YEAR OF THE REIGN OF HER MAJESTY
QUEEN VICTORIA.

HALIFAX, N. S.
PUBLISHED BY W. CUNNABELL,

(George Street—Hare's Building.)

AND MAY BE HAD AT ALL THE BOOK AND OTHER STORES
THROUGHOUT THE PROVINCE.

ADVERTISEMENT.

The Publisher has been induced to issue this Number in consequence of the many applications received for CUNNABELL'S NOVA SCOTIA ALMANAC, during the Autumns of 1859 and 1860;—but owing to the late period at which it was commenced, and the disarrangement of the printing office, (caused by the recent fire in Hare's building,) he is necessarily obliged to diminish the number of pages, and publish it at a reduced price—in proportion to its present size.

Although some of the lists of public functionaries are omitted, other departments remain undiminished.—Lists of Members of the Provincial Legislature, Heads of Departments, and City Council—time for the arrival and closing of Mails, the sittings of the several Courts, and the starting and arrival of Railway Trains—will be found under their respective heads; and the Astronomical calculations present their usual features—which, with the Chronological Summary, Farmer's Manual, Useful, Amusing, and Instructive Readings, &c. will render these Departments no less interesting in the Number for 1861 than they have been in previous Numbers. The publisher therefore confidently trusts that the present No. of this Almanac will be favourably received by its numerous patrons.

FOR 1861.

CHRONOLOGICAL SUMMARY.

(Continued from the close of 1853—as published in the N. S. Almanac for 1859.)

1854.—The year 1854 was a period of considerable activity, and sanguine expectations. During the Legislative session the Railway Bills were passed authorising the appointment of Commissioners, and the work fairly commenced. While the debate on these bills was continued in the Legislative Council, the Council Chamber was daily thronged with listeners. Other public works were also put in progress. The subject of a Union of the Colonies was also extensively discussed. On the 31st January Hon. Mr Johnston introduced the subject in the House of Assembly, and expressed his belief that a movement in that direction, though commenced by the smallest and least influential of the three provinces, may produce results favorable to its speedy accomplishment. A unanimity appeared to characterise the sentiments in the legislature as well as those of the press, in reference to that momentous question. The Reciprocity Treaty,—which was agreed on by Lord Elgin and the Government of the United States, ratified by the Imperial Parliament, and finally concurred in by the Legislatures of Nova Scotia and sister Provinces,—is an important event in our provincial history. A variety of popular questions were brought before the House of Assembly, in the course of the session, which were advocated with more or less energy,—among these may be included the "Maine Liquor Law."

In the early part of this year active measures were taken towards establishing a line of Electric Telegraph between Europe and America. The deep interest which was felt in Nova Scotia in reference to the war against Russia, by England and France, were warmly manifested at various intervals of this year, by the loyal addresses of both branches of the Legislature, and other demonstrations, by the people of this province, called forth on special occasions. Throughout the year the number of shipwrecks have been unusually large.—The Eastern Chronicle of March 23 states—"Not a week has passed since the month of October that has not brought to our ears the news of some terrible disaster, a tale of suffering and distress, or the whole.

sale destruction of life, calculated to curdle the blood and chill the hearts of all those who have friends on the mighty deep." Numerous marine disasters also occurred in October and November of 1854.—During the summer of this year—while other places not far distant were visited by the Cholera, Nova Scotia happily enjoyed immunity from that pestilence. New Brunswick, Canada and the United States, not to allude to Europe, suffered fearfully from the epidemic. An early indication of winter was referred to in some of the Colonial and American Newspapers in which it was announced that a snow storm occurred as early as the 16th October, which extended through Canada East, Maine, New Hampshire, Vermont and the North of Massachusetts.

1854.—JANUARY 7.—Died at Halifax, Andrew Richardson Esq.—Aged 67 years. He held for sometime the office of Guager, in the Excise Department; was also an officer of high rank in the Militia, and took a prominent part on most public occasions. In affability, love of order, and benevolence he was unsurpassed; and no individual in the community was better known, and more highly respected.

7th.—The Acadian Recorder of this date contains a telegraphic despatch announcing the loss of the American packet ship Staffordshire, bound from Liverpool to Boston. She struck on Blonde Rock south of Seal Island, on the 29th Dec. 1853. Had on board 210 passengers. The capt. and 177 passengers were lost. The year 1853 was of unusual calamity on the sea. The New York Times published a list of 130 vessels lost during that year, involving the loss of 1924 lives.

14th.—Died at Goose River, Cumberland, Robert McGowan Dickey Esq. in his 70th year. During a long life of public and private usefulness, he represented the township of Amherst and county of Cumberland 15 years, and for 30 years occupied a place in the commission of the peace, besides various other situations.

22.—The Wesleyan chapel at Barrington was totally destroyed by fire, on the night of this date.

26.—The Legislative session was opened by the Lieut. Governor Sir John Gaspard Le Marchant. His Excellency in his speech, announced that the people have been blessed with rich abundance from a fertile soil, and a profitable commerce and fishery, "and in peace and health are permitted to enjoy them;" the railway bills, passed the previous session had received the Queen's assent; the successful results of the expenditure of the sum granted for the importation of improved breeds of cattle, and of the agricultural exhibition which took place during the preceding summer, and the highly satisfactory manner with which the Vice Admiral had directed the provincial vessels employed in the protection of the shore fisheries. The attention of the Legislature was also directed to an amendment of the Jury law, the supervision of the great roads, the protection of the river fisheries,

the savings bank, provision for holding an Industrial Exhibition, and to a reduction in the cost of marriage licenses.

27.—Three bills, viz. the elective Legislative Council bill, a bill for extending the Elective franchise, and the municipal corporation bill, were introduced by Hon Mr. Johnston, in the House of Assembly, and read a first time.

FEBRUARY 7.—Goreham College, at Liverpool, N. S. was totally destroyed by fire.

10.—Died at Arichat, Charles Fixott, Esq. M. D. Dr. Fixott was for some time a justice of the Peace for the county of Richmond.

11.—The house of John Phare, West River, Pictou, was destroyed by fire.

13.—Hon. Provincial Secretary submitted to the House of Assembly, a string of resolutions, expressing the expediency of commencing the construction of the Railway, (contemplated by the act of previous session entitled "An Act to authorise the construction of certain railways in this Province,") under the direction of a board of six commissioners.

18.—Died at St. John, N. B. Rev. Benjamin Gerrish Gray, D. D., aged 86 years. He began his labours in Nova Scotia, as a missionary at Preston, prior to the commencement of the present century, and had charge of the Maroons, about 440 of whom settled in that vicinity. He was afterwards appointed to the parish of Sackville, and subsequently to that of St. George, Halifax, in which he continued till 1825; when he removed to New Brunswick.

23.—Died at Halifax, David Rugg, Esq., aged 60 years. Mr. Rugg was a native of Scotland, and resided in Halifax about 30 years. He was for sometime a member of the City Council.

MARCH 7.—Died at Yarmouth, Rev. H. Harding, a veteran Baptist clergyman, aged 93 years. The deceased was universally beloved by the denomination to which he belonged, and respected by the community at large.

9.—The House of Assembly passed the third reading of the Railway Bills, founded on Hon. Joseph Howe's resolutions. Mr. Creelman introduced a measure for the establishment of a Normal School.

15.—Died at Margaret's Bay, Archibald McDonald Esq. aged 64 years. He was a justice of the peace, for the county of Halifax, and much esteemed as a kind, active and intelligent member of the community.

16.—The Provincial Secretary laid on the table of the House of Assembly despatches received from England. One of them contained the information that Messrs. Jackson & Co. had given up all intentions of constructing railroads through Nova Scotia.

24.—Died at North Shore, Wallace, Wm. Smyth, Esq. aged 61 years; a justice of the peace for the county of Cumberland.

28.—£47,000 was granted by the House of Assembly for the construction of St. Peter's Canal, in Cape Breton.

29.—A collision took place between the steamship Canada and the Boston and Halifax packet brig Belle, causing the loss of the latter vessel and the death of Mrs. Charles Keefer of Halifax, and the steward of the Belle.

30.—Hon. Wm. Young tendered his resignation as Speaker of the House of Assembly; which was accepted, and Stewart Campbell Esq. elected in his place. Several changes also made in the Executive Council, were gazetted on the 4th April. Hon. Jas. B. Uniacke resigned his office as Attorney General, and was succeeded by Hon. L. M. Wilkins; Hon. Alex. McDougald was succeeded in the office of Solicitor General by Hon. W. Henry.

APRIL 1.—A great rain storm occurred in Pictou county, which, with the melting of the snow, caused the destruction of several bridges, and injury to a large amount of private property. In the West River the water rose to an unusual height.

3.—His Excellency Sir J. Gaspard Le Marchant prorogued the Legislature. The speech refers approvingly to a great number of valuable laws, to "the unexampled liberality with which you have provided for the public service," to "the great public works which you have authorised the Government to construct," and to the loyal Addresses to her Majesty, in relation to the war with Russia. On several occasions during the session "the House of Assembly was overwhelmed, with confusion by discovering that there were no Reporters in the gallery."

4.—Hon. James B. Uniacke appointed commissioner of Crown Lands in place of John Spry Morris, Esq. Railway Commissioners were also appointed at this date.

13.—Died at Tatamagouche, Hon. Alexander Campbell, aged 61 years, member of the Legislative Council of this Province.

14.—News of the declaration of war against Russia by England and France received at Halifax, by first April packet.

23.—Four dwelling houses in the vicinity of the Gas works were totally consumed by fire, and several others considerably injured, on the morning of this date.

27.—The City Market House and stalls being completed, were let at public auction—the rents amounted to £205 10s. for the first year.

MAY 4.—The first advertisement issued by the Commissioners for tenders for work on the Railway.

20.—The house of William Bochan, Beach Hill, county of Sydney, was consumed by fire, and two of his children perished in the flames.

31.—Commissioners were appointed, under the Act to establish a Normal School.

JUNE 8.—The tenders for the first operations on the Railway were opened, and arrangements agreed upon to commence the work.

9.—Edward B. Sutherland, Esq., barrister, of Sydney C. B. was accidentally drowned in the Bay of Whycocomagh, by the swamping of a boat, in which were Judge DesBarres and a boatman,—who narrowly escaped a similar fate.

13.—The first sod of the railway track was turned. The Lieut. Governor, the members of the Railway Board and a number of citizens were on the spot to witness the beginning of that great undertaking; and during the day the work was actively pushed forward by about 100 labourers.

16.—There was a severe frost on the nights of the 16th and 17th June. Plants and trees were affected, and some damage done to gardens.

19.—Hon. Thomas D. Archibald appointed a member of the Legislative Council. Commissioners were also appointed for the construction of St. Peter's Canal, in the County of Richmond.

25.—Died at Walton, John Parker, Esq. aged 83 years. He was for sometime about the year 1824, a justice of the peace for the County of Hants.

27.—Died at Halifax, William Caldwell, Esq. aged 61 years. Mr. Caldwell was an active and valuable member of the community.—Was for a long period member and several years captain of the Union Engine Company, from which he retired in 1846, and for sometime an efficient member of the City Council as Alderman, and also as Mayor.

JULY 8.—The Prize Court was re-opened at Halifax, by Hon. Alex. Stewart, after a recess of forty years. On this date and the day following extensive fires were raging in various parts of the county of Pictou, which destroyed a considerable amount of property. On the road between River John and Tatamagouche the house of an aged woman named Shanahan was burnt, and the unfortunate owner perished in the flames.

22.—The house of Mr. Martin Teal, at Broad Cove, was destroyed by fire, with all his furniture.

30.—Died at Halifax, Richard Tremain, Esq. aged 80 years. Mr. Tremain was for many years a justice of the peace for the county of Halifax.

AUGUST 8.—A meeting was held at Temperance Hall, Halifax, at which the Lieut. Governor presided, for the purpose of hearing his Excellency's views in reference to the Industrial Exhibition announced for the ensuing Autumn.

20.—The services in the several churches in Halifax were interrupted by the occurrence of three fires, on the morning of this day (Sunday).—one in Maitland Street, another in Government House which partially destroyed the roof of that building, and the third in carpenter's shop in Lower Water Street.

SEPTEMBER 4.—Died at Halifax, Wm. Lloyd, a native of Chuna Wales, at the advanced age of 102 years and 6 months.

8.—Died at Falmouth, William H. Shey, Esq. aged 84 years. He was for many years a justice of the peace for the county of Hants and universally esteemed.

21.—Pursuant to the Lieut. Governor's Proclamation this day was observed as a day of thanksgiving to the Almighty for the exemption from the pestilence which had visited other countries.

23.—The garrison at Sydney was discontinued by the withdrawal of the detachment of 76th Regt. stationed at that place.

OCTOBER 4.—The Nova Scotia Industrial Exhibition was opened at Halifax in the Province Building. The day was observed as a general holiday, and was ushered in by the ringing of bells, and the firing of cannon. A procession, in which were represented the various fire companies, and different Masonic Lodges, the National Societies, the Odd Fellows, and Sons of Temperance, was formed on the Grand Parade, and marched through the city. A platform erected along the eastern front of the Province Building, was occupied by the Lieut. Governor, the Exhibition Committee, the Choir, and a large concourse of spectators. When the Procession reached the Province Building, the ceremony was commenced by the presentation of an Address to the Lieut. Governor, by his Lordship the Chief Justice, president of the Exhibition Committee; after his Excellency's reply, Rev. Dr. Forrester, vice President, read the Committee's Report, an Anthem was sung by a select Choir, (under the direction of Senor Caseres,) accompanied by an Amateur band, prayer was offered by the Lord Bishop of Nova Scotia, and the Exhibition was then declared by his Excellency the Lieut. Governor to be opened, which announcement was immediately followed by the National Anthem. The Exhibition was continued until the evening of the 14th. During which time the public were entertained outside the building with lectures and addresses at Temperance Hall, Fire Works, Regatta, Ploughing match, Cattle Show, sham fight, and the Museum of the Mechanic's Institute, the Horticultural Gardens and Merchant's Reading Room were opened for the accommodation of the public.

5.—Capt. Caleb Moody, Master of brig Zenophon, of Portland, was drowned near Canso, on the passage from Pictou to Philadelphia—He was married at Pictou the evening before he sailed.

9.—Barque Mary Sharp, of Gairlestown, Scotland, bound for Quebec, was driven by a gale on a reef off Woody Point, near Main-dieu and lost. The captain (W. Martin,) and six seamen were drowned.

10.—A boat containing seven persons was upset between Badduck and Red Head. and two of the passengers drowned.

13.—The 72d Highlanders sailed from Halifax, in steamer Alps for England.

25.—Died at Halifax, James Forman, Esq. aged 91 years. Mr. Forman was highly esteemed in the community. For many years he performed with fidelity the duties of Justice of the Peace, Commissioner of the Inferior Court, of the Poor's Asylum, and has filled other public offices in the county of Halifax.

28.—From this date to November 1, an unusual number of burglaries were committed in Halifax. The premises entered were those of Messrs Blaiklock & Peters, Williams, Bell & Anderson, Hon. A. Keith, David Allison, and William Lawson, much anxiety was felt in consequence of these depredations.

29.—Died at Yarmouth, Mr. Robert Robertson, at the extraordinary age of 104 years.

NOVEMBER 3.—Died at Arichat, Hector McDonald, Esq. merchant, aged 71 years; for sometime a justice of the peace for the County of Richmond.

9.—Died at Halifax, Hon. Henry H. Cogswell, aged 77 years. About the year 1816 Mr. Cogswell was a representative for the township of Halifax; he was subsequently a member of the Legislative Council, until the reorganization of that branch, when he retired with other members—retaining his rank by special permission. Mr. Cogswell was one of the founders of the Halifax Bank; and for over 30 years his name appeared at the head of the Roll of Nova Scotia Barristers.—Died at Halifax, Joseph Whidden, Esq. Barrister, aged 35 years; for sometime Clerk of the House of Assembly.—Sir Edmund W. Head, appointed to succeed Lord Elgin as Governor General, arrived at Quebec on the morning of this date.

10.—Died at Yarmouth, Hon. James Bond, ar. aged and respectable inhabitant.

26.—The American ship *Arcadia* with a crew of 24 men, and 147 German passengers, was wrecked on Sable Island. Crew and passengers escaped (by the exertions of the Island crew, with the life boat presented by Miss Dix) without saving any thing, some of them but half dressed, in a destitute condition.—The crew and emigrants were subsequently brought to Halifax, in the schooner *Daring*, and the sum of £200 and upwards granted by the Legislature for their relief.

29.—Schooner *George Henry*, Gardener, was wrecked in a gale on the night of this date, at Fish Point, near Liverpool, and all on board perished.

DECEMBER 2.—The Legislative Session was commenced, at this early period, pursuant to the Lieut. Governor's command. His Excellency's speech announced to the Legislature that a Treaty had been concluded between her Majesty and the Government of the United States; and laws necessary to its operation—passed by Congress, and by the Legislatures of Canada, New Brunswick and Prince Edward Island—with correspondence in relation thereto, were submitted, with the assurance, that should the Nova Scotia Legislature, concurring with the other colonial Legislatures, approve the provisions of the Treaty as adapted to promote the commercial, agricultural and general interests of the Province, his Excellency would concur in any measure calculated to give them effect here. He also announced a considerable increase in the revenue; a bountiful harvest; a partial success of the fisheries, and favorable indications of general prosperity. Allusion was made to the exemption of Nova Scotia from an epidemic that produced great mortality in our sister colonies; to the advancement of agriculture, the mechanic arts, and education; to the mines and minerals, and to the services of the Rear Admiral in the protection of the

fisheries. A Measure was recommended relating to improvements in the practice of the Courts of Common Law, and to changes in the law of evidence. The attention of the Legislature was also directed to reports relating to the great roads, and river fisheries, and to the war with Russia.

6.—A telegraphic despatch from the British Minister at Washington, was presented in the House of Assembly, stating that the United States Government had concluded to receive the products of Nova Scotia on the same terms as those of Canada and New Brunswick.

7.—The House of Assembly unanimously voted £2000 in aid of the Patriotic Fund, for the sustenance of the families of the soldiers engaged in the war.

13.—A fire occurred at Halifax, on board the schooner William, of Prospect, which partly consumed the vessel; the owner of the schooner, Samuel White, lost his life, having been suffocated.

14.—The Provincial Legislature adjourned over each Branch by its own motion, until January 27, 1855. "The work accomplished by this extra session has been the passage of a bill to give effect to the Reciprocity Treaty. A grant of £2000 sterling to the widows and orphans Fund of those left or who may be left, destitute by the Russian war. The passage of three resolutions, extending the power and discretion of the Railway Commissioners. 1st as to the point of junction of the two branches, and the constructing of roads, East and West; 2d, as to the amount of expenditure, allowing them to disburse in any year the balance of £200,000 unexpended the previous year; and 3d, to relieve them from doing work, in all cases, by tender and contract, if they should think it for the public advantage to do otherwise.

15.—A Gazette extraordinary was issued on this date, containing the Proclamation of his Excellency the Lieut. Governor, giving effect to the Treaty between her Majesty and the United States of America.

21.—Sir Edmund W. Head was sworn in as Governor General of Canada.

27.—The barrack stores at Halifax, in rear of the old Pavilion Barracks, were destroyed by fire.

HOLLOWAY'S OINTMENT AND PILLS.—Lacerations of the flesh, bruises and fractures, occasion comparatively little pain or inconvenience when regularly lubricated or dressed with Holloway's Ointment. In the nursery it is invaluable as a cooling application for the rashes, excoriations, and scabious sores to which children are liable, and mothers will find it the best preparation for alleviating the torture of a "broken breast." As a remedy for cutaneous diseases generally, as well as for ulcers, sores, boils, tumors, and all scrofulous eruptions, it is incomparably superior to every other external remedy. The Pills have a reputation for the cure of dyspepsia, liver complaints, and disorders of the bowels, co-extensive with the range of civilization.

EQUATION OF TIME.

ASTRONOMICAL SYMBOLS.

☉ Sun. Moon; ☾ First Quarter, ☾ Full Moon, ☾ Last Quarter. ● New Moon. ♀ Mercury. ♀ Venus. ⊕ Earth. ♂ Mars. ♄ Vesta. ♀ Pallas. ♃ Juno. ♅ Ceres. ♃ Jupiter. ♄ Saturn. ♃ Georgian. — ♄ Conjunction. □ Quadrature. ♄ Opposition, * Sextile. △ Trine. ♄ Ascending Node ♄ Descending Node. N. North. S. South. ° Degree. ' Minute. " Second.

SIGNS OF THE ZODIAC.—♈ Aries. ♉ Taurus. ♊ Gemini. ♋ Cancer. ♌ Leo. ♍ Virgo. ♎ Libra. ♏ Scorpio. ♐ Sagittarius. ♑ Capricornus. ♒ Aquarius. ♓ Pisces.

MORNING AND EVENING STARS.

♀ Venus will be a Morning Star until the 15th May; then an Evening Star the rest of the year.

♂ Mars will be an Evening Star until August 29th; and a Morning Star to the close of the year.

♃ Jupiter will be a Morning Star until February 14; then an Evening Star until 30th August; and then a Morning Star to the end of the year.

♄ Saturn will be a Morning Star until 23th February; an Evening Star to September 5th; then a Morning Star the rest of the year.

CHRONOLOGICAL CYCLES, &c.

Golden Number	- - 19	Dominical Letter	- - F
Epact	- - - 18	Roman Indiction	- - 4
Solar Cycle	- - - 22	Julian Period	- - 6574

The Year 5622 of the Jewish Era commences on September 5, 1861.

Ramadin (Month of Abstinence observed by the Turks) commences on March 13, 1861.

The Year 1278 of the Mahommedan Era commences on July 9, 1861.

EMBER DAYS.

February	20, 22, 23	September	18, 20, 21.
May	22, 24, 25	December	18, 20, 21.

ROGATION DAYS.—May 6, 7, 8.

ECLIPSES.

In the Year 1861 there will be three Eclipses of the Sun, one of the Moon; and a Transit of Mercury over the Sun's disc. Viz. :—

1.—An Annular Eclipse of the Sun, January 10, 1861—invisible in Nova Scotia.

2.—An Annular Eclipse of the Sun, July 7, 1861—invisible in Nova Scotia.

3.—A Partial Eclipse of the Moon, December 17, 1861—visible at Halifax, as follows :—

	H.	M.	
First contact with the Penumbra,	1	30	} A. M. Halifax Mean Time.
First contact with the Shadow,	3	13	
Middle of the Eclipse,	4	4	
Last contact with the Shadow,	4	55	
Last contact with the Penumbra,	6	38	

Magnitude of the Eclipse (Moon's diameter = 1) 0.185

4.—A Total Eclipse of the Sun, December 31, 1861—visible (as a partial one) at Halifax.

The Sun rises eclipsed. Eclipse ends at Halifax 9h. 55m morning.

There will be a Transit of Mercury over the Sun's disc, November 12, invisible in Nova Scotia.

EXPLANATION OF THE CALENDAR AND TABULAR PAGES.—The Time of the Moon's Southing, Phases, Rising and Setting, is Halifax Mean Time. The Sun's Rising and Setting are given in Halifax Apparent Time. The Equation of Time, Sun's Declination and Time of High Water are given in separate Tables, and referred to in the General Index.

Mean Obliquity of the Ecliptic—January 1, 1861. $23^{\circ} 27' 26''$

RANDOM READINGS.—Time flies fast, but every musician of any note can beat time.

THE NEW GORDIAN KNOT.—“What is your name, sir?”—“My name is Knott Martin, your Honour.”—“Well, what is it?”—“It is Knott Martin.”—“Not Martin again! We don't ask you what your name is *not*, but what it is. No contempt of court, sir.”—“If your Honour will give me leave, I'll spell my name.”—“Well spell it.”—“K n o double t, Knott, M a r Mar, t i n, Martin.”—“Oh, very well, Mr. Martin; we see through it now, but it is one of the most *knotty* cases we have had before us for some time.”

An impetuous volunteer, while practising the military science alone in his garden, tumbled backwards into a ditch. His wife hurried to his assistance, and implored him to say whether or not he was hurt. The reply was, "Go away, woman; what do you know about war?"

A DUTCHMAN'S ADVERTISEMENT.—Runned away, strayed away, or stolen away, mine pig plack horse, 16 hands and 6 inches hie; he vash plack all over his pody put his head, and dat vash plack too; he had four legs, and ven he walked and runned dey followed one after anoder. He had two plack ears upon his head, one yite, and one prown, and had no eye upon one side of his head, and could'nt see anything mit de oder. He had fine pig head vich he vore before him, and a long dale behint, vich I cut short de oder day, and it is now so long as it vase before; it always stays behint, except ven he walks packward, and den it comes in front. Any pody vat finds him and prings him to me pays me five dollars reward, and no questions axed.

A capital way to prevent the smell of cooking in a house, is to have nothing for breakfast, and warm it over for dinner and supper.

AN INQUIRING MIND.—Horace Walpole tells a story of a Lord Mayor of London in his time, who having heard that a friend had had the small-pox twice, and died of it, inquired if he died the first time or the second.

POLITICAL NATURAL HISTORY.—Clever Child: What's the difference, pa, between a Tory and a Conservative?—Savage Father: Precisely the same difference, my dear, that there is between a crocodile and an alligator—that's all.

TEXT AND TOILET.—“Mary, my love, do you remember the text this morning?”—*Mary*: No, pa, I never can remember the text, I’ve such a bad memory.—*Mother*: By the way, Mary, did you notice Susan Brown?—*Mary*: Oh, yes. What a fright! She had on her last year’s bonnet done up, a pea-green silk, a black lace mantilla, brown boots, an imitation Honiton collar, a lava bracelet, her old earrings, and such a fan! Oh my!—*Mother*: Well, my dear, your memory is certainly bad.

In what ship have the greatest number of men been wrecked?—Courtship.

During an examination, a medical student being asked the question, “When does mortification ensue?” replied, “When you pop the question and are answered No.”

THE UNIVERSAL LOVE.—The love that every one has for himself.

AN EYE TO BUSINESS.—An honest Norfolk farmer, who had seen "Richard the Third" performed one night, waited upon the manager next morning to say that if the gentleman who wanted a horse the previous evening, held his mind, he had got an abundance of cattle in his meadow, and should be happy to deal with him.

It is perhaps, after all, much better for a lady to redden her own cheeks, than to blacken other people's characters.

JUNE.

- New Moon, 9th day, 9th hour, 24 minutes, Morning.
 ☾ First Quarter, 15th day, 6th hour, 1 minute, Afternoon.
 ○ Full Moon, 22d day, 10th hour, 8 minutes, Morning.
 ☾ Last Quarter, 29th day, 10th hour, 26 minutes, Afternoon.

A WORD FOR CRINOLINE.—Sir Thomas Coxe finds nothing to abuse except his wife's crinoline and Mrs Longbow Miles's hoop. "If they have no other advantage," sneered Lady Coxe, "they keep the men at a proper distance; and that's a great blessing."—"To the men," growled Sir Thomas.—*A Lover's Quarrel.*

A DAY JOKE.—It was a regular pouring wet day at Cowes, and a drenched tar asked one of the watermen to lend him his tarpaulin coat. "I can't do that," said the latter; "but if you'll stand twopence I'll buy that which shall keep you dry all day."—"Done!" said Jack, handing out his coppers. "Here, missus," replied the wag, "give Jack two of those red herrings. If they won't keep him dry all day, I don't know what will."

JULY.

- ☉ New Moon, 7th day, 9th hour, 58 minutes, Afternoon.

THE SCHOOL FOR GOOD MANNERS.—As George III. was once walking the quarter-deck of a man-of-war, with his hat on, a sailor asked his messmate "who that fellow was who did not douse his peak to the Admiral?"—"Why, it's the King."—"Well, king or no king," retorted the other, "he's an unmannerly dog!"—"Why, where should he learn manners?" replied Jack; "he was never outside of land in his life."

An old lady, reading an account of a distinguished old lawyer who was said to be the father of the bar, exclaimed, "Poor man! he had a dreadful set of children."

Why are ladies like bells?—Because you can never find out their tone and temper until you have given them a ring.

What is the difference between a fisherman and a truant schoolboy?—One baits his hook and the other hates his book.

"O spare me, dear angel, one lock of your hair!"

A bashful young lover took courage and sighed.

"Twere a sin to refuse you so modest a prayer,

So take my whole wig," the sweet creature replied.

A PROBLEM FOR MILKMEN.—If 27 inches of snow give 8 inches of water, how much milk will a cow give when fed upon turnips? Multiply the flukes by the hairs on the cow's tail, then divide the product by a turnip, add a pound of chalk, multiply the whole by the pump, and the total will be the answer.

A RANDOM THOUGHT.—It is vain to stick your finger in the water, and pulling it out, look for a hole; and equally vain to suppose that, however large a space you occupy, the world will miss you when you die.

A vender of cement, describing its action, said it was particularly useful in mending jars. A purchaser asked him if it would mend the jar of a door, "There's no occasion for its use in that case," said the vender, "for that is generally sound enough."

A merchant, not remarkably conversant with geography, picked up a newspaper and sat down to read. He had not proceeded far before he came to a passage stating that one of his vessels was in jeopardy. "Jeopardy! Jeopardy!" said the astonished merchant, who had previously heard that his vessel was lost; "let me see, that is somewhere in the Mediterranean. Well, I am glad she has got into port, as I thought it was all over with her."

An umbrella has been manufactured called the "lending umbrella." It is made of brown paper and willow twigs, intended exclusively to accommodate a friend.

What ship's boat ought to contain a happy crew?—A jolly boat.

"A Domestic Recipe.—To cure scandal.—Take of good nature one ounce; of the herb, 'Mind your own Business,' one ounce—mix these with a little charity for others—and two or three sprigs of 'Keep your tongue between your teeth.'"

"Taking them one with another," said the Rev. Sydney Smith, "I believe my congregation to be most exemplary observers of the religious ordinances; for the poor keep all the fasts, and the rich all the feasts."

A lady asked her doctor if he did not think the small bonnets the ladies wore had a tendency to produce congestion of the brain. "Oh, no," replied the doctor, "women who have brains don't wear them."

DECEMBER.

- New Moon, 1st day, 10th hour, 2 minutes, Afternoon.
 D First Quarter, 8th day, 10th hour, 55 minutes, Afternoon.

MARRIAGE MADE EASY.—An old Dutch farmer in America, just arrived at the dignity of justice of the peace, had his first marriage case. He did it up in this way. He first said to the man: "Vell, you wants to be marrit, to you? Vell, you lovesh dis woman so goot as any woman you have ever seen?"—"Yes," answered the man. Then to the woman: "Vell, do you love this man so better as any man you have ever seen?" She hesitated a little, and he repeated: "Vell, vell, do you like him so vell as to be his vife?"—"Yes, yes," she answered. "Vell, dat ish all any reasonable man can expect. So you are marrit; I pronounce you man and vife." The man asked the justice what was to pay? "Noting at all—neting at all; you are velcome to it if it vill to you any good."

THE TIDES.

The time of the Moon's Southing is also the time of High Water at Parrsboro', Windsor, Horton, Cornwallis, Hantsport and Truro.

High Water at Pugwash, Wallace and Yarmouth, 2 hours later than at Halifax; Beaver River and Clementsport, 3 hours later. At Pictou 1 hour earlier; Sydney, C. B. and Port Hood, 1 hour later, and Annapolis 2½ hours later than at Halifax.

MEAN TIME OF HIGH WATER AT HALIFAX.

USEFUL AND INSTRUCTIVE — A man can no more believe with another man's faith, than he can satisfy his hunger by seeing another man eat.

Cocoa has the wonderful power of sustaining muscular strength in the absence of food, and of preventing the wasting of the tissues of the body during the greatest and most prolonged exertion.

ALLSPICE A SUBSTITUTE FOR TOBACCO—Any person who knows anything of the fragrance of a Pimento walk when in full blow may form some idea of it by a pipe charged and lighted with the dried berry, simply crushed in coarse bits. It cannot be well smoked in short pipes, but with the long cherry stick of a meershaum it affords a treat beyond anything known in the use of tobacco. The coolies and native labourers are bringing Pimento into use in the place of tobacco.

FLEAS IN DOGS—One of the best remedies to destroy the vermin in dogs is to rub colza oil into the coat, and to saturate the hair with the oil to the surface of the skin. Let it remain on for a quarter of an hour or twenty minutes, and then wash out the oil with soap and warm water. A small portion of any oil brushed into the coat of a woolly dog will prevent its being infected with vermin.

IMMEDIATE REMEDY FOR POISON.—If a person swallows a poison, deliberately, or by chance, instead of breaking out into multitudinous and incoherent exclamations, despatch some one for a doctor; meanwhile run to the kitchen, get half a glass of water in anything that is handy, put into it a teaspoonful of salt and as much ground mustard, stir it in an instant, catch a firm hold of the person's nose, the mouth will soon fly open, then down with the mixture, and in a second or two up will come the poison. This will answer in a larger number of cases than any other. If by this time the physician has not arrived, make the patient swallow the white of an egg, followed by a cup of strong coffee (because these nullify a greater number of poisons than any other accessible articles,) as antidotes for poison remaining in the stomach. — *Journal of Health.*

RELIGION IN THE COUNTING HOUSE—If you wish to test the qualities of a man's religion, do not follow him to church where he must put on the garment of pious observance, but visit him at his shop or counting-house, and mark the spirit by which he is influenced in his dealings with his fellow-man. If he regards merely his own interests, and, in securing his own, invades the rights of his neighbour, it would be small uncharitableness to pronounce that man no true follower of Him who

said, "As you would that men should do to you, do ye even so to them." Professors of religion sometimes seem to think their religion too pure a thing to be brought down into the sphere of trade; but a man's religion is not worthy of the name, if it is not able to stand the ordeal of his business—if it does not accompany him in his daily avocations, and lead him to sacrifice his lust of gain whenever it would prompt him to do what would injure his fellow-man.—ADAM BLACK.

"HEALING ON ITS WINGS," say all who have made use of *Dr Wistar's Balsam of Wild Cherry*, and by such use cured themselves of coughs, colds and consumption. The prudent will always keep this remedy by them.

BRONZING SKINS OR LEATHER.—Take one pound each of logwood and sanders, boil them in a gallon of water for one hour, then add an ounce of alum. The clear liquor colours the skins. Apply it with a sponge.

NEW SCARLET DYE.—It has been said that those nocturnal tormentors which infest bedding in many localities, have but one use, "to teach mankind humility." A chemist at Melbourne, however, has discovered that they may be as usefully employed as the cochineal insect itself in producing a scarlet dye, specimens of which have been exhibited.

TO REMOVE MILDEW FROM LINEN.—The following recipe will no doubt be acceptable to many:—To every four ounces of chloride of lime add two quarts of boiling water, and shortly afterwards six quarts of cold water; then steep the linen in this water for twelve hours,—when every spot of mildew will be removed, and also all unpleasantness.

HAIR OF CHILDREN.—It is a great mistake to plait the hair of children under eleven or twelve years of age; the process of plaiting more or less strains the hairs in their roots by pulling them tight, and tends to deprive them of their requisite supply of nutriment, and consequently checks their growth. The hair of girls should be cut rather short, and allowed to curl freely; when they are about eleven or twelve, the hair should be twisted into a coil not too tight nor tied at the end with thin thread, but with a piece of ribbon.

THE POWER OF MEDICINE OVER DISEASE.—We know of no better illustration of this fact than the wonderful effects of the *Oxygenated Bitters* in eradicating from the system Dyspepsia, and all functional diseases of the stomach, as well as restoring impaired digestion.

TO PICKLE SALMON.—Take a fine salmon, split it down the back, and then cut it into square pieces. Put into an unglazed pan a layer of salmon and a layer of salt alternately, until the pan is nearly filled; then fill it up with vinegar, and tie it down closely with brown paper. Put the pan into a saucepan of boiling water up to its rim, and let it boil for twenty minutes. In three days the salmon will be ready for use.

REMEDY FOR SMALLPOX.—It ought to be generally known that the pure Bitartrate of Potash (Cream of Tartar) is an infallible antidote to the variolous fever. The discovery of this important fact was first made about thirty years ago by the late Mr T Rose, of Dorking, who, in a petition presented to the House of Commons in March 1836, stated that he had successfully tested the efficacy of the remedy in more than three

thousand cases of small pox. With this simple medicinal agent, in combination with rhubarb as an adjunct, and a refrigerant mode of treatment, Mr Rose achieved such a triumph over this hitherto fatal disease, as to reduce the death-rate to a single exceptional case.

THE FARMER'S MANUAL.

FOOD FOR CATTLE.—The compound I used for fattening beasts and keeping sheep in a growing and healthy state during the winter months has been one part beans or peas (old if possible), one of linseed, which I prefer to oilcake as it contains all the oil, one barley, and one wheat, all mixed and ground up together. This combination I believe to be equal to any artificial preparation now sold at four times the value, particularly if a small quantity of some warm seed be mixed with it to aid digestion. We have here gluten for flesh, starch for fat, and pure oil for burning in the lungs to keep up the animal heat. Judging from the effects, I think this compound to be more valuable than oilcake, and without the adulteration. It is given dry with cut turnips to the fattening beasts, to be moistened by the saliva. This I consider tends to a more perfect digestion than if mixed with warm water, and at the same time it may be said that as the animal chews the cud there can be no want of saliva. The quantity given to sheep has been at the rate of half a bushel to 100 sheep, merely sprinkled over the turnips as a condiment and corrective, as we use pepper for our turnips; little enough certainly, still it has the desired effect. I feel certain that nothing is gained by stinting sheep in winter; where we gain one by saving in food, we lose doubly through leanness and want of vigour in spring. I have no scouring.—*Agricultural Gazette.*

TO PREVENT SNAILS AND WORMS CRAWLING UP TREES.—Form a paste with train oil and soot, and lay it on in a circle round the tree, a few inches above the ground, and it will form a barrier over which snails or worms will not pass. If lettuce and strawberry beds are surrounded by a slate or board edging, made to stand five inches above the ground, and occasionally coated with a paste made of train oil and soot, it will form a barrier over which snails will not pass.

IMPORTANT TO GARDENERS.—A gardener having occasion to newly paint the wood-work in the interior of his greenhouse, determined to make trial of the theory of the absorption of heat by black colour, with the view of promoting the maturity of his plants and shrubs by means of a greater quantity of caloric. In the preparation of the black paint he used coal tar, that is to say, tar produced by the distillation of coal in the manufacture of gas. This coal tar, besides the advantage of its colour, offers considerable economy in painting, being about one-eighth of the price of the material generally used in mixing black paint. The painting here in question was executed before the setting in of winter. On the return of spring the gardener observed, with no less surprise than satisfaction, that the spiders and other insects which had infested his greenhouse had totally disappeared. He, moreover, remarked that a vine, trained on an espalier which, for the space of two years, had been sensa-

bly decaying; and which he had purposed to uproot for the purpose of planting another in its place, had acquired such renewed health and vigour as to be capable of producing excellent table grapes. Having applied his new paint to the props, treillages, and espaliers of all his sickly trees and shrubs, as well as those which, though in full bloom, were being devoured by insects, success again crowned his experiment. Caterpillars and snails disappeared as rapidly as the insects had vanished from the greenhouse. The fruits produced by the trees thus treated have elicited the approval and eulogy of purchasers. Similar experiments tried on the vineyards of the Gironde have, it is said, been attended by the same excellent results.

ROUP IN POULTRY.—The following is one of the best Recipes for Roup in Poultry :—Take of coarse and fine sharps half and half, or equal parts, and mix one tea spoonful of Cayenne pepper to a basinful of the above, when all the fowls can get it together without being at the trouble of feeding them by hand at night one by one. It is the best remedy ever found out; it has never been known to fail, and in cold weather it will always keep them warm and healthy, and will never do them harm.

TO MARK FRUIT, PEACHES, APPLES, &c.—If you have any nectarines, apricots, or similar fruit, that you wish to identify, the sun will do it for you with its usual photographic truth. Thus while the fruit is green affix to each fruit an adhesive label of black paper, out of which is cut an initial or trade mark, and where the paper is fixed the colour of the fruit will remain of a pale green, but where the sun can shine through the parts cut out, the fruit will become of its usual blushing ripe tint.

TO PRESERVE FRUIT FRESH FOR WINTER USE.—In addition to what appeared in our last number, we give the following method of preserving fruit without sugar, from a correspondent, who says it has been tested for two years, and with complete success :—Put the fruit in bottles, fill them up with cold spring water, tie down with bladder tightly; put them in a kettle, or copper, of cold water to the neck of the bottles, with hay to steady them; let them simmer for a quarter of an hour, but not boil; let them cool in the water; wipe the bottles, and put away in a dry place. On no account open them till their contents are wanted for use.

A HINT TO FARMERS.—A farmer in the neighborhood of Lyons, recommends a plan for saving the ricks of corn and hay from the ravages of rats and mice, and which he says he has practised with success for several years. It consists in placing in different parts of the ricks the stalks of wild mint, which is a violent poison for those vermin.

R. R. S.—REDDING'S RUSSIA SALVE—A Triumph of Medical Science unsailing.—The sale of Russia Salve which has now been before the public for 50 years, proved it to be the best and surest remedy for all diseases and eruptions of the skin. Also for Frost-bites, Chilblains, Sore eyes, hands and ears, Rheumatism, cuts, scalds, burns, &c. No family especially during winter, when falls and bruises are numerous, should be without a box. Sold everywhere for 25 cents a box; see advertisement p. 45.

THE WEATHER.—When you wish to know what the weather is to be, go out and select the smallest cloud you see; keep your eye upon it, and if it decreases and disappears, it shows a state of the air which will

be sure to be followed by fair weather; but if it increases in size, falling weather will not be far off; the reason is this, when the air is becoming charged with electricity, you will see every cloud attracting all less ones toward it until it gathers into a shower. And on the contrary, when the fluid is passing off or diffusing itself, even a large cloud will be seen breaking to pieces and dissolving.

MULCHING WHEAT.—Dr. C. Harlan of Wilmington, Del., advocates mulching wheat. One way of doing this is to sow buckwheat with the wheat in the fall. He says the buckwheat "will often grow 2 feet high before the frost kills it. It will catch the driving snows, and prevent the winds from sweeping the earth away from the tender roots. It will prevent the frosts from throwing out the crop; and when Spring returns, it will rot down, and assist to nourish the young plant when it most needs it. This application of buckwheat, is not an untried experiment. It was followed, and strongly recommended, nearly 20 years ago, by Jas. Gaskins, who published a valuable little work in defence of this practice."

CHANGE OF SEED.—The Irish Farmer's Gazette says that "barley seed requires to be frequently changed; and if this be neglected the result will be a deterioration in the quality, which, of course, lessens the value. In an article on the culture of flax the editor of the Irish Agricultural Review says, that a change of seed has proved "decidedly beneficial." A correspondent of the Country Gentleman recently stated that he had found a change of oats so important that he now imports his seed triennially from Prince Edward's Island and Canada.

KITCHEN ODOURS.—A skillful housekeeper informs us that the unpleasant odours arising from boiling ham, cabbages, &c., is completely corrected by throwing whole red peppers into the pot; at the same time the flavour of the food is improved. We have heard that pieces of charcoal will produce the same effect, but we have not seen it tried.

ACADIA DRUG STORE.

J. UHLMAN, 76 Duke Street, Halifax,

DEALER IN AND IMPORTER OF
English, American and German Drugs, Medicines,
and Chemicals, Perfumery,

PAINTS, OILS, DYE-STUFFS, GLASS, BRUSHES,
Fancy and Toilet Articles, &c. &c.

ALSO, THE MOST COMPLETE ASSORTMENT OF
POPULAR PATENT MEDICINES.

Medicine Chests and Prescriptions carefully put up.

Cali at Furniture Hall

If you want Cheap Bedsteads, Chairs, Tables, Sofas, Mahogany and Painted Bureaus, Washstands, Cradles, Mattresses, Feather Beds, Looking Glasses, &c. &c. and every description of CABINET FURNITURE, at the lowest prices for cash.

W. E. HEFFERNAN,
Furniture Hall—Near Market Square.

INTERNATIONAL LIFE ASSURANCE SOCIETY, OF LONDON.

Local Directors at Halifax,

THOMAS C. KINNEN, Esq., *Chairman.*

HENRY PRYOR, Esq.

J. G. A. CREIGHTON, Esq.

P. C. HILL, Esq., *Agent.*

This Society which has been now doing business in Nova Scotia for upwards of *twenty years*, and during that period has paid numerous policies with promptness and liberality, continues to effect insurances on lives on as favorable terms as any other English Company.

Policies are issued and Losses paid by the Local Board without reference to London.

Only half the premiums need be paid in cash, interest being paid on the other half.

P. C. HILL,

*Agent at Halifax, for Nova Scotia.
Halifax Bank Building.*

November, 1860.

Dr. Wistar's Balsam of Wild Cherry,
 Is justly celebrated for its great power over all diseases of the THROAT,
 CHEST and LUNGS, COUGHS, COLDS, HOARSENESS, BRONCHITIS,
 CROUP, WHOOPING COUGH, QUINSY, ASTHMA, even INCIPIENT
 CONSUMPTION itself yield to its influence when most other remedies fail.

Highly Respectable Authority.

CITY OF CHARLOTTETOWN,
 PRINCE EDWARD ISLAND

I do hereby certify that my mother, the late Ann Macgowan, during the last few years of her life, was in the continual habit of using DR. WISTAR'S BALSAM OF WILD CHERRY, and that she frequently expressed her high opinion at the benefit she derived in the promotion of her general health. She died in the 92d year of her age

Dated at the City Hall, this 21st day of June, 1860.

PETER MACGOWAN, J. P. and City Clerk.

To SETH W. FOWLE & Co., Boston.

The following **Certificate from a respectable Lady of Halifax,** exhibits the remarkable virtue of this renowned Lung Remedy:

HALIFAX, N. S., June 16, 1860.

Messrs. S. W. FOWLE & Co., Boston.

Being requested by your Agent to state the benefit I have derived from the use of Dr. WISTAR'S BALSAM OF WILD CHERRY, I have no hesitancy in saying that I have found it to give great relief of rough and pulmonary disease, of which I was some twelve years since so sorely afflicted as to be considered beyond recovery. I therefore take occasion to say that I consider it to be a valuable remedy for coughs and consumptive complaints. Yours respectfully,

MRS. J. WEST.

DYSPEPSIA.

This obstinate disease seldom fails to succumb to the
OXYGENATED BITTERS,
 a medium, the formula of which is based upon principles entirely new in pharmaceutical preparations.

DYSPEPSIA, INDIGESTION, WATER BRUSH, SOUR STOMACH, DEBILITY, BILIOUSNESS, LIVER COMPLAINT, and other like diseases are generally mitigated by the first dose, and entirely cured by a short perseverance in the use of this remarkable preparation.

From Mr. JOHN D. NASH,

Well known throughout the British Provinces as an extensive Auctioneer.

HALIFAX, N. S., June 16, 1860.

Messrs. SETH W. FOWLE & Co., Boston, Mass.

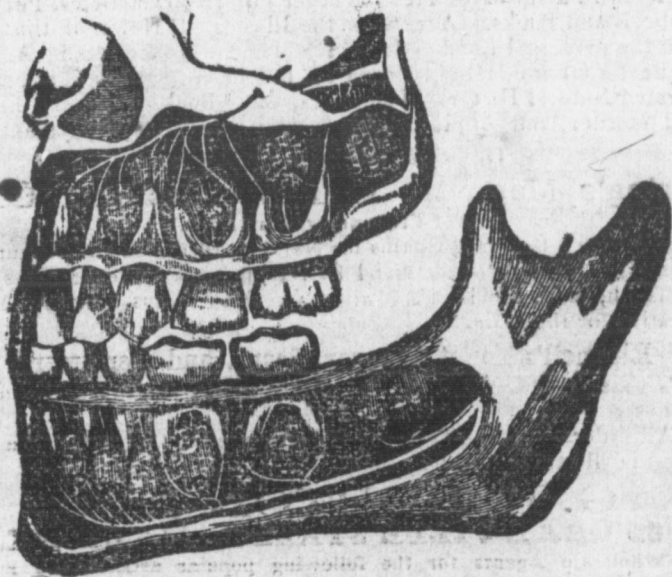

Gentlemen:—Having a very high estimation of the value of the OXYGENATED BITTERS, for dyspepsia and debility of the digestive organs, I take pleasure in giving you a statement of their operation in my own case. Several years since I was severely afflicted with a most aggravating form of DYSPEPSIA, which rendered my ordinary duties a burden. I tried many remedies with no benefit, until I made use of the OXYGENATED BITTERS, and I can say with the utmost confidence that this REMEDY ENTIRELY ERADICATED EVERY SYMPTOM of which I was suffering, by the continued use of eight bottles, although the first bottle produced a decided change for the better. I consider this remedy to be of inestimable value to those whose stomachs have become deranged by the use of intoxicating liquors or by high living. I now keep them by me, and find their use to be a great promoter of good health.

Yours respectfully,

JOHN D. NASH.

The trade supplied by MORTON & COGSWELL, and G. E. MORTON & Co., Halifax. Retailed by Druggists generally.

ANNOUNCEMENT 1861.
(SIGN OF THE GOLDEN TOOTH.)
ARTIFICIAL TEETH!

THE Subscribers returning thanks for past patronage, beg to state that having increased their appliances for the manufacture and insertion of Artificial Teeth, and introduced several improvements into their practice, respectfully call attention to the following styles of Teeth:—

MINERAL BLOCK TEETH.

SINGLE GUM TEETH.

PLAIN PORCELAIN TEETH.

VULCANIZED RUBBER BASE.

Teeth regulated, Cleansed, Extracted (with new and superior Instruments). Teeth filled with Gold Cement, or the new Osteoplastic Filling.

N. B.—The prices for a set of Teeth, range from \$16 to \$75, according to quality. Any number from one to a full set can be inserted.

MACALLASTER & PAINE.

49 Granville Street, Halifax.

G. E. MORTON & CO.,

MORTON'S MEDICAL WAREHOUSE, HALIFAX, N. S.

ESTABLISHED 1842.

Dealers in Patent Medicines and other Proprietary articles, Perfumery, Periodicals and Books. Agents for the Illustrated News of the World, and all the principal London Journals, Magazines, &c. Sole Agents in Nova Scotia for the Halifax Cheap Publications, Cassell's Family Paper, Illustrated Natural History Handbooks, &c. Books of every kind imported to order, and supplied at the London prices, on prepayment of cost.

G. E. M. & Co., are Agents for

Herring's Magnetic Hair Brushes and Combs,

For Preventing Gray Hair,

Pulmermacher's Galvanic Chains for Nervous affections and Rheumatism, Mintons SHEET WAX for artificial flowers, Burnett's preparations for the Hair, Teeth, &c., Rowland's MACASSAR OIL, Delusan's and Mason's Restorative for the Hair,

Rimmell's Toilet Vinegar, Soaps, and Perfumery,

Smith's Essence of Coffee, and the principal English and American Patent Remedies.

All orders from the Country receive prompt attention, and a liberal discount is allowed to Dealers.

G. E. MORTON & CO.

39 GRANVILLE STREET, HALIFAX.

Are Wholesale Agents for the following popular articles and approved Remedies viz:

- Blodgett's Persian Balm, for Toilet purposes.
- Brown's Bronchial Troches, for Coughs and Colds.
- Bryan's Camomile Pills, for Indigestion.
- Rorwick's Baking Powder, and Infant's food.
- Euchan's Hungarian Balsam of Life, for Lung Complaints.
- Bush's Argentine Hair Dye and Brushes.
- Cleaver's Prize Medal Honey Soap and Perfumery.
- Clarke's Peruvian Syrup of Iron, for Dyspepsia.
- Delusan's Restorative and Pomade for the Hair.
- Durno's Mountain Liniment for Chronic Rheumatism.
- Dr. Green's Boston Remedies, Heart Corrector, &c.
- Dyer's Healing Embrocation, or Pain Curer.
- Duryea's Maizena, or Corn Flour, for Invalids.
- Fellowes' Worm Lozenges and Speedy Relief.
- Gillie's Dandelion Coffee, for Dyspeptic Patients.
- Gardner's Pulmonary Balsam of Liverwort and Horehound.
- Laforme's Pabulum Vitæ, for Consumption.
- Mason's Alpine Balm, for Restoring and Preserving the Hair.
- Merchant's Gargling Oil, for Lameness in Horses.
- Morse's Indian Root Pills.
- Norwood's Veratrum Viride, for Heart Complaints.
- Rimmell's Toilet Vinegar, superior to Eau de Cologne.
- Sanford's Invigorator and Liver Remedy.
- Stone's Cough Elixir and Liquid Cathartic.
- Smith's Essence of Coffee, for instantaneous use.
- Whitecomb's Celebrated Remedy for Asthma.
- Whitar's Balsam of Wild Cherry, for Coughs, &c.

G. E. M. & Co. supply at their News Agency all the London Journals and Magazines at Publishers prices on receipt of the subscription in advance.

PROVINCE OF NOVA SCOTIA.

R. R. S.
REDDING'S RUSSIA SALVE,
VEGETABLE OINTMENT.

NO HOUSE
 SHOULD BE
 Without a Box,
 IN CASE OF
 Accidents and Skin Complaints.

AT HOME OR ABROAD,
 On Land or Sea,
 IN ALL CLIMATES AND TO
 PERSONS OF ALL OCCUPATIONS
 IT IS INDISPENSABLE.

THIS important DOMESTIC REMEDY, which has been before the public for more than half a century, has now become indispensable in every *Household and Farm*, especially in the Rural Districts. Composed of purely vegetable ingredients, it contains nothing noxious, and suits the tenderest skin. Its great peculiarity is that it penetrates to the seat of the disease and at once abates inflammation and eases pain. No bad humors can resist it. By assisting nature in her operations it cures with magical celerity the worst cases of BURNS, SCALDS, FLESH WOUNDS, OLD SORES, BRUISES, STIFF AND SWELLED JOINTS, &c. and by a special action on the skin, speedily gets rid of every eruptive disease, however obstinate or contagious.

Mothers, and all who have the care of Children will find it invaluable in the nursery. Sore Lips, Hands, or Eyes, Nipples, Chapped Hands, Chilblains, Frost Bites, &c., all yield to it. It removes Freckles, Tan and Chafing. There is no better cosmetic for the Toilet as it keeps the skin soft and the pores open. In agricultural districts it has earned the title of

THE FARMER'S FRIEND!

As it is a certain cure for Lameness, Sore Udders, Swelled Joints, Bites, Wounds, &c., in Horses, Cattle, and Dogs. In fact it is the Ointment now UNIVERSALLY used at home or abroad.

For sale by all respectable Druggists and Dealers in Patent Medicines throughout the civilized world at the following prices—25 cents, 50 cents, and \$1 per box.

REDDING & CO., Proprietors, 8 and 10 State Street, Boston.
BARNES & PARK, Wholesale Agents, 13 and 15 Park Row, New York.

For sale in Halifax by Geo. E. Morton & Co., Morton & Cogswell, Avery Brown & Co., Thos. Durney, and H. A. Taylor.

HEALTH AND ITS PLEASURES, OR DISEASE WITH ITS AGONIES: CHOOSE BETWEEN THEM.

HOLLOWAY'S PILLS.

NERVOUS DISORDERS.

What is more fearful than a breaking down of the nervous system? To be excitable or nervous in a small degree is most distressing, for where can a remedy be found? There is one:—drink but little wine, beer, or spirits, or far better, none; take no coffee,—weak tea being preferable; get all the fresh air you can, take three or four Pills every night; eat plenty of solids, avoiding the use of slops; and if these golden rules are followed, you will be happy in mind and strong in body, and forget you have any nerves.

MOTHERS AND DAUGHTERS.

If there is one thing more than another for which these Pills are so famous it is their purifying properties, especially their power of cleansing the blood from all impurities, and removing dangerous and suspended secretions. Universally adopted as the one grand remedy for female complaints, they never fail, never weaken the system, and always bring about what is required.

SICK HEADACHES AND WANT OF APPETITE.

These feelings which so sadden us, most frequently arise from annoyances or trouble, from obstructed perspiration, or from eating and drinking what is unfit for us, thus disordering the liver and stomach. These organs must be regulated if you wish to be well. The Pills, if taken according to the printed instructions will quickly restore a healthy action to both liver and stomach, whence follow as a natural consequence, a good appetite and a clear head. In the East and West Indies scarcely any other medicine is ever used for these disorders.

DISORDERS OF THE KIDNEYS.

In all diseases affecting these organs, whether they secrete too much or too little water; or whether they be afflicted with stone or gravel, or with aches and pains settled in the loins over the regions of the kidneys, these Pills should be taken according to the printed directions, and the Ointment should be well rubbed into the small of the back at bed time. This treatment will give almost immediate relief when all other means have failed.

*Sold at the Manufactory of Professor HOLLOWAY, 80 Maiden Lane, New York, and by all respectable Druggists and Dealers in Medicine, throughout the civilized world, in boxes at 25 cents, 62 cents and \$1 each.

There is considerable saving by taking the larger sizes.

N. B.—Directions for the guidance of patients in every disorder are affixed to each box.

MARK THESE FACTS!

THE TESTIMONY OF THE WHOLE WORLD.

HOLLOWAY'S OINTMENT.

Bad Legs, Bad Breasts, Sores and Ulcers

All descriptions of sores are remediable by the proper and diligent use of this inestimable preparation. To attempt to cure bad legs by plastering the edges of the wound together is a folly; for should the skin unite, a boggy diseased condition remains underneath to break out with tenfold fury in a few days. The only rational and successful treatment as indicated by nature, is to reduce the inflammation in and about the wound and to soothe the neighboring parts by rubbing in plenty of the Ointment as salt is forced into meat.

Diphtheria, Ulcerated Sore Throat, and Scarlet and other Fevers.

Any of the above diseases may be cured by well rubbing the Ointment three times a day into the chest, throat and neck of the patient; it will soon penetrate, and give immediate relief.

Piles, Fistulas, Strictures.

The above class of complaints will be removed by nightly fomenting the parts with warm water, and then by most effectually rubbing in the Ointment. Persons suffering from these direful complaints should lose not a moment in arresting their progress. It should be understood that it is not sufficient merely to smear the Ointment on the affected parts, but it must be well rubbed in for some considerable time two or three times a day, that it may be taken into the system; whence it will remove any hidden sore or wound as effectually as though palpable to the eye.

Dropsical Swellings, Paralysis and Stiff Joints.

Although the above complaints differ widely in their origin and nature, yet they all require local treatment. Many of the worst cases, of such diseases, will yield in a comparatively short space of time when this Ointment is diligently rubbed into the parts affected, even after every other means have failed. In all serious maladies the Pills should be taken according to the printed directions accompanying each box.

CAUTION!—None are genuine unless the words "HOLLOWAY, NEW-YORK AND LONDON," are discernible as a *Water-mark* in every leaf of the book of directions around each pot or box; the same may be plainly seen by holding the leaf to the light. A handsome reward will be given to any one rendering such information as may lead to the detection of any party or parties counterfeiting the medicines or vending the same, knowing them to be spurious.

*Sold at the Manufactory of Professor HOLLOWAY, 80 Maiden Lane, New York, and by all respectable Druggists and Dealers in Medicine throughout the civilized world, in pots, at 25c., 50c. and \$1 each.
