or the Fair Harbour. Its mouth, though threequarters of a mile broad, is well defended by Fort St. Philio de Lodo Hierro, or Iron Caftle, fituated on the N. point of the entrance; for the S. fide being full of rocks, hips are olliged to keep in the middle, and confequently within 660 yards of the cafle, where there is from 9 to is fathoms water, and a bo tom of clayey mud mixed with chalk and faisd.

On the fouth fide of the harbour, and about 20 yards fion the town, is a large cait!e, calle St. Jago de la Gloita, having before it a fanall point of land projecting in o the harbonr, and on it is a fmall fort calle. 1 st. Jerom, w: hin 20 yards of the houfes. All thefe were demolihed by Admiral Vernon, in the year 1739, with 6 hips only. 'The anchoring place for lange hips is to the

## POR

north-weft of Gloria caftle, near the center of the harbour ; but frall vefiels come farther up, taking care to avoid a bank of fand, ftretcling off 300 yards from St. Jerom's point, there being only a fathom and a half or 2 farhoms water on it. Northweft of the town is a little bay, called La Caldera, or the Kettle, having four fathoms and a half water.

Among the mountains which firround the harbour of PortoBello, beginning from the Iron caftle, and extending to the oppofite point, is one particularly remarkable for its fuperior height, and its being confidered as the barometer of the country, by forctelling every change of weather. This mountain, diftinguifhed by the name of Capiro, fands at the bottom of the harbour in the road to Panama. Its top is always covered with vapours of a denfity and darknefs celdom feen in the clouds of the atmofphere; and from thefe, which are called the Capillo, or cap, the changes of the weather ate indicated; for when thefe clouds thicken, increafe in their blacknefs, and fink below their urual ftation, it is a fure fign of a tempeft; while, on the other hand, their clearners and afcent as certainly indicate the approach of fair weather. It muft, however, be obferved, that liefc changes are both very frequent and rery fubitancous. Nor is the fammit hardly ever free from elouds; and when this does happen, it is only as it were for an inflant.

The inclemency of the climate of Porto-Beilo is well known. I he heat is exceffive, being greatly angmented by the fillation of the town, which is furrounded with high mountains, without any interval for the current of the winds, which would otherwife refrefh it. The trees on the mountains ftand

## P O R

fothick, that they intercept the rays of the fun, and confequently prevent the earih under their branches from being dried : hence copions exhalations, which form large heavy clouds, and precipitate in violent torrents of rain; but thefe ase no fooner over than the fun breaks out afreth, and Thines with his former flendor; though before the astivity of his rays has dried the furfuce of the ground not covered by the trees, the atmofphere is again clouded with another collection of thick vapours, the fun is again concealed, and another torrent of rain fucceeds. In this manner it continues night and day, without any fenfilate diminution of the heat. Thefe torrents of rain, which by their fuddennefs and impctuofi:y feem to threaten a fecond deluge, are often accompanied with fuch tempetts of thunder and lightning, as muft terrify the moft intrepid ; efpecially as this drealful noife is prolonged by repercuffions from the caverns in the mountains, and augmented by the howlings and hiieks of the multitudes of monkeys of all kinds inhabiting the adjacent forefts.

This continual inclemency of the feafon, added to the fatigue of the feamen in unloading the fhips, carrying the goods on thore in barges, and afterwards drawing them along on fledges, caufe a very profufe tranfpiration, and confequently render them weak and faint; while they, in order to recruit their fpirits, have recourfe to brandy, of which there ic on thefe occafions an incredible confumption. The excergive labour, immoderate drinking, and the inclemency and unhealthinefs of the climate, murt jointly injure the beft conftiations, and produce thefe deleterious difeafes fo common $i$ in this country. But it is not the feamen alone who are fubject to

## P O R

thefe difeafes: others, who are frangers to the feas, and not concerned in the fatigucs, are alfo attacked by them ; which abundantly demonftrates, that the caufes of theie difeafes have their rife in the unhealthinefs of the climate, though labour, fatigue, and drinking to excefs, tend to fpread and inflame them.

The number of the inhabitants of Porto-Bello is, therefore, very inconfiderable, and the greateft part of thefe negroes and mulattoes; the whites continuing no longer here than they can acquire a moderate fortune, when they retire to Panama to enjoy it.

Provifions are fcarce at PortoBello, and confequently dear. The only thing in plenty here is fih, of which there is a great variety, and extremely good. It alfo abounds in fugar-canes, fo that the miferable cottages in the country are built with them. Frefh water pours down in freams from the mountains, fome running without the town, and others croffing it. Thefe waters are light. and digeftive ; qualities which in any other part of the cworld would be valuable, but are here pernicious. The country feems to be curfed by nature, fo that what is in itfelf good is here deftructive; for this water, being too fine and active for the fomachs of the inhabitants, produces dyfelteries, the laft ftage of other diftempers, and which the patient feldom or never recovers.

As the foreft borders almont on the houres of the town, the tigers often make incurfions into the ftrcets, during the night, carrying off fowls, dogs, and domeftic animals; even children have often fallen a prey to thefe ravenous creatures. Serpents are alfo very numerous and remark. ably deftructive. But the number of toads exceeds any-thing of that kind hitherto known. When it has rained more than

## POR

common in the night, the freets and fyuares in the morning are paved with thefe reptiles, fo that you cannot itep without treading on them, which is fometimes productive of troublefome bites, for, befides their poifon, hiey are large cnough for their teeth to be feverely felt. They are generally about fix incies in length, and their number is fo great, that nothing can be imagined more di mal than their croakings during the night in all parts of the town, woods, and caverns of the mountains.

Porto-Bello was peopled from Nombre de Dios, a city built by Diego de Niquefa at the Baftimentos; but that place being often ruined by the unconquered Indians of Darien, the inhabitants, by order of Philip II. removed hither in the year 1584, as a place of more fecurity, and at the fame time much betier fituated for the commerce of that country. Lat. 9, 34, 35. long. 79, 45.

Porto-Caber.o, a maritime town in the province of the $\mathrm{Ca}-$ raccas, in the W . Indies, which was attacked without fuccefs in 1743 by Admiral Knowies. It is inhabited chiefly by fifhermen, failors, and factors; and is fix leagues from Leon, the capital of the province.

Porto-Cavalo.-See Cavalo.

Porto-Rico, one of the Antilles Iflands, belonging to the Spaniards, fituated 54 miles to the weflward of St. Domingo. It is about 120 miles in length from E. to W. and $j^{6}$ in breadth from N. to S. The middle of the intand lies in lat. 18, 14. It was difcovered by Columbus in the year 1493, yer it did not attract the notice of the Spaniards till 1509 , who then came in crouds from St. Domingo. It cuft the Spaniards a great deal of trouble to reduce it, the ichibitants being a

## POR

brave people, extremely fond of liberty. They, houever, fucceededat laft, and not only conquered, bat extirpated the natives to the 2 mount of 600,000 : at prefent it contains no more than 6000 , of whom only 15 or 1600 are Spaniards, or Mulattoes. This mountainous and unequal inand, fubjest to exceffive drynefs, as well as very deftructive hurricanes, is neverthelefs fruitful; but its produetions do not exceed the neceffaries of its lazy inhabitants.

The rains, which generally render the feafon unhealthful, fall in June, July, and Auguft, when the weather would otherwife be extremely hot. About midfummer, or the beginning of harvelt, violent hurricanes are frequent; when the plants fuffer greatly by a N.E. wind. From 8 in the morning till 4 in the afternoon, the feabreeze continues; but from 6 till 8 in the morning, and from 4 to 6 in the afternoon, it is extremely hot.

The foil, which is beautifully diverfified with woods, hills, valleys, and plains, is extremcly fertile, abounding with fine meadows, well focked with wild cattle, which were brought original1 l from Spain. A ridge of niountains runs through the ifland from E. to W. from whence great numbers of brooks and rivers iffue, which water the plains, and cloath them with the fineft paf. tures. The fides of the hills are covered with trees of various kinds, proper for building fhips, and other ufeful purpores. But its principal commodities for commerce are fugar, ginger, a little cotton, thread, calfia, maffick, and hides, of which they export only about $2 c 30$ per ann. and a few mules, who pars by fealth to St. Cruz, Jamaica, and to St. Domingo. The idlencfs of this colony is protefed by a garrifon of 200 men, who, with the priefts and magiftrates, coft the government

## POR

50,000 pianters a year. All the utility accruing to the mothercountry from this colony, is to have a place whicre the flects it fends to Mexico may get water and refrefhments. Great quantities of filt are alfo made on the ifland; which, with the great variety of fine fruits it produces, adds greatly to the value of its exports.
Porto Rico, or St. John de Porto Rico, the capital of the inand of the fanie name, is firuated in a fmall ifland on the $\mathbf{N}$. fide of the ifand of Porto Rico, to which it is joined by a caufcy, running aciots the harbour, which is very capacious, and where the largeit fhips may lie with the utmoft fatety It is the fee of a binop, large, well-built, and as badly in: habited as nort Spanifh cities, and is the ecnter of the contraband trade carried on by the Englifh and French with the fubjects of Spain, notwithlanding the feverity of the laws, and extraordinary precautions taken to prevent it. On the S. W. fide of the city is a very frong citadel, called St. Anthony, which at once commandsand defends it ; while the mouth of the harbour is protected by a large, well-forified caftle. In the year 1595 Sir Fra. Drake burned all the fhips in the harbour; but finding it impoffible to keep the place without ahandoning all his other defigns, he did not attempt to make hinifelf natter of it. Thire years after. the Earl of Cumberlund reduced the inand, and had fome thoughts of keepirg it; hut lofing 400 men in the fpace of a monti, by a contagious difeafe, he was gilad to depart, carrying away with him 70 pieces of cennon, and an immenfe hooty in plate. In 16 is the Dutch fent a flreng flect againf Porto Rico, but with no great fuccefs; for they only took and plundered the city, not being able to reduce the cafle. The

city of St. Juan de Porto Rico lies in lat. 18, 20. long. 65, $35 \cdot$
porto det. pran ipe, a fea-port town on the northern coalt of Cuba, 300 miles S. E. of the Havanna, and 186 N. W. of Baracoa. It was formerly d large and rich town, but being taken hy Captain Morgan, with his buccaneers, after a ftout refiltance, it never tecovered itfelf. Neir it are feveral fountains of bitminen. Lat. 20, 55. long. 75, 27.

Port-Roval., a fmall ifland at the mouth of a river of the fome rame, in South-Carolina, confitting of about 1000 acres of exceilent lind. The town of beanfort flands in this innond. See Bratefort. Lat. 32, 23. Iong. 79, 13 .

Port-Royal, a fine river in South-Carolina, about $1 ;$ miles to the northward of the river May. It has a bold entrance, and 17 feet on the bar at low water. This harbour is large, commodious, and fafe for lhipping, and the river runs through a fine fruitfol country, preferabie to moft oblers in this colong. The ifland of Port-Royal, mentioned in the preceding article, lies at the mowh of it.

Port-Royal, anciently the capital of the ifland of Jamaica, fituated on the very point of a natro:s neck of land, which, towards the fea, formed pat of the horder of a very noble harbour of its own name. In this fharbrour above 1000 fail of llips could anchor with the greatet convenience and fafety ; and the Wace was fo deep at the key of l'ort-Royal, that vellels of the greateft burden could lay their broulfides to the wharfs, and load or unload with little trouble, and fimall expence. This convenience had ruch weight with the inhabitants, that they made choice of this fpot for their capital, though the place was a hot dry fand, which did not produce one of the neceffuries of life, nor, even a

## POR

drop of frefh water. However, its advaneageous fiution, and the refort of the pirates, foon readered it a very confiderable place. It contained 2000 houfes, very handfomely buile, and as high-rented as thofe of London. In fort, few places in the world could he compared to this town for trade, wealth, and cutire corruption of mamers. In this flourithing fate it continued till the gth of June, 1692 , when a dreadful carthyuake, which feemed to Make the very foundations of the ifland, overwhelmed lort-Royal, and buried nine tenths of it 8 futhoms under water. They, however, rebuilt the nown after this deftructive thock; but about 10 years after it was laid in afhes by a terrible fire. Notwithftanding this fecond cataftrophe, the extraordinary convenience of the harbour tempted them to rebuild it again. But in the year 1722 one of the molt dreadful hurricanes ever known reduced it a third time to a heap of rubbifh. Warned by thefe extraordinary calamities, which fcemed to mark out this place as a fpot devoted to deftruction, the cuftom-houfe and public offices were removed, by an act of the affembly, and no market futfered to be held there for the future. The harbour, joining to the bay of Kingiton, is now very large and deep: it is the ftation of our fleet in the time of peace, and has a good careening place; but when there is a war with Spain the fleet is ftationed at Point Negril, the W. end of the illand. On the extremity of the neck of land is Fort Charles, mounted with 126 guns, which defend the entrance of the harbour. Port-Royal, at prefent, has only 3 frects, and $z$ or 3 lanes, with about 200 houfes. Lat. 17, 40. long. 75, 52.

Port-Royal., a town in Caroline county, Virginia, on the S. fide of Rappahanock-River, 20 miles E. of Freder:ckfourg, 14 W .

## POT

of Leeds, and 93 N. E. of William/burg.

Portsmouth, a fer-port town in the county of Casteret, in North-Carolina. It is fituated on Core-bank, on the N. end, near Socacoke inlet, having Pam-tico-found to the N . and W . the Atlantic to the E. and the remainder of Core-bank to the W.

Portsmauth, a town in Rhode-1lland, fituated near its $N$. cud, 5 miles S. F.. of Briftol, and is a flourifhing place.

Portsmouth, a new town building in Prince Rupett's-bay, in the ifland of Dominica, between the Salt-works and cratt.

Portsmouth, a town in Virginia, lately deftroyed by the Brit:ih forces under Lord Dunmore.

Portsmouth, one of the principal towns of the government of New-Hampthire, a province of the colony of NewEngland, fituated in the harbour of Pikataque, 63 miles $N$. of Boflon, the chicf town of the province, where the coults are held, and where the governor refides. Lat. 43, 22. long. 70, $35 \cdot$

PortSt. John, afmall town in the province of Nicaragua, in New-Spain, fituated at the mouth of a river on the coalf of the South-Sea, 30 miles N. W. from l.con, to which city it is the port-town. The harbour is fafe and capacious, and formerly the Spanifh mips intended for the Suuth-Sea were buil here. Laritude 12, ro. long. 87, 38.

Fotowmack, a river of which one of its bránches has its rife in the Endiefs Mountains, where, by a mort porterage, it has communic:tion with the Ohio, and in the late war was the chief conviyance of the heavy baggage to Fuit Cuniberland, as well as fupplies to Fittburg. It has another Lranch, which is fuppored its priacipal, that rifes in Penfylvaw'a, and empties ittelf into Che-Cucak-Bay.

## PR O

Prickly Pear, one of the fmaller Virgin-I Aamds, in the W. Indies, filmated near the bosthern coalt of Virgin-Gorda, on which it is dependint. Long. 63, 10. lat 18,25 .

Princrss-Ann, a fmall town in the county of Worcefter, in the eaftern divifion of Maryland.

Providence, a fmall plantation helonging to the government of Rhode-Inland, firit founded by Mr. Roger Williams, paftor of a church of Brownifts, in Maflachuftes-Bay; but being lanifhed ty the magiltrates for his preaching and principles, he was folloned by a confiderable number of people, and fettled at a place without the government; and to this fettement he gave the name of Providence, where he lived above 40 years, and behaved fo well that he regained the good opinion of his countrymen, was ricommended to the favour of the Mallachufets government by fome of the Enghth nobility, wrote againt the principles and practices of the Qnakers, was diligent in the converfon of the lindians, and very ferviceable in obtaining a charter for the gevernment of Rhode-fland. Ihis plantation is a diftrict of abour 20 miles fyuare, feparaied from Connesticut on the W. by an imaginary line drawn from N.t.S. and from Maffachulets by another imaginary line drawn from E. to W. See Khode-I/lar:d.

Providence, the capital of the plantution of its own name, in Rhode-Illand colony, fituated near the mouth of the river Patuxit, 4 miles W. of Rchoboth, and about 9 milcs $N$. of Warwick. It is tolerably large, fyil of inhabitants, and in a very flourifhing condition. Lat. 41, 55. long. 71, 29.
providence, the fecond, with. regard to magnitude, of the Ba hama - Iflands. It is about 36 miles in length, and 18 in breadth,

## PRO

and is now the refidence of the Governor, at the l'own of N.s. fill. It lies in the center of fome handreds of other illods, fome of them very larse, and ohbers no bigeger than recks or knolls ming atowe the forfoce of the wherer. The ancient name of his illand wis Abacon; but Mr. Sayle, who wis twice calt away upon it, called it the fort time by his own name, and the fecond by that of Providence, wheh it fill rontinues. Its chicf commerce arifes from the misfortane of thofe thips that are driven on its coalt, or, in making winter voyages to the continent of America, are foreed to put in for provifions, for want of which they are frequently in great diftrefs. The provifions they purchase here are fent from Carolina, and laid up in foretiones for that purpofe; the iflan $\downarrow$ prodacing little elfe than limes, filt, and Bra-filette-woud, which they carry over to Carolina. They fow peafe and Indian wheat; the former are fit to gather in 6 weeks, and the latter in 12. Fih of various kinds are found in the utmort plenty on the coalt; and in fome parts of the inand are valt numbers of trees and plants. The principal harbour in this iftand is rendered rlangerous by a bar, on which there is not above 16 feet water, Indeed the whole coaft is fo danherous, not only on account of the frength and various direcsions of its currents, which confound the experteft navigators, but alfo by the roughnces of the fea, the frequent and dreadful, though hort, Aorms of thunder, lightning, and rain, wnich feem to threaten the diflolution of the world; to day nothing of the valt rocks that lie every where fea:eered, fome above, fome level with, and others below the furface of the water. Thefe are fuch obdacles to the adventurers of all nations, that they never approach the Bahama. Inands, but when

## PUE

driven on then ly ftrefs of wenwier, of $t$, procure a fupply of prow finas and water. Provilence lies int he: lat. of 25 . long. 77, 30.

Phovidence, an fland in the North.Sea, nitir the cont of Hosdarsi, in New. $\mathrm{g}_{\mathrm{pan}}$, It is ahout is miles in leng'h, and 4 in breadh, but not inhbited. It was mith retebred in the hiftes. ry of the buceancers, who forificd it, and made it for fome time their principal retreat. Its northerly print is called St. Catha-rine's-iflond, is leparated from the main body by a narrow channel, over which the buccancers buile a bridgc. Notwithftanding the frailuefs of this ifland, it may be confidered as one of the beit in the Weth-lndies, both for its fruitfulnefs and the fulabrity of its air; to which we inay add, the facility of fortifying its thores. 1: has pleaty of frefh water, and ahounds with pigeons, and has no ferpent, or other venomous reptile found there. Lat. 13, 26. long. 8o, $5 \cdot$
frovince, a fmall village near Cape-Cod harbour, at the N. extremity of Barnftaple county, Plymouth Colony, New - England, where is a carrying-place.

Prudence-Island, in Nar-raganfet-Bay, Rhode-Imand. It is about 5 mil-s long from N . ${ }^{\circ}$ S. but triangular, being near 1 broad at one end, and ubove 3 at the other. Its $N$. end is about 5 miles from liriftol.

Puebla la Vega, once a famous place in the province of Guatimala, in New-Spain, thres leagues above Realego; but having been feveral times taken, the Billop publifhed an excommunicalion againt it, in conformity to which it was totally deferted, and has never fince been rebuilt.

Puebla de los Angelos, the prefent capital of the province of Tlafeala, or Los Angelos, in Mexico, fimated in the road from Vera Cruz to Mexico, 130 leagues

## QUE

fimm the former, and 60 from the Jatter. The himidings are in geneval of thone, lotiy and elegant; and the tleces, which are broad, ctean, and regular, crois cacho. ther at right-angles. In the center of the city is a large fquare, faid to be equal, if not fuperior, to that of Mexico. It is adoroed or chree fodes with uniform porti. cos, where are mops filted with ali kinds of rich commodities : and on the other is its grand cathedral, which has a very beautifint tront, and two lofiy towers, all buit of flome, and in the modern tafle. It is now the fee of a biflep, which was tandlated hither from 'Tlafeala. Befides the cathedral there are foveral other charches and convents, well-built, and fincly adorned; the beft folis in the country are made in this city. which has alfo a mint and a glafs-houfe. The clergy of this city are fo exceffive rich, that the Bi mon's revenue alone is 240,000 piafters per ann. The houfes are compu'ed at about 16 or 1700 , and the families at about 1000 . A fonall river runs through the town, and the adjucent valley produces vines, and all forts of Enropean fruits. Scveral forts of mineral waters are alfo found in its neighbourhcod. Lat. 19, 55. long. 110 , 3 .
purrysburg, a fettlement on the $N$. fide of the river $S$ avannah, in Granville county, the diftrist of Beaufort, in Soulh-Camolina, 89 mites S. W. of CharlesTown. It has its name from Monfieur Purry, a gentleman of Neufchatel, who being encouraged by the government, both in Ensland and Carolina, undertook to fettle a colony of Swizzers here. See Granville County. Purryforgg lies in the lat. of 32,15 , long. 81 .

$Q$Uebec, the capital of Canada, fituated at the confluence of the rivers of St .

## Q U E

I, aurence and St. Charles, on the $\mathbf{N}$. fite of the former, and a!owt 112 leagues from the fea. The bafon is very fuacious, heing fuf. ficient to contain 100 fail of mun of war of the line. 'The river St. Daurence, which is alout + leagues wille aloove the town, here thrinks itfelf at once tothe hreadh of a fingle mile, and outhis account the city was called Quebec, which, in the language of the Indians of that country, fignifics a thrinking or growing narrower.

The firt ohject that falutes the eye in failing up to the town is a fine cafcade, called by the French the 1.eap of Montmorency, fituated at the emrance of the hitle chamed of the ifland of Orleans, which is about to fect high, and 30 broad, though cauled only by the fall of an inconfiderable lrook. A litule above this cafcade the city of Quetec is fituated, on the narroweft part of the river; but between it and the ifle of Orleans is a fpacious bafon, extending a league every way, and into this bafon the river St. Charles difcharges its waters, fo that Quebec is fitmated between that iver and Cape Diamond, a lofty promontory. The harbour, which faces the town, is fafe and commodious, and the water about 25 fathom deep. At the time when the city was founded, in 1608, the tide reached the foot of the rock; but fince that time the river has funk to far, that a large fpot of ground is left dry, and on this a large fuburb is builr, called the Lower- 'lown, which ftands at the foot of a rocky precipice, about 48 fect liigh. The houfes in the Lower-town are of fone, frong, well-tuilt, and chicty inhabited by merchants, for the conveniency of their trade. It contains 12 or 15000 inhabitants. The fortifications are extenfive, but far from being regular; tho' the place, from its fituation, is capable of making a ftout defence,

## QUE

, on the nd about ca. The cing fuf1 of moll he river alout + wn, here chreadeh , this acRucbec, e of the fignifics narrower, ahutes the $v n$ is a fine rench the fitmated at c channel is, which and 30 nis by the le lrook. foade the d, on the iver ; but of Orlenns tending a into this barles difat Quebec ilver and pronionhich faces commodiut 25 faine when in 1608, ot of the me the riat a large $y$, and on ilf, called f fands at cipice, ahe houfes of fone, chic ly inorthe con-

It conhabitants. extenfive, ular ; tho' uation, is t defence,
if attacked by thips from the river, as their guns cannot injuce the works of the Upper-Tiown, while they themfelves mult fuffer greatly from the cannon aud bombe from thefe Infty pampares. The lower- Town is defended by a platform, flanked uith two bue ftions, which at high water and fring-tides are alnoot levil with the firface of the water. A litthe above the baftion, to the right, is a half-baftion, cut out of the rock; a listle higher a large battery; and higher fill a fquare fort, the moft regular of all the fortifications, and in which the Gov: rnor retides. The palliges which form a communication botweon thefe works, are estremely rugged. The rock which feparates the Upper from the Lower Toun, extends itfelf, and continues, wath a bold and iteep front, a contideraway to the wellward, along the river St, Laurence.

The upper-town is alfo weil. built, and abounds with notile edifices. as churches, palaces, efpecially that of the bitho; ; the cur's of juttice, the houfe of the Hotpitallers, which is a moble building of fyuare tone, fuid to liave colt 40,000 lieres; feveral monatterics, munneries, chapels. Sic. which would take up tno much room to defcribe. But the noblett ftructure of the whale is the palice, where the Governor refiles, where the Grand Council of the colony, while Quebec was in the hands of the Franch, and where all the royal ftores are depofited. The cathedral is rather a clumicy building, and its archiceiture, choir, painting, and carving, are all in a mean taite. The on!y thing beantiful is its tower, which is very large and well-built, and fo advantageoufly fituated as to be feen at a great diftance. The feminary and cloifers are defigned in a better tafte, but were never finithed, having been twice confumed hy fire, namely, in 1703,

## QUE

and 170 . The chapter - honfe. once a famous editice, was altio confumed, fo that the communiiy had harilly room for lolgings.

Befides the Lower l'own ahove mentioned, there is another beyond the Upper 'lown, fituated on the banks of the river St. Charles, which are decorated with country feats and houtes of pleafure, gardens and orchards, that river flowing in beatutiful meanders through a facious plain. There is another fort that llands on the brow of a rugged hill, about 40 fathoms above the town; hut is an irregular fortification, having no ditch towards the city. There is alfo another fort, cailed Diamant, or fort of Cape Diamant; a very conliderahle place hoth for trength and beally. Befides thefe there are alfo feveral wher fortifications, which add to the frome'h of the place. Cape Diamant, which is a folid rock, 400 futhoms high, owes its name to a vit number of file Rones funat on it, fome of which wallt only the hardnefs of the diamond to make them pafs for fiach. The Jefints here, as in moft places, were beft accommoduted; their chuch fune and large, though the convent is fmall; but both are ucll built, and advantegeonly fituater in the Upper lown: their garden is large and well plansed, and at the end ot is a pleafur hatle copre. Thou h the princep if frncture are in the Upper Tox'n, som its being oniginally the omy place, yut the 1.ower Town has greatly the atvantage, the former itanding is very bleak, that the cold is double on what it is in the latter. Befides this, the Lower Town has plenty of water, which is fomctimes farce in the Upper Town. This city, the capital of Canzda, was belinged hy the Englim in 1711, when they were repulfed; but it was :aken in Seprember, 1759, by the army under the comazatad of

## R A P

Lieut. Gen. Wolfe, who perifhed in the glorious conque? ; and with the relt poffeffed by the Englin. -It was befieged by the provincials in December, 1775, who were repulfed with confiderable Jofs, belides the death of Gen. Montgomery. Quebec lies in the lat. of 46,55 . long. 69,48 .

Queensborough, a town in the county of Halifax, in the province of Georgia.

Queen's-Town, a fmall town in a county of Talbor, in the eaftern divifion of Maryland. 5 miles from Kent ifland.

Queen's County, in NewYork, comprehends the $N$. fide of Long Ifland.

Quesne, Fort du, a fortification erefted by the Marquis d: Quefne, on the banks of the river Ohio, in the territories of Penfylvania, $23^{2}$ miles W. of Philadiclphia. About 9 miles from this fort, Gen, Braddock's anmy was deteated, and himate 1lain, on the $9^{1 / \mathrm{h}}$ of July, 1755 . It was, however, aftewands taken in the year 1760 , funce which the fortifications have been greatly angmented, and its name changed into Pittiburg. Lat. $46,11$. long. 79, 57.

Quiva, a province in California, very thin of inhabitants, and thofe very barbarous. It is little known, but lies between 30 and 35 degres of latitude.

## R.

RADNOR, a fmall town of Philadelphia county, in Penfluania. It is well buile, very pleafantly fituated, and contains about 80 families. Here is a congregation of the church of England. It was originally called Amflel by the Dutch, who began building here.

Rappahanock River, a large river of Vigginia, rifing in a low masily : rutind, at the foot

## P E A

of the blue ridge of the Apalachian momutains; and, after a cour fe of ahont 130 miles, falls into Chefapeak-Bay, in lat. 37, 35 , It is very broad, decp, and navigable, above 40 miles from its mouth.

Raprahanock County, a divifion of Virginia, fometimes called Eflex County. It lies on the banks of the river of the fame name, and contains 140,920 acres, and 3 parifhes. Part of the great fwamp or bog, called Dragonfwamp, lies in this county, It is 60 miles long, and covered with briars and thorns, which afford a fecure retreat for uild beafts, the place being almoft inacceffible to the inhabitants. The fouth fide of this county is watered by a navigable river, called Mattapayne, the weftern branch of York river.

Raritan River, a fine navigable river of New Jerfey, tal. ling into Sandy-hook bay. The town of Perth-Amboy ftands at its mouth.-See Perth-Ambs\%.

Rattan Island.-ice Ruatan Ifland.

RAYNHAM, an inland town in Briftol county, Plymouth Colony, New-England, 3 miles N. of raunton, on the river Raynham, 25 miles $S$. from Bofton.

Read's Bay, a road for hips in the ifland of Barbadoes, about midway between Hole-town and Speight's-tomn. It is about half a mile over, but more in depth. Ships may anchor here very fately, there being from 6 to 12 fathom water, the ground a foft ouze, and be defended from all winds, except the welt, uhich blows right into the bay. Lat. 13, 7. long. 59,47 .

READING, a pretty, populous, well-built town in the county of Middlefex, Maflachufets-Bay, 5 miles E. of Wilmington, commodioully fitwated on the banks of a large lake, and has two mills, one for grinding corn, and the

other for fowing deal-boards, large quantities of which are fent to the 'iveft-India lllands. Lat. 42 , 40. long. 71.

Keading, a town in Berks coumy, Penfylvania, fituated on the Schuylkill tiver, 12 miles S. E. from Middleton, and 12 N. E. from Adam's 'Iown.

Realego, a town in the province of Nicaragua, in New Spain, fimated in a plain, on the eattern bank of a river of the fame name, near its influx into the South Sea, 30 miles N.W. of Leon, to which it ferves as an harbour. The inver at this town is deep and capacions, capable of receiving 200 rail of hips; and the hips intended for the South Seas were fome years ayo built here. There are large inirenchments for defending the town, and very fiac docks for building and repairing Mips; but the place bas futfered confiderably from the lucemeers. It is a pretty large town, has 3 churches, and an hofpital furrounded by a very fine garden; but the place is fickly, from the creeks and itinking fiamps in its neighbourhood. Its chief trade is in pitch, tar, ani cordage, for which it is the moll noted place in ail Spanith America. The adjacens country is :reil watered with rivers, whereof that which runs into this harocur has eight branches, whereby goods are carried to and from the villages, farms, and fugar-plantations, belonging to the inhabitants of Leon and other towns. Dampier fays, the land here is the moof remarkable of any on all the coalt, there being a high burning mountain, cailed the Ul' Volcano, feven leagues up the country, and may be feen. 20 leagues at fea. The creek which leads to Leon is on the fouth-eaft lide of the harbour; but the lands on both lides of it are fo low, that they are overflowed every lide, and fo chick with mangrove-trees, as to

## R H O

be almon impaftable. The port, however, is the moit frequented by flipping of any between Acapulco and Panama, hips coming to it from all parts of the South Seas. At the mouth of the harbour is an illand, which breaks off the fea, and renders it fafe and commodious. This ifland, by lying in the mouth of the harbour, forms two channels; but that on the north-weft fide is much the beft. Lat. 12, 17. long. 87, 36 .

Redoneo, a rock between Monferrat and Nevis, Caribbee Illands. It is ahout a league in circuit, of a round form, where is neither culture or inhabitants. Long. 6r, 35. lat. 17,6 .

Reems-Town, in Lancuter county, Penfylvania, on a branch of the great Conettogo creek, which roms into the Sufquehannah river. It is 12 miles $S$. W. of Reading; 5 miles N. F.. of Ellphrata, 20 from Lancafter, and 10 S. of Newmantown.

Rehobota, atewn in Briftol county. ia Now England, fetted about 130 years ago, by a mumber of Eniglifh families, who, being inaitened for room at Weyo mouth, removed hitier, and called the place Rehoboth, but is frequently known by that of Saconet, its Indian naose. It is a large, populons town, of a circuiar form, fanding in the middle of a plain, and ahout a mile and a half in diameter, having the church, the minifter's houfe, and the fehool in the center. It is a very thriving place, and the town of Attichorough, 6 miles to the $N$. of it, has grown out of the increafe ot its inhabitants.

Repulse-ibay. See Wales, North.

RHODE-ISLAND, a frmall illand in the river Delawar, in Newciftic county, in Penfylvania, oppofite a pretty village, called St. Geores.

Rhude-Island, the fmalle!

## R H O

of the provinces which compore New-Englind, lying off MonntHope. It confins of a fmall ifland of that name, and the old plantation of Providence. It is a diftinet government, by virtue of a charter granted by King Charles II. The ifland, whence the province has its name, lies in Narragan-fet-Bay, and is about 15 or 16 miles in length, and 4 or 5 in breadth. Its firf inhabitants were thofe that were banimed from Bofton, in the year $16 \div 9$; and was for fome years the general afylum for fach as fuffered from the fipit of perfecution. There were for many gears great contentions hetween them and their reightiours the Maffachure:s ; but fince there have been 2 churches in the illand, theone Prefoyterian, and the other according to the Church of England, hey are tolerably good reightoours.

Rhode-Inand is, with jumice, called the Paradife of New Fngland, for the foutfulnefs of the foil, and the ten peratenefs of the climate; which, the' not dhove 60 miles S. of Eofton, is much warmer in the uinter, and, being farrounded by the ocean, is not fo much afficted by the land-breezes as the towns on the continent are. There was a very confiderable trade carried on from hence to the fugarcolonies, wih buticr and checte, horfs, Gheep, beef. pork, tallow, cimber, frames for houfes, \&c. till the late tronbles. The plasfantnefs of the ifland invited fo many planters hither, that it was in a few years over-ftocked, and fome of them were obliced to return to the continent, where they purchafed a tract of land, now covered with the towns of Providence and $\mathfrak{W}$ arsick.

The province is dividedinto the following counties and townihips:

County of Providence.
1 Emithfield
2 Warwick
3 Glocciter

Earolina, rifing in the Apalachian mountains in Virginia, and alling into the ocean in the lat. of $33,4.4$. where it forms a kind of long and narrow bay, called Aibemarle Sound, where its mouth is barred. which prevents its receiving fuch large mips as it would otherwife bear. It is paffible to the falls with fhallops. From thence upwards it is generally placid and wile, interrupted with a few i:nconliderabie falls. It is liable to very great frethes, and hats not been as much improved as it is capable, as the commerce of the country is in genseral on James river.

Roanoxe, a fer-nottow: and inlant, at the mouth of Albermarle Sound, where there is a cui-tom-houfe with a collector.

Robart-bay, agulph or bay in the illand of Martinico, near 2 leagues in defth. It is formed by 2 points, that on the E. called Point à la Rofe, and that on the W. called Point of the Gallcons. At the mouth of it are two little illands, one behind the other, which, by breaking the waves of the fea, render this bay the more quict and fecure for thipping; and indeed it is one of the finell natural harbours that can be imagined, being capable of admitting the largef deet with fueh conveniency, that the hips may ride fo near the hoore as to reach it by a plank.

Roc.l Istands, a clufter of uniohabited itlands, lying off the coat of the prowince of Venezue1a, in the kingdom of Terra Firma, about 120 miles $N$. W. by W. of Tortuga, Thefe inlands ftretch themeives $E$. and $W$. aboat 5 leggues, and about 3 leagues from N, to S. The northern innd in this little Archipelago is the moft remarkabie thy reafon of a high, white, rocky hill at the W. end of it, which may be fisen at a great ditance.

On the S . lide of the northern

## ROS

ifland is a freih-water Atream, flowing from the fide of the abovementioned hill, but of an aluminous talte, which renders it very unpleafant. The middle of the inland is low, and over-grown with long grafs, among which are mulcitudes of fmall, grey fowls, not bigger than a black-bird, but lay eggs as large as a maspye. The E. end of the iflund is overgrown with hack mangrove-trees. The foil there is a light fand, and overflown by the fea at fpringtides. The road is on the S. fide, near the middle of the illand. The reft of the Roca illands are low; the next to the northernmot is finall. flat, and even, without trees, bearing only grais, About a league from this are two other illads, not 200 yards difans itom each other, yet the channal between them has waler fufficient ior large thips to pafs. They are both covered with red mangrove-trees, which fourifh prodigioully in low drowned land. The other illands are alio low, and covered with red mangrove-trees. There is good riding in many places becween the iflands, but not without, except to the wellward or S. W. For on the E. and N. E. of thefe iflands, the srade-wind blows, and makes a great fea; aind to the fouthward of them there is no ground under 70,80 , or 100 fathom, chefe under the tand.

The Rorallands lie in the lat. of $11,4.0$. long. 67,30 .

Rochester, a town in Brifcol county, in Plymouth Colony, New-England, about 5 miles $\mathbf{N}$. from the dea-costt, and 5 miles $W$. from Wareham.

Rose, it. a bay in Louifiana, Theltered by a very lone ifland of the fame name, extending to the bay of Penfacola. The channel between the illand and the continent is futiciently wide for thips to pafs from one of thote bays to the other. The inlund is well-watered,

## R O Y

and abounds with a varicty of game. The tides here are more regular than in other parts of the Gulph of Mexien, nad the tide fows iegularly every 12 hours. Lat. 33, 32. Iong. 86. 42.

Rosamia, a fort on the M:ffifippi, in the country of the Nallchees, an Indian tribe inhabiting that comntry. It ftands about 105 miles N. of New Orleans, in a very pleafant and ferisle country, but thinly inhabited. Lat. 31, 9. long. 90, 25 .

Roskau, the capital of the illand of Dominica, one of the Caribuee Iflands. It is fituated on the S. W. part of the inand, on the N. fite of a bay, oppolite to which is Charlotte-town.

Round Rock, one of the fmaller Virgin Ifles, in the WeftIndies, fituated a little to the N . of Ginger lland, and to the $S$. of the clufter of rocks called the Fallen City, or Old Jerufalem. Long. 62, 53. lat. 18, 10.

Rowas, an inland county, in the diftrict of Salifbury, NorthCarolina, in which the town of Salifbury, the principal of the diftrict. is fituated.

Roxborough, a town of Suffolk county, in the colony of Maffichufets, fituared at the bottom of a fhallow bay, without any harbour, but is well-watered. The river Sncit runs through it, and the river Stony a few miles to the N . of it. It has a good freefchonl, and is in a flourifing condition. Lat. 42,36 . long. 70, 30.

Roxbury, a village in Suffolk county, in Maffachufets - Bay, about a mile W. of Rofton Neck, where a camp was formed at the commencement of the prefent difturbances.

Ruyal Isie, an ifland in the river St . Laurence, about 60 miles below lake Ontario. The foil is very fertile, and produces great quantities of grain. It had a frong fort on it built by the French, which was taken by Ge-
neral Amhert, on the 23 d of Auguft, 1760, two days after the firft firing of his batteries.

Ruatan, or Rattan, an ifland in the bay of Honduras, 8 leagues from the Morguito Shore, and about 200 W . and hy S. from Jamaica. It is about 30 miles long, and 13 miles broad, and contains about $250,0 c 0 a c r e s$, naturally fortified with rocks and fhoais, except the entrance into the harbour of Port Royal, which is fo narrow that only one hip can pars at a time; but the harbur is one of the fineft in the world, being fufficicntly capacious for 500 fiil of Thifs to ride in the utmolt fufety, The inand is overgrown with wood, but remarkably healthy, and not near fo hot as Jamaica, there being continually a breeze at E. which keeps the atmofphere cool. It has plenty of exceilent water, a great number of wils hogs and deer, ducks, teal, pigeons, and parrots; and the fica abounds with fiih of all kinds, particularly crab-fifh and fine turtle. Here are great quantities of cocoa-nuts, wild figs, and excellent grapes. But there are alfo ferpents, called owlers, as big as a man's waift, and 12 or 14 feet long, with a very wide mou'h; when they lie fretched out at length, they appear like old fallen trunks of trees, covered with a fhort moff. This ifland was totally uninhavits ed till the year 1742, when the Englifh, under the command of Major Crawford, began a fettlement, in order to protect the logwood cutters, and fecure a trade with the Spaniards of Guatimala, for cochincal, indigo, \& c. On the S. fide it has feveral good harbours. the principal of which is Port Royal. The N. coaft is defonded throughout by a continbed reef of rocks, between which there are very few pafliges for fmall veffels. 'T his inand is fo well fituated that it may be regarded as the key of the bay of Honduras, and

## S A B

milies; but the misfortunc is, that this delightful place has no porr. The filhing aloout it, effecially for the bonetta, is very advantageous; nor is there any want of other neceffary refrelhments. The fea is fo thallow near its coafts, that the flones may be feen at the botton; fo that only floops can conce near it, nor even they any where but at a fimall fandy creck on the fouth fide of the illand, where the inhabitants lay up their canoes. There is a road cut out of the rock to the top of it, fo feep, that it feems to be a fottification rendered inspregnable by nature, it admitting only one perfon to pafs at a time. The inhabitants have in many places, for their greater fecurity, piled up large heaps of flones on fcaffolds, fo difpofed, that by only pulling a rope the feaffolds fall, and difcharge fuch a thower of ftones into the road, as would crulh a whole army to pieces. The ifland is divided into two parts, containing about 50 families, and 130 gavcs, who acquire a genteel liveliliood by making fhoes, in which their principal trade conlifts. They alío cultivate cotton, which they manufacture into ftockings. They have alfo a little indig, and cotton. They live in harmony with each other, and their houltes are cunvenient and well furnilhed. Lat. 37, 37. long. 62, 50 .
hiftle saba, one of the fmaller Virgin Ifsads, fittated to the S. of S. Thomas, and belongs to the Danes.

Sable, an illand in the Atlan-tic-Ocem, 35 leagues S. E. of Cape-Brton. It is firall, and without any port, or product, except briars. It is very narrow, and has the flape of a bow. In the middle of it is a lake $s$ leagues in compats, and the ifland iffelf not more than ten. It has a fandbank at each end, one of which rums N. E, the other S. W. It

## S A G

has lofty fand-hills, which may be feen, in slear weather, 7 or 8 leagues off. Lat. 44, 85 . longitude 59, 2.
Saco-River, a riverin NewEngland, rifing in New-HampThire, and, after a courfe of about 80 miles, falls into the Atlantic Ocean, hetween Cape Porpus and Cape Elizabcth, in the province of Main.

## Saconet.-Sec Rehobeth.

Sacrament, lakest. now called lake George, a large coljestion of waters, connected by a Arait with lake Champlain, ahout 120 miles $E$. of Ofwego. At the S. and of this lake, Sir William Johnfon gained a vistory over the Baron Diefkau, commander of the French forces, in the year 1755 .

Sacrifices-Island, a fmall ifland in the Gulph of Mexico, about half a mile from the land. Grifolva, who difcovered it in the year 1518, gave it this name, from his finding on it a bloody altar and reveral dead bodies, which he fuppofed the Indians had facrificed the night before. It is very fmall, and minhabited. Lat. 19, 10 long. 96, 52.

Sagadaboc, a jurifdiction of Maflachufets-Bay, in New-England, granted by King Charles 11. in the year 1634 , to his brother, the Duke of York, and thence formerly called the Duke of York's Property. 'Ihisterritory, or tract of land, was then deferibed in the following manner: " all that " part of the main land of New-
"England, beginning at a certain "place called St. Croix, adjoining " to New-Ecotland, in America; " and from thence extending a" long the fea-coalt, to a certain "place called Pimaquin, or Pi" maquid, and fo up the river "r thereof to its furthent head as "it tends to the northward, and "extending from thence to the "river Quenebee, and fo up by © the Morteft courfe to the river

## S A G

" of Canada northward." This territory was then annexed to the government of New-Yoak: but the Duke, on the demife of his brother, Chartes II. afcending the throne of England, thefe lands, on his abdication, reverted to the crown. It is now called the county of Lincoln, in the province of Maflachufets-Bay, NewEngland, to which government it belongs; who have lain it out into townhips, as may be feen under the article Main.

Sagadahoc-River, the W. branch of the river Kenebeg, in York county, Malfachufets-Bay, New-England. It rifes in lat. 44 , 50. N. E. of the 4 hite-Hills, not far from the hacad of ConnedticutRiver, and cmptics itfelf into Merrymecting-bay, afte: having run a courfe of above 200 miles, nearly $\mathbf{N}$. and $S$.
Sagufnay, ayrovince of Carada, bounded on the W. aid S.W. by the river of the fime rame; on the N. F. by a nation of Indians, called Kilehinoas; on the N. W. by that of the Ffguman ; and on the S. F. by the rirer St. Laurence. The territory and lands on cach fide of the r ver were found fo indifferent, and the in colony that fottied at Tadouflic fuffered fo much there, that the French were for a 1 rg time difcouraced from featling in Canada; but at length finting up as high as Qucter, they found frefh encouragement, and have fince that time fourimerl romakably, iill the whole comtry, tegenher with Quebec, its capital, fell into onr hanc's in the year :759. It viclds the greatef plenty of namble of feveral kinds, fo that even the houfes of privat fatons are generally built with it.

Saguenay-River, a river of Canada, having its fource in the river of St. John, and, after a confiderable courfe, falling into that of St. Lancence, at the town of Tadouffac. It is not

The harbour is fufficient to contain 25 fill of men of wir, has good anchorage, and is well Moltered from forins, being of a circular figure, deep, and furrounded at a diftance with very high rocks.

Siants, 2 illands near GuaEloupe. -See Xaintes.
Salamancade bacalar, a fimall, but hriving town of Mexico, tolerably well built, and fitured on the E. fide of the iflhmus, which joins the peninfula of Yucatall to the continent. It contains about 120 houfes, with a bad fort, and a forall garrifon, defygnel to hinder the contraband trale, and the excurfions of the woos-cutiers, or byymen, but without effect. It flands in a low fen:y country, every where covered with water. The air is unhealthy, and infefted with muke. toes, and the waters fwarm with alliga'ors. Lat. 17, 2. long. 90, 30.

Salem, a tuwn of Weit-Jerfy, in North-America, fituated about half-way up the river Salbam, from which it has its name. It contains aboat 120 familics, and is condidered as one of the bet towus in Weft-Jerfey, with regard to its lituation, buildings, and trade; it once gave name to a country. It lies 30 miles to the fomburd of Philadelpha, and ahout 2 miles $W$. of the Delandr. Lat. 39, 35. longo 75, 5 I .

Salem, a rown in the parilh and county of I Oobbs, in the inland part of N. Carolina.

SALEM, the chief town of Effex - connty, Maffachufets - Bay, New-England, 13 miles N . of Botion, having one of the fincttbuild churches in the whole coun-

## S A L

ty. It ftands on a plain between 2 rivers, and has 2 harbours, called Winter-harbour and Sum-mer-harbour. It was here that the planters of Mafichufers-Colony made their firft fettement; and here the parliament, in 1774, removed the port from Bolton, when the prefut troubles in $A$ merica commencej. This town is very famons for building hips and fifining-ketches. A good trade is carried on from hence to the fugar-illands. latitude $4^{2}, 40$. long. 70, 32.

Salisbury, a town in Effexcounty, in the province of Maffi-chufets-Bay, in New-England, fituated on the N . fide of Merri-mack-river, which is there about half a mile broad, and over which there is a feriy. It ftands near the fea-coaft, 40 miles N. of Bofton, and 20 from Portimouth, in New-Hamphire. Lat. 42, 55. long. 70, 35 .

Safisbury, a town in the county of Rowan, in N. Carolina, fituated in a trading path of Prederick lburg, in S. Carolina.

Salisbury, or wiatiak, z town in Litchfield county, Connecticut, 2 miles N.W. of the Falls in Stratford-river, 8 miles S. of Sheffield, and 10 N. E. of Sharon.

Salisbury, in New-York, on the W. bank of Hudfon's-river, 24 milcs N. of Kingfton, 7 miles S. W. of Lunenburg, and 5 N. W. of Livingfon.

Satr-Isiand, one of tlec fmaller Virgin-10cs. It is fituated W. of Cooper's - ifland, in the King's-channel, and Sir Francis Drake's-bay, and E. of Peter'silland. Long. 63. Lat. I8, 4.
saluda, a county in S. Carolina, which provides one of the regiments of militia.

Salvador, St. a fimall city in the province of Gnatimala, in Mexico, finated at the head of a river, which at about 12 miles diftance falls into the South-Sea,

## SAM

It has a Spanih governor, but very little trade, and a finall number of boufes. On the N. fide of it are lofty mountains, called the Chantales, inhabited by poor Indians. In the bottom, where the cown flands, are plantations of fugar-canes and indigo, with a few farms for breeding cattle. Lat. 13, 5 . long. 90, 3.

Salvateon de Yguey, a fmall town in the infand of Hifpaniola, 28 leagues $E$. from St. Domingo. It is famous for its fugar-works and luxuriant pafeures, in which valt nambers of cattle feed. Latitude 18,6 . longitude 67, 58.

Samballas Point, a rocky point, remarkably long and low, on the $N$, fide of the ifthmus of Darien, and fo guarded with rocks for a mile off at fea, that it is very dangerous coming near it. Lat. 9, 40. long. 78, 43.

Samballas-Isalnds, a multitnde of fmall iflands fcattered at very unequal diftances, fome onfy 1 , fome 2 , fome 3 , and fome 4 miles from the fhore, and from one another, cxtending a very confiderable diftance along the northern thore of the ifthmus of Dasien, and with the adjacent country, its hills and forelts, of perpetual verdure, form a lovely profpeft from the fea. Thefe iflands feem to lie as it were parcelled out in clufters; and beiween moft of them are navigable channels, by which thips may pafs through, and range along the coaft of the ithmus, the fea between them and the thore being navigable from one end to the other, and atrords every whare good anchoring in firm fandy ground, with good landing either on the inands or the main. In this long channel a number of Chips may always find fhelter, be the wind which way it will; fo that it was the general rendezvous for the privaeters on this coalt. Moit of thefe inands ave low, flat, and fandy,

## SAN

covered with a varicty of trees, and abound with fhell-fing of feveral kinds: fome of them alfo afford Springs of frefh water, and convenient places for carecning thips. The long channel between the Samballas and the ifthmus is from 2 to 4 miles in breadth, extending from Point Samballas to the gulph of Darien and the coalt of the ifthmus, full of fandy bays, with many brooks of water,

Sandwich, a town in Barn. ftaple county, Plymouth Colony, New-England, 5 miles E. of Buz-zard's-bay, and 10 N. E. of Falmouth, on the ifthmus that forms the peninfula, near a river of the fame name, at the bottom of Cape-Cod bay, whence runs a point of land called Sandy-Point ; and notwifhftanding its lituation is but an inconfiderable place, having no harbour, and the approach to it impeded by fands.

Sandy Point, a cape, or point of land, in Barnftaple county, Plymouth Colony, New - England, forming the northern cape of the frait between the main land and Nantucke-ifland. A pretty large fand Artiches off from the point to the eaftward, and thence it had its name. Latitude 41, 24. Longitude 92, 35 .

Sandy Point, a confiderable town on the iffand of St. Chriftopher's. It is lituated on the N. W. corner of the inland, and was the capital of the Englifi divifion of the ifland betore the treaty of Utrecht, when the ifland beceme the property of the Englifh.

Santa Cruz, a fmall town on the illand of Cuba, 63 miles E, of the Havannah. It has a good harbour at the bottom of the bay of Matanzas. Lat. 23, II. long. 81, 5 .

SAnta Cruz, one of the Caribbec-Iflands, 8 leagues S. E. from lorto Rico, and 5 S . of St. John. It is triangular, about 8 or 9 leagues in length, and

2 in breadtly. It is a flat ifland, without mountains, and badly watered. It was occupied by the Dutch and Englift, who having foon quarrelled, the Drtch were beaten, and expelled in 1646 , atter a very bloody engagement; - 1200 Spaniards drove oltt the Englifh in their turn; and foon after the French came, who expelled the Spaniards. The French, remaining maters of the ifland, fet fire to the woods, and the conflagration, upon which they gazed from the fiips, lafted feveral months; as foon as it was extinguifhed, they landed and effablifhed their fettement. The foil is remarkahly fertile; producing tobacco, cotton, anatta, indigo, and fugar, equally well ; and the progrefs of this colony was fiwh, that, in the thort fpace of in pears after its foundation, it contained 822 white inhabitants, with a proportionable number of faves. It foon after belonged to the Order of Malta, who, in 1664 , fold it to the French Weft-India conypany. The regalations of thiscompany were fo injurious, ehat this colony went to decay, and in 1636 the whole of the inhabitants, amounting only to 300 whites and 400 blacks, quitted the ifland; when it was left deftitute and uncultivated till 1733, when France fold its property to Denmark for 164,000 rixdollars. The Danes at firft reftricted the trade; but in 1754, this and their other inands were opened to all the Danilh fubjects, who began to import negroes, by paying 4 rix-dollars per head tax. There are now above 30,000 flaves, who pay each a capitalion of 1 crown. The labour of thefe negroes furnifh the cursoes of 40 mips, whofe burthen is from 120 to 300 tons. The plantations yield a little coffee, and ginger, fome wood for inlay-work, 800 bales of cotton, and 12 millions weight of rough fugar. This ifland is divided into

## SAN

3;0 plantations, each plantation containing $r 50$ acres, of 40,000 fquare feet each. Two thipds of the land are fit for fugar. It has only one town, called Chriftian. fred, which is defended by the cannon of a fortrefs, as well ag the principal harbour on the $N$. coalt ; but another town is now linilding on the $W_{+}$coant, to be called Frederick ltad. The greatelt part of the inhabitants confit of Finglifh, with Irifh, Germans, Moravians, and a few Danes. The Englifh and Dutch pollers the betk plantations in the ifland, and the chief part of its riches pafs into the hands of foreigners. It received confiderable damage by a Morm, Aug. 30, 1772, when the fea fwelled above 70 feet above the ufual height, and the wind tore all the houfes near the fhore even to the foundations; beams, planks, \&ac. flew through the air like feathers. The wall round the King's forehoufes, though above a yard thick, was totally fwept away, and the trees torn up by the roots, which left holes in the earth $\sigma$ feet decp. 250 perfons were overtaken by the fea in their flight to the mountains; and at Shriftianftred 460 houfes were demolifhed. All the magazines and R ores were ruined; and the fhips in the harbours were drove on More, 50 and 100 yards on land ; and the whole damage compured at above 5,000,000 of dollars. On the N. fide there is a large bay, having in the middle of it a little inand; and on the $W_{\text {; }}$, fide of this bay the Go~ vernor's houfe is erented. Latitude 17, 49. long. 63. 33.

Santa Fe.-Sie Fé.
Santa Maria, a river in the ifthmus of Darien, falling into the gulph of SI. Michael, in the South-Sea. The tide flows up it 8 or 9 leagues, and fo far :t is navigable; but beyond that the river divides into 2 branches, and is only fit for canoes.

## SAN

Santa Maria, a town on the river of the fame name, about 6 leagues from its mouth. It is a conliderable toun, occaGoned by the gold-mines in its neighbourhood, which are worked to great advantage; hut the country about it is low, woody, and very utheallig. Latitude $7,30$. long. 82, 2 c .

Santa Martita, a province of Terra Firma, in Sonth-America, bonndel on the E. by Rio de la Hacha; on the S. by New Granada; on the W. by Carthagena; and on the N. by the North-Sea. Its extent from E. to W. is aboht 140 niles, and above 200 from N. to S. The climate is fultry and hot, efpecially near the fea-coalt; but the tops of the high mountains are covered with flow, which render the inland parts much colder.

Santa Makraa, the capital of the above province, fituated near the fea, at the foot of a prodigious mountain, whofe fummit is generally hid in the clouds, but in ciear weather, when the sop appears, it is covered with friow: The city was formerly very populous, but is now much decaged; occafoned hy the Spanifh fleets not louching there, as they anciently ufed to do. 'The houfes in general are built with canes, and covered wilh palmetto-leaves; fone are covered with pantiles. The Governor of the province, together with the oither officers, $r$ dides here. It is the fee of a bifhop, fuffragan to the mertopolitan of New - Granada. The ilhhabitants trade with the Indians in the neighbourhood, who bring hither earthen-ware and cot-ton-muffs. The country round the city produces hut few cattle, being extremely mountainous, and the Spaniards who inhabit it are bitt few. At a league and a half diftarce from Santa Martha are large falt-poids, from whence they extrach very good falt, and
earry it into the neighbouting provinces. Between the city and the mountains of the Andes, which are rocky and barien, the land is level, and produces abondance of oranges, lenoons, pine-apples, and grapes. In fone places there are gold mines, and in others precions ftones of great value. Lat. 11, 37. long. 74, 15 .

SAONA, a frall ifland nearte. S. E. point of the ifland of St. Domingo, abounding with pla. fant wonds and pafteres, but is at prefens uninhabited, and frequented only by fifherinen, at the time when turiles come on fore to lay their tggs. It lies but 5 miles from the nearclt part of St. Do. mingo illand, and 3 E. of St. Cdtaline. The N. and S. lides of the inand are foul and rocky; nor is the E. fide, wiere hips may ride in 7 or 8 fathom water, wellflaclaced from the winds. It is between 7 and 8 leagues in length, and about 4 in hreadih.

Savage-Island. Sec W'alcs, North.

Savannah, a river in Carolina, rifing in the Apalachian Mount ins, and, after a S. E. courfe of 200 miles, falls into the ocean about 32 miles to the fouhward of Port-Royal ; the lower part of it Separates the colonies of Carolina and Gecrgia.

Savaniah, the capital of Georgia, finely fituated for trade, on the river of the fame name; the navigation being very fafe, and thips of 300 tons burdew may lie clofe to the town, and, if 1 iquifite, go 200 iniles above it. It is about 10 miles from the fea. It has, befides a church, a courthoufe, a fore-houfe, a goal, a wharf, a guard-houfe, where are feveral caunon mounted, and a conflant watch; belides fome other public buiddings, and above 250 houses, which are regularly built 22 feet by $: 6$, at fome diftance from each other, for the fake of being more airy, and form

by a tax upon the county. Lat. 40, 34. long. 74, 22.

Stephen's fort, a fquare fort in the province of New Hampfhire, fituated on the eafteru bank of Connedtcut river, 30 miles N . of the village of Northfield, and 59 S. W. of Crown-Point.
Stoughton, a town in Suffolk county, Miflachufets-Bay, 5 miles S. of Milton, and 10 N. E. of Walpole.

Stow, a town in Middlefex county, in Maffachufet s-Bay, on a branch of the river Concord, about 20 miles $W$. of Cambridge.

Sudbury, a town in Middlefex county, Maflachufets - Bay, fitmated on a river of the fame name, which runs into Concord river. It is about 5 miles $S$. of Concurd, and 14 W. of Cambridge.
Sufrolk County, adivifion in Maffichufets - Bay, including Bofton, Bofton-harbour, \&c.

Suffolk Countr, a divifion of the province of New-York, including all the eaftern part of Long - Illand, Shelter-Inand, Fifher's-Inand, Plum-[Iland, and the Ine of wight. This large county has been long fet!!ed, and, except a fimall epifcopal congregation, confifts entircly of Engliih Prelbyterians. The farmers are, for the molt part, graziers, and, living at a great diftance from New York, the principal part of the:r produce is fent to the markets of Bofton and Rhode-lfland. The Indians, who were formerly numerous here, are now very inconfiderable; and thofe that remain generally bind themfelves fervants to the Englifh.

Sunburn, a town in New Weft Jerfey, on the E. bank of the E. branch of the Delawar river, 12 miles S. E. of Philipfburgh.

Sunaury, a town in the diftrict of Southern, in the province of Georgia.

SUNDERLAND, a town in

## S U T

Hamphire county, MaffachuretsBay, on the E. Fide of Conneeticut river, 8 miles N. E. of Hatfield, and 2 S . E. from Deerfield.

Superior lake, a large collection of waters, or rather a frefh-water fea, being near ico leagues in length, and-o in breadeh, and interfperfed with feveral very confiderable illands. The middle of it lies in the lat. of 47, 10 . long. 85 , 10. The country round it is very little known, being frequented only by the Indians in their huntings. It is joo leagues in circuit.

Surry, an inland county in the diftrict of Salifbury, NorthCarolina.

SURRY, one of the counties of Virginia, lying to the N. of that called Ille of wight county. It contains int,050 acres of land, and has two parithes, namely, Southward, and Lyon's Creek.

Sussex, a county in New Weft Jerfey.
Sussex, one of the counties in Peniylvania, and had its name from Mr. Penn's feat in the county of Suffex, in England. It lies along Delawar-Bay, and is inhabied by planters, whofe plantations lie fcattered at a diftance from one another. according as the fetthers made choice of different fpots of ground.

Susquehanna, a river who rifes near the lakes in the country of :he Mohawks, in New York, and running S. his feveral fulls, which prevents it, having any extenfive navigation inland; yet one of its branches extends iffelf near the head of the Ohio, where is a car-rying-place for 40 miles, and makes way for a communication with that river. It empties itfelf into Chefapeak-Bay, in Maryland.
Sutton, a towa in Worcefter county, Maffichufets-Bay, on a branch of Munford river, 7 miles N. of Uxhridge and Douglas, and the fame diflance F. from Oxford, and 9 S. from Wurcfler.

## TAB

Swansey, a town of NewEngland, in New-Plymouth Colony, fituated at the mouth of Providence river. It is a large feattering town, but carries on a tolerable trade. Lat. 42. 5. long. 71, 10 .

## T.

TAbago, de Tobago, one of the Carribbee-I Ilands.See Tobazo.

Tabasco, a province of Mexico in New Spain, bout. ded on the W. hy that of Guaxaca; on the E. br that of Yucatan ; on the N. by the Gulph of Mexicr, and bay of Campeche, along which it extends about 40 le.gues from E. to W. It is a narrow flip running along the fea-ftore; but neither very hitalthy, nor the foil remark ably fruitful. The fea-hore of Tabafeo is quire deftitute of harbeurs, hut has the mouths of two large rivers, both rifing in the neighbonrhood of the South-Sea, one of which is called Tabafco, and has the capital of its province fituated on jts banks; as well as further $W$, the city Chiapa, the capital of that province. They have alfo great plenty of cocoanuts, which they fend to Vera Cruz. Moft of the country is flat and moint, has many marfies and lakes well ftocked with fifh. It rains 9 months out of the 12 , fo that the air is excclively damp, and in Feb. March, and April, remarkably hot, when infinite fwarms of gnats and other infects are produced. The coalt, from the begining of Sepiember to the end of March, is fubject to tempeftuous northerly winds, which render failing dangerous during that feafon. TheSpaniards brought hither vines, lemon, orange, and fig trees, which all thrive here. Here are large thickets of mangroves and bamboes, and great woods of cedar, Brafil, \&c. frequented by lions, tigers, wild

## TAD

bears, and deer. They have great numbers of rabbits, apes, and fquirrels, with the common fruits of America, befides rice, barley, and garden herbs, different fpecies of European fowls, and others to us unknown. On the banks of a river, called alfo Tabago, are great numhers of cabbage-trees, teo feet high, and the targeft cot.. ton-trees ever feen in any part of the world.

Tabasco, or Vilia Hermosa, the contemptible capital of the above province, called alfo by the Spaniards Nueftra Sennora de la Vittoria, from a great victory obtained here by Cortez on his firf arrival. It ftands on an ifland at the mouth of the river Girijalva, 90 miles E. of Efpirito Santo, and 160 S. E. of Mexico. The river Grijalva divides itfelf, near the fea, into 2 branches, of which the weftern falls into the river Tabafco, which rifes in the mountains of Chiapa; and the other continues its courfe till within 4 leagues of the fea, where it fubdivides, and feparates the ifland above mentioned from the continent. The ifland of Tabafico, on which the town of that name is built, is about 12 leagues long, and 2 and $\frac{x}{2}$ broad. The town is not very large, but well built, and confiderably enriched by a conftant refort of merchants and iradefmen at Chriftmas. Lat. 17, 40. long. $93,39$.

TAcunga.-Ses Letacunga.
Tadousac, a fmall place on the banks of the river St. Laurence, at the mouth of the river Saguenay. It is a place of great traffic and refort for the wild natives, who bring hither large quantities of furs to exchange for woollen cloths, linen, iron and brafs utenfils, ribbands, and other trinkets. The mou'h of the river on which it ftands is defended by a fort erected on a rock, almoft inacceffible. Lat. 46, 50, long. 68, $3 \cdot$
lena,

## TEN

## t name

Taebot County, a diftrict of Maryland, lying on the W. of Kent, from which it is divided by a double row of trees, and is bounded on the S . by Cecil county. In this county, the capital, formerly called Oxford, but now Williamftadt, is fituated.-See Williamfadt.

Tamaroas, or Tamaros, a large illand of Florida. It lics about 25 leagues above the Ohio, with an Indian nation oppofite to it on the continent, of the fame name; alfo another denominated Cahokia, who dwell on the banks of Chepuifto.-See Florida.

Tamaleque, all inland city, in the province of St. Martha, on the cuaft of Terra Firma. It is fituated on the banks of the river Magdalena, and carries on a trade on that river from New Granada to Carthagena, from wheuce it is above 250 miles.

Tapanatepecue, a town of Guaxaca, and audience of Mexico, in the province of this name. It ftands at the foot of the mountains Quelenos, at the bottom of a bay in the South-Sea; and is one of the pleafanteft places in this country, and the beft-furnihed with fleih, fowl, and fifh, being contiguous both to the fea and a river, amidft rich farms flocked each with between 1000 and 4000 head of cattle. Here are delightful walks of orange, lemon, citron, fig, and other fruit-trees.

Taunton, a town in Briftol county, Plymouch Colony, NewEngland, on the river Titiquir, 4 miles S. W. from Rainham, and 6 N.E. from Dighton.

Tecoanteprpue, a town of Guaxaco and Mexico. It lies at the foot of a mountain, on the top of which is a volcano.

Teneriffe, a town of Santa Martha and Terra Firma. It flands on the eaftern bank of the great river Santa Martha, below its junction with that of Magdalena, about 135 miles from the

## TER

city of Santa Martha, towards the S. the road from which capital to Teneriffe is very difficult by land; but one may go eafily enough from one to the other, partly by fea, and partly by the above-mentioned river.
tequajo, or Tiruas, a province of Mexico; according to the accounts of fome Spanifh travellers, heing about lat. 37 , where they found 16 villages.

Tenecum, a place of Penfylvania, where the Swedes have a meeting-houfe, but whether lying on the borders of the county of Buckingham, or thofe of Philadelphia, does not appear.
terradelatiaton, i.e. the Ploughman or Labourer's Laild, one of the northern countries, which the Englifh call New - Britain. It lies S. W. of Groenland, with Hudfon's Straits and part of the Atlantic-Ocen on the N.E. and the latter alfo on the E. on the S.E. it is divided from Newfoundland by the ftraits of Belleine; on the S. it has the gulph and river of St. Laurence, with part of Canada; and on the W. Hudfon's - Bay. It extends from lat. 50 to 63, and from long. $5^{1}$ to 79 . It is nearly of a triangular form. We have no knowledge of its inland parts, and but an imperfect one of its coants. The extreme poverty and brutal fercenefs of the people dveelling near the fea-fhore, with the very pinching coldnefs of the climate, have deterred the Europeans from making any fettlements there. This country is inhubited by a fierce and fivage peoplc, called Efkimaux,-which fee.
Not long ago, a new fea or ftrait was difcovered on the weftern fide of this land from Hud-fon's-Bay : but whether it be only a gulph, or conmmunicates with Hiudfon's-Bay, or the North Sea, is a point not yet afcertained. All that we find from the belt maps is, that the entrance into

## TER

that fea lies between lat. $5^{8}$ and 59.

Tferra Firma, a kingdom of South Ancrica. It begins northwards at the river of Darien, and fretching itfelf along by Nombre de Dios, bocas de 'Toro, Bahia del Almirante, and isterminated weftward by the river de los Dorados, in the North Sea. Tourds the South Sea, beginning on the weftern part, it extends from punta Gorda in Cofta Rica, by Pumta de Marialos, Morro de l'uercos, to the Gulph of Darien, whence it continues fouthuard along the coaft, by Puerto de Pinas and Morro Quemado, to the Eay of St. Bonaventura. Its length from E. to W. is iso leagues, but, if meafured along the coalt, it exceeds 230 ; and ins breadth from N. to S is the fame with that of the ifthmas, including the whole province of lanama, and part of that of Darien. It contains the three provinces of Panama, Darien, and Veraguas: which oihers fubdivide, from W. to E. into Popayan, New Granadia, or Santa Fé, or Caftello del Oro, and New Andalufia on the S. then, going from E. to W. Vetsczucla, Rio de la Hacha, Santa Martha, Carthagena, and 'lera Firma l'oper, which is the ifthmus of Darien, on the N .

Terra Firme has part of Pera, the Ainazon's coun'ry, and part of Guiana, on the $S$. the tiver Oroonoko, which parts it from Guiana, on the S.E. the Atlantic Ocean on the E. and that part of it called the North Sea on the N. and the South Sea on the W. where bie ifthmus of Darien alfo parts it from Mexico, or New Spain.

The narroweft part of the ifthmus is from the rivers Darien and Chagre, on the North Sea, to thote of Pito and Caymito on the Soush Sea; and here the diftance from fea to fea is about is leagues: afterwards it increafes in breadh

## THA

towards Choco and Sitara; and the fame weltward, in the province of Veraguas, forming an interval of 40 leagues from fea to fea.

Along this inthmus run thofe famous chains of lofty mountains called the Andes; which, beginning at fuch a prodigious difta ce as the Terra Magcllanica, traverfe the kingdom of Chili, the province of Ruenos Ayres, throl:uh Peru and Quito ; and from the latter province they contract themfolves, as it were, for a palfige through this narrow ifthmus: afterwards, again widening, they continute their courfe through Nicaragua, Guatimala, Cofta Rica, St. Migul, Mexico, Guajac., la luebla, and others, with feveral arms and ramifications fir Itrengthening, as it were, the fuathern with the northern parts of Ancija.

The capital of the whole kingdom of Tera Firma, as well as of its particnlar province of the fame name, is Panama; befices which are the two cities of Porto. Bello and Santiago de Neta de los Cavalleros, with one toxn, fome few forts, feveral villages and country-feats, \&e. The other places in the two remaining distijets are not very confiderable.

Terka Pikma Proper.Sce Darien.

Testigofes, inands near the coalt of New Andaluia, in Terra Firma, in South America.

Tewnesbury, a village in Midalefex county, MallachnfeteBay.
'Гhames, a river of New. England, which, rifing in a lake N. of the Maffechufus country', runs directly fouth, and falls mto the fea, below Nuw Lordon, and E. of Connecticut river. 'This is a confiderable flream, with feveral fimall hranches, the principal of which are called Glafs river, Ruffel's Delight, and the Indian diver.

## THO

Thomas, St, or the Danes Island, the largeft and moft northerly ifle io leagues to the E. of Porto Rico, one of the Vir-gin-Illes, in the Weft-Indies It is about 3 leagues in length, and, on an average, one in breadth. The foil is fandy, and badly watered. It abounds with potatoes, millet, mandroca, and moft forts of fruits and herbage, efpecially fugar and tobacco; but is extremely infelted with muketges, and other troublefome vermin. This ifland produces oranges, citrons, lemons, guavas, binanas, and fig-trees; but they have fe:v horfes or black cattle, yet are furnifhed with feih-meat enough from buto Rico. Here are excellent kids, and all forts of wild-fowl, but from the numbers of people, and great plenty of money here, provifions are, as is moft commonly the cafe, dcar. Here is a fife and commodious harbour, with 2 natural mounds on it, calcubated, as it were, for placing 2 butteriss for the defence of its entrance. Though the illand is only 6 or 7 leagues in circuit, it has $=$ mifters; the Danes and Bandenburghers, the latter of which are under the protection of the former; though all the trade liere is carried on by the Dutch, under the name of the Dunes. Nearly in the center of the harbour is a finall fort, without ditch or out-works; and the town, which begins about 50 or 60 paces W. of it, confifts chichy ot one l.) $n g$ ftreet, at the end of which is the Danifh fiutory, a large bailding, with convenient warehoufes for the ftowage of the goods, as well as the reception of neyroes, in which article they trade with the Spaniards. On the the right fide of this factory is the Brandenburg quarter, confilting of 2 little ftreets, full of French re. fugees from Europe and the iflands. Molt of the looufes are of brick, being built and tiled in the Dutch

## T I C

fafhion; yet but of I fory high, on account of the foundation, where, before they dig to the depth of 3 fcet, they meet with water and quickfands. The trade of this fmall inland, particubriy in time of peace, is very confiderable : this being the ftaple for fucla traffic as the French, Englith, Dutch. and Spaniards, dare not carry on publicly in their own iflands: and in war-time privateers bring their prizes hither for fale. A. great number of veffels trade from hence along the coult of Terra Firma, and return with a great deal of fpecie, or bars, and valuable merchandize; fo that the place is wealthy, and always well-ftocked with all forts of goods. In a 588 the Danifh factory here was artacked and plundered by the French buccaneers. A large battery has fince been erected, mounted with 20 pieces of cannon. In Aug. 30, 1772, it fuffered 200,000 dollar's damage, by a moft violent ftorm.
ThreeRivers.-See Trcble River.

Tiberon Cape, a round black rock, which is the moft weftern point of the whole ifland of Hifpaniola, in the Welt-lndies. See H:/paniola and St. Domingo.

Pickle-me-euckly Har. scur, fo called by the Englith, a fine little fandy buy of Terra Firma Proper, on the iftimus of Darien, at the N. W. end of a riff of rocks, with good anchorage and fafe landing, the extremity of the rocks on one fide, and the Samballas iflands (the range of which begin from hence) on the other fide, guard it from the fea, and fo form a very good harbour. It is much frequented by privatcers.

Ticonderago, a fort, built by the French in the year 1756, on the narrow paffage, or communication, between the lakes George and Chanıplin. It had all the advantages that art or nature

## T L A

could give it, being defended on 3 lides by water furrounded by rocks, and by half of the fourth by a fwamp, and where that fails the French erected a brealt-work 9 feet high.

Tinkers-Island, the fecond Largeft of the Elizabeth-illands, at the entrance of Buzzard's-bay, and is the middlemoft of the three. It is about a mile W. from Nalhawnifland, and about 8 from the neareft land of Barnituple county. This illand is about 3 miles from $N$. to S. and $I$ and $\frac{1}{2}$ from E. to W. between it and Nafhawn is a channel for floops, as well as between it and Slokums-ife, about 1 mile further $W$.

Tisbury, a town on the S. fide of the inand of Martha's Vincyard, New- Engiand; fituated about 9 miles from Chilmark, on a convenient creek, and inhabited by fifhermen.

Tlascala, orlosAfigelos, a province of New-Spain.-Sce Aingclos.
'Inascala, the antient capital of Angclos, once the fee of a biGhop, 45 miles E. of Mexico, and 60 N. of Los Angelos, its modern capita!. It has a pleafant fite on the banks of a river which runs into the South-sea; but is montly inhabited by lndians, who in general are vay rich, being fice from all taxis and duties, as we obferved before: and having been entirely corverted to chriftianity, they have feveral good churches and monaferies. In Gage's time there were no le's than 28 towns and villages under the jurifidetion of this cily, containing $150,0 c 0$ families: lie writes that it was worth all the towns and villages hetween 1, a Vera Craz and Mexico, the former being 140 miles S.E. of it. When the Spaniards firtt arrived here, it contained 300000 inhabitants; and it had a market place large enongh to hold $30,0 c 0$ bugers and fellers; that in the thanbles were foldom

## T O B

lefs than 15,000 heeps, 40000 K . en, and 2500 logs. But matters were fo much altered, that Gemelti, who was here in 1698 , fays, it was then become an ordinay village, with a parim-church, in which hangs up a pisture of the Thip which broughts Cortez to La Vera Cruz. This city, according to Captain Cook, fands in the valley of Allifico, which is a league and an half over, producing above 100,000 bufhels of wheat in a year. Lat, 19, 51 . long, 102, $5 \cdot$

ToA, one of the 2 rivers (Bajamond being the other) which empties itfelf into the harbour of Porto Rico, in the Antilies ilhand of the fame name. It rifes from Mount Guiame, on the S. fide of the ifland, about 16 leagues from the town, and, running $N$. in a large Itream to Mount Curvas, die vides itfelf jnto a branches, betwixt which the other river Bajamond has its fource.

Tobago, or Tabago, one of the Caribbee-Inands, 30 miles N . of Trinillad, and 120 S . of Barbadoc:. It is about 72 miles long, and 12 broad. It was firft peopled by the Dutch, who made an eftablifhment there in 1632, who were expelled by the lndians, and foon after the Courlanders took their place, under the protection of the Englin. The French conquered this innand, and returned it to the Dutch, who they exfelled in 1677 , and left it defulate. From this period it continued as a neutral ifland till the peace of $17 \sigma_{3}$, when it became the property of the Englif. It is about 25 leagues in circumference, and abounds throughout with little hills that might be cultivated, and has a few craggy mountains at the N. E. end, out of which run numerous Itreans and rivers. The air is cooled by the fea-breczes, that, notwihftanding its vicinity to the line, it besomes very fupportable to Europeans. The coaft affords 10 or 12 large and conve.

## T O M

tilent bays, among whom are 2 where the largelt mips may anchor. All foris of vegetables and theful trees are very abundant here, and fome of the laft grow to a prodigious fize; there are befides whole thickets of fallifras of a fuperior quality, as well as of thofe trees which afford the true gum-copal. There is produced a baftard kind of the nut-neg, and cinnamen trees, and the woods are full of game and wild hogs. The foil, though fometimes fandy, is always black, decp, and as fruitful as in any other of the Casibbees; and it is altoniming to fee the agtivity and fucecis with which the culture of this ifland has arifen and increafed fince the peace. The whole ifland is comprized in 7 divifions, and contiins 52,058 acres. They reckon at prefent 286 plantations, among whom 40 for fugar, of whi.h the ifland exporis alrecdy above 3000 hogfheads a year. On the 3. fide is the rining town of Scarborough. Near the coaft, and principally towards the $S$. are fome families of the Caribbs. Tobago is not Jiable to hurricanes, llke the other Caribbee-Iflands, owing to its vicinity to the consineat. Latitude $11,3^{6}$. long. 59, 10.

Toi.u, a town of Terra-Firma , with a harbour on a hay of the North-Sea. The famous balfam of the fame name comes from this place; 114 miles S. W. of Carthagena, Lat. 9, 36. longitude 77, 5 .

Tomaco, a large river of Popayan, and Terra Firma, abolit 3 leagnes to the N. E. of Gallaifle. Ard about a league and an half within the river is an Indian town of the fame name, tho' bet fimall, the inhahitants of which commonly fupply litte veffels with provifions, when they put in here fire refrefhment. At this river begins a great wood, extending 10 or 12 leagues to the fouthward. All alorg this coaft are fe-

## TOR

veral rivers, at whofe heads bo:is the Spaniards and Indians wait for gold which wathes down from the motntains. 'This is a very ruiny place, efpecially from April to Octuber, which is the winter feafon here: at which time from honce all northward along the coaft of Mexico is continual thunder and lighrning, with rain, and feveral violent tornadocs or whirlwinds. The land-marks here are, that the land is higher than the coafts of Gorgona, and very full of hills and trees, particularly one very high mount.

Topia, a mountainous barren part of New-Bifcay province, in Mexico; yet molt of the neigh. bouring parts are pleafint, abounding with all manner of provifions.

Topsfieid, a town near the mildle of the county of Efiex, the mof N . of the MafichuetsBay. It has a very pleafant fituttion, but no river near it, and is the miduray between Reading and Rowley.

Tortoises, theriver of, lies 10 miles atove a lake 20 miles long, and 8 or 10 brani. w!.a.d is formed by the Miffifipi, in Louifiana, or Carolana, and Florida. It is a large fine river, which runs into the country a good way to the N. E. and is navigable 40 miles by the largett boats.

Tortola Isce, one of the Virgin-Inands, near Porto Rico, on which depend the little iflands of Joft Van Dykes, Little Van Dykes, Guana-ifland, and Beef and Thatchiflands. Inthis, which is the principal of the Englifh Virgin-mands, is almoft all the trade carricd on; it is near 5 leagues long, ald 2 broad, but badly watered, and reckoned unhealthy. They culiivate cotton here, which is much efteemed by the inanufacturers. Long. 63, 35Lat. 18, 15.
'Tortuga, Salt, or Salo Tortuga, an ifland on the $W$.

## TOR

of New-Andalufia, and Terra Firma, fo called in coutradiftinction to the thoals of Dry Tortngas, near Cape Florida, and to the ille of Tortuga, near that of Hirpaniola, It is pretty large, uninhabited, and abounds with falt. It lies in lat. 11, 36 . and long. 64 . 14 leagues northerly from Margarita, a:d 17 or 18 from Cape Blanco on the main. The E. end of Tortiga is full of rugged, bare, and broken rocks, which fretch themfelves a little way out to fea. At the S. E. part is an indifferent grod road for hipping, and much frequented in peaceable times by merchantmen, who come hither to lade falt, from May to Augut. For at the E, end is a large falt. pond within 200 paces of the fea. Near the $W$. extremity of the ifland, on the $S$. fide, there is a fmall harbour and fone fieth water. That end of the illand is full of haroby trecs; but the $E$. end is rocky, and bare of trees, producing only coarfe grafs. The iurtles, or tortoifes, come into the findy bays to lay their eggs, -r.t. A-um he:ce the ifland has its name. Thire is no anchoring any where but in the road where the falt-ponds are, or in the harbour.

Tortugas, or tortudas, one of the Antilles-ifles, in the Weft-Indies, near the N. coaft of Hifpaniola. It was formerly the great refidence of the buccaneers, and lies off Cape St. Nicholas, 86 miles N. of Petit Guaves, and 35 Spanifh leagues E. from Cuba. It is furrounded with rocks on the N. and W. fides; and the road on the E. fide is very hard to find, and very difficult and dangerous when found, by reafon of rocks and fands; and the difficulty of accels, probably, made this the retreat of the huccaneers. The Spaniards, however, deflroyed their fertlements hicre in 1638 , with extreme cruelty; notwith. flanding which the buccaneers re-

## TOR

turned, and fetted here amain, under the command of Capt. Wit. les, an Englifhman: bue not !ong after he was obliged to abandon it to the French, who were harrafled many years by the Spaniards, and driven off the ifland more than once. The French, however, having conflant fuprlies from their their ininds, and being joined from time to time by adventurers of all nations, they $\mathrm{fi}^{\prime} \mathrm{l}$ kept up their claim, and at laft not only fixed themfelves in this little inand, but began to make fettlements on the W . end of St , Domingo, where they built fome villages and feveral forts. It is rocky, efpecially on the $N$. fide; yet full of tall palms and other trees, producing not only tobacco, bnt yellow funders, guiacum, gumelemi, china-root, aloes, fugar, indigo, cotton, ginger, oranges, citrons, apricots, bananas, maize, aromatic laneris, and molt of the fruits which grow on the other inlands, together with peafe, ard the ufual roots for food. Rut from want of fprings the people are forced to fape rain-uatar :a cifterns. Here are great numbers of wild boars, which they are forbid to hunt, as ferving for provifions whenever an invafion obliges the inhabitants to retire into the woods. Befides parrots, thrumes, and other birds, here are wild or wood pigeens, which are very good at a certain feafon, but at other times are lean and bitter. Here is nore of land and fea crabs, whch, if eaten frequently, occafion giddiners, and dininefs of fight. The N. fart of the ifland is defolate, from the air heing untrealthy, as well as the coalt rugged ; but the S. part is pretty popelous, with good anchorage, and abounds with fih. Is has but 1 convenient harbour, the entrance into which is by 2 channels, and is capalile of receiving large mirs. It lies at the bottom of a coeg bay in that gart

## TRE

cre again, Capt. Wil it not !oner hbandon ic e harraflid fiards, and more than ever, havrom their ing joined by adventhey $\cap i^{1}$ nd at laft es in this to make end of St , puilt fome rts. It is N. fide ; and othcr y tobacco, um, gums, fugar, oranges, s, maize, oft of the the other eafe, ard od. But de people watry : numbers y are forfor provafion oto retise parrots, ds, here $s$, uhich a feafon, lean and land and ten freefs, and 1. port of in the air as the part is ood anith fing. jartour, is by 2 of resat the hat $\mathrm{p}^{3} \mathrm{ta}$
of the country called the LowLants. And the town of Cayo$n_{3}$ is defended hy fort Dageron, fo called from a French Governor, the founder of this now flourifhing, colong. Latitude 20, 10 . long. $73,15$.

Toulouse Port, former!y called Port St. Peter, on the coalt of Cape Breton, juat at the entrance of the Strait of Fronfic. It lies between a fort of gulph, called little St. Peter, and the ifles of St. Peter, oppofie to thofe of Madame, or Maurepas.

Townshend, a village at the N. extremity of Middlefex comm19, Mafichufets-Bay, near the N. branch of the Nalhnay-river.

Treble-River, fo called from 3 rivers which center their Atreams about a quarter of a miie blow the town, and fall into the great one of St Laurence. It flands in Canada Proper. and wis formerly the capital of the French government, and much reforted to by fevera! nations, which come down thofe rivers to it, and trade in various forts of fars. The town has pallifades round it, being enmmodiouny fituated th the center of the country, and confcquently free from the erupions of the Iruquois. It was the refidence of the (iovernor, who kept a mijor under hiva, with a monaftery of Recollets, who are the curates of the place. It was likewife the common emporilum, or mart, to which the natives ufed to bring their furs and other commolitits to fell, before the Englih firt feized it and the fettement at Montreal. The town itfelf is faid to be but thinly peopled, though the inhabitants are wealthÿ, and the houfes very large and rechiy furnihed. The comntry round it is pleafant, and fertile in corn, fruits, \&c. and has a good number of lordfhips, and bandfome feats belonging to it: on each fide of the river are great numbers of genteel houfes, hard-

## T R I

1r: a gun-fhot from one another, and the river is covered with pleafiure and filhing-boats, which catch vift quantities of fih, effecially eels of a prodigious fize. There commonly come in with the tide, and are caught in bafkes taid for the purpofe; ard being falted and birrelled will keep good a year. The town is about 50 iniles $S$. from Quebec, and the failing up and down from one to the other extremely pleafont, and even 15 leagues further up. Lat. 45, 51. long. 75, 15 .

Trenton, the county towa of Hunterdon, in Nex-Jerfey. It is fituated on the Delawar-river, 27 miles N. of Philhdelphia, and is a pretty well-buitt town, where the bufinefs of the county is tran:adel.

Trieste, an iflint of Yucatan, in Nexico. It lies on the W. Wide of Bor:-Royal-ine, anl is atou: 3 torgus from W. to E.

Trinifio, or Trinity, a town of New-Granada, and Terra. Firma, about 2.3 miles N. E. of St. Fé. It ttands on the ealtern bank of the :iver Magdalena. The fite is very convenient, but the inhabitants have had frequert wars whih the neighbouring Indians, who are of a martial and turbutent difpeftition.
Trimidad, Trinidada, of Trinity, an iffand of New-Ardalulia, in Terra-Firma, It partly forms the frait of Paria, o: Focca de Drage, and is much larger than any of thofe on this coon. I:s eanermiof point fies in lat. 10, 3 3. long. $60,2 \% .7$ his ifland is $3^{6}$ leagues in length, ani 18 or 20 in breadth. Its climate is urheathy, the ifland being very ofien covered with thick foc̣Sir Walter Raleigh, who was there fome time in the year 1593, and examinct the inand, givestas account that the norlherin part of it is high land; bat that its foil was geod, profer for planting of figar-cares, tobacto, \&c, Hise

## T R I

are fevcral forts of animals, plenty of will hogs, finh, foul, and frui. It alfo produces maize, calliva, and other rools, and in generalall that is commonly found in America. 'The port of St. Joteph, on the W. fide, is the principal one on the ifland. The inhabitants are a mixture of Spa niards and Indians, who are lazy, thievifh, and fupernitious. It is fubjeतt to Spain.

Trinidad, la, an open town of Veragua, and audience of Mexicr. It flands out the banks of the river Belen, 3 leagues from the fea, but the imland way to it is almon impaffile: it lies $S$ leagues F. from La Conception, and 124 miles S. E. of Guatimala, and belongs to Spain. Lat. ${ }^{3}$, 12. long. 94, 15 .
Trinidad, or la Sonsonste, a port-town of Guatimala Proper, in Mexico, or New Spain. It ftands on a bay of the South Sea, about 4 leagues from Acaxatha, 65 miles S. E. of Petapa, and 162 from Guatimala. It contains 4 or 500 Spanifh families, bcfides Mulattocs and Indians, with 5 churches and a monaftery. To this place are tranfforted all the goods which are brought to Acaxatla from Peru and Mexico. It is 3 leagues from the town to the harbour, a hich is of great refort, as being the chief place of trade, as has been jult mentioned, bet ween New Spain and Peru, and the neirel? landing harbour to Guatimala, for thips which come from Panama, Peru, and Mexico. But it is a place of no defence. In the neighbourhood are 3 volcanoes. The coaft is low, but with good anchorage.

Trinidad, ia, one of the fea-ports and towns on the fou h pare of the inland of Cuba, in the Weft-Indies, which is under the jurifiliction of the diltrict of Spiritu Santo.

Trinity Port, a large bay of Martinico, one of the Carit-

## TRU

bee Illands. It is formed on the S. F. fide liy the point Caravelle, which is 2 leagues : in length; and on the other lide by a very high hill, about 350 or 400 paces in sength, whicle only joins to the main-lard by au ifthums not ahove 200 fiet broad. The E . fide, oppofite to the bottom of this bay, is fopped up liy a clain of rocks, which appear level with the water when the ebb-tide is Spont.

The town here is a very thriving place, being the refidence of feveral merchants, as well as of the Lieutenant governor of the Cahes-Tere, and much frequented by thipping, efpecially from Nantz, the cargoes of which are fure here to meet with a quick fale; the people, who are very numerous in the adjacent parts, chufing rather to buy what they want near at hand, than to fend for it from the Baffe-Terre. Befides, during the hurricane feafon, hips have a fafe fration in this port. Another advantage they have here is, that, ulien they fict out for Europe, they are to the windward of all the inands, and fave above 300 leagues in their paflage, which they would find by the way of St. Domingo or Porto Rico. Tho' this parih takes in all the reft of the Cabes-Terre, the church is only a wooden fructure. Gireat quantitics of cocoa, fugar, cotton, \&c. are made here and in the neighbourhood.

Trois Rivieres, the fame with Treble River, -u hich fee.

Tropic Keys, are fmall inlands or rocks on the N. of Crab Ifland, and off the E. coaft of Porto Rico, and have heir name from the great number of Tropic birds which breed there, and are never feen but between the Tropics.

Truro, a villace in Barnfaple county, Plymouth Colony, New England, :ear the northern extremity of Cape-Cod harbour.

## T U C

Truxilefo or Nostra SeNhora de la Paz, a town of New Granada (Venesuela), and Terra Firma, $12 ;$ miles s . of Maracaibo lake, and fuhject to Spain. On the fouhernmoit bank of the lant-mentioned lake is a village called Truxillo, depunding on this city, and whither its inhabitants ufed to carry meal, bifcuit, bacon, and other provifions, which they embark on that river, where they are tranfported into other provinces of South America, by which means they drive a very profitable trade. This they do twice a year, in May and November. The city is in lat. 9 , 21. long. 69, 15 .

Truxillo, a town of Honduras and Guatimala audience. It tands high, about a league from the North Sea, and bet:sen two rivers, the mouths of which, with fome illands before them, form the harbour at the bottom of St . Giles's bay, above two leagues brosd, being deep and ficure, and defende 1 by a caftle, but its trade is inconfiderable. The country is exceeding fruitful in corn and grapes, and, notwithiftanding the heat of the climate, very populous. The city is defended by a thick wall towards the fea, and is inaccemible but by a narrow, fteep afeent. The cafte joins to the wall, and ftands on a hill. Behind the city are very high mountains. It lies 300 milies N.E. of Amapalla. Lat. 15, 36. long. 88, 36.

Tryon County,inthe diftrict of Salibury, the moft weftern of all North Carolina, which has its W. boundary the Tryon or White Ohe Mountains, and is the boundary on the S. to South Caroina.
Tucuyo, a town of New Granada and Terra Firma. It flands in a valley of the fame name, every where furrounded by mountains, and not above half a league in length and breadth, A river

Verb, one of the parishes of Jamaica, having Manury-bay in it, a very fecure road for hipping.

Vermilifon, Purple, of Red Sea, the name given by fome to the guiph of California.

## V I N

Fillarica, or Almeria, a town of Tlafeala and New Spain. It fands on the coaft, and on a fmall river, with an indifferent port, but ina better air than Vera Cruz, 20 leagues north of the latter. A clandeftine trade is caried on here between fome Spanifh merchants on thore, and the French of St. Domingo and Martinico.
Vilifa, la, a town and river of Veragna and Guatimala audience, in New Spain, Its fite is good, the ftreets regulir, and houfes pretty, with feveral farms, and fine favanmahs in the neighbourhood. The river is very large, and at low water brcaks at the mourh as on a flat fhore; so that great hips anchor within can-non-thot, but barks (f about 40 tons may go up a league and a hatf. The harbour is higher about a quarter of a league from the town. And abont a league to windward is a large rock always covered with valt numbers of fea-fowl.
 St. or Onda, a town of Popayan and Terra Firma; about 25 mies eaftward of San Scbaltian, with a port where canoes from Carthagena and Santa Martha unload their merchandize.

Vincent, St, one of the Caribbee $1 \mathrm{~A}_{\text {all }}$ ds, in the American occan. It lies alout 60 niles W. from Barbadoes. It is about 4 leagues long and $2 \frac{1}{2}$ broad. On it there are feveral mountains, which crolfes it from N. to S. from which iffie feveral rivers full of fifh; among which, are twenty-two capable of turning fugar-mills: thefe mountains in general, are of an eafy afcent; the valies fertile and extenfive, and the clearing the ground has rendered the climate healthy. It is more favourable than any other for the culture of fugar, coffee, cacan, and anatta. The part inhabited by the Englif, is divided

## V I R

into four parifhes; of which, Kingfown is the capital. For a long time after the difcovery of this inand, it was the general rendezvous of the Red Caribbs, who formerly pofiefled all the Antilles; and it now is the only one, where their fmall remains exift in the form of a nation, as they have heen almolt entirely exterminated by the Black Caribls. Notwithftanding the neutrality of this ifland, the French made feveral plantations here, whofe culture confifted chiefly in coffec; and beforc its ceffion to Great Britain, in 1763, they exported above $3,000,000 \mathrm{lb}$. weight of that enminodity, when their numher confined of abou: Soo, who had 3000 negroes on the ifland. At the peace the government fold the lands of St. Vincent, as it had thore of Tobago, and left the French, whom the fear of confifcation hat not driven a way, thofc they poffeffed, paying a moderate fine, and a yearly rent fill more moderate. Thefe proccaditer, ercroaching on the pofieflions of the Caribbs, occafioned their refiftance, which the troops fent againt them could not fubdue, and a peace was concluded with them in 1773, when the N. part of the illand, making a third, was affigned them; fince then, St. Vincent has enjoypel tranquility. The exports from this ifland in 1770 produced 10,000 l. Aterling, which has fince confideratly increafed; among which coffe made but $16,0 c o l$. It is the only one of the Antilles, where they have cultivated cinnainon, mango, fefamum, vanilla, China tallow: tree, camphire, gum-ftorax, \&c. Lat. IE, 5. long. 60, 50.
Virgin Islands, a groupe of twelve or more little inands of the Antilles, moftly barren, craggy, and uninhabited. They lie E. of Porto Rico, and W. of Anquilla. Though the paffige through them is pretty difficult,

## V I R

and formerly reckoned very hazardous, Sir Francis Drake went through them with fafety, when he made his attempt on St. Domingo, in 1580 . One of the ines is called Bird-Illand, where the booby birds are fo tame, that a man may catcl enough with his hand in a flort time to ferve a fleet. They belong to Spain, and take up a fpace from E. to W. of $2+$ leagues long, quite to the E. conll of Porto Rico, with a breadelh of about 16 leagues. They are compofed of a great number of iflands, whofe coafts are every way dangerous to navigators, and famous for hipwrecks, particularly feveral galleons. Happily for trade and navigation, nature has placed in the middle of them a bafon of 3 or 4 leagues broad, and 6 or 7 long, the fineft that can he imagined, and in which fhips may auchor, land-locked and fhetered from all winds, called the Bay of Sir Francis Drake. The poffefion of there iflands is divided between the Englith and Danes; but the Spaniards claim thofe near Porto Rico. The Englifh poflefs Virgin Gorda, on which depend Anegada, Nicker, Prickly-pear, and Molkito inants, Cammanoes, Dog iflands, the Fallen City, with the round Rock, Ginger, Coopers, Salt ifland, Peter's ifland, and Dead Cheft; Tortula, to which belongs Joft Van Dykes, and Little Van Dykes, Guana inand, with Beef and 'rbaich inands; all which illands, within a few years, have been put under a regular form of goiernment.

The Danes poffefs St. Thomas, on which depend the ifland of Brafs, Little Saba, Buck ifland, Great and Little St. James, and the Bird Keys; St. Fohn, to which belong, Lavango, Cam ifland, and Witch ifland; Santa or Saint Croix.

The Spaniards claim Serpents ifland, which the Englifh call Green ifland, the Tropic Keys, Great and Little Paffage inand, and particularly Crab ifland.

## V I R

Virgin: Gorda, one of the principal of the ahove iffes. It lies 4 leagucs to the E. of Tortula, of a very irregular hape, whofe greateft length from le to W . is about 6 leagues, is ftill worfe watered than Tortula, and has fewer inhabitants. A mountain which rifes in its center, is affirmed to contain a filver mine. Loug. 63. 10. lat. 18. 20.

Virginia, one of the Brition colonics. It is remarkably pleafant and commodious; having the river Patowmack on the N. E. which feparates it from Maryland; the Atlantic Ocean on the E. Carolina on the S. and the A palachian mountains on the $W$. which divide it from a vaft traft of land in Canada, and then Lonifiana. The exteat of Virginia is from lat. 35 , 30 . to 39,30 . on the W. fide of Cherapcak bay, but on the E. fide only from Cape Charles, in lat. 37,13 . to $3^{8}$. It is 750 niles long; 240 broad ; but to the weff ward it has no bounds, which by our late conquefl of Canada are pretty fecure now from the invation of the French, and their Indian allies.
The air of Virginia, depending very much on the winds, is of various temperaments; for thote from the N. or N. W. are extremely tharp and picreing, or tempeftuous, while the S. and S. E. are liazy or fultry. The winter in this country is dry and clear; fnow falls in gre it quantities, but feldom lies above a day or two; and the froll, tho' keen, is feldom of any long duration. The fpring is fomeching carlier than in England; May and Jone are pleafant, July and Augult fultry, while september is noted for prodigious thowers of rain. Towards the coatt the land is low, and for an hundred miles inland, with hardly a hill or ftone to be feen all hat way. Here are trees of various feecies, and of an in- $^{2}$ credible fize, with abundance of

## V I R

pafture grounds. The foil produces rice, hemp, Indian corn, flax, filk, cotton, and wild grapes. But tobacco, the faple commodity of Virginia, is fo much cultivated, that the inhabitants hardly mind any thing elfe, fo this plant may be brought to a tolerable market. And this trade is brought to fuch perfection, that the fweetfcented tobacco which grows on James and York rivers is reckoned the beft in the world, and generally vended in Great Britain for home confumption, in various forts of fnuffs and fmoaking. The other fort, called Aranoacke, turns $t 0$ as good an account, being exported to Holland, Denmark, Sweden, and Geimany.

Though the common way of traffic here is by bartering of one commodity for another, or of any one for their ftaple tobacco, they have fome filver coin among them, both Englifh and Spanifh. Notwith handing the great plenty of excelient timber and naval ftores in Virginia, and the whole country being but one continued harbour, after entering Chefapeake bay between Capes Charles and Henry, yet they build no hipping.

They have few towns; the principal are James-town and Middle Plantation, now Williamfburg, in the latter of which there is a college. 'This is the capital, and feat of the governor, affembly, and couts: fo that the Virginia planters refiding on their eftates or farms, moit of which lie contiguous to fome great river that falls into the bay abovementioned, Ships can come upalmolt to their doors, and take in their cargoes of tobacco.

Virginia is divided into the following counties, viz.

Amherft
Henrico
Richmond
Willian fourg
Prince William
Sfotfylvania

## U X B

at 16,000 pounds of tobacco annually, befides perquifices.

I lie revenue from tobacon in Great Britain, was above three hundred thoufand pounds ferling per annum, till the prefent unhappy difturbances: and the far greater part of the profits of exported tobacco comes to the Britifh merchants, which brings nearly as great a fum every year into the kiugdom, the whole weight falling on the planter, who is kept down by the lownefs of the origimal price. To fay nothing of the great advantage which we derive from being fupplied by our own colonies with that for whicl the reft of Furope pay ready money, befides the employment of 330 large veffets, and a proportionable number of feamen, which are occupied in this trade; from us the Virginians take every article for convenience or ornament which they ufe; their own mannufactures not iscrving mention.
riny and Maryland, befor: ' 1 c immencement of the prefer.. .iuturbances, annually exported into Gr . Britain, of tobacco only, to the value of $768,000 \mathrm{l}$. in 96,000 hogheads :-13,500 ferved for home confumption, yielding a duty of 351,6751 to the revenue; the remaining 82,500 were exported. It employed 330 fail of thips, which contained 4000 feamen. Their whule exports in naval ftores, iron, \&c. to Great Britain, was $1,040,0001$. ammally, and their return from Great Briain in manufactures was 865.0001 .
The number of people in Virginia is 6 :0,000. In Virginiaare confiderable numbers of French refugees; but the negroes are hy much the larger part of the inhabitants, who cannot be fewerthan 500,000 , of which are imported into the 2 tobacco colonies only between 7 or 8000 arinually.

Virginia Capes are the two head-lands, viz, of Henry and

Charles, opening a paltage into the bay of Chefapeak, one of the largent and fineft in the world, being 18 miles brond at its mouth, and 7 or 8 throughout a length of near 300 miles which it runs N . up the country, and receiving from the weflern flore feveral large navigable rivers, and a few fimaller Atreams both from thence, and from the peninfula which divides the bay from the Atlantic Occan. Its chief rivers are James, York or Pamunky, Rappahaunock, and Patowmack, whofe noble and majeftic appearance cannot, perhaps, be exceeded in the known world; for they not only admit large nlips into the very heart of the country, but abound with fo many creeks, and reccive fuch a multitude of inferior yet navigable rivers, that Virginia feems unrivalled throughout the univerfe for convenience of inland navigation: indeed it has been obferved, and with reafon, that every planter here has a riverat his door, which renders the conveyance of commodities extremely cafy.
Ulster, a county in NewYork, on the borders of Penfylvania, S. of Albany, and N. of Orange counties, without any confiderable town in it.
Voluntun, a town in Windham county, Connecticut, 2 miles W. of Canterbury, 15 S. of Killingfey, 12 E. of Windham, and 29 N. of New London, with which it has communication by the Thames.
Urbanno, a town in Midalcfex county, on the S. W. bank of the Rapahannock river.

Utrecht, a fmall village on the N. W. end of Long-1hand, New-York, 3 miles E. of Hendric, and 8 N . W. of New-York.
Uxbridge, a town in Worcefter county, Maflachufets-Bay, near Black ftone-river, 5 miles W. of Mendon, and 5 miles E. of Douglas, and about 7 S. frome Sutton.

## W A L

## W.

WAger's-Straits. See the following article of
Wales, New North, one of the northern countries. It has Prince-William's-Land on the N , part of Baffin's-bay on the $E$. an undifcovered country, called New-Denmark, on the S. and another unknown land on the $W$. Provided W ager's-Straits communicates with the eaftern ocean, or South-Sea, a6 is very probable, then North-Wales mult be entirefeparated from the continent of America: for it lies beyond the polar circle, whereas the mouth of Wager's-Straits is about lat. 66. This country of New North Wales is very little known, nor are we much better acquainted with the land lying fouthward of Wager's. Straits.

Wake, an inland county, in the dilfrict of Hillfoorough, N. Carolina,

Waies, New South, one of the northern countries. It is of vaft extent, lying all round the fouthern part of Hudfon'sbay, and makes upwards of 100 leagues. It is bounded by Canada on the E. and S. a large tract of unknown countries on the $W$, which are inhabited by feveral Indian tribes, who conie hither to trade; but its extent cannot be afcertained, the Englif, who alone trade here, having no fettlements inland but in their forts and near the coalt. Acrofs the country from St. Margaret's-river, which runs into that of St, Laurence, to Rupert's-river, at the bottom of Hudfon's-bay, there is not above 150 mils ,

Labrador is called the E. Main, and New Wales the W. Main.

The Hudfon's - bay company have feveral forts and fettlements on New-Wales, or that called the IIcft-Main (which fee).

About 5 or 6 leagues from the

## W A L

Weft-Main, there is an inland called the Little Rocky Ine, it being a mere heap of rocks and fones, with fome fmall hrufhwood growing upon it. This is fuppofed to be ovet flowed with high N. W. winds, which occafion a great tide all over the bay. In this $\mathrm{i} \mathrm{I}_{\mathrm{e}}$ is plenty of gulls and fwallows. About 3 miles from the S. E. part of the illand lies a dangerous reef of fand, dry at low-water.

Charlton ifland is a dry white fand covered over with a white mofs, full of trees, juniper, and fpruce, though not very large, This ifle affords a beautiful profpect in fipring, to fuch as are near it, after a long voyage of 3 or 4 nounths on the molt uncomforta. ble fas in the world, occafioned by the vaft mountains of ice in the bay and ftraits: againft which, if hips happen to ftrike, they are dafhed in pieces, as certainly as if they ran againt rocks, thefe being perrified by the violence of the continual froft, To fee one day the flore on the W, Main hare, the mountains covered with fnow, and nature looking as if frozen to death, and the next day to behold Charlton-ifland fpread with trees, forming, as it were, a green tuft of the whole, is a change capable of giving the greateft pleafure, after the fatigues of an intolerable winter-voyage. The air even at the bottom of Hudfon's-bay is exceffively cold for 9 months, and the other 3 very hor, except with a N. W. wind.

The commodities for trade here are guns, powder, fhot, cloth, hatchets, kettles, tobacco, \&c, which the Englifh exchange with the Indians for furs of beavers, martens, foxes, moofe, \&c. The great profits acquired by this trade, and the profpect of engroffing it wholly, engaged the new company to profecute their meafures vigoroufly, and to fettle a good correffondence with the natives, whom they found very tractable, and
will fon abo pla ple had Eu pea or was on Str

## W A T

willing to do any thing upon reafonable terms. For the Indiutis about Rupent's-river, and othcr places in the hay, are more firmple than the Canadians, who have had longer commerce with the Europeans. They are generally peaceable eit her anong themfelves or with orhers, except the Nodways, a wild barbarous nation on the confines of Hudfon's. Straits.

Walkertowe, in King and Quesn county, Virginia, on the N. Lide of Mattupony - river, 15 miles N. E. from Newcaftle.

Wallingiord, a town in Newhaven county, Connecticut, 8 miles S. W. from Durham, 13 N. from Newhaven, and 21 from Newtown.
Waltham, a fall town in Middlefex county, MaflachufetsBay, about 5 milcs S. E. from Concord, 4 S. from Lexington, and 8 W . from Cambridge, and was the thoroughfare for the NewHamphire rangers, for the battle of Bunker's-hill.
Walpole, a town in Suffolk county, Maffichufets-Bay, on the moft confiderable road from Providence for Bofton; about 6 miles N. E. from Wrentham.

Warwick, a county of Virginia. It lies S.E. of York couniy, containing $3^{8,444}$ acres, in 2 parihhes, Denbury and Mulberryilland.

Warwicx, a thriving town of Providence and R hode-Ifland colony, near the mouth of the river Patuxet. It fuffered much in the Philippic war, every houfe in it but one having been deftroyed: yet it foon recovered. The inhabitants are faid to be fo horpitable as to entertain ftrangers at their houfes gratis. It is 9 miles $W$. of Briftol, and the fame diftance S. from Providence.

Watertown, a village in Middlefex county, MaffachufetsBay, fituated on the river Charles, about 3 miles W. of Cambridge,

## W E S

near which was an encampmert at the beginning of holtilitics at Botton.
Welcome, Sit Thomar Roc's, or Ne Ultru, a narrow flrait is called in New $\mathbf{N}$. Wales, and the arstic countries of America, which opens beiween hat. 62 and 63 . On the W. or N . hore of the Welcome is a fair licadiand, latitude 66, 30 , called the Hope, from Capt. Aliddleton, expecting this to be the extreme part of A nerica; but, after walking round it, he faw lind furthic, forming what, upon this difappointment, he denominated Repulic-hay.
Welech Tract, lands fo called in Newcattle county, and Penfylvania, where near 40,000 acrs have been planted by Welchmen. It is thick-fown with fmall towns, as Haverford-Weft, Merioncth, \&c. It is populous, and the perple are very induftrious, who have cleared this part of the country. Here are fcveral large plantations of corn, with abundance of cattle: fo that this fettement is in as thriving a condition as any in the province.

Welis, a pretty town, with a bay on the coaft of York county, 10 miles from York, in the province of Nen-Hampihire, NewEngland. Its norihern point is Cape Porpoife, and fouthern point Cape Nidduck, and the Kenc-buck-river runs into it.

Wenham, a town in Effex county, the moft northerly county of Maffachufets-Bay. It is $\mathrm{fi}-$ twated between Ipfwich and Be verly, and near it is a pond that bears the fame name.

Westborough, a town in Worcefter county, MaflachufetsBay, 5 Miles W. from Marlborough, and 9 E. from Worcefter, in the great road from thence to Bofton.

Westchester, a lown and county in New-York, is miles N. E. of New-York, and ftands. on a river that runs into the frait
of Hell-Gate, the W. entrance of Long-Iland Sound.

Westroxd, a village in Middlefex county, Maflachufets-Bay, where is a bridge that croffes Cave's branch of the Merimackriver. It is if miles N. W. of Concord, and 3 S. E. of Groton.

Westham, a toun in Henrico county, Virginia, fithated on the N. fide of James-river, 4 miles N. W. of Richmond.

West-Main: fo New W'ales, in the nerhern countrics of $A$ merica, is commonly called. Here the Hudfon's-Bay company have fever. 1 forts and fettlements ; namely, i. at Chtireh-hill-river, about lat. 59. and long. 95. from London: 2. York fort, at the mouth of Nelfon's-river: 3. At the New Serern : 4. At Albanyliver: 5. At Hayes-ifland: and, 6. At Ruperts-river. Not far from Weft-Main are Rocky-ille, and Charlton-ifland.

The air at the bottom of the bay, though by latitude nearer the fun than London, namely, in 51 degrees, is extremely cold for 9 months, and the other 3 months very hot, except when a N. W. wind blows. The foil on the Eaft-Main, as well as the Weft, bears no manner of grain. Some goofeberries, Arawberries, and dewberrics, grow about Rupert's-river, in lat. 52.
Weston, a fmall town in Middlefex county, Maffachufets-Bay, about 12 milcs $W$. from Cambridge, and about 2 or 3 miles N . of the falls of Charles river.

Weston-Island, Lord, an ifland fo called by Capt. Thomas Jamcs, in his voyage for finding a N. W. paflage. This navigator continuing to rove up and down, give names to divers places, and this among the reft; but where fituated does not exactly appear, unlefs in a bay to the weftward of Port Nelfon, in the northern countries of America.

Wethersfifled, a town in

Hartford county, Conneaticar, fituated on the W , fide of Connecticut river, 3 miles $w$. of Glaflenbury, the fame S. of Hartford, and 7 E. of Farmington.

WEyMOUTH, the oldeft town of all Suffolk county, in Maflachufets Bay; bnt it is not fo confiderable as it was formerly. Herc is a well-frequented ferry for 2 d . in the day-time, and 4 d . in the night. It fands between Baintree and Hingham, which is 3 miles diftant from carl.

Whalecove, in the north. ern countries of America, the mott northerly ifland of two, the other being Lovegrove, which is a fair opening to the weftward of it. Whalecove lies S. of Brook-Cobham, or Marble illand, the latter being in lat. 63.

White River, a torrent iffuing fron the mountain of fulphur in Guadalcupe, one of the Caribbee Iflands. It is fo called as it often affumes that colour from the afhes and fulphur covering it, and falls into the river of St . Louis.

Wico, a Swedifh fettement, about half a mile from the town of Philadelphia and Penfylvaniz. Here the people of that nation have a meeting houfe: they have another of the fame religion at Tenecum.

Wight Isle, a county in Virginia. It lies $N$. of Nanfamund, containing 142,796 acres in two parifhes, namely, War-wick-fqueck and Newport. Here is a fpring, with as plentiful a fource of water as Holy-well in Wales.

William, King, a county of Virginia. It lies N. W. of Ntw Kent, and contains 84,324 acres of land in one parif, namely, St. John's. Pamunky river, the fouthermon branch of that of York, runs through this county.
William, Fort, on Caftle ifland, in the main clannel leading to the harbour of Bofton, in

New England. It is the moft regular fortrefs in the Britith planfations, and has its name from being erected in the reign of king William, by Colonel Roemer, a famous engineer. It flandsabout a league from the town, and buile in fo proper a place, that it is not pofible for an enemys lhip to approach the town without the hazard of being fhattered to pieces by the ordnance on it : of which there are 100 pieces; 20 whereof were given to the province by 2 . Anne, and placed on a platform near high-water nark, fo as to rake a his fore and aft, before The can bring her broadfides to bear againft this cattle. It is a quadrangle, furrounded with a covered way, and joined by a line of communication from the main gate to a redoubt, and two others from the maln battery, which is fo near the channel, that no thips can enter it, without paffing even within pifol-fhot of is.

Willambeurgh, a tomnShip in S. Carolina, in George town precinct, which received confiderable damage by a form in July 9, 1758, when feveral of the hail-flones were as large as hen's eggs.
Williamsbijagh, formerly Middle plantation, in Janes counIy, Virginia; about fix miles N. of James Town, and fifty $W$. of cape Charles. It is the capital of Virginia, the feat of the governor, general affembly, and judicial courts, tho' not very confiderable; the planters of this colony generally chufing to live on their eltates or plantations in the counthy. It is fituated between two creeks, the one falling into James, the other into York tiver, and contains above 200 houres, which have the advantage of being free from mofyuitos. Here is an academy or college, towards endowing of which king William and queen Mary gave 2000I. and 20,000 acres of land, with the
duty one penny per pound on all tobices exported. The college was burnt down : but it has beetr fince rebuilt, nicely contrived and adorned, being not aitogether unlike Chelfea college, W. of London.
In Williamburgh is a finall fort, or rather batiery, mounted wilh to or 12 guns. Colonel Nicholfon caufed a flatehoufe or capitol to be crected here, and feveral ftree's to be laid out in the form of a $W$.
Fronting the college, near its whole breadih, is extended a noble ftreet, juf three quarters of a mile in length, at the upper end of which $\mathfrak{f}$ ands the capitol, a bealltiful and commodious $p^{11}$. Here is kept the fecretary's office, with all the courts of juftice and law. The building is in the form of an H .
Parallel to the main freet jurt mentioned is one upon cach lide, but neither flreet quite fo long nor broad; and at proper diftances are fmall crots-ftreets for the conveniency of communication.
Near if: middle of the town ftands the church, which is a large and Arong piece of brick-work. built in the form of a crofs. Near it is a large octagon tower, a nagazine for arms and ammunition: and not far from thence is a large fquare for a market-place, and near it a bowling-green, and a play-houfe. Here is alfo a coun-ty-prifon for criminals, and near it another for debtors. The private buildings havealio been very much improsed, feveral gentlemen having b:ilt large brick-houfes ot many rooms on a foor, but not high, becaule they have room enough, and are now and then vifited uih high winds. From hence it is 12 miles E . to York; 24 S. E. to Hampton; 42 S. 1:. acrofs the haven to Norfolk, no w deftroyed; 30 N. W. to Dclawar; 50 N. W. to Newcafte; 67 N. to Hobb's-hole; 93 N. W. to Port Royal; 107 N.to Erederichilurg:

## W I L

368 N. to Be'h. ven ; 194 N. W. to Winchefter.

Whlham's Land, Prince, a coun ry lyi ground Baffin's bay, in North Manl, and the aretic counties of america.
whilametadt, the name given by act of alfembly to Oxford, the capital of Talbot county in Maryland. It was made a porttown at the fame tine. The ficond chool to be built was appinted for this town, and a colbeterand naval officer ordered to refile here.

Whlifgton, a town in Hartford county, Connocticut, fitured near Willimanti riser, 6 miles S. of Somers, $g$ mi'es N. cf Mansfield, 3 miles W. of Ahford, and 17 E . of Windfor.

Wheioughby bay, near 2 leagues S. E. from: Green iffand and Antigua, one of the Caribbee Ifles in the Ametican ocean. It has a very wile mou'h, litte lefs than a league over; but is ahove two thirds biocked up with a fand or thoal Itretching from the N . point directly to the 3. point: whence another point called Sandy point, with an ifland in it, fits off as if it would mect the firft, and block up the harbour. Beiween thefe, however, there is an oien channel, where fhips of gond burthen may enter; and when they are in, there is very good yiding almoft every where except in the very entrance; and on the larboard-fide there is a little fhoal called the Horfi-fhoe: but it is above water, and plainly to be difeerned by the rippling of the sea.

Wilmingion, in Newcafle county, Delawar, Penfylvania, fituated on a river 2 miles N . W. of Delawar rive', 5 miles N. of Newcaiftie, 12 miles S. W. of Chcfler, and 25 E. of Nottingham in Maryland.

Wilmington, a town in Middlefex county, MaffachufetsBay, fituated aboat 25 miles N .

## W I N

of Cambridge, and in S. of Andover, through which the troops from New Hampitire marched for the battle of Bunker's hill.

Wilmington, a confide. rahte town in the county of New Honover, in N. Carolina, It is lituated at the fork of the N. W. and s . W. branches of the river Cape Fiar, at the head of the harlour, 15 miles S. from Brunfwick, and about 8 from the Atlantic E.

Wilton, by fome called New London, a little town of Colleton county, in Carolina. It confifts of about eighty houfes. It was. isuilt by the Swif, under the direction of a gentleman of that nation. It fands on the N. bank of the river North Ediflow, about 12 miles from its mouth. The bulding of this town has proved detrimental to Purryßurgh, which lies on the frontiers of the couniy. About 22 miles above Witton is fort North Ediftow, to keep the Indians in awe.
Windsam, a county in Connecticnt, New England, who is bounded on the N . by Worcefter, in Maffachufets-Bay, E. by Providence and Rhode-1 fand colony, S. by New London, and W. by Hartford counny, in Connecticur.

Windham, the principaltown in the foregoing county, fituated on a tiver of its own name that runs into the Thames river. It is about 10 miles $\mathbf{W}$. of Canterbury, 5 S. of Mansfield, and 28 N. of New London.

Windward Passage, a courfe of above 160 leagues, fo called from cape Morant, the ealt point of Jamaica, to the north fide of Crooked illand, in the American ocean.
Ships may and haveofen failed through this channel, from the N. frde of it to Cuba, or the bay of Mexico, notwithftanding the common opinion, on account of the current, whici is againft it,

## W OR

The provburgh, of the above jw, 10
that they keep the Bahama fhore 3 -board, and that they meet the wind in fummer for the molt part of the channel catterly, which with a counter curreat on thore puhhes them eofily through it.

Windsor, East and West, 2 towns in Hartiord county Connecticut, on each fide the river Connefticur, North of Harlford 6 miles.

Wingen, a fmall river between thofe of Winyan and Clasendor, in the coun:y of the Jatter name, and Carolina. Upon it is a fmall fettlement called Cliarles-town, thinly inhabited.
Winisinit, a town on the N. fide of Bofton harbour, in the connty of Middlefex, Maffachu-fets-Bay. There is a ferry of absut 3 miles from Bolton to this place, to the W. of which was Charles-tovn, from which it was divided by Myttic siver.

Winvan, or Watey river, in Clarendon county, and N. Carolina. It is about 25 leagues from Alhley iiver, and capable of receiving large thips, but inferior to Port Royal, nor ars these yet any fettements uron it.

WOBURN, a town in Midilefex county, in Mafechufets-3ay, between Medford and Wilmingham, io miles N. of Cambridge, and 7 N. E. from Lexington.

Woodbridge, a good town of Midditex county and E . Jerfey. It flands on a creek within the found formed by Staten ifland and this coun'y. It has 120 famities, and 30,000 acres of plantation; and lies about 7 or 8 miles from Pifcataway.

Woodbury, atown in Litchfield county, Connecticut, near the river Shepoag, which runs into Stratford-river, 15 miles N. of Newtown, 7 N. E. from NewMilford, and $8 \mathrm{~S} . \mathrm{W}$. of Litchfield.

Worcester, a colnty in Maffachufets - Bay, bounded by Hampfhire on the W. Saffolk on

the E. Providence and Rhodeliland on the S. and New-Hampthire on the N .

Whentham, a town in Suffolk county, Malfichufets-Bay, 6 milcs S. W. from Walpole, on the principal road to Providence, and about io N . of Atteborough.

Wrightsborough, a town in the diftrict of Augulta, in the province of Georgia.

Wrightstown, in Bucks county, Penfylvania, 4 miles N . of Newtown, and 4.W. of Dela-war-river.

## X

XAintes,Santos,arAle-Saints-Istands, part ot the government of Guadaloupe, one of the Caribbees. Thefe are 2 finall ifles on the S. E. fide of Gnadabupe, the moft wefterly of which is called leara de Bas, or the Low - illand, and the mott eafteriy Terre de Haut, or the High-illand: the third, which lies exatty in the middle, between the other two, deems to be nothing more than a large barren rock, and helps to form a very good har!onir.

In 1696, there were about 90 inhabitants on the 2 inands fit to bear arms. Terra de Bas is 3 leagecs in circuit; Terre de Haut is the largent.

There is good land in the valleys and on the other fide of the hills, the tops of which, though fony, are covered with wood. The a'r here always blows freth, let the wind be from what yuarter it will. Mandioco, potatoes, peafe, cotton, and tobicco, thrive here to perfection, with plenty of bogs fed, as well as goats and pouttry. In the wild-grain feafon come great flights of wool-pigeons and parrots; and at other times here is abundance of turtle-doves, thrulhes, and fea-fowl; but they have here no frelh water, Among

## Y A R

the rocks there is thell-fifh, lobfters, grigs, and congars. On land are fome few black cattle. On the 'lerre de Bas is a neat wooden chureh, wilh two very convenient crceks both for anchorage and landing. The principal trade of the inhabitants is in cotton, pulfe, tobacco, and poultry.
They are fituated 2 leagues from Guadalorpe, and 5 from Maricgalan'e, and their produce in 1767 was $50,000 \mathrm{lb}$. of coffee, and $90,000 \mathrm{lb}$. of cotton.

Xatisco, the mof funhern proeince on the coaft of Guadalaxara audience, and New-spain. It is wathed by the S. Sea on the S.and W. bounded on the E. by Guadalaxara Y'roper, and Mechoacan, and ieparated fom Chiametlan on the N. by a narrow nlip of land belonging to Guadalaxara, and rumning out into the ies. It is not above 50 leagues in exsent either uay.

It abounds with Indian wheat and filver mines, but has very few cattle of any fort.

The Xalifoo, an ancient city, is the capital of the province; yet the moft confiderable place in it is Compoftella.

Xeres dela Frontera, a town in the moft fouthern part of Zacatecas, a province of Guadalaxara audience, and New-Spain. It is garrifoned by Spaniards for defending the mines againft the favage Indians on the frontiers of Guadalaxara.

## Y.

YARMOUTH TOWN and HARbour, in Barnftaple county, Plymouth Colony, is Gituated on the S. fide of the Pcninfula that forms Cape-Cod bay, of which this is one of the harbours. It is but 5 miles from Earnflaple, on the S. fite of the peninfula.

Yarmouth, a maritime town, is the county of York, New:

## Y O R

Hampihire. It is fituated at the bottom of Cafco-bay, at the mouth of the river Royal, and is a fmall town, the midway between Brunfwick and Falnouth.

Yasoua, a river of Florida. It lies ahout 60 leagues higher on the E. fide of the Miffifippi, into which it comes 2 or 300 miles out of the country. Upon it dwell the nations of the Yafoues, Tounicas, Kowroulas, \&e.

York, a county and towil in Penfylvania, whofe S. hourdary is Maryland, its N. W. Cumberland county, and it is divided by the Sufuuchannah-river, on the N. F. trom Lancafter county. The town is a flousiking place, on a branch of the Sufquehanuah, from whence it is diftant 10 miles W. and 25 S. E. fiom Carlifle.

York, one of the counties of Mallachufets-Bay, New-England, to which it is now joined, tho' formerly diflinet, under the tille of the Province of the Main, -which fee.

YORK, the capital of the above county, a maritime town, with a river of the fance liame near it, It is 6 miles N. from Portfmouth, and 26 from Salifbury, in Mathachu-fets-Bay, and 70 from Boflon.

York, a county of Virginia. It lies S. $\mathbf{E}$. of James's county, between James - river and Yorkriver, containing 60,767 acres of land, in the 3 parifhes of York, Hampton, and New-Pokofou. The latter flands at the mouth of York-river.

York - River, hy the Indians called Pamunky, in Virgiusa. The name Pamunky, the upfer branch of this river, in King William's county, fill retains. It is navigable to miles by large fhips; and by ketches and floops, 30 more. By croffing the neck of land to Pokofou, one comes to its moulh. It runs the fame courfe with James-river for 100 miles; and fo near it, that in fome glaces it is not above 5

miles over land, from one to the other: which land between them being fo will accommodded for navigition, and io near 2 fuch great rivers, is beat imbabited; and here the riche: planters are feated. Forty miles up this river it divides iticlf into 2 branches, navigable each a conliderable way for floops and barges. The intall Slip of land which divides James river from York-tiver, is reckoned a very rich foil, producing the beft robaces in that country, known by the nane of sweetfeented; which is itripped from the falk, before it is packel up in the hogthead; and then fo clofely prefled, that a hogthead will fometimes weigh about 14 or 1500 weight. And fome particular crops of the moit careful planting of this commolity, have frequently been fold at the key for 12 pence per pound. This fpot of ground, fo happily fituated, has alfo the conveniency of 2 inlets, navigable by flat-bottomed hoats; the one runs from James-river, and extends to the northward, about 5 miles acrofs the country, to a fafe landing-place. The other runs S. from York-river, up into the land; fo that the face between the landing-places of the fe 2 rivuless is only a mile, and the foil gravelly; and here Williamfourg is fituated : which, by means of thefe 2 inlets or crecks, commands the navigation of James and York rivers.

York, New, a city and province, formerly called Nova Belgia, from its being planted by the Dutch.

The province of New-York, at prefent, contains Long-Inand, Sia en Inand, and the lands on the E. fide of Hudfon's-river, to the bounds of Connecticut: on the W. fide of Hudfon's - river from the fea, to lat. 41 , lies NewJerfey: bounded N. by Canada; on the E. by New-Englind; on the S. by the Atlantic-Ocean and

## Y O R

New-Jerfey; and W, and N. W. by Pentylvania and Canada. Latitude between 40 and 45. longitude between 72 and 76 W . from Loudon. 300 miles long, 150 broad. Long - Illand, 100 miles long; 25 broad.

The city of New-York, at firt, included only the ifland, called by the Indians, Manhatans, Man-ning's-illand; the 2 Birn-iflands, and the 3 Oytter-ifands, were in the county. But the limits of the city liave fince been angmented by charter. The illand is very narrow, not a mile wide at a medium, and about it miles in length. The S. W. point projects into a fine fpacious hay, 9 miles long, and atout 4 in breadth; at the con? - ence of the waters of Hullon's river, and the Atrait between Long-Ifland and the nore thern thore, line Narrows, at tice S. end of the bay, is fcarce 2 miles wide, and opens the ocean to full view. The paffage up to New-York, from Sandy Hook, a point that extends farthelt into the fea, is fafe, and not above 25 miles in length. The common navigation is be:ween the E. and W. banks, in 22 or 23 fect water. An 80 gun hip may be brought up, through a narow, winding, unfrequented channel, between the N. end of the E. baikk and Co-ney-ifland.
'The city has, in reality, no natural bafon or harbour. The Ihips lie off in the road on the E. fide of the town, which is docked out, and better buitt than the tide, becaile the frefhes in Hudfon's river fill it in fome winters with ice.

The city of New-York confifts of about 3000 houles. It. is a mile in length, and not above half chat in breadth. Such is its figure, its center of bufinefs, and the fituation of the houfes, that the mean cartage from one part to another, does not exceed above one quarter of a mile ; than which nothing can be more advantage-

## Y O R

-as to a trading city. But one great natural evil is, the inhahitants are olsliged to fitch their water from fprings at a confiderable diflance fiom the town.

It is thought to he as hestely a fpot as any in the world. The F., and S. pirts, in general, are low, bur the reft is lituated on a dry, elcuated foil. The freets are irregular, but, being paved with round pebbles, are clean, and linal with well-built brick houles, many of which are coverel with tiled roofs, and have rows of erees hefore them.

No part of Amorica is fripplied with markets abronding with srater plenty and varicty. They have bect, pork, muston, poul'ry, butter, wild fowl, venifon, fith, roots, and licrbs of all kinds, in their feafons. Their oyfters are a confiderable article in the fupperr of the poor. 'Their beds are within view of the town; a flcet of 200 fmall crafi are often feen there, at a time when the weather is mild in winter; and this fingle article is computed to be worth, annually, 10 or 12,000 .

This city is the metropolis and grand mart of the province, and, by its commodious fituation, commands alfo all the trade of the weftern part of Connecticut, and that of Eaft-Jerfcy. No feafon prevents their Ships from launching out into the ocean. During the greateft feverity of winter, an equal, unreftrained adtivity runs through all ranks, orders, and employments.

Upon the S. W. point of the city flands the fort, which is a fquare with 4 baftions. Within the walls is the houre in which the Governors ufually refide; and oppofite to it brick-barracks, built formerly for the independent companies. 'The Governor's-houfe is in height 3 fories, and fronts to the W. having, from the fecond ftory, a fine profpect to the bay and the Jerfey thore. At the S .

## Y O R

end there was formerly a chapel, but this was burnt down in the negroe conlpiracy of the fring, 1741: as was the whole of the Governor's houfe, Dec. 29, 1774, which deftroyed, in a few homs, all the public and private papers, and valuable furniture. Accord. ing to Governor Burnet's obliervations, this fort llands in latitude 40, 42 .

Below the walls of the garrifon, wear the water, they have lately ralfed a line of fortification, which commands the entiance into the caftern toad, and the mouth of Hudfon's-river. 'This battery is huilt of none, and he merlons confill of cedar-joilts, filled with earth. It narunts 92 cannon, and there are all the works they have to defend the place. About 6 furlongs S. E. of the fort, lies Not-ten-iland, containing about 100 or 120 acres, referved by an act of aflembly as a fort of demefine for the Governors.

The inhabitants of New-York are a mixed people, but moftly defcended from the original Dutch planters. Thereare ftill 3 churches, in which religious worfhip is performed in that language. The old building is of ftone, and ill built, ornamented within by a fmall or-gan-loft, and brafs branches. The new church is a high heavy edifice, has a very extenfive area, and was completed in 1729. It has no gallerics, and yet will, perhaps, contain 1000 or 200 allditors. The ftecple of this church affords a moft beautiful profpect, both of the city beneath, and the furrounding country. The Dutch congregation is more numerous than any other; but as the language becomes difufed, it is much diminifhed; and unlefs they change their worfhip into the Englim tongue, muft foon fuffer a total diffipation. Their church was incorporated May 11, 1696, by the name of the minifter, elders, and deacons, of the reformed grotef-

## Y O R

## Y O R

eant Dutch church of the city of New-York; and its ellate, after the expiration of fundry long leafes, will be worth a very great income.

All the Low Dutch congregations in this and the province of New-Jerfey, worhip after the manner of the reformed churches in the United Provinces. With refpect to government, they are in principle Prefoyterians. There are, befites the Du!ch, 3 epifiopal churches in this city, upon the plan of the eftablifhed church in Sourh-Britain. Trinity church was huilt in 1696 , and afterwards enlarged in 1737. It ftands very pleafantly upon the banks of Hudion's river, and has a large cemetery on cach fide. Before it a long walk is railed off from the broad-way, the pleafanteft frect of any in the uhole town. This building is about $14^{8}$ ficet long, including the tower and chancel, and 72 fect in breadth. The fteeple is 175 feet in height, and over the door facing the river is a L, atin infeription.

The chureh is, within, ornamented beyond any other place of public worthip in New-York.
'Ihis congregation, partly by the arrival of ftrangers from Eusope, but principally by profelytes from the Dutch churches, is become fo numerons, that though the old builcing will contain 2000 hearers, yet a new one was erected in 1752. This, called $\$ \mathrm{t}$. George'schapel, is a very neat edifice, faced with hewn ftone, and tiled. The fteeple is lofty, but irregular; and its fituation in a new, crowded, and ill-built part of the town.

The Prelbyterians have an elcgant meeting-houfe, erefted in 1748; but the French church is greatly gone to decay.

The German Lutheran churches are 2. Both their places of worthip are fmall: one of them has a cupola and bell.

The Quakers have a meeting-
houfe, and the Moravians a church, conlifting principally of female protelytes from other focietics. Their fervice is in the Englioh tongue.

The Anabaptifts affemble at a fmall meeting-houfe, but have as yet no regular fertled congregation. The Jews, who are not inconfiderable for their mumbers, worfhip in a fyuagogue erected in a very private part of the town, plain without, but very neat within.

The city hall is a flrong brick building, 2 florics in height, in the Shape of an oblong, winged with one at each end, at right an. gles with the firft. The floor below is an open walk, except 2 jails, and the jailor's apartments. The ceilar underncath is a dun. gem, and the garrer above a common prifun. This edifice is eren. ed in a place whece 4 flrees mect, and fronts, to the S.W. ow of the moil fpacious ftrects in the town. The eaftern wine; in the fecon: fory, confifts of the affembiychamber, a lobly, and a fmall room for the feaker of the houfe. The weft wing, on the fame floor, forms the council-room and a li brary; and in the fpace between the ends, the stiprene court is ordinarily held.

The library confifts of 1000 volumes, which were bequeathed to the fociety for the propagation of the Gufped in foreign parts, by Di. Millingion, rector of Newing:on, in 1728

In 1754, a fet of gentlemen utdertook to carry about a fubficription towards raifing a public dibrary; and in a few days collected near 6 col . which were laid out in purcnafing about 700 volumes of new, well-chofen books,

Befides the city hall, there belong to the corporation, a large alms-houre, or place of corrcction. and the exchange, in the latter of which there is a large room, raifed upon brick-arches, generally ufed

## Y O R

for public entertainments, concerts of mufic, bal!s, and affemblies.

Though the city was put under the government of a nayor, \&c. in $\mathbf{1 6 6 5}$, it was not regulatly incorporated till 1686. Since that time feveral charters have been paffed: the laft was granted by Govcrnor Montgomerie, on the $15^{\text {th }}$ of January, $173^{\circ}$.
It is divided into 7 wards, and is under the government of a mayor, recorder, 7 aldermen, and as many affiftants, or commoncouncilmen.

The north-eaftern part of New-York-Ifland is inhabited principally by Dutch farmers, who have a fmall village there called Harlem, pleafantly fituased on a flat, cultivated for the city-markets.

The province of New-York is not fo populous as fome have imagined. Scarce a third part of it is under cultivation. The colony of New - York contains about 250,000 inhabitants, the greateft part of whom are defeended from the Dutch. The exports of this colony confift chiefly of grain, flour, pork, fkins, furs, \&c. Thofe to Great-Bitain, before the prefent difturbances, amounted, annually, to 526,0001 . and the imports from thence $53 \mathrm{r}, 000$.
Englifh is the moft prevailing language in New. York, but hot a little corrupted by the Dutch dialeet, which is fill fo much ufed in fome counties, that the heriffs find it difficult to ob:ain perfons fufficientiy acquainted with the Enghifh tongue, to ferve as jurors in the courts of law.

The manners of the people differ as well as their language. In Suffolk and Queen's county, the firft fetters of which were cither natives of England, or the immediate defeendants of fuch as begun the plantations in the eaftern colonies, their cultoms are fimilar to thofe prevailing in the Englifh counties irom whence they ori-

## Y O R

ginally frrung. In the city of New-York, throngh their intercourfe with the Europeans, they follow the London falhions; tho by the time they adopt them they become difufed in England. Their affluence, during the late war, introduced a degree of luxury in tables, drefs, and furniture, with which they were before unacquainted. But fill they are not fo gay a people as their neighbours in Eufton, and feveral of the fouthern colonies. The Dutch counties, in fome meafure, follow the example of New-York, but Still rerain many modes peculiar to the Hollanders.
The city of New-York confifts principally of merchants, hopkeepers, and tradefmen, who furtain the reputation of punstual and fair dealers. With refpect to riches, there is not fo great an inequality amongft them, as is common in Bofton, and fome other places.
The inhalitants of this colony are in general healthy and robutt, taller, bet forter lived than Europeans, and, both with refpect to their minds and bodies, arrive fooner to an age of maturity. Breathing a ferene dry air, they are more prightly in their natural tempers than the people of England, and hence inftances of fuicide are here very uncommon. Few phyficians fettled at New - York are eminent for their ikill. Quacks abound like locufts in Eggpt, and too many of them have recommended themfelves to a full practice and profitable fubfiftence. This is the lefs to be wondered at, as the profeffion is under no kind of regulation. Laud as the call is, they have no law to proted the lives of the King's fubjects from the malpractice of pretenders. Any man at his pleafure fets up for phyfician, apothecary, and chirurgeon. No candidates are either examined or licenced, or even fworn to fair practice. inter, they, ; tho' $n$ they Their ar, inry in , with unace not bours f the Dutch collow , but culiar

The fituation of New - York, with refpect to foreign-markets, is to be preferred to any of our colonies. It lies in the center of the Britifl plantations on the continent, has at all times a fhort eary accefs to the ocean, and commands almoft the whole trade of Connenticut and New-Jerfey, two fertile and well-cultivated colonies. The projection of Cape-Cod into the Atlantic renders the navigation from the former to Bufton, at fome feafons, extremely perilous; and fometimes the coafters are driven off, and compelled to winter in the Weft-Indics. But the conveyance to New-York, from the eaftward, through the Sound, is fhort, and unexpofed to fuch dangers. Philadelphia receives as little advantage from New Jerfey, as Bolton from Connecticut, becaufe the only yivers which roll through that province, difembogue not many miles from the very city of New-York. Sevcral attempts have been made to raife Perth-Amboy into a tra ling port, but hitherto it has proved to be an mafenfible project. New- York, all things confidered, has a much better fituation; and, were it otherwife, the city is bcoome too rich and confiderable to be ectipted by any other town in its neighbourhood.
Their exports to the Weft-Indies are bread, peafe, rye-meal, In-dian-corn, apples, onions, hoords, Atves, horfes, heep, butter, cheefe, pickled oyfers, beef, and pork. Flour is alfo a main article, of which there is hipped about 80,000 barrels fer anmum, The reterns are chiefty rum, fugar, and molaftes, except calh from Curacos, and when mules from the Span:ín main are ordered to Janaica, and the Windward-Inends, which are generally exchanged for their natural produce, for they receive but little cafh from the Englifh intands.
The fua-trade cught not to be

## YEC

pifed orer in fitence. The buills. ing of Ofwezo has conduced more than any thing elfe. to the prefervation of this trade. Peltry of all kinds is purchafed with rum, ammunition, blankets, flrouls, and wampum, or conque - fhctil bugles.

Their importation of dry goods from Enghand, till of late, was fo very great, that they were obliyed to betake themfelves to all poffible arts to make rimittances to the Englifh merchants. It is for this purpofe they imported c eton from St. Thonas's and Surinam; linejuice, and Nicaragua wood fromz Curacoa; and logwood from the bay, \&c. and yet it drained them of all the filver and gold they could colleat. It is compured, that the ammal amount of the goods pur.chafed by this colony in GircatBritain, was in value not lefs than roo, cool. Aterling; and the fun would have been mach greater, had a fop been put to clandettire thade.

This colony is diviled tato the following candies, New York, Alany, Uliter, Duchers, Orange, Weftchefter; and i., Lous- 1 and are King's, Quen's, and safolkcountics; betijes which is Richmond, or Staten-Miland.

The only cupes are May, San-dy-Hook, and Montork poins:and the only Straits are, the Narrows and Hell-gate. Through the latter, about 80 yarls wide, it is extremdy dangerous fitiinz, on account of the diffirent rapid currents; for if a veffel gets into any bat the right one, he inevitably rats on a floal of rocks on one file, or is whitled round and fwallowed up by a dreadful vortex on the other.- There are alfo the following rivers; Hudfon's or the Noth, Monawk, and Sorrel. On the Mohnwk is a large catsract, called Cohocs, which falls 70 feen pcrpendicularly.

Yucatan, a province and penimfind in Mexice. See Juche tall.

## A $\quad \mathrm{D} \quad \mathrm{D} \quad \mathrm{E} \quad \mathrm{N} \quad \mathrm{D} A$.

$\mathbf{I}^{N}$N order to form fome judgment of the prefent oppofition in North America, it may not be unpleafing to many to know what Britifh and foreign forces are at this time (July, 1776 ;) there; which are as follows:

## A D D E N D A.

Befides the 14 companies of Briting artillery faid, as above, to be in America, there is one company of artillery invalids at Newfound-land.-The total of which is 53 ---One of the 6 companies faid to be with General Howe, is as yet at Peniacola; and the greateft part of 2 of the 6 companies faid to be with General Carliton, are at prefent prifoners with the iebels; as are alfo the 7 th and 2 tith regiments of foot, which regimens are not mentioned above.

The it th regiment, being to very much difperfed, is likewife not condidered in the above lift.——As the regiments of font ferving in America have each two companies at home for the purpofe of recruiting, the calculation in the preceding page is made at onty tea companies per regiment.
