WOODSTOCK COLLEGE,

WOODSTOCK, ONTARIO.

AIM.

Our object is to furnish a good, thorough and rounded education, of about three or three-and-a-half years, beginning at the entrance to the High School, for the benefit of those who do not desire to take a full University course. Our courses are not fragments of longer courses, but complete in themselves. Our object is not to prepare students for any special examinations, diplomas, or degrees, but to produce *Men* and *Women*, strong in body, mind, and charact... This school is not sectarian nor denominational, but *Christian*.

That the above is not inconsistent .. ...orough scholarship is shown by the fact that of one hundred and thirty of our students, who have gone up to various University examinations during the last few years, all but five have passed, eighty have taken honors, a large proportion have taken scholarships, prizes, medals, etc.

Our courses are as follows :—

I. COLLEGIATE COURSE, including work, pass and honor, to end of 1 year of Toronto University. Upon completion students graduate, receiving diploma, or enter a new course.

II. LADIES' COURSES, (a) Ladies' Regular Course, (b) Ladies' Fine Art Course, each of three years, giving superior culture.

III. COMMERCIAL COURSE, second to that of no Commercial College in Canada.

IV. PREPARATORY COURSES, for those, either ladies or gentlemen, who are not prepared to enter at once upon any one of the above.

V. SELECTED COURSES to suit the desires of any who have special aims.

Expenses, from $152.00 to $200.00 per annum, according to the amount of Fine Art Work required.

MONTREAL.

The commercial capital of the Dominion, and the largest city in British North America, occupies a commanding situation on a fertile island, about 30 miles long and 10 miles in extreme width—at the confluence of the Ottawa with the St. Lawrence river—and partly on the north bank of the latter river, in Hochelaga County, Province of Quebec. It is at the head of the sea navigation, 300 miles from salt water, and is at the beginning of the fresh water navigation of the great lakes and rivers which form an uninterrupted water communication extending from this place to Duluth, Minnesota—at the head of lake Superior—a distance of nearly 1,500 miles. It is an excellent port, accessible to craft of over 3,000 tons burthen, and by means of its extensive railway and water connection, is the great distributing point for the commerce of the Dominion. It contains large manufactories of almost every description, nearly all classes of goods being made here. There are numerous public buildings of handsome design, and it has 75 churches of various denominations, the French Cathedral of Notre Dame, being the largest church in the Dominion. There are several colleges and other institutions of learning, a number of convents, public, private and separate schools, hospitals and infirmaries, and numerous benevolent societies and institutions. It is well lighted with gas, has an excellent water supply, taken from the St Lawrence river above the Lachine rapids, about 7 miles above the city, and forced by powerful pumping machinery into extensive reservoirs on the mountain, an efficient fire brigade with telegraphic alarm, telephone facilities, and in fact, all the requirements of a first-class, modern, progressive city. The wharves, which extend for over one mile in length, are constructed of massive cut stone, and form a pleasant promenade, having numer-

ous inclined planes for the convenience of the traffic. From Point St Charles, at the head of the harbour, to St Lambert on the opposite shore of the river, a distance of about 2 miles, the St Lawrence is spanned by the Victoria Bridge, the most costly and magnificent work of the kind ever constructed. It consists of two long abutments and twenty-four piers of solid masonry, surmounted by substantial iron tubes, through which the road-bed of the railway is carried. The total length of the bridge is 9,184 lineal feet, with 24 spans of 242 feet each, and one (the central tube, which is 60 feet above the high water level) of 330 feet. The first stone of this stupendous undertaking was laid on the 20th July, 1854, and the first passenger train passed through on the 17th of December, 1859. Its construction gave the Grand Trunk Railway a continuous line from Rivière du Loup and Portland to Lake Huron at Sarnia, and to Montreal it gave unrivalled facilities for commerce, making it in fact the great centre of traffic of Canada and the Western States. The railway system centering in Montreal comprises the Central, Champlain, Eastern and the Province line divisions of the Grand Trunk, the Laurentian Ry, the Montreal, Portland and Boston Ry, the Vermont Central Ry, the Montreal and Sorel Ry, the North Shore Ry, the South Eastern Ry and the Canadian Pacific Ry, thus providing direct railway communication to all parts of the American continent. The completion of the Canadian Pacific Ry throughout its entire length (a result that will be achieved within the next four years at the latest), will give an all-rail route on Canadian soil, from Halifax to Port Moody, in British Columbia, a distance of 3,750 miles, and shortening the distance from Liverpool, England, to China and Japan, by at least 1,000 miles.

During the season of navigation, which usually extends from the beginning of May to the end of November, daily lines of steamboats and propellors run to all parts of the great lake and river ports, calling at all the important points, and there are several lines of powerful ocean steamers running to Liverpool, London, Glasgow, Antwerp, and other parts of Europe, and to New York, Boston, Halifax, etc. Montreal is the principal port of entry for the Dominion, and the customs receipts are very large. There are a number of flourishing villages forming suburbs of the city, and the general offices and extensive workshops of the G T Ry are located at Point St Charles, one of the largest of these suburban towns. Montreal is governed by a corporation, consisting of a mayor and 27 aldermen. There are 16 banks doing business in the city. Express, Dominion, Canadian, U S, and American. Telegraph, G N W and C M. Population, 148,000. Mails daily. Distance from Quebec, 180 miles, from Ottawa 164 miles, from Kingston 173 miles, and from Toronto 333 miles. Guillaume La Mothe, postmaster.

SPECIAL REPORTS furnished and COLLECTIONS made in all parts of the Dominion, Great Britain, Russia, China, Australia, United States, West Indies, and South America.

A few acknowledgments from the Brewers and Maltsters of Canada to the Canadian Reporting and Collecting Association.

LONDON, November 21st, 1882.

DEAR SIRS,—Your favor enclosing cheque for $83.83 for collections at London and Exeter is received. Your collection at Strathoy we had written off as lost some time ago, and were agreeably surprised to receive your cheque for the amount, and which speaks well for your association. We are much pleased with the careful attention you have always given our claims, and trust you will be as successful in the future for us, as you have been in the past. Some of the accounts which you have collected we had looked upon as lost.

Yours respectfully,
CARLING & Co., LONDON.

LONDON, April 13th, 1883.

DEAR SIRS,—I beg to acknowledge your cheque received this morning covering my claim of $67.12 (less commission) against Mr.— P——. I am pleased to have the opportunity of adding my evidence to the efficiency of your association, and believe it is the best. I have tried many others before but without any success.

Yours truly,
JOHN LABATT.

TORONTO, 28th December, 1883.

GENTLEMEN,—We have received your statement and enclosed cheque for which please accept our thanks. We sent you the accounts as a last resort having done our best before to collect them. We are very much gratified with your success in settling them up, and can heartily recommend your agency to any one having a large number of old and doubtful accounts.

Yours truly,

GENTLEMEN,—We are much gratified in receiving this morning your cheque for collections as per memo. herewith. We had written these off our books and consequently can consider this sum as a clear profit. We hope you will be as successful with the balance of those we sent you.

Yours very truly,
J. O. WISNER & SON.

Successors to the Inventor and Patentee of Platform Scales in Canada. Patented and Established A.D. 1834, by the late OTIS WARREN.

We claim to be the oldest manufacturers of Platform Scales in Canada, dating back to their invention. The Patent is on view at our office.

We Claim to Make the Best Scales in Canada.

We claim to get better prices than any other Canadian manufacturers. And why ? simply because our Scales are the best, and we give full value for the money. Having fitted up our factory with the most approved machinery and tools, especially adapted to the work, we are enabled to make the best work, at from 25 to 30 per cent. less in price than the best American makers, of equal quality. We use the best material, employ the most skilled labor, and spare no pains in their adjustment. Our facilities are such, that if we were so disposed we could make Cheaper Scales than any of the inferior makers, but we prefer to sustain our reputation, rather than competing with low priced makers. Cheap scales may fool the consumer once, but he will not be fooled a second time. When you consider the immense value of goods passing over a scale in one year, it may easily be seen that the loss occasioned by using a poor scale would more than pay for a good article.

REPAIRING EXECUTED WITH NEATNESS and DESPATCH.

WARREN'S PATENT

ICE CUTTER OR PICK

In placing this Cutter before the public, we wish to draw their attention to the following points of excellence possessed by it, which are not possessed by any other cutter or ice pick, as they are usually called: Firstly, ease of action; impossibility of hammer straying from cutter; thirdly, saving of ice from waste through splintering. We have called it an Ice Cutter, to denote the work done by it. It cuts the ice instead of picking it. Who, that has ever used any of the picks in ordinary use, has not been annoyed at the great waste, caused by the ice splintering and flying in all directions, often wasting more than was really used, and, as a consequence, have had their supply run out before the next arrived. Give it a trial, it will save more than its price the first season. Every cutter fully guaranteed.

CAUTION TO THE TRADE.

Since the invention and patent of this pick by Mr. WARREN, there has been put upon the market, a worthless imitation, calculated to deceive and lead people to believe they were getting our pick. Remember, ours has a V shaped steel blade which cuts the ice without waste, the other has a round or square point which only splinters the ice. Any person who has once used our pick would not take one of the others as a gift if they were obliged to use it. The name H. B. WARREN is on every pick. Send for prices and discounts to the trade.

THE SHANNON FILE

Filing Cabinets and Binding Cases.

A description of the SHANNON FILE is well-nigh superfluous, it being familiar to the commercial world of the Western and a large portion of the Eastern hemisphere.

This invention marks an era in the history of filing devices, and, like all inventions of rare merit, many imitations were put on the market immediately upon its introduction, The validity of the SHANNON Patents was sustained October 31, 1881, in the Circuit Court for the Northern District of Illinois, the Court holding that paper files having two parallel curved or arched wires operating together as one to open and close and to meet two fixed and parallel receiving or puncturing wires were infringements of those patents.

The great value of the underlying principle of the SHANNON filing devices has also rendered their application to a Cabinet a complete success for a large correspondence.

To meet a seemingly long-felt want the present owners and manufacturers have been led to also manufacture attachments for compressing the papers, which have become very popular.

METHODS OF FILING PAPERS.

The desirability and importance of filing papers in an orderly manner need not be urged upon a well-informed public. The only question at issue is: "Which is the best manner of filing?" In answer to this we would say that there are only two essentially different improved systems of filing, viz: that in which papers are laid loose between index-leaves, and that embraced in the devices to which we herein call attention. Those wishing to obtain improved means for filing their papers have, therefore, the alternative left them of getting a File or Cabinet in which the papers will be loose and liable to be thrown into disorder, inconvenient to handle, and very far from being easy of reference; or a File or Cabinet possessing in the highest degree every element of convenience, security and economy.

CONVENIENCE AND SECURITY

Are certainly among the standards by which the relative excellence of filing devices is to be measured. These qualities are so prominent in the SHANNON FILE AND FILING CABINET that they are at once recognised and appreciated.

Any paper can be conveniently examined, removed and replaced, and letters and bills from the same person or firm filed by themselves without any possibility of disarranging the other papers.

The accidental loss of papers, or change of the order in which filed, is impossible.

Producing as they do such desirable results, it need only be added that the filing of papers, and reference thereto, become a pleasure instead of a task; and that either the SHANNON FILE or the SHANNON FILING CABINET should at once be procured by every one desiring anything in this line.

Filing Cabinets are made in many sizes, ranging from six File-Drawers to one hundred or more. They are substantially made of the best seasoned Black Walnut, with and without doors, and nickel-plated fittings, and can be arranged for any class of correspondence, and are adapted to any requirement.

NORTH AMERICAN LIFE

Embraces among its Guarantors many of the most influential men of Canada. (See advt. opp. index.)

ROBINS BROTHERS,

LONDON, ENGLAND, AND TORONTO, CANADA.

DEBENTURE & FINANCIAL BROKERS,

PUBLIC ACCOUNTANTS, &c.

Our Facilities in Great Britain being unusually good we are prepared to handle first class securities to any amount.

Municipal Corporations contemplating the issue of Debentures should communicate with us early. If the Debentures are desirable and time is afforded for full information to be forwarded, the advantage of the low rate of interest in that market can be secured.

PARTIES HAVING CANADIAN SECURITIES to dispose of are invited to correspond.

MATTHEW ROBINS.
WILLIAM ROBINS.

The Korting Injector,

ACKNOWLEDGED TO BE THE BEST BOILER FEEDER IN THE WORLD.

Will lift 25 feet and take water at 150 degrees. Only one handle to start and stop. No valves to regulate. Cheaper than any other injector in the market. Also Ejector for lifting water.

The Continuous Feed Lubricator.

A saving of fully 75 per cent of oil by using this Lubricator, which will cover its cost in a few months. We guarantee perfect satisfaction as they never fail.

SCHULTZE GUNPOWDER

The SCHULTZE GUNPOWDER has greater Penetration, with Less Smoke, Less Fouling and Less Recoil than Black Powder, and was used by the Prize Winners at the International Meetings, 1881, 1882, 1883 and 1884.

Each canister bears a label with a Trade Mark as above.

The attention of Sportsmen is specially directed to the NEW GRANULATED POWDER, to be had retail and in Cartridges from all Gun-Makers and Dealers, and Wholesale at the Company's Offices:

SCHULTZE GUNPOWDER VERSUS BLACK GUNPOWDER,

BLACK BEING ALLOWED A YARD.

Competition at the Gun Club, July 5th, 1882, for a Cup and Sweepstakes.

CONDITIONS—Those using Black Powder allowed to stand one yard nearer than their respective Handicap distances.

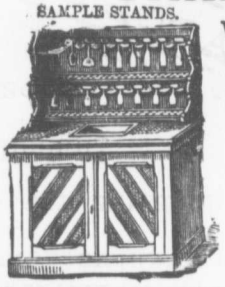
RESULT.

1st. Mr. R. B. CUNLIFFE, 29 yards. "SCHULTZE" Powder 1111111111111101111
2nd. Mr. PEARCE, 28½ yards. "SCHULTZE" Powder 1111111111111101110
3rd. Mr. TURNER-TURNER, 31 yards. "SCHULTZE" Powder 11111110

Also shot Mr. W. F. Gambier, Mr. Lloyd, Mr. Humphrey, Mr. J. C. Kennedy, Lord Stormont, Mr. H. J. Roberts, Mr. Ford, Mr. G. B. Worthington, Mr. F. G. Hobson.

INTERNATIONAL PIGEON SHOOTING MEETING, 1883.

In a Sweepstakes of 56 Subscribers, and a Cup given by a rival Company, the competitor making the largest score used "SCHULTZE" Powder, and took the first money prize with 19 kills, though disqualified from taking the Cup (which virtually he had won), by not using the powder of the donor.



PIGEON SHOOTING AT HURLINGHAM AND THE GUN CLUBS.

The "*Field*" for the week ending 23rd May, 1884, reports **14** events, in **13** of which the winning competitors used "SCHULTZE" Powder, **6** of them using it in both barrels.

ASSURE IN

The Sun Life Assurance Company

OF CANADA.

WHY? **BECAUSE**

1.—The SUN is a Home Company, investing all its funds in Canada, and has thus a special claim on Canadian Assurers.

2.—It is a strong and prosperous Company with large and well invested assets.

3.—Its rates are low and its profits to Policy-holders large and equitably divided.

4.—*The SUN alone issues an absolutely Unconditional Policy. Great care is taken in the selection of risks, but when a Policy is once issued the money is paid on simple proof of the death of the Assured, no matter how, or when, or where. The only condition is the payment of premiums.*

5.—**The SUN has not one Contested or even Disputed Claim on its Books.**

IS THE ONLY

BRITISH COMPANY

Licensed to transact the business of

Guarantee and Accident Insurance

THROUGHOUT THE DOMINION.

The usefulness of corporate suretyship on behalf of employees in positions of trust has been demonstrated for many years in Great Britain and the Colonies. Private or personal security is manifestly objectionable both to employer and employed, and the small rate of premium charged by this Company to persons whose antecedents and characters are such as to warrant their filling a position of trust faithfully and honorably, should leave no cause for anyone to ask friends or relatives to become or remain their bondsmen.

The Bonds of this Company are readily accepted and preferred by all Departments of the Dominion and Provincial Governments, as well as by all the leading Railways, Banks, Corporations, &c., &c., in the country.

The General Accident Policies of this Company, under the several rates and classifications, cover every form of bodily injury induced by purely Accidental means, whether it happen while travelling, or while engaged in any of the usual and lawful avocations of life.

Forms of Application and full particulars can be obtained at the Head Office for Canada,

72 King Street East, Toronto.

SEVENTEENTH ANNUAL NUMBER.

MANUAL

OF THE

RAILROADS OF THE UNITED STATES

FOR 1884.

Containing Detailed Statements of the Operations and Conditions of every Railroad Company in the Country.

—BY—

HENRY V. POOR.

Messrs. **H. V. & H. W. POOR** offer to the public the Seventeenth Annual Number of the

Manual of the Railroads of the United States.

It gives a separate article on every Railroad Company, its Line of Road, Date of Charter, Opening, etc. ; Details of Traffic, Operations, Gross Earnings and Operating Expenses ; Stocks, Bonds, Debt, Cost, Financial Condition, Dividends and Interest paid, and Name and Address of every Director and Officer. For the important Lines comparative tabular statements for a series of years are given.

A Railroad Map of each State precedes the detailed statements of the several Railway Companies in it.

The information that the Manual contains renders it necessary to every Investor, Banker, Broker, Railroad Official, Dealer, Capitalist, Statistician, or any one interested in any way in Railroads.

Royal Octavo. Cloth. 1400 Pages. Price $6.00 per Copy.
