#### THE MERCHANTS' PROTECTIVE UNION MERCANTILE REFERENCE REGISTER.

THE MERCHANTS' PROTECTIVE UNION, 6r-

TPHE MERCHANTS' PROTECTIVE UNION, or a ganized to promote and protect trade, by enabling liss subscribers to attain facility and safety in the granting of circlite, and the recovery of claims at all parts, have to announce that they will, in September, 18-8 publish in one large quarte volume:

111- MERCHANTS' PROTECTIVE UNION MERCANTILL REPERENCE REGISTER, containing, among other things, the Names. Nature of Jusiness. Amount of Capital, Financial Standing, and Hating as to Credit, of over 400,000 of the principal merchants, trades, bankers manufacturors, and public companies, in more than 30,000 of the clice, towns, villages, and settlements throughout the United States, their territories, and the British Provinces of North America, and embraching the most important information attainable and necessary to enable the merchant to ascertain at a gence the Capital, Chargacter, and Degree of Credit of such of his customers as as deemed worthy of any gradation of credit, comprising, also, a Necespaper Differ orly columning the title, character, price, and place of publication, with full particulars relative to each journal, being a complete guide to the press of every county in the United States pleto guido to the press of every county in the United

mero gunuo to the press of every county in the United States
The reports and information will be confined to those deemed worthy of some lind of credit; and as the same will be based, so far as practicable, upon the written statements of the parties themselves, revised and corrected by well-known and reliable legal-correspondents, whose character will prove a guarantee of the correctness of the information turnished by them, it is believed that the reports will prove more truthful and complete, and, therefore, superfor to, and of much greater value, than any previously issued.

By the aid of the Mercantile Reference Register, business men will be able to assertant, at a guance, the capital and gradation of credit, as compared with financial worth of nearly every merchant, manufacturer, trader, and babker, withing the above-named derritorial limits.

On or obout the first of each month, subscribers

turer, trader, and bahker. within the above-named derritorial limits.

On or obout the first of each month, subscribers will also receive the Monthly Chronicle, containing among other things, a record of such important changes in the name and condition of firms, throughout the country, as may occur subsequent to the publication of each half-yearly volume of the Mercantile Reference Register, lity dollars (5.9.) for which it will be forwarded to any address in the United States, transportation paid.

Holders of five \$10 sheres of the Capitat Stock, in addition to participating in the profits, will receive one copy of the Mercantile Reference beginter free of charge, holders of ten shares will be cutiled to two copies; and no more than ten shares will be cutiled to two copies; and no more than ten shares will be allotted to any one applicant.

All resultances, orders, or communications relative to the book should be addressed to the Merchants, Protective Union, in the American Exchange Bank Building, No 128 Broadway, (Box 2568) New York.

#### CUSTOM HOUSE FORMS.

PUBLIC NOTICE TO IMPORTERS & CUSTOM HOUSE BROKERS.

The Customs Tariff Act, 31 Vic., Cap 44, having repealed Sec. 133 of 31 Vic., Cap 7, relating to Customs terms, and enacted in lieu thereof the follow-

"Sec 133. All bonds, documents, and papers necessary for the transaction of any business at the respective Custom Houses of places or Ports of Entry in Canada, shall be in such form as the Minister of Customs shall from time to time direct."—

NOTICE is hereby given that approved forms of reports, outwards and inreports, outwards and inwards, and entries for duty, free or warehouse, are deposited at all Custom Houses of the Dominion, and that Custom House Brokers, Importers, or Printers who may wish to print the same, for their own or general use, can procure copies for that purpose by application to the Collector, and that from and after the FIRST of OCTOBER next, the Department will discontinue the gratuitous supply of the above forms for general use; but all forms prepared for sale or use, are required to be in strict accordance with the copies lurnished, and upon the same sized paper.

For the present the forms can be obtained at any Castom House by payment of the cost of printing.

Blank bonds will continue to be furnished gratutously as herectore. reports, outwards and inwards, and ontries for

R. S. M. BOUCHETTE, Commissioner of Customs.

# THE TRADE REVIEW

Entercolonial Journal of Commerce.

MONTREAL, FRIDAY, SEPTEMBER 25, 1868.

The Business Office of the "Trade Beview" is removed from No. 4 Merchants' Exchange to No. 58 St. Francois Xavier Street, Room No. 5, Up Stairs.

It will be seen by a comparison of the table of Bank circulation, elsewhere published, with the returns of the corresponding period of last year that the full expansion has fairly commenced. The circulation for August is \$300,000 in excess of that for July, and the discount nearly a million. The effect of this is to make business a little more brisk and money a little more plentiful in this country.

Statement of the Post Office Savings Banks account, for the month of August, 1663, published in accordance with the Act 31 Vic , cap. 10, sec. 72:

closed.....

creasingly unsatisfactory since, the conclusion of the Austria war and the extension of Prussian territory and power. France does not like the idea of Prussia as a rival, and if by a short war the latter could be humbled, and French territory extended to the Rhinr, the volatile Parisians would be in ecstacles.

It is not a little singular from an historical point of view, that two of the famous allies who overthrow the first Napoleon, have already been humbled by France. On the plains of the Crimes, the memory of Moscow and the carnage of death which followed, were avenged; on the plains of suray Italy, at Magenta and Solferino, France settled accounts with Austria for her share in sending the great Emperor to St. Helena's harren rock. Is it not a little remarkable, to say the least of it, to find France now menscing Prussia, which held the place next to England in crushing Napoleon's power in 1815?

Respecting the probabilities of war, we are free to admit that where there is somuch smoke there generally is some fire. France and Prussia are both ready and in temper for hostilities; but we can hardly bring our mind to believe that they are about to bring such a calamity on Europe, particularly when both Govern-ments are proclaiming their peaceful intentions from the housetops. Should our hopes be disappointed, however, and the predictions of war come true, not only Europe, but this Continent-perticularly the United States-will be immensely affected by it. Even the cable rumours about war, as we saw last week, affected the gold market in New York—what would be the result if hostilities really began? Immense numbers of United States bonds are held in Gormany, and not a few in France also: trouble between these two powers might create a calamity in America by causing them to be sent in thousands scross the Atlantic for redemption. On the other hand, war would cause breadstuffs to rise rapidly, which would advantage both the United States and Canada. The gain to our neighbours from this cause, however, would be trifling compared to the dire financial cvils which a disturbance of the peace of Europe would cause them. So far as Canada is concerned, we dare say we have more to gain than to lose. But it is carnestly to be hoped that France and Prussia will spare Europe and the world the dire calamities which would flow from oven twelve months' hostilities between them.

It will be well for those in Canada who would be affected by such a war, of ther from European or American connections, to be prepared for whatever may tarn up. Holders of American bonds are undoubted; ly interested. Judging by outward professions and appearances, we would liave few fears of peace. these ever-recurring rumours - these frequent reviews of soldiers in France and Princis—the expectations of war included at most of the European espitals, may mean far more than appears as the surface. Let us hope for the best, but he pripared for the worst,

#### CONTRAST.

THE New York "Shoe and Leather Reporter," has been publishing for some time short biographical sketches of the men noted in the leather and tanning business, and for the last few weeks, an autobiographical sketch of the early life of Jesse Grant, father of the candidate for the Presidency. The letters are readable, as shewing how he persevered almost against all hope of success, and by industry and economy obtained a comfortable independence. In the last number of the "Reporter" to hand, Mr. Grant writing of his early married life, tells us how he was passing rich on what would now a days be looked on as a very moderate income indeed, on which to commence house keeping. He says:-

house keeping. He says:—

"For rent of the house, with lot of half an acro of excellent bottom-land for garden, I paid two dollars per month; now, such a house here, would readily bring \$26 per month. Flour, \$150 per barrel, now \$13; hams, 2½c, now 20c per lb; butter, 6½c, now 55c to 60c per lb; eggs, 2c to 4c, now 20b to 40c per doz; potatoes, 12c to 18c, now \$2 per bush; oats, 10c to 12c per bush; corn, 12c to 17c per bush; oats, 10c to 12c per bush; corn, 12c to 17c per bush; oats, 10c to 12c per bush; corn, 12c to 17c per bush; oats, 10c to 12c per bush; corn, 12c to 17c per bush; oats, 10c to 12c per bush; corn, 12c to 17c per bush; dressed hogs and quarter of beef. 1½c, now 8c to 15c per lb; cows, \$7 to \$8, such as will now bring \$10 to \$12, would now bring \$100 to \$120; chickons, 374c 62½c per doz, now 50c to 60c apiece. Groceries and dry goods were just about as high then as now, and type it did not cost one-sixth part as much for such articles as it does now, for then we had not learned to be so foolishly extravagant as at present. Leather was about as high then as now, and with such prices for living, paying \$6 to \$8 per month to a journey man, working 12 to 14 hours per day, and with chesunt oak bark at \$4 per cord, it would be supposed a tanner might live and afford to support a wife, especially one th t could do her own work."

The contrast between the cost of living forty-seven

The contrast between the cost of living forty-seven years ago and the cost of supporting existence now in the United States is very great, and to thoughtful men ought to teach a very important lessen. What has caused this extraordinary increase in the price of so many articles produced not out of but within the country? Money to-day it is true is not of the same value it was in those days of which Mr. Grant speaks: a dollar now is only worth 69c. in gold, yet this depreciation in the value of the currency is by no means sufficient to fully answer our question. But the solution of the problem seems to us tolerably simple. Taxation to some extent, of course, but we imagine in a much greater degree the absurdly high duties imposed on all foreign goods. This may not be apparent at first, but let us see what the inevitable result of a high protective tariff must be, and compare this tobe-expected result with the actual facts. The immediate result of a tariff which secures to the home manufacturer a large profit is a rapid development of manufacturing enterprise, necessitating the employment of many workmen, skilled and unskilled. The demand for labour for a time is in excess of the supply, and wages at once advance, until more labourers are attracted to the country. Wages should then gradually fall, but meanwhile manufactured goods have become dear, and farmers having to expend more, both for their own wants and for the hire of labourers, are no longer able to produce grain as cheaply as before, so that the labourer now finds it impossible to live on an income formerly sufficient for his wants. High wages are thus perpetuated, and the cost of production of every single article of manuincture becomes very greatly enhanced. The farmer especially feels the weight of the advanced price of everything he uses, but for a while (so long as he is not driven by the growing settlement of the country further and further from the manufacturing centres) he obtains a good profit on his crops and his cattle When the number of farmers increases largely and new lands are taken up, the production of food is wery greatly increased, and prices would again be low, but the distance grain has to be carried to market prevents the consumer from benefitting by the abundance, even as much as he would do were manufactures untaxed. The railways and their rolling stock are more costly than they should be, so in the labour employed in carrying on the daily work of the road, and so if the grain is to be brought to market at all it is only at a very serious expenditure for freight, which tells on every bushel. Of course we are now supposing that no grain is raised beyond what the people themselves are able to consume. If there is a surplus for export, the price will to so some extent be regulated by the wants of foreign consumers, and the prices ruling in their markets.

Now it seems to us that the course of manufactures and production in the United States, has for some years during the existence of a protective tariff been

much in the fashion we have shewn would be likely to follow high duties. The average wages paid for labour have increased enormously, the remuneration now paid to many workmen of ordinary skill, being more than equivalent to what can be commanded by well educated young men of a much higher standard of intelligence in stores and offices. No manufactures worth speaking of but those cut off from foreign competition by high duties can possibly exist, while some classes of manufacture—ship building notably have almost become obsolete. The statement of Mr. Grant that \$318 a year when he commenced housekeeping was equal to \$2,000 at the present day, may be a very little exagge: uted, but is not very far from the truth, and it is a statement of a kind that should lead those dissatisfied with Canada, to think well before making up their minds to seek their fortunes in the land of high prices.

#### ONE-SIDED AND UNFAIR.

PRINCE Edward Island has just been doing a little in the Reciprosity business. in the Reciprocity business on its own account. General Butler, of New Orleans fame, was the contractor on the opposite side, but whether he was authorised so to act by the American Government may be open to doubt. However this may be, it was given out some time ago, that the renowned General was about to visit the island-some were shabby enough to hint with an idea of annexing or buying it-but prefessedly, it now appears, to place the commercial relations of the two countries on a better footing. In other words, a sort of Reciprocity Treaty was to be negotiated Possibly the General thought the negociations regarding trade might lead to proposals of a political and more delicate nature, and that on his return to Washington he would be able to say, like the Roman General of old, veni, vidi, vici,-I came, I saw, I conquered. With true American tact, however, he evidently determined to make a good commercial bargain first, for we learn from the American press that his proposals to the Prince Edward Government were as follows:-

#### PRINCE ENWARD "BILL OF FARE."

"That the products of the mines, torests, fields and fisheries of the island, except live stock, salmon, mackerel, horrings cod and canned lish, be admitted tree into the United States, and that the duties on the excepted articles shall not exceed 87 per head on horses and mules, and 55 per head on cattle, and 50c per head on calves, sheep and swine, nor exceed 80c per 100 lbs on codiish and mackerel, and 25c per 100 lbs on salmon, herring and shell fish. That all charges for light money, compulsory pilotage, anchorage and Consular tees be abolished, and that certain manufactures of the island, such as ale, beer, boats, casks, &c, should be admitted at duties not to exceed 10 per cent, to be fixed by joint commissions."

#### HATTED STATES "BILL OF PARE"

"That all the natural productions of the United States, except cane, sugar, molasses and tobacco, be admitted free, and that all their manufactures also, ex named free, and that are their manufactures as one except spirits and patout medicines, be admirted at duties not to exceed 10 per cent, to be fixed by a joint commission, and that the same right to fish within the three-mile line be conceded to our vessels that is given to the vessels of the island."

Now, my hearties, "you pays your money and takes your choice!" For our part, we should greatly prefer to sit down at the American table, for its "bill of tare" far excels that set before the Islanders. In fact, the terms of the general are very much like the handle of a jug all on one side! There are three main points in this so-called Reciprocity arrangement. First-the material products of both countries are to be admitted free, but then the live stock and fish of the island are excepted the very commodities they particularly require to export; these exceptions are far more important to Prince Edward than "cane, sugar, molasses and tobacco," the exceptions against the United States Second-all American manufactures (except spirits and medicines) to be admitted into Prince Edward at duties of not more than 10 per cent, wailst only the island's beer, boats and casks, &c , are to enter the States on the same terms! Third-as a quid for these great concessions on the part of Uncle Sam, the latter wants to be allowed to fish within three miles of the Prince Edward coast! General Butler may be a poor soldier, as his enemies charge him, but evidently he knows how to ask enough in making a bargain. Our readers need not be astonished to hear that the wide-awake islanders have not jumped like a trout at a fly at this impartial offer of Reciprocity, and that like the general's long-expected capture of Richmond, the bargain "hangs fire." We have a better opinion of the good sense of the Government of Prince Ed-

ward than to believe that they will ever agree to terms so one-sided and unfair.

Did Prince Edward Island consent to Gen. Butler's proposals, we hardly think the Imperial Government would give its assent. Besides objections to the arrangement on its own merits, it would become a question whether a treaty should be countenanced which embraced one British Province and left out the others. We hardly think any offer of Reciprocity with the United States which did not include the Dominion of Canada, would be affirmed by Great Britain. The reasons which would favour this course are so obvious that they need not be dwelt upon,

#### EXTRAVAGANCE IN BUILDING.

TITIZENS of Montreal are proud, and have some reason to be proud, of the handsome appearance which their city is assuming, as gradually old structures are being pulled down, and lofty and ornamental buildings reared in their stead; but while the immediate results from this spirit of improvement are very pleasant to the eye of the dweller in or the visitor to this city, we are not quite sure that evil may not spring from it it allowed to be carried to too great an extent.

There are several reasons which lead us to consider the investment of much money in costly warehouses as unwise.

The first that occurs to us lies in the fact that capital invested in a building to an extent greater than is necessary, is forever lost to the community. The individual may receive a fair or even large profit from his investment, but the capital which previously existed is gone. It can no longer be employed either in commerce, or in giving profitable employment to labour; and it is destroyed without adequate return. Capital may be profitably invested in time and laboursaving machinery, which enable productive work to done more rapidly and economically than by hand; but even in this case, there is usually at first hardship caused to the laborers thrown out of employment, while, at the same time, by the greater demand caused for cheapened productions, the original or even greater number of laborers find employment. For the destruction of capital invested in buildings, there is no such after-compensation, but rather a reverse operation. And this brings us to our second, and perhaps more generally understood objection.

It is this. Every unnecessary expense added to the cost of carrying on business, as, for instance, by increased rents following the erection of expensive stores and warehouses, is so much dead weight carried by the merchant in his competition for trade. Any one will admit that if A pays \$4,000 a year reut for the premises in which he places his goods for sale, and B pays only \$1,500 a year, B can undersell A, provided they do an equal amount of business with equally safe customers, the difference between the reats alone being a sufficient income to support B, so that he can afford to give his customers their goods lower than A can, at a rate equivalent to whatever percentage \$2 500 may be on the year's business. The same argument precisely applies to the erection of costly dwelling houses and living in an extravagant style. Merchant princes, when they have made fortunes, probably conceive they have a right to spend their money as they please, and we suppose they have this right. But their example induces others who have only partially made fortunes in the spirit of emulation to go and do likewise, and it becomes necessary for a merchant to put a very heavy advance on his goods in order to cover his annual expenditure. If business is being carried on on a very extensive scale, this percentage will be less, of course, perhaps trifling; but in the case of one who has not as yet a very large connection, it becomes a serious impediment, and where competition with other cities is close, it helps to reduce the natural advantages of location.

Montreal has not as yet suffered to any extent worth speaking of by the increased expense of carrying on business, but we have some fears that the trade of the city may suffer detriment before very long, unless the spirit of extravagance displayed in the erection of costly buildings-more so, perhaps, this year than during any previous year-be immediately checked. We, as well as others, admire handsome structures, but we may pay too dear for our whistle, and we should be content to see the external progress of the city more gradual, while we knew its trade was increasing, and its means accumulating to a degree that would prevent a liberal expenditure from being any longer a great commercial blunder.

# RENEWAL OF RECIPROCITY

MILE recent petition of the Quebec Board of Trade to the Governor-General, apropos of the renewal of the Reciprocity Treaty, expresses, we fully believe. the calm, deliberate sense of three-fourths of the commusity A treaty on any other basis than that advocated by the petitioners would be forever injurious to the important interests of the Dominion The text of the petition is as follows: -

the important interests of the Dominion The text of the petition is as follows:—

The petition of the Council of the Quebec Board of irade, humbly showeth:—That your petitioners are interested that a new Treaty of Reciprocity is about to be negolated for the mutual exchange of products and manufactures between the United States of America and the Dominion of Canada; that during the past secretical years, vessels built in the United States have been admitted to registry in all ports of the British Empire upon the same terms and conditions are vessels built in these Colonies, and though have also been admitted to time coasting trade of Great Britain on equality favourable forms;

That the principal industry of the city of Quebec is that of shipbuilding, which is now in a very depressed tate, and the arlicans and labourers connected therewith amost totally deprived of employment, for want of new markets for stippers.

Your p-stitioners therefore humbly pray, that no Treaty of Reciprocity be concluded without a provision giving the vessels built or owned in the Dominion of Canada the right of registration in the United States, as is now enjoyed by the vessels of that nation in all the ports of the British Empire.

And your petitioners, as in duty bound, will over pray.

### THE BRITISH TEA MARKET.

N their last circular (Sept. 10) Littledalo & Co., of London and Liverpool, refer thus to the British Tea Market:

Nether last circular (Sept. 10) Littledalo & Co., of London and Liverpool, refer thus to the British Tea Market:

During the latter part of the past month there was a number telegram, dated thong Kong, 6th August, adviving a total export of 71,500,000 lbs, the improved tendency was checked. The chief feature has been the large simultaneous arrivals of new sesson's Congous, the quality of the Kaisows being very unsatisfactory. The first rales made over from 18 8d to 2s, and up to 2s to tor haisows, and 2s 6d to 2s 9d per 16 for Paklings in boxe, but these rates are not maintained. Business has also been done in the black leafs, viz., at 2s 1d to 2s 3d for fine Consums and Copacks, and 2s 4d to 2s 9d per 16 for fine Monings and Copacks, exporters being the chief operators: the quality of the Monings is most cenerally approved of We estimate the total importante London to the 3lst uit. at 75 952,000 lbs against 2172,000 lbs in 1857. We estimate the total importante London to the 3lst uit. at 75 952,000 lbs against 2172,000 lbs in 1857. We estimate the stocks in the timited hingdom at 52,000,000 lbs, against 34,000,000 lbs, at the same period last year

If ack Teas Siftings have been sold at a further do cline of fully 12 per 16: broken leaf-kinds are also lower. Fair to good common is worth Is 1d to 18 1id per 1b. Fair to good common is worth Is 1d to 18 1id per 1b. Fair to good common is worth Is 1d to 18 1id per 1b. Fair to good common is worth Is 1d to 18 1id per 1b. Fair to good to mon is worth as 1d to 18 1id per 1b. Fair to good to mon is worth as 1d to 18 1id per 1b. Good hower Fair begood common to fair bisokish-leaf kinds at one time sold as low as 18 01d to 18 1id, but an export demand having set in, they have recovered fully 1d; x lb, and there is now little offering under 1e 13 per 1b. Good o'd season's Monling is in request from 1s 4d to 1s 6d, at rather better prices. The new season's to hand per steamer have been rande varied from 2s 1d to 2s 3d for fine, and 2s 4d to 2s 6j d for finest per 1b. Cant

Buittell Board of Trade Returns.—During the first even months of the present and two previous rear, the total value of the exports of British and Irish produce and manufactures wa, as follows:

| 1867    |                    | 103,175,914 |
|---------|--------------------|-------------|
| 1808    |                    | 100,849,426 |
| in Jaly | only the shipments | were:-      |
| 1868    |                    | £14,957,834 |
| 1957    |                    | 15,582 430  |
| 15/3    |                    | 15.748.269  |

The computed real value of the principal erticles imported in the first six months of 1868, thus compared with 1873 and 1867.

#### NATURE IN REBELLION.

NATURE IN REBELLION.

16 PEPLENISH the earth and subdue it," was the prophetic command, the primal benediction, with which the Creator introduced man upon the planets. But how like a cruel sarcasm the motto seems as we think of it in comparison with the accounts which have reached us from Equador and Peru. One heave of volcanic passion, one throe of fiery agony, flings into fragments the massive structures which her Divinely appointed masters have imposed upon the earth's breast, and makes of the builder and the building one undistinguished heap. Nor is this an exceptional instance of a solitary class. The year has been full of disastrous uprisings of the natural forces of this continuent against man and his works. Few can have forgotten the tornado which in the spring swept whirling over the prairies of the Mississippi Valley, and with that infusion of the ludicrous which minging in all extensive human catastroples, makes them yet sadder by its humiliating presence—caught suddenly up from the earth an Adventist church with its congregation, and made the terrilled assembly believe that the final day of which their preacher was warning them had really come. And not a few have cause to remember the lesser which winds that, starting up here and there in East or West, have within more limited ranges wrought a destruction scarcely less complete. Too often have showers of ice, bursting from the sudden clouds, turied to utter despair the large hopes of the farmer. While one large tract has been parched almost to harron ashes, in another everything has been sodden and rotted with immoderate rain. Hardly a Wostern river but has transgressed its bounds and become an it imitable curse to the fields it was ordained to bless, while in extensive regions of our Southern Atlantic States the floods have reduced to starvation a people struggling bravely with the miseries which four years of war, and three more of social disorganization had caused them; so that the inundated valleys and ruined roads and bridges of which we now he REPLENISH the earth and subdue it," was the prophetic command, the primal benediction,

name meseenger that slays our first-born. Subdue the earth! It rather seems as if our Titan subject with all her ferocious crew would altogether exterminate us.

Must we then conclude that the venerable and beloved record is a forgery, or that our Maker has sent us to the earth on an idle and disastrous errand with words of mockery? The facts shut us up to no such a dilemma. The command to subdue the earth not only implies a promise of victory, but also a warning of hardship and conflict through which nothing but courage and industry and wisdom can make their way. The calannities which we have reviewed have but too amply made good the warning; they show that by far the greatest part of our work remains to do; but has the promise had no fulfilment? We have ensuared the expansive force of vapor to lift our burdens and bear us and them over land and sea whither we will. We have in large measure brought under our control the cbb and flow of the electric wave. The humane forceast of a physician has reduced the terrific slaughter of the smallpox to a minor element of destruction, and but for our study negligence would by this time have annihilated it altogether. The experience of last year in this city has gone far to prove that the question of cholera is only a question of good or bad government. These, to be sure, are but as little colonies planted on the shore of the vast region to be possessed, but their stability and intrinsic value give every encouragement to further inronds upon the barbarous region.

Erasmus Darwin was much satirized seventy years ago for his "receipts in verse to shift the north-east wind," and his scheme to employ the combined navies of Europe in towing the icohergs to cool the torrid zone. But the man laughed at was wiser than those who laughed at him. Fanciiu perhaps his individual projects might be, but he unaerstood at least the mission of physical science, by his own main strength, but must set them to governing one another. It is infatuation, indeed to put hasty faith in untried contr

nessed by that geological French Revolution, the tidings of which have just come to our ears? May not those streams of internal fire be directed to bless the poles with the warmth of perpetual spring instead of blasting the equator by sudden internal outburste? May not the concentrated fury of the tornado be dissipated and spread wide over the fields in gentle airs? Why not take the word of the ancient prophet and "ask of the Lord rain in the time of the latter rain" not alone by 'the pious violence of prayer," as though this age of intellect must have the miracles which startled a people greatly given to a rude idolatry into some sense of spiritual powers but with that patient inquiry into the Divine methods which will find answers awaiting it? The half barbarous Mormons lave laught us a lesson of no mean worth by the admirably concerted energy with which not many months ago they attacked and slaughtered the hosts of grasshoppers. And surely it cannot be beyond the reach of engineering skill to contrive us a system cost-dykes and sluices and reservoirs that shall abate the violence of our almost incessant floods - a system cost-ly indeed, but far cheaper than such calamities as that which during the past summer devastated the valley of the l'atapseo. We do not forget that it is much ensier to propose the hardest of these things than to schieve the easiest. But that does not forbid that by patient toil, by thinking continually unto them," as Newton said, even the hardest may be accomplished. And while we dare not look to avert that final catatrophe which the general belief of the Christian world, warranted as we think by Scripture, piously apprehends, we may yet hope to relieve ourselves from the recurrence of such awful foretastes of it as that which has suggested these remarks. has suggested these remarks.

#### THE BARLEY CROP.

THE Detroit Post says that it has been particular in making enquiry as to the quality and quantity of the yield in about all the barley growing regions, with the following results:-

In Michigan, almost without exception, and all over Canada, except sround Chatham, it is of light weight -43 to 44 lbs. to the measured bushel. In the best barley regions of Michigan the yield is poor both in quality and quantity. In Canada the yield upon threshing does not come up to expectation, but it is unusually bright in color.

In lows, as we learn from good authority, the deficiency is from five to ten bushels to the acre, and the oundity is inferior.

qualitv is interior.

quality is inferior.

In Illinois it is little better than Iowa in yield, and
no better in point of quality.
Wisconsin does not roise much barley, but the
quality appears to be much better than in Iowa or Illinois

In Ohio the yield is small, and the product of light

weight.
I'ennsylvania does not raise a great deal comparatively speaking, but there is a very fair yield of good

tively speaking, but there is a very fair yield of good quality.

In New York there is a good crop, the best, doubtless, in the whole country.

From the above facts, the conclusion is reached that so far as the number of bushels is concerned, there is more barley than last year—which was a year of scarcity—but it is of inferior quality, a large proportion deficient in weight. Should the price sink to \$3 per 100, the probability is that a speculative feeling will be developed that will absorb all that can be obtained at about that figure.

#### MEETING OF LUMBERMEN.

LARGE and influential meeting of lumbermen in the Ontario District, was held at the Dafoe

LARGE and influential meeting of lumbermen in the Outario District, was held at the Dafoe House, Belleville, on Friday afternoon, 18th inst. The meeting was called by the Department of Crown Lands, in compliance with a petition of the local mill owners on the Salmon River, and was presided over by J. C. Miller, Esq., an officer of the Department, A gent eman who was present furnishes the following respecting the meeting:—

"The complaint of the petitioners called the large lumbering establishments a monopoly, and undertook to show that the local mills could not be supplied with timber for the use of the country on account of the larger mill owners monopolizing all the timber. It was shown by the returns from the Crown Timber Office that twenty per cent. of the saw logs got out on Salmon River were taken from lands not covered by lumberer's licenses. It was also shown that two sales of timber limits had taken place within the last seven years on the Salmon waters, that they were put up in small lots, sold at low figures, and within the reach of any person, and that there was not a local mill owner purchased at these sales—that they had always got their timber for nothing, and that they declined paying for it. It was also shown that two million five hundred and thirty two standard saw logs were got out in the Ontario Agency during the last four years, and that one million one hundred and ninety-eight thousand of these logs were cut without authority of licenies, and open to all purchasers."

The local mill men it is said failed to make out a case in the opinion of the meeting, and went away quite dissatisfied.—Belleville Intelligencer.

A man in Lynn, Mass., a few days ago made fifteen pairs of ladics' gaiters in less than ten hours, making 87 50. This is the greatest feat known to be accom-plished by any shoemaker.

A cotton press has been built in Nashua, whose com-pressive power is five thousand pounds to the square inch. The usual hydraulic power is increased very materially by a series of toggle joints, so called, which is a new feature and a decided improvement,

#### ITEMS OF NEWS.

The Valencia raisin crop is above the average in quality this year, but the size of the fruit is smaller

A decided improvement has taken place in the iron trade. Welsh iron-masters have now advanced the price from 7s 6d. to 10s per ton, and that one of the largest firms in Staffordshire have issued circulars to their correspondents that they cannot accept any further orders excepting subject to next quarter day's price.

#### THE COTTON CROP OF 1867-3.

L'ROM a compilation of the cotton movement of the United States just issued by the Commercial and Financial Chronicle, we are enabled to present a statement of the details of the crop of 1867-8. It appears that the total receipts at the ports for the year ending Sept. 1, 1868, have been 2,240,282 bales, against 1,965,774 for the year preceding. The following is a statement of the receipts and exports at each port:

|                |                | Exported,       |         |
|----------------|----------------|-----------------|---------|

Total consumption in United States year ending Sept. 1, 1868. bales. Consumption in Southern States....

885.015 6 ,000 Leaving con'n in Northern States .

According to this reduction, the total consumption of cotton in the United States during the year, has been 885.015 bales,: in the North, 825,015, and in the South. 80 000 bales

We are hardly prepared to take direct issue with so careful an authority; but it appears to us that 60,000 bales for Southern consumption is an under estimate. The estimate, however, receives a certain degree of confirmation from the inquiries of the National As-

sociation of Cotton Manufacturers alluded to in the following remarks of the Chronicle.

According to this formula, the consumption the past year appears to have reached 825,015 bales in the North, and 60,000 bales in the South, or a total in the whole country of 886,015 bales. That our readers might see how this result tallys with the actual facts, we were making arrangements to obtain the returns from our different manufacturing establishments when we learned that the National Association of Cotton Manufacturers were pursuing the same inquiries; and we have now received from their Secretary the result of their labours. The returns are not complete. (that is they are from only 465 mills,) but with the help of the census of 1860, we shall be able to reach satisfactory results. It appears, then, that the number of mills and consumption in the United States in 1860 and the consumption of 475 mills in 1868 were as follows: -- Census of 1860-

| Southern           | 52     | 135 382      | 38 990     |

Total United States,...475 4,139,602 798,954
It is important to notice that the con-umption in the Southern States was only 87,650 bales (460 hs each) in 1860, according to the census, and that this year the mills which have made returns have consumed only 38,990 bales. Furtler, it appears that the Northern States (as also given in the census) consumed 703,850 bales in 1860, and the returns of 423 mills in the same States this year show a consumption of 666,964 bales. Now if we estimate the mills which have not reported this year as having 1 200,000 spindles (making the total spindles for 1868, 5..39,502, sgainst 5,035,798 in 1860), and as producing the average size yarn of those reporting, we shall find that the whole consumption of the country the past year has been about \$90,000 bales, about the same total we have reached above.

The exports of cotton from the United States for the year am units to 1 657,015 bales, against 1,558,787 in 1866-7, and 1 552,457 in 1865-6 but are less than ball the total of 1859-60. Total United States, ... 475 4.139.602

#### EXPORTS OF GRAIN.

M ESSRS. Edward Bell & Co., of New York, have furnished to the Times of that city some inter-III. furnished to the Times of that city some interesting statistics on the above subject. From them we learn that during the year ending Exptember 1, 1863, there were exported to Great Britain 523,294 barrels of flour, against 179,990 barrels in the year preceding; 12 992,609 bushels of wheat, against 6,014,271 bu-hels in 1867, and 9,121,449 bushels of corn against 10,410 208 bushels in 1867. We are without the amount of other grains exported to England, but the following table shows the exports from the United States to all ports from Sept. 1, 1867, to Sept. 1, 1863.

Total

#### THE PRICE OF GOLD.

FEW weeks ago, we presented some considerations, A principally connected with the course of our foreign trade, tending to show that we were in danger of a heavy efflux of gold to Europe, additional to the large amounts sent there during the last few months. Luckily, it turns out that to be fore-warned is to be fore-armed. These anticipations at the time were the cause of an advance in the premium to 50. The rise in the premium, however, so far cheapened our securities to foreigners as to stimulate an extraordinary exportation of bonds and stocks. It is estimated among foreign bankers that not less than \$25,000.000 of Government bonds were shipped from New York in July and August, and some carry their estimates as high even as \$45,000,000; besides which a large amount of Erie and Illinois Central stocks were sent to London. These shipments of securities have supplied the market with exchange, and the result has been a comparative cossation of the exports of specie. These remittances of securities were, of course, almost exclusively on speculation; and it remains to be seen how far the European market will absorb them, or, whether a certain portion of them will be returned; for the present, however, they have served to set an adverse trade balance, and to check the outflow of old.

The foreign trade movement has also become most principally connected with the course of our

The foreign trade movement has also become most conservative. The exports of domestic products have materially increased, principally owing to the scarcity of dairy products in England and the demand for our

breadstuffs. The imports also have contracted, apparently from a prudent regard, on the part of the importers, to the dauger of a renewal of over-trading. In this way the trade movement is righting itself, which removes one important cause of apprehension of a further drain of specie. Again, more recent advices from the South encourage the expectation of a further drain of specie. Again, more recent advices from the South encourage the expectation of a further drain of species. The harvest is new placed beyond all doubt, leaving us a large surplus available for exportation. These are new elements bearing upon the prospects of the gold premium, and go far toward removing the apprehensions justified by the condition of things two months ago. Political affairs also have a more assuring aspect. There is les disposition in the South to encourage political disquiet, the Democratic leaders in that section being upparently careful to avoid any outbreak that could be used at the North against the success of their party. Under these changed circumstances, it is not surprising that the price of gold should have fallen to 144, nor would it be remarkable were the premium to go down still further when this improved course of affairs comes to be more generally comprehended. This change is but another illustration of the tendency of an extreme to beget a reaction resulting in the restoration of the wonted equilibrium,

A telegram from Caspe, published some time ago, stated that H. M. Ship "Poris" repo ted a great number of American tishermen in Bay Chaleur, of whom but very few have taken out a license. A correspondent writing to the Advecate, published at Chatham, the special organ of the Minister of Marine and Fisheries, tells the following story:—

"One day last month an American fishing vessel was seen about two miles from our shore. Our fishery overseer went on board, and found her using a seme one hundred and tw. nty fathoms long, by eight deep. She had on board about sevently barrels of mackerel—Since then quite a number of American vessels have been at work close to our shore, and this evening, there are between one and two hundred of them within two miles, doubtless engaged in fishing."

Is this the kind of protection the Confederates promised our fishermen they were to receive from the Dominion Government under Confederation? -Halifax Ci izen.

### MONEY MARKET.

A S will be seen from the bank returns published in other columns, there is good cial circles, and money is considerably more abundant, and can be borrowed easily on good securities. Sterling Exchange is quiet; in New York the latest quotation is 109 for 60-day bills.

Gold in New York during the last week has remained quiet, the latest rate being 144. There is a fair supply of greenback and currency drafts on Boston or New York at 30} to 31} per cent discount.

There has been a considerable demand for Silver in order to move the grain in the country to market, and rates are now 3! for buying and 3 per cent discount for selling.

The following are the latest quotations of Sterling Exchange, &c:-

#### THE DRY GOODS TRADE.

Baillie, James, & Co. Clark, Jas. P. & Co. Clarkon, T. James, & Co. Donnelly, James, Foulds & McCubbin, Greenshields, S., Son & Co. Hughes Brothers, Lewis, Kny & Co. MacKenzie, J. G. & Co.

May, Joseph,
McLachlin Proc. & Co.
McMaster & Co., Wm. J.
Moss, S. H., & J.
Muir, W., & R.
Plimsoll, Warnock & Co.
Roy, Jas., & Co.
Robertson, Stephen, & Co.
Stirling, McCall & Co.

URING the past week a considerable number of buyers have been in it. buyers have been in the city, and large sales have been effected. Cottons and fancy goods are generally most in demand, to the neglect of woollens, which are hard of disposal, especially flanuels and blankets. The arrivals of dry goods per steamers are considerable, but not more than sufficient to meet the demand.

#### THE GROCERY TRADE.

Haldwin, C. H., & Co., Chapman, Fraser & Tyles. Chapman H., & Co. Childs, Gorge, & Co. Converse, Colson & Lamb. Franck, J. C., & Co., Gillespie, Moffatt & G., Jeffery, Brothers & Co., Kingan & Kinl. cb.

Mathewson, J. A. Mitchell, James. Robertson & Bestlie, Robertson, David, Tillin, Bros. Phoneson, Murray & Co. Theory of Novid, & Co. Winner, cent & Ware,

URING the past week we have had a fair amount of activity themely of activity, though in consequence of holiday times and also coming trade salvs, transactions have mostly been limited. In some articles however some large lots have changed hands, and the general feeling for almost all holders of staple goods is to hold on for full figures in preference to selling.

TEAS - Have had fair attention for all grades, though chiefly for Uncoloured Japans about 50c to 52jc, of which about 2,000 half-chests have been placed, and prices may be quoted a full le to lie per lb. hi, her than last week. Twankays continue very scarce and much enquired for, also low and medium Young Hysons, but the market is almost bare of those teas, and prices in the old country will not lay down here to pay the importer. Nothing doing in Black.

Coffee.-But little enquired for. No change in prices.

SUGAR.-Has had a better demand, and the feeling of firmness in the New York market has caused a corresponding feeling on the part of holders here, some small lots were placed at auction, of fair grocery Porto Rico at \$7.47 to \$7.70, but sellers would not continue at those figures and withdrew, balance for \$8 and over. At private sale holders very firm. No change at the refinery.

MCLAESES-Has had fair attention, and buyers are more disposed to pay the figures required by holders Lots now in markets are in most cases very fine ramples. Clayed may be quoted at 30c to 35c Muscovado (bright) and Demerara 38c to 45c, very little Centrifugal in market.

RICE-Has been somewhat neglected, though some lots just arrived. Good Rangoon have been readily placed, and fine samples Arracan are better enquired for.

FRUIT-With the exception of raisins, has not been in demand. Layers are still confined to the small stocks (new not having yet arrived) and holders are firm in their demand at \$2 10 to \$2 15 Currants somewhat more enquired for.

SPICES -Very little doing and unchanged.

l'ish-In good demand, and full prices willingly haid for good lots, dry table cod say \$4.75 to \$5. Labrador herrings are also much enquired for, but really good No 1 are hardly obtainable.

Oils-Some cod oil changed hands to speculators, held somewhat firm, now at 50c. Scal oils remain unchanged. Lard oil having run out, Sax's engine is in good demand

#### THE BOOT AND SHOE TRADE.

McLaren, W. & Co.

'HIS week's operations were not opened out as anticipated, but will no doubt greatly improve the latter end of the season.

#### THE HARDWARE TRADE.

Crathern & Cavorhill, livans & Evans. Evans, John Henry. Itati, hay & Co. Irela d, W. H.

Morland, Watson & Co. Mulholland, & Baker, Robertson, Jas. Waddell & Pearce.

USINESS within the last week has fairly opened out, and is much larger 4 out, and is much larger than anticipated; prices of all goods are well maintained, and there is every prospect of advances in prices of iron, owing to ad vices from England where it is going up. Stocks of all kinds are well assorted, and probably larger than at this time last year, with every prospect of it all being required. There are not many buyers as yet in town, but we believe on the whole, a fair fall business will be done.

PIG IRON-Moving off more rapidly recently than it has been for some time, at remunerative prices.

BAR IRON .- Stocks are large and in good demand Prices unaltered HOOP AND BAR IRON .-- Good demand, at prices

which have not changed since last week. BOILER PLATES- Are inactive at unchanged quota-

tions.

TIM PLATES .- Stocks are not large and prices are consequently fair. Canada plates have been over-

done this season, and large lots have been forced on the market at and under cost

NAILS--Are still in a very unsettled state, the iron master's stocks being forced on the market at unpro fitable prices.

#### MONTREAL PRODUCE MARKET.

Vkin & Kirkpatrick, Black & Locke, Converse, Colson & Lamb, rawford, James, Dawes Brothers & Co.

Hannan, M., & Co. Hobsen, Themas, & Co. Mitchell, Robt. Raphael, Thomas W.

LOUR,-The market for the end of past week remained firm and steady, with a moderate consumptive and shipping business doing, absorbing the bulk of the receipts at rates mostly unchanged for good down to ordinary Supers. Choice and favourite brands alone being sought after at slightly stiffening prices. The large arrivals, near 16,000 barrels, for the first three days of this week have completely prostrated the markets, buyers having withdrawn for the most part; only a trifling business has been transacted notwithstanding that holders are in many instances offering at reduced rates. The tone of the market is weak and the feeling gains ground that prices of flour, wheat and breadstuffs generally, must settle down to shipping point, at which operators can see their way clear to export to Britain with some reasonable prospect of profit. In Extras the demand is merely by retail, and the same may be also said of all grades below superfine.

GRAIN .- Wheat-The advancing rates of freight both in New York and here have depressed the wheat market, and shippers are only willing to operate at reduced rates. Millers are buying cautiously and merely lay in stock from hand to mouth, Pease-Arrivals are limited to a few carloads which are taken ex. store at from 971c, to \$1 per 66 lbs. according to quality.

PROVISIONS.- Fork - The demand continues the merest retail-prices are maintained with difficulty although stocks are small and in few hands. Butter-Little doing here this season in this article the sales range from 19c to 22c according to quality. The arrivals are mostly for direct shipment to Britain, where the price is well sustained hitherto.

ABBES. - Po s have declined slightly during the week and close quiet and steady. Pearls - The decline noticed still continues, and with heavy stocks both here and in Britain. The transactions are merely for small actual ordere principally for export to the United States

#### THE LEATHER TRADE,

Black & Locke. Bryson, Campbell.

| Seymour, M. H. | Shaw F. & Bros. | Akin & Kirkpatrick.

HE business of the past week has been moderate; particular call being made for prime classes of Buff and Pebble; of this kind of stock the demand is far greater than the supply. Prices still continue as last quoted, with little prospect of an immediate advance.

SUBSCRIBE TO THE WREELY TELEGRAPH. TOBONTO.

A Popular Paper at Popular Prices

ONLY ONE DOLLAR PER YEAR.

It contains more news and general reading matter than either the Weekly Globe or Leader, at one half the price.

THE people who want to read the cheapest and best Weekly in the Dominion should enclose One Dollar for a year's subscription to the Toronto Weekly Telegraph,—a splendid Family Paper. It contains Interesting Miscellany, Reliable Market and Cattle Reports, copious Telegraphic Reports, structive News, Selections, and more useful information than can be found in any other paper.

As a Politroal Paper it utters its opinions fearlessly, avoids vulgar sensations, and becomes at once a high lond and popular paper.

ITS EUGOFRAN NEWS is carefully selected and condensed, and its Canadian and American News is full and complete from all parts of the continent.

THE FAMILY DEPARTMENT Contains readable advices on the Fashlons. Bordga and J. Domestic Cossip, Tales, Sketches, Poems, Wit, Hamor, Science and Art. Dollar for a year's subscription to the Toronto

and Art.

173 COMMERCIAL DEPARTMENT IS admitted to contain a nore reliable Market Report, fuller Grain, Produce, Cattle, Lumber Dry Goods, Hardware, and troceries Reports, than is to be find in any of the so-called large weeklies published in Ioronto.

#### SEND FOR A SPECIMEN COPY.

#### OUR CLUB RATES. Five copies, one year, to any address...... \$ 4 60 \*\* \*\* Ten Twenty " ..... 16 00 \*\* Forty " ..... 32 00 Eighty " .......... 60:00 Strictly in Advance.
