THIS SALVE, prepared from the original Receipt, procured from a celebrated Turkish Hakim. (physician) of Smyrma, in Asia Minor, and which has obtained an unprecedented celebrity in Great Britain and the East Indies, from the astonishing Cures performed by it in both these countries, has lately been introduced into Montreal. As might be expected, its popularity has followed it, and its use is becoming general among all classes. The contracted limits of an advertisement necessarily precludes entering into any adequate detail of its merits, but, for the information of the public, it is intended to publish, from time to time, such statements of cures as have or may occur. It has been used for the following complaints with the most complete success:—Such as Swellings, Whitlows, Scalds from Stamboat explosions, or other chuses, Burns, Pever Sores, Scrofulous Stress, Sore Nipples, Carbuneles, Scald Head, Gau-shot Wounds, Bruises, Boils, Prosthites, Wens, Chilblaim, Ulcerated and Common Sore Throsts, and Bunions. If used in time it will prevent or cure Cancers, also, Swellings arising from a blow on the Breast, Eing Worm, Pains in the Back, Rheunatism, Gost, Pains in the Cheer, Spine, Heart and Hip, Rushing of Blood to the Head, Swelled Face and Toothache. It was our intention to have prepared an extended article on the nature and policy of that Reciprocity which for some time past, has formed the "politi-cal hobby" of the present Administration, and thus far proved unsuccessful, even under the imposing auspices of a special mission,"

The subjoined remarks, however, from

It will be remembered that when this ministerial Adventure first acquired notoriety and so ardently sought the co-operative influence of the American Government for the accomplishment of its purposes, it was deemed by its projectors as a scheme which could easily and speedily be consummated. The various journals throughout the Province fed and supported by invigorating draughts drawn from the Treasury, gave positive and repeated assurances of its success. It was even regarded as a matter of vast importance to the comsuccess. It was even regarded as a shoulder, "the Yankees are proverously smart—he matter of vast importance to the com-

The Retaliatory Pellay.

It appears from the Globe of a recent date, and rumors rife in the political world, that Mr. Hincks is determined to persevere in his attempt at frightening Uncle Sam into Reciprocity. Not only are Differential Duties to be levied, but it is plainty intimated in the "organ" that the Welland Canal is to be closed to American vessels! This absurdity is a fitting companion to the other, and the Inspector General deserves credit for consistency, at least; in splenetic policy. But before he can carry out his mad schemes—arising solely, we unheaitatingly assert, from vexation produced by his rebuff at Washington—he will probably learn that Francie Hincks is not all Canada, and that the mortified self-esteem of a public officer is a matter of very little importance, when weighed by the side of the veat and varied interests of a people. We doubt, however, whether the Ministry will dare to risk such a proposition to the House, as the Inspector General now threatens to do. Servile as the Ministerial Members are, and willing as they have hitherto been to carry and fetch according to the direction of their Cabinet masters, we think that they could not refrain from rebellion, if asked to shut out American trade from this Colony altogether. There is a point at which obedience and forbearence becomes a crime, and we really believe it will be reached when Mr. Hincks rises in his place, and aske leave to sever our commercial connaxion with our Republican neighbors. Although firm in these convections, it may be well to glance at some of the features of this new dodgs.

wessels from the St. Lawrence, is but the more verbage of Ministerial consequence—" a sound full of fury, signifying nothing." With the ocean before them, and with more foreign vessels entering into, and departing from some of their ports in one day than arrive in Canada perhaps in a 'year, what do the Americans, comparatively speaking, want with the navigation of the St. Lawrence? If, too, as is condidently anticipated, the Railroad from Halifax to Quebec be completed, and the city of Montreal be made the terminus of a similar facility, holding direct communication with the invigation of the St. Lawrence be to either Americans or Canadians? To Canadians it will undoubtedly be indispensable to the Fish and Timber trade. Goods shipped, however, from the Mother Country direct across the Atlantic to Halifax or New York, and passengers and emigrants to Canada, will assuredly find a quicker transit, and a safer conveyance on such routes, than a tedious, inclement, and dangerous voyage performed through the waters of the St. Lawrence. The threat respecting "Differential Dutties" would, too, be but feebly foit by the American Government. It would be "a pigmy assaulting a giant."

Dorchester Bridge was considerably injured a day or two ago, by a new ship striking against it, in attempting to pass through the Draw. The current sets toward the South sbore, yet, oddly enough, the Draw Bridge is over the North channel. This is not a solitary instance of mischief done. On the contrary, such mishaps frequently occur, and there is only one remedy—the construction of a Draw Bridge over the South channel of the St. Charles. The Commissioners, in building a new Bridge, will act wisely by keeping this matter in view.—Quebec Chronicle. STEAMBOAT COLLISION, AT PORT ST. FRAN-STRAMBOAT COLLISION, AT FORT ST. Yesterday, some differing accounts of the particulars were telegraphed from Three Rivers, and agen at the present moment we have no further details to key betorn our readers. A portion of the upper works of the John Munn, consisting of the wheel house, three or four deck rooms, and some front railing, were carried away, probably by the bowsprit of the vessel. The paddle whe is and shaft of the Alliance appear to have been slightly injured, but this could not have been slightly injured, but this could not have been any impediment to her running, as we are since informed that she has arrived at Montreal with her charge in safety.

Vickburg, May 31, 1851.

The Steamboat Webster, Capt. Samuel Reno, took fire yesterday afternoon, and was burned to the weter acide, at the head of Island Eighty Six, 100 miles above Vicksburgh.

The fire was first discovered and the alarm given about 3 o'clock, and almost ms anntly afterwards, the boat was enveloped in fiames.

The pilot, (Mr. Ruckman, to whom great credit is due) having charge of the wheel, immediately endeavored to run the boat asho e. He was in part successful; but the fiames finally drove him from his post, and the boat being unmanageable, finally as a first alarm a scene ensued which it is impossible to describe, and mingled as it was with the burning-boat, from which the fiames were spouting in all directions, became terrible in the extreme.—Many rushed into the flames, while others crowded to the side of the boat, clinging convelsively to the guards, until driven away by the fire and convelled to throw the themselves into convellively to the guards, until driven away by the fire, and compelled to threw themselves into

There is no other remody that claims to subdue the cruel pangs of pant in recould, minutes, or even bours. They require the patient to use disce after dose before a favorable change is promised. Not so with Radway's Rendy Relief. Its effects are instantaneous; the first dose that is taken; or the first external application, communication of the state of the state of the state of the state of the above-mentioned Diseases in one-tenth the tame it takes any other Remedy to give even Partial Relief.

TARING COLD.

This sentence is constantly as the month of every person, is order to explain certain complaints. Those who use it often, we think, have but a finist idea of its precise meaning. We will offer an explanation, which we believe to be the opinion of a majority of the most learned physicians. A person, for instance, has been over expring any particular set of muscless of the shouts, from violent apending—of the tolus, by too much steeping or beauding, or those or any other part of the body: these parts or muscles are, consequently, weakened and related, and become a fair proy for any disease. The person who has been thus acting, accidentally or otherwise, exposes him self to the cold air, the perspiration immediately exases, and the blood, which had been but just now circulating rapidly throughout the surface of the body; it repelled inwardly, and is sure to set le in those parts which have been previously wearief and relaxed. Here, then, we have what is called Sore Thorat; when in the chost, which gives rise to all the pain and stiffness attendant upon such complaint. When this takes place in the throat, we have what is called Sore Thorat; yells in the lotter, Lambago or Stiff Back; when in the chost, Picurisy. We also have its in the shoules, cannot have its in the shoules, and the shoule, and applied, and other parts.

RADWAY'S READY RELIEF.

RADWAY'S READY RELIEF,

Titles Internally and applied Externally.

Its first action, when freely applied, is to binut the scate he similifies of the nerves, and almost instantly relieves the pairs; its secondary action is to excite perspiration, and resident the parts over which it is applied almost to a glow, likesphy determining size blood from the nuived parts to the surface. In these cases, the READY RELIEFS should be applied freely, at he same time rubbing the parts with a piece of flaured, stud it will be found in every case to give immediate and permanent relief.

N.B.—If convenient, a piece of flaured actuated with the RELIEF, and tied or pianed around the parts, does good servine.

A BAD COUGH CURED IN TEN MINUTES, Mr. Rigdon, of Brooklyn, the celebrated Church Singer and Organ-Player, on the night of the 10th of December was attacked with a severe it of coughing—so that he coughed from 9 o'clock until 12 o'clock, P. M., without three minutes internissions. One of the Clerks of Radway & Co., who sleeps in the mext room, got up and gave him a tea-apondful of the Relief internatily, and battled his throat, neck, and chest; I he also saturated a piece of finnel with the Relief, and land it over his chest. In a few seconds the coughing ceased, he could expectorate freely, and raised with perfect case a great quantity of philegin. The Relief instantly acothed the irritation of the throat, and removed the inflammation from the lungs, and gave free action to them, produced a free and copious perspiration of the throat and cleest; and in ten minutes he was entirely free from pain, and sush into a cound and pleasant sleep. In the morning he was free from hoarseness and cough; and has not been troubled since. Let every individual who is troubled with a cough, sore throat, influency, or hoarseness, pursue the same plan, and we will warrant them a speedy cure.

Mercurial Affections, &c., &c., &c., lt is now generally admitted, by the learned and scientific, that the mysterious power called Gelevansan or Magneties in in fact the principle of Vitality or Life, and that discuse in many of its most painful forms is entirely owing to the absence of this Gulvanic or Magnetic power in its healthy prophritions. If, then, we can readily supply this wondroits power, when it is thus deficient, we can augoesfully confind disease; and this has been fully and perfectly attained by this most wonderful scientific discovery, of combining Magnetiers or Galvanism with a Fluid which has cost the inventor of this remiedly pears of study and libor.

There, is not an intelligent Physician, who has kept pace with the progress of science, that does not readily approve of this use of the Magnetic power in various discases, and there is scarcely a Medical Journal, either in this country or Europe, which makes its approxumence we effects of these wonderful agents, or corroborating previous experience of their benging and the transmission of the Gelevanic Emboraction has great pleasare in being able to state, that a majority of the most distinguished Physicians of New York coustantly recommend this Sintercution in their practice, and from many of them he has received the Kindest testimonials of approval and commendation.

REDUCED RATES OF PREMIUM-HALF REDUCED RATES OF PREMIUM—HALF CREDIT RATES OF PREMIUM.

THE great and decided success which has attended this Institution, has induced the Directors to REDUCE the RATES originally required in British North America, to the ordinary European Rates. The result of such Reduction is to enable parties to avail themselves of the important benefits to Life Assurance at much lower Rates of Premium than those of any other Assurance Company t anaucting business in Canada.

The Directors have also resolved to extend to British North America the advantages afforded British North America the advantages afforded by the HALF CREDIP RATES of PREMIUM which have been so highly approved, and are so generally adopted by Policy Holders in the United Kingdom. The most liberal conditions are likerise offered to the Assured in the limits to which they may proceed by sea or land, to other parts of North America without affecting their Interest in their respective Policies.
