Your Spring Hat is Ready

SPRING is the "dress-up" occasion for all womankind. It is the season of the year when a new hat is as necessary as a new pair of shoes, a new dress or a new suit. And we've prepared our stocks for an unusually busy season. Very choice straw weaves in novelty finishes and other fashionable effects trimmed and turned with a clever attitude that denotes real style distinction.

Economy

Ford car economy in first cost, in fuel cost, in maintenance cost, makes it the car for the owner of today.

The secret of Ford car economy is the Ford engine, simple and powerful, using a minimum of gas and oil for a maximum of mileage.

Ford car sturdiness of construction throughout gives it the endurance which assures economy of maintenance as well as of operation.

FORD PRICES:

Touring Car, \$675 Runabout, \$610
Coupe, \$1,100 Sedan, \$1,200
Chassis, \$550 Truck Chassis, \$750

\$100 extra for starter, except on Coupe and Sedan, which are equipped with starter. These prices are f.o.b. at Ford, Ont.

DISTRICT AND GENERAL

In 1905 five persons were killed in Chicago by automobiles. In 1920 they killed 542.

Six months' exposure in the open air reduces the heating value of coal by nearly 10 per cent.

The Osgood Silk Company have leased 20 acres of land near Simcoe for silk worm culture and the production of silk.

Soldier Settlement Board figures up to the end of February show that 25,550 returned soldiers have settled on the land.

Bennie, only son of Alex. Mellott, aged 10 years, of Ridgeway, was struck in the temple by an artichoke thrown by a companion while at play and died from the injury.

As a result of the decision of the Ontario Beet Growers' to reject the offer of the Dominion Sugar Company it is said that an independent factory may be established at Dresden.

A Milton gardener who paid as high as \$9 a bag for seed potatoes last spring was offering the product last week at 20 cents a bag. Potatoes are the lowest in price for many years.

Mail order houses appear to be losing a good deal of their popularity. The 1920 financial statement of one of the large department stores in Toronto showed a marked falling off as compared with 1919.

Four cars of a Wabash freight train were derailed at Thamesville last Wednesday, caused by a broken engine. One box car in which a Stouffville drover was riding with a load of cattle was thrown across the track and over the small embankment. The drover was injured slightly on the hips, but the cattle were not hurt.

Under the terms of the last will and codicil of the late Mrs. Mary Campbell, late of St. Thomas, provision is made for the establishment and maintenance of a retreat or home for respectable ladies of the age of 55 years and upwards in deceased's late home. Following the death of her husband, Dr. Archibald Leitch, she will dispose of \$74,000 worth of property.

The volume of the manufacture and sale of motor vehicles is most marvellous. It is only twenty-two years since the first automobile was made and sold in the United States. Last year no less than one million eight hundred thousand vehicles were sold in that country. Ten years ago automobile industries were first established in Ontario and the product of passenger cars to date is some four hundred thousand.

The sale of the Ontario Duroc Jersey Breeders' Association held at Essex on Saturday, April 9th, did not realize a high average. Some of the stock was rather young that was offered and accordingly the prices obtained were not as high as in previous sales. An average of \$75 was secured for sows with the top price of \$141 being received for one gilt. Purchasers were present from as far north as Brussels and as far east as Galt.

At a meeting of the Presbytery of London on Tuesday applications were received from 12 ministers of other denominations who desire to enter the Presbyterian ministry. Four are Congregationalists, two are Baptist, two Anglicans and one a Methodist. The denominations of the remaining three were not made known. Five others applied to the Presbytery at earlier dates, and the applications of all 17 are to be sent on to the General Assembly.

THROGS ATTEND BURIAL

Guthrie Presbyterian church at Melbourne was thronged Wednesday afternoon at the funeral service of Russell Campbell, the popular young man shot to death by one of the bandits who tried to rob the Home Bank.

The entire village turned out to the funeral and parties of Great War Veterans from London, Strathroy, St. Thomas and Glencoe turned out to do honor to the memory of one of their most valued members. Residents of the countryside for miles around attended the service and followed the remains to the Longwood cemetery.

After a short service at the home the remains were taken to the church, accompanied by a military escort. Several motor cars bore the floral tributes, some of which were most elaborate. The services at the church were in charge of Rev. John Elder, Rev. Robert Stewart of Dutton, Rev. Dr. Brown of Melbourne and Rev. Dr. Rose of Delaware.

The occasion was a solemn one and in the addresses of the clergymen and in the attitude of the people who thronged the edifice there were many evidences of the esteem in which the late young man was held and of the sympathy that is extended to the family.

The escort was in charge of Capt. Freese of Glencoe and was composed of comrades from the surrounding district. The pallbearers were Comrades Newman, Stevenson, Liddington, C. Bechill, H. Bechill and E. Smith of Glencoe.

Among the floral tributes were pieces from the Home Bank, "Village Friends," Glencoe War Veterans, the U.E.O.F., Camerleybury School, Retail Automobile Association and London G.W.V.A.

At the graveside Rev. Dr. Rose took charge of the service. "Last Post" was sounded by a bugler and a volley fired.

Wedding cake boxes at The Transcript office.

LONDON POLICE NAB RUNNERS AFTER LONG CHASE

London, April 14.—Local detectives in a police car yesterday afternoon overhauled and captured four runners in two automobiles, together with 100 cases of whiskey valued at \$2,500. The chase led the detectives to the other side of Highgate, on the road to Detroit, a distance of about 50 miles. The prisoners gave the names of Timothy Hogan, Windsor; Fred. Bann, Stratford; Austin Moran, Detroit; and Jay June, Windsor.

Standing at the corner of Dundas and Richmond streets at about 4 o'clock, P. C. Gavin Monaghan, in plain clothes, noticed a Cadillac touring car go by with an Ontario license and a Chicago Motor Club badge on the front. The side curtains were drawn and it sped over the intersection so rapidly that it attracted much attention from people who hurried out of its path. Immediately following was a RKO speed wagon with a load of some kind covered by a tarpaulin.

The policeman became suspicious and notified headquarters. Detectives were at once sent in pursuit, armed with rifles and revolvers.

The run-runners were going at great speed, however, and it was not until Wardsville was reached that the two cars were sighted, though the police car had been making 50 miles an hour where the roads were good.

The men in the Cadillac, which had been following the RKO, suddenly noticing their pursuers, opened up the throttle in the big touring car and the farmers in the adjoining fields saw a real race.

The police car, a big Paige, hit the high spots and registered 65 miles an hour for a time. The Cadillac, however, kept in front and the detectives used their rifles and peppered the back of the car. One bullet ripped a hole in the spare tire, and others dented the gasoline tank but did not puncture it.

Then Hogan and Bann pulled up and, jumping from the car, took to the fields. Several bullets were sent after them, and they surrendered in a hurry. They were handcuffed and left with two officers, and then the detectives started after the speed wagon, which had taken advantage of the situation and had sped westward. It was easily overhauled, however, after a couple of shots had been fired, and June and Moran were made prisoners.

On Monday fines aggregating \$2,500 were imposed on three of the men. Bann was discharged, and the motor cars were restored to their owners.

THE MELBOURNE INQUEST

"That Russell Campbell came to his death in the village of Melbourne on Monday, April 11, by reason of injuries inflicted by a bullet fired from a revolver in the hand of Sidney Ernest Murrell, at the time the said Sidney Ernest Murrell was engaged with William George Murrell, Henry Jack Williams, and a person to the jury unknown, in a common purpose, namely, robbing the Home Bank at Melbourne, and in the opinion of the jury all four persons are responsible for the death of the said Russell Campbell."

This was the verdict returned by the jury empaneled to investigate the cause of the death of Russell Campbell, and which heard the evidence in the matter, at Melbourne on Thursday. The inquest was marked by the sentiment of the spectators, which was strongly against the prisoners. The attendants at the inquiry did not restrain their feelings in the least, and at times cheered loudly, and applauded when evidence of a damaging nature was given against the prisoners.

Two witnesses identified Sidney Murrell as the man who shot Russell Campbell. Of the two witnesses, Stuart Campbell, brother of the deceased, gave the strongest evidence, swearing that he saw Russell collapse after the shot was fired from the bandit's gun.

Several other witnesses were examined, but their evidence did not materially alter the details of the tragedy already published in these columns.

Crown Attorney J. B. McKillop of London secured the evidence, while Dr. W. H. Woods of Mount Brydges presided. J. M. Donohue of London was counsel for the prisoners. The post mortem examination of the remains of deceased was made by Dr. Dewar of Melbourne and Dr. Freese of Glencoe.

CHARGED WITH MURDER

Formal charges of murder have been laid against Sydney and William Murrell and W. H. Vaughan, also known as "Slim" Williams, for the shooting of Russell Campbell at Melbourne. The informations were sworn to before County Crown Attorney J. B. McKillop by Sergeant of Detectives Thomas Nickle. When "Pat," or "Fat," as he is now said to be known, the fourth bandit, is apprehended, a charge of murder will also be preferred against him.

The three prisoners attributed their failure to rob the bank to the fact that there were women in it.

The preliminary hearing of the prisoners will take place at Melbourne today.

Paring a corn is both risky and ineffective. It is much better to use Holloway's Corn Remover and eradicate them entirely.

Inexpensive amusements: Criticizing the town councillors.

GLENCOE'S NEW SKATING RINK

Stock is Pretty Well Subscribed—Work of Building to Begin Shortly

At a meeting of shareholders and canvassers of the Glencoe Rink Company, Limited, held at the town hall on Tuesday evening, it was intimated that the stock had been subscribed sufficiently to warrant the directors proceeding with the erection of the rink, and the building, it is expected, will be begun early in June.

A proposition from the Mosa and Ekfrid Agricultural Society to have the rink erected on the fair grounds was favorably considered, and it was decided to ask the directors of the agricultural society to meet the directors of the rink company at the town hall here on Saturday evening next to confer in the matter.

HORTICULTURAL SOCIETY

At a largely attended meeting held at the town hall on Wednesday evening, April 14th, the Glencoe Horticultural Society was organized. The meeting was opened by R. M. McPherson, who explained the object for which the gathering was called, and introduced Dr. F. E. Bennett of St. Thomas. After a brief address Dr. Bennett called for an election of officers, with the following result:—President, R. M. McPherson; honoraries, Revs. Allan McPherson, Revs. D. G. Paton, T. J. Charlton, R. J. Garbutt; vice-presidents, Mrs. W. A. Currie, Dr. R. J. Mumford; secretary-treasurer, Mrs. J. E. Roome; directors—B. F. Clarke, C. E. Davidson, Mrs. A. E. Sutherland, J. M. McGregor, Mrs. A. J. Wright, Jas. Poole, Mrs. M. J. McAlpine, Mrs. Ed. Mayhew, Jr., Mrs. Rose Stuart, L. Suttler; auditors, C. G. York and Gordon Dickson.

Dr. Bennett then gave a very interesting and instructive address, emphasizing the importance of the horticultural work, illustrated by lantern slides. On motion of Rev. J. J. Garbutt and Rev. D. G. Paton, a hearty vote of thanks was tendered Dr. Bennett.

BIG "DRY" MAJORITY

It is expected that when full returns are in there will be shown a majority of 200,000 for prohibition in the voting which took place throughout the province on Monday.

THE LATE MRS. McTAVISH

In the death on Friday, 15th inst., of Mrs. Isabella McTavish, this community loses another of its old residents. The deceased was born on Feb. 12, 1846, at 24, third concession of the township of Ekfrid, the old family homestead, where she resided till the time of her marriage, Feb. 23, 1881, to John McTavish of Clearwater, Man. Shortly after her marriage she and her husband left for their new home in a new country and endured the hardships of the pioneers, there being but few settlers at that time in what is now a prosperous farming community. On Jan. 23, 1884, the hand of death entered the cosy little home and removed the husband and father, leaving Mrs. McTavish and her infant daughter, Annie, now Mrs. Godfrey McMurphy of Glencoe, to face the battle of life alone. They returned shortly after to the old family home where they resided for a number of years, later removing to the village. Since her daughter's marriage Mrs. McTavish has resided with her, for a number of years in Saskatchewan, later at the home here where she passed peacefully away.

Mrs. McTavish was a daughter of the late John McCallum, one of Ekfrid's pioneers, and a sister of the late Duncan McCallum of this village. Of a family of eight, one sister survives, Mrs. Nancy Black of Yale, Mich.

The funeral took place on Monday from the residence of her son-in-law, service being conducted by Rev. Mr. Paton, family pastor. The bearers were six nephews, John C. and Duncan C. Graham, Archie and Hector McCallum, Donald J. McAlpine and Donald Black.

The floral offerings included a spray from the family, spray from Mr. and Mrs. M. Knox, spray from Mr. and Mrs. J. C. Graham and spray from the Women's Institute of No. 3, Mosa.

In her death the family lose a loving mother and grandmother, but while they mourn the loss of separation they have this comforting thought—she has gone to reap the rich reward of her labors.

Canada may have a five cent nickel coin.

A wishbone will do you no good unless you have a backbone to put with it.

They may tear down the British flag here and there, but it has a habit of always cropping up somewhere else.

The man who wrote "There is no place like home" probably stayed downtown for dinner during house-cleaning time.

The big worry that confronts a lot of people these days is where they can borrow money enough to pay their income taxes.

The search by the police of the 40-foot well at the home of the Murrell brothers at London brought its first results Tuesday evening, when the safe stolen by four auto bandits from the Canadian Express Company at the Grand Trunk depot some weeks ago was hauled out. Its cover had been pried open, and all the money bags and papers had been rifled systematically.

The Secret of the Old Chateau

By DAVID WHITELEW.

(Copyright.)

Synopsis of Previous Chapters.

Vivian Rendon and Eddie Haverton, modern soldiers of fortune, have been gambling with Hubert Baxton, a Londoner, at night. Baxton returns to the home, murders Baxton and hides the body on the roof. While waiting for night to come again in order to make his escape, he finds in a desk a curious old yellowed document telling of a mysterious chest left in the care of one of Baxton's ancestors by a French nobleman, the Marquis de Darnigny, of the Chateau Chauville. The chest has been handed down from one generation of Baxtons to another and carefully guarded in the hope that some day its rightful owner will be found. Rendon decides to pose as the missing heir and claim the chest. He goes to France to make some useful inquiries about the Darnigny family. The story recalls the events of the French Revolution.

CHAPTER V.

Another Victim.

As Remy waited in the dining-hall for the Marquis to join him he ran over in his mind their program. With his hands clasped lightly behind his back he paced up and down the long room, his eyes fixed on the wall before him. Suddenly he stopped, then walked swiftly to the paneling of the wall to the right of the fire-place.

The panels were large and plain, with the exception of a minute heading and a carved device at the corners. It was the latter which had caught Remy's eye—a device conventional enough, of a cornucopia discharging its wealth of fruit. It was the carved form of an apple which brought vividly to the young man the scene of the night before.

He advanced his hand to touch it when a voice came from the doorway, and turning quickly Remy saw the Marquis—a new Marquis, looking like a provincial merchant, in a long black frock-coat of coarse fustian, black cloth breeches, stockings and well-worn buckled shoes.

"The carriage waits, Monsieur de Perancourt," he said, smiling, and Remy, glancing from the window, saw drawn up in the courtyard a shabby, covered cart, with broken and patched harness, and filled with cases and boxes packed in straw. This was the first step in the journey to the "Taverne de la Lune" at Pecamp.

"Really, monsieur, it seems to me that the Comedie Francaise lost a likely recruit when Remy Perancourt took to the profession of arms."

The young man, flattered, leaned back in his chair and laughed.

"Come, Monsieur le Marquis, the game's been easy. It's poor sport to make fools of these provincials, these jacks-in-office, who tie a three-colored sash around their shapeless figures and proclaim themselves the friends of the people. They can no more penetrate the curtain of their self-importance than—pah!"

The fugitives had rested since mid-day. They were a few leagues beyond Bolbec, and the sight of the "Croix d'Argent," which lay invitingly back from the road, had proved too attractive to the travel-worn men. The rain had poured down incessantly and pitilessly, and the interminable Normandy roads had been for the last few hours rivers of mud and at points almost impassable. The flat fields of the countryside lay desolate to the horizon and the stately rows of poplars loomed up, gray silhouettes, in the mist.

But the little room of the "Croix d'Argent" told nothing of the dreariness without. The light from the wood fire glinted pleasantly on the dark furniture and on the brass and china of the dresser. It was now past ten and the remains of a meal still littered the table; on the shelf over the fireplace two candles burned steadily in their brass stands.

In the kitchen behind the hostess could be heard humming a love-song, a song which was acting as a lullaby on the Marquis, who, comfortably seated in a corner of the settle, was blinking at the flames. A half-empty bottle of excellent port stood at Remy's elbow. The young man took it up to replenish the glasses.

Suddenly his figure straightened rigidly into an attitude of listening. The song in the kitchen had ceased and a voice, gruff and forbidding, was raised in authority. The listener

running from the little wood, calling to us and asking for a little milk. She was English, citizen, and said she wanted the milk for a little girl who was ill."

The man from Paris was drawing on the boots he had taken off as Remy finished speaking. He was laboring under intense excitement and in his eyes was the fierce look of the animal who seizes its game. His instructions had been explicit. Hereat, his master, looked upon the arrest of the ci-devant Marquis de Darnigny as essential to his reputation, and to the more important capture of the son—and those who helped him to his reward would themselves reap plentifully. So the man from Paris was drawing on his boots.

He jumped to his feet, and snatching his hat from the table, made for the door. He did not see the smile on the face of the man by the fire.

"Come, citizen, the rain has ceased and the moon is up. Show me the road now. There is little time to lose. I may start to-night."

The two men passed out through the kitchen of the inn. The rain had indeed stopped falling, but a boisterous wind showered the drops from the trees and scattered the white petals of the apple blossoms. The moon, mist-ringed, showed through a stormy cloud as Remy took his companion by the arm and led him across the orchard to where, behind a hedge, the pale light showed the ruts and puddles of the high-road.

"I can point you the direction from that rising ground in the corner yonder. We should see the lights of Bolbec from there. You are a stranger in these parts, citizen?"

The other did not answer and they made their way between the apple trees until they reached the corner indicated by Remy. Here a low, flat wall separated the orchard from the road.

"Allow me, citizen." The younger man held out his hand. "Step up. I will follow you—so."

As the little man leaned on Remy's arm the latter stepped nimbly aside and, losing his balance, the man from Paris fell heavily to the ground. The next moment Remy, with his hand pressed tightly over his victim's mouth, was, with a skill and celerity which denoted practice, binding the arms of the servant of the republic with the tri-colored scarf he had taken from the fallen man. Then, propping the trussed figure against a tree, he sat on the wall and laughed.

"So, my little Jaquelin—that will make nine since the 13th of August—no, don't shout, it's quite useless." As Remy spoke a gust of wind swept the orchard, meaning and rustling dismally through the branches. "Besides, it would only hurry matters—you would die a little earlier—that's all."

The man against the tree bent his eyes on Remy.

"And your reputation. I knew you as soon as you entered the room yonder. Remy de Perancourt knows most of the Public Safety men."

For a moment surprise drove the fear from Jaquelin's eyes.

"You are one of Gaspard de Darnigny's men?"

The man on the wall made a sardonic bow.

"At your service, citizen. We are a merry band, are we not? We pay in the coin we receive. 'Kill, kill,' yells the Tribunal, and 'Kill, kill,' say we. You have often wanted to meet Gaspard, eh—he whose lieutenants strike where they find? Why did you not call on the performer, Caron, at the corner of the Rue des Canettes?—what a rich haul you would have had! I am telling you this, Jaquelin, because secrets are safe with you forever. To-night you go to your tribunal."

"You would kill me here—a bound man? Monsieur, you are a soldier—your honor—"

Remy slid down from the wall and brought his eyes very close to those of the informer. A new note had taken the place of the banter in his voice.

"Yes, you are bound; I would per-

Used Autos

BREakey Sells THEM: USED cars of all types; all cars sold subject to delivery up to you, or, last run of same date as if you wish, in as good order as purchased, or purchase price refunded.

BRING mechanic of your own choice to look them over, or ask us to take any car to city representative for inspection. Very large stock always on hand.

Breaky's Used Car Market
605 Yonge Street, Toronto

Smokestack Cooled by Small Stream.

The heavy vegetation-killing acid fumes from a copper smelter in Wales are carried up the steep side of a mountain and discharged high above its summit by a smokestack which is a novelty in chimney construction. A nearby brook was diverted to flow alongside the long tube, partially submerging it, thereby cooling and condensing those of the rich vapors upon its walls. That this is well worth while is demonstrated yearly at the time of cleaning, when a ton or more of high-grade metal is recovered.

Imposing Heights.

Among other big things, the British Empire contains the tallest mountains in the world, particularly Mount Everest, of which the native name is Chomolungkar, the "Lady of the Snows," and which is supposed to be the loftiest mountain in the world.

Very little is known of Everest, though its next neighbor, Mount Kang-bu (24,015 feet), was climbed so long ago as 1882. Mr. Graham, who achieved this feat, also climbed Jabon, another peak of 21,400 feet—that is nearly 6,000 feet higher than Mount Blanc.

The Himalayas contain the tallest mountains in the world, but it is in the Andes of South America that we are to find the greatest number of peaks over 20,000 feet in height. In Bolivia are the Cordilleras de la Paz, of which twelve peaks, all together, tower more than four miles towards the sky.

Farther north, in Ecuador, are twenty volcanoes in one cluster, all covered with perpetual snow. The lowest of these volcanoes are still active, and eleven out of the twenty have never yet been climbed.

The highest of the South American Andes is supposed to be Aconcagua, 23,805 feet.

But the Andes, between the Isthmus of Panama and Cape Horn, can show no fewer than 288 peaks, which are more than 10,000 feet in height, 138 over 15,000, seventy-nine over 19,000, and forty-two over 20,000 feet. The four biggest all exceed 23,000 feet.

The Andes possess another record, in the shape of the highest road in the world. This is the famous Oroya Road, in Peru, which pierces the mountains by the Crucecero Tunnel at a height of 15,654 feet. This is almost the same level as the topmost summit of Europe's highest mountain, Mont Blanc.

Rice Nutritious.

It has been positively ascertained by expert chemical analysis that rice contains more nutritive elements than any other grain. It will sustain life better and longer than any other cereal—a fact well known among Eastern countries from time immemorial.

Life Sentences Reviewed.

In England a sentence of life imprisonment is always reviewed at the end of fifteen years, and if the prisoner's conduct has been uniformly good, he is usually released. This is particularly the case where a prisoner has been sentenced for murder, for murderers are usually well-behaved prisoners.

At Your Service

Wherever You Live.

The woman in town, or country, has the same advantage as her sister in the city in expert advice from the best-known firm of Cleaners and Dyers in Canada.

Parcels from the country sent by mail or express receive the same careful attention as work delivered personally.

Cleaning and Dyeing

Clothing or Household Fabrics.

For years, the name of "Parker's" has signified perfection in this work of making old things look like new, whether personal garments of even the most fragile material, or household curtains, draperies, rugs, etc. Write to us for further particulars or send your parcels direct to

MARTIN-SENOUR

100% PURE PAINT & VARNISHES

MARBLE-ITE

The Hard-Drying, Long-Wearing Floor Finish

"MARBLE-ITE" PAINT
The paint for wall and weather.

SENOUR'S FLOOR PAINT
It wears and wears and wears.

"VARNOLEUM"
beautifies and preserves. On Clock and Linoleum.

"WOOD-LAC"
Stain

Improves the new—renews the old.

"NEU-TONE"
The sanitary, washable Flat Oil Paint for Interior Decoration.

Nothing kills so much to the beauty of a home as floors that are not properly cared for. On the other hand, floors that are not protected are unpleasant to look at, are hard to keep clean, and become injured through wear. Don't neglect your floors, beautify them and save them. Save the surface and you save all.

MARBLE-ITE Floor Finish is the perfect treatment for floors of all kinds. It is the one floor finish that has a money-back guarantee attached to every can.

In 24 hours MARBLE-ITE dries hard with a beautiful finish that will not show best marks. It has a high gloss, yet is tough enough to stand any amount of wear without injury. It can be washed with soap and water and it will not wear or scratch white.

There is a special MARTIN-SENOUR product for every surface and for every purpose. Consult our nearest Dealer Agent, or write us direct. Our booklet "Ten and Twenty Years" mailed free on request.

"Save the surface and you save all—Paint & Varnish"

STRANGE SECTS OF OLD LONDON

PAGAN CREEDS AND 300 CHRISTIAN BODIES.

"Seventh Day Baptists," "Peculiar People," "Sandemans" and "Shakers."

The Londoner who cannot find a creed and a church to suit him must be very difficult to please; for, on the evidence of a well-known bishop, "it is possible in London alone to worship every Sunday for more than five years in a church belonging to a different sect or professing a different faith."

In the East End, for example, the Mohammedan—who, among many strange beliefs, includes that of a Judgment-day fifty years in duration, after which both good and bad must cross a bridge thinner than a hair, stretching over the mouth of the lower regions—has his mosques. The Chinaman burns his incense-sticks in two joss-houses; and the Buddhist whose misty-gazed heavens number between four and five hundred, in which his stay is limited to ten billion years, conducts his strange worship.

Religions of the East.

There is a Malayan temple within a short distance of St. George's Street, East! In Bloomsbury the Parsee prostrates himself before the sun; and there is a Mormon mission in Islington. Zoroastrianism, the cult of the late Dr. Dowrie, is represented by a modest upper-room; while it is said there are houses in London where the worship of ancestors is practised, and where sumptuous feasts are spread for their enjoyment in the silent hours of the night.

Such are a few of the pagan creeds which have a footing, however slight, in the world's capital; while of Christian sects the number is said to fall little short of three hundred. Among the least-known of them are the Sandemans, an offshoot of the Glasites who separated from the Scottish Kirk some two centuries ago.

Among the articles of faith of the Sandemans is abstinence from blood and things strangled, and from all amusements in which chance plays a part. They attend the Holy Communion once a week; are great believers in the virtue of love-feasts, and have an amiable practice of dining at one another's houses between morning and evening services on Sunday.

Another little-known religious body is that of the "Seventh Day Baptists," who believe that Saturday and not Sunday should be observed as the Sabbath, and who usually conduct their services, so few are their numbers, at one another's houses.

No Use for Doctors.

The Peculiar People, whose fortunes have been so chequered, still survive in the East of London, and practise their strange creed with a loyalty deserving, one cannot help thinking, of a better cause. Founded in London eighty years and more ago, they have no faith in doctors, relying for cure (in medical cases) on anointing with oil by their elders, and in the efficacy of unceasing prayer and careful nursing. The members of this sect are almost exclusively poor, struggling people; and they bear an excellent character for morality and Christian charity.

Another curious sect is that known as "Coklers, or Cogelers, a nickname said to be derived either from cocoa, their favorite beverage, or from the "Book of Cople," which they are said to hold in veneration. This name, however, is not recognized by the members, who prefer to be known as the "Lord's people."

Founded a couple of generations ago by William Sirgood, a Walworth shoemaker, the "Lord's people" have (or had, not long ago), their headquarters at Lexwood, in Surrey, where they had a co-operative shop and farm; while their meeting-houses are at Walworth and Croydon.

Johna Southcott, the Devonshire seeress, who professed to be a prophetess, and who issued 6,400 sealed papers to her followers, at prices ranging from twelve shillings to a sovereign, each "seal" guaranteed to secure salvation, has still her followers in London. Some of these strange documents still survive, and are much treasured by their owners. They contain these enigmatical words: "The sealed of the Lord—the Elect Precious Man's Redemption. To inherit the Tree of Life—To be made heirs of God and joint-heirs of Jesus Christ."

Not a Success.

Another sect which still has its members in London is that of the "Shakers," which, like the Peculiar People, has had a stormy career. This community, who christened themselves the "Children of God," was founded nearly two centuries ago by James and Jane Wardley, who were joined later on by Anne Lee, a woman who declared that she was the final incarnation of the Deity.

This singular claim found many supporters, especially in the East End of London and in Battersea. In 1872 the members of this sect formed a colony in the New Forest on land purchased for them. Although they led busy and blameless lives, they were unable to support themselves. After enduring much hardship they were evicted, and for a time led sordid and wretched existence in sheds.

BUSINESS IS MOSTLY WHAT WE MAKE IT!

Get the better class of merchandise the people want, and get the prices down. Then buyers will buy and business will boom. Each month's sales this year shows wonderful increases over corresponding month of any former year.

This splendid increase of sales did not come by accident but from putting into the business the necessary amount of "pep" and carrying out modern methods of merchandising, giving the people a square deal, throwing off all profits if necessary to get things down to a price in comparison with all other things.

Carpets, Curtains, Oil Cloths and Linoleums

All down in price. Splendid assortments from which to make good selections, and you are always sure of "quality" at this store.

After House-cleaning

Besides floor covering you will want Curtains, Art Drapery, new Brass Extension Rods, Window Shades, extra Rollers. All at new lower prices.

Getting Clothing Down Near Pre-war Prices

Much improvement in quality. Suits made from west of England all pure wool; tailored as suits should be to give that smart appearance and retain that perfect shape.

Some few dozen Men's Sample Suits, entirely new, regular \$45 to \$55, on sale this week at \$35.50. These are strictly hand tailored and cannot be repeated at this special price.

Ladies' Stylish Coats

in the popular duvetyne cloth, made by Roger Garment Co., in the new blue and sand shades.

More New Oxfords and Slippers

Correct in style, of better quality, marked very moderately in prices.

"Hoover" Suction Sweeper

Eventually you will buy one. Why not now, and save so much work and worry. Does more satisfactory work than any other.

J. N. CURRIE & CO.

McLaughlin

The new McLaughlin Master Six is the undisputed leader in the touring class. The new radiator and hood and the unique body design of this model give it a racy appearance that is extremely pleasing. The smart, graceful lines, the speed, power and quick acceleration make it the favorite family car.

Ladies who drive favor the touring model of Canada's Standard Car because of its beauty, ease of control, its comfort, dependability and extreme roominess. The driver of this McLaughlin is the discriminating motorist whose choice of a car is influenced by beauty and utility.

THURSDAY, APRIL 21, 1921

Having voted "Yes" on the referendum regarding the importation of liquor for beverage purposes, Ontario now awaits the order of the Dominion Government giving effect to the expressed will of the people. There will then be three measures operating to make this a "bone dry" province. The Dominion enactment making the importation of liquor from any other part of the country or anywhere else illegal; the Ontario Temperance Act itself, and the provincial measure popularly known as the Sandy Bill. The last is designed to prevent what is known as "short circuiting." This is the method by which orders for liquor placed in Quebec Province for Ontario customers have been filled by the breweries and distilleries in Ontario. With importation made illegal the shipment of liquor into the province will be hedged around with difficulties that will make the profession of rum-running far more perilous than it has ever been. Outside of Quebec and British Columbia, Canada will now be practically a prohibition country.

The Pons-Wennecke comet which is to make its re-appearance soon may be discovered by the astronomers next month, and be generally observable in June. It is named after the men who first located and made observations of it. This is the comet that some wags have said may collide with the earth and a good deal of fun has been made out of the possibilities of future happenings. That humor of this kind sometimes works in queer directions is illustrated by the seriousness with which many people have regarded the statements of these practical jokers. There are a number of people who are willing to believe that only by a miracle of nature can the earth avoid a disastrous bump.

FIGHT THE CORN BORER

Observations recently made in Elgin county, particularly in the district of St. Thomas, by officers of the Entomological Branch of the Dominion Department of Agriculture, and others, indicate that the European corn borer found in Canada for the first time in August, 1920, has come through the winter in a very healthy condition. The Department urges, therefore, the assistance of all farmers in affected districts, in the efforts which are being made in controlling this dreaded pest and preventing its further spread.

The borer or caterpillar is the destructive stage in the life of the insect and it is in this stage at the present time within corn stubble, pieces of stalk, old ears, or other parts of the corn plant which were large enough to shelter it during the winter. Farmers, therefore, should realize the importance of destroying, at once, preferably by burning, all unused portions of corn stalks, cobs, waste, etc. Crop refuse around silos and also that left during the winter in infested corn fields should be carefully gathered up and destroyed by burning. Fields within the infested district should be kept free from weeds, as the borer has been found in thick stemmed grasses, ragweed, smartweed, lambs quarters, etc.

BRAVE PEOPLE, THESE

The way the people of Melbourne acted on that memorable Monday when the four armed bandits attempted to rob the Home Bank is something of which they have every right to feel proud. The courageous act of Miss Agnes Campbell in closing and locking the safe door in spite of the threats of the armed men; the behavior of Manager McAndrews in feigning unconsciousness when roughly handled by the bandits; the cool-headedness of Miss Irma Wright in summoning help; the prompt response of the Campbell brothers, Manager Theaker of the Union Bank, and other citizens, all of whom walked right into the face of danger and beat back the bandits at their own game; the act of the Indian, Wilfrid Danford, in going unarmed into the bayonet where one of the armed bandits was hidden and effecting the capture of the man single-handed; and last, but not least, the exemplary way in which the people of the village acted in holding the men for the officers of the law, instead of string-

ing them up to the nearest tree, as our neighbors across the line would have done—all this and more, too, that has, perhaps, not yet been told, is a splendid tribute to the bravery, courage and stability of the people of Melbourne. Canadian citizenship is safe in the hands of such men and women.—Onlooker, in St. Thomas Times-Journal.

Spring weather brings many an ache and pain, many an attack of asthma. Templeton's Rheumatic Capsules and RAZ-MAH for asthma are the recognized standard remedies for these troubles. Sold by H. I. Johnston.

"THE MIRACLE MAN" ADAPTED FROM BIG COHAN STAGE PLAY

New Paramount-Artcraft Picture One of Greatest Thus Far Produced

A superb, dramatic Paramount-Artcraft feature, "The Miracle Man," which will be on view at the Opera House on Saturday, April 30, is declared to be one of the really great screen dramas of recent years. It was written by Frank L. Packard and produced as a stage play by George M. Cohan and packed the Broadway theatre in the season of 1916-17, where it played for many months. The screen version is said to be even more absorbing and thrilling in its development of the striking story, which shows the marvellous transformation under the beneficent influence of an ennobling environment of four of the most notorious crooks of New York's underworld.

Hearing of the healing powers of this old man of the hills, Tom Burke and his band determine to capitalize

"Grey Sox" Tubes

High Average Mileage

Sometimes you find a tire that gives extraordinary mileage—one in a dozen perhaps. Whereas the average of mileage given by a dozen—or a hundred—Ames Holden "Auto-Shoes" will be as high as that given by the exceptional ordinary tire.

It's the high average that counts—that cuts the cost of miles—that makes it worth while to get Ames Holden "Auto-Shoes" instead of ordinary tires.

Card of Thanks

Mr. and Mrs. Godfrey McMurchy and family wish to thank their many friends and neighbors for many acts of kindness and expressions of sympathy in their late bereavement.

In Memoriam

MCGUGAN.—In loving memory of our dear husband and father, Archie McGugan, who passed away April 18, 1920: When alone in our sorrow, and bitter tears flow, There stealeth a dream of the dear long ago. And unknown to the world, he stands by our side And whispers these words: "Death cannot divide."
—Wife and Family.

TOWN AND VICINITY

Mrs. Thos. Marks, mother of the five Marks Bros., who have visited Glencoe on various occasions, died a few days ago.

The Fish and Game Committee of the Legislature have taken bares and rabbits out from the Game and Fish Act. There will now be open season for trapping and killing rabbits all the year around.

In the referendum on Monday Glencoe voted for prohibition by a majority of 269. The vote in the south division was 172 for and 27 against; in the north division 162 for and 33 against—a total of 334 for and 65 against.

Lambton Creamery will be operating the butter factory in Glencoe this season, and have engaged Russell Skinner of St. Marys, an experienced butter maker, to take charge. Mr. Skinner is now here making preparation for what is hoped will be a good season's business.

County police are investigating the circumstances surrounding the apparent abandonment and burning of a large touring car near Middlemiss Thursday afternoon. The car was found near the side of the road, with the hood completely burned off and a portion of the body destroyed.

Those who attended the Presbyterian Y.P.G. meeting on Monday night thoroughly enjoyed the address given by Rev. Wm. Mackintosh of Napier, which was most inspiring and instructive. His subject for the evening was "The Place of Religion in the Life of Young People." Misses Elizabeth and Maryna Grant rendered a vocal duet. A hearty vote of thanks was then tendered to Mr. Mackintosh. The next meeting will be in charge of the literary committee.

At London Presbytery on Tuesday Rev. H. D. McCulloch reconsidered his resignation from the charges of Appin and North Elfrid. A large deputation appeared before the Presbytery to urge Mr. McCulloch not to resign. Mrs. Allen, one of the lady delegates, made a fitting appeal, which was received with great applause. Mr. McCulloch agreed to accept a short holiday if that could be arranged with his congregation, and consequently withdrew his resignation.

The sentiment of Glencoe and vicinity is, we are glad to say, becoming more inclined to the better class of moving picture shows, and Mr. Cunningham, manager of the shows, is making a special effort to cater to the popular demand. Next Saturday night will be presented William Farum in Dickens' "A Tale of Two Cities." Those who have been advocating something elevating as well as entertaining in the picture show should show their appreciation by giving their support to the show on Saturday evening.

Lachie Leitch, the Kilmarin song writer, has just published a new song, the title of which is "There's a Brick Church on the Hill." The music is by George Graff, Jr. The Transcriber is kindly remembered by Mr. Leitch with a copy of the song. We have not yet learned if it is to be sung, but had our music critic pronounce upon it and she says that it bears the mark of a genuine heart song. The air has a charming melody, and altogether there is sufficiency of everything that should ensure it a place among the popular songs of the day.

PERSONAL AND SOCIAL

—Mrs. J. E. Corbett of Mosca visited at J. D. McColl's on Monday.

—Miss Edna Petch of London spent the week-end with Mr. and Mrs. Frank Hayter.

—Miss Agnes Campbell of Melbourne was the guest of Mr. and Mrs. Frank Hayter last week.

—Mr. and Mrs. Roy Dobie and little son of Victoria, B. C., visited at J. D. McColl's last week.

—Miss Zelda McMaster of Appin has gone to Victoria Hospital, London, to train for a nurse.

—James Wilson has returned from Hamilton, where he spent the winter with his sister, Mrs. Gillespie.

—Mr. and Mrs. Roy Dobie and son James of Victoria, B. C., visited with Mr. and Mrs. J. C. Tait last week.

—Mr. and Mrs. David Reeves and son Leslie spent the week-end with Mrs. Reeve's sister, Mrs. Percy Lunt, London.

—Mrs. B. B. Borbridge and son James of St. Thomas spent a few days last week with her parents, Mr. and Mrs. J. C. Tait.

—Dr. and Mrs. C. W. Trestant and daughter of Battle Creek, Mich., are on a visit here. Mrs. Trestant's father, John Stinson of Mosca, being seriously ill.

—Neil Carruthers spent a few days in Michigan, and was accompanied home by Mrs. Clarke and little daughter of Toledo, Ohio, who are now visiting with Mr. and Mrs. Carruthers.

—Mr. and Mrs. M. J. McAlpine entertained at fourteen tables of euchre on Friday evening. Among the out-of-town guests were Mr. and Mrs. Martin and Mrs. Nichols of London.

—Friends from a distance attending the funeral of Mrs. McTavish were Mrs. Nancy Black and son, D. J., of Yale, Mich.; A. D. Black of Detroit, Mich.; H. Wilson of London, Lindley McCulloch of Iona, Mr. and Mrs. Hugh McPhail and son of Iona, Mrs. James Stewart of Alvinston.

CONSTIPATION AND HEADACHES

Completely Relieved by this Grand Fruit Medicine, "FRUIT-A-TIVES"

MR. ALFRED DUBOISSEAU

482 St. Catherine St. E., Montreal.
"For three years, I was a terrible sufferer from indigestion, constant headaches and constipation. I took various medicines for the trouble but nothing seemed to do me any good.

Then, a friend advised me to try 'Fruit-a-tives'. Now I am free of indigestion and headaches, the constipation is cured, and I have gained considerable weight; and my general health is fine.

'Fruit-a-tives' is a grand medicine and I cannot say enough in its favor."

ALFRED DUBOISSEAU.

'Fruit-a-tives' are made from fruit juices and valuable tonics—and are pleasant to take, their action being gentle and mild, yet always most effective.

50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

The first regular meeting of the Tait's Corners U.F.W.O. will be held at the home of Mrs. James McRae on Wednesday, April 27, at 3 p.m.

Smith typewriter for sale, fine condition, all latest improvements. Cash paid for Indian relics; give description and price wanted, or send for my offer.—N. R. Hendershot, Newbury.

"Burleigh's Ranch," a western drama in three acts, will be presented at Walkers on Friday evening, April 15, by the Ebenezer dramatic club. Admission, 25c and 50c. Good program between acts. Come one, come all.

All those who subscribed their names for the Horticultural Society will please pay their membership fee of \$1 to Mr. McPherson at the Merchants Bank or Mrs. Roome at her residence at once in order to get their premium.

Artistic wall paper and rugs at Mayhew's.

METCALFE COUNCIL

Meeting of Metcalfe council held Monday, April 4th. Members present—C. C. Henry, W. Hawken, A. Taylor and John McNaughton. Minutes read, approved and signed.

Moved by Hawken and Taylor that R. Denning be paid \$51—\$25 commission for Bateman-Denning drain and \$26 damages for same drain; John McMahon, \$50, balance of contract, Bateman-Denning drain; R. Denning, \$19.50, 30 hours grading, man and team, on 1 and 2, div. 1; W. Titball, \$2.25—\$1 doubletree and \$1.25 chain for road drag, div. 1; W. Snijthrim, \$200, part of township grant, S. S. No. 2; John Smithrim, \$5, filling washout, con. 3 and 4, opp. lot 15, div. 1; R. Woolley, \$6.65, repairing Ketchum bridge, div. 1; D. Galbraith, \$150, part of township grant, S. S. No. 4; D. W. Munro, \$65, part of township grant, S. S. No. 17; W. Brigham, \$100, part township grant, S. S. No. 1; A. F. Munro, \$3.25, 5 hours scraping, con. 13 and 14, div. 4.

The request of Duncan McKellar to have McKellar drain repaired was granted, and it was moved by McKellar and Taylor that the clerk notify the township engineer to examine same.

Moved by Taylor and Hawken that the wages paid in the township for work during 1921 be 85 cents per hour for man and team and 30 cents per hour for a man.

Moved by Taylor and Hawken that Metcalfe keep that portion of Metcalfe-Brooke township from bridge over river, con. 7, north to railroad, in repair, Brooke agreeing to keep the portion south of that in repair, road superintendent to look after Metcalfe part.

Moved by Taylor and Hawken that Roy Lewis be paid \$2, error in dog tax, 1920; W. Walker, \$11, s. 1, done in 1920; Howard McLean, \$6.50, 10 hours scraping, con. 5 and 6, div. 2. Council adjourned to Monday, May 2, at 1:30 p.m. Board of health to meet at 1 p.m.

Harry Thompson, Clerk.

AUCTION SALES

Auction sale of farm stock and implements and household effects, on lot 21, first range south Longwoods road, Mosca, on Tuesday, April 26, at one o'clock. L. W. Lucier, proprietor; L. L. McTaggart, auctioneer.

On south half lot 1, range 3 south of Longwoods road, Mosca, on Monday, May 2, at 1 o'clock—1 driver 12 years old; 1 gelding 7 years old; 1 gelding 5 years old; 1 gelding 3 years old; 1 mare 15 years old; 1 driver 6 years old; 2 Aberdeen Angus cows, registered, 6 years old, in calf; 1 Aberdeen Angus heifer, registered, 2 years old; 1 Aberdeen Angus heifer, registered, 1 year old; 1 Aberdeen Angus heifer, eligible for registration, 7 months old; 1 Aberdeen Angus bull, eligible for registration, 1 year old; 1 grade Angus cow, milking well, in calf; 1 grade Angus cow, with calf by side; 1 cow 5 years old, due to calf time of sale; 1 cow 4 years old, with calf by side; 2 cows due about time of sale; 1 heifer 2 years old; 1 heifer 2 years old, fat; 4 choice steers 2 1/2 years old; 5 steers 2 years old; 4 steers 1 year old; 1 heifer 1 year old; 1 calf 4 months old; 1 Chester sow with 12 pigs eligible for registration; 6 sheats, about 150 lbs.; 1 buggy, equal to new; 1 set single harness; 1 horse blanket; 1 set of double harness; 1 set of breeching harness, new; 1 pair of horse blankets; 1 buggy; 1 cutter; 1 wagon; 1 wagon with combination rack; 1 Deering mower; 1 gang plow, M.H.; 1 two-furrowed sulky plow; 1 disc harrow, L.H.C.; 1 corn scuffer; 1 walking plow, Cockshutt; quantity of tobacco wire; 1 lawn mower; 1 incubator; 1 Sunshine furnace; quantity of piping; hay car and rope; 1 garden cultivator; 1 coal oil drum, 25 gals.; 1 gasoline drum, 40 gals.; quantity of lumber; quantity of oats; wheelbarrow; 60 hens; 8 cords of hard maple.

J. S. McAlpine and J. J. McDowell, proprietors; L. L. McTaggart, auctioneer.

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher

In Use For Over 30 Years

Long Distance Service Is Now Classified

THE Classifications on long distance telephone calls in effect from midnight, April 20th, are of interest to all users of that service. It is possible, by a study of your long distance requirements, to effect savings in your long distance bills that are well worth while.

Station-to-Station Service

Station-to-Station service should be used when you are willing to talk to ANYONE at a distant telephone—that is, when you do not need to get a particular person on the line.

Station-to-Station service is not only cheaper, but more rapid and accurate than Person-to-Person service. On Station-to-Station service the call can be completed as soon as the distant telephone is answered, while on a Person-to-Person call the particular party wanted must be located and summoned to the telephone.

The charge for a Station-to-Station call cannot be reversed—that is, it cannot be charged to the telephone called, for in that case the telephone operator would have to locate a particular person to approve the charge, which would make it a Person-to-Person call.

Person-to-Person Service

When you make a call specifying that conversation is desired with a particular person at a given number, Person-to-Person service is used.

As this service requires greater operating labor and circuit time than a Station-to-Station call, the rate is about 25 per cent greater.

Examples of Different Rates

Following are examples showing the station-to-station and person-to-person rates for distances up to sixty-four miles:

Miles	Station-to-Station Rate	Person-to-Person Rate
0-12	\$.10	\$.15
12-18	.15	.20
18-24	.20	.25
24-32	.25	.30
32-40	.30	.40
40-48	.35	.45
48-56	.40	.50
56-64	.45	.55

Every Bell Telephone is a Long Distance Station

The Welfare of the Home

The Girl's Own Room.

By ADELINE B. WHITFORD.

Having one's own room is the beginning (the very small beginning, of course) of having one's own life; for it sets apart a place where one is to do and think for herself, express her own preference in coloring and furnishings, gather and arrange as she likes, her first possessions—the little personal belongings which have begun to accumulate. It is to be not only the place where one sleeps comfortably at night but a quiet lovely room where one rests a little now and then by day; an ideal spot for study, reading, letter writing, or sewing, and possibly for what is more important at times, an hour's quiet thinking.

For the years lived here are the growing, shaping years of a girl's life, and every inspiration which comes to her, whether through church or school or friendships, will be brought into this room to be worked out and thought over until the finest ones, let us hope, become her own. No other room in later years, even in memory, can mean quite as much as this one and for this reason it should be from the first, whether large or small, an especially lovely room, and fortunately, it may be so. It hardly matters how simple and inexpensive the materials are, such a room responds to the owner's personality more quickly than any other in the house; possibly because youth counts for so much, and the spirit of youth is so easily captured and brought into a room's atmosphere by the right touch in color and furnishings.

The freshness of spring and some of its delicate coloring belong here; simple, light weight furniture, and the owner's careful choice of pictures and small belongings expressing her own taste, for the room will gain much in personal charm if it is worked out by slow planning and as far as possible, by her handiwork.

This last does not mean an endless amount of old-time embroidery, crocheting and drawn-work, for artistic bed chambers of to-day have but little if any, decoration of this kind. Dresser and table covers, bedspreads and cushions, are more plain than of old, but more attention is paid to having these articles of colored materials, to carry out the room's definite color scheme. Instead of colored embroideries on white, colored cottons and linen materials are used in plain or figured designs, and these are frequently selected from cotton dress goods, or lining materials, as from the regular drapery stuffs. Whatever gives the right color-effect in a room is the thing decorators use. Volts, satens, poplins, cretonnes and colored linens in cheap or expensive qualities are used and aside from the things one may buy, there are great possibilities in the home dye-pot. Old pieces of coarse cotton cloth become very dignified and attractive when colored different shades of old gold, pale yellow, or orange for chair pillows in a north room, or shades of green, gray, lavender or dull blue for use in a south room. The different shades of color being obtained, of course, by using more or less water to each pound of material to be dyed. A little practice gives one courage to do a room's complete outfit if necessary.

In using these simple materials their good style is brought out, not by fancy trimmings, but by making them up carefully, with straight smooth hems, and often with the narrow gimp edgings which cost but a few cents a yard. These are used on window hangings, bed spreads, box covers, and so on, and are made to take the place of hand-work edgings wherever possible.

Fight the Corn Borer.

Observations recently made in Elgin County, Ontario, particularly in the district of St. Thomas, by officers of the Entomological Branch of the Dominion Department of Agriculture, and others, indicate that the European Corn Borer found in Canada for the first time in August, 1920, has come through the winter in a very healthy condition. The Department urges, therefore, the assistance of all farmers in affected districts, in the efforts which are being made in controlling this dreaded pest and preventing its further spread.

The borer or caterpillar is the destructive stage in the life of the insect and it is in this stage at the present time within corn stubble, pieces of stalk, old ears, or other

Of course, a well-planned room never has in it a careless mixture of colors, nor mixtures of figured materials. Its one color harmony is kept in view definitely throughout the work of furnishing and no other equally strong color is allowed to creep in. If, for instance, soft rose is the color one wishes to emphasize, and cretonne is to be used for part of the furnishings, the principal design in the cretonne should be in soft rose shades. If this material were used for window hangings and one or two chair cushions and a dress box cover, that amount would be all that the average room should contain of figured stuff. The other articles such as dresser and stand cover and book shelf curtain, should then be of plain material exactly matching one of the rose shades in the cretonne. This brings the whole room into a harmony of rose. As a background for this color, walls and rugs should be a neutral tone in gray or soft gray green, and ceiling and woodwork, cream, while the floor would be painted a darker tone of dull green.

In such a room the simple furniture would be especially good if painted in pale gray, or gray-green similar to the wall color, the gray willow chair given rose colored cushions, and, as a note of contrast, a blue or green flower bowl filled with lilacs or sweet peas would supply the final bit of color charm.

You will see from this description that such a room as this is not built up out of one which is already furnished. It has no mixtures but shows a definite plan throughout. This is the secret of a successful room.

In deciding about the use of color in your room, you may have it in one of two ways. The first method is to paper or paint or kalsomine the walls in a soft hazy tone, which must be a yellowish cream, or a pale soft blue in north or sunless rooms, or a cool gray, gray-green or hazy blue tone for a south room, or one having plenty of sunshine. With these soft tones on the walls, you would then have gaily figured window hangings, chair cushions and so on, with the principal color of these repeated in plain materials for other articles.

The other method is to use an all-over pattern of flowered paper on the walls, the design being usually of spring blossoms with yellows or pinks predominating if the room is north or dull, and with blues, greens or lavenders as the principal color if used in south or sunny rooms. With this figured wall, window draperies, bed spread, cushions and so forth, should all be of plain stuff, either white, or of cottons matching the principal color of the paper, and on a much flowered wall there should be only one or two pictures used, if any.

You can manage either of these methods if you remember first: for the plain-toned walls, be sure to use only soft tints, never the strong colors. Tones which make your walls look like a lovely fog of smoky yellow or dim greens and grays are what you should have. For the figured-papered rooms should be very indistinct, or the walls will soon be extremely tiresome. Ceilings are cream, or as white as the background of the figured wall paper.

Woodwork is usually ivory white when used with creamy or yellowish walls, and a very light gray if walls are gray.

Floors are always darker than walls and walnut brown, or dull olive green are good colors.

parts of the corn plant which were large enough to shelter it during the winter. Farmers, therefore, should realize the importance of destroying, at once, preferably by burning, all unused portions of corn stalks, cobs, waste, etc. Crop refuse around silos, and also that left during the winter in infested corn fields should be carefully gathered up and destroyed by burning. Fields within the infested district should be kept free from weeds, as the borer has been found in thick stemmed grasses, ragweed, smartweed, lambs' quarters, etc.—Arthur Gibson, Dominion Entomologist.

Send flowers when the sick friend gets well, instead of when he doesn't. An optimist is a man who believes he can grow even better vegetables than the catalogue shows.

Poultry

After years of experience in raising poultry on the farm, I find that my best aid in clearing the poultry houses of vermin is the kerosene brush.

For the eradication of the pestiferous red chicken mite I take an old brush and some kerosene, and go over all the roost supports, joints, seams in the nest boxes, uprights, and wall cracks with a penetrating coating of the kerosene. It is sure death to each and every mite it touches. I find that this is all the care needed in the hen houses, winter and summer, after the spring and fall cleanings and the usual whitewashings or creosoting of the interior surfaces, nests, and roosts. I examine the roosts occasionally in the winter, every three weeks in the summer, brushing the seams and joints with the kerosene. If there are any mites, they will appear. If none, you can be thankful. But if your numbers seem legion, go over every inch with kerosene.

And this is not its only use. If the scaly-leg mite appears in your flock, take up the kerosene brush again and paint the scaly leg with it, being careful not to touch any of the feathers around the knee joint. Usually one application will kill the mite that works and causes this scaly appearance of the legs; but if not, I continue the applications until the legs are cured.

The powder shaker, with a good commercial house powder, is the easiest remedy for lice. But with a farm flock on range, with boxes of ashes and dust baths available, it is seldom that remedies will have to be resorted to. The average hen will take care of herself under ordinary conditions. I use the powder on the setting hens at least three or four times, being careful to make the last application a few days before the eggs are to hatch.

The Strawberry Plantation.

Whatever else is neglected, one should not fail to start a strawberry plantation during the spring. Any fairly dry area will grow strawberries. The ground should be one on which water will not stand during the winter to form ice.

Manure at the rate of ten to fifteen tons per acre may be applied and plowed under, or even more may be used to advantage if no other fertilizers are to be used. It is usually considered wise to apply five hundred pounds of a 4-8-4 fertilizer per acre. That is, one containing 4 per cent. of nitrogen, 8 per cent. of phosphoric acid and 4 per cent. of potash. However, if the soil is in good fertility

this is not necessary and manure alone may be all that is necessary. All fertilizers should be scattered broadcast and harrowed in.

Thorough preparation of the soil by plowing and working deeply is advisable. The land is finally leveled with a smoothing harrow and the plants set in rows three and a half feet apart and fourteen inches apart in the row. Closer planting is unnecessary and does not permit of easy cultivation between the rows and opportunity of picking without tramping on the vines.

The planting is done by pushing a spade into the soil, pressing it to one side and dropping a plant with roots spread fan-shape into the opening, holding the crown of the plant to the top of the level soil and pressing the earth firmly around the plant with the heel or some other way, and finally leveling with loose earth around the crown of the plant. This is quickly done. The importance of pressing the soil firmly around the plant is very great and the plant should be sufficiently firm, so that if the plant is pulled by a leaf the leaf will break before the plant will pull out. Only young plants should be set; that is, plants of the previous season's growth.

The planting should be done early, in fact, the earlier the better. Much of the failure with strawberries is due to late planting. This is a job that can be done in the early spring, the sooner the plant becomes established the earlier the formation of runner plants, and the earlier these runner plants form, the larger and better developed are the crowns, without which strong stalks of well formed fruit are impossible.

The summer cultivation should be shallow to kill weeds and form a loose surface in which the plant can root without difficulty. As the runners develop the cultivator should be narrowed, so that the runners are not disturbed after they commence to form plants and great care is necessary to avoid disturbing the plants at this time. Some of the runners may be shifted to give a more even distribution of plants along the row, and some hand hoeing will be necessary to prevent weeds from growing later.

It is wise to plan for a new plantation every year, as it is difficult to keep weeds under control the second year without much hand hoeing. It will be found that the Senator Dunlap is one of the best varieties to plant. Blossoms are likely to develop on the spring set plants and these should be removed to throw all energy into the development of runners as early as possible.

Success is ten per cent. opportunity and ninety per cent. intelligent hustle.

My Visit to England's Glass-House Farmers

The little river Lea, rising in southern Bedford, flows eastward across Hertford to the border between Hertford and Essex, where it is joined by the Stort, coming down from the north, and turning south in a broad, flat valley, it reaches the Thames near the eastern limit of London, a total course of some 50 miles.

In this Lea Valley, there has grown up a great glass-house industry, more than 1,000 acres now being covered with glass in a district some 12 or 13 miles long, in which are half a dozen towns and cities of 5,000 to 50,000 population each.

The men engaged in this industry have become so impressed with the value of scientific research in the problems related to their work, largely as a result of the Rothamsted investigations, that in 1913 they decided to establish an experiment station in their midst, having for its sole object the study of these problems. They therefore organized an association for this purpose, under the name of the Nursery and Market Garden Industries Development Society, Limited.

In the spring of 1914, a site of about two acres, within the limits of the town of Chesham on the main London to Cambridge road, was purchased and buildings were erected, consisting of an office, one botanical and one chemical laboratory, five cucumber and five tomato houses, and an isolation house for pot experiments and disease inoculation work.

The county councils of Hertford and Essex made small grants in support of this work; the Duke of Bedford contributed \$2,000; the members of the society raised among themselves about \$4,000 for construction and as much more for a maintenance fund, and the National Board of Agriculture and Fisheries agreed to furnish nearly \$10,000 for construction and maintenance. The equipment was not completed until September, 1915, and by that time the war had seriously interfered with the work, although the work was kept alive and some progress was made during the strenuous period of the war.

From the outset the work has been closely associated with that at Rothamsted, a part of it being conducted in the Rothamsted laboratories. With the end of the war increased interest was taken in the work of this station. The number of shareholders increased, and the larger annual subscriptions permitted the employment of specialists in entomology and plant diseases. Some idea of the character of the work may be gained by the following brief summary of the work reported for 1919:

In an experiment on slow versus forced growth of tomatoes the forcing of the crop by raising the heat caused

an earlier ripening of a small part of the crop, but decreased the total yield by about 10 per cent.

Houses in which the moisture in the air had been increased by overhead spraying have given somewhat larger June pickings of tomatoes, in three seasons out of four, than those not so treated.

In experiments with fertilizers on tomatoes the omission of nitrogen increased the yield, while the omission of potash caused a material reduction in yield. The largest yield was produced by phosphates and potash combined. No further increase was produced by the addition of manure to the chemical fertilizers.

In the case of cucumbers, increasing the temperature above 85 deg. F. sufficed to prevent the leaf-spot disease, and considerably increased the weight of the early pickings as well as the total yield.

Experiments in soil sterilization are being made in co-operative commercial greenhouses, under the guidance of extensive research conducted in the Rothamsted laboratories, in which the effect on the soil and on the growing plant of a large number of chemical substances is being studied in comparison with steam.

Most of the difficulties encountered by the gardener, under glass, are due to microscopic soil organisms. These, under the glass-house conditions in which the natural action of such organisms upon each other is interfered with, attain an importance that is not reached in the open field. Among these are the nematodes (small eelworms that infest the roots) and the bacteria and fungi that cause the "damping off" of seedlings, and some forms of blighting of the mature plant. All these may be reached by soil sterilization; but there are other organisms in the soil that are beneficial—for example, the nitrifying bacterium. How so to adjust our treatment as to hit our root without injuring our friends is a delicate problem of strategy calling for the most elaborate scientific research. To the solution of this problem a very large part of the resources of the Rothamsted Station are now being directed.—Charles E. Thorne.

Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto.

Minerals in Swine Ration.

It is true that mineral requirements for swine is practically a new thing in feeding swine, yet it promises to be one of the foremost steps in improved methods of securing maximum growth and health. Practical feeders for years have been allowing their hogs access to wood ashes and to charcoal or soft coal and the like for the supplying of these minerals. Such substances have been very good, and did supply some very essential material, and yet in the very experiments that are being made at any of the stations at this time will bring out some very valuable facts. Up to the time it seems that about the same errors are being made in the use of minerals to swine that were originally made in the earlier feeding tests, in which they attempted to argue from the complex to the simple rather than from the simple to the complex, which seems to be the logical way to approach these subjects. It took scientists many years to awaken to the fact that some things about our common feeding practices would never be understood until we began with the use of a very simple ration and then worked into a complex one, so that an accurate check could be made upon the true value of various feeding materials, under varying conditions. The wonderful discoveries made during the past decade have been ample proof that this was the proper method of making the feeding trails and more actual history as to the value of feeding materials than has been accomplished during several such periods previous to this time.

It is a common practice for some swine feeders to feed certain minerals not for any specific action which they expect to obtain, but simply because it has been a time-honored custom. Such agents as sulphur, copperas, charcoal, seem to have very little, if any, beneficial action for swine, and may, if not given properly, actually prove harmful, and yet swine breeders have long used them in their tonic and mineral mixtures. We must depend more on our late experiments to tell us about these materials. At this time sulphur is rarely used as a medicine by veterinarians, and then usually in an ointment for its effect in killing parasites of the skin. If it is taken into the animal's body in fairly large doses over a long period it may bring about a serious blood condition. It turns the feces, or manure, very dark in color and gives it a very foul odor, and should be given in very small amounts until we learn more about it.

Copperas, or iron sulphate, is a common remedy, and while it may be given in small quantities for some time, it can not safely be given in very large doses; our latest information on iron is that it is a food rather than a tonic or a medicine, and later day veterinarians use it in that way. It is also thought to be a worm destroyer, but tests have proven this without any foundation; it is very readily changed into another form when exposed to the ordinary atmosphere and if it was to be given it should be kept as nearly dry as possible. With the knowledge that we have of this material at this time it is doubtful if it is advisable to feed it to swine.

Charcoal is found in two forms, that which is made from wood and that from bones. The action of charcoal is that of an absorbent, and its function in the intestinal tract is to absorb any methane gas that may be generated in the intestines. This can

be of value only in cases of fermentation, and then only for a very short period of time. Extensive tests have proven that it is eliminated from the body in the same form that it is taken in and has but very little use in a swine mixture.

The minerals that are most likely to be deficient are calcium or lime, chlorine, sodium and phosphorus. These are the elements that enter into the formation of the skeleton in the larger amounts. It may be possible that iodine is sometimes needed, but this only in sections where there are no salt licks, and that is due to the fact that in some sections the soil is depleted in these elements and therefore the crops do not contain a normal amount. This can be easily and cheaply supplied. The following materials furnish the minerals commonly used very cheaply and at a very slight cost: Sodium chloride or common salt, ground rock phosphate, ground bone meal, either raw or steamed, wood ashes, and many others. Common salt or sodium chloride furnishes both sodium and chlorine in sufficient quantities. Steamed bone meal or ground raw bone meal furnishes both calcium or lime and phosphorus; wood ashes or kainit furnish potash, but this is not so often needed. A very good mixture consists of equal parts of salt and steamed bone meal; another of salt and raw bone meal; another of salt and wood ashes; another of salt and raw rock phosphate, very finely ground. All of these may be mixed equal parts and fed in a self-feeder.

Animals will consume about one pound of such mixtures each month; this can be provided for in this way: Mix a pound of the mixture with an amount of tankage that they will eat in about a month. If they are eating about fifty pounds of tankage per month, then add two pounds of the mixture to each one hundred pounds of tankage and you are certain in this way that they get that amount. If they are eating more, increase it, and if less, decrease it. This should be very well mixed and fed in a self-feeder; most animals will eat about this amount of it, if it is fed alone in a self-feeder; this will depend somewhat upon the individual.

It is not advisable to attempt to furnish all the minerals that are needed by the animal in this way, but there are certain feeds that are very rich in minerals, and much of the minerals should be supplied through them. Among these feeds are alfalfa and clover hay, bran and soy beans. The hay can be and should be, fed to brood sows in a rack during the winter months, or when they are not on pasture; sows will consume about one to one and one-fourth pounds per each one hundred pounds of body weight per day when it is fed in this way; the use of pasture crops, such as alfalfa, clover, rape and the like, also provide large amounts of minerals for the breeding and growing animals. The mineral requirements for swine need occasion the breeder no alarm; it can be very easily handled, and quite inexpensively also; all it requires is a little good judgment in the selection of feeds, and possibly some simple mixtures that we have outlined in this article.

Well-ventilated quarters that are clean and cheery, and supplied with an abundance of bright straw litter, tend to make healthy birds, and such are the birds that lay the golden eggs.

"The second blow-out in a week!
Why don't you get good tires?"

DOMINION TIRES ARE GOOD TIRES

DOMINION TIRES are the same quality, no matter what the size. DOMINION "NOBBY TREAD" 30 x 3 1/2 Tires for Ford, Chevrolet, Gray Dorr, Overland and other light cars are the same design, same material, same construction as the big "NOBBY TREADS" for Pierce-Arrows and Packards. You get the mileage when you ride on "DOMINION TIRES".

There are Dominion Tires for every car and every purpose—DOMINION INNER TUBES, too—and a complete line of DOMINION TIRE ACCESSORIES.

Sold by the best dealers from coast to coast.

THE PICTURE I WOULD PAINT

The man who can paint the innocence in a child's smile, the purity in a woman's eyes, the loving tenderness lurking in the drawn corners of a stern man's lips, is the world's greatest artist. His model is in his heart. He can have no other.

I can not draw a straight line. I can not amuse the youngsters who play at my knee by making a picture in any wise resembling a dog or a cow. By dint of herculean effort I can draw what I proudly think looks somewhat like a house, with square doors and windows; but the wisp of smoke which I add (with a Spencerian flourish) atop the chimney, is usually taken by the juvenile spectators to be a pig's tail. Yet I should rather be an artist than anything else in the world.

In my mind's eye I can see the picture I should like to paint. There is a doorway as a sort of frame for a mother and a little girl. The love light is shining in their eyes, their faces are aglow with welcome. Up the lane, toward the house, comes he who is King of the little household, monarch of all he surveys. A tousled-haired youngster is enthroned on one of the big horses coming in from the field, while a younger brother rides astride his father's shoulders—shoulders stooped but a little since with the day's toil, now straight and squared, because love has thrilled the man anew. Father and boys are waving to the mother and girl who stand in the doorway, through which streams the welcoming light of Home. They call cheerily to each other, these loved and loving ones. The peace of night falls again over that humble, yet glorious, castle of Love and Faith and Hope.

There would have to be a companion picture, to get it all in. A little brood is gathered about the father's knees, while the mother does her chores nearby. The brood listens eagerly while the father reads or tells such stories as children have loved since the beginning of time; childish eyes grow big, but there are strong arms nearby to protect, fear vanishes. Slowly but surely the father leads them on, from King Arthur to Him who is Lord of lords and King of kings. Night comes on apace. The stars come out. The stairs creak. The little brood gets closer. Mother joins the circle. And the heads of all, old and young, bend low, while a deep, tender voice, supplemented by childish treble, intones "Our Father, which art in heaven." Then one by one the little folks go "piggy-back" up the creaking stairs to bed.

Who can paint such a picture? Yet who can not see it in his mind's eye? The man who can not see it has lost two-thirds of his life; the woman nine-tenths. There are no tears hot enough to drown that picture from our memory.

You say it can not be painted; there are problems of technique which can not be overcome. Our art will not be Art until such a picture is painted. Our life will not be Life until such a picture is in every man's and every woman's mind, visible alike in the light and in the dark.

"He who is far from home is near to harm." As the journey ends, and we pass through our own door, that peace which passeth understanding settles down upon us. We drop the pack from our shoulders. We are free men again. Behind the closed door is the solace of sympathy, the tenderness of love.

"This be the verse you grave for me: Here he lies, where he longed to be; Home is the sailor, home from the sea; And the hunter home from the hill."

Making Biddy Exercise.

A fairly common practice among poultry keepers is to suspend cabbage or mangels in a string sack on a cowl. The object of course is to encourage chicken exercise. I find it best, however, to hang the green food only a reasonable distance off the floor. Jumping is strenuous exercise. It brings parts under strain that the hen normally little uses. When a flock is laying heavily, there is danger of rupture if the cabbage is hung high. Dry, deep, new litter, in which scratch grain is sprinkled, is a better exercise.

Cabbages and mangels may be spiked to boards or impaled on wall spikes. I like to split the mangels in half. Any green food can be mixed and fed in a hot wet mash.

To Figure Paint Needs.

In figuring the amount of paint required for your home, you will find the following rule quite helpful:

While the quantity of paint required varies somewhat with the nature of the surface to be covered, and the conditions under which it is applied, a good grade of prepared paint will ordinarily cover at least 350 square feet to the gallon, using two coats.

First, measure the distance around the house and multiply by the average height, then divide by 350, and the result will be approximately the number of gallons to buy.

Of this quantity, one-fifth will represent the paint required for trimmings, cupboards, etc.

One hundred mature fowls require approximately 400 square feet of floor space. A house sixteen feet wide and twenty-five feet long will be satisfactory for a flock of this size.

There are more than 150 brands of baking powder in Canada; and the fact that there is more MAGIC BAKING POWDER used than all the other brands combined shows why Magic Baking Powder is known as Canada's best baking powder.

SIGNS OF FAVORABLE SETTLEMENT OF INDUSTRIAL WAR IN GREAT BRITAIN

Coal Miners Agree to Discuss Wages With the Owners—Just Possible That Threatened Tie-Up May be Averted.

A despatch from London says:—A dramatic development came in the coal strike situation at midnight on Friday when the miners agreed to discuss wages with the owners. There is declared a possibility that the strike will be averted. Immediate steps are to be taken to reopen negotiations for ending the strike, and averting a general tie-up which now threatens.

Thursday evening after the coal owners had placed their case before a gathering of 200 members of the House of Commons, Frank Hodges, leader and spokesman for the miners, was invited to give the miners' version of the dispute.

The meeting started at 9.30 and lasted until 11.50. Hodges, in reply to questions, agreed to a proposal for a further conference with the owners to discuss the question of wages, and leaving the other issues for further negotiations.

The House of Commons appointed a delegation to wait upon Premier Lloyd George and place the suggestion before him. At 1 a.m. eight automobiles drove up with a deputation. They were admitted and were closeted at once with the Premier.

It is declared, moreover, that steps are being taken at this meeting to assure a reopening of the negotiations. The Daily News on Friday morning said that Hodges told the Commons members that he preferred to consider a temporary arrangement regarding wages and that he had abandoned the proposed plan for a national pool to equalize wages.

Premier Lloyd George was prepared to go before the House of Commons this (Friday) morning, where in a speech he expected to plead with all citizens to co-operate with the Government in preserving the life of the nation throughout the strike which was scheduled to begin at 10 o'clock Friday night.

The Premier intended to detail to the House the measures the Government is taking to safeguard workers if the strike is not averted and to insure the distribution of food and preserve public order.

The Triple Alliance leaders who visited him to explain why they had

declared the sympathetic strike, insisted that they had acted not only as a measure of sympathy with the miners' claims, but also to protect all unions from raids on their wages.

The meetings with the labor chiefs disclosed an overwhelming sentiment among the labor bosses in favor of nationalizing mines and railroads and brought from Lloyd George the declaration that the Government would only consider such a proposal if it was advanced in a constitutional manner before the House of Commons.

A later despatch from London says:—Hopelessly outmanoeuvred on the eve of its greatest battle, labor has lost its first national fight with the Government even before the first real gun was fired.

By forcing Frank Hodges, leader of the miners, to yield their foremost demand for a wages pool, Premier Lloyd George completely out-generalized the Triple Alliance, forcing a split which is likely permanently to smash the alliance.

After the most spectacular conflict within the inner ranks of labor recorded in its history, J. H. Thomas and Harry Gosling have called off the railroad men and transport men's strike six hours before the notices were to become effective. Thus the Government won a bloodless victory over the protagonists of the general strike.

This entirely unexpected denouement, which made Great Britain gasp with amazement on Friday night, began late Thursday night when Frank Hodges, appearing on behalf of the Miners' Federation, before 200 members of the House of Commons, admitted that he was prepared to abandon the hitherto inextinguishable demand for the national wage pool.

This concession made peace appear certain and in the public mind it was virtually achieved, when, at two o'clock Friday morning, Lord Gainsford, on behalf of the coal owners, formally announced their readiness to forego all profits from the sale of coal during the period of depression in order to amend the recent wage cuts.

FRANCE PLANS TO INVADE RUHR

Military and Civil Staff to Determine Manner of Joint Action.

Paris, April 17.—A military and civil general staff will meet to-morrow to determine the precise manner of action in the Ruhr district in the event of occupation after May 1. The military plans, fully completed long since by the staff of Marshal Foch, are quite elastic enough, it is learned on good authority, to adapt themselves to the economic plans which the mixed commission sitting daily between now and May 1 will definitely adopt if necessary.

From a military point of view the recall of only one class, that of 1919, has been decided upon as sufficient to carry out further operations. Marshal Foch, General Buat, Chief of Staff of the army, and General Weygand, acting as General Secretary of the staff, will represent the military element. Louis Loucheur, Minister of the Liberated Regions; Paul Tirard, High Commissioner in the Rhineland, and M. Seydoux, the financial expert who represented France at the Brussels Conference, will compose the civil element.

King George Gives Coal to Windsor Poor

A despatch from London says:—The King's solicitude for the poorer people of Windsor, who are in difficulties owing to the shortage of coal, was demonstrated on Friday when the Mayor of Windsor received a telegram stating the King had authorized the transfer of 25 tons of coal from the stocks at Windsor Castle to the coal merchants of the town for household use.

Cuba's President Phones Canada's Premier

A despatch from Ottawa says:—The first long distance telephone conversation between Canada and Cuba took place on Thursday afternoon at 4.30, when Rt. Hon. Arthur Meighen, Hon. W. L. Mackenzie King, Hon. W. S. Fielding and Hon. Rodolphe Lemieux spoke in turn from the Parliament Buildings to President Mario G. Menocal, who had called up from presidential palace at Havana, Cuba, to extend the greetings of the Republic of Cuba to the Dominion of Canada.

The conversation from the other end of the line could be heard as plainly as though the person telephoning had been in the next room, according to the Prime Minister and the other gentlemen who spoke to President Menocal.

SINN FEIN NOW WAR ON WOMEN

Irish Revolutionists Shoot a Poor Peasant in Monaghan.

Dublin, April 17.—The first execution of a woman in the strife between the discordant factions in Ireland is announced. She was taken from her home in the Scotstown district of Monaghan to-day and shot and killed on the bank of the river.

The woman, whose name was Kitty MacCarron, belonged to the farming class. Kitty MacCarron, who was about 45 years of age, lived with her parents, octogenarians, in a wild, mountainous part of the country. About midnight a knock was heard at the door and a party of masked men entered and informed the victim that they had come for her.

She struggled in vain; the assassins fastened her hands behind her back and lead her, pleading pitifully, down a lane about a mile to the main road, by the side of which the body was afterward found with a bullet hole through the cheek, which is the customary sign of Sinn Fein executions.

A card on the body was inscribed: "Spies and informers, beware, Irish Republican Army."

Neighbors refused aid in the removal of the body, such is the terror inspired in Monaghan by the recent series of terrible deeds, which have earned for the county the reputation of being the worst in Ulster.

The police, although accustomed to tragic evidence, were deeply moved at the sight of the poor old mother in her second childhood, entering the room where her daughter's body lay and staring about her bewildered, unable to realize what had happened.

MURDER VICARS AND BURN HOUSE

Sinn Feiners Take Revenge on Former Keeper of Crown Jewels.

A despatch from Cork says:—Sir Arthur Vicars, formerly Ulster King of Arms and custodian of the Crown Jewels at Dublin Castle, was assassinated on Thursday morning outside his residence, Kilmorna House, Listowel, by a party of armed assassins, who afterward set the house on fire, which was totally destroyed. On the body of their victim they placed a card bearing the words: "Traitors, beware; we never forget—I.R.A."

A Dublin Castle message says:—Vicars was taken from his bed in a dressing-gown and murdered outside his house. About thirty armed men participated. Sir Arthur was in danger of being killed when his house was raided a year ago. He was in his study late at night when there was a knock at the door. On his asking who was there a voice called out the name of an inspector of the R.I.C., but Sir Arthur became suspicious and refused to open the door.

A moment later a body of raiders smashed in the door with hatchets. Sir Arthur was seized and threatened with death unless he gave up arms to them. He told them he would rather be killed than surrender. They then made an attack on the strong-room, which contained arms, but failed to break into it.

J. H. Whitley, M.P.
Mr. Lowther's successor as Speaker in the British House of Commons.

CANADA HAD GOOD TRAPPING SEASON

Prices Are, However, From One-Third to One-Half Lower Than Peak.

Sudbury, April 17.—The trapping season ended on April 10th and although many of the trappers have not brought in the winter catch as yet, Sudbury fur buyers report that the season on the whole has been a successful one considering the general business depression and unfavorable state of the fur market. Fur prices in the cities took a slump last year and this in turn affected the local market so that the trapping business was not as profitable this winter as formerly.

Many trappers turned their energies into other lines owing to the falling off in prices which are now from one-third to one-half what they were when at the peak. There has been a fairly brisk demand and although it was not as successful a season as last year, Sudbury buyers are satisfied that they will perhaps be better off financially in the long run.

Last year from \$25 to \$65 was paid for beaver skins, but this season prices range from \$7 to \$23. From \$8 to \$10 is being paid for mink whereas when prices were high the trappers received from \$35 to \$40. Muskrat skins nowadays only bring the trapper \$1.50, while last year they brought \$5. The muskrat catch this year, it might be noted, is much smaller than usual.

SERUM CURES SLEEPING SICKNESS

French Savants Find Remedy After Three Years' Search.

Paris, April 17.—Complete cures of lechagic encephalitis (sleeping sickness), by intravenous injections of a new serum, are reported by Professors C. Levadite and H. Larvier of the Pasteur Institute. After three years of unremitting research the two savants announce two definite conclusions:

1. Encephalitis is caused by a filament invading nervous centres, penetrating to the organisms from the nasal passages.

2. Cleanliness of the nasal channel is largely responsible for the apparent immunity enjoyed by some persons exposed to the germ.

A complete description of the serum will not be given out until it is definitely established as a certain cure.

No Oleomargarine in Guise of Butter

A despatch from Ottawa says:—Canadian Oleomargarine regulations have been amended by adding a provision that "no person shall sell, offer, expose, or have in possession for sale in Canada any oleomargarine bearing on the package or container thereof the trade mark or the name of any manufacturer in which is included any of the words 'butter,' 'creamery,' 'dairy,' or the name of any breed of cattle."

Further Decline in Foodstuffs

Ottawa, April 17.—A further decline in the cost of foodstuffs during the month of March is recorded in the current issue of The Labor Gazette, which states that the cost of the weekly family budget of staple foods averaged \$13.23 at the beginning of March, as compared with \$14.08 in February, \$15.56 in March, 1920; \$15.77 in March, 1919, and \$7.86 in March, 1914.

Weekly Market Report

Toronto.
Manitoba wheat—No. 1 Northern, \$1.70 1/2; No. 2 Northern, \$1.64; No. 3 Northern, \$1.60; No. 4 wheat, \$1.49.
Manitoba oats—No. 2 CW, 43 1/2; No. 3 CW, 38 1/2; extra No. 1 feed, 33 1/2; No. 1 feed, 35 1/2; No. 2 feed, 34 1/2.
Manitoba barley—No. 3 CW, 73 1/2; No. 4 CW, 62 1/2; rejected 45 1/2; feed, 49 1/2.
All of the above in store at Port William.
American corn—68c, nominal, track, Toronto, prompt shipment.
Ontario oats—No. 2 white, 42 to 44c.
Ontario wheat—No. 2 Winter, \$1.55 to \$1.60 per car lot; No. 2 Spring, \$1.45 to \$1.50; No. 2 Goose wheat, nominal, shipping points, according to freight.
Peas—No. 2, \$1.55 to \$1.65.
Barley—Malt, 65 to 70c, according to freight outside.
Buckwheat—No. 3, nominal.
Rye—No. 2, \$1.30 to \$1.35, nominal, according to freight outside.
Manitoba flour—First pat, \$10.70; second pat, \$10.20, bulk, seaboard.
Ontario flour—\$7.75, bulk, seaboard.
Milled feed—Delivered, Montreal.
Freight, bags included: Bran, per ton, \$33; shorts, per ton, \$35; good feed flour, \$2.10 to \$2.40 per bag.
Hay—No. 1, per ton, \$24 to \$26.
Straw—Car lots, per ton, \$12 to \$12.50.
Cheese—New, large, 30 1/2 to 31c; twigs, 31 to 31 1/2c; triplets, 31 1/2 to 32c; old, large, 33 to 34c; do, twins, 33 1/2 to 34 1/2c; triplets, 34 1/2 to 35c.
Butter—Fresh dairy, choice, 48 to 49c; creamery, No. 1, 58 to 61c; fresh, 60 to 62c.
Margarine—28 to 30c.
Eggs—New laid, 32 to 33c; new laid, in cartons, 35 to 36c.
Beans—Canadian, hand-picked, bus., \$3.50 to \$3.75; primes, \$2.75 to \$3.25; Japan, 8c; Lima, Madagascar, 10 1/2c; California Lima, 12 1/2c.
Maple products—Syrup, per imp. gal., \$2.60; 5 imp. gals., \$2.50; Maple sugar, lbs., 19 to 22c.
Honey—60-80 lb. tins, 22 to 23c per lb.; 6-24 lb. tins, 23 to 25c per lb.

Ontario comb honey, at \$7.50 per 15-section case.
Smoked meats—Hams, med., 35 to 36c; heavy, 27 to 29c; cooked, 50 to 55c; rolls, 31 to 32c; cottage rolls, 33 to 34c; breakfast bacon, 43 to 46c; fancy breakfast bacon, 53 to 56c; backs, plain, bone in, 47 to 50c; boneless, 49 to 52c.
Cured meats—Long clear bacon, 27 to 28c; clear bellies, 26 to 27c.
Lard—Pure tallow, 16 1/2 to 17 1/2c; tubs, 17 to 17 1/2c; pails, 17 1/2 to 18c; prints, 18 1/2 to 19c; Shortening tallow, 11 1/2 to 12c; tubs, 12 to 12 1/2c; pails, 12 1/2 to 13c; prints, 14 to 14 1/2c.
Choice heavy steers, \$9 to \$10.50; good heavy steers, \$8 to \$9; butchers' cattle, choice, \$9 to \$10; do, good, \$8 to \$9; do, med., \$6 to \$8; do, com., \$4 to \$6; butchers' bulls, choice, \$7 to \$7.50; do, good, \$6 to \$7; do, com., \$4 to \$5; butchers' cows, choice, \$8 to \$9; do, good, \$6.50 to \$7.50; do, com., \$4 to \$5; feeders, \$7.75 to \$8.75; do, 800 lbs., \$7.25 to \$8.75; do, 800 lbs., \$5.75 to \$6.75; do, com., \$5 to \$6; canners and cutters, \$2 to \$4.50; milkers, good to choice, \$8.50 to \$12; do, com. and med., \$5 to \$6; choice springers, \$9 to \$13; lambs, yearlings, \$10 to \$11; do, spring, \$11 to \$13.50; calves, good to choice, \$9 to \$11; sheep, \$6 to \$10; hogs, fed and watered, \$13; do, weighed off cars, \$13.25; do, f.o.b., \$12.25; do, country points, \$12.
Montreal.
Oats—No. 2 CW, 62 to 63c; No. 3 CW, 58 to 59c. Flour, Man. Spring wheat, 1st, \$10.30. Rolled oats, 90-lb. bag, \$3.20. Bran, \$3.25. Shorts, \$3.25. Hay, No. 2, per ton, car lots, \$24 to \$25.
Cheese—Finest Easterns, 30 to 31c. Butter, choicest creamery, 50 1/2 to 51c. Eggs, fresh, 38c.
Butcher steers, med., \$8 to \$9; com., \$7.50 to \$8.50; butcher heifers, med., \$7.50 to \$8.50; com., \$5 to \$7; butchers' cows, med., \$5 to \$7; canners, \$2 to \$2.50; cutters, \$3 to \$4; butcher bulls, com., \$6 to \$6.50; good veal, \$6 to \$6.50; med., \$5 to \$6; hogs, off-car weights, select, \$14.50 to \$15; heavies, \$12.50 to \$13; sows, \$10.50 to \$11.

Yap Matter Discussed by Supreme Council

A despatch from Paris says:—In order to "give the United States the fullest satisfaction in the Yap matter at the earliest possible date," it was revealed on Thursday that the Supreme Council has decided to meet on May 1 or 2. This is a fortnight earlier than usual.

The whole mandate matter will be threshed out. The Japanese delegate is expected to make a lengthy statement as to Japan's position.

Owing to the certain refusal, it is not believed that any invitation to the meeting will be extended to the United States.

ITALIAN LABOR WAR AIDS GERMANY

Chance to Penetrate Kingdom Commercially and Industrially.

A despatch from Rome says:—Italy's industrial crisis, the latest manifestation in which is the lock-out in the huge Fiat motor factory, employing more than 8,000 men, is alarming business interests here. Germans are openly rejoicing over this chance to penetrate Italy commercially and industrially with motor works and manufacture of scientific instruments. As automobiles represents Italy's healthiest industrial export, prospects of German dominance in this line are very disturbing. It is said that the Italians would be wholly unable to compete with German labor at twelve hours a day, especially as Bolshevist propaganda has already undermined factory discipline in Italy.

The Fiat management has issued a statement to justify the lockout. Among the significant assertions in it is one to the effect that the eight-hour-day is less than that time in practice, because the men are always dropping their tools to attend meetings of factory Soviets.

Threats at the factory gates are said to be frequent and beyond the reach of legal correction or punishment. Dismissed men refuse to leave the machinery and demand full wages even when idle. Many of the hands have been making bombs when they should be at work, and they have repaired at will to the cellars for gun practice.

First Jap Ambassador for Constantinople

A despatch from Paris says:—Baron Uchida, formerly Japanese Minister to Sweden, and one of the most astute of Oriental diplomats, has embarked at Marseilles en route to Constantinople where he will be given the title of Japanese ambassador.

This will be the first time that Japan has had a minister at Constantinople or even remotely indicated her interest in the solution of Near East problems.

Roumania's Finances Are Improving

A despatch from London says:—Roumanian exchange has shown a notable improvement here recently. The Canadian Associated Press representative has been assured that the question of Roumania making interest payments on the credits advanced to her by the Canadian Government had been taken up with a delicacy which promises eventually satisfactory results.

Peace Time Use for Periscopes.

Periscopes, when the days of submarine and trench warfare are definitely forgotten, will still be useful, but for humanitarian purposes, is the suggestion made by Dr. Costremoulins, chief of the Paris Hospital's radiological service, who has now entered the ranks of those trying to solve the problem of avoiding the dreaded radio dermatitis.

Taking as a basis for his theory the fact that lead alone offers sufficient insulation against the harmful rays, he would have the operators cased in double walled closets, the exterior containing the dangerous apparatus, but separated from the interior by switchboards, while the patient as well as the machinery would be watched through a series of reflecting mirrors, just as the doughboys watched the enemy outposts during the war. Dr. Costremoulins was a victim of X-rays twenty-five years ago, when he burned his left hand, but by great care since then, despite the fact that he has made hundreds of thousands of examinations and experiments, he has prevented the spread of the disease which already has robbed France of Dr. Infrat, Dr. Leroy and other X-ray experts.

China's Old Chickens.
Literature written more than 1,000 years ago mentions two breeds of poultry still being raised in China, while incubators now used are the same in principle as those employed in Egypt 4,000 years ago.

The high cost of living is increased by forest fires. Every citizen should help to keep down fires.

A quaint milestone on the outskirts of Zanzibar bears the inscription: "London, 8,064 miles."

REGULAR FELLERS—By Gene Byrnes

Talk About Value Giving

Our Tailored-to-measure Clothes make lasting friends for us of smart dressers and value-seekers. I want every man to see the beautiful all wool Tweeds and the hard-wearing Worsteds in Young Men's Single and Double-breasted Models, as well as the conservative men's suits, at \$25, \$35 & \$45.

Silks, Satins and Dress Goods

That the ladies are quick to realize and appreciate values is evident from the rapid growth of our business here. Visit our store and be convinced that our values are better than elsewhere.

The Talk of the Town

Mayhew's "Family Shoe Store." Our slogan, "Retail at Wholesale Prices," is absolutely correct, and we can save you from \$1.00 to \$2.00 on every pair.

Men's New Spring Hats and Caps

It is a rare treat to see the new 1921

Low Collars and Narrow Ties

Do not forget that this store is headquarters for

Rugs, Wall Papers, Window Shades and Linoleums

Always a pleasure to show goods, whether you intend buying or not.

Boys' Department

It will pay any mother to come in and see our Boys' Suits. They are not cheap clothes, made up to sell at a price, but are tailored the same as the men's and sell at less than the cheap made-up trash. Beautiful Homespuns, Tweeds and Worsteds in double and single breasted, belted, unbelted and half belted models. Priced at \$7.50 to \$13.50.

E. A. MAYHEW & CO.

"The Store with the Stock."

Dragged Down by Asthma. The man or woman who is continually subject to asthma is unfit for his or her life's work. Strength departs and energy is taken away until life becomes a dreary existence. And yet this is needless. Dr. J. D. Kellogg's Asthma Remedy has brought a great change to many sufferers. It relieves the restricted air tubes and guards against future trouble. Try it.

A barber cuts and dyes while a sculptor makes faces and busts.

The Friend of All Sufferers.—Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer from it. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of half a continent. It is on sale everywhere and can be found wherever enquired for.

Your Share of the Prest-O-Lite factory

WHEN you hand over your check for a new Prest-O-Lite Battery you get more than a storage battery. Your money buys a first mortgage on the Prest-O-Lite good name and all it represents—the great Prest-O-Lite Factories—the knowledge and experience of Prest-O-Lite Engineers—the Travelling Force of Service Experts—absolute assurance of a dependable starting-and-lighting service.

Your interest in the Prest-O-Lite factory, like the factory's interest in you, begins—not ends—with your purchase of a Prest-O-Lite Battery. Prest-O-Lite Service is always at your disposal. Let us relieve you of all your battery care and attention.

The Transcript.

THURSDAY, APRIL 21, 1921

MELBOURNE

Many villagers and people from the surrounding country and from a distance attended the inquest held here on Thursday. It will be some time before our people will be in a condition to settle down and feel that they are living in a peaceful land. If a strange car passing through stops, many eyes are on the lookout. If a car stops at night, the citizens are up and remain there until they know who it is. Many guns that have not been handled for years have been taken out. A few shots were heard one morning and the people left their work and rushed out to learn the cause. It proved to be a citizen who had cleaned his gun trying it. Many others have followed his example. We sincerely trust that they will never be needed again, but the people living in this village and vicinity have decided to be ready at a moment's notice.

A few weeks ago the missionary committee of the Epworth League of the Methodist church here suggested that each member earn 25 cents or more for the missionary fund and that they tell in poetry how the money was earned. At the last regular meeting the members gave their poems and deposited the amount made on the table. After the reciting or reading was done the proceeds amounted to almost \$11. The poems were so good that the pastor, Rev. Dr. Brown, suggested that they be kept and put in book form. It proved to be a most interesting and profitable evening.

A large number attended the sale at Archie Carruthers' a few days ago. Mr. and Mrs. Carruthers will move to the village shortly.

Although the rain came down all day on Saturday it did not prevent the men from attending Mrs. Beech's sale. The cattle and stock were all sold, also the farms, one being purchased by Ross McCracken and the other by Thomas Carruthers.

CAIRO

Gordon L. and Stuart Smith of Windsor were home on Wednesday to see their father, D. M. Smith, who has been ill. We are pleased to report that Mr. Smith is slowly improving.

Nurse Mary McGugan of Detroit is visiting at Archie Carruthers'.

Miss Mamie Young has accepted a position as clerk in G. L. Sinclair's store. Mr. and Mrs. Lew Sullivan have moved into the store and will also assist Mr. Sinclair with the work.

CASHMERE

The death occurred at the home of his daughter, Mrs. Charles Cawley, East Aldborough, on Friday, April 15, of Isaac Dawson, one of the oldest and most highly respected residents of this district, where he lived for over 48 years. The remains were brought from Mrs. Cawley's home to the old homestead on Friday afternoon. Although an old man, his death came as a shock to everyone. He was 79 years of age in December last, and leaves to mourn his loss his wife, Alvin Dawson, and two sons, one in Bridgeburg and one in British Columbia, and three daughters, Mrs. Charles Cawley of East Aldborough, Mrs. Wm. Moore, recently of the homestead and Mrs. Wm. Young of Cairo. The funeral services were held on Sunday afternoon, Rev. Leonard Bartlett of St. John's conducting the services, assisted by Rev. Dr. Husser of Wardsville. Interment was made in the Taylor-Gibb cemetery.

Mr. Saylor of Stevensville is visiting relatives in this vicinity.

Mr. and Mrs. Edward Dawson of Bridgeburg attended the funeral of the former's father, the late Isaac Dawson.

Mrs. Edwin Hoxie and three children have returned to Newbury to visit the former's parents before returning to Detroit.

Mr. and Mrs. Allan Stiller of Bothwell spent Sunday with their son, Calvin.

It Testifies for Itself.—Dr. Thomas' Electric Oil needs no testimonial of its powers other than itself. Who ever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, will know that the medicine proves itself and guarantees. This shows why this Oil is in general use.

NORTH EKFRID

Mrs. Charles Mitchell of Metcalfe township, youngest daughter of Mr. and Mrs. Robert Pierce of Canadoc, passed away on Monday, April 11th. She was a member of the Presbyterian church and was much loved by all who knew her. Mrs. Mitchell leaves to mourn her loss her husband, father and mother and two brothers and three sisters. She is also survived by a baby boy nine days old. She was buried in Strathroy union cemetery. Rev. Mr. McCulloch of Appin conducted the funeral services.

Frank Graham died Tuesday morning, April 12, and was buried in the Laughton cemetery. Rev. Mr. McCulloch of Appin conducted the burial ceremony.

A large number from this vicinity attended the funeral of the late Russell Campbell of Melbourne.

Mrs. Isaac Farrow of Mount Brydges spent a few days with friends here.

George Graham of Drumbo attended the funeral of his brother, Frank Graham.

Bert Pierce's little daughter, Edna, has been confined to her bed with rheumatism. She is reported some better.

Little Olive Down is in London taking chiropractic treatments.

NEWBURY

The house wiring for hydro is moving along quickly. With only a few exceptions every house in the village will be lighted. The streets look fine at night.

English dinner in town hall Saturday, 23rd, from 5.30 to 8 p.m., given by Anglican Ladies' Guild. Adults, 25c; children, 12c. Donations for band, etc., and ice cream on sale during afternoon.

James Lafferty, who lived in this vicinity for a number of years and was well known throughout the district, died on Wednesday morning of last week at his home at Florence. He is survived by a widow and six sons and four daughters.

KNAFDALE

This climate sure is immense. One day we wore our old straw hats.

We haven't used them since. Old J. Phivus has been having his innings again and has dampened among other things the ardor of the farmer. The ground is now in such a condition that seeding operations will have to be postponed for some time.

With the wheat on the high ground tanned by the frost, and the outcome of the early seeding an uncertainty, the balmy zephyrs will have to kiss him on both cheeks to put him in humor again. But lo! Here comes his old friend the snow.

Enterprising Biddy will have to watch carefully these days lest she scratch on forbidden ground and be forced into disgrace by having her toe-nails manicured and some of her plumage scattered to the winds.

Gardening has been begun in this district. Too bad the average boy is more of a sentimentalist than a horticulturist, but it would be hard to make him believe that a watermelon from his own garden would taste nearly as good as one from his neighbor's corn field.

Mrs. Nell Mitchell left on Thursday for a short visit with friends in Detroit and Pontiac.

Mrs. Lorne Heatherington of Niagara Falls is visiting her sister, Mrs. Duncan Mitchell.

A few herds of young cattle have been turned out to pasture.

EKFRID STATION

There will be a U. F. O. meeting in S. S. No. 4 next Friday evening, April 22nd.

John Switzer and his friend, Mr. Orum of Walkerville, spent the week end at the former's home here recently.

Rev. Mr. McCulloch intended having sacrament in S. S. No. 4 last Sunday evening, but on account of the weather services were postponed and will be held next Sunday evening in S. S. No. 4 at 7.30.

Miss Agnes Switzer of Lawrence Station spent the week-end with friends here.

G. C. Smith had a stroke last Thursday but is somewhat improved. We are glad to hear that W. H. Switzer is getting along nicely after an operation.

WOODGREEN

It looked on Sunday as though we were going to start winter again. Miss Myrtle Perrin has returned home after making an extended visit at her brother's in Blenheim.

Miss E. Roycraft spent the week-end with her sister at Linden, Mich.

Great excitement was caused here on Wednesday last when one hundred cases of "boogie" went through, with the floor was cleared and young and old had a very enjoyable time till the wee hours of the morning to the tune of the fiddle.

The school children had a holiday here on Monday owing to the fact that the school house was used as a polling booth. Many farmers and their wives turned out to vote.

Complete in itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

SHEPHERD

The Methodist church held a banquet in the town hall on Friday night in honor of Mr. and Mrs. Milton Moorhouse and family who are leaving for a new home.

Mrs. Manley Moorhouse has been seriously ill, but is some better.

Mr. and Mrs. E. Moorhouse have returned from Michigan where they had been at the bedside of their son Harold, who was dangerously ill with pneumonia.

Miss Millie Bolton is visiting friends in Oil Springs.

Wm. and D. Bolton attended the funeral of their brother-in-law, James Lafferty, in Florence on Thursday. R. Gray spent a few days in Alisa Craig last week.

The Treasure Seekers' Class of Shepherd held a shower for Mrs. Bert Playfoot (nee Emma Rush) at the home of her parents, Mr. and Mrs. Wm. Rush, on Monday evening.

MODEL CENTRE

(S. S. No. 7, Ekfrid)

On Monday evening, April 18, the neighbors and friends numbering about one hundred of Mr. and Mrs. James McIntyre and family met at their home to spend a social evening and bid them farewell on the eve of their departure to reside in their new home in Glencoe. During the early part of the evening Malcolm McIntyre of Moss took the chair and a short musical program was given, including violin selections by Gordon McLaughlin, John McGregor and Dan Leitch; songs by William Hamilton, and also accordion music by Mr. Hamilton. Some of the old neighbors of Mr. McIntyre were called on to say a few words. These included Duncan McKellar, Wm. Leitch, Dan Munroe and Wm. Oldes. The most interesting part of the program was the reading of a well-worded address by Dan McKellar, after which Mr.

and Mrs. McIntyre were each presented with a leather-bound rocking chair, Jennie Bell with an ivory manicure set and Dougald with gold cuff links. Mr. McIntyre made a suitable reply, thanking his friends for the kindness shown, the family but stated that he was leaving the farm owing to ill health. The program closed by all singing "He's a Jolly Good Fellow" and "Auld Lang Syne." The ladies then served a lunch and the floor was cleared and young and old had a very enjoyable time till the wee hours of the morning to the tune of the fiddle.

Worms, however generated, are found in the digestive tracts, where they set up disturbances detrimental to the health of the child. There can be no comfort for the little ones until the harmful intruders have been expelled. An excellent preparation for this purpose can be had in Miller's Worm Powders. They will immediately destroy the worms and correct the conditions that were favorable to their existence.

WARDSVILLE

A large crowd attended the union service in the town hall Sunday evening when Rev. Mr. Murphy and Dr. Husser spoke on the referendum.

Dr. and Mrs. O. J. Glenn spent Tuesday in London.

Mrs. Yorke and father, who have been visiting Mrs. A. O'Hara and Mrs. J. McRae, have returned home.

Mr. and Mrs. Jim Thomas and Jim Brown motored to London last week.

Miss Dykes has recovered from her recent illness and has again taken up her school duties.

Miss Lella Norton left Monday for a week's vacation at her home in Birr.

The Women's Missionary Society of the Methodist church held their annual meeting on Thursday afternoon and appointed officers. Mrs. J. V. Faulds was appointed to attend the conference branch convention to be held in Listowel in June, with Mrs. Edith Sparling as alternate.

Mr. Jardeen of Gorrie spent a few days last week visiting friends in town. He also visited the high school and spoke to the students. He was at one time principal of the high school.

Robert Yates is making rapid progress with his store. The foundation having been completed, work has started on the frame work.

DAVISVILLE

Born—April 17, to Mr. and Mrs. Nelson June (nee H. Armstrong) of Newbury, a daughter.

Mrs. Wm. Durley is on the sick-list.

Farm for sale—150 acres, lot 6 and 7, 2nd range north Longwoods road, Moss; 3 1/2 miles from Glencoe; 1 mile from school; good up-to-date buildings; lots of spring water; 15 acres fall wheat; everything in good condition. Apply to Wm. R. Goff, Route 1, Glencoe.

KILMARTIN

About 100 friends of Mr. and Mrs. D. D. Campbell gathered at their home on Thursday evening last to show their esteem before Mr. and Mrs. Campbell move from the neighborhood. A purse was presented during a program of music, songs and speeches, after which lunch was served and the young people enjoyed a few hours of dancing. Mr. and Mrs. Campbell and daughters are moving in a short time to Glencoe.

Duncan P. Campbell is moving on the farm which he recently purchased from D. D. Campbell.

Mrs. Clark and son, who purchased the farm of Mrs. McIntyre, are moving in this week.
