A BOUT THE POOR HOUSE. OBBTAIN BULES HAD TO BE MADE

ne of Which was to Protect the Women-Gertain Vistors Wasted to see Them-Dis Clorgy and Other People Annious for the Moral Wellare of the Jamaides.

Those people who know the sunny h ture of Superintendent Woods, of the ms house, could hardly believe the story at he had ill treated or ill used one of

The inmate in question was Alec Mo-Denald, a poor unfortunate in so far as the shape of his legs are concerned. Every-me, who, has been around town for any the the sound man in question and the deformity which makes him an object of sympathy and a butt, it must be confi hearted yonngsters who the are always looking for son athing out of the ordinary to comment upon. No doubt it was these same bad boys who gave Alec the nick name of "Alec the Moose" though, where the comparison comes is not so apparent unless it is in the

shape of his legs. But in spite of this deformity Alex is a able bodied fellow, strong in chest and arms and, as it has been proved since, of not the most amiable disposition. For years he has existed rather than lived and finally he was sent to the alms house to be cared for at the expense of the county.

He always gave the superintendent deal of trouble but he kept fairly quiet when he was around the house. Some time ago he took advantage of his absence and nearly frightened the women folk out of their wits by his extraordinary actions and language. Her tongue seemed to be especially directed against Mrs. Cunning ham the matron, and, while of course his threat and accusations might well pass unheaded yet language so vile as he used would not be listened to in any institution. He got a severe warning when Mr. Woods raturn. ed and that seemed to quiet him for a time. Then again when Mr. Wood was absent he took a dislike to the old man who keeps the fire in the furance going and he gave him such a thumping that the poor old fellow had to go to bed. This was the straw that broke Mr. Woods back and Alec was sent adrift.

But where was he to go. He got a lodging at the Seaman's Mission, and the next day he was sent back to the Alms house again tor three months by the magistrate. This places the authorities of that institution in a curious position. They have an unruly character there that they have no power to control and yet they have got to take him. There should be workhouse for such as Alec.

Incidentally, in connection with the story, the regulation respecting admittance to the institution was brought up and the restriction respecting visitors condemned. There is another side to this story and perhaps it had better be told.

Some restriction in regard to visitor seem to be very necessary and the reasons that led to the adoption of the present rule requiring a visiting permit from a comar will occur to most sensible people as wise and proper.

It is well known that among the inmates

ners were to meet that very ternoon and he could go before them and make his request. He was a sharp fellow his wife got all of his wages.

make his request. He was a shap that and didn't show up at the meeting. If another reason was needed to keep out visitors without a permut perhaps the fact that a few young men had a habit of visiting their sweethearts while there would, be sufficient. No doubt it appears strange that there should be any love-making under such circumstances and parhaps the officials thought it was out of place too for

the commit

it was stopped. And the ministers—what about them? have her own house. He hud not seen her What led to the regulation respecting the vinits of clergymen for the purposes of hold-This is Robertson's story and as he apvisits of clergymen for the purposs of hold-ing services there. Well, all the denomintions were so eager and so abxious to keep the good old people in the Alms house in the straight and narrow path, that upon one occasion they clashed, and there was a slight unpleasantness. And so the ser-vices are now confined to the two paid

chaplains. After all it is difficult to run the affairs of such an institution so that everybody will be pleased and especially to please those who are curious erough to want to

drive or walk out and see "who is in the Alms house." That is the sort of curiosity the commissioners endeavor to suppress but when any person wants to see an inmate who is a relative then there is no difficulty in getting a permit.

MRS. PRACOCK'S AFFECTIONS.

A Jury of Seven Good and True, Says They re Only Worth \$3

The value of a wife's affections has been placed at \$350 by an intelligent jury of St.

John citizens. Mr. William Peacock thought the love of his wife was worth \$10,000 to him and that was the amount he asked from Charles Damery for the alienation of her affection, but the jury listened to her and his story and then they listened to Damery and the Counsel and the judge, and after mature consideration thought Damery should pay \$350.

That was the verdict in the case spoken of in PROGRESS last week. No doubt Damery thought it was too much but he had to abide by the deicsion of the jury. Who can tell what the result would have been had Mrs. Peacock allowed her features to be visible during the trial. If they possessed the same charm for the jury as they

evidently do for Mr. Reacock the members of that deliberate body might have agreed with bim and placed a high valuatn upon wifely affection. Peacock keeps a liquor saloon on Shar-

One of the witness for Damery was Mrs. Robertson who was his housekeeper at

the time of his wife's death and for some period before. Her evidence so far as it related to herself was more interesting than what she had to say in favor of Damery. Part of it was briefly summarized in PROGRESS regarding her husband's unwillness to support her and that they had lived apart for three years during which

HOW REPORTERS ARE FOOLED.

They Rush After Exaggerated Stories To

There are incidents in connection with the making of news that often have more of human interest in them than the news itself for instance, the rumors that some times reach the workers on the press, when traced back to their sources are rather humorous. This week word went out of a remark-

able rescue at Turnbull's slip. It was told with bated breath to one or two of the reporters on the papers of how a lad named Jones, an employ of John Sealy's, fell into the slip, and how Samuel Ellingwood, a deck-hand on the Steamer Flushing, lesp-ed without hesitation into the rushing tide at imminent danger to his lite, and bravely rescued the lad. It was also told how the tide was sweeping along past the slip at a great rate and that none but the bravest swimmer would have attempted a rescue. Then, parenthetically, was observed that Ellingwood had this way rescued three lives from drowning. The reporters saw a column story loom

they rushed to the wharf to find ing up so out the full details. Then to their surprise they learned that the water was at the flood at the time the accident bappened, about half past two in the afternoon, and the slip where the lad fell in was as calm and placid as a mill pond. Furthermore, it was learned that Ellingwood had tried to reach over irom the wharf and pull the boy out and in so doing had fallen in. Furthermore, he could not swim a stroke and both he and the boy had to be rescued by Capt. Ingersoll and another of the men of the Flushing.

Such was the story that went abroad and mch were the facts and, what the reporter always like, a good story of brave deeds, was nipped in the bud. This is not meant to reflect on the courage or bravery of Ellingwood. The occasion did not neces-sitate any great heroic part and if i: had, he might have been equal to it.

Magistrate Ritchie is Sarcastic.

Magistrate Ritchie is sarcastic upor occasions and there is no doubt that he has plenty of opportunities for sarcasm. He was especially struck with the activity of the police last Saturdey night when they caught an old widow woman, Mrs. McDade, mulling a glass of ale for her own drink and reported her, and he congratulated

game society has been supposed by many to have been run in the interest of the wealthy few rather than on behalf of the poorer many. The events of the past day or two would seem to show that this is not the case or, at least, that the law is being enforced against the rich as well as against the poor. C. S. Harrington is the legal dviser of the society and he has sent fear and trembling into the heart not only of one of our wealthiest people but one of the society leaders of Halitax. The vengeance

of the society, for an intraction of the law making a close season for partridges has fallen on the family of Hon. Senator McKeen, the hospitable owner of iovely Maplewood, on the banks of the North

West Arm. It was last September that the accomplished wife of the senator decided to give a dinner to certain members of the 400. The function was duly arranged in a style appropriate to the handsome mansion in which it was to be held and the hospitality of the lady who was to be the hostess. Plump partridges were desired. True, they were not in the season, but the hospitable lady knew not that the game society had made it a crime then to eat of this bird. She sought the good offices of her victuallers, J. A. Leaman & Co., but they were law-abiding men and with a whole some fear of infringing the Queen's laws in her jubilee year politely regretted their in-ability to fill the order. The lady then betook herself to a Barrington street dealer and he, obliging man that he was, delivered

to her in a short time eight or ten brace of fine birds. How it came about no one can tell but the matter was brought to the attention of the game society officials and now they are

about to exact the extreme penalty from the too hospitable lady who provided for the entertainment of her guests at the expense of the Nova Scotia game laws.

This society has ramifications extending into every game centre in the country, with active agents, who have done good service for true sport in enforcing the laws, which the society from time to time has secured from the legislature. They have been uatiring in their efforts to preserve the na-tural game of Novs Scotia's woods and groves for legitimate sport, and so tar they nave earned the gratitude of all good citi-To that end they have proscribed 3**ns**. he shooting of partridge between the 1st

Further, no person is permitted to have partridge in his or her possession in the close seasonat least, if they have it will cost them fo each bird so had the sum of \$5 to \$10, according to the leniency of the magistrate before whom the charge is laid. Should

any person be so bold as to sell, or even buy, such a game bird "until after the lapse of three days from the end of any close season," it is a much more serious matter and the penalty is \$25, to be recovered before a magistrate.

the falls could a tale, unfold, could their greedy lips but speak. Many people have been lost in the talls whose bodies have ever been recovered and whether there are currents deep down that only come to the surface to breathe away out in the bay, or what is the reason can only be a matter of conj cture.

And so at last Mrs. Nase of Indiantown and her relatives in Court's Block sre separated, that is as far as the matter of one roof is concerned. Shortly alter the abusive language and assault case was terminated in the courts, the lady in ques-tion sought mental recreation and rest in Boston. Last week she returned, but instead of putting up at her own home in the historic building on Bridge street, she went to the home of her mothe Main street and it is said will remain there

until "the summer comes again." This is no doubt the last page of the semiensational little volume "Smith vs. Nase" and proves undoubtedly the victory gained by the former party. Whether it is the building that may be termed the "boodco" or not may remain an open 'question but theatre of the fact is plain it has been the many a vein of truest comedy and on the other hand some real dramatical situatic ns. Tragedy in no wise entered into the frequest productions but at times a dash of axtravaganza' was quite apparent. Now that the domestic ocean of disagreement has subsided and the trophies of both the Smith and Nase households, brooms, dutpans, mats, effigies etc., have been gilded and given prominent positions among the treasures and heirlooms of each tamily, peace may be expected and that they all may "live happily ever after."

ALD. HAMM CHANGED HIS MIND. And by Voting the Other Way Threw Cold

One of the most interesting features of the administration of the present board of aldermen was their action on the cold storage proposition a few days ago They then decided not to grant the promoters of the industry freedom from taxation, thergh they had at a previous meeting decided in favor of grauting the exemption. Ald. Hamm changed his mind and voted against the exemption. The granting of examption from taxation requires a two-th's vote, and at the previous meeting Ald. Christie, Purdy, McGoldrick, McPhencon and Millidge had voted nay and the oiler ten aldermen yea. Mayor Robertson gave his casting vote in favor and so the pron oters were happy. But when Ald. Han m joined the minority, the vote stood nine to six and so the exemption could not be granted. The city has never since the union granted an exemption to the Parks cotton mill. If they wanted to establish a precedent at all they would have to look a ong while before they would find an industry that was more in the nature of a public need-as a portion of the winter port equipment than the cold storage

The life of the checkers at Sand Point is not all beer and skittles, sometimes they have considerable time on their hands but

frequently when there is a rush of steamers they work all day and all night for some days in succession and tally the car-goes almost in their sleep. It is pretty nearly the same way with the laborers and the other night one of them dropped a nice soft bale of gools on the wareh use floor and then tell in it and want right to sleep.

Occasion-ally the snake would half untwist itself and its head would play before the cow's eyes. On these occasions the poor animal would bellow with terror and go backward in an endeavor it o ascene from the anker. One lady; generously undertook to pro. vide for five of these frolicsome little christians, and the | first night she turned them all into the one corral-provided them with a large airy chamber containing two beds. The dear boys had such a lovely time all together that they managed to break down the beds and the next night their hostess was forced to find separate apartments for her lively guests. The chances for fun were lessened by this arrangement, but to the lofty spirit obstacles only serve as so many additional in-centives to redoubled efforts; and that was the case with the young christians for they forthwith changed their field of operations, took possession of the upper hall, and organized a pillow fight in which both sides and the umpire so distinguished themselves that what was left of pillows and pillow cases after the fray was scarcely worth gathering up.

Another confiding matron housed three of these % youthful soldiers of the cross, and her experience was almost as interesting. The youths were evidently firm believers in the oft quoted proverb that cleanliness is next to godliness, so they decided to apply it by taking a bath shortly after their arrival. Whether they were anxious to economize time or water has not transpired so far, but they filled the bath tub to its utmost capacity, and then all got [in at once. To say that a miniature

A TALLENAKE STORY A Biackmake Beally Frightened a Cow to

An unusual story of animals comes from a farm near Staruoca, Pa. A farmer noticed one of his cows making repeated and furious charges at a dense thicket on the farm. The animal, which seemed infuriated, rushed at the underbrush again and again, striking the thicket with its horns and bellowing long and hard. An investigation by the owner of the animal showed that she was fighting a big blacksnake and trying to stamp it to death with her fore feet. The thicket was an isolated clump of laurels and the snake did not seem disposed to leave it and trust its life in the

Music and The Drama -----

IN MUSICAL CIRCLES.

There has been a death of local munical events of late, and the only concert of note that is mentioned is a month distant. The St. John Vocal Society through its Honor-ary Secretary, amounces two grand con-certs in February, under the direction of W. Edgar Buck. So far as particulars can be gleaned from the advertisement, three will be "80 trained voices in unacthere will be "80 trained voices in unac-companied part songs and choruses." Eighty trained voices ! Where will they from ? Not that so many good voices could not be found in this city, the task of training them must be stupend-

Mr. Buck also promises to make his bow to a St. John audience for the first time as a bass soloist. He must mean in the opera house for if I mistake not quite a distinguished company had the pleasure of hearing him on the steamship Gallia at the luncheon given by the man-ager 'of the Beaver Line. He left no question of his ability upon that occasion and equal pleasure will no doubt be the portion of those who hear him in the opera

By the way, speaking of the Gallia lun been-though an event of the past nowwhat good singers were present upon that occasion! Mr. Mayes was there and had two splendid selected songs, then Prof. Buck and Messre Sutherland and Vroom. The last named gentlemen are in deman at every social gathering at which they are present and they are always ready to respond with something old and popular or something new.

I notice that the Hispania club of Halifax which, we know, came to St. John a year or two ago, is still active and preparing to give the comic opera Prince Tommy Aithins in the Academy. One of the newspapers, commenting upon their work says that most every night something is being done at their rooms, either in the way of scenery construction or in practice of choruses and solos. The scenery in two acts represents a sort of colonade and courtyard of a palace. The principal features are of course pedestals and column and panels, but the details are carefully provided for, so that the impression is quite Grecian, although the plot of the piece is laid in the moon-a sort of anach-ronism, one would almost say. In the third act the scenery presents the steps and massive door of a temple relieved by heavy pedestals. The musical and literary part of the opera is full of the genius of R. P. Greenwood and W. E. Delaney. With the exception of two finales the music is entirely the work of Mr. Delaney. Some of it is catchy, other portions beautiful and bright, and all is arranged so that the part is thoroughly adapted to the artist. Every voice is studied and music' made to suit it so that the voices, individually and jointly, will be heard to best advantage. The finales of acts one and three are the only portions of the music borrowed, and these are popular marches which Mr. Delaney has arranged for voices.

Boston Musical critics are talking about John Philip Sousa's new opera, 'The Bride Elect' which was presented in the Boston Theatre last week. One critic says that every one in town is talking of the emphatic success which "The Bride Elect," is now scoring on the stage of the Boston theatre. Its reception there at the hands of as many people as the big playhouse could possibly hold was the most cordial, and the spplause accorded it the most enthusiastic given to an American operatic pro duction. The entire credit for the book and music belongs to "The March King" himself, Mr. Sousa. On the opening night every solo and every concerted number was applauded and redemanded until the singers themselves rebelled from sheer weariness. The scene of the opera is laid in the Island of Capri in the Bay of Naples at a mystical time when that small bit of land was supposed to be divided into two king-The excellent opportunities offerdoms. ed for the display of pictures que scenery and beautiful costumes have been taken the utmost advantage of by the producing managers, and at the beginn ing o every act the curtain rises on an artistic and effective stage picture. A higher plane is set for everything in "The Bride Elect" than is popular taste and combines a number of the best march, rhythms that the genius of Sousa has ever evolved. This is particularly the case with reference to the march at the finale of the second act, the most striking composition of all which invariably brings forth variable franzies of applause. The orchestration of the opera is vigorous, and the oborus singing fine

Now, just to show you that authorities on opera are as widely different at times as authorites in law, I will give the opinion of another critic who says that The Bride Elect was a disappointment. It was not what was expected from the "march king" and the composer of "El Capitan." The most obtrusive fault is in the book. Mr. Sousa might better have been content to share the merits of his new opera with some one of a more literary or poetic turn of mind than his. The plot is so obscure and gone before

usually expected from comic opers, and the result is not altogether satisfying. There is practically no hu nor, the music of the first two acts is unimpressive, and there is nothing to bestir the risibilities, or even to set the test tapping until the finale of the second act. It's the best thing in the whole opera, this military finale, a march song equal to

anything Sousa has ever written,-tull of the martial spirit, vitality and melody, imposing' an ! pictur sque in its mounting, waiting for through two acts. The last act is a conglomeration of pop-

The performances are under the direction alternately of Walter Damrosch and Signor Bimboni and in the company appear such names as Toronta, Ibbs, Kraus, and Standige. "I yield to po one in my admiration for Wagner's geniue, and I further think that I hold the record in financial appreciation of his works," remarked John Philip Sousa a few nights ago. "Six years ago. I was travelling in Europe, I had the pleasure of paying at the rate of \$1 a minute for the privilege of listening to "Tannhauser," and I feel confident that not even the most rabid of all Wagnerites could do more. Before sailing for Europe I had confidently promised myself the pleasure of attending at least one perform-ance at Beyreuth, but, owing to some change in my plans, I did not reach Nur-emberg unt l the day before the final performance. From this quaint old town I telegraphed to Paul Miersch, a New York musician, who was playing 'callo in the Beyruth orchestra, to secure seats for me. Not hearing from him the next morning I did not deem it advisable to take my wife with me, with the possibility of not being able to secure a seat staring me in the face, but went alone.

"Arriving at Beyreuth I walked up the hill to the theatre. only to find that my riends had been unable to purchase a seat for me. Here I found many Americans I knew, but their commineration was all the solace for my disappointments they could offer. When the first notes of the overture to "Tannhauser" sounded I retired to the near by frame structure where very admirable beer and sausages are dispen for a modest sum, and endeavored to appreciate the humorous aspects of the occasion. There I was an American musician to whom a Wagner performance at Beyreuth had been a long contemplated treat, obliged to sit outside the theatre after travelling so many miles to be present.

"After the first act my American friends all came out to tell me how great the the performance was. They meant well, no doubt, but I could not apprepriate their kindness and refused to be comforted. Among those present was a German-American from somewhere out West, who, seeing my really great disappointment, finally offered me the temporary loan of his ticket on the condition that I should remain only for one number. I accepted with thanks of course, for a crumb of Wagner at Beyreuth is better than no Wagner bread at all. Just as the heralds appeared before the theatre to sound the announcement of the second act my new found friend apparently repented of his rashness in trusting his precicus ticket to a stranger, and in order to sustain no financial loss through " 'That will cost you \$5, Mr. Sousa."

TALK OF THE THEATRE.

Speaking locally there is no talk of the theatre. The opera house has been closed for two weeks. No doubt other compapies will soon arrive just as soon as the management think the people have recover-ed from the shock that boliday expenditure gave their pockets, but nothing is adver-tised as yet. The only thing of local note was the annual meeting of the opera house company which was spoken of in last week's issue.

A VERY GRAVE CHARGE.

A remarkable charge has been preferred against the New York Herald and its proprietor, JAMES GORDON BENNETT. It is nothing less than that Mr. BENNETT has been bribed by the Spanish government at Madrid to support and uphold the cause of Spain against the Cabans in the United States through the New York edition of the Herald and in France through its Paris edition. The charge is a serious one but it is supported by such evidence and such a chain of circumstances as to make it appear well tounded. No reader of PRO-GRESS needs to be told how great a paper the New York Herald has always been considered. In enterprise and fearlessness it has ever been in the van of Amen ican journalism and it seems almost incredthat a newspaper apparently blucda zuorageorg ca accept any matter how large-to es pouse a cause with which the American people have no sympathy. But the facts are presented in the New York Sun in a lengthy letter signed by J. DE ARMAS, who makes the charge and supports it in a most systematic and convincing manner. He notes at the start that on the 20th day of November the evening edition of the Herald-The Evening Telegram-announced its suspension on the ground that it did not pay and that two days later, on the morning of the 22ad the Herald sail the publication of the Tele-gram would be resumed. But what happened in the meantime? The Spanish cabinet met on the 21st and agreed to the terms of Mr. BENNETT and on the following day the minister of the colonies contributed a long article in defence of Spain to the columns of that widely circu-lated paper. Then the Spanish journals spoke and in urmistakeable terms. The principal government journal in Madrid published the following comment which is very significant.

Several days sg) the New York Herald showed some inclination to return to its former policy with regard to Spain and the affairs of Cuba, abandoning regard to Spain and the sfi airs of Cubs, abandoning the cause of the insurgents, in whose behalf the Her. ald has made lately an active campaign. We can state now that the change is beyond doubt, and we congratulate the Spanish people. Mr. James Gor-don Bennett, proprietor of this popular daily paper, was absolutely foreign to the publication in the Herald of the articles in favor of the insurgents. With fall authority we assert that he has protested against them and ordered his staff to write more in accordance with the duties imposed by neutrality and the friendly relations between Spaniards and

"The Herald will return to the good policy and never desert is," says Mr. Bennett in a dispatch see have seen and of which the Government hav also notice. Last Sunday, according to this com-mendable attitude, the Hersid published an article protesting against an aggressive policy on the part of the United States toward Spain. Mr. Bennet also has sent telegraphic orders to the spec al cor respondent of the Herald in Madrid to give all as respondent of the Herald in Madrid to give an as-sursfices to the Bpanah Government of this new attitude of his newspaper. Mr. Hussey File, the Moralo's correspondent, has an appointed interview to-morrow to that end with Senor Sagasta.

One other newspaper of influence made this significant comment :

The contract of bribery is signed

The correspondent of the Sun does not give the terms o' the contract, but he says that up to the present time \$1,000,000 the Spanish gover mment to further the cause of Spain against the Cubans in the United States, and he insiruates that the largest portion of this has been paid to the Herald. But he does name a specific sum when he says that Mr. BENNETT gets \$25 000 a year for booming the gambling establishment at Monf Carlo, and he points to articles booming that gambling resort as a place for in valids in which are quoted the opinions of physicians that the excitement of play is good for many diseases of a nervous character !

An Authority on Preachers

The Parish Magazine of Halifax says "The Very Rev. Dean Carmicasel, of Montreal, who is placed by Rev. J. De Sovres, of St. John, on the list of the five best preachers in Canada, ranking with Bishop Courtney, Bishop Baldwin, Bishop Du Monhn and Bishop Sullivan, will preach in St. Paul's church on Sunday morning.

What's the Matter With our Chief?

Since their first visit to Halifax, says the Echo of that city, the governor-general and Countess of Aberdeen have always remem bered the chief of police, who is now in receipt of a Christmas card dated Govern ment House, Canada. The card is a folder and on one page are the words: "To wish you the old wish with all kindly greetings of the season, from the Earl and Countess of Aberdeen-Christmas, 1897.' On the other page are the lines :

"A Kindly thought with a word of cheer And a true God-speed for the coming year."

Why not Move to St. John

How shall we be entertained during the winter ? asks a Halifax resident. All of us don't skate and some of us don't curl. and when we take these two out of the list of amusements there is precious little left. The Academy is void of dramatic attrac tions and the musical attractions are few and far between. We have not even a good course of lectures which might be made the best of all entertainments. I wish some enterprising man or society would undertake to organize a series of popular lectures. It wouldn't pay, someody will no doubt suggest. I beg to differ. It the right speakers are secured, if their subjects are such as appeal to the public, if the course is properly advertised I have not the slightest doubt that the venture would be successful, financially and otherwise.

Recalling John Howe's Father.

A recent death at St. John, N. B., that of Mr. John Howe, ex-Postmuster of New Brunswick, recalls to a vanerable friend some reminiscences. *** Old people, still living, remember well when the Post Office was kept in the house on the east side of Barrington street, opposite our present City Hall (where Cogswell, the jeweller, now is), and some have a vivid recollec tion of the Postmaster, Mr. John Howe. the father of John Howe lately deceased. He was a large man, both tall and stout, with manners and demeanor somewhat haughty and pompous. Mr. Howe, the Postmaster of that day, was an old-fashioned Tory of the most pronounced type. and, like most others of his ilk, regarded his younger half-brother Joseph-just then bis younger half-brother Joseph-just then commencing his reform agrication—as a de-luded young man, altogether on the wrong track; an estimate, by the way, which the robust but deluded Joseph was wont to enjoy with an amaged and good natured smile.—Doesticks in the Halitax Recorder.

A Handsome Raminder.

The handsome pocket diary sent out by the London Guarantee & Accident Com pany is a courteous reminder to its friends and patrons that the company is not unmindful of the New Year. An old friend of many of the readers of PROGRESS, Capt. A. W. Masters, is manager of the limited States branch with headquarters at Chicago and the convenient pocket companion will be more appreciated on that acco

Flowers Answered Ro'h Purposes

A certain young widow of Indianapolis who had just changed her weeds for bright-er hues gave a dinner party not long sgo. The rooms were decorated with a great profusion of flowers. Rose's in masses were on the mantels and the dinner table fairly blossomed-in fact, the abundance of flowers was unusual. One of the guests could ers was unusual. One of the guests could restrain her curiosity no longer, and when the dessert was brought in said: "Well, Mrs. Blank, you're rather spreading flow-ers tonight." "Yes," replied the fair widow brightly. "but tomorrow I am going to take them out to Crown Hill and put them on poor. Tom's grave."

After the galety, incident to the boliday season society seems to have settled down to its usual quietade with nothing but runness of social events undecided upon. Perhaps such pleasant reunions as that held every evening in the Up Town rink where one or two hundred helds sand gentlemen er-dy that most exhiliraling of winter pastimes-stating-ins something to do with the apathetic in-difference to duncing. For you know one cannot be skating and dancing every night in the week, en-ticing as those pursuits may be. I understand that the skating parties in the Up Town rink have been particularly successful this year; the ice has been ident to the boliday articularly successful this year; the ice has been splendid condition and the 62ad band music all esary to complete these -evenings of that was no oyed enjoyment.

In this connection one might almost mention the In this connection one might almost mention the proposed carnival of the Neptane Rowing club in the old Victoria, which is sure in a great measure to be a society event. This organization seems to be even more active in the winter season than in summer. We have already had a most successful ball under its auspices and there have not been wanting sthletic young men to form a bockey team which, by the way, was fortunate enough to win its first game against the Victorias. And now there is to be a central carniva.l

It was given by the Young Wo-man's Guild and the Young Men's asrociation of Trinity church to the members of the various guilds and associations of the Episcopal churches in the city. The room looked very dairty and pretry in its tasteful decorstions. The guests were received by Miss Grace McMillar, Miss Amie Tingey, Miss M. Johnston, Dr. Scammell, Mr. Harrison Kinnear, and Mr. J. E. Bourke. A somewhat informal programme was carried out. Archdeacon Brigstrocke gave an address of wel-come, then there was a chorus led by Rev. A. G. H. Dicker; a sextette from St. Paul's church choir; a reading by Miss Knowiton; solo by Father Daven-port; gramaphone selection by H. C. Tilley; and a recitation by Miss Armstrong; interspersed with selectons by St. Mary's church orchestra. After the conclusion of the programme ice cream and cake were served. ake were served.

The second of the series of assemblies of which the first was held in the Institute rooms on Dec. 10th last was held on Thursday evening. The affair was highly enjoyable and nothing transpired during the hours of dancing to mar in the least degree the the hours of dancing to max in the least degree the pleasure of those present. Tastelly decorated in dainty tints, contrasted by dignified paires and plants of sombre hube, the rooms of the historic old Institute never looked prettier. The doors were richly hung with portieres and in the various corn-ers, of the bail room and reception apartments home, like cosy corners were arranged with the furniture. A most delicions supper was served at the proper

Jan H.-Oa New Year's eve "Maple Terrace," in Jan H.-Oa New Year's eve "Maple Terrace," the elegant home of Dr. and Mrs. Hewson was the scene of a most brilliant gathering when their daughter Miss Florence Hewson was added to the number of the fair debutantes of Amberst. The house was beautifully decorated with greens and cut flowers, the large drawing rooms with their pollshed flore made as excellent ball room, while the jeft. Music was dispersed by the orchestra from Moncton, at twelve the gnests all joined hands and sang "Auld Lang Syne" thus welcoming in the New Year, after which a delicitons supper was served in the large dining room. Mrs. Howson received her gnests in an elegant grown of heliotrope brocaded silk trimmed with chifon; ornaments diamonds. Miss Hewson looked charming in a beautiful dress of white solk, covered with white silk chifon. Miss Phinney, (Fredericton) a gnest of Miss Hewsons, looked very well in a handsome dress of white corded silk trimmed with white silk chifon. JAN. 11.-Oa New Year's eve "Maple Terrace

Jan. 12, --Mrs. Thos. O'Regan, Dalhousie, N. B. is visiting friends in town. This week is to be a gay one, just bristling, with functions. Mrs. W. C. Summer has been, within the week a frequent hostess. Lust Friday she enter-tained a very large party at a farenoon tea, which was agreat success, and which was much enlivened by music both vocal and instrumental. Last night, at the same house a large party for Drive Whist, was entertained; and on Thursday night Mrs. Summer gives a large "At Home" for her brother Mrs. H. F. McKenzies very large dance to about

ANAGANCE.

INAGANOS. JAN 12.—On Friday evening, Mr. Clifford Price entertained a few of his immediate friends to a recherche supper at his snup bachelor quarters on Ocdar Lane. Mr. Price is an ideal host in every respect and he had everything so thoroughly ar-ranged for the enjoyment of his guests that not one flaw could be found in any particular by the most fastidious; no indeed, not even whore "Wo"-man could turn her defi fingers and show her ingenuity. Mr. Price had for his guests Massra. Humphrey and Albert Davidson, Howard McCaily, Gilbert Davidson, St. John, and Jack Price who ware chaperoned by Mr. R. Dougias Hasson, I. believe the programme for the evenings "fun" consisted of a social tete-a-tete—characteristic of the sterner sex—from seven to eight in the drawing rooms of Mr. Price's palatial home after which the host ra-quested his guests to follow him to the library where the , smoking jackets were donned, cigars paysed. around and when an hour was passed in-dulping in this their favorite pastime fan-:an and caboose were played from nine to cleven when hight refreshments were served. The hour from elyptoremene for which had been made out caboose were played from nine to eleven when light refreshments were served. The hour from eleven to twelve was spent in a musicale the programme for which had been made out beforehand and which proved highly credi-table to all "The Boys." Mr. Gilbert Davidson of Bt. John had his banjo and favored his listeners, with some cho ce selections accompanied by Mr Al Davidson on the plane; M. Hanson favored the company with a solo, "Better Than Gold." This solo which elicited much applause was followed by a selection heartly rung by a trio consisting of Mesars. Clift Price Humphrey Davidson and How-ard McCully. Supper was announced and the boys exercy responded and wended their way to the dining room where spread before them lay every-thing tempting and appetising. After ample justice had been done to the delicious supper, the toasta, of course, were next in order but what they were drunk is a mystory still unsolved by us ladles. Trunk is a mystery still unsolved by us ladies, That elp and faverite song "Auld Lang Syne" terminated their evening's fun, for shortly after that—it then being away on in the early morning— they bade adieux to their host with assurances of ficindablp by hearty handahakes, and took their leave fully convineed that they had had a good

The many Fredericton friends of Mr. Forgan ormerly a bank manager in that city, will be inter-sted in the following note from the later Ocean of

Chicago. Three of Chicago's prominent banks will riog out the old and ring in the new by a change of presi-dents with the opening of a new year. James H. Backels will take active charge of the Commercial Mational on the first day of January, and early in this month David R. Forgan will be elected to the presidency of the Union National, while Erness Hamili will be similarly honored by the stock-holders of the Corn Exchange. In this connection is interesting to note the truth of the saying that Chicage is essentially the city of young men. It is safe to assort that in no city in the world can three men be found guiding the destinies of three Siduci. ary institutions of equal importance whose com-bined ages bring the average to less than 40 years each. Temperance. As in other secret societies this city and this province has had quite an important part in determining the course of tamper-ance sentiment and quite a prominent veice in the high councils of the order. The establishment of the organization in this province was almost contemporaneous with its original inception and four res-idents of New Bruuswick have had the honor to fill the highest post in the gilt of the thousands of members of the order the world over. There have been only some twenty-five or twenty-six Most Worthy Patriarchs of the National Division of North America, which is the premier of all the National Divisions in point of time and in point of importance in all Christendom, so that this province has been particnlarly honored.

The order was established in New York ber 29.h. 1842, by sixteen genton Sept lemon and it grow with such rapidity that in 1844 the establishment of a national division for North America became ne cessary.

October last the jubilee of the order in New Brunswick was celebrated in this city and the year of the foundation of the fraternity here was worthy of a grand jubilee when one becomes acquainted with the rapid growth of the order here immediately after its establishment. The first divis-ion in New Branswick, probably the first in Canada, was Howard, No1, organized at St. Stephen on March 8th, 1847. Thus the temperance men of the border town joined hands across the water with their brethern of Frontier D.vision, No. 22, of Calais. Other divisions quickly followed until by September of that year there were eight in the province. It was than decided to organize a grand division, and at the organization every division was represented except Gurney, No. 5, of this city. It is interesting to note that of the membars of the order at that time only two are still living and identified with the order. These are Mr. Thos. Veszay, ot St. Stephen, a charter member of Frontier, No 1, and Mr. C . A. Everet, of this city. a member of Gurney. They were both youths then and too young to assist in insugurating the Grand Division. Mr. Veazey, by the way, is said to have had the longest connection with the order out-side of the United States.

The Grand Division was organized in the hall of Howard Division No. 1, St Stephen Sept. 16th. 1847, by Brother Alexander Campbell, Deputy Most Worthy Patriarch, who was duly empowered to perform the

There are now in this city seven division as follows : Gurney, No. 5; Albion, No. 14; Mariners and Mechanics. No. 38; sion of Major A. J. The met one water out 26th, 1847, states that there were then in the province sixteen subordanate divisions numbering collectively little short of one thousand members. "Now when it is re-membered" the circular goes on to say, don, No. 275; St. George, No. 353; and Jabilee, No 422. These have a total membership of probably about 400, St. George, organized mine years ago, being 'he strongest with 140. BAISED OVER THE LIMIT. A DISAPPOINTING POKER GAME ON A RIVER STEAMER.

aces That Made It Impossible to Determine Wether the Capial was Bid-ing or Wether he had the man with the Pat Hand Beaten-A River Pilot's Story. 'It was the biggest pet I ever saw on a oker table in the early days of Missour River steamboatin'," remarked Ben Jewell the retired Missouri River pilot, "an' that is sayin' a good deal, for the game of poken in them days was no penny ante amuse-ment. I have seen a passenger start up the river from Soux City or Yankton bound for Bismarck with a roll of bills like a city water main and when he reached the middle of his journey he was a-mortgagin of his good looks and persussive manners for the loan of a little bit of chewin' tobacco or a nip of forty rod; and not because there wasn't plenty of them articles for sale on the boat, neither, but because

he had struck a cyclone o' poker and been turned inside out-strapped, sucked, bust ed, skinned and cleaned up and hung over the pilot wheel to dry. It was a glo:iour game in them days-the great American poker. 'The game was aboard the steamboard

Nancy Lee, on her last trip up from Sioux City late in the fall. The Nancy was a rotten hulk, anyway, and I didn't want to pilot her no more than I wanted to pilot a sawlog down the Mississippi in a freshet, but it was a case of takin' her up the river or losin' a steady sit wi'h the company, and I couldn't afford to throw up the job. The engineer was a reckless cuss, who filled up the firebox every once in a while full as a boy's stomach on Christmas and let her wheeze and throb and slash through the water like an ocean liner. The smoke poured cut of her funnels like mad, and many and many a night I've sit in the pilothouse with my hand on the wheel and held my breath expectin' to be blowed two or three miles into the State of Nebraska or the Territory of Dakota by the buttin' of a boiler. But we had a streak of good luck and the steamer held together till we reached a wood yard a couple of hundred miles up from Sioux City and stopped to take on a supply of fuel.

"When we swung out into the stream again it was bright moonlight and I turned the wheel over to the cub and went down into the Captain's cabin. The night was so clear a baby could have managed the wheel, and I wasn't afraid of nothin' but them cussed boilers, an' I couldn't get 'em off my mind. The Captain's cabin was full and the guests were just sittin' down to a game of poker. The Capsain was one of nerviest poker fiends I ever saw, and the man who tried to run a bluff in on him was a busted spoke. The game run along sort o' quiet like for an hour or two. There was a cattle buyer from Sioux City in it, a railroad contractor from Yankton, several speculators and the Captain. No big hands had showed up and luck was about an even thing. The trouble started with a jack pot and how it ended I am about to tell you presently.

When the cards was dealt out the Captain skinned 'em along enough to get a squint at his hand, and I saw by his looks the muddy Missouri, and the water colder than ice. The strikin' of the cold water world is the national division of North America which takes precedence over the

hundred. The second min stayed, and the others dropped in with a hundred until it came to the last man, and he followed up his pile of a hundred with four more stacks of the same size. The little fish began to gasp. The Captain chewed his nustache like a member of an Arctic expedition attackin' a rubber boot, and swore softly like to himself. The fellow had

puzzled bim. "The Captain's nerve never failed him out the other fellow set there so cuised quiet and serene like that it seemed he didn't have nothin' liss than tour aces. Then he had stood pat in the first place, and that was a werryin' matter, too. It was a ticklish situation. The Captain didn't want to run up against a snag, especially so close to the end of the season, with a cold winter absad of him. The other fellows, I could see in a minute, intended to drop out. The current was too swift for 'em. But the Captain chewed and chewed and chewed until his mistache was ragged as a roustabout's shirt, and still he couldn't make up his mind And that other cussed icicle set there and whistled like he was at a church strawberry festival or a lawn sociable, and nothin worried him but the weather

"Well, it was an excitin' situation." They et there for fitteen minutes, and you could 'aheard pins droppin' at any time. Finally the Captain reached down in his inside pocket and pulled out a long leather pocket ook, and started to unfasten the strap about it. Then we looked for a squall, and considerable one, too. Whenever the Captain went after that pocketbook it meant trouble for the other fellow. There was enough hundred dollar bills in the book to make a thousand even, and the Captain pushed 'em out into the middle of the table and waited. Not a person said a word. The stranger unbutton d his coat and fished up a pocket book from an inside pocket. It was as full of bills as a legislative session. He pulled out enough to stack up with the Captain's offer, and shoved 'em out in the centre of the table. 'I call you,' he said.

"There was five or six thousand dellars on table in the pot, and I tell you it looked to a poor devil like me the rival, of prosperity. If the Captain won he had a stake

to keep him a whole season in clover and nary a trip. We all held our breaths. The Captain started to place his hand face up on the table, when-B-:-r-r-r.c-c-oc-m-m-m-m ! There was roar, and a crash, and a rattle, like the noises of a hundred cyclones and earthquakes and volcances all goin' at once; the air was filled with flying tables, timbers, arms, pieces of iron, ropes, dishes, and a hundrad other things, thick clouds of steam and smoke covered everything from sight and it seemed as though the end of the world had sneaked on us and jammed everything on earth all up on a pile, while we was a sittin' there watchin' that pokergame.

'I felt myself flyin' through the air like a cherub or something of that sort, sailin' like a bird 'way up out of sight, and finally I came down, splash, in the middle of

ning in last October two burg lars forced an entrance into the second story rooms in a large building in Sixtl street, in St. Paul, Minnesota, occupied by a firm of silk merchants. The boilding used, and the rooms dark, and the rs thought their robbery of the es would be an easy one. They did t know that as soon as they entered the som an automatic burglar-alarm wo ring a bell at the office of a district tele-

graph company a tew blocks distant. The bell was duly rung by the alarm The best was duly range by the status, but it did not communicate with a police effice, nor was there an officer on call at the dustrict telegraph office. As it hap-pened there was only a boy on duty a' the office, and he was sent at once to the place whence the alarm had come to "see what was the matter.' This boy's name was Edward Barry. He went boldly into the silk merchants' store, and found what was the matter. But he was promptly seized by the burglars and thrust into a corner the they went on rifling the establishment

Meantime another messenger boy named Walter McGlynn, came into the telegraph office. He was at once sent alter Edward Barry. As he reached the top of the irs and was about to enter the silk store a revolver was pointed at him, and he was

bid to throw up h's hands. Instead of doing so, however, he put one hand into hispocket, where he carried a revolver for such emergencies He point ad a revolver at the man who was threat ening him, and pulled the trigger, but the oon did not go off. Not being very much accustomed to the use of such wea ns. the boy had failed to keep his reolver loaded. When he found that the weapon was useless, Walter dropped it, and though the burglar was still covering him with a revolver, he grappled with the man. By this time the light in the store which had enabled Walter to see the man had been extinguished, and the second burglar had escaped. Walter was now stragging with his burglar in the dark. He tried hard to hold him, but the thief was a min and Walter was a boy, and though he was a very resolute and lively boy, the thief soon threw him down and scaped.

By this time a third messenger-boy By this time a third messenger-boy Robert Henderson, had arrived at the foot of the stairs, as eager for the fray as the others had been. Robert saw a man run-ning down the stairs, and knowing that it was not one of his comrades, he put out his foot and tripped the man up. The burg-lar fell headlong, but in an instant was up again and running, with Robert Hender-son close at his heels.

but the man succeeded in sharing nimself loose. By this time the boys received import-ant reenforcements. Before Robert left the telegraph office he had telephoned to the police about the alarm, and the patrol-wagon reached the building where the burglary had been attempted just after the chase had fairly begun. The officers joined in it. It made a great tunult on the street; a night-watchman down the street heard the noise, and came around the corner just in time to meet the burglar, who stopped, attempted to turn back, and fell into the arms of two of the pursuing of-ficers.

HELVETIUS AND HER CATS. How a Famous Woman Made Harself very

Kindness to dumb animals, like other miable traits, may be carried to excess. A st, iking instance is furnished by Count d'Aumale in an amusing account of a visit he once made to the widow of Helvettus, a noted philanthropist and litterateur of the last century. Madame Helvetius, who was woman of intellectual ability, was noted for kindness and eccentricity. D'Aumale requested an introduction to her, and was taken to call upon her by a friend.

As the visitors entered the spaciou drawing room, it was nearly dark, and the footman who ushered them in could scarce ly find his way. Madame Helvetius emerg ed from the shadows in a moment, and as the servant lighted the apartment D'Aumale was astonished to see a number of very handsome Angora cats, completely enveloped in magnificent robes of fur-trimmed silk! The footman assigned the guests to seats, and they were about to sit down when Madame's querulous voice interrupted them.

'What !' she cried, to the embarassed ervant, 'do you not see that Ninette and her kittens are occupying those chairs P' With a low, deprecatory bow the lackey pointed to the sofa.

'Stop !' cried the lady to her visitors Mignon has been ill; she cannot rest comfortably except upon that sofa.'

The guests paused in some confusion and were stepping back, when a loud 'mew' trom behind warned them that they were again on dangerous ground. 'In heaven's name !' exclaimed the dis

tracted lady, 'my poor Nanon will be crippled if you do not step carefully.'

Finally the astonished gentlemen wer led into another apartment, followed in solemn procession by twenty Angoras,

her, and took possession of the best of overything. When refreshments more neared, they clamored until it seemsd as if every cat in Paris had been let loose in on of of

if every cat in Paris had been let loose in that drawing-room, nor was the uproar quieted until they were led. Before the guests were served, each cat had leaped up into a cubiesed chair, where she disposed of her portion of the visada in unrebuked greed, filling the sir with the mingled sound of manching of benes, quarrelsome cries and lead 'mews.' While this singular scene was being en-acted, the hostess made hereelf agreeable, chatting with her visitors on various inter-esting topics, but D'Aumale and his friend ware so absorbed by the curious spectacle that her efforts were almost unnoticed. When the guests departed, they induged treely in the merriment which their re-markable visit had aroused, and to the end of his days Count D'Aumale was tond of describing this manifestation of a clever woman's toolish eccentricity.

The supply of fine horses makes a stant luxury to travel in Russia. OLD AUQUAINTANOES MEET. How an Elderly Man Kept a Young Passes

Some years ago a young man with more money than serse became involved in a game of poker on one of the English ships game of power on one of the English ships. The first night he won freely and had a big stack of red and blue chips to cash in when the game was closed. The second night he had to play in order to give his opponents a chance to recover, and toward the end of the evening lost heavily. He held good hands, but somebody else alwho trailed their silk gowns along with the ways held better, and he was compelled to go to the bank several times. As fast as

showed the chips over, the young man whose place he had taken found himself many dellars to the better. He effered to divide the winnings, but the Judge only smiled and lighted a big cigar and said : 'Put your money in your pocket and den't ever play with strangers again. Those chaps are old acquaintances of mine I mot them at Sacramento when. I was a member of the Legislature seven years ago, and I know their game."

Mr. Allan Didn't Know He Was a Deadhead and Left Hurriedly.

John Allen of Mississippi, arrived at the Ponce de Leon, St. Augustine, registered, and was assigned to a room. He had never seen apartments so extravagantly furnished. Expensive oil paintings hung over the walls. The bedstead was of mahogany and hand carved. Carpeting a half floot thick covered the floors. There were vases filled with flowers, velvet-covered chairs. lace curtains, bevelled mirrors, and all the other appliances of

modern convenience and luxury. John became alarmed. He figured it out that that room would cost as much per day as his salary as a Congressman would amount to in a half a week. He called a bellboy, gave him \$2 and told him to quietly find out the tariff on that room. John didn't like to ask the clerk himself. He was a big man, and that would look little. The boy returned presently and informed the guest that the price was \$50 a day. Allen went down stairs, laid down a dime and called for a cigar. They didn't sell anything but two-bit cigars. He put down a nickel on the newsstand and pickdown a nickel on the newsstand and pick-ed up a New Year paper. 'twenty cents more. please,' said the clerk. He got a drink and tendered 15 cents. 'Where you been stopping, at the Windsor P' asked the barkeeper. 'Drinks here are a quarter.' That settled it with Allen. He went to his room, gathered his grips and took them himself downstairs. Then he called for his hill

PROGRESS, SATURDAY, JANUARY 15, 1896

During the first year of the Revolutionary War the most conflicting and alarming reports spread to the remote country towns In the "History of Windham County, Connecticut, there is a description of a serious panic which occurred at Thompson as a result of such rumors. A saucy boy was knccked down by a suspected Tory. At about the same time a courier from Boston rode through the town, too much in haste to answer questions. Soon dread tul stories were afloat.

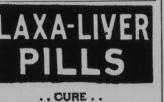

It was said that the patriots' homes were in danger; that " Malbone's niggers' were The Tories are coming ! The coming ! Tories are coming!' was the cry everywhere.

Not a man was left at home save the old and paralytic, and they had no arms, no ammunition. Flight seemed the on y resourse, and a dismal, miry swamp was selected as the place of refuge. A boy was sent to rally all the neighbors. He ran to Larned's s.ore, then a well known business centre. Mrs. Larned, who was in charge, was not one to run fron the face of danger.

A big fire was blazing in the huge fireplace kettles of water were heating, and every iron implement that could be mustared on was the coals; and with hot water and hot irons she intended to make a stand-

The young man was inclined to refuse, but he noticed a curious expression on the Judge's face and changed seats with him to see what would happen. Twice the Judge caught the gentleman on the opposite side on a misdeal. Twice he laid down his hand on the ground that the wrong card was given him. When the train stopped at the station, the bishop raw a small boy standing near and beckoning to him, inquired the price of the celebrated buns. "Threepence each," said the boy. "The bishop thereupon handed the boy sixpence and desired him to bring one to the car, adding, 'And with the other six-pence you may buy one for yourself." The boy shortly returned, complacently munching his Banbury, and handing three-pence to the bishop, said : "There was only one left, guvinor."

GLAD TO HELP.

The Kindly Act of a Clergyman Towards a Poor Won

It is a pleasant thought that many of the men whom the world delights to honor are proud and glad to do the little, humble, helpful services, for which opportunity comes to us all. An incident told of a beloved minister and worker who has pass ed from this life is a good illustration.

Dr. G., accompanied by a friend, was one day hindered on a crowded street corner., Near them stood an old, feeble, poorly-dressed woman, evidently in nervous terror at all though of attempting the dangerous crossing. Noticing her distress Dr. G. in his beautiful, gracious way, drew her trembling arm within his strong one and carefully piloted her over.

On returning he was met by the query on the part of a friend :

'That was one of your flock, I suppose P' 'No,' was the answer, 'I never saw her before. But she was in need of help, and

THE GUNPOWDER SEARCH.

How the Guy Fawkes Plot Was Dis the Prec

It is nearly three hundred years sin the British House of Parlis and the barrels of gunpow nder the custody of Guy Fawkes, a soldier of fortune, was discovered a few hours be-fore the opening of the session. The gun-powder plot was not exposed by vigilance, but by means of a letter written by one of but by means of a letter written by one of the conspirators to a relative, warning him against attending Parliament on the first day. If there was lack of official vigilance th en, there has been none since, for Parli-ment has not been opened any year for three centures until the cellars have been searched. The lord chamberlain of the c ourt is charged with the duty of examining unget could be college presidents and other presidents; fragments of famous wrecks; a hundred curious things. The one that held my eyes (because it fitted right into this little talk about 'meddling') was a great bow of some strong, hard wood, bound and lined with bear-sinews. It was an old Californian relic, and you boys would have liked to see it and hear him tell the bear-story that belonged to it. But also They tramp through one corridor after another, and look into every dark corner, another, and look into every uses that no and finally reach an agreement that no gunpowder has been secretly stored in the cellars, and that it is safe for Parliament to meet.

When the carliest searches were ordered during the reign of King James I., the guardsmen carried lanterns through the dark passages. The corridors and under-ground rooms are now flooded with electric hight, but the yeomnn of the guard respect the old custom and have lanterns in their hands. Under the Stuarts it was customary, when the inspection had been finished, for the head chamberlain to send a message to the sovereign by a mounted

soldier with the information that it would be entirely safe for him to attend the opening session of Parliament. The mounted soldier no longer rides

post-haste to the queen at Windsor or Osborne; but every year the vice-chamberlain sends the traditional message to her by private wire, and she is assured that there are no explosives in the cellars, and that she will not be exposed to unusual risks if she chooses to meet her Lords and risks if she chooses to meet her Lords and Commons. She my not have the re-motest intention of opening Parliament, but the mrssage is received and schnow-ledged. The lanterns are swung in the full glare of the electric light by the yeomen of the guard because the plot of the first Guy Fawkes was unmasked by lamplight, and it is the impressive and stately method of looking for conspirators. The mounted messenger has been dis-pensed with, and the message is entrusted to the wires. This is the only concession A BATTLE WITH W

Wil iam E cart Gladstone, in his no alle tribute to the memory of Arthur Henry Hallam, ascribes to him the union of extraordinary character, at an unusual stage of development when his cartely caroer was terminated at Vienas in 1838. Hahad scarcely looked at life, yet it seemed as if he understood it, and was calm before its awful mysteries. His is a memory canoniz d is song, but Gladstons attempts his momories with dispassionate 'impartiality. Ho speaks of Hallam's schoolboy friend. ship as "surpassing every other that has ever been enjoyed by one greatly blessed both in the number and the excilience of his friends.

'Is is the simp'e trath that Arthur Henry Hallam was a spirit so exceptional that everything with which he was brought into relation during his shortened passage through this world came to be through this contact, glorified by a touch of the ideal. A mong his contemporaries at Eston, that queen of visible homes for the ideal school boy, he stood supreme among his fellows; and the long life through which I have since wound my way, and which has brought me into contact with so many men of rich endowm ints, leaves him where he then stood, as to natural gifts, so far as tion is concerned.

"But I ought perhaps to note a distinc tion which it is necessary to draw. Whether he possessed the greatest genius I have ever known is a question which does not lie upon my path, and which I do not un dertake to determine. It is of the man that I speak, and genius does not fot itself make the man. When we deal with men, genius and character must be jointly taken into view; and the relation botween the two, together with the effect upon the aggregate, is infinitely variable. The towering position of Shakespeare among poets does not of itself afford a certain indication that he holds a place equally high among

This fis the crit This tie the criticism of the man who always remembers poetry as a school exercise, and is mentally onstruing Virgil, when he ought to peer

through the bars of text into the landscape of the spiri', - which he never does, and perhaps never may do. Robertson proaeds to crack the helmet of this critical Da Bohun : "A barrister, it seems is beyond he pale of excusable because political sensibilities. So that if my friend be a soldier. my love him, celebrate him in poetry, because the profession of arms is by all conventional associations heroic; or if he bears on his escu'cheon the red hand of knighthood, or wears a ducal coronet, or even be a shepherd, still there are poetic precedents for romance; but if he member of the Chancery bar, or only a cotton lord, then, because these are not yet grades accredited as heroic in song. worth is not worth and honor is not honor and nobleness is not nobility. Oh, if we wanted poets for nothing else, it would be for this, that they are the grand levellers, vindicating the sacradaess of our common humanity, and in protest against such downright vulgarity of heart as this." Yet at the time the literary Remains of Hallam had been published, with an introductory

memoir, by his distinguished father, and the laudatory tributes of some of the ablest men in Beitain; while Tennyson had had some twenty years in which to test the quality and significance of his triendship. Gladstone alone, among his contemporaries, is, and will be, distinguished for a certain august greatness of character. Re-

moteness of time, and the heightened aspect of the "great departed," may not add so much to the impression of future generations as in the case of some others. not so well appreciated in their lifetime; but we cannot suppose it can ever be materially diminished. "Not Fox or Chatham nor William Pitt." says Justin McCarthy, had anything like Mr. Gladstone's capac ty for constructive legislation ; and the re sources of information possessed by Fox-or Chatham or Pitt were poor indeed when compared with that storehouse of knowledge which supplied Mr. Gladstone's intellectual capacity. Mr. Gladstone has been possessed through his life with an eager passion to do the right thing at all No human interest has been indiftimes. ferent to him, and the smallest wrong as well as the greatest has aroused his mest impassioned sympathy. Delects of temperament, of manner, and of tact, have, no doubt, been ascribed to him over and over again. He is not good, I am told at remembering faces and names. He is loved by his friends; he cannot but be honored by his political enemies—for personal an emies he never could have had."

And the recent Biography of Tennyson, no less than his peem, so long a classic, in revealing the bright spiritual beauty of his friend's character exhibits also the manly strength and moral steadfastness of his own. He was a person of extraordinary self restraint, patience, and determination "Here," says a recent writer, 'was genius who was yet a man of like passion with ourselves, domestic, lovable, tender bearted, faithful to a high ideal, pure of life, with nothing erratic in his conduct which needed the mantle of charity, which He was a 'seer' as Carlyle would have said and no doubt he had the requisite selfconfidence. But there is in him no trace of vanity. A very great man, but modest, sane, wholesome, marked by integrity in every fibre of his mental and moral nature. And what a record that is among the men

thich informs it. 'Time tries the troth n everything," and that unfailing test of character in literature provails hera. The Cavalier poets, occupied with the

finesse of song, and the pretty art of the ourious in form and expression, redeem by the happiness of their efforts the poverty of the things they have to say. It is not without good cause that we read and re-

"Her feet beneath her petticoat, Like little mice stel) in and out, As if they feared the light;"

Ask me no more whither doth haste The nightingale when May is past; For in your sweet dividing throat She winters and keeps warm her note;"

for, despite the trivality, the expression is well nigh perfect, the genuine life-blood of poesy is there, - but in tiny trickling veins instead of giant pulses. But how incomparably poor would our literature be had we only thuse things ! How far below a tour de force of Gray, or a happy in-spiration of Wordsworth ! Whon these iters do attempt a noble utterance it fal's flatly from them; and in many cases their fine se runs to the fanastic, and the affectations that a pure taste abhors. Fven "Hudibras" with all his long wit is not redeemed from the disgust an earnest spirit teels in seeking to follow him ; and, one is tempted to doubt whether Butler was worthy a better tate than betel him.

We are not diminishing the glory of the true artist, without these higher qualities. It is not to be denied that all perfect art has justly its own praise and moad. But it is a needful thing just now to emphasize the relation of great souls and great ideas to all high and genuine art. To this truth, John Burroughs, one of the sincerest of men, comes bearing witness : "A man like Poe is of the true poet type, but his contribution is unimportant because there is not enough of him . . . There is a mastery in him not in Longfellow, but Congfallow will outlive him because he bas a winning genial personality, and his works are sweet and wholesome. Poe's mastery is over the elements of verse, not over the elements of life or spirit. Shelley, Swinburne, Rossetti, and all that ilk do not fail as artists but as mm."

I went to a table which was covered with a multitude of richly-figured and highly gilded dishes. The people who sat with me seemed devoid of wholesome appetites, and lingered admiring the meau. When I listed the covers from the file dishes 1 discovered the nearest to nothing in them. Then I arose and said : "I will go where things are plainer, and where I can be fed. Just now the public fancy runs to gilded

They were five, with the guide, snugly camped up in the forests of the Rangeley suntry, and the day's sport had been a trifle heavy, if empty. They had done a long tramp; the broad fireplace yawned a a crackling comtort; there was socching punch on the table and our pipes were drawing well. The talk had drifted to casnalty and fatality, and to the exchange of views upon the hair breadth line which div-ides the change of life from that of death-in peculiar cases."

had been licensely frightened to his death a few years before by the carush of a big bull moses which he had wonaded with his last cartridge. The brute had been knocked over by a shot from the guide before it reached the boy, who, though unmarked by a scar, through simple terror had lost his hold upon the spark of life. few inches had brought death, and others where men had fallen distances of filty or sixty feet, only to get up and walk off unharmed. The doctor had been a silent Kstener all this talk and sav gazing into the glowing coals until all our stories were ended. Suddenly he went to his shakedown and from beneath it drew an old and weather beaten satchel, from which after some search he took an envelope and returned to his chair. 'My theory is, boys,' that a man lives until his time's up, and no longer, and that it makes little or no difference in his length of life what he does or doesn't do I seldom air this theory. In fact I don't generally like to speak of death, but to-night, for reasons, I'm going to tell you of an ex perience which strangely bears ou; my theory, and which lies many years back. 'I had just fairly settled into the busine left me by an old practitioner in a small ountain town in Vermont. It was not a town of wealth or great mortality, and I was not a busy man. Still, my reading kept me occupied for the most part, and I had just enough at outside work to give me exteroise and maintenance. Even then me exercise and maintenance. Even then I had formed opin'ons and read widely

upon the doctrine generally referred to as fatalism. I had observed nothing which controverted my ideas, while there had come to me much in their support. Early on a blustery, stormy evening] was lounging in my easy chair, before a roaring fire, pondering over a very strange deposition which I had just read, when my thought was interrupted'by the sound of wheels, and a moment later there was a determined knock on the door, and I opened up. A quarryman whom I knew by sight was my caller 'For God's sake, Doc,' he said, com

and we were off. The Overbook quarry was six miles distant, and during the drive I gathered particulars. Big Briggs bad been drilling for a heavy blast all afternoon, and had loaded for an early morging firing just before the knock-off He had been tamping down the powder charge, short time had made him careless and there had been an premature explosion The tamping iron had been driven up through both jaws and through the top of the cranium and still remained in the wound. I mentally concluded that my driver was either drawing the tale o'er strong through encess of excitement, or that there would be no need of my services when we reached the patient ...

But I found his statemen: of conditions literally correct. Poor Grigge sat there with isws locked firmly together and with about seven inches of iron protrading from his chin and a similar length frem the apex of the skull. The bar was round, two feet long., with a diameter oftone quarter, inch at one end and one and one-quarter in hes at the other. It must have weighed seven or eight pounds. I went to work: and made him as com'ortable as I could, thinking meanwhile of the least brutal way in which to tell him that the long night must soon come. I was a bit surprised that he was sane, since the wound muat have been very snug to the brain cells, but. he was fully conscious, though in great pain

"Has a protty world, senoy, but not all has been happiness. I have seen of the travail of my soul and I am satisfied."

He rose and filled his glass. 'Fill and drink, boys,' he called, and as they gathered 'round without volition to resist his whim, he continued: 'Drink to the unsolvable riddle of life: to the unfathomable arbitrament of fate, and to the untroubled sleep which follows all in God's good time."

Three glasses were replaced with brimming edge untouched upon the table,-one, the doctor's-lay shattered on the hearth. Hurried good nights were said, and a half hour later quiet ruled the camp. But one unsleeping member of the party went out an hour later to view the skies and judge of the morrow's weather. And there be tound another sentinel, who growled :

What a damned ghastly finale- for an wening's good chear! I wish the doctor had kept his infernal fancies and his uncanny toast to himself:

The next day's hunt promised to be empty of results as was its predecessors. With the dusk three had returned to camp with royal appetites as the sole capture of the day, and the guide was rushing: up a supper, encouraged by a running fire of adjuration. At length all was ready and they drew up chairs. The doctor had not yet shown up, but he was a stayer as a sportsman, and always the last man home. They knew he had gone over to a blind which he had thrown up near a promising lick at an inlet of the lake. He had salted the lick some days before and had since noted sure signs of moose. Against the judgment of the guide, who scouted his ability to fool a moose by a blind in the location which he had chosen, the doctor had sworn that if he took one at all he would take him there, and his patience and repeated failure was a joke of the camp. Pro he had waited until darkness had fairly shat in before giving up his vigil; and even then was stumbling bomeward through the

And there they found him, dead and half crushed under the weight of a moose of 700 pounds. The signs about told the story. The tracks were not two house old

of the world truly great !" This brings us to reflect on the importance of character in shaping, and giving quality to, the great masterpieces of liter-ature. These evince something more than

the artistic sense, or than literary dex:erity of their authors. We instinctively feel that Homer Æschylus, Dante, Milton, even from the tone of their works, were not only great poets, but great men; and other than to study his work to know that the last named greater poet was 'a dedicat-ed spirit,' one who thought humself

and in turn we examin ed the picture. As it was passed from hand to hand each face mirrored the depressing thought of the years of unceasing suffering which had preceeded the awtui nakedness of the skull. The punch bowl received renewed attentions, and the talk broke away into forced and aimless channels, difficult for men to sustain long. At last one of them, in wellintended effort to lighten the mood of the bour, said :

Well, Doc. when have you figured on reached the limit of your earthly mission f Try and plan to finish this hunt with us, for we are bound to strike a moose before we are through.'

The doctor had gazad into the coal without a word since the the tailing of his story, but his lips now parted in a slow and melancho'y smile as he calm'y anwered :

"The Internal Bith"-That is positively what the latest device for beautilying love-ly woman is called ! I confeas that when I first heard of it I thought it must be some rew application of that terrible remedy for dyspepsis, the stomach wash-ing tube, and I wondered if it could be possible that even the pursuit of beauty could lead to such lengths. It seemed to me about the only way one could take an internal bath, and the shuddering speculation aross in my mind as to whether scap would be considered an essential part of the inward ablution. I was immensely relieved however, on going a little more deeply into the study of the matter, to find that the internal bath merely consisted of a certain number of glasses of water drunk daily, and that, if persisted in, the result would be beauty in a most unexpected. and astonishing degree, and with a suldenness prefectly bewildering even to the beautiful one herself. The skin becomes soft and clear, the eyes bright, and] the cheeks take on a color that would put a June rosebud to shame. Of cours] something depends on the quality as well as the quantity of water used, it must be pure soft spring water free from all mineral properties, and not iced, and the patient must consume not less than half a gallon a day at first, the quantity to be increased as water drinker feels inclined. The drinker begins the day by sipping a pint of cold water slowly while she is during the day she gets through with a full quart, beginning about an hour after meals and the last pint is consumed after the manner of the first, while the patient is preparing for bed. Such a regimen is warranted to wash away not only nerves, lack of appetite and that tired feeling, but also circles under the eyes, depression of spirits, sallowness of complexion

I believe physicians have come to the conclusion that half the children of Adam are literally dying for want of water, though they don't know it, perishing of thirst in a land of many rivulets, as it were; that the system requires far more liquid than it gets, and that the rational remedy for many of the ills that fish is heir to, liss in the water pitcher. Acquire the habit of drinking plenty of pure spring water, and you will speedily find yourself better off physically, mentally and even morally, since the water drinking habit is said to have a directly beneficial effect upon the temper, and general disposition. as well as upon the personal appearance. The water must never be taken at meal times, as the habit of drinking water while eating, is most injurious. Certain it is that few of us drink as much water as we should, and the habit of doing without water altogether is one very easily cultivated. I used to be quite a water drinker myself, but somshow nature having provided me with very abbreviated accommodations for fuel, I never could eat as much as I would like, without feeling uncomfortable, and I found that a whole tumbler of water used up all the space I had for legitimate vi tles, so I had to give up one or the other. I could not live on water so the rittles won the day, and now I scarcely ever think of taking a glass of water. Perhaps I shall grow young and vigorous as an eagle if I take to it again, besides having my natural charms largely increased; so I must give the matter earnest consideration, and make a choice once more.

RED ROUGH HANDS Softened and Beautified and all your time seems wasted. However, water is both cheap and plentiful, and one

can driak it cold, while milk is expensive in the winter season, and the heating process involvés considerable trouble, especially after the fires are all out at night, so if plain cold spring water is going to have the same effect, by all means let us give it the preference, and let the internal bath have the advantage of a thorough, and impartial trial.

A little while ago there was a well de fined rumor of the return of carrings to fashionable favor, and as the fashions of 1830 seemed to be gaining so firm a foothold, of course we expected nothing else than "ear drops" which would reach from the lobe of the ear to the shoulder, and were preparing to think them lovely. But somehow good sense and good taste have held their own, and the woman of fashion still wears her little ears undecorated ; and unmarred by scars which show where the flesh has been pierced, in order to insert an ornament. But if the cars are not decorated the same cannot be said of the wrists, for bracelets of every description were never more fashionable than now.

In fact so eagerly are they sought after that the jewellers say they are being kept busy converting handsome earrings into handsome bracelets. Almost every variety of bracelet that has ever been worn is fashionable now, but there seems to be a prefarence for the slender bangle style which admits of a great number being worn. Therefore the woman who owns a pair of diamond earrings which are of no use to her and feels the need of something new and beautiful in the bracelet line, merely takes the earrings to a jiweler, and has the two stones set diagonally across a plain gold wire which fastens around the arm. Sometimes she has two bangles each set with a single stone. The more elaborate bracelets are set with a garnet, sapphire, beryl, topsz or turquoiss surrounded by diamonds. Of course we are not all so for unate as to have handsome earrings lying around. waiting to be utilized, but even if we have none, that is no reason why we need go braceletless, since the simplest, as well as the most expensive bangles, are fashionable. There are silver and gold bangles, locked brasslets, chain and padlock brace-lets, extension bracelets set with semiprecious stones at close intervals, bracelets made of the rarest jewels, and the most alaborately wrought gold, and lastly every maginable pretty fancy and quaint concei developed in silvar, and so inexpensive. that almost everyone may gratily har tas'e for pretty things at a very small outlay. There is the s'ender wire hung with coins, the pretty twist of rather thick silver from which depends a single locket-like charm

The Ger-mans love her, in the first place because she is of their race, and secondly because she does not air the same notions that her consecrated and hallowed' husband is in the habit of doing. An American woman who saw the Empress and her regiment in review before the Emperor contessed it was a beautiful table au. After long lines of men and officers went by there was sharp flourish of bugles and eight splendid men on gray horses, in white uniforms, flashing belmst and cuirasses, rode rapidly into view. Four were in front and fou, behind the Empress, who rode alone. Her horse, bridle, saddle and habit were pure white. Over the breast of her silver acing riding jacket a row of medals gleamed, a sash of a royal order was draped ove: one shoulder, two long white ostrich plumes streamed backward from her little cocked hat and in one white-gloved hand she held a shining drawn sword. "There was a spontaneous ovtburst of applause as sh) went swiftly by,' said the American woman who saw it all, and saw, too, she said the fiery young Emperor's face relax for a memont as well it might, at the sight of his wife's graceful figure, her smiling face and her perfect control of the animal

Weeks have lengthened into months since Andree disappeared, and months are growing toward the half-year mark, and no news of him comes from the vast n ws is good news, scarcely can apply. The contrary is true. Absence of news is ominous, and every day that passes with out some tidings narrows the margin of reasonable hope. It is too soon yet to give him up as lost. But it is certa in that he has not fared as well as he expected to, and the chances are that he has fallen at least into serious distress. So much even his most op'i nistic friends concede, while whose who always reckoned his venture foolbardy consider their worst forebodings fully verified.

These are the data on which all reckonings of hope or fear are to be made: Andree and his two compaions set sail in their balloon from Dane's Island on Ju'y 11-about six months ago-bound for the Pole and across it to the Arctic basin. The balloon contained 4800 cubic metres of gas, and was made of threetold silk and gutta-percha, with netting of Italian hemp. It had a wicker, canvas-covered car, 6 feet in diameter and 412 feet deep. The equipment included a cookstove, provisions for four months an 1 plenty of water in aluminum cans, a sledge, a boat big enough to carry elerven men and plenty of arms and ammunition. The start was made under favorable conditions, straight toward the Pole. At the initial rate of progress the Pole should have been reached in a couple of days at most. The balloon, barring accidents, was able to keep afloat for at least two weeks. The weather for some days after the start was favorable to the prosecution of the enter-

Thus far the facts. All else is speculation, excepting that the balloon can surely not now be afloat, and that the voyagers if they still survive, must have exbausted the store of provisions with which they started, unless they found means of replenishing their larder. The latter is probable. We know from Nansen's experience that men with arms and ammunition can get food even in remotest North The serious problem is, in what circumstances did they part company with the ballon? If by any mishap it collapsed or exploded in mid-air, and precipitated them suddenly from great height upon either ice or open sea, their fate is not doubtful. If, on the contrary, the balloon gradually failed, and they took their departure from it deliberately and with ample preparation, all may vet be well with them. Where they are, supposing this favourable theory to be correct is of coarse a m-stery. Any point on all

supposing this favourable theory to be cor-rect is of coarse a m_stery. Any point on all the vast circumference of the Polar basin is possible. If they were landed on the Siberian coast or the North American coast, or the upper part of Greenland, it would take months for them to work their way down to civilizition. If, as some suspect from observation of the meteorog-olical conditions prevailing since their start, they were carried back to Eranz Josef Lund, they would probably build a camp and remain for the winter. There is no occasion to wonder that nothing has been seen of the forty carrier pigeons and doz ns of cock buoys which Andree took with him as means of com-municating with the world he had left be-hind him. The experiments of the Prince is difficult in the regions where they are likely to be seen. As for the pigeons, there is little reason to suppose that they could survive for even a hundred miles of flight in that inclement climate, not to mention the many hundreds they would have to Joset Lund and one or two other such points. The general sweep of the Arctic basin is far too vast for any scratiny of it to be made. For the rest, there is only hope.-N. Y. Tribune. SOME ONE RAD BLUEDERED ats of the Famous Charge of the Light Brigade-

and occurrence of the forty-third ' and versary of the famous charge of the British Light Brigade at Balaklava has led to a summing up of the events of that occasion by an English periodical. This account is a frank confession of the extraordinarily bad management of the British comman-dars, as well as a new statement of the un-doubted valor of the British soldiers who participated in the fight.

Lord Lucan, who commanded the divis-ion in which was the Light Brizade, had never seen any war service, though he was hever seen any war service, though he was between fifty and eixty years of age. He was moreover, accustomed to think a long time before he did anything—a quality not always desirable in a military commander. Lord Cardigan, who commanded the Light Brigade, was also a 'carpet-knight,' with-out war experience. He was oldor than Lord Lucan, and although he and Lord Lucan were brothers-in-law, they were bit-

The Light Brigade was not so very light, for some of the men, with the heavy saddles and other equipments then in vogue, rode their horses at three hundred and eight pounds in marching order. It was qui'e up of shreds and putches of other regiments -a squadron from the Queen's Own Light Dragoons, one from the English hussars, and so on ; one of the squadrons belonged to what were called the Whitewashers, on count of the profuse white facings on the

The Russians under General Lipra had been menacing the position of the allies near the village of Balaklava, and had taken some British guns from the Turks. Their advance had been checked by the charge of the Heavy Brigade-very much better war than the subsequent charge of the Light Brigade, but not so 'magnificent'. In retiring, after the charge of the 'Heavies. the Russins had these guns with them, in a somewhat exposed situation, and Lord Ragian, the British commander in chief, sent a written order by Captain Nolan to Lord Lucan to send the Light Brigade to

This Captain Nolan was a dashing officer who had written several works on cavalry instruction; he regarded himself as a great soldier, and felt a contempt, which he had freely avowed, for both Lord Lucan and Lord Cardigan. Captain Nolan rode up to Lord Lucan, and repeated the order he had brought to 'take the guns.' 'What guns ?' asked Lord Lucan.

The captain turned on him in contempt. He was delighted to have an opportunity to snub a superior office: whom he des-

'You have your men, my lord, there are the guns; go and take them !' he said, tossing his head in the general direction of the field.

At the opposite end of the ridge from that on which were the captured guns, the Russians had their position well protected with a battery of twenty or more of their own guns. There were also strong flank ing batteries on neighboring hills. Misled by an impertinent subaltern, and without the guidance of wisdom and experience, this 'carpet-general' ordered his brotherin-law, carpet-knight like himself, to charge with his brigade the main Russian

'Vory well, my lord, it shall be done, said Cardigan, and advanced with the brigade.

When Captain Nolan, returning to Lord Raglan saw the Light Brigade riding toward the main battery, he was horrified, and turned back to correct the terrible mistake. He was on his way when a shell struck and killed him. He had expiated his offence with his life.

Arrey of the Commune. Like many an-other, lear and fear only had led him into and kept him in the ranks; he had no heart for a war of brothers, and now that his shape he had some a source of the far war. It was not long, however, before the family. The privations of the siege, the long and weary waiting at the butchers' and bakers' shope when the scanty dole of tood was distributed in the rigor of that terrible winter. had stretched his mother on the bed of suffering, where she lay slowly dying. One day when he had gone with others to dig for potatoes in the frost-bound plain of St. Denis a Prussian bulle broke his shoulder, and afterwards, driven partly by hunger, partly by fear of his companions' threats, he had enrolled himself in the Army of the Commune. Like many an-other, is and fear only had led him into and kept him in the ranks; he had no heart for a war of brothers, and now that his life was about to pay the penalty, he was glad that he could lay no man's death to his charge. 'You are sure !' 'Certain.' 'We shall see when the time comes.' The boy would have thrown his arms about the officer in his wild joy and gratitude, and the latter repelled him gently...

of the firing party,' he added, grimly. 'Off with you?' Victor ran like a hare. The officers smiled as they watched him disappear. Twenty minutes later he knocked at his mother's door, and the neighbor who was tending her opened to him. She started and exclaimed when she saw him, for, like everyone else, she believed him dead. He would have rushed to his mothers room, but the woman stopped him. 'Go very quietly,' she said, in a low voice; 'she is asleep. She has been very ill since you went away, but she is better now. The doctor said yesterday that if she could sleep she would soon get strong-er; but she mut not be awakened. Poor thing! she will be glad to see you, for she has asked for you so often. When she was not calling you she was praying the Bon Dieu to preserve you and to restore peace in the land. Helas ! one would say He had abandoned us, the Bon Dieu, and let men do just as they liked. It is awtal ?' But Victor, imputient, thught he heard his name called in a faint voice. He moved on tip-toe toward his mother's bed. He had not been deceived-the sick woman's eyes were opened wide. 'Victor ! my boy !' she cried, in her thin, weak voice. Without a word he lay down beside her and her arms closed round him hungrily. And mow the boy who had faced death

Vistor's sobs grew less frequent and less violent, and soon nothing could be heard in the little room but the regular breath-ing of the mother and her ohild. Ashamed of his weakness, the boy forced himself into self con-trol, and when he raised his head from the pillow, once more believing himself strong-er than love of life, his mother, yielding to the reaction which her sudden joy had caused, was sleeping peacefully. The sight restored his energies. A kind Providence, he thought, had wished to opare him a scene which his strength and oursee could not have borne, and he re-solved to go at once. Lightly he kissed to smile, he thought; then he went out unriedly and returned to his post as quickly as he had come, not seeing a soul he met nor daring to look behind him. "What is o scen P' the commandant cried astonished. He had hoped, tike the good hearted man he was, that the boy would not return. "But I had promised !"

"Boarted man he was, that the boy would not return. "But I had promised !" "Doubtless, but why be in such a hurry P You might have stayed with your mother some time longer, and still have keep your word."

You might have stayed with your mother some time longer, and still have keep your word." 'Poor mother! After a scene of tears, which seemed to take all my courage-tears of joy for her, of despair for me-she hell asleep so calmly, so happily, that I dare not wait for-her to wake. She fell asleep with her arms about me, thinking I should never leave her again; how could I have told her the truth? Who knows whether I should have had the courage to leave her after doing so? And what would you have thought of me if I had not come back? 'So I kissed her and slipped away like a thief while she was sleeping, and here I am. Pray God may be good to her as she has been to me. Mon commandant, I have one more thing to ask- to finish quickly.' The officer looked at the boy with mingled pity and admiration. His own eyes were full of tears. 'You are quite resigned, then death does not frighten you P' he asked. Victor answered him with a gesture. 'And if I pardoned you?' 'You would save my mothers life, too, and I would revere you as a second father.' 'Allons! you are a plucky lad, and you have note, and love her a lawsy.' As he spoke the few last words, the officer took the boy by the shoulders and pushed him away gently. 'It really would have been a pity,' he said, half-apologetically, to his staf, as he turaed toward them. Wictor did not tare to wake her, although her sleep scened troubled. He lay down again beside her. Suddenly she ast up, orying; 'Meroy ! Victor! My child ! Oh! Mercy !-Ah! you are here it is really you? ' she added, wak-ing. PLUCKY BUT FOOLHARDY.

An English Officer who Was not as Cautio As he Sheuld Have Been.] A hunter of wild beasts must be plucky, and he must also be prudent. In his 'Reminiscences of India,' Colonel Pollok tells how one of the best shots in the country, and a very 'lucky' hunter met his death by his tooligh resh cident.' t his death by his toolish rashness. Wedderburn was an English officer who had floored elephants and tigers right and left. One day, news having been brought him by the jungle people that there was a rogue elephant in the neighborhood, he took the field, accompanied by Oochs, a Lative hunter, noted as the slaver of many elephants, and by a dogboy famous for his steadiness. He soon came across the rogue, a huge, tuskless elephant, and floored it ; it got up on its teet, and again Wedderburn knocked it down. The beast would not die, and a running fight ensued, which was kept up ill all the hunter's ammunition was expended except the charge in one barrel of his rifle. The dog-boy had been sent back for more ammunition, but had not reurned. The elephant, though weak, was very angry, and evidently had made up its mind angry, and evidently had made up its mind to beat off its foe, or to die fighting. Re-tiring to an open space, the animal stood at bsy. Wedderburn proposed to Oosha to accompany him into the glade, but that experienced hunter said, 'Sahib, I have never known any elophant take so many bullets. He is a shàitan (a devil). We are in bad luck to-day. Leave him alone; he has no tusks; and besides, he is sure to die. Do you remember that evening we spent in the garden here before I went away? I have never ceased to think of you, and now, ah! Joyce, I love you, I love you. Forgive my long salence and make me happy at last." The eager words break from his lips in a torrent, and then she looks at him with a smile. Her sweet, clear voice strikes him as almost cruel when she speaks. "There is nothing to torgive,' she says, coldly. 'We are both quite aware that that past you speak of was purely a matter of ammeement. One must amuse one's self in a place like this, you k row. And, after all, it was simply pour passer le temps.' He looks at her uncomprehendingly, till a glimmer of the truth breaks upon him with terrible force. There is no hope. 'Joyce,' he criss desperately, 'is this all you say to me after years of devotion ?' His abeolute selfishness startles her, and, words tise to her lips which might have torn the veil somewhat roughly from his eyee, but she checks them, and rues from her seat. ''What mere can I say?' she says.

torn the vent sondown and rues from her seat. "What mare can I say?' she says, sweetly. We are all fools at some time of our lives, and we were no exception to that rule. Ah, Ted, is that you?" The door opens and a man enters. Joyce lays her hand on his arm. He is a tall, fine looking man, broad-shoulderod and stalwart. "Captain Tremayne," she says, turning to Dick, with a smile, 'I must introduce my husband, Sir Edward Carew. Ted, this is Sr John's brother.' The two men shake hands, and Dick, reading the absolute trust and love for her husband written in Lady Carew's sweet eyes, mentally curses his folly, and knows that what he has sown that surely he has also reaped—and the harvest is bitter. —The Daughter.

They Will Do for You. From the Co borns Express. There are few if any people in Murray township, Northumberland county, to whom the name of Chase is not familiar. Mr. Jacob Chase, who has followed the occupation of farmer and faherman and fishdealer, is especially well known. He has been a great sufferer from rheumatism, as all his neighbors know, but has for-tunately succeeded in getting rid of the disease. To a reporter he gave the follow-ing particulars. I hud been a sufferer from rheumatism for upwards of twenty years, at times being confined to the house. At one tune I was laid up for sixteen weeks, and during a portion of that time was confined to my bed, and perfectly helpless. I had the bentfit of ex-cellent medical treatment, but it was of no avail. I believe, too, that I hive tried every medicine adver-tied for the foure of rheumatinn, [and I am sure I expended at least \$200.00 and got nothing more at any time than the merest temporary relief. At last I was and daily found that the trouble that had made my ifte missebel for several months and daily found that the trouble that had made my ifte missebel or so many years was disappearing, and at last all traces of pain had left me and I was cured. I say ured, for I have not since had a recur-rence of the divensity of troubles for

was disappearing, and at last all traces of pain had left me and I was cured. I say cured, for I have not since had a recur-rence of the trouble: As proving the diversity of troubles for which Dr. Williams' Pink Fills are a cure it may also be mentioned that they also re-stored Mrs. Frank Chase, a daugater-inaw of the gentleman above referred to, to health and strength after all other means had apparently failed. Mrs. Chase says —''I can scarcely tell what my trouble was, for even doctors could not agree as to the nature of it. One said it was con-sumption of the stomach, while another was equally emphatic in declaring that it was liver trouble. One thing I de know, and that is for years I was a sick woman. I know that I was filicted with neuralgia, my blood was poor, and I was subject to depressing headaches. My appetite was not good at any time, and the least exertion left me weak and de-spondent. A lady friend who had been benefitted by the use of Dr. Williams' Fink Pills advised me to try them, and a teermined to do so, and I have much cause for rejoring that I did, for you can easily see that they have made a well woman of me. I took the pills steadily for a couple of months, and at the end of that time was enjoying the blessing of good health. It gives me much pleasure to be able to bear public testimony to the value of this wonderful m-dicene." Dr. Williams' Pink Pills care by going to the root of the disease. They renew and build up the blood, and strengthen the system.
