KING'S COLLEGE,

WINDSOR, N. S.

THE Governors of King's College, in accordance with their annual custom, since the re-organization of the Institution, have now the pleasure of submitting to its friends and the public, their Eleventh Calendar setting forth its present condition and prospects. They desire in the first place to acknowledge the Divine blessing which has rested on the College during the year. That blessing is there invoked twice every day in Term time, and also at every meeting of the Governors for the transaction of business—in the hope that a sanctifying influence may pervade both those who have the management of the Seminary, and those who are under their care.

It will be seen by the Reports in the Appendix that notwithstanding the absence of the President in Europe for the greater part of the year, and the removal of Professor EVERETT to Glasgow, the usual course of study has been, as far as possible, pursued.

The Rev. Canon HENSLEY assumed the duties of Professor of Mathematics (which office he had filled before) in addition to those of Professor of Theology; and although the departure of the late accomplished occupant of the Mathematical Chair was much regretted, it is hoped no injury has accrued to his pupils by the change of instructors. Professor HENSLEY has been invested during the year with the office of Vice-President.

To the Classical Department the Rev. G. HODGSON has been appointed. He had passed through College very creditably, and had subsequently conducted the Academy at Lunenburg to the satisfac-

tion of its Trustees. He has also been appointed Fellow of the College.

No additional charge has been incurred by the appointment of Mr. HODGSON, as the President pays his salary out of his own, in consideration of his being thus relieved from many of his former duties.

PROFESSOR STIEFELHAGEN, who had been on a visit to his native land, has resumed his duties in the important department of Modern Languages, over which he has so long and so effectively presided, and his return has been cordially welcomed by the Governors, the Faculty, the Students, and the community.

Professor How, D. C. L., has had no holiday, but has remained unremittingly engaged at the post which for ten years he has occupied with so much credit to himself, to the University, and to the Province at large. His scientific assistance has been rendered to the Nova Scotia Commissioners to the Dublin Exhibition, (as formerly to that of London, in 1862,) to which a contribution was loaned, under Dr. How's selection, from the Mineralogical Cabinet of the College. The yearly discovery and development of the rich mineral stores of our country, render it very important to have at hand one of such high professional skill and attainments as Dr. How, and the value of his services has been made available on many occasions.

The Governors have to record with much regret the death of the Hon. Judge STEWART, C. B., a valuable member of the Board. He ever took a lively interest in the welfare of the College, and especially directed his efforts to securing a practical education for the young men, suited to the progressive character of the age. One of his latest acts was to move for a minute enquiry into the course of instruction at the Collegiate School, with the view of preventing an undue prominence of Classical over English studies, and the acquirement of modern languages, and whatever else may best fit the youth of our country for the duties of life. Shortly before his death he imported from England, and presented to the Library, four large volumes containing full official Reports on all

the great Schools of England, a most valuable auxiliary to those charged with the Education of our youth at the present day.

The enquiry suggested by Judge STEWART elicited a detailed Report from Rev. Dr. BLACKMAN, shewing that while due place is given at the school to Classics, it is not at the expense of a thorough English training, in conjunction with modern languages—taught by Dr. STIEFELHAGEN. The number of pupils is forty. Considering the Collegiate School to be, as it always has been, an important feeder of the College, the Governors are anxious to see it well filled by those who are looking forward to the regular Academical course, as well as by all others who desire a sound practical education, for which the Academy affords desirable facilities.

The Governors have to acknowledge with pleasure the service gratuitously rendered to the College by T. B. AKINS, Esquire, Barrister-at-Law, by his published collection of Facts connected with the early History of the Institution, which he has brought down to the year 1845, a few years before the auspicious revival of the College, and its fresh start in its present career of usefulness under the impetus given to it by the exertions of its Alumni and other friends. At the request of the Board, the honorary degree of D. C. L. has been conferred on Mr. AKINS in acknowledgement of his services.

It will be remembered that in the Calendar for 1864, it was announced that this gentleman had endowed a prize of thirty dollars, annually, for the best Essay on the County History of Nova Scotia, and that Hants was the County first selected. Three Essays were accordingly submitted this year to the appointed Examiners, and two of them being of nearly equal merit, it was agreed to divide the amount between the authors, namely: Benj. Smith, Esquire, of Douglas, County of Hants, an old and valued friend of the Church and the College, and Mr. Cox, of Falmouth, at present pursuing his studies at the University. It is hoped that for the prize of 1866, there will be a larger competition. The subject is the County of Colchester. There can be no question as to the importance of this prize as

tending to elicit, and preserve from oblivion, many interesting traditions of a period fast passing from the memory of the oldest living man, and to form valuable data for the future historian of our country.

It is satisfactory to find that Capt. DUNCAN, R. A., and D.C.L., who gave a prize in Geology in the year 1862, has been pleased to renew it this year at \$20, and next year at \$40,—in order to stimulate students in that important branch of science. The donor is connected by marriage with a respected family of this city, of whom four have passed through College with distinguished honor, and have ever taken an active part in its affairs.

The Library and Museum do not receive as large contributions from year to year as is desirable, and practicable, if those who have been trained at the College would embrace every opportunity of enlarging the collection in each.

This year, however, has been distinguished by a Royal gift, with an autograph of Her Majesty, of the Speeches and Public Addresses of the late lamented PRINCE ALBERT, in an elegantly bound volume, which now adorns the shelves of the Library. The Governors of course acknowledged this gracious gift by an unanimous vote of respectful thanks, transmitted through His Excellency the Lieutenant-Governor, in which they referred with pride to the fact that Her Majesty's Royal Grandfather GEORGE III. was the Founder of, and granted his Royal Charter to, this University before any other in his Colonial dominions, and on various occasions testified his warm and personal interest in its welfare.

The Encœnia of 1865 was as usual an interesting celebration, and well attended; among the Degrees conferred was that of D. C. L., on His Excellency Sir RICHARD GRAVES MACDONNELL.

The Rev. GEO. W. HILL, now Rector of St. Paul's, Halifax, who was a member of the Board in 1854, was elected to fill the vacancy caused by the death of Judge STEWART; and S. P. FAIRBANKS, Esquire, Commissioner of Crown Lands, was re-elected.

In the last Calendar, reference was made to the embarrassment caused in the financial concerns of the College by the recent war

in the United States, and the state of the money market. Happily that war is now ended, and it is hoped that dividends unavailable during the last four years, will ere long be received as before. It is satisfactory to be able to add that, notwithstanding the pressure alluded to, salaries and other pecuniary engagements have been promptly met by the Treasurer. There are a few outstanding notes given for the Endowment Fund still unpaid, which it is hoped the signers will require no further urging to discharge without any additional delay.

In conclusion, the Governors respectfully call upon all the Alumni of the College, and all its other friends, wheresoever they may be, to continue their interest and their exertions in its behalf, and assist in maintaining the high character which for more than seventy years it has enjoyed among the Educational Institutions of this Continent.

By Order,

J. C. COCHRAN, M. A.

Secretary.

August, 1865.

APPENDIX.

University of King's College,

WINDSOR, N. S.

This University was originated and recommended by a Committee of the House of Assembly, November, 1787. It was founded by Act of Parliament in 1788, under the title of "King's College, of Nova Scotia." And a Royal Charter was granted by King George III. in 1802.

PATRON.

HIS GRACE THE LORD ARCHBISHOP OF CANTERBURY.

BOARD OF GOVERNORS

1865-6.

Board and attendance	95.40	“
Pew rent and road money	2.50	“
Fuel and lights	22.00	“
Tea and Sugar, for evening meal....	6.00	“

\$130.00

And a small sum for furniture.

Students take their evening meal in their own apartments, and provide lights and fuel, as also beds and bedding, and room furniture.

FEEs ESTABLISHED FOR THE DEPARTMENT OF THE PROFESSOR OF
CHEMISTRY AND NATURAL HISTORY.

To Individuals or Companies requiring the analysis of any substance or mineral:

	£	s.	d.
For ascertaining the <i>nature</i> of any such mineral or substance	1	0	0
If the <i>quantity</i> of one or two elements is to be determined	1	15	0
If a <i>complete</i> analysis of a <i>simple</i> mineral is required...	3	0	0
If a <i>complete</i> analysis of any coal or other complex substance be required, such as soils, minerals of a mixed nature, &c.	6	0	0

These fees are subject to modification according to circumstances.

PRACTICAL AND ANALYTICAL CLASS.

For the above there shall be two Terms: one from September to December 15, the other from January 15 to June 15.
Hours of attendance—from 10 to 12 o'clock.

FEEs PAYABLE BY ALL STUDENTS IN THIS DEPARTMENT, WHETHER
NOMINATED OR NOT.

	Short Term.	Long Term.
Five Lectures per week	£3 10 0	£5 0 0
Four " "	2 16 0	4 0 0
Three " "	2 2 0	3 0 0
Two " "	1 8 0	2 0 0
One " "	0 15 0	1 0 0

All materials and apparatus provided by the College.
All damage, breakage, &c., to be paid for by the Student at cost prices.

Additional charges for increased time.

Scholarships.

THE WILLIAM COGSWELL SCHOLARSHIP.

£30 per annum, open to Candidates for Holy Orders. Under the direction of the Trustees.

Scholar—CHARLES MATTHEW.

DIVINITY SCHOLARSHIPS.

Paid by the Society for the Propagation of the Gospel in Foreign Parts—open to Students for Holy Orders, actually requiring assistance—and subject to the control of the Bishop of the Diocese.

Ten in number—£30 currency, per annum, each.

THE DR. BINNEY EXHIBITION.

Open to Students in indigent circumstances, and of exemplary conduct.

£20 per annum.

In the year 1858, Miss Binney, sister of the present Visitor, and daughter of the late Rev. Dr. Hibbert Binney, in the name and on the behalf of her father's executors, handed over to the Governors certain stock, amounting to \$1000, to found an Exhibition at King's College, to be called the "Dr. Binney Exhibition," in memory of her said father.

The design of this Scholarship is to assist poor students who may require assistance, and who shall have commended themselves by their exemplary conduct, although their abilities and requirements may not qualify them to be successful competitors for an open scholarship.

TERMS—On or before the last day of May in every year, the College Board shall nominate two Students, in their third term at the least, whom they may deem best qualified, having regard to their poverty and the excellence of their characters; and the President shall forthwith transmit their names, together with a brief statement of their claims, to the Visitor, who shall select one of them to be the Exhibitioner, and to receive the interest accruing for the following year, commencing July 1st. Or, at his discretion, if he consider the claims of the two nominees to be equal, or nearly so, the Visitor may adjudge that the amount may be divided between them.

Incorporated Alumni.

PATRON.

HIS EXCELLENCY SIR RICHARD GRAVES MACDONNELL, *Kt.*, C. B.,
LIEUTENANT-GOVERNOR OF NOVA SCOTIA, &c., &c.

OFFICERS.

BENJAMIN CURREN, Esq., D. C. L., *President.*
 REV. THOMAS CRISP, M. A., *Vice-President.*
 T. B. AKINS, Esq., D. C. L.
 REV. JAMES C. COCHRAN, M. A.
 CHARLES TWINING, Esq., B. A.
 CHARLES GOSSIP, Esq., M. D.
 A. J. COWIE, Esq., M. D.
 HON. S. L. SHANNON, B. A.
 REV. JAMES B. UNIACKE, B. A.
 B. H. COLLINS, Esq., *Treasurer.*
 FITZGERALD COCHRAN, Esq., *Secretary.*

Prizes.

THE McCAWLEY HEBREW PRIZE.

THE McCAWLEY HEBREW PRIZE of £9 sterling, open to all Members of the University who are below the standing of M. A., and who have not already gained the first premium in Hebrew.

THE BISHOP'S PRIZE.

THE BISHOP'S PRIZE of £5 in books.

DR. COGSWELL'S CRICKET PRIZE.

CHARLES COGSWELL, Esq., M. D., has made a donation of £100 to the Governors of King's College, the interest of which is to be expended in the purchase of a set of Cricket bats, balls, &c., to be given to the best player among the winning party of a Cricket match, to be contended for annually, on the College grounds, on some day in the month of September. "The object of the donation is to promote the health of the Students, and encourage them in the prosecution of their duties."

DR. ALMON'S WELSFORD TESTIMONIAL.

WILLIAM J. ALMON, Esq., M. D., has endowed King's College with £100, the interest of which is to be appropriated as a prize to be competed for every June, by matriculated students, in their first year. The prize is to be presented by the President in the College Hall, on the 8th September, being the anniversary of the attack upon the Redan, in which Major WELSFORD fell—on which day, in every year, his gallant and loyal deeds are to be commemorated in Latin.

If no candidate shall be deemed deserving of the prize, it will be appropriated to the purchase of books for the College library.

THE AKINS HISTORICAL PRIZE.

T. B. AKINS, Esq., Barrister of this city, and Commissioner of Public Records, has vested in the Governors, as Trustees, a sum of money sufficient to found a Prize of Thirty Dollars, annually, for the best Paper or Essay on the County History of Nova Scotia, embracing matters derived from local records, and traditions, relating to the early and progressive history of each County. The prize to be open for competition to the whole Province. Subject for 1866, County of Colchester. The decision on the merits of the Essay to rest with the Governors, or such persons as they may appoint, and to be announced at the Encenia in June.

PRIZEMEN 1865.

H. WELDON, the Welsford.

G. H. KING, *Proximè accessit*.

J. T. BRINE, French.

R. J. FRETWELL, Dr. Duncan's prize in Geology.

H. WELDON, Inorganic Chemistry.

J. R. ARMSTRONG, Matriculation Prize.

The Akins prize was divided between BENJ. SMITH, Esq., of Douglas, and Mr. COX, of Falmouth.

Nominations.

THE following is the form of nomination of a Student to pass through the University, free of fees, and must be addressed to the Secretary of the Board of Governors :

To
Secretary of the Governors of King's College, Windsor.

I do hereby nominate (A. B.) to pass through the University, free of fees, by virtue of certificate No. —, held by me.

(Date.)

(C. D.)

In case of a joint certificate, the above form must be complied with, and the same must be signed by all the holders.

Each nominee is exempt from the payment of yearly fees, amounting to more than £53 for the three years' course, including the fee for a B. A. degree. There being some eighty certificates conferring this privilege, it is easy for Students to obtain it. If a scholarship is held besides, nearly the whole yearly cost of education will be covered.

☞ No person is entitled to nominate a Student, unless he has paid up his subscription to the Endowment Fund. The Governors publish below, the names of all who possess the right of nomination, and they hope that those whose notes of hand are still unpaid, will discharge the same without further delay, so that their names may not be struck off the list, and that they may not lose the valuable privilege attached to a College certificate.

NOTE.—All nominated Students must, on taking up their residence in College, file their nominations according to the above form, with the Secretary of the Governors at Halifax. Otherwise, they will be charged with the full amount of fees.

The following persons possess, individually, a right of nomination in virtue of the contribution of £100 each, to the Endowment Fund.

The Lord Bishop of Nova Scotia	Heirs of James Scott, Esq.
Harry King, Esq., D. C. L.	Hon. R. B. Dickey
Heirs of Hon. H. H. Cogswell	Edw. Archbold, Esq.
Rev. R. J. Uniacke	Admiral Bayfield
Heirs of Sir Brenton Halliburton	Capt. Orlebar, R. N.

Extracts from the Statutes.

No Undergraduate shall resort to any inn, tavern, or public house, except for some special cause, to be approved by the President, or shall spend his time in the streets of the town.

All bills of the Undergraduates are to be sent by the tradesmen with whom the debts are incurred to the Bursar, at the end of every term; and parents are particularly requested to refuse payment of any bill not thus sent in.

The introduction of spirituous liquors into the College is absolutely prohibited.

Collegiate School at Windsor.

UNDER THE CONTROL OF THE GOVERNORS OF KING'S COLLEGE

Head Master.

REV. J. T. M. W. BLACKMAN, D. C. L.

Terms.

BOARDERS—£40 per annum, everything included.

DAY SCHOLARS—£8 per annum.

Instruction in one or all of the four Modern Languages, by Professor STEFFELHAGEN, £3 per annum.

Vacations.

From July 1 to August 15.

From December 15 to January 15.

There are two exhibitions of £8 and £4 each, to be competed for annually. The first is open to the senior form, and the successful candidate must be qualified, though not required, to enter College. The second is open to the whole school. In both cases competitors must be of one year's standing.

There are, in connection with this school, six exhibitions, each £15 per annum, tenable for three years, to be given to the sons of clergymen, and to those who are designed for the ministry.

The annual Alumni Prizes of £8 and £4 will be open for competition in June, 1866.

The Head Master gives two prizes annually, one at Midsummer for general good conduct, and the other at Christmas for neatness of person, and tidiness of sleeping apartment, &c.

SYNOPSIS.

Matriculation.

No restrictions are imposed with respect to the place of birth or education, or religious profession, of persons desiring admission.

Students are admissible to *elective* or special courses. They are examined in English Grammar and Composition, in the History of England, and in Geography, General and Colonial; in Vulgar and Decimal Fractions, and in an elementary book on Natural Philosophy and Natural History. Candidates for *Matriculation* undergo an examination to ascertain their competency for entering on the full UNIVERSITY Course with advantage. They are examined in

Homer, first book Iliad;
Xenophon's *Anabasis*, first book;
Cicero pro *Archia*;
Horace, first and second books;

Grammatical Analysis, Prosody and Latin Composition, Greek and Roman History, and in the English subjects required of *elective* Students. In Mathematics they are examined in

Euclid, first two books;
Vulgar and Decimal Fractions and Proportion;
Algebra to Quadratics.

Credit will always be given to such Matriculants as pass well in *Modern Languages*.

Residence.

STUDENTS either reside in College, or obtain a dispensation designating the houses in which they are permitted to lodge. The same opportunities of instruction are offered them in both cases.

Arrangement of Studies.

THE daily lectures for the Undergraduate Course commence at 10 A. M. and are continued till 3½ P. M. The course of instruction is so arranged as to embrace the successive study of the best Classical Authors, the Hebrew Language, Logic, Rhetoric and Ethics; the several parts of Mathematics, Natural Philosophy and Astronomy; Chemistry and Natural History. The Modern Languages, comprising German, French, Italian and Spanish Literature and Conversation, are practically taught. All the Students are instructed in the Greek Testament, in Bible History and the Evidences; and separate classes are formed for such members of the University as desire instruction in Systematic Divinity and Pastoral Theology, with a view to entering on the ministry of the Church.

Classics.

THE Classical Authors selected for study are, in History, Herodotus, Thucydides and Xenophon, Livy and Tacitus; in Oratory, Demosthenes and Cicero; in Poetry, Homer, Euripides, Sophocles, Æschylus, and occasionally Aristophanes and Pindar, Virgil, Horace, Juvenal and Lucretius. The treatises of Aristotle on Ethics, Rhetoric and Poetics, with those of Cicero de Officiis and de Oratore, de Amicitia and de Senectute, and the Comedies of Terence or Plautus, are sometimes read.

Logic, &c.

THE Logical course comprises Simple and Complex Apprehension, Judgment and Reasoning, expressed by corresponding Terms, Propositions and Syllogisms explained and exemplified. The legitimate construction of Syllogisms is carefully taught. The inductive and demonstrative methods of reasoning are considered, with the several kinds of evidence adapted to the different descriptions of subjects, mathematical and moral, or probable. During this course, as in most of the others, the Student is duly informed of the valuable matter to be found in the works of ancient and modern writers.

Exercises.

VARIOUS subjects for exercises in writing in connexion with the several courses of lectures are proposed to the Students; as also a weekly thesis for an Essay to be written in English and Latin, alternately. A *term exercise* is also invariably required.

Hebrew.

EVERY Student who desires it has an opportunity of acquiring a thorough groundwork in Hebrew during his undergraduate course; and it may be much extended after passing his degree examination.

Mathematics, Natural Philosophy and Astronomy.

ALGEBRA is studied from the commencement of the first year, until Quadratic Equations have been passed. Euclid is commenced at the same time, and continued to the end of Book VI., the class reciting a certain number of propositions which they have prepared beforehand, and the Professor supplying such explanation and amplification as are to be found in the best commentaries on Euclid's text. To this is added the solution of geometrical exercises.

A knowledge of the principal rules of Arithmetic, including Vulgar and Decimal Fractions and Proportion, is assumed to be possessed by all Students in the first instance; and without it they cannot be expected to attend the mathematical lectures with advantage. A few hours in the early part of the course, which are all that can be spared for this subject, are devoted to an examination of the principles of Arithmetic, and to the working of a few examples. The use of Logarithms is then entered upon, and is illustrated by a variety of applications with the view of enabling Students to attain ready command of this important instrument of calculation.

Trigonometry is then commenced, the practical part being carried as far as the more complicated problems usually to be met with in works on the subject, while enough of the theory is taught to establish the proofs of all the rules for solution of triangles. The more important problems in Mensuration are also studied both theoretically and practically.

A few lectures on the popular portions of *Mechanics* and *Astronomy* are given in the first year. Towards the end of the second year, when the *Trigonometrical* course has been concluded, the former subject receives a large share of attention; *Statics* and *Dynamics*, with the elements of *Hydrostatics*, occupying two hours a week for two or three terms.

Some of the more advanced students are exercised in the higher parts of *Algebra*, and of *Analytical Trigonometry*. *Co-ordinate Geometry* (including *Conic Sections*;) and the *Differential* and *Integral Calculus*, also occupy a considerable portion of time during the third year.

Chemistry.

THE instruction in *Chemical Science* consists in:—

1st. A course of class lectures on *General Chemistry*, *Theoretical* and *Applied*: these are, to a great extent, *Catechetical*; experiments are constantly performed before the class, and specimens of *chemical preparations* are exhibited, illustrating amply the subjects under discussion.

Chemical Physics forms a considerable part of this course; and the *Chemistry of Mineralogy* is illustrated as much as possible by reference to *Nova Scotian Minerals*, of which specimens are regularly brought forward for examination. The course extends through four terms.

2nd. A course of *Laboratory Instruction* in *Analysis*, *Qualitative* and *Quantitative*, and in the preparation of *Reagents* and other substances. *Written exercises* are prescribed in *Notation*, *Equations*, and *Quantitative Problems*. There is no class; each Student is furnished with a set of *analytical apparatus*, has the use of the larger apparatus of the laboratory when necessary, and performs his own experiments under the superintendence of the Professor.

Natural History.

CATECHETICAL lectures are held in:—

Physiology, chiefly *Human*, illustrated by *Diagrams*; *Botany*, illustrated by *Living* and *Dried Plants*; *Geology*, illustrated by *collections of Rocks* and *Fossils of Nova Scotia* and other countries.

Modern Languages.

THE German, French, Spanish, and Italian Languages are carefully taught. Extracts from the literature of the best writers in each are read with grammatical precision, and the conversational and epistolary styles are practically exemplified.

Divinity and Pastoral Theology.

GENERAL lectures are delivered every Sunday evening on the Greek Testament and Scripture History, which are attended by all the Students in their first and second years.

The special course laid down for *Divinity Students* extends over a period of four years at least, and embraces the different branches of Theology, Exegetical, Systematic, Historical and Pastoral, together with Ecclesiastical History and Polity.

During the undergraduate course in the first year the attention of the Students is confined principally to the Greek Testament; the Acts of the Apostles and one or more of the Gospels forming the subjects of the lectures.

In the second year some of the Epistles of St. Paul are carefully read in the original; and lectures are delivered on the Evidences of Christianity, the Literary History, Criticism, and Interpretation of the Scriptures, and Biblical Archaeology.

The third year is occupied in the study of Ecclesiastical History in general, and that of the Church of England in particular. To this is added a thorough Analysis of the Liturgy of the Church of England, and a review of the changes which it has undergone. The XXXIX Articles are committed to memory in Latin and English, proved from Scripture, and briefly explained.

In the fourth year the study of Systematic Divinity is steadily pursued. Browne's Expositions of the Articles, Pearson on the Creed, Butler's Analogy, and similar works are carefully studied, and form the text-books of lectures. To these are added Hooker's Ecclesiastical Polity, Church History and Christian Antiquities. The Epistles of St. Paul to Timothy and Titus, and other portions of the Greek Testament are read, the best critical apparatus being employed in their elucidation. When time allows, some of the works of the Fathers of the Christian Church, such as the Epistle

of Clement, the Confession of Augustine, Chrysostom on the Priesthood, and the "Cur Deus Homo" of Anselm, are persued in the original.

Lectures are given in Homeletics, and the Students are practised in the preparation of outlines of discourses, as well as in the actual composition of Sermons. Practical instruction is regularly given in reading the Service and the Holy Scriptures, the management of Sunday-Schools, and occasionally in the general duties of a Parish. Those who desire it have also an opportunity of attending lectures in Hebrew. Great advantages are afforded by the excellent collection of Theological works contained in the Library, to which all have access. Besides the regular lectures suitable books are recommended for perusal, and Students are encouraged to remain beyond the four years, a privilege of which they frequently avail themselves.

Church and Chapel.

EVERY Student is required to attend the regular services, morning and afternoon, on Sunday at the Church, on the other days of the week in the College Chapel. To Students who are not members of the Church of England, permission is given to attend their own places of worship on Sunday, and they are required, at the end of each term to exhibit to the President certificates of regular attendance from their respective Pastors.

The practice of Sacred Music is cultivated regularly in connection with the Chapel Services.

Discipline.

A meeting of the College Board is held regularly every Monday in term, for a review of the performance and conduct of the Students during the preceding week.

Library.

THERE are several thousand books on the shelves, but the number by no means gives an adequate idea of the value. Contrary to what is generally the case in such large collections, this Library contains very few volumes which would not be looked upon as valuable, while some of the works are very rare, and to be procured only at large prices. *The Theological Department* comprises fully one-third of it, and contains some of the best standard authorities. The deficiencies in this respect have been in part supplied through the benefactions of T. B. Akins, Esq., and E. Binney, Esq., ample scope being left, nevertheless, for the liberality of other friends of the University. It would be very desirable to have a choice selection of works bearing on the controversies of the day, as well as a few of the principal periodicals. The Governors have lately authorized the annual purchase of some Scientific Periodicals of the highest standard merit. *The Classical Department*, containing many scarce copies of Latin and Greek authors, might be advantageously augmented by a *uniform edition of the Classics*, and a series of the publications of the best modern critics and annotators. Good *books of reference*, too, are much needed. In *Science* the Library contains several of the most eminent treatises, but it is still deficient in many essential branches. In *History and General Literature* the collection is good, though incomplete; but in *English Poetry*, there are scarcely any of the writers of the present century: a want which, it is hoped, will not be long permitted to exist. In the languages of modern Europe the catalogue is very meagre; the works of Schiller and Gœthe in German, and of Lamartine and Voltaire (Historical) in French, being almost the only books in these languages likely to attract the attention of Students. The College must look to the Alumni, and other friends, for a supply of interesting works of standard merit to encourage proficiency in the Modern Languages.

Museum.

THE additions of Minerals, Fossils, and Zoological specimens noted from time to time in the periodical reports, obtained by collections, donations and exchanges, have greatly increased the value of the College Cabinets. It is hoped that when properly displayed and arranged, in the new hall, these illustrations of the Natural History of Nova Scotia, and other parts of the world, will be not only of service to students, but of attractive interest to visitors. Of apparatus used in Physical Science, a tolerable collection has been in the College for many years, and, while the actual state of all experimental science demands the effectual and continued assistance of generous friends of scientific education, the leading principles of the various sections of Physics can still be illustrated. Very desirable additions would be a Ruhmkorff's Induction Coil, a Spectroscope for Spectrum Analyses, some Dialysing Apparatus, and a useful Microscope.

Laboratory.

REPLACEMENT and additions of Apparatus, useful in illustrating the yearly course of Chemical lectures, and in the study of Practical and Analytical Chemistry, have been continually made the last few years. Numerous preparations of Chemical substances, many of them made in the Laboratory, have been placed upon the shelves. It is under consideration to convert a portion, at least, of the present Library, into a Lecture Room and a Laboratory, for the purpose of increasing the facilities in this important department.

Astronomical and other Instruments.

LARGE sums have been expended on this department. There are some fine Astronomical Instruments, including, among several others, Ramsden's Altazimuth, Transit, Sextant and Artificial Horizon, one of Carey's best and largest Telescopes, a Planetarium, Whirling Table, Solar Microscope, and large Globes.

The revolving building erected to answer the purpose of an Observatory is found very serviceable, being well adapted for the instruments in use. The apparatus for Surveying is, however, incomplete. A Levelling Instrument, another good Theodolite, and an Azimuth Compass, are much needed. The Mechanical apparatus is sufficient for exhibiting the principal laws of Statics and Dynamics, comprising sets of pulleys and levers, illustrations of centrifugal force and motion of projectiles. Some additions in this department would be very desirable, none having been made for many years.

The two instruments for observing atmospheric electricity, which were furnished, one of them by the liberality of Edward Binney, Esq., and the other by the Royal Society of London, have been in constant use by the Professor.

B. A. Degrees.

EVERY candidate for the degree of B. A. must have passed an examination called Responsions, in or between his fourth and sixth terms; the subjects being intermediate between the Matriculation and Degree examination. There are two classes, *first* and *second*.

Degrees may be taken either with or without honors. There are two classes of honors, and two of ordinary degrees. In each department the subjects of examination are regulated by the degree sought, according to a definite scheme.

King's College, Windsor.

EASTER, 1865.

TERMINAL EXAMINATIONS.

<i>In Literis Humanioribus.</i>		<i>In Disciplinis Mathematicis et Physicis.</i>		<i>In Theologia.</i>		<i>In Scientiis Naturali.</i>		<i>In Linguis Recentioribus.</i>

CLASSICS.

Portions of the following classical authors have been carefully studied: Euripides, Thucydides, Homer, and Herodotus; Tacitus, Juvenal, Livy, and Horace. Exercises have also been written daily and weekly. In the absence of the Rev. President, the Classical Lectures have been conducted by George W. Hodgson, Esq., M. A., who gives a satisfactory report of the diligence and progress of the students in attendance on his lectures.

THEOLOGY.

The lectures given in this department have embraced the following subjects: The Authenticity and Inspiration of Scripture—its Interpretation, including a brief consideration of the aids to be derived from external sources; a careful Analysis of the Books of the Old and New Testament, especially of the historical books; History of the Church of England; the Thirty-nine Articles; the Creed; the Septuagint; the Greek Testament; portions of Graves on the Pentateuch, of Hooker's Ecclesiastical Polity, Book V., and of Butler's Analogy, have been read, and lectures on Homiletics, have been delivered weekly. Several sermons have been written by each of the members of the senior class, and carefully composed papers on various subjects proposed by the Professors. The diligence and progress exhibited by most in this department has been highly satisfactory.

MATHEMATICS.

The principal subjects of the Mathematical Lectures have been—Algebra, with four different classes; Euclid: Plane and Spherical Trigonometry; Statics and Mensuration. The results of the Terminal Examination exhibit satisfactory progress in most of these branches.

NATURAL SCIENCE.

A course of lectures has been commenced on Geology, which subject has been studied as far as the Carboniferous system. The lectures have been illustrated by diagrams, and by specimens of rocks, minerals, and fossils from Nova Scotia and elsewhere. Dana's Geology has formed the text-book. In Chemistry, the Laws of Combination, the Nomenclature and Notation, and the properties of the Non-Metallic elements, have been studied, with the usual experimental illustrations. In Practical Chemistry five students have been pursuing independent studies in analysis and testing, and in the making of chemical preparations. Dr. How reports "that he is quite satisfied with the attendance and deportment."

MODERN LANGUAGES.

Classes have been formed in the French, German, and Spanish Languages. In French, the Grammars of Ollendorff and Ahn, the "Causeries Parisiennes," and the "Grand-pere," have been carefully studied, with particular attention to the irregular and reflective verbs. Exercises were frequently written on important points of syntax, idiomatic expressions, &c. In German and Spanish, the students have been carried through the rudiments of the Grammar.

The return of Dr. Stiefelhagen has given fresh impetus to the studies in this department. His report, and the result of the Terminal Examination, afford satisfactory evidence of the diligence and progress of those in attendance on his lectures.

On Saturday, January 21st, William Street Harvey was admitted to the degrees of B. A., and M. A.

MATRICULATION.

John Simcon Armstrong.

DONATIONS.

Sonnets of Petrarch, 1586; Petrefactions from the Sierra Nevada—Augustus Allison, Esq., Halifax.

Memoirs of Sir B. Halliburton—Messrs. Bowes & Sons.

Sabine's History of the Loyalists, 2 vols.—Joseph Allison, Esq.

Report of the Commissioner of Mines—P. Hamilton, Esq.

Report of the Lunatic Asylum—by Dr. Dewolf.

Report of the Superintendent of Education.

Report of the Institution for the Deaf and Dumb—by Rev. J. C. Cochran.

The subjects for the Matriculation Examination in June next, are those enumerated on page 25 of the Calendar for 1864. The Examination will take place on Monday, June 26th.

Easter Term begins on Monday, April 24.

J. M. HENSLEY,
Vice-President.

April 8, 1865.

King's College, Windsor,

JULY, 1865.

THE Terminal Examinations commenced on Monday, June 9, and continued for five days.

The B. A. Examinations commenced on Tuesday, June 20, and occupied five days. The Examiners appointed by the Governors were :—

B. Curren, Esq., D. C. L.
Rev. T. Maynard, M. A.
Rev. J. Randall, M. A.
Rev. G. W. Hodgson, M. A.
A. J. Cowie, Esq., M. D.

The following were the results of the B. A. examination :—

J. F. Black, *prog. laud.*
C. R. Matthews, *prog. laud.*
C. Croucher, *sat. 2nd class.*
F. Kinnear, *sat. 2nd class.*
R. Haire, *sat. 2nd class.*

PRIZE EXAMINATIONS.

H. Weldon.....The Welsford.
G. H. King.....*Proxime accessit.*
J. T. Brine.....French.
R. J. Fretwell.....Dr. Duncan's prize in Geology.
H. Weldon.....Inorganic Chemistry.
J. R. Armstrong.....Matriculation Prize.

Messrs. Chipman, Borden, and Boyd received a certificate of *satisfecit* in Chemistry.

The Eucænia was celebrated on the 29th, being the last Thursday in June.

The sermon before the University was preached by Rev. Canon Hensley, B. D., Professor of Divinity.

The Convocation met at noon in the new Hall. His Excellency the Lieutenant-Governor, General Doyle, the French Admiral, Hon. Judge Bliss, and other distinguished visitors, were present.

The usual address was delivered by the President.

The following degrees were conferred :

His Excellency Sir R. G. Macdonnell, C. B.	} <i>Ad eundem gradum.</i>
L.L.D. of Trinity College, Dublin.....	
The Very Rev. Wm. Bullock, D. D.....	<i>Dignitatis causa.</i>
T. B. Akins, Esq., D. C. L.....	<i>Honoris causa.</i>

M. A.

F. Allison, B. A.

Rev. T. Crisp, B. A.

B. A.

F. Fairbanks, *sat.* 1st class.

F. Harding, " "

Rev. A. Brown, " "

T. M. King, " "

H. S. Poole, " "

J. B. Richardson, *sat.* 2nd class.

C. Croucher, " "

F. Kinnear, " "

W. H. Tilley, B. A. of the University of New Brunswick, was admitted *ad eundem gradum*.

The successful candidates for the various prizes were then presented.

At the Collegiate School J. R. Armstrong obtained the Senior Exhibition, and Purdy the Junior Exhibition.

MATRICULATIONS.

C. H. Wheelwright.

— Deveber.

J. R. Armstrong.

J. Poyntz.

DONATIONS.

- Milton's Paradise Lost, *editio princeps*. . Hon. Judge Bliss.
 Raised Bible for the blind Mrs. Berry.

NOTICES.

Michaelmas Term will begin on Monday, Sept. 4.

Subjects for Scholarship.

- The Hecuba of Euripides.
 Xenophon's Cyropædia: half of First Book.
 Virgil Georgic IV.
 Tacitus: Germania.
 Latin Composition.

Subjects for Theological examination of senior Students at the end of Lent Term, 1866.

- The historical books of the Old Testament.
 The four Gospels and the Acts of the Apostles.
 Epistles: Romans, James, 1 Peter, 1 John.
 The Thirty-nine Articles: Browne.
 Paley's Evidences and *Horæ Paulinæ*, Ch. I.—V.
 The Liturgy of the Church of England.
 Ecclesiastical History of the first three centuries.
 History of the Church of England.
 Septuagint: the book of Joshua.
 Clemens Romanus: Epist.: ad Corinth.
 Hooker: Ecc. Polity V.
 Butler's Analogy, part I.

GEORGE McCAWLEY,
President.

Curriculum, or Course of Study, &c.

CLASSICS.

THESE consist of Historians, Orators, Poets, and Philosophers. Portions of the standard Greek and Latin authors, under each of these denominations are studied.

In the First Year.

Homer's Iliad or Odyssey.
Xenophon's Cyropædia or Anabasis.
Demosthenes' Select Orations.
Horace's Satires and Epistles.
Livy, first or third decade.
Cicero de Officiis and Orations.

In Second Year.

Herodotus, Thucydides, Euripides.
Virgil's Georgics, Terence occasionally.
Tacitus: Germania, Agricola.
Juvenal and Persius.

In Third Year.

Sophocles, Æschylus, Longinus.
Aristophanes occasionally.
Tacitus and Juvenal, continued.
Lucretius occasionally.

Variations in the course are sometimes admitted; and other authors, such as portions of Pindar, of Plato, and of Aristotle's Ethics and Poetics, under favorable circumstances, are read; but the Degree subjects are usually Euripides, Sophocles, Æschylus, Longinus, Tacitus, and Juvenal.

In *Logic*, Aldrich's treatise with reference to Whately and others.

In *Rhetoric*, Aristotle, Quintilian, or Cicero de Oratore with reference to Whately and others.

Suitable Exercises, Themes and Essays are required.

HEBREW.

The Grammar is carefully studied, and reference to the best subsidiary aids are constantly made.

Portions of the Old Testament are critically read and carefully compared with the variations in the Septuagint, and examination papers frequently written.

GEORGE McCAWLEY.

President.

HOURS OF PRAYER.....	7 A. M., 3.30 P. M.
HOURS OF MEALS.....	Breakfast 8, Dinner 3.50.
MORNING BELL.....	6.30 A. M.
EVENING BELL.....	10 P. M.

THEOLOGICAL DEPARTMENT.

PROFESSOR HENSLEY, B. D.

DIVINITY STUDENTS.

First Year.

Greek Testament: Acts.

Evidences: *Paley, Horne, Angus.***Second Year.**

Greek Testament: Epistles.

Ecc. Hist. to accession of Constantine: *Barton, Mosheim.*Liturgy: *Adolphus, Wheatly, Palmer.***Third Year.**

Greek Testament: Epistles.

Articles: Scripture proofs and explanations.

Ecc. History, Reformation and Church of England:

*Hardwicke, Mosheim.***Fourth Year.**

PREPARATION FOR ORDERS.

Greek Testament: Epistles.

Septuagint.

The Creed: *Pearson.*The Articles: *Browne.*

Ecclesiastical Polity: *Hooker V.*
Church Government: *Potter.*
Ecclesiastical History.
Chrysostom de Sacerdotio.
Composition of Sermons.

Butler's Analogy.
Magee on the Atonement.
Bingham's Antiquities.
Wall on Infant Baptism.

The Sunday evening lecture at 7 P.M., is attended by all resident undergraduates.

Subjects: Greek Testament: Gospels.
Bible History.

MATHEMATICAL COURSE.

PROFESSOR HENSLEY, B. D.

First Year.

Arithmetic.
Algebra.
Euclid I. to VI.
Use of Logarithms.
Mensuration.
Elements of Plane Trigonometry.

Second Year.

Algebra.
Plane and Spherical Trigonometry.
Euclid XI.
Practical Mechanics.

Third Year.

Statics.
Dynamics.
Hydrostatics, Optics, Astronomy.
Analytical Geometry.
Differential Calculus.

The above course will be varied as circumstances may require.
The books required for the first year are, Euclid, Colenso's
Algebra and Arithmetic, and Chambers' Mathematical Tables.

LECTURES IN CHEMISTRY AND NATURAL HISTORY.

 PROFESSOR HOW, D. C. L.

First Year.

Chemistry and Mineralogy.
 Powers of Matter.
 Attraction, Heat, Light.
 Electricity, Chemical Attraction.
 Elements, Minerals.

Second Year.

Organic Chemistry.
 Human Physiology.
 Botany, in Summer Season.

Third Year.

Zoology and Geology.
 Botany, in Summer Season.

TEXT BOOKS.

Chemistry.—YUMAN'S.
 Chemistry, Analytical.—FRESENIUS.
 Mineralogy.—DANA'S *Manual*.
 GEOLOGY.—PAGE.
 Physiology.—HITCHCOCK; Zoology.—AGASSIZ.
 Botany.—ASA GRAY'S *How Plants Grow*.

It would be convenient if students would provide themselves with these books in Halifax.

LECTURES IN MODERN LANGUAGES.

PROFESSOR STIEFELHAGEN, Ph. D.

FRENCH.

First Year.

Ollendorff's Grammar, combined with a systematic course of the pronunciation and the regular and irregular verbs. In this year the scholars *read* the reading-pieces in *Pinney's First Book of French* because I find them excellent to practise the pronunciation.

Second Year.

Continuation of *Ollendorff's Grammar*. The scholars begin to *read and learn by heart* the "*Causeries Parisiennes, by Perschier*," a book which I find better adapted for my purpose than any I ever met with. They are supposed to finish *Ollendorff's Grammar* in two years, at latest. If it is finished sooner, I begin my course of *Syntax, &c.*, which is generally reserved for the third year, in the second.

Third Year.

In this year I go through a regular course of *Syntax*, partly as a repetition, and partly to supply the wants of *OLLENDORFF'S* system. The scholars are then supposed to be familiar with all the leading rules of *Syntax* from *OLLENDORFF'S Grammar*, and, in going through them again, I call their attention to the niceties, *dictate rules* on them, and cause the class to practise them, by writing exercises after *my own dictation*, principally consisting of *letters and conversations on topics of general interest, &c.* In this year I have, moreover, constant *verbal* exercises in conversation, and the scholars are obliged to speak French as much as possible. They read *Christomathie Francaise, par Boniface*, an excellent book, containing all the varieties of style to be found in French authors.

GERMAN.

First Year.

OLLENDORFF'S Grammar combined with a regular course of the pronunciation and the regular and irregular verbs. *Adler's Reader.*

Second Year.

Continuation of OLLENDORFF'S Grammar. The scholars continue to read *Adler's Reader*, and begin SCHILLER'S *Lyrical Poems*, and one of his *Comedies* in prose.

Third Year.

In this year I follow the same plan as in French. The scholars read one or more of SCHILLER'S Tragedies, besides one of the *Comedies* in prose, by the same author.

LIST OF STUDENTS BEFORE THE CHARTER,

Collegiate School, Windsor.

The following is a brief sketch of the course of study pursued at the Collegiate School. About one-fourth of the working time of the school is devoted to instruction in the Classical Languages; not quite a fourth to Modern Languages; and about one-half to English Subjects. There are three regular teachers, giving in all about twelve hours a day to the business of tuition.

An hour and a half is given each day to *Arithmetic*. All the pupils, with the exception of a very few of the juniors, work at this subject at the same time, although in different classes. They are carefully taught the various rules, and required to exemplify them extensively on their slates and on the black-board.

A recitation is required in *History*, three times a week. The lesson is first carefully prepared by the pupils at their desks. It is then read distinctly before the Master in the class. The books are then shut, and a searching examination takes place in the dates, facts, and principles given or noticed in the passage prepared.

The *writing of copies* occupies thirty minutes a day. But in addition to this, all exercises, essays, and letters addressed to the Master, are converted into writing lessons. If a boy's exercise, &c., is badly written, it is returned to him to be written over again.

Spelling is taught both from Sullivan, and by means of lessons in dictation. This latter method the Head Master has found by experience to be incomparably the better of the two. Besides this all exercises, &c. are made spelling lessons.

Geometry and *Algebra* are taught on alternate days. There are two classes in each subject.

The juniors have *Geography* every day; the seniors twice a week. A portion of Stewart's text is committed to memory. When this has been repeated, the Map is consulted, and the position of the cities, rivers, &c. is pointed out upon it. In the course of the lesson the Master brings under notice the most important facts in the history of the country under consideration. In this way, such matters as the history of the Crimean War, of Denmark and the Duchies, and so on, are brought to the knowledge of the boys.

English Grammar is carefully taught three times a week, in addition to which every composition handed to the Master is examined with reference to the correctness of its grammar.

These eight subjects, with *Classics* and *Modern Languages*, form the regular course of study pursued. Book-keeping and some other studies are sometimes engaged in. Nothing is to be gained by attempting too much.

The *Training* of boys is considered to be a matter of the gravest importance. It is, however, in some cases a difficult thing, owing to the fact that boys occasionally come to the school, who have manifestly been kept under no restraint at home. Honour, truth, purity, the voluntary acknowledgement of offences, the golden rule, the acting as in the presence of God, are constantly urged—and in some cases, at first sight unfavourable ones, with very marked and gratifying results.
