The reason for not applying the same rule to Dollars and Half Dollars in, that their value has not been altered by the American Bill, and that they now exchange at the United States Mint Dollar for Dollar for American Silver Coin.

Mr. Hincks' Bill to issilitate Free Trade between the British American Provinces, was read a second time. The inspector General explained that this Bill merely extends the principle of the Bill of last Session to articles other than those enumerated in that Bill. In answer to Mr. Cayley, Mr. Hincks said there had been some correspondence on the subject with Nova Scotia; and that Province had expressed a hope, that their levying Is. 3l. duty on the barrel of flour would prove entirely satisfactory to Canada. The Canadian Government remonstrated against this import, but the effect of their remonstrance was not yet knows.

notion of Mr. Houlton, of Norfolk, for a second reading of a Bill to amend the Practice of the Law in Upper Canada, a long and sleepy discussion arose, but the subject and the apseches could be of no interest to Lower Canada. The Bill had many good points, and others of questionable character. It was apposed by Messra Baldwin, Cameron, (Cornwall.) Smith, (Durham.) Solicitor-General Macdonald, all lawyers, whose smoluments, and those of the whole profession in Upper Canada, would be materially decreased by the success of the missaure. It is scarcely necessary to any that it was thrown out—only four voting for the second reading. Amongst the minority was Mr. Wilson, of London, who has penetralion enough to see that those lawyers who oppose Law Reform will not be returned to Parlament at the next election.

Mr. DeBlaquiers gave notice of an important motion in the Legislative Council. On the 8th June, be will move an Address to the Queen for preventing an augmentation of the present numbers of the Legislative Council, and in future to exclude from it members of the Executive Government. The great number of motions for constitutional changes, is proof of wide-opress disastications with the prevent system. In addition

Utilize the test of perateious quachories which
beart of vegetable lagredients, the LLFE MEDICIMES are purely and milety vegetable; and contain neither Mercury; see Antimenty, nor Argonic, nor any other mineral, in any form whatever.
There are entirely composed of extracts from rare
and powarful plants, the virtues of which, though
long known to neveral. Indian tribes, and recently
to some siminent pharmacountical chemists, are alleguther unknown to the ignorant pretenders to
medical science; and were never before adminisfered in so happily efficacions a combinatica.

The first operation is to locases from the cout of
the stemach and hersels the various impurities and
cradities constantly setting round them; and to
remove the hardesed faces which collect in the
convolutions of the small intestines. Other medicions only partially cleanse these, and leave such
collected masses behind to produce habitual Costivepers, with all its train of evils, or sudden Diarrhous
with its 'iniminent dangers. This fact is well
known to all regular nanomists who examine the
human bowde after death; and hence the prejudice of these well-informed men against the quach
medicines of the age. The second affect of the
VEGETABLE LIFE MEDICINES is to
cleanse the kidneys and the bladder; and, by this
means, the liver and lungs, the healthful action of
which entirely depends upon the regularity of the
urinary organs. The blood, which takes its red
color from the agency of the liver and lungs, helore
it passes into the heart, being thus purified by them,
and nourished by lood coming from a clean istemach,
courses freely through the veins, renews every part
of the system, and triumphantly mounts the banner
of health in the blooming cheek.

The following are among the distressing variety
of human diseases in which the VEGETABLE
LIFE MEDICINES are well known to be infallible:
