control passed upon the proposed amended agreement drawn up by the city solicitor, and a new bylaw, fol-lowing the lines laid down by it, will be put through at a special council meeting some afternoon this week. The London Street Railway Company then has two weeks in which to sign the agreement, if it so desires, the city having no power to compel its acceptance.

The new agreement calls upon the company to operate on Sunday, the entire system, with the exception of two street, on Thames street, from York to Horton, and on Horton, from Thames to Ridout. The Railway street line, the one leading to Springbank, the city asks to have operated as far as the city limits, from two to seven Sunday afternoons in the months of May, June, July, August, September and October, in order to accommodate the conditions of agreement that it persons going to and from Woodland

Sunday cars are still in the hazy ployees' clause, and also on the lack distance. This morning the board of a definite agreement concerning operation into Springbank or other territory that may be annexed. The company has expressed its willingness to operate to Springbank on the tencent round trip ticket basis now in vogue, but the contention is that if the park were annexed only a straight five-cent fare could be demanded, which would mean that a man could board a car in the extreme east end and ride all the way to Springbank for five cents. This the company would very strenuously object to.

Another Conference Necessary. It appears that another conference or two between the representatives of the street railway and the city will be necessary before the Sunday car question can be brought to a satisfactory conclusion. The company has expressed its willingness to operate a seven-day service, but absolutely refuses to do so unless the city meets

SMOKE NUISANCE

Decide to Have the Bylaw Amended to Make It Possible to Enforce.

Controller Coles Recommends Cement Walls to Prevent Filling In Through Refuse.

The smoke nuisance was informally discussed at a meeting of the board of control this morning, and City Clerk Samuel Baker advised that he had sent a copy of the smoke bylaw to Judgeo Talbot Macbeth in order that the latter might suggest some amendments that would make the measure workable

At the present time, the bylaw is so worded that it is practically impossible to enforce it, as one of the requirements is that an offender must be given 180 days' notice before legal Divers Unable to Open Doors

Complaint was recently made to the council of the smoke from Hyman's tannery, and Controller Hubert Ashplant stated that he had interviewed Hon. C. S. Hyman in reference to this matter, Mr. Hyman stating that he was prepared to instal apparatus if it could shown him that thte smoke could be done away with.

Controller W. G. Coles declared that there was complaint of smoke from the plant of the London Electric Company, and also that this company was filling up the river with refuse. He thought that something should be done to stop this. A cement wall around both sides of the river at a probable cost of about \$25,000 was proposed by Controller Coles as a suitable method of keeping the banks straight and preventing the stream from being filled in. Controller W. G. Coles is finding that the duties of his official position and the necessary hours to be devoted to handle them, are playing havoc with his private business. At the present time, the controllers are meeting three mornings each week, and the sessions last, usually, from 10 to 12:30.

Controller Coles brought this matter to the attention of the board this morning, and suggested that two of the Practically Demands General three meetings be held in the evenings in order to give the controllers time to attend to their own businesses. Controller Coles said that thet \$1,000 a year derived from the position was quite inadequate to compensate for own business if he was forced to give so much of his time to the city. LORDS' AMENDMENT

Election on the Irish Question.

[Canadian Press.]

New York, Feb. 9 .- A cable to the Tribune from London says: "The King will open in state tomorrow the most momentous parliamentary session in many decades. One great issue will put every other question into the shade. Never before in living memory has Parliament met with the shadow of civil war darkening it.

Several Problems. Though there are several very press-

ing problems, such as that of the navy, the South African deportations, the Welsh church bill and education, the thought that will be ever present in the minds of all parties for months is whether the home rule bill will be passed, and the people of Ulster take the extreme measures which they have so loudly proclaimed they will take by way of resisting it. Lords' Amendment.

In view of the gravity of the ques-tion in the official Unionist view, the House of Lords is taking the remarkelection. The amendment which will be moved by Lord Middleton, is in the following terms:

"This House regrets that the gracious speech from the throne contains no mention of any intention on the part of His Majesty's Government to obtain the sanction of the nation before carrying into law grave changes in the constitution."

In the House of Commons the Right Hon. Walter Long will begin the Inionist attack on the Government's nome rule proposals. It is not expected that the measure itself will be reintroduced before April.

We are working to have the farmers in the corn country eliminate the mongrel strains, and to reduce the varied number of kinds of corn raised. We want them to select the best strains for this country, and then devote their attention to these strains. We are meeting with success, and the farmers all appreciate what we are doing, and it would, I think, be a mistake to do

anything that would tend to reduce the interest the corn growers might take in the proposition. I, of course, of the Blood am only stating my personal that the matter must be decided by the executive. I am sure that they will give it careupon, and likely will not be for some

Over Fifty Lost Their Lives As Result of Castillo's Act in Mexico.

[Canadian Press.] Juarez, Feb. 8.—The nine Americans and 40 or 50 Mexicans, whose fate has been a mystery since the destruction of the Cumbre Tunnel last Wednesday, were suffocated. This information has been received at the headquarters of the Mexican Northwestern Railroad. The tragedy is laid at the door of Maximo Castillo, the bandit leader.

The exact number of persons aboard the passenger train, which consisted of one first-class, two second-class coaches, a baggage and express car, and a freight number at 35, while a request came in for 75 coffins. This evidently was an estimate, however, as the searching party, led by Dr. F. C. Herr, of Madera, was unable to penetrate far enough into the tunnel to count the dead.

MOST ECONOMICAL

HOUSE OF REFUGE

[Special to The Advertiser.] Clinton Feb. 6—Huron county claims the honor of having the best and most economical house of refuge in the province. The instit tion is located just outside the town of Clinton and at the present time has 96 inmates, three being added today. The cost of feeding these patients, by scientific management, has been reduced to 9.2 cer . per day each, and the keeper is prepared to wager that no better victuals are doled out in any such institution in Ontario.

Mr. and Mrs. Robert Mutch are in charge of the instit tion, with Mrs. Parfitt as assistant, and the house is very well man red. There is a large farm in connection and every year no inconsiderable revenue is derived

from the sale of produce. The question that confronts the authorities at the present time is that of accomodation. With 96 inmates the house is crowded and extra room will have to be provided at once. The house of refuge committee consisting of Warden David Cantelon, of Clinton, Dr. Clark, of Goderich, Reeve Govenlock of McKillip Township, Reeve G. W. McKibbon of Wingham, Reeve Shortreed of Morris Township and County Clerk W. Lane, of Goderich met here this afternoon and discussed the proposed extensions but without arriving at any deision. Another conference will be held

"NA-DRU-GO DYSPEPSIA **TABLETS**

Proved of Great Value to Me"

There is only one explanation for the numbers of enthusiastic letters that we receive praising Na-Dru-Co Dyspepsia Tablets, and that is that these tablets certainly do cure any kind of stomach

Here is a typical letter from Miss Eliza Armsworthy, Canso, N.S.: "It is with pleasure I write to inform you that your Na-Dru-Co Dyspepsia Tablets have proved of great value to me. I tried remedy after remedy but without any lasting good. Having heard of your tablets curing such cases as mine I decided to give them a fair trial. They proved satisfactory in my case."

The remarkable success of Na-Dru-Ce

Dyspepsia Tablets is such a success as can only come to an honest remedy, can only come to an honest remedy, compounded according to an exceptionally good formula, from pure ingredients, by expert chemists. If you are troubled with your stomach just ask your Druggist about Na-Dru-Ce Dyspepsia Tablets, compounded by the National Drug and Chemical Co. of Canada, Limited, and sold throughout the Dominion at the horse he was driving was struck and killed by a London and Lake Erie car at Stop 17, on the London and Pert Stantey gravel road, Saturday evening.

BUYING DIRECT FROM FIRST HANDS LOWERS THE COST OF MERCHANDISE

In all circles the world over the high cost of living, or cost of high living, is a live topic for discussion, the blame being placed at many different doors-speculators, storage, monopolies, administrations and many other big factors in the world's commerce are charged with a certain amount of responsibility for present conditions.

But we feel that there is a great sense of satisfaction in the fact the prices of wearing apparel and general merchandise would be much higher but for the stores in this city who go direct to the foreign markets and buy from first hand, thus cutting out the jobbers' and middlemen's profits, securing many special lots, and selling in competition with each other, keeping prices down to the lowest point. The proof of this is strongly evidenced by

the sales of the past month and the great February program now being carried out at this store.

LIQUOR TRAFFIC WRONG SAYS REV. B. SPENCE

Civilization Must Adopt Attitude of Antagonism to It.

ALLIANCE OFFICIAL HERE

Tells of Recent Temperance Victories and Savs the Question Will Do Much to Give Higher Tone to Politics.

"An enlightened Christian civilization has finally and forever come to the conclusion that the liquor traffic is wrong and having come to that is wrong, and having come to that conclusion, there is only one attitude possible for it to adopt, and that is an attitude of antagonism to that which wrong. Antagonism to the liquor raffic is the dominant note in all our human life today.

Thus Rev. Mr. Spence, secretary of the Dominion Alliance, voiced his conviction that the cause of temperance will ultimately triumph, in a sermon in St. Andrew's Presbyterian Church Sunday evening. His discourse contained many statistics showing the progress that temperance is making not only in Ontario, but all over Canada, and in other countries as well. Relative to prohibition in other countries, he made the prediction that national prohibition would be in force all over the United States by 1920. Progress Everywhere.

"I am a firm believer in the final triumph of temperance reform," "Everywhere we turn our eyes we see progress being made." we see progress being made."
The recent sweeping victories for temperance, said the speaker, were due in large measure to a change of attitude by civilization towards the liquor traffic. Labor had set its face against it, and changed its attitude, so that induor was being more and more rarely used even for medical purposes. The churches also of all dnominations had said that the traffic must go, and were uniting to

Jesus Christ came to realize the truth—scientific, commercial and social truths, as well as religious truth. Liberty has a false significance unless in accord with God's law. The French revolution was an example of false liberty. Truth is sometimes displaced by sin.

GIFT WAS KEPT SECRET TO AID LADIES' WORK

Mr. Beck Formally Announces Strath cona Fund for Sanatorium.

Hon. Adam Beck has made forma announcement of the grant of \$15,000 by Lord and Lady Strathcona to the Alexandra Sanatorium, news of which was given in The Advertiser on two occasions recently. The gift was made last June and has been kept secret because of the fact that other schemes of finance were under way for the institution and Mr. Beck did not wish to hamper the Ladies' Aid of the sanatorium which had them in

charge. It is felt by those interested in the work of the sanatorium that the grant made by the Strathconas will stimulate the interest in the sanatorium and aid in the sale of jeewlry which is being disposed of at the present time on the lottery system to raise funds for the work.

The check received by Mr. Beck has been on deposit in a local bank under the name of Treasurer J. C. Judd and has ben drawing interest since it was

It loosens the cough, aids expectoration, and by its soothing influence prevents the terrible paroxysms of coughing which are so distressing to witness, and which wear away the strength of the child. By using this treatment the disease is held in check, and cured in a few weeks, instead of months. Look for the portrait and signature of A. W. Chase, M.D., on the bottle you buy. There are many imitations.

RESPONSIBILITY OF PAR-ENTS TO THEIR CHILDREN

No one for a moment questions that children inherit physical qualities from their parents, but we quite easily forget ever involves the element of chance, that moral qualities are also inherited. Parents, apparently intelligent, never seem to realize that their children are composite reproductions of themselves, added to some peculiarities of ancestors and some originality of their own.

During the early years of the child's life he grows in the direction his parents lead or drive him. He is never again entirely free from the effects an auspicious day for engaging in this leadership, whether good or bad. And isn't it true that fathers and mothers can only train their children aright when they have high ideals for themselves?

We all know-and most of us forgetthat the habit of obedience is formed as any other habit is, by constant practice. It is absolutely indispensable to a strong moral sense. The lack of it leads to all kinds of bad conduct and self-indulnolding malefic sway the psychic con- gences. Of course, if we are to preserve anything like order in a community, the individuals must obey the laws. To most people this comes natural, the fact that actions of importance, as the mental a law exists being sufficient reason why it should be kept. OUTLOOK FOR CHEESE BUSINESS IS BRIGHT

At Successful Meeting of the Crinan Factory Patrons, Interesting Facts Are Given.

[Special to The Advertiser.] Crinan, Feb. 8.—The annual meeting of the Crinan Cheese Factory was held in the factory hall on Friday and was well

attended, showing clearly that the farmers of this district are beginning to take an added interest in the dairy in-Peter Stalker was appointed

chairman, and in a few words told of the past history of the cheese industry in Criman and also of the improvement in the standard of the milk and cheese during the past four years.

The report for the past year was read and adopted by the patrons:

Number of pounds of milk received, 656.225; number of pounds of cheese made. 60.060; average price, 12.69 cents; average yield, 10.92 cents.

The average pet reference in the control of The average net price of milk per 100 pounds was \$1.02. The total income of the factory was \$7,621.61, of which 28

patrons received \$6,721.01. The officers of the factory were all re-elected, after which Mr. Fred Boyce, instructor for the district, gave a very sears old, and one of Lambton's old-interesting address, complimenting the pairons on the improvements made in eight children, John, in the West; factory conditions since he first became William and Richard, in Plympton; instructor. He impressed upon them the Mrs. John Wilson, in Plympton; Mrs. great necessity of having whey pasteur. Butler and Mrs. J.s. Watson, in ized. It is one of the great ways of improving the standard and condition of milk, also of the cheese.

Regarding the increasing of the business in the district Mr. Boyce quoted a personal experience. He started with a factory producing only 36 tons of these; the next year's produce was 76 tons, next year 86 tons, and the following year 120 tons. This increase was bounded about through the related was started.

Price of cheese during the past year was not what it should have been on account of the tight money market, but the outlook for the present year was better. At present there are no large stocks of cheese on hand. Farmers are sending to the creameries and raising calves with skim milk on account of high prices of cattle. Another reason was that the milk business is drifting into other channels, such as making of o other channels, such as making of croam and condensed milk, making the output of cheese less than it should

Mr. Boyce also impressed upon his audience the necessity of weighing milk and knowing the production of each cow, thus giving the owner an opportunity to cult out his unprofitable cows.

Mr. E. Sutton was present with his phonograph and gave several selections. The meeding was one of the best held in the district for years, and the outlook for the coming season certainly is bright.

Among the cities the London picked for the O. A. B. A. teams, dispicked for the O. A. B. A. teams, disputes have arisen as to the eligibility of these men for City League games. The constitution of the league, drawn up when it was organized last October, distinctly says that all players playing on O. A. B. A. teams shall be barred. In view of this, the committee could see no reason why the constitution should not be lived up to, and accordingly they voted to let it stand. The players who will be barred by this ruling are Stephens and Smith, of the Arts, and McKay, of the Meds. Both these teams have a number of good men to pick from, however, so they should not be weakened to any extent.

Alphas' Protest Considered. The Alphas' protest of the replayed game with the Arts on Jan. 21 was also considered, but the matter was left over until the managers of both teams are given a chance to explain. The Alphas' eason of protest is that the Arts played Smith, who was not eligible at the time the first game was played. To avoid future trouble of this kind, the committee ruled that in the event of playing off tie or postponed games, the teams must play with the men eligible at the time the game was postponed or tied.

Meds and Alphas to Play Off. The Alphas and Meds were ordered to According to official word from the O. H. Serious Charge Brought Against Percy Le Seuer as Result of Saturday Night's Game.

[Canadian Press.]

Montreal, Feb. 9.-The Gazette this orning says: It is alleged by several who witnessed the match between Ottawa and Wanderers at Ottawa on Saturday night that Percy Lesuaur, playing manager of the Ottawa club, devoted a great deal of time to a new style of coaching during the play. While the Ottawa players ware holding their own against the Wanderers, Lesueur was satisfied to sit on the bench and coach the players. When the tide turned, it is alleged that he made his way to the bleachers and encouraged "millionaire row" to get after Billy Nicholson, pleading with them to help Ottawa by getting Nicholson off his game. If there is any truth in this report, then it is up to the National Hockey Umpire Klem Has a Handy Retort When Association to deal with the matter, as Sam Crawford Started to "Beef." Toronto, Feb. 8 .- Ontarios let themselves down into the cellar position Saturday night when they allowed Quebec to defeat them by the score of 6 to 4. On form, the champions should never have got within striking distance of the locals, but the Irishmen seemed demoralized. > Of course, the invasion of the major and minor league territory by the newlyormed Federal League is a matter which is uppermost in the minds of all interested in baseball just now, but Chairman Herrmann, of the National Commission does not seem to be much worried as to what inroads, if any, the Federals will make in the field of organized baseball.
>
> "I cannot see," said the Cincinnaticlub owner tonight "how new grounds can be procuped and stands built in time can be procured and stands built in time for the playing season this year by the Federals in Chicago, St. Louis, Pittsburg, Baltimore, Buffalo, Toronto and other cities where, it is claimed, they are going to place clubs. Besides, they will find it difficult to secure enough players to make up the teams, for should the venture be tried and a fallure ensue the players who had jumped their sue, the players who had jumped their contracts could not be trusted by organ-ized league clubs, and they would find it no easy matter to get back into the game. Players are wide-awake to their own interests, and for this very reason I am strongly of the opinion that it will not be necessary for any of the established clubs to have recourse to legal measures in the case of players who have or are supposed to have signed contracts with the latest claimant for recognition in the field of professional baseball." ONTARIO LIKE A MIGHTY OAK

Manufacturing has branched out in London, until today there are 241 factories humming with business -and more coming, induced by cheap hydro-electric power and the shipping facilities of 81 freight trains daily. London grows busier and larger by day and night. Factories increase by dozens-employees increase by thousands—resulting in a growing demand for homes; 350 new homes built in 1913 were not enough to meet the increasing demand. In order to supply a popular demand for well located and reasonably priced building lots, the fine old estate on Wharncliffe road and Tecumseh avenue has been subdivided into full-sized building lots, with 66-foot streets and

This convenient and choice home property is only 20 minutes' walk from the heart of London. It is in the most desirable southwestern section, built up on two sides, convenient to car, with light, gas and water in homes now around the property. MANOR PARK means comfort to you as a home builder; it means money to you as an investor.

A FIVE-DOLLAR BILL WILL SECURE FOR YOU A CHOICE LOT, large enough for a home and garden, balance payable five dollars monthly. Satisfaction guaranteed or money back in 30 days.

This is your opportunity of the hour in London-worth your very serious consideration. Think! Act! and get the advantage of an early choice of your lot. Learn more about this excellent offer. Call, phone or write today for map and complete information.

He gave his moustache a little twist. "Then my references are satisfactory, so to speak," said she with a very little "Perfectly." said he, with a convic-tion; "If we are to put any dependence in the intelligence office."

"Doesn't it stagger Mrs. Wrandall somewhat to reconcile my pedigree to the position I occupy in Sara's household—that of companion, so to say?" asked Hetty, a slight curi to her lip.

He looked rather blank. "I don't fe-

lieve she looks at you in just that light," said he uncomfortably.

"I fancy you'd better enlighten her."
"Let well enough alone," quoted he glibly.
"But I am a companion," insisted Hetty, a little spot of red in each cheek.
"In a sense, I suppose," said he affably.

"Of course, Sara puts you down as a friend."
"I think you'd better understand my real position, Mr. Wrandall," said she

"I do," said he. "You are Sara's friend. That's enough for me. The fact that your father was or is a distinguished English army officer, and some sort of a cousin to a lord, and that you have the entree to fashionable London drawing-rooms, is quite enough for mother. That qualifies you to be companion to anybody, she'd say. And there's the end to it."

She was looking at him in smazement. Her lips were glightly paying and her

"That depends."
"On Vivian, I suppose?"
"Not preciselly. I should say it depends on your sister's attitude toward Sara."
"Oh, she likes Sara well enough. Viv's not particularly narrow, Miss Castleton."
Hetty bestowed a smile upon him.
"That's comforting, Mr. Wrandall," she

"You're quite welcome," said Sara, with smile of understanding. "She's lovely, isn't she?"
"Enchanting!" said he, almost too loud-

Hetty walked up the long ascent ahead of them. She did not have to look back to know that they were watching her with unfaltering interest. She could feel

their gaze.

"Absolutely adorable," he added, enlarging his estimate without really being aware that he voiced it.

Sara shot a look at his rapt face, and thread her alook at his rapt face, and the same alook at his rapt fa turned her own away to hide the queer little smile that flickered briefly and died Blue, Yellow and Red Lights to Burn

By the way, Sara, is she the niece or the granddaughter of old Lord Murga-troyd? I'm a bit mixed." "Her father is Colonel Castleton, of the

Indian Army, and he is the eldest son of a second son, if you don't find that too difficult to solve. The second son aforesaid mentioned, so to speak, was the brother of Lord Murgatroyd. That would make Colonel Castleton his ship's nephew, but utterly without prospects of coming into a title, as there are several healthy British obstacles in the I suppose one would call Hetty a

"Mother wasn't quite certain whether you said niece or granddaughter," ex-plained Leslie. "Her mother's dead, I take it. Who was she?"

"Who was she:
"Why are you so curious?"
"Isn't it quite natural?"
"Her mother was a Glynn. You have

heard of the Glynns, of course?" She trusted to his vanity and was rewarded. Trusted to his validy and was a sort of reproach.

"Certainly," he replied, without hesitation. The mere fact that she spoke of them as "the Glynns" was sufficient. It was proof enough that they were people one ought to know, by name at least, if one were to profess intelligence regarding the British aristocracy. As a matter of fact, he had not heard of the Glynns, but that didn't matter. "The Irish Glynns, you mean?" he ventured, taking a chance at hitting the mark. He had a faint recollection of hearing her say "You have only to look into her eyes to know she's Irish," she said diplomat-

"I've never seen such eyes," claimed.
"She's a darling," said Sara and changed the subject, knowing full well that he

ed the subject, knowing full well that he would come back to it before long. "Is it true that Vivian and Mr. Booth are interested in each other?"

"Yes and no," he replied, with a profound sigh. "That is, she's interested in him and he isn't in her—in the way I take you mean it. I suspect it's an easy matter for a girl to fall in love with Brandy. He's a corking fine chap."

"Then it would be very nice for Vivian, eh?"

"Oh, quite so-quite so. His forbears came over with Noah, according to mo-ther. You know mother, Sara."
"Indeed I do," said she, with conviction.

He laughed without restraint. "Mother can rattle off the best families in the Bible without missing a name, beginning with the Honorable Adam. Cf course, she knows the Glynns and the Castletons and knows the Glynns and the Castletons and the Murgatroyds, although I dare say they haven't had much to do with the Bible. Come to think of it, she did go to the trouble of looking up the Castleton family in the Debrett."

"She did?" exclaimed Sara, with a

slight narrowing of the yes.
"Yes. She established the connection all right enough. She's keen for Miss

"Oh," said she, relieved. After a moment: "And you?"
"I'm mad about her," he said simply, and then, for some unaccountable reason, gave over being loquacious and lapsed into a state of almost luguirious quiet. [To Be Continued.]

"Of course, in London, it really isn't anything to boast about, getting into drawing-rooms," she said, vastly amused.
"Well, it is over here," said he promptive.
"And it isn't always open sesame to be related to a peer."

"I suppose not."

"Nevertheless, I am glad that your mother and Miss Vivian take me for what I am. Do you, by any chance, go in for pedigree, Mr. Wrandall?"

The Shaft of Irony sped over his head.

HELD UP BY THE LORDS

]Canadian Press.[

London, Feb. 8. — What is regarded as bout a dissolution of Parliament, and thus prevent the passage of home rule for Ireland, is the proposal of the Lords to refuse to pass the army budget. If his were done the army would be comelled to appeal to the country. It is believed that such an extreme course is hardly practicable, and the milder suggestion is said to be favored of amending the bill in such manners as to put the army out of existence in Ireand slone and thus prevent it being employed to coerce Ulster.

NEW ELECTION 1S NECESSARY IN WINGHAM

Wingham has yet known. He discovered while looking through his law books a few days ago that last year's council by taking the matter into its own hands and doing away with the public school board and forming what has been known as the board of education, acted in an entirely illegal manner in that no vote of the legal manner in that no vote of the

ratepayers was taken. At the time, strong protest was made against the council's action, which many citizens did not hesitate to call high-handed. The matter, however, was put through and the old public school board of which Dr. Irwin was a member, was abolished.

Won a Big Victory.

On the strength of the warm feelings stirred up among the elections, Dr. Irwin ran for mayor and was re-turned by a big majority. He did not think it necessary to resign from the public school board, judging that as it had been abolished, his position just naturally ended. Here, however, erred and as a result now finds that he has been holding the office of mayor of Wingham for over a month illegally.

As soon as he was certain of this,
he at once resigned.

for the mayoralty again. I am not expecting any opposition under the circumstances."

'I blame Mayor Geo. Spotton for the whole mix-up," he continued. "The council last fall, despite the strongest protests we could make, forced this matter through.

"To say that it was high-handed is putting it mildly. On the strength of what happened I ran for mayor and was returned by a handsome majority. This shows what the ratepayers thought of what was done."

wil be made at the same time that nominations will be made at the same time that nominations for the mayoralty are taking place. The election will be held as the law directs, a week after nomination. There are among Wingham electors a great many who resented strongly the board of education idea that was forced on them, and they will walcome the result in the result of the resul on them, and they will welcome the return to the old public and high school boards we had before, as more appropriate for the town."

WATFORD WANTS TRAIN Protests Against Change in Grand Trunk Schedule.

[Special to The Advertiser.]
Watford, Feb. 8.—The local council and board of trade have asked their local member, Mr. Armstrong, to place the present train schedule before the railway commission. The G. T. New York, Feb. 9.—(Wall street, hean)
—After a brisk advance in the sarly
session the market grew quiet today,
but prices were well maintained. The
steady absorption for investment account recently apparently renewed the
floating supply of stocks and shorts who
attempeted to cover, were forced to raise
their bids. London operators bought
freely here, especially in steel. Buying
of the coppers in spite of the fall in
the metal prices abroad was regarded as

by the producers. Forced liquidation of
Rock Island securities carried them Rock Island securities carried them down abruptly to hew low records which checked the advance eisewhere. Bonds were irregular.

Dealers on the stock exchange were principally engaged with the mining carryover. Transactions were moderate and the tone was generally steady, although a hardening tendency which devaloped at noon was replaced later by an easier feeling. Consols lost an early advance of a quarter of a point, and Brazilian shares weakened at the finish. Copper stocks were firm features. The American was the brightest of the various sections. Prices opened steady and about unchanged, and later steadily advanced on covering for over the settlement. The closing was steady

London, Feb. 9 .- American securities opened steady and about uhchanged to-day. Trading was light during the first hour, but prices advanced a fraction on light covering. At noon values ranged from 1/8 to 1/4 above parity.

THE EXCHANGES. Paris, Feb. 9.—Prices were steady on the Bourse today. Three per cent rentes, 87 francs for the account; exchange on London, 25 francs 171% centimes for checks; private rate of discount, 3 per centimes.

NEW YORK, Feb. 9 .- The statement of the Copper Producer' Association of Feb. 1 shows a decrease in stocks on hand of 4,142,182 pounds.

Western Ontario Markets

Guelph, Feb. 7.—The market today was a comparatively small one, weather conditions no doubt having a great deal to do with it. There was practically no change in the prices of any of the farm products. Eggs were 33c to 35c a dozen; butter 27c to 39c a pound, while the supply of poultry was courted limited today. ply of poultry was quite limited today, but prices were unchanged. Potatoes sold at \$1 a bag, and the meat market was good. Pork was 14c to 16c; lamb 16c to 29c, and beef 12c to 15c.

Galt, Feb. 7.—Owing to this morning's storm the market was not as well attended by farmers as usual. No change in the prices from last week. Butter sold at 32c per pound, eggs 38c to 40c, potatoes \$1 25 bag, poultry scarce at 18c to 20c per pound.

Stratford, Feb. 7 .- Owing no doubt to the stormy weather, the attendance at this morning's market was not as large as usual. Nevertheless there was a good offering of produce. Prices for the most part were as a week ago.

The principal change is in wheat, which has advanced in price from 85c to 90c There was a good offering of fowl this morning. Chickens sold at 75c to \$0c,

The second cold snap of the winter struck London on Sunday and sent the five degrees below zero. A terrific blizzard has been raging through Illinois, Indiana and Michigan, and this city received the culmin-

ation of the blow. Throughout the country around London heavy snowfalls accompanied the cold wave, making traffic practically impossible. The biting wind occasioned intense suffering.

The city fortunately escaped the added distress of a snowfall, which would, indeed, have put a crimp into fts running schedule. Vehicular traffic was practically at a standstill last night, and few pedestrians were to be seen on the streets. Those who did venture out were bundled in such a manner as to resemble the Eskimo of found them, in his icy, disagreeable

General Manager Warburton, of Latter Road, Receives Outline of Proposed Scheme.

General Manager W. N. Warburton, of the Lendon and Lake Erie Railway and Transportation Company, has recelved a communication from Councillor William Proudfoot jun., of Goderich, outlining a proposal to revive and bring to London the defunct Ontario and West Shore Railway. Mr Warburton regards the proposal as one of vital importance to the city of London, and has told Mr. Proudfoot to take it up with the civic authori-

ties in London. It is understood that the town of Goderich and several other corporations which made grants of various kinds to the bankrupt line, are ready brought by ay of the Proof Line road, passing through Lucan and other centres of population, to London is the view that Mr. Proudfoot

Would Join London and Lake Erie. He stated to Mr. W rburton that if possible those who are ceeking to revive the road would like to join their I've with the London and Lake Erie, running from Port Stanley to London, In this way a continuous radial line disk Nickle, Joseph Martin, M. Magano between Lake Huron and Lake Erie and Alex. Anigito. would be effected.

Mr. Warburton is of the opinion WANT TO CONTINUE that the city of London would be glad to go into the matter. For years many prominent citizens have advocated the construction of such a line to Lake Huron, among then T. H. Smallman, who thinks that there could not be a better line built for the benefit of the city then out Richmond street. In fact, for several years the London street railway had under consideration the extension of its line out the Proof Line road.

Will Take Up the Question, As a result of the correspondence with Mr. Warburton it is anticipated that the own of Goderich and the other municipalities will get in touch with London at once. Whether or not this line could be made - hydro radial is not known. It would not be built along a hydro right-of-way line, and whether there are to be hydro radials built excepting along the transmission rights-of-way is not known.

To the Editor of The Advertiser: I am sure that I speak for a large number of the citizens of the city of London when I protest vigorously against the action of the board of control in allowing the use of the market square as a show ground during the Old Boys' Reunion next August. This is a case where the council might very well exercise their veto if they have the power to do so. Every right-thinking person is heartily in accord with the spirit of the reunion, but comparatively few are ready to approve of a celebration such as we had three years ago.

The London Old Boys' Association does not propose to have the reunion in August interfered with by the criticisms of local ministers. The president, Dr. H. R. Abbott, stated to The Advertiser today, that the criticisms were not worrying him, and that after the recommendation—of the controllers to grant the use of the market for carnival shows had been passed by the council, a meeting of the home guard would be called to further arrangements for the reunion.

"This matter was thoroughly threshed out," said Dr. Abbott, "and I believe that the good people, the average citizens are with us in this matter. LECTURER SHOWS HOW MONORAIL CAR WORKS

Also Shows How a Burglar's Shadow Might Put Him to Sleep.

Reno B. Welbourn performed some amazing experiements before a wondering audience at the Auditorium on Saturday

St. Valentine night. His lecture was divided into four parts—a demonstration of the monorail car, and of heat, light and sound. Some inderful achievements of modern science were shown by practical experiments accompanied by a non-technical talk. accompanied by a non-technical talk. In proving that the force of gravity could be overcome by locomotion, the lecturer used a miniature model of the monorail car, built by J. Brennen, of England, and its inventor. At a speed of 3,000 revolutions per minute, the contrivance was found to maintain an accurate belong. It was the investigator's ate balance. It was the investigator's belief that a speed of 200 miles an hour would be safer on a monorail than 50 miles

would be safer on a monorall than 50 miles on the railroads of today.

A clever piece of apparatus known as a "mechanical eye" was used to demonstate the experiments in light. By its use chemicals were exploded, and a tower of blocks was made to fall. "By the same principle," said Mr. Welbourn, "the shadow of a burglar can be made to call the police or fill the room with a suffocating gas."

NO INCREASES FOR WOMEN TEACHERS

Trustees To Inaugurate Graded Salary Scale Instead.

RECOGNITION OF MERIT

Enthusiastic, Hard-Working Members of Staff To Bc Rewarded for Their Zeal by Having Remuneration Placed Above Scale.

The women public school teachers of London will not receive an increase in their maximum salaries, at least before the midsummer holidays. The teachers-there are in the neighborhood of 146 of them-recently petitioned the board of education to increase the maximum from \$800 to \$1,-000, but the finance committee, at a meeting on Saturday afternoon, decided to take no action pending the receipt of the inspector's confidential

report next June. When the communication from the teachers was read, Chairman A. M. Hunt ventured the assertion that the question had been settled by last year's board, when the minimum had een raised from \$450 to \$550, but no action taken on the maximum.

Should Crade Teachers. Various members of the committee expressed the idea that there were eachers who were entitled to more remuneration than others, and desired that a salary scale be arranged on this basis. It was argued that there was no incentive for the teachers under the present system, and if the idea promulgated by the committee is carried out the teachers will be paid on their respective merits. The raising of the minimum in December came as the result of the desire of the board to offer more attractions to young and enthusiastic teachers, and the opinion was expressed at Saturday's meeting that the grading of salaries would have a great tendency to eliminate the teachers from whom the board was not securing satisfac-

tory service.
Will Recognize Service. The trustees hope to have a confidential report from the inspector, noting the progress made, the ability shown, and interest taken in the work, by every teacher in the city. TRACES EVOLUTION OF

Aylmer Officer Lectures on Subject-Says Canadian Service Is Under Strength.

Under Strength.

Major Walter James Brown, of Aylmer, lectured on "Artillery" before the officers of the London garrison in the lecture room of the Armories on Saturday night. Col. Hodgins, D. O. C., of No. 1 District, presided, and a good number of officers were in attendance. Major Brown dealt with his subject in a most interesting manner, and with a wealth of technical detail which proved of great value to the militia artillery officers present.

Major Brown traced the history of the development of artillery from the earliest times up to the present. Artillery was mentioned in the Old Testament, and frequent reference was made to it in ancient history. Its original meaning was applied to any machinery for the hurling of heavy projectiles. The invention of gunpowder was the beginning of the modern artillery. From crude cannon mounted on carts, the demand for more effective weapons had evolved better and better guns, until in the naval guns mounted by ships of the Dreadnought type the limit has about been reached.

The early cannon had been succeeded by heavier guns. These had the disadvantage of being immobile, and when once in position were captured and recaptured according as the tide of battle flowed.

captured according as the tide of battle Then the introduction of comparatively

The the introduction of comparatively bong-range rifles resulted in the artillery becoming ineffective until better types of guns were evolved. And so the march of progress has gone on until today in the navies of Great Britain, Germany, the United States and Japan are to be found guns that throw projectiles weighing 1,200 pounds a distance of four or more miles. In Canada the artillery arm of the service is not up to the strength it should be in proportion with other arms of the service, Major Brown stated. Its efficiency is exceptionally high, owing to the splendid training received at Petawawa each year, and the excellent esprit deach year.

LECTURER SHOWS HOW MONORAIL CAR WORKS

Also Shows How a Burglar's Shadow Might Put Him to Sleep.

Reno B. Welbourn performed some amazing experiements before a wondering audience at the Auditorium on Saturday night. His lecture was divided into four parts—a demonstration of the monoral car, and of heat, light and sound. Some wonderful achievements of modern science were shown by practical experiments, accompanied by a non-technical talk. accompanied by a non-technical talk.

In proving that the force of gravity could be overcome by locomotion, the lecturer used a miniature model of the monorall car, built by J. Brennen, of England, and its inventor. At a speed of 3,000 revolutions per minute, the contrivance was found to maintain an accurate balance. It was the investigator's belief that a speed of 200 miles an hour would be safer on a monorail than 50 miles on the railroads of today.

A clever piece of apparatus known as a "mechanical eye" was used to demonstate the experiments in light. By its use chemicals were exploded, and a tower of blocks was made to fall. "By the same principle," said Mr. Welbourn, "the shadow of a burglar can be made to call the police or fill the room with a suffocating gas."

NO INCREASES FOR WOMEN TEACHERS

Trustees To Inaugurate Graded Salary Scale Instead.

RECOGNITION OF MERIT

Enthusiastic. Hard-Working Members of Staff To Bc Rewarded for Their Zeal by Having Remuneration Placed Above Scale.

The women public school teachers of London will not receive an increase in their maximum salaries, at least before the midsummer holidays. The teachers-there are in the neighborhood of 146 of them-ecently petitioned the board of education to in-crease the maximum from \$800 to \$1,-000, but the finance committee, at a meeting on Saturday afternoon, decided to take no action pending the receipt of the inspector's confidential

eport next June. When the communication from the teachers was read, Chairman A. M. Hunt ventured the assertion that the question had been settled by last year's board, when the minimum had been raised from \$450 to \$550, but no action taken on the maximum.

Should Crade Teachers. Various members of the committee expressed the idea that there were teachers who were entitled to more remuneration than others, and desired that a salary scale be arranged on this basis. It was argued that there was no incentive for the teachers under the present system, and if the idea promulgated by the committee is carried out the teachers will be paid on their respective merits. The raising of the minimum in December C came as the result of the desire of the board to offer more attractions to young and enthusiastic teachers, and the opinion was expressed at Saturday's meeting that the grading of salaries would have a great tendency to eliminate the teachers from whom the board was not securing satisfac-

TRACES EVOLUTION OF MODERN ARTILLERY

of the London garrison in the lecture room of the Armories on Saturday night. Col. Hodgins, D. O. C., of No. 1 District, presided, and a good number of officers were in attendance. Major Brown dealt with his subject in a most interesting manner, and with a wealth of technical detail which proved of great value to the militia artiller; officers present.

Major Brown traced the history of the development of artillery from the earliest

development of artillery from the earliest development of artiflery from the trums up to the present. Artillery was mentioned in the Old Testament, and frequent reference was made to it in ancient history. Its original meaning was applied to any machinery for the hurling of German spies in France, was arrested today while photographing the fortifications.
The police assert that Burgard has been
supplying information to the German military for the last 15 years. He is
ostensibly engaged in farming in a small
way near Nancy.

by heavier guns. These had the disadvantage of being immobile, and when once in position were captured and recaptured according as the tide of battle

Then the introduction of comparatively Then the introduction of comparatively iong-range rifles resulted in the artillery becoming ineffective until better types of guns were evolved. And so the march of progress has gone on until today in the navies of Great Britain, Germany, the United States and Japan are to be found guns that throw projectiles weighing 1,200 pounds a distance of four or more miles. In Canada the artillery arm of the service is not up to the strength it should be in proportion with other arms of the service, Major Brown stated. Its efficiency is exceptionally high, owing to the splendid training received at Petawawa each year, and the excellent esprit decorps in evidence all over the Dominion. The future would likely see a big increase in the number of batteries in Canada, he said.
