ST. FRANCIS COLLEGE.

St. Francis College is beautifully situated in the southern part of the town of Richmond, on a height commanding a view of the picturesque valley of the St. Francis River and the Village of Melbourne. Its central location with regard to railways renders it a most suitable place for an educational institution, situated as it is at the junction of the Quebec and the Portland branch of the Grand Trunk railway, 76 miles from Montreal, and 96 from Quebec.

The College was established by Act of Parliament in the year 1855, and afterwards became affiliated to McGill University, Montreal, in the Faculty of Arts. In the winter of 1881 the buildings were totally destroyed by fire, but fine and commodious ones have since been erected with large and well-lighted rooms, affording accommodation for thirty resident students.

As a proof of the healthful location, it may be stated that no death or serious illness has occurred in the College since its establishment. There are pleasant recreation grounds of several acres, giving ample opportunities for various athletic sports and games.

The scholastic work is supplemented by a course of popular lectures and debates during the winter months, under the auspices of the College Literary Society, to which the students are admitted.

In the Boarding department, while the material wants and comforts are carefully attended to, the students, under the direction of Resident Masters, receive any necessary assistance in their evening studies.
