

RECOVERING BODIES OF VOLCANO VICTIMS

WORK IN PROGRESS NEAR MOUNT VESUVIUS

Danger Now Appears to Be Over—Ashes Have Almost Ceased to Fall.

Naples, April 16.—The condition of Mount Vesuvius is unchanged to-day. The volcano is still surrounded by a thick cloud of smoke, but ashes have almost ceased to fall.

INNOCENT MEN HANGED

Springfield, Mo., April 16.—Quiet prevailed here to-day and the indications were that the race trouble was over.

PRINCE ARTHUR AT THE CAPITAL

Ottawa, April 16.—Prince Arthur of Connaught was presented with a civic address at noon to-day at the city hall.

ONE DEAD AND TWO WOUNDED

Louisville, Ky., April 16.—Luther Taylor, marshal of Campbellsville, Taylor county, Ky., is fatally wounded.

LAW WILL BE ENFORCED

Chicago, Ill., April 16.—As a result of the strike at St. Louis, the Roman Catholic church on Saturday night, when three little girls were killed and more than a score of persons injured.

MURDEROUS ASSAULT

New York, April 16.—Thomas Maher, a well known contractor, 48 years of age, and whose home is at Cambridge and Pelham, was waylaid and murdered.

OPERATORS AND MINERS

New York, April 16.—The Tribune this morning says: "The formal decision of the anthracite operators to the last proposition of President Mitchell's committee of seven will be announced to-morrow at a meeting of the trustees of the coal carrying companies here."

SEEDS

Golden Yellow CALLA Lily, 5 Buds. 50 PLANTS 10c. SEEDS 10c.

AMERICAN ATHLETES

Men Who Will Compete in the Olympic Games at Athens Have Reached Naples.

OFFICER'S SUICIDE

Honolulu, April 16.—Capt. Martin, of the light artillery, en route home on board the United States transport Sherman, under guard as insane, jumped overboard during a storm on April 5, three days after the steamer left Nagasaki.

PRINCE ARTHUR AT THE CAPITAL

PRESENTED WITH AN ADDRESS FROM CITY

Ottawa, April 16.—Prince Arthur of Connaught was presented with a civic address at noon to-day at the city hall.

His Royal Highness and Party Paid Visit to the House of Commons.

Ottawa, April 16.—Prince Arthur of Connaught was presented with a civic address at noon to-day at the city hall.

ELECTRIC ROAD

Chicago, April 16.—Ten hours between Chicago and New York, transported by electricity, and making an average speed of 75 miles an hour, is the plan of the incorporators of the Chicago and New York electric air line railroad.

DEATH OF R. TEMPLEMAN

Ottawa, April 16.—Robert Templeman, the only brother of the Minister of Inland Revenue, died suddenly yesterday at his home in the township of Ramsey, Lanark county.

THE FOREIGN TRADE OF THE DOMINION

Ottawa, April 16.—Canada's foreign trade for the nine months of the current fiscal year shows an increase of \$55,214,049 over the same time last year.

LONG DISTANCE TELEPHONING

San Francisco, April 16.—The Examiner to-day says: "David C. St. Charles, an engineer of this city, has invented a repeater which will make it possible to telephone from here to New York."

BOSTON HORSE SHOW

Boston, Mass., April 16.—The annual exhibition of the Boston Horse show, which opened to-day, more than a thousand of the best horses in the country will compete in the various classes.

TEACHERS WILL ASSEMBLE HERE

ANNUAL CONVENTION TO BE HELD IN JUNE

Victoria Institute Arranging Interesting Programme—Committee Preparing For the Visitors.

The annual convention of the B. C. Teachers' Institute will be held on the 26th, 27th and 28th of June in Victoria.

BAPTIST YOUNG PEOPLES' UNION

ANNUAL CONVENTION HELD IN THIS CITY

Work Was Completed Last Evening—Business Before Delegates—Next Meeting in New Westminster.

(From Saturday Daily.) The second annual rally of the Baptist Young People's Union has passed into history with gratifying results.

APPEAL TO ROOSEVELT

Colored Clergymen of Chicago Will Ask For Inquiry Into Lynching in Missouri.

REVOLVER CHAMPIONSHIP

New York, April 14.—The final results of the annual championship matches of the United States Revolver association were made public to-day.

THE PRINCE AT CAPITAL

Ottawa, April 16.—The annual exhibition of the Boston Horse show, which opened to-day, more than a thousand of the best horses in the country will compete in the various classes.

WEST COAST NOTES

The steamer Queen City, Captain Townsend arrived at 10 o'clock Saturday from Quatsino and west coast ports, bringing down a quantity of freight and a good passenger list.

PROVINCIAL NEWS

VANCOUVER. Because of the boycott of American business men, a large order for ties is to be placed with Vancouver mills by a firm of Chinese railway contractors.

The cement sidewalk on the west side of Menzies street has been completed. Work is to be pushed on the Michigan street walk now.

Thomas John Beardwell died on the 11th inst. at the Royal Jubilee hospital. He was 42 years of age and a native of Foxgrove, Oakland, Beckenham, Kent, England.

The funeral of William Reid took place Friday from the parlors of the B. C. Funeral Furnishing Company at 230. Services were conducted by Rev. T. W. Gladstone at the parlors and at the grave.

The appointment of John D. Gillis, principal of the Boys' school to the position of inspector of public schools, which was mentioned in 'Thursday's Times', will remove from the teaching staff of the city a teacher whose place it will be difficult to fill.

AN UNPLEASANT TOPIC.

We regret that it is necessary at this pleasant spring season of the year to mention matters which savor of politics. But we feel impelled again to draw attention to the fact that the late Attorney-General in the McBride administration has publicly said that he resigned his portfolio because of a disagreement with the other members of the cabinet upon a matter of public policy. Mr. Wilson furthermore avers that his side of the story will be made public in due time. The resignation of the Attorney-General was handed in while the Legislature was in session, and, according to practice, should have been announced to the House and the cause of it explained to the members at the first opportunity. The resignation was not made public until after prorogation, and the cause of it has only been learned from the statement of the late minister. Neither to the Lieutenant-Governor nor to the Legislature, it appears, does this peculiar government Mr. McBride hath set up ordinary constitutional courtesies. It is worked according to principles suited to the occasion and to the peculiar circumstances under which it came into and holds power. In its relations with the Lieutenant-Governor and the Legislature it has been guilty of acts of consummate insolence. The powers to which it should have been held responsible it has treated with contempt and defiance. Having weathered another session by the usual arts and survived the defection of a minister by deceit, the First Minister and his First Adviser, the Chief Commissioner of Lands and Works, are preparing to spend the recess in canvassing the constituencies and in making ready for the dissolution which has been unavoidably deferred. These annual pilgrimages involve considerable expense to the taxpayers of the province, but such a government is surely worth the cost of its maintenance.

UPS AND DOWNS OF MAGNATES.

It is particularly noticeable that when Fortune turns against individuals endowed with peculiar talents, such as Depew and Dowle, she deals out blows with no gentle hand. The Apostle's wife has joined in the hue and cry against him, and is loud in her demands for his deposition. The Zionites brought all this conjugal trouble on his own head. He is old enough to have known better, and should have had sufficient experience with women during the years of his caliphate to understand that any attempt to introduce practices which were tolerated under the Old Testament dispensation was bound to result in his undoing. Mr. Dowle in the days of his strength was a great organizer, a man of extraordinary executive ability, and withal combined a capacity for detail that is not usual in individuals. But the times were not propitious for the campaign of a second Brigham Young, and so the prophet has come to grief. Yet if he succeeds in effecting a settlement with the rebellious Zionites on a basis of only a few cents on the dollar he can afford to retire and live in tranquility on the fruits of the industry of his dupes.

Chauncey M. Depew is quite another stamp of a man, but a "grafter" with few equals in this get rich quick and live by the wits age. Mr. Depew also possessed ability of no mean character, or he would never have been taken up by the Vanderbilts and placed at the head of their great railway interests. But Mr. Depew had other reasons for always looking pleasant and devoting practically all his time to thinking up clever thoughts, to be turned loose in speech on great occasions, such as complimentary banquets to princes and potentates and residents. He became identified with insurance companies just at the time when the "workers" began to understand how trust funds could be profitably worked in the personal interests of the persons who possessed influence. Mr. Depew drew salaries amounting up into the hundreds of thousands annually for doing nothing at all but simply looking a picture of angelic benevolence and emitting sparkling gems of speech after the wine had been passed around. To all his honors and emoluments was added the dignity of a seat in the United States senate. And then, just when he had married a young wife, and was in a position to apostrophize his soul after the manner of the man in the parable, the curtain was raised, and Mr. Depew stood revealed in the light of truth. When he saw himself as others now see him, he too collapsed, physically and mentally, and now he is being attended to in a private "retreat." And his "young and beautiful wife," the dispatches inform us, is about to ask for a divorce.

So it is still true, in some instances, that "the way of the transgressor is hard." We are not sure yet that British Columbia, officially, is exempt from the operations of the moral statute.

Talk about the irony of fate. Two negroes in the United States have just been hanged upon and roasted to death under a statue of Liberty. And the dispatch which conveys the intelligence of the peculiar taking off of these two men in the land where monuments are erected in honor of freedom and where true freedom is daily dishonored tells us the probability is the victims were

not guilty of any offence. But what does that matter so long as the useful lesson is taught that in a great republic life, liberty and the pursuit of happiness cannot be guaranteed to those whom accident has garbed in a skin of an unfashionable color?

A MENACE TO LIFE.

These flying automobiles are things of beauty and the very incarnation of bottled-up energy. They typify so fittingly what we Victorians are alleged to lack so lamentably that we cannot forbear calling attention to their headlong goings-on. The example of their strenuous course is so stimulating that we are altogether disposed to close our nostrils against the odoriferous train they bequeath to the atmosphere as they cleave sportingly through it. At the same time the automobile, with all its headlong aggressiveness, is not above or superior to the law. We believe it is subject to the usual rules governing rates of speed on the city streets. If it is not it is a law unto itself in respect to speed—then someone is going to be run down and killed before long. That is just as sure as it appears to be obvious that the police are indifferent to daily violations of the law. Our chauffeurs are very adept in the manipulation of their machines. They can by the movement of a foot, a touch of a lever, or the twist of a wheel, make the thing do almost anything except sit up on its rear end. But when they career past tramcars and vehicles and street ends at the rate of from twenty to thirty miles an hour, it is inevitable that some day a pedestrian, with mind indifferent to all else save the beauties of our climate, is going to step in front of one of them, notwithstanding effectiveness of control, the dreamer is going to be smashed out of this world. At the rate at which automobiles are traveling our streets are scarcely safe for nimble-limbed and quick-witted pedestrians. As for the classes in the two extremes of life, the aged and the very young, they should not be permitted to go out without guardians. That is the situation as it appears to us when a thirty-mph an hour wagon flies past in a cloud of dust.

RUSSIA'S NOTABLE VOLCANO.

The Russian authorities are conducting their first election in such a peculiar manner as to indicate that they have been studying the history of the Conservative party of Canada. When members are elected who are objectionable to the powers that be, the authorities simply declare them unseated, and put others in their places who possess satisfactory Tory credentials. That is a simple and effective way of retaining power. But just as sure as it is true that the world moves on, the day will come when the now despised proletariat of Russia will take the czar and his grand dukes by the handles of their uniforms and deposit them in the places prepared for them who attempt to obstruct the popular will. The Russians now have a constitution of a sort. They will not rest until they broaden it out from precedent to precedent and the instrument covers all the requirements of a great self-governing nation. The length of time for which the crown and the nobility shall retain a voice and a share in the work of government must depend upon their own acts and attitudes. If they obstruct to the point at which obstruction can only be removed by violence, they will find themselves in the hands of people who are none too careful about the means by which they attain their ends. Slaves are not endowed with the Anglo-Saxon or the Teutonic temperament, which is content with the gradual evolution of a political system such as that which has been slowly and laboriously built up in Great Britain or Germany. In time they will control the Russian army, and they will use it for whatever purpose they see fit.

RAILWAY MONOPOLY.

No longer than a few weeks ago the people of Victoria were deluged with diurnal tears and harrowed by diurnal walls and ancient rail practices of the aggressive, grasping, gluttonous "East." The West was portrayed as struggling in the maw of a greedy monster who feasted daily upon the fat of this western land, and who held in his talons to tighten his grip. The tariff was being used as an instrument for the perpetuation of the work of spoliation, although the tariff has always been held up by the Conservative party as the hope and pride of the West—the one and only source of our prosperity, and the higher it could be raised the more marked the degree of prosperity. There was no hope for us until we placed a party in power which would give us "adequate protection." That cry has died away, and now we hear nothing about the policy of "adequate protection." Taxation is too high; the country is being "bled white" by excessive taxation. Is there no evidence of that in the huge surplus the present government has been accumulating, amounting to many millions over all expenditures this far this year, although the rate of taxation had been substantially reduced? The West is the chief sufferer from this tariff impost because it is the heaviest purchaser of foreign goods while all it buys from the East is grossly augmented in price by reason of the rapacity of the Canadian railways, which have conspired with the producers of the East to plunder us. That was the burden of the complaint a few weeks ago, and it all told against the government. Now the tune has changed. The railroads must be protected in their monopoly. In the name of patriotism Jim Hill must be arrested as a foreign plotter and murderer and turned across the border whence he came. All the wrongs we have suffered at the hands of the railways are forgotten at the thought of Mr. Hill and his big trains carrying our wealth south for the enrichment

of foreigners. The handicap we have carried for years for lack of "adequate" means of development is lost sight of in the smoke of the engines of the Great Northern railway. The West must be preserved for the benefit of the East. We must stand still until the East is prepared to elect us for its own benefit and for the benefit of patriotic railways managed by patriotic foreigners. We really wonder what the East would say if we were to be demanded as a condition precedent to the closing of the West to foreign railways that all the existing arteries of communication running north and south should be closed up? Would we not promptly be told to go to the West, there is that process of development should be facilitated, not blocked, by the machinery of government. That is the common sense view. It is the view which obtains in Great Britain and in all her dependencies, and it is the view which is combatted here only by persons and institutions imbued by selfish, not by patriotic, motives. The garb of the patriot is donned for a purpose, and the purpose will not endere. We believe the Winnipeg Free Press speaks with the voice of the West when it says:

"This combination, powerful though it is, was unable to preserve the C.P.R. monopoly in Southern British Columbia from Hill competition; and we can see what will happen to it if it is insensate enough to attempt to repeat its tactics with regard to the direct communication of the West between New Ontario and the Rocky Mountains. Twenty years ago a strong Government and the supposedly all-powerful C.P.R. had to back down before the many powers of the Manitoba on this very question; and though the Bourbon spirit sometimes shows itself in Canada we can hardly believe that there will be an attempt at this day to reassert the monstrous donee of the C.P.R. in Victoria, a railway and commercial preserve of Eastern Canada. There are now a million people and three self-governing Provinces in Western Canada; and they would be practically a united front on this question. The C.P.R. is a public man or the public journal who takes the other position."

Speaker Cannon of the United States House of Representatives, one of the greatest autocrats of modern times, and who wields greater power than the spectacular Kaiser of Germany, says in a recent speech in Congress that he is a strong supporter of the C.P.R. in Canada. He attended the chair was taken by a cultured woman, wife of a Presbyterian missionary to the Chinese, herself a converted Jewess, a Socialist had, and the speaker was the president of a Theosophical society who passed round the tea! Trying hard to live up to the broad views of my surroundings, I presented Rudyard Kipling's "The White Man's Burden" to this Mothers' Club is largely made up of those who do not belong to the leisure classes, the discussions do them good and they do good to the teachers.

I think it was the Colonist that spoke editorially the other day of some one's heart "being in the right direction" toward the orphanage. In extending Easter greetings to "One of the Mothers' Club" I would reiterate that my heart remains "in the right direction" (1) toward the Mothers' Club. May I with the utmost kindness and goodwill add to this just two suggestions? The first is a "Keep your eye on the ball." Be swift in all obedience. The second is my own: "It is a good plan never to write anything to which you are not prepared to sign your own name."

AGNES DEANS CAMERON.

let it discover a volcano on Vancouver Island. Once upon a time there must have been a great volcano in the neighborhood of the C.P.R. to judge by physical appearances. Forces of a few thousand horse power were required to elevate our mountain peaks.

A joyful sound arises from the southern side of the international boundary line today. The major leagues have opened their baseball season with the usual eclat. The tribulations of the empire and the periods of elevation and depression for the "fan" have commenced.

What Other People Think

MOTHERS' CLUB.

To the Editor—I hasten to assure "One of the Mothers" that Miss Cameron has not suffered a change of heart regarding the Mothers' Club. The Colonist of April 4th stated that at the last meeting of the club "two little girls with gold crowns" took up a collection for the Home Nursing Society, for which Bishop Perrin warmly thanked them. In my opinion this was a direct contravention of the school by-laws, which state that "no matters of business shall be transacted in any school except such as are directly connected with the legitimate work of the school."

The work of the Mothers' Club (all honor to it—would that we had more such) is directly connected with the legitimate work of the school; that of the Home Nursing Society is not. My opinion of the Mothers' Club are summed up in an address read before the Dominion of Canada Educational Association at its last annual meeting in Winnipeg. The Mothers' Club meets fortnightly in one of the ward school buildings, and parents from every district in the city attend it. I really think it the most cosmopolitan society in Victoria. At the last meeting I attended the chair was taken by a cultured woman, wife of a Presbyterian missionary to the Chinese, herself a converted Jewess, a Socialist had, and the speaker was the president of a Theosophical society who passed round the tea! Trying hard to live up to the broad views of my surroundings, I presented Rudyard Kipling's "The White Man's Burden" to this Mothers' Club is largely made up of those who do not belong to the leisure classes, the discussions do them good and they do good to the teachers.

Sporting News

BASEBALL.

WANT DATES ARRANGED.

It is probable that one of the first games seen here this season will be against the Sioux Indian line. Manager Wile, of the Victoria club, has received a communication asking for arrangement of dates. As the Indians have an exceptionally fine record and may be depended upon to put up a first class exhibition it is likely that they will be favored by a score of 4-0.

ASSOCIATION FOOTBALL.

CELTICS AGAIN DEFEATED.

The game played on Saturday between the Garrison and Celtic teams was, to use a common and expressive term, tame. It resulted in another victory for the home side, the Celtic goals to 1. But neither team entered into the contest with the same spirit that characterized their work in the cup match of Good Friday. The Garrison line-up was materially different from that usually seen, among the missing being Messrs. Williams, Paley, Simons and Matthews. Their places were taken by Messrs. Rickson, Collins, Jones and Williamson. There also were some changes in the personnel of the Terminal City eleven.

ARRIVED TO-DAY.

A Toronto dispatch stated Saturday that "Over two hundred clubs were represented at the Canadian lacrosse association convention here yesterday. J. Miller, of Orillia, was elected president of the association. W. J. Bayley, Toronto, and J. M. Keenan, Port Arthur, Ont., secretary-treasurer, W. H. Hall, Toronto."

WELCOMED TO NAPLES.

American Athletes En Route to Athens Received Hearty Reception. Naples, April 16.—The North German Lloyd steamer Barbarossa, having on board the American athletes who are entered to compete in the Olympic games which begin at Athens on May 2nd arrived here at noon to-day. Her arrival was the signal for a popular demonstration of welcome, as she also had on board the Duke of Orleans, who boarded the steamer at Gibraltar, which brought the Duke and Duchess of Oseta and many other notables to the pier, where a band played the Italian and French national anthems. The Americans landed soon after the Barbarossa arrived. Some of them visited the scenes of desolation in the vicinity of Mount Vesuvius, but the majority of the athletes accompanied by their trainers, practised running, jumping, etc. in order to test their condition after the sea voyage.

BACK FROM MAINLAND.

Rev. M. W. Bolton, president of the Victoria club, has returned from the Mainland, where he went to discuss with the enroute season with the Vancouver and the New Westminster clubs. Interviewed in the Terminal City by a News-Advertiser reporter Rev. Mr. Bolton said: "Lacrosse will boom in Victoria this summer, and we hope to put the game on a proper footing. We have three intermediate teams, three junior and several school teams, and valuable trophies have been offered for all of the competitions. Lionel Yorke has been secured as our coach, and he will commence upon his new duties on Monday next. We have arranged with the school authorities to have Mr. Yorke visit the schools each week for the purpose of instructing the younger element, and in this way we hope to have some good material to draw upon for the senior team in a couple of years. We purpose arranging matches with all of the mainland teams, and will arrange matters as to the expense in connection therewith. The officials of our club feel that if the younger players are given encouragement that we will be in a position to place a strong twelve in the field in a year or so. "Of course, we will retain our fran-

work and the latter finally succeeded in scoring the only goal obtained by the visitors.

The Celtics returned to Vancouver last Saturday evening, and before leaving expressed the determination to turn the tables upon the Garrison next Saturday, when the second game of the British Columbia championship will be played in the Terminal City.

GARRISON VICTORIOUS.

The Oak Bay grounds were crowded on Friday afternoon, the occasion being a match between the Celtic (Vancouver), and Garrison teams. It was the first of the series for the British Columbia championship. The contest, although at the start it was not particularly credible, gradually developed into an exhibition as anyone could desire. It was won finally by the Garrison, the score being 3 goals to 1. This may be taken as a more or less accurate index of the character of the game.

When the respective elevens took their places on the field, the general opinion as to the ultimate outcome was somewhat divided. The visitors proved a first appearance. They lined up in much the same order as hitherto. It is perhaps unnecessary to say that they also looked in the pink of condition and ready for the game of their lives. As already stated, the opening ten or fifteen minutes' play was rather disappointing, and some of the spectators commenced to encourage the opposing elevens to put a little more ginger into their efforts. But the invitation was not needed. The teams apparently were only trying each other's mettle preliminary to earnest work, and soon those present were treated to an exhibition of extremely strenuous exercise. The Garrison took the aggressive, and several times the visitors' goal was in danger. During these emergencies the weakness of Vancouver's back division became evident. Finally the inevitable occurred. The Garrison scored and duplicated the performance almost immediately after. Then the Celtics braced up and the tables were turned.

Finally the opening of the second half that the Celtics showed their true worth. They appeared to pull themselves together. The forwards worked a beautiful combination time and again, but were poorly supported by the half-backs who persisted in remaining some distance down the field. One of these onslaughts, however, gave the Celtics the only goal scored by them throughout the contest. A few minutes from the conclusion the Garrison netted a third and the last point obtained.

CONFERENCE WEDNESDAY.

On Wednesday evening a conference will be held between members of the different local clubs, Lionel Yorke, and officers of the Victoria association. The business on the tapis is the consideration of plans for the coming season.

THE OAR.

PREPARING FOR SEASON: "The members of the Nelson Boat Club are preparing for a record season," says the Daily News. "Besides the regular series of club regattas, there will be this year the annual regatta of the N. P. A. O., which will be held in Nelson at a date still to be fixed some time between July 14th and August 14th. On that occasion one or more crews will come from Victoria, Vancouver and Portland."

OFFICERS ELECTED.

A Toronto dispatch stated Saturday that "Over two hundred clubs were represented at the Canadian lacrosse association convention here yesterday. J. Miller, of Orillia, was elected president of the association. W. J. Bayley, Toronto, and J. M. Keenan, Port Arthur, Ont., secretary-treasurer, W. H. Hall, Toronto."

Mrs. Sutherland thought she had

Serious Heart Trouble

"Fruit-a-tives" cured her when Doctors failed.

Hundreds of people suffer with Irritated Heart. Pain comes over the heart, especially after eating. Palpitation or fluttering—headaches—belching gas—indigestion and constipation follow. And the sufferer takes heart tonics and sees heart specialists, and steadily grows worse.

The heart is irritated by the stomach. The nerves of the heart and stomach are identical. When the stomach is distended by gas—when food sours or is not properly digested—the stomach nerves are irritated and this soreness extends to the heart. That causes pain which makes so many people think they have serious heart disease.

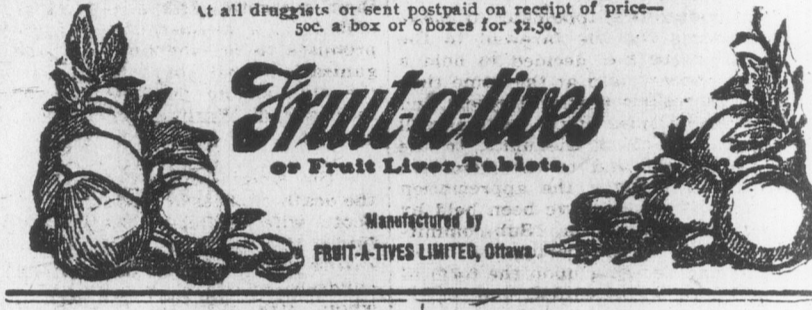

"Heart disease and Dyspepsia cured by Fruit-a-tives."

OTTAWA, July 14th, 1905. To Fruit-a-tives Limited, Gentlemen:—I never gave a testimonial to any medicine before but I like "Fruit-a-tives" so much I will gladly do so. I have suffered from serious heart disease and indigestion for many years. I have tried many other remedies but nothing has helped. After taking "Fruit-a-tives" I am entirely well again. My digestion is very good and I suffered from long and painful constipation. Now I am quite well from these complaints. I wish to say that my constipation was very bad, and after taking "Fruit-a-tives" it is as fresh as ever. I have also suffered from nervousness, palpitation and indigestion. After taking "Fruit-a-tives" I can now eat anything I want with a good confidence. I can recommend "Fruit-a-tives" with confidence. (Signed) MRS. A. SUTHERLAND.

"Fruit-a-tives" CURE IRRITATED HEART because they cure stomach, bowels, kidneys and skin. "Fruit-a-tives" set the gastric juices flowing—clean and sweeten the stomach—insure the perfect digestion of every meal. They make the liver give up more bile, move the bowels regularly every day, and strengthen and heal the kidneys, as well as act directly on the skin.

"Fruit-a-tives" are concentrated fruit juices, combined by a wonderful process which increases their medicinal action many times. Tonics and antiseptics are added and the whole made into tablets.

At all druggists or sent postpaid on receipt of price—10c. a box or 6 boxes for \$1.50.

Some of the Novelists Experiences as a Reporter.

A correspondent sends an interesting extract from the London Daily News regarding the death of Mr. and Mrs. Duval. The extract is as follows: "On the morning of the 14th inst. Mr. and Mrs. Duval were sitting at breakfast. Mr. Duval was reading a newspaper. He had a sudden attack of apoplexy and fell back in his chair. Mrs. Duval screamed and ran to his side. She found him dead. She called for a doctor. The doctor came and pronounced him dead. She was hysterical. The coroner came and examined the body. He found no signs of violence. The police were called. They searched the house. They found nothing. The coroner held an inquest. He found that Mr. Duval died of a heart attack. Mrs. Duval was committed to a lunatic asylum. She was there for several months. She was then released. She is now living in a private house. She is very well. She has no more news to tell."

COMPARISON OF THEIR CAREERS

Whatever the considered verdict of posterity may be on Lord Randolph Churchill's meteoric career in English politics, it will be universally admitted that in finding so accomplished a biographer in his son, not only his achievements, but also his efforts and his aspirations, have received the fullest justice and the most able advocacy.

Every one will recollect that the years 1835-6 were decisive in the history of Ireland. Gladstone reassumed office with a majority dependent on Parnell. He had the bitter recollection of his own failure to govern Ireland by coercion, and he appreciated to the full the terrible strength of the Land League and the Nationalist movement.

How he felt within a few months from this height of honor and real power; how he found himself not a demagogue, but a demagogue and a reformer on the dusty shelves of vested interests; how he relinquished too peacefully the honors which he had too easily won, is the story which in its entirety has been so sympathetically, but not too indulgently, told by his son.

Mr. Winston Churchill is also a remarkable man, and has already, in circumstances very different to those of his father's early career, made his own name and a position in politics for himself. Now occupies the position of under-secretary for the colonies in the new Liberal government at about the same age as was his father when he began his leadership of the fourth party in 1850. But he did not enter into public life by the easy road of family influence and a pocket borough. He has been soldier, lawyer, correspondent, public lecturer, and author. He has had to make for himself in the outside world a name and the primary means for entering public life. In 1900 five members for a great Democratic constituency, Oldham.

One cannot refrain from drawing a parallel between father and son and the fascinating story which one has written of the other. The course of the son's brilliant career seems to show that he has learned and weighed the moral of his father's ultimate failure, which he attributes not to any weakness in personal qualities, but to an interpretation which the world put upon it at the time, but to a radically false situation. Lord Randolph in this light was a man with a natural Liberal and democratic tendency, unfortunately launched by tradition and family influence on the side of that party with which he had no natural sympathies. His honesty of purpose and courage combined with a vast amount of personal unpopularity, which as would have altered a weaker character, so that circumstance and character acted with a deceptive collusion brought him ultimately to a fate which has some of the elements of tragedy. During the last parliament, 1900-1905, Mr. Winston Churchill, during the years when he was studying and writing his father's life, was running the same course of self-discovery. His father had been opened by his father's fate. He recognized that he has not in him the natural principles of a Conservative, and, drifting away from his party, he took the opportunity of Chamberlain's agitation for tariff reform to cross to the other side of the House and became a Liberal. This is never in our country a pleasant process, and in Mr. Churchill's case, whether from personal unpopularity or youthful indiscretion, much bitter feeling was aroused, and with his former Conservative associates he was "Anathema Maranatha." On one occasion he was the object of a very severe rebuke by Mr. Balfour, which would have crushed a more sensitive man.

The incident, the merits of which are not important, is worth recalling because the circumstances of the occasion, the election of January brought the two men face to face in very conspicuous fashion. Both happened to be candidates on opposite sides, though for different divisions, for seats in the House, and in the exceptional struggle they came to be regarded as the protagonists of Free Trade and Protection. Such an opposition, when the younger man can hold his own, is immensely profitable to him, in sweeping Free Trade victories in Manchester and Salford will undoubtedly immensely increase the prestige of Mr. Winston Churchill. It is the general opinion that with his youth and energy and his ruthless talent for success, he stands on the threshold of a remarkable career.

"The Heir to the Hoorah," a new comedy, will be the attraction at the Victoria theatre Monday.

"The Heir to the Hoorah" was written by Paul Armstrong, a former New York newspaper writer, as well known in the west as in the east, who has already made some reputation as a playwright through his previously produced pieces "St. Annie," "A Blue Grass Handicap," and "The Superstitions of Sue."

The company which presents "The Heir to the Hoorah" has been much praised for excellent team-work, as well as for individual ability. Among the members are Guy Bales Post, who appeared last season as Steve in "The Virginian," mostly in the east; Jane Peyton, former leading lady in "The Earl of Pawtucket"; Ernest Lamson, recently a star himself; Nora O'Brien, late leading lady with Viola Allen; Louis Zutter, formerly leading lady with H. Stoddard; Brinsley Shaw, Wilfred Lucas, Cassell, and others.

THE ARTIST BLANCHE WALSH IN "THE WOMAN IN THE CASE"

open date being secured. The great cellist comes direct from San Francisco to Victoria for the concert here on Friday evening, playing in Vancouver on Saturday and in Seattle on Monday. Tacoma and Bellingham are out of the route, a minimum guarantee of \$1,000 for each city being required.

How Gerardy captured San Francisco on Saturday and Seattle on Monday, the California papers of last week. A sample notice is that of three columns in the Examiner of the 9th instant, by Ashton Stevens, in which this eminent critic says: "Gerardy increased his spell dramatically, cumulatively. He was never academic, even in the least reproachful meaning of the word; his color fairly flamed, and his magnetism burned. Yet always he was directing his emotions rather than vice versa. In a word, he was as effective as Pachmann playing Chopin, without any of the great pianist's swoons and vapors."

M. Gerardy, when he comes here on Friday evening next, will be supported by Mr. Andre Demont, pianist, and Anne Beatrice Sheldon, the latter joining the company here. The seat sale is now open at the theatre, and the advice is given all who love good music to secure their seats without delay. Four shows the tawdry home of a famous "show girl."

A trip to Goldstream was made yesterday by a party of Victorians in Bray's handsome new tally-ho. They spent the day at that beautiful resort, and returned to the city early in the evening.

Shipping

A dispatch from Washington, D. C., says: "The House committee on merchant marine and fisheries concluded its hearings on the ship subsidy bill on April 13th. When the committee met it listened first to a letter from Albert Winsor, president of the Boston Steamship Company, which operates five steamships between the Pacific Coast and Japan. Mr. Winsor informed the committee that unless the subsidy bill is passed, the ships will be put out of commission and the route abandoned. As it is, he said, the company is operating at a loss, being in direct competition with three British ships receiving a subsidy of \$231,000. It is also in direct competition with three Japanese ships receiving subsidies of \$300,000 per annum. The amount the Boston ships receive is \$12,000 for carrying the mails. The letter states that if the subsidy bill passes the line will be increased. Former Representative Lord of California, speaks for the bill. He said the Spreckels line from San Francisco to Australia is operating at a loss and will be abandoned, and the ships transferred to the Japanese merchant marine unless the subsidy bill passes. A delegation of California lumber men was heard in advocacy of an amendment to the ship subsidy bill which will give government aid to vessels plying between the Pacific and Atlantic coasts of the United States."

Two steamers, the Blackheath and Chilwick, belonging to the Watts, Watts & Company, of London, England, will come to the dry dock at Esquimault for a cleaning, overhauling and painting in the near future. The Blackheath is coming from San Francisco and the Chilwick from load lumber at Puget Sound ports after docking.

The U.S.S. company's new turbine steamer Matero will bring a record passenger list on her first trip here from Australia. The steamer, which will be the first of her kind to operate on the Pacific, will leave Sydney, N.S.W., on Monday. Over 415 persons had booked on her when the Moana left Sydney, and it is expected that the vessel had her most capacity when she sails from her home port.

Only one previous occasion has an Australian steamer brought what might be called a record list of passengers and this was two years ago, when the palatial steamship Manuka, which was operated on the run for a couple of voyages, brought in the neighborhood of 575 passengers.

A large number of those who will make the voyage on the Matero are tourists who are en route to the Old Country to spend the summer. Over two hundred immigrants will also arrive on the steamer. The majority of these will settle in British Columbia and the North-West, while a few may cross the border and take up their residence in the United States.

R. P. RITHE'S REPORT. R. P. Rithe's monthly freight and shipping report for March, just issued, says: "Shipping business continues without much feature and grain freights are dull. Although indications point to a good wheat crop for next season, exporters are not inclined to charter in the meantime, pending further developments. The course of lumber freights has been upward, and an advance in rates will be noticed. Our list annexed shows a considerable number of rates for various quarters. We quote freights as follows: Grain—San Francisco to Cork, 60m; Portland to Cork, 25s. 6d.; Tacoma and Seattle to London, 45s. 6d.; British Columbia or Puget Sound to Sydney, 38s. to 38s. 6d.; Melbourne or Adelaide, 37s. 6d. to 40s.; To Port Pirie, 37s. 6d. to 40s.; To Fremantle, 47s. 6d. to 50s.; to Shanghai, 41s. 3d. to 43s. 9d.; to West Coast, South Africa, 53s. 9d. to 56s. 3d.; to United Kingdom or continent, 65s. to 67s. 6d.

Advices from San Francisco state that the British tramp steamer Houslow, reported as having gone ashore twenty miles north of Corinto, will be a total loss. Part of her cargo, however, may be saved. If assistance is soon forthcoming, but there is no certainty that assistance is available on that part of the coast. The Houslow went to Ancon with a cargo of lumber, and is under charter to the Pacific Mail Company. It was not known whether she was bound for Ancon or was on the way north. The Pacific Mail Company was awaiting reports to cablegrams sent to Corinto.

The Houslow is a steel screw steamer of 2,300 tons, and was built at West Hartlepool by W. Gray & Co. in 1886 for her present owners.

The San Francisco Chronicle of April 13th says: "The Pacific Coast Steamship Company's liner City of Puebla, which became disabled at sea some months ago and was towed to this port, will be ready to resume service again on May 15th, and will be commanded, as formerly, by Captain Jensen, a veteran in the Coast service. Since being laid up the Puebla has been completely overhauled. Twelve new staterooms have been added, materially increasing the passenger accommodations, and other work done by the Union Iron Works included the installation of a new tall-shaft and a new low-pressure engine. The City of Puebla, when again in service, will be in better condition than ever."

The Barneson-Hibberd company will operate a weekly service between San Francisco and Puget Sound, using the steamer "The Buckman," purchased by them. The Buckman and Watson. The Buckman is scheduled to sail to-day on her first trip from San Francisco, and the Watson will sail a week later, and the two will alternate on the weekly run. The vessels have each a capacity of over 2,000 tons of freight and accommodation for about sixty passengers. Since their arrival on this coast both steamers have been fitted with oil-burning apparatus.

THE PRINCESS MAY. The C.P.R. steamer Princess May was launched from the cradle of the B. C. Marine Railway company on Saturday afternoon in order to receive her new boilers. The boilers will be hoisted on to the steamer from a large scow. When the boilers are in place the steamer will again be taken from the water and the many finishing touches given to the vessel's interior. The Princess May should be ready for service some time in June.

Local News.

The fire department was called to the vicinity of the Hudson's Bay wharf Friday to deal with a small fire which had broken out among some rubbish.

On Thursday the death of Donald Barney, of East Sooke, occurred at the Royal Jubilee hospital. He deceased was a native of Scotland and was 74 years of age.

The Tye smelter returns for March show the following results: The smelter ran 13 days and treated 213 tons of Tye ore, giving a return, after deduction of freight and refining charges, of \$27,966.

The Dawson-Buttner Company has transferred the equipment from one of the Fraser river canneries to the north. The new cannery is being built at Ritz in the city. The steamer cutter took the equipment north.

The funeral of Mrs. Elizabeth Daykin took place on Thursday afternoon at the funeral home of the Rev. Father, leaving the body at 2:15 for Christ Church cathedral. Services were conducted at the cathedral and at the grave by Rev. Canon Beaudry. The funeral was largely attended. The interment was at the cemetery. Capt. Smith, Capt. Babington, C. A. Duvall, W. Christie, W. Lorimer and R. Erskine.

Members of No. 2 Company, Fifth Regiment, held a prize shoot at Clover Point range on Friday. The results follow: First class—33, Co. Sergt.-Major Smith, 108; 42, Gr. Shupe, 107; 43, Corp. Richardson, 98; 25, Gr. Neill, 91; 32, Sergt. Doyle, 89; 15, Sergt. King, 82; 31, Gr. Toller, 77. Third class—42, Gr. B. Brethour, 85; 15, Gr. Lanagan, 83; 12, Gr. S. Brethour, 72; 41, Sergt. Lawson, 64; 31, Gr. Musgrave, 48; 31, Gr. Johnson, 48; 50, Gr. Fortar, 38.

The committee appointed to make arrangements for the farewell to the Imperial troops has decided to hold a patriotic concert, and at the same time present thearrison with a shield and an address. Copies of the shield will be given to each of the units, to the war department and to the Dominion government, showing the appreciation in which the troops have been held by the citizens of Victoria.

The inquest called for the purpose of investigating the circumstances attending the death of the infant child of Mr. and Mrs. Duval, of North Ward street, held a session on Thursday afternoon. Nothing, however, was done, it being announced by the coroner that the autopsy to be made by Dr. Fagan was not yet available. The latter was not in the city. Therefore it was necessary for him to order another adjournment until the 14th of May.

The news was brought to the city on Friday by the return of the Cameron that one of the passengers who went north by that steamer on a recent trip had committed suicide at Malcolm Island. The man was named Maslovak. He was a logger and landed on Malcolm Island from the steamer, shortly after that the body of a man was found hanging from a pole. He had shown signs of despondency on the way up and had apparently decided to do away with himself. The body was interred at Malcolm Island.

Nearly all the salmon propagated at various hatcheries during the past season have been liberated, a conservative estimate placing the number of fish successfully hatched at 100,000,000. This number is made up as follows: Bon Accord, 10,000,000; Harrison Lake hatchery, 20,000,000; Pemberton River hatchery, 20,000,000; Sitka hatchery, 20,000,000; Seton Lake hatchery, 30,000,000. All of the above hatcheries are operated by the Dominion government, except the Seton Lake hatchery, which is maintained by the provincial government.

The body of Miss Mildred Cole, one of the victims of the Valencia wreck, has been identified and forwarded to her family. As far as can be gathered, the body was among those which had been buried here among the unidentified. The mother of the girl sent a friend, Mrs. Clauson, to this city and the latter was able to make the identification complete so that the body was handed over to her to be forwarded to the mother's place of residence. Miss Cole appeared in Victoria some months ago with concert company. She had a considerable amount of life insurance.

The rehearsals for the Magic minstrel in aid of the Anti-Tuberculosis League are going on in the city. The aggregation of local talent practicing nightly at Waitt's hall, under the capable management of J. Finn. The performance, which will take place in the Victoria theatre on April 25th, promises to be one of the best of its kind ever given in the city. The programme teems with catchy numbers, songs, dances, jokes and side-splitting play. The committee of management proposed of Mrs. Pagan, Mrs. Herman Robertson, Mrs. Rhode and Mrs. R. H. Pooley, are working hard to insure a success, and it is to be hoped that with such a splendid object in view the public will respond to their efforts by giving the amateurs a bumper house. The next rehearsal will be on Tuesday at 8 p.m. All members are especially invited to attend.

The Arctic Brotherhood has written to the Tourist Associations of Victoria and Vancouver stating that their thirty camp has been organized at the meeting to select a place for the 1906 meeting of the camp. The Arctic Brotherhood is an organization with camps or club houses through Alaska, British Columbia and Yukon Territory. Their grand camp met last year in Seattle, and it was with the intention that no favoritism or partiality be shown that the next meeting place will also be in either Victoria or Vancouver. They ask the Tourist Association what they or the city will do as to giving a meeting place or hall in which to assemble also in order to get reduced rates from Alaska or British Columbia

The committee appointed to make arrangements for the farewell to the Imperial troops has decided to hold a patriotic concert, and at the same time present thearrison with a shield and an address.

the death of the infant child of Mr. and Mrs. Duval, of North Ward street, held a session on Thursday afternoon. Nothing, however, was done, it being announced by the coroner that the autopsy to be made by Dr. Fagan was not yet available.

the news was brought to the city on Friday by the return of the Cameron that one of the passengers who went north by that steamer on a recent trip had committed suicide at Malcolm Island.

Nearly all the salmon propagated at various hatcheries during the past season have been liberated, a conservative estimate placing the number of fish successfully hatched at 100,000,000.

The body of Miss Mildred Cole, one of the victims of the Valencia wreck, has been identified and forwarded to her family.

The rehearsals for the Magic minstrel in aid of the Anti-Tuberculosis League are going on in the city. The aggregation of local talent practicing nightly at Waitt's hall, under the capable management of J. Finn.

The Arctic Brotherhood has written to the Tourist Associations of Victoria and Vancouver stating that their thirty camp has been organized at the meeting to select a place for the 1906 meeting of the camp.

ACTIVE SEASON FOR WINDY ARM

COL. CONRAD'S PLANS FOR COMING SUMMER

He Has Interested London Capital in the Mines—Hundreds Will Be Employed.

(From Monday's Daily.) Col. J. H. Conrad, whose name is so prominently identified with the Windy Arm properties in the north, has reached the city. The colonel is two months later in getting to Victoria than he had expected to be. He will not remain long in the city, but leaves this evening for Vancouver, and will proceed to the north on the next trip of the Princess Beatrice.

It is seven months since Col. Conrad left for England in the interests of the properties which he owns in the north. His visit to London has been entirely successful, he says, and the necessary money has been obtained to carry out the work in the way he intended. During his absence the work at Conrad city has been carried along with all the expedition possible. Col. Conrad now goes into the territory well prepared to develop the mines with which he is connected.

Some little time ago a report appeared in the Seattle papers to the effect that the interests of the colonel and some Seattle capitalists associated with him had been disposed of to Mackenzie and Mann. The colonel was asked by a Times reporter this morning what was in this report. He set the matter straight by explaining that it was not correct. He said he had not himself disposed of any of his interests in the north. The interests of the Seattle capitalists who were associated with him in some of the properties in the vicinity of Windy Arm had been disposed of to William Mackenzie and Mann. The colonel and Mr. Mackenzie are thus the sole owners of the group of properties in which Seattle capital was interested.

It is evident from the tone of Col. Conrad that he has not the least intention or desire to dispose of any interests he has in that part of the country. The mines are such, he says, that a very important camp will be established there. During the coming summer railway connection will be made with the mines by a branch from the White Pass and Yukon line from Cariboo crossing. This will do away with the transferring of the freight by way of the lake to be carried into the camp. The railway branch offers no obstacles. It will be only ten miles long and will be along the beach of the lake.

From all who have gone into the camp Col. Conrad says that there is yet to be heard a single adverse report. During the coming summer he says that R. C. McDougall, who has been investigating under the Dominion Geological survey last season, will again go into the territory. The report of this official last year was of a very flattering character, and the colonel looks forward with pleasure to his return to the camp. He hopes that the provincial mineralogist, W. F. Robertson, will again visit the Windy Arm district this year. Col. Conrad, in this connection, says that he fully expects that the larger part of the mineralized sections of the district will be found to be in British Columbia rather than in the Yukon territory.

In addition to the aerial tramway now in place there will be several others put up to carry the product of the mines down to the water edge ready for shipment by way of the lake to the railway. A start will be made on a concentrator. Part of the work in connection with it will be done this year, and the remainder the following season. There has been purchase for the most part of the machinery in the way of air compressor drills, etc., and these are now being shipped into the camp for the spring's operations.

The promising nature, Col. Conrad says, about the camp is that the ore, which is high grade as regards gold and silver values, increases in quantity and quality with depth. The surface showings have been excellent, and the increase with depth makes the camp a most important one.

Another Even Break. Return Basketball Game Between Vancouver and Victoria Resulted in a Victory Each.

The junior and senior Y. M. C. A. basketball teams played a return game with the Vancouver Y. M. C. A. five at the latter's gymnasium on Saturday evening. In the junior game the locals were outclassed, their opponents being much larger and showing superior knowledge of the game. In the senior match, however, the tables were turned, the locals playing splendid combination and doing very accurate shooting. The score at the end of the first half was 11 in favor of the Victoria Y. M. C. A. However, in the second half the Vancouverites by some brilliant team work managed to put 13 points to their credit, while the locals increased their score by 17, making the final score 38 to 14 in favor of the locals. The score of the junior game was 33 to 8. Before the game the four teams sat down to a bountiful repast prepared by the Vancouver boys, after which short speeches were made by Dr. Riggs, president; Mr. Graham, general secretary of the Vancouver Y. M. C. A., and H. B. Gregory of Victoria. The local boys report a very pleasant trip and a most enjoyable time.

CATTLE FOR ALASKA

A Shipment of Galloway Cows Being Forwarded to the Kenai Peninsula.

Prof. C. C. Georseon, in charge of the department of agriculture experimental station in Alaska, is taking north a herd of Galloway cows. Interviewed in Seattle, Prof. Georseon said: "I am taking to the Kenai peninsula station eleven Galloway cattle, bought with a congressional appropriation of \$3,000, to see what we could do toward the general improvement of the cows now bred in Alaska. The native cows, which are supposed to have come from Siberia originally, are small and, while hardy, are not suitable for both beef and milk, as we hope to have the new breed. I chose Galloways because the climate in which they were originally bred corresponds very closely to that of Alaska. They come from the south-west of Scotland, and in order to stand the severity of the climate, are provided, by nature, with very long hair.

"Another feature of the Galloway which will be valuable in Alaska, besides their use for beef and milk, is in their hides, which are classed next to the now extinct buffalo. In the cold climate these hides will be useful.

"Our work in the agricultural line has been successful in its way. Of course there we look at the matter in rather a different light than that of the general public. If an experiment does not turn out well, we still may obtain very valuable results from the work that has been done.

"We have four experimental stations, Sitka being my headquarters, and the other three being located at Kenai, Rampart, and Copper Centre. The variety of fruits and vegetables that may be produced with great success is really astonishing. All the cabbage and turnip tribes grow well, while currants, raspberries and gooseberries grow better than at any place in the United States. These latter grow wild as far north as the Arctic circle. We are trying with cultivation to produce the best results possible. There is a wild strawberry that grows there, but it does not do well under cultivation, running to leaves and vine in the richer garden soil. In order to remedy this we will try the effect of cross-fertilization with some of the hardiest qualities of the cultivated plants and the result should be good.

"You can get some idea of what can be done in the really far North when I tell you that there are fine gardens of cabbage, radishes, etc., growing at Coldfoot, sixty miles north of the Arctic circle. The country up there is really wonderful in the results that can be obtained by a little work and care."

It is evident from the tone of Col. Conrad that he has not the least intention or desire to dispose of any interests he has in that part of the country. The mines are such, he says, that a very important camp will be established there. During the coming summer railway connection will be made with the mines by a branch from the White Pass and Yukon line from Cariboo crossing. This will do away with the transferring of the freight by way of the lake to be carried into the camp. The railway branch offers no obstacles. It will be only ten miles long and will be along the beach of the lake.

From all who have gone into the camp Col. Conrad says that there is yet to be heard a single adverse report. During the coming summer he says that R. C. However, in the second half the Vancouverites by some brilliant team work managed to put 13 points to their credit, while the locals increased their score by 17, making the final score 38 to 14 in favor of the locals. The score of the junior game was 33 to 8. Before the game the four teams sat down to a bountiful repast prepared by the Vancouver boys, after which short speeches were made by Dr. Riggs, president; Mr. Graham, general secretary of the Vancouver Y. M. C. A., and H. B. Gregory of Victoria. The local boys report a very pleasant trip and a most enjoyable time.

The owners of the new mill have not yet erected many homes for their employees, but Mr. McDougall hears that it is his intention to do so as soon as the sawmill is in place. The machinery for this has been going forward in a lively manner during the last few months, the steamer Otter having made two trips with sections of it until the plant is now pretty well all on hand. When the lumber and shingle industry has been added to the mining and fishing industries, the west coast of Vancouver Island will have taken on a new aspect.

News comes from Quatsino that the June group of mines continue to improve. The ore is described as rich and solid. Messrs. Nordstrom have made a good strike on their claim on the Teta river, and Messrs. Cramer and Follock are also said to be striking good ore.

Mines on the coast, generally speaking, are now beginning to present scenes of activity, and the coming season will see a number of new properties opened up.

NEW STEAMER FOR SURVEY PURPOSES

TO BE BUILT FOR DOMINION GOVERNMENT

Vessel is to Take Up Work Now Being Done by H. M. S. Egeria.

Plans and specifications for a new survey vessel for the coast are in the hands of the B. C. Marine Railway Company at Esquimalt. An appropriation of \$150,000. It is understood, has been made at Ottawa by the Dominion government for the new steamer, and should the B. C. Marine Railway Company be successful in their tender it will mean quite a large amount of money being spent in Victoria. It is understood the new steamer's duties will be similar to those of the Egeria. In fact it is the present impression that the new steamer will assist the Egeria at first and then supplant her altogether.

With the increasing traffic along the British Columbia coast and the opening of new ports, the duties of a survey steamer are ever multiplying. In the Dominion House of Commons last week William Sloan, representative of the Comox-Artin district, pointed out the necessity for a hydrographic survey being made at this coast by the Canadian government, stating that although the southern part of the coast is accurately charted, very little is known of the northern waters. He also mentioned that the coming terms of the Grand Trunk Pacific Railway Company at Prince Rupert brought the northern part of the coast into greater prominence.

For years the Imperial government have been carrying out a survey of the British Columbia coast, and while much has been done by the Egeria, a great deal more still remains to be done. It was mentioned that the coming terms of the Grand Trunk Pacific Railway Company at Prince Rupert brought the northern part of the coast into greater prominence.

The following prizes will be offered in connection with the parade: Automobiles—Best decorated touring car—1st, \$25; 2nd, \$5. Single horse (hurdle)—1st, \$10; 2nd, \$5. Single horse (roadster), to be shown to an appropriate vehicle and judged as a roadster—1st, \$15; 2nd, \$10; 3rd, \$5. Single horse (saddle)—1st, \$10; 2nd, \$5. Gentleman's saddle horse—1st, \$10; 2nd, \$5. Jumper, over hurdles—1st, \$10; 2nd, \$5.

Single horse (one)—1st, \$10; 2nd, \$5. Single horse (roadster), to be shown to an appropriate vehicle and judged as a roadster—1st, \$15; 2nd, \$10; 3rd, \$5. Single horse (saddle)—1st, \$10; 2nd, \$5. Gentleman's saddle horse—1st, \$10; 2nd, \$5. Jumper, over hurdles—1st, \$10; 2nd, \$5.

Single draught horse, to be shown to an appropriate vehicle, 1,500 pounds and under—1st, \$10; 2nd, \$5. Single draught horse, to be shown to an appropriate vehicle, 1,500 pounds and over—1st, \$10; 2nd, \$5. Best pair of draught horses in harness, to be shown to truck—1st, \$15; 2nd, \$10; 3rd, \$5. Horse in delivery wagon (as actually used in local delivery), horse to count 50 per cent., appointments 50 per cent.—1st, \$15; 2nd, \$10; 3rd, \$5. Horse in delivery cart (as actually used in local delivery), horse to count 50 per cent., appointments 50 per cent.—1st, \$15; 2nd, \$10; 3rd, \$5. Best single pony (under 14 hands), to count 75 per cent., appointments 25 per cent.—1st, \$10; 2nd, \$5. Sighthound character, mounted or unmounted—1st, \$10; 2nd, \$5. Best decorated vehicle—1st, \$10; 2nd, \$5. Best float on parade, \$20.

Rules. 1. No second prize will be awarded unless there are three or more entries. 2. All exhibitors must report to the committee, corner of Pandora avenue and Cook street, on Thursday May 24th, at 10.30 a.m. sharp, when they will be allotted positions. 3. The order in parade will be the same as in the prize list, and all rigs must be at least twenty feet apart. 4. Marshals will be in attendance and will direct all movements of the parade. Anyone not conforming to the direction of the committee will be ineligible for any prize.

SAFETY FOR CHILDREN. Baby's Own Tablets is the only medicine that gives the mother the guarantee of a government analyst that it contains no poisonous opiate and is absolutely safe. This is worth much to every mother who cares for the future health of her child. The Tablets are good for the tenderest baby or for the well grown boy or girl, and cure the minor troubles that are inseparable from childhood. Mrs. W. J. Macintosh, Clam to appropriate vehicle, pony to count 75 per cent., appointments 25 per cent.—1st, \$10; 2nd, \$5. Sighthound character, mounted or unmounted—1st, \$10; 2nd, \$5. Best decorated vehicle—1st, \$10; 2nd, \$5. Best float on parade, \$20.

Rules. 1. No second prize will be awarded unless there are three or more entries. 2. WESTERN JOURNALISTS.

Members of Press Association Will Visit Coast During Summer.

At the last meeting of the Nelson board of trade F. J. Deane stated that the Western Press association was coming through to the coast this season, and that he had intention of asking them to come through the Kootenay, to which a reply had been received that their itinerary had not been as yet prepared and that the Kootenay route might be selected. Mr. Deane suggested that the board of trade arrange the 20,000 club might take up the matter and offer the association some inducement to visit Nelson. His own idea was that a trip might be arranged from Nelson into the Boundary and another up the lake. The trip would be taken in the first week in August.

A resolution was passed, after some discussion, that the board of trade formally invite the association to pass through the Kootenay. During the discussion it was elicited from Mr. Deane that the practice of the association was to write a book about the province or place visited, which was usually helped by the provincial government. Concerned, if this were done Nelson would be benefited if included in the route.

F. J. Deane and S. M. Brydges were appointed a special committee to use every effort to get the Western Press association, which comprises practically every newspaper west of Port Arther, to include Nelson in their itinerary this summer.

THE PARADE PRIZES FOR VICTORIA DAY. Committee Has Prepared For This Part of the Celebration on May 24th.

The parade committee connected with the Victoria Day celebration has arranged for the parade and the prizes to be awarded. This part of the celebration will take place on the morning of May 24th. A start will be made from upper Pandora street and will proceed along Cook, Yates, Douglas, St. James, Government and Michigan streets to Beacon Hill park, where the parade will be held.

The following prizes will be offered in connection with the parade: Automobiles—Best decorated touring car—1st, \$25; 2nd, \$5. Single horse (hurdle)—1st, \$10; 2nd, \$5. Single horse (roadster), to be shown to an appropriate vehicle and judged as a roadster—1st, \$15; 2nd, \$10; 3rd, \$5. Single horse (saddle)—1st, \$10; 2nd, \$5. Gentleman's saddle horse—1st, \$10; 2nd, \$5. Jumper, over hurdles—1st, \$10; 2nd, \$5.

Single horse (one)—1st, \$10; 2nd, \$5. Single horse (roadster), to be shown to an appropriate vehicle and judged as a roadster—1st, \$15; 2nd, \$10; 3rd, \$5. Single horse (saddle)—1st, \$10; 2nd, \$5. Gentleman's saddle horse—1st, \$10; 2nd, \$5. Jumper, over hurdles—1st, \$10; 2nd, \$5.

Single draught horse, to be shown to an appropriate vehicle, 1,500 pounds and under—1st, \$10; 2nd, \$5. Single draught horse, to be shown to an appropriate vehicle, 1,500 pounds and over—1st, \$10; 2nd, \$5. Best pair of draught horses in harness, to be shown to truck—1st, \$15; 2nd, \$10; 3rd, \$5. Horse in delivery wagon (as actually used in local delivery), horse to count 50 per cent., appointments 50 per cent.—1st, \$15; 2nd, \$10; 3rd, \$5. Horse in delivery cart (as actually used in local delivery), horse to count 50 per cent., appointments 50 per cent.—1st, \$15; 2nd, \$10; 3rd, \$5. THE CLAYQUOT INDUSTRIAL HOME

MODEL INSTITUTION DOING GOOD WORK

Sixty Indian Children are Being Educated by Priest and Sisters of Mercy.

A highly commendable work in the interest of civilization, which has by no means attracted the attention its worthy objects merit is being carried on by Rev. Father Mauris and four Sisters of Mercy at Clayquot, on the west coast of the island. Rev. Father Mauris is the principal of the Christy Industrial Home at the point named, and the Sisters of Mercy are his assistants. They have been taking charge of the native youth at an early age, and by a careful training and painstaking effort have been doing much to elevate the Indian character of the children they have under their control, the immediate effect being very far-reaching indeed.

According to Officer McDougall of the provincial police, the home is a model, not only in its aims but in its construction. About seven years ago the institution was started in a small way, and it has grown with such marked success that to-day it is a somewhat pretentious looking structure, two stories in height, with a large basement and covering an area of approximately 60 by 90 feet. But interesting as is the size of the place, considering the locality in which it is situated, its conveniences are even more remarkable. These include a water supply from several tanks, a fine kitchen, a dining room, a laundry, and a steam heated from a good plant in the basement. Recently two large wings were added to the home, and at present the school is accommodating 60 Indian children.

The native boys and girls are taken into the home when young, and remain until they are 18, the age limit placed by the Indian Act for their detention. A good practical education is given several times a week, and the character is at once striking. Constable McDougall says the home in this respect is an admirable one. The girls are taught to do lace work among other things, and in the making of this they have become very adept. In the exhibition held at Portland a year ago the lace sent from this institution, which was made by the Indian children, was highly praised, and exhibitions it is hoped to obtain additional honors. It will be sent to Victoria to be shown at the exhibition to be held here this year, and may also be forwarded to New Westminster for similar purposes next fall. Rev. Father Mauris had intended sending it to the exhibition at the Royal City last year, but valuing it very highly and not having facilities for shipping, declined not to run any risk, and kept it at home. Among the courses of instruction given at the Industrial Home are that of carpentry. J. Swain, 75 per cent., appointments 25 per cent.—1st, \$10; 2nd, \$5. Single draught horse in harness, to be shown to dry or other appropriate vehicle, 1,500 pounds and under—1st, \$10; 2nd, \$5. Single draught horse, to be shown to dry or other appropriate vehicle, 1,500 pounds and over—1st, \$10; 2nd, \$5. Best pair of draught horses in harness, to be shown to truck—1st, \$15; 2nd, \$10; 3rd, \$5. Horse in delivery wagon (as actually used in local delivery), horse to count 50 per cent., appointments 50 per cent.—1st, \$15; 2nd, \$10; 3rd, \$5. Horse in delivery cart (as actually used in local delivery), horse to count 50 per cent., appointments 50 per cent.—1st, \$15; 2nd, \$10; 3rd, \$5. Best single pony (under 14 hands), to count 75 per cent., appointments 25 per cent.—1st, \$10; 2nd, \$5. Sighthound character, mounted or unmounted—1st, \$10; 2nd, \$5. Best decorated vehicle—1st, \$10; 2nd, \$5. Best float on parade, \$20.

Rules. 1. No second prize will be awarded unless there are three or more entries. 2. All exhibitors must report to the committee, corner of Pandora avenue and Cook street, on Thursday May 24th, at 10.30 a.m. sharp, when they will be allotted positions. 3. The order in parade will be the same as in the prize list, and all rigs must be at least twenty feet apart. 4. Marshals will be in attendance and will direct all movements of the parade. Anyone not conforming to the direction of the committee will be ineligible for any prize.

POWER OF THE COMMISSIONERS

THE CITY SOLICITOR GIVES HIS OPINION

Question as to Finances For the Proposed Telephone For the Police Department.

Several of the aldermen were absent from the meeting of the city council on Thursday night. As a result of the lack of quorum, business was not held on Monday night and will be held on Thursday next. The law requires that the next regular meeting be held on Tuesday, but the aldermen have mutually agreed to absent themselves from this and to meet as stated on Thursday.

The secretary of the Victoria Day celebration asked for the transfer of the committee in charge.

His Worship in reply to Ald. Fell explained that the privilege referred to the management of hucksters in the parks.

Ald. Fell pointed out that a transfer of these privileges would be opposed, to the park by-law. If the association assumed all risks, he would move that the request be granted. The motion carried.

K. A. C. Grant, secretary of the meeting called to arrange for a farewell to the imperial troops, writing asking that the city assist in the same.

His Worship said that he had the pleasure of being with Col. English and a number of officers at the barracks and they felt very pleased with the action of the citizens. His Worship felt that something should be done, although he realized that there were a great many calls on the city's finances.

On motion of Ald. Fell the communication was referred to the finance committee.

John Langley, chief of police, reported that unless the by-law was amended the police could not remove the racks on Yates street. The motion carried.

Ald. Douglas thought the complaint that had been made referred to the expressmen as well as the hackmen.

A discussion then took place as to where the stand in Ald. Vincent's thought it below Langley street. His Worship considered the present position of the stand about good as any other.

Ald. Fell said that there was always a tendency on the part of the hackmen to encroach a little on what the by-law allowed, and he instanced a case in point where the hackmen occupied places they should not.

The C. P. R. wanted Belleville street widened to enforce the by-law.

The report was received and the police will be ordered to carry out the regulations prescribed by statute.

The city solicitor reported as follows on the proposed police telephones:

Gentlemen—I have the honor to report upon the requirements of the commissioners of police of funds wherewith to instal a combined telephone and signal system for use by the police department in this city, which has been referred to me for report.

The section of the Municipal Clauses Act which bears upon the point is section 231, which is to the following effect: "231. The board shall fix the remuneration of the police and the council shall, subject to an appeal to the Lieutenant-Governor in council, pay such remuneration, and shall provide all such clothing, accoutrements and other necessities as may from time to time be deemed requisite for the accommodation and use of the force."

By this section the board has the right to fix the remuneration of the police and the council, subject to an appeal to the Lieutenant-Governor in council. It also directs the council to provide all such clothing, accoutrements and other necessities as may from time to time be deemed requisite for the accommodation and use of the force. It does not state clearly what authority is to decide what are "necessaries requisite for the accommodation and use of the force."

The statute, I think, contemplates that the council are better able to judge of what are necessary, having regard to the state of the finances and the size of the force. If, however, the council or the board are the parties to decide, there is, in either case, an appeal to the Lieutenant-Governor in council.

In re Prince and City of Toronto, cited in Glasgow at p. 536, a case under the Ontario Act of 1858, in which the words used were, "the council shall fix and pay a reasonable remuneration to and for the respective members of the force," etc., where the council had fixed the remuneration of the chief constable at a sum which the court could not consider so reasonable as to constitute evidence of an intention to discharge the duty imposed on the council by the board of commissioners, thinking it insufficient, had increased the salary—a mandamus to the city compelling them to pay the difference was refused.

There was an appeal by the chief constable to the Lieutenant-Governor in council in 1861 and I beg to refer you to the report of the honorable the executive council approved by His Honor the Lieutenant-Governor on the 15th April, 1861. The appeal was on the question of the then proposed increase in the salaries to be paid the police, and the purchase and maintenance of a patrol wagon. As there was an appeal from the decision of the Lieutenant-Governor in council, it may be useful for me to refer to it at some length.

The report, after admitting that the section now in question is ambiguous, held the difference depending on the position of the stops and the emphasis on certain words, and saying: "It is proposed to construe it in the way contended for by the mayor. It is equally easy to read it so as to bear the other construction," goes on to state that

"the committees, then, in the exercise of an appellate duty, are bound to look at the other sections of the act in order to ascertain the intention of the legislature, and to apply the information thus gained to the construction of the doubtful section."

"It would appear then that the intention of the legislature was to place the control of the police in the hands of the board. They are to make by-laws, prescribe the number of constables and make regulations for their government and control."

The committee is of opinion that in order to properly fulfill the important duties imposed upon them, the legislature intended that the clothing, accoutrements and other necessities should, on the requisition of the board, be provided by the council, subject to an appeal to the Lieut.-Governor in council.

With respect to the merits of the appeal the committee appreciate the jurisdiction conferred on them to be exercised, but exercised judicially. It is incumbent on the party appealing to show that the decision applied to him wrong, or perhaps in this case indigere, or is not warranted by the circumstances of the particular case.

"It must not be overlooked that the board consists of the mayor and two persons appointed by the Lieut.-Governor in council, one of whom is a member of the council, and that the decision of such a tribunal, on matters referred largely to their discretion, is not to be lightly set aside."

"The council management of the police, and the responsibilities for the maintenance of peace and good order in the city, rests on the board, and unless the demands made upon the council by the board are clearly unreasonable, the council are of opinion that they should be acceded to. In this case the committee are not prepared to say that the demands of the board are unreasonable, and they recommend, therefore, that the appeal be dismissed."

It is, therefore, clear in my opinion that the board of police commissioners may, if it thinks fit, require the council to provide a combined telephone and signal system for use by the police department, but if it is clearly open to the council to object to the expense as unnecessary, or beyond the means which are at the council's disposal, and to then file, at the instance of either party, to the Lieutenant-Governor in council, at little or no expense. If the council agrees to the expenditure, it has the right to provide the same, and to make contracts for same.

I am further of opinion that the board of police commissioners should confer with the council before initiating an expense which would necessarily involve an extraordinary expense beyond the sum which, after consideration, was appropriated for police purposes in framing the estimates of the city's expenditure for the year.

C. DUBOIS MASON, City Solicitor.

Ald. Fullerton moved that the report be received and considered at the next meeting of the council.

His Worship was still of the opinion that the commissioners were within their rights in saying that it was necessary for the police, although it might have been better if the commissioners had placed the matter before the council before acting.

The council is not to come out of the police estimates he was willing, as one of the commissioners, to withdraw the matter. He admitted that the commissioners were new to the work and had had no experience in framing the estimates of the city's expenditure for the year.

The report was finally laid over until the next meeting, Ald. Fell remarking that he was not prepared to agree to disagree, but that he would see him first seen in it in print.

The fire wardens reported that they had been unable to get a team of horses for the fire department and they asked that \$500 be appropriated to their use as an opportunity arising for making a purchase.

Ald. Fullerton said that there had been but one offer. The team that had first been offered for \$500 was now offered at \$700. The outbreak of glanders had made horses scarce.

The report was adopted.

The Old Men's Home committee reported that George Higgins had complied with all conditions for admission to the home and recommended his application be granted. The report was approved.

The streets, sewers and bridges committee in their report recommended that the application of E. A. Carlow to sell certain gravel land be not accepted.

They also recommended that sidewalks be laid on the following thoroughfares: Mary street, cost \$35; Powell street, \$114; Centre street, \$20; Oak Bay avenue, \$36; Dominion road, \$35; repairs to Garbally road, \$400; Pleasant street, \$100. Also the extension of the outlet of a sewer tank on Michigan street to below low water mark. The report was carried.

Ald. Fell's motion calling for an inspection of all buildings within the fire limits by the fire chief and that a report on the same be made was next considered.

In introducing the motion Ald. Fell said that he noticed a number of cases where there was no protection against fire, in one place a fire escape had been built around by another building. If any one had used this escape he would have been jammed. The motion carried.

The city engineer reported that a sidewalk put down on the old Craighflower road was in a dangerous condition.

Ald. Fell moved that the danger be removed at a reasonable figure, and that the city engineer be taken up by the Victoria Development Association.

It was suggested that the co-operation of the Ladies' Auxiliary might be obtained. The patronage of home industry was a move which could be helped along by them to far better advantage than by the business men of the community. Another matter in which they could assist was the entertainment of women visitors, who are complained of the difficulty of making acquaintances in Victoria. It was suggested that the ladies might organize committees to call upon and welcome members of the fair sex attracted here by the reported beauties of the city. They might also hold receptions for

IN A COLLISION.
London, April 14.—Telegraphing from Corfu, a correspondent of the Standard says:
A carriage in which were King Edward and Queen Alexandra, collided with a cart in which were a number of drunken peasants. The royal carriage was not damaged, but several members of the party were injured. The King ordered the doctor of the British flag ship to attend them."

NEW MOVEMENT ON PRACTICAL BASIS

A UNION OF FORCES TO BE RECOMMENDED

New Association Will Likely Absorb Tourist Society—Broadening Scope of Work.

An enthusiastic meeting of the committee entrusted with the preliminary work in connection with the organization of a "booster" club was held on Thursday afternoon. After a two and a half hour session, during which all phases of the proposed association's usefulness were discussed, a report was drafted ready for the consideration of the public meeting to be held on Tuesday evening, which is thought embraces everything and makes it possible for the movement to prove of marked assistance in the endeavors that are being made to advance the interests of Victoria. One of the first pieces of business transacted was the appointment of a temporary secretary, Wm. Blakemore being selected for that position.

Should the club take in Victoria alone or be made to cover the whole of Vancouver Island was the initial problem that presented itself for solution. It provoked a great deal of debate. Of course a decision upon this point means the reaching of a definite conclusion as to the name of the organization. Col. Prior thought it should include Victoria alone; Mr. Blakemore suggested that it cover Victoria and the Islands, and others advanced different views. Ultimately everyone agreed that it should be known as the "Victoria Development League," it being explained to those in favor of a less selfish campaign that the entire Island that in the aims and objects of the institution it would be defined that the advancement was sought, not only of Victoria, but of all Vancouver Island, the interests of which district were practically identical with those of the capital city.

Whether or not the Victoria Development League should unite with the Victoria Tourist Association was the next question which presented itself. It also was the subject for the expression of varied opinions. The committee became unanimous when it was shown that the aims and objects of the new organization as it was proposed to draft them were a repetition, almost word for word, of those of the Tourist Association. Then those favoring an amalgamation took advantage of the opportunity to emphasize the foolishness of bringing into existence another club operating along the same lines.

It would mean a duplication of the machinery of operation and of the expense to the general public. The people of Victoria were sufficiently burdened at the present time with subscriptions towards celebrations, agricultural associations, etc., etc. As other organizations are commercially identical with those of the capital city, it was what was contemplated, would only result in impeding the existence of both.

These arguments prevailed. It was unanimously decided to unite with the Tourist Association. As already stated, the name of the new organization will be remembered as the Victoria Development League, and will be composed of four, or perhaps five, committees, with fifteen members on each, the chairman and secretaries of which shall belong to the executive.

This will bring the Tourist Association management, now numbering eight, up to fifteen, and should have the desired results. It is expected to give the present association a broader scope than is the case at present. Each sub-committee will operate as a distinct unit and the entire work will be under the direct supervision of the executive, a body which will always have a complete grasp of the campaign for Victoria's advancement because of the fact that every committee will have two official representatives participating in its councils.

At this juncture Percy Godenrath drew attention to the possibility of members of the committee taking slight of the original object in the initiation of the movement, namely, the boosting of Victoria for a population of 100,000 by 1910. The majority rather advocated work of a strictly charitable nature, as developed, would bring population. The establishment of new industries was mentioned, and it was recommended that one of the proposed sub-committees be entrusted with the undertaking of finding out what factories might be expected to do well upon the coast. In this connection Mayor Morley, who occupied the chair, drew attention to a tract of sixteen acres of land included in the Songhees Indian reserve, between the railway and Esquimalt road. He stated that, as the question of the rehabilitation of the Indians at a spot more favorable to themselves and to the corporation, was approaching a settlement the land mentioned would soon be in the hands of either the Provincial or Dominion governments. No doubt it could be procured at a reasonable figure, and he thought the city should bestir itself in the effort to obtain that property for factory sites. The city then would be in a position to encourage industries by offering locations at a nominal charge and, if the hoped-for solution of the water problem was reached within a short time, power under the same conditions. This is another matter that it is proposed should be taken up by the Victoria Development Association.

It was suggested that the co-operation of the Ladies' Auxiliary might be obtained. The patronage of home industry was a move which could be helped along by them to far better advantage than by the business men of the community. Another matter in which they could assist was the entertainment of women visitors, who are complained of the difficulty of making acquaintances in Victoria. It was suggested that the ladies might organize committees to call upon and welcome members of the fair sex attracted here by the reported beauties of the city. They might also hold receptions for

these ladies once or twice a month at the rooms, Fort street.

Dr. Carter drew attention to the importance of making the forthcoming Victoria Day celebration a pronounced success. He pointed out that Governor Meade, of Washington, and the United States North Pacific squadron would probably visit Victoria on that occasion, and that the carnival should be a labor and a joy. In order to make it so funds had to be procured, and he suggested that a concert be held in the Victoria for that purpose. It was pointed out by H. Kent that such an affair was already proposed in honor of the imperial troops. Owing to this the suggestion was abandoned.

The report to be submitted at the public meeting will read somewhat as follows:
The name of the organization shall be known as the "Victoria Development League," its object being to disseminate reliable information as to the island's resources, commercial and industrial possibilities, and matters of public interest. It recognizes the valuable publicity work of the Tourist Association in the past, the dangers of creating an additional association, and the undesirability of soliciting funds for the same. It is strongly recommended that the Tourist Association be absorbed in a more comprehensive organization to be known as the Victoria Development League. But further resolved, in order to carry out the above objects without any division of effort, it is proposed to work under the articles of incorporation issued to the Tourist Association with their consent, and to combine with them under one management on some such basis as the following: The appointment of advisory committees of fifteen each on the following important matters:
1. To devise means for attracting new industries and the encouragement of those already established to be operated by home labor, and to encourage the use and consumption of home made products.
2. Secure new settlers on the lands around Victoria.
3. Civic affairs and means to beautify Victoria.
4. Reception and entertainment of visitors and securing for Victoria the benefit of conventions.
5. To secure a population of 100,000 by 1910.

Each of these committees to have a chairman and honorary secretary, who shall be members of the executive committee, and each of twenty-five, of which district were practically identical with those of the capital city, it was what was contemplated, would only result in impeding the existence of both.

These arguments prevailed. It was unanimously decided to unite with the Tourist Association. As already stated, the name of the new organization will be remembered as the Victoria Development League, and will be composed of four, or perhaps five, committees, with fifteen members on each, the chairman and secretaries of which shall belong to the executive.

This will bring the Tourist Association management, now numbering eight, up to fifteen, and should have the desired results. It is expected to give the present association a broader scope than is the case at present. Each sub-committee will operate as a distinct unit and the entire work will be under the direct supervision of the executive, a body which will always have a complete grasp of the campaign for Victoria's advancement because of the fact that every committee will have two official representatives participating in its councils.

At this juncture Percy Godenrath drew attention to the possibility of members of the committee taking slight of the original object in the initiation of the movement, namely, the boosting of Victoria for a population of 100,000 by 1910. The majority rather advocated work of a strictly charitable nature, as developed, would bring population. WILL CONSIDER HARBOR PROJECT

MEETING CALLED FOR TUESDAY MORNING

The Owners of Waterfront Property Will Confer With Dominion Government Engineer.

The owners of property fronting on Victoria harbor and representing in value about five millions of dollars, will on Tuesday morning meet in the office of J. S. Yates to confer with A. Keefer, Dominion resident engineer, on harbor improvement. The meeting should prove a very important one. It has reference to the scheme advocated by Thomas C. Sorby, for the deepening of the harbor to a uniform depth of 25 feet for the better accommodation of shipping entering the port. Mr. Sorby's estimate for the work is a million dollars. The proposition having been submitted to the Dominion government, Mr. Keefer was instructed to report on the same, and it is for the purpose of discussing the whole subject with the engineer that the meeting has now been called. It is understood, until the government knows definitely what would be the required expenditure for deepening the harbor to twenty-five feet, and is satisfied that such a step is necessary, also that the harbor would be utilized by vessels much larger than do now enter the harbor, it does not feel justified in committing itself to the project. When Mr. Keefer's report has been forwarded to Ottawa, however, the government will then be in a position to judge of the merit of the scheme from all the information at hand.

A new decision may be reached in connection with the project at the meeting on Tuesday morning. It is now proposed by a number that the harbor be deepened to a depth of twenty feet, in so doing it is contended that the estimated cost of the work outlined by Mr. Sorby and costing in the neighborhood of a million dollars, would be reduced by \$100,000 or \$200,000. This is the only one of the various phases that will receive attention at the meeting mentioned, which has been called for 10.30 o'clock.

The proposal to deepen the harbor in accordance with Mr. Sorby's plans has been before the public for several years, but opinion has always been diversified as to what should be done, there being those who heartily endorse the scheme and a depth of twenty feet, the harbor can never be used by the larger tonnage visiting this port.

TWO MEN DROWNED.
Their Canoe Was Caught in Tide Rip in the Narrows.

"Two men, carpenters, employed by Mr. Lawson, 1023 Pacific street, were drowned in the First Narrows on Wednesday morning." Their names were News-Advertiser. Their names were Jack Rear and L. T. Strickner, and they were employed by Mr. Lawson in repairing a house at the place called Navy Jacks, on the North Vancouver shore about five miles from the Indian mission. At about 8 o'clock Wednesday morning, the two men secured a canoe to cross over to their work. The weather was gusty and the waves were running high, with a strong outward tide rip, and they were warned against attempting the passage in such a light craft. They went their way, however, and it must have been a little while that they were seen by fellow workmen standing on the opposite shore, were horrified to see the canoe lift almost on end, an agonized cry came from far across the water, and then the boat and men disappeared as if sucked down by a whirlpool.

"Thomas Topham said afterwards that he was standing on the beach when he saw the canoe with two men in it being carried out in the receding tide. They were making strenuous efforts to direct the canoe towards the shore, but were evidently powerless in the strong current. Suddenly the canoe and haul it bow first beneath the water. He watched and thought he saw something come to the surface again, but could not be sure. He called to H. C. Guest, who was close at hand, and he came running to the shore. They had only one small boat at hand, and that would have been utterly useless in the strong sea. They watched the canoe for some time, but saw nothing more. As soon as they could they came over to the city to tell the sad news."

"One of the men, L. T. Strickner, came from Tacoma, where he went by the name of Paterson. The other, Jack Rear, came to the city from Lindsay, Ont."

BOUNDARY MINES.
Another Shipper Add to the List—The Week's Output of Ore.

Phoenix, April 14.—A new shipping mine, the Preston, is added to Boundary list this week, the output for the week being as hereunder: Granby mines to Granby smelter, 16,550 tons; Mother Lode to B. C. Copper smelter, 4,308 tons; Brooklyn-Stemwinder to Dominion Copper smelter, 3,414 tons; Rawhide to Dominion Copper smelter, 256 tons; Sunset to Dominion Copper smelter, 1,155 tons; Emma to B. C. Copper and Nelson smelters, 228 tons; Rambler to Trail smelter, 15 tons; Preston to Trail smelter, 20 tons; Strathmore to B. C. Copper smelter, 40 tons; total shipments for the week, 280,160 tons; total for the year to date, 382,501 tons.

The district smelters this week treated ore as follows: Granby smelter, 16,551 tons; B. C. Copper smelter, 4,308 tons; Dominion Copper smelter, 4,323 tons; total for the week, 25,582 tons. Total treatment for the year to date, 377,033 tons.

FULL COURT CASES.
Appeals Which Still Remain on the List to Be Disposed Of.

The Full court will resume its sittings in Vancouver on Monday, April 23. The following appeals are still on the list to be disposed of:
Canadian vs. Power, Rich vs. Hanbury, in re Bank of Hamilton (assessment), Canadian Bank of Commerce vs. Lewis et al, Keroya, Kondo & Kanev vs. C.P.R., Mitchell vs. Sinclair, Richards vs. Watson, The Vancouver Coal Mining Co. et al, Youdale vs. Toronto and B.C. Lumber Co., Lewis et al vs. Hughes, Hall vs. Andrews, Dickinson vs. Hollowell, Union Loan & Investment Co. vs. Hill. In Union Loan & Investment Co. vs. Watson vs. Hamilton, in re Carew Gibson, Cone vs. Lewis, Cross vs. Hassock, Green vs. B. C. Electric Railway Co., Herman Adams.

Next Friday the court will sit in Victoria, as mentioned in Thursday's Times, for the delivery of judgments.

On Thursday, when a motion was made by Sir Charles Hibbert Tupper, in favour of Mrs. Joan Dunsmuir, intervener in the case of Hopper vs. Dunsmuir, to admit of an appeal on behalf of Mrs. Dunsmuir to the privy council, E. P. Davis, K.C., counsel for Mrs. Dunsmuir, next wished no objection to the motion, but asked whether the necessary bond had been deposited. Sir Charles Tupper assured him that the bond for \$2,500 had been duly deposited, and the order was made. It is probable that when the appeal comes up before the Privy Council Sir Charles Hibbert Tupper will appear for Mrs. Dunsmuir, and Mr. Davis for James Dunsmuir.

Friday next H. Dallas Helmecken, K.C., representing Edna Wallace Hopper, will seek admission as a party to the appeal to the Privy Council which has been taken by Mrs. Dunsmuir. Mr. Helmecken has deposited \$2,500 as security of costs preparatory to asking for the appeal.

EXPLOITING TRADE.

Representative of Hamburg-American Steamship Line Was in Victoria On Thursday.

Julius Clerfayt, passenger agent for the Hamburg and American steamship line in San Francisco, was in the city on Thursday, having come north to confer with agents on Puget Sound and in British Columbia with regard to a certain number of chances there are for an expansion of the company's connections in this direction. His visit was briefly referred to in Thursday's Times. The company, one of the largest and most powerful in the world, has an eye to the trade of the Pacific. Mr. Clerfayt came north by rail, visiting Portland, Seattle and Tacoma en route, and incidentally made a side trip to Spokane. While as an agent he did not care to speak of the intention of the Hamburg-American company, Mr. Clerfayt said he thought it very probable the near future would see established a round trip route between Victoria and the Indianapolis. The meals provided on this vessel were as good as any he had ever found on the Pacific coast.

Mr. Clerfayt was very much impressed with the beauty of the scenery along the railway from the Golden Gate north, and was greatly pleased with the excellent services to be found on the Indianapolis. The meals provided on this vessel were as good as any he had ever found on the Pacific coast.

Mr. Clerfayt predicts that a greater number of tourists will visit the Pacific coast this season than came last year, and he says interest in Alaska has been awakened as it never was before.

PROVINCIAL APPOINTMENTS.
Officials Named By the Government in Gazette.

In addition to the appointments mentioned in Thursday's Times, the following have been made by the local government and appear in this week's Gazette:

Basil G. Hamilton, of Calgary, Alberta, to be a commissioner for taking affidavits within and for the province of Alberta, for use in the courts of British Columbia.

James Henry Vidal, of New Westminster; Albert E. Planta, of Nanaimo, and John Hamilton Gray, of Victoria, C. E. to be Justices of the Peace in and for the province of British Columbia.

Thomas Martin Bowman, of Nelson, to be district registrar of the Supreme court; Nelson, registrars of the County court of West Kootenay, holden at Nelson; clerk of the peace for the county of Kootenay, and registrar under the "Marriage Act," from the 1st day of April, 1906, in the room and stead of Charles C. Daley, resigned.

George Stuart, senior, of Cobble Hill, to be a fence viewer in and for that portion of the Cowichan electoral district, situated in the county of Cowichan, in the room and stead of Arthur Nightingale, resigned.

Alfred Dashiwood Worgan, of Hedley, to be a notary public in and for the province of British Columbia.

To be commissioners for taking affidavits in the Supreme court, for the purpose of acting under the "Provincial Act" in the electoral districts in which they reside: Vancouver city, George Barteaux Harris, Geo. Fred Uphan, Thos. H. Whipple, Frank Gordon Wilson, James Albert Tomlinson and Richard Mills. Cranbrook—A. J. McCall and R. M. Reid, of Fort St. John—Edward Walter, of Ganges Harbor, Salt Spring Island.

COLD STORAGE PLANT.
The B. C. Market Company Has Made Arrangements for Important Improvements.

The B. C. Market Company has made arrangements for the installation in this city of an up-to-date cold storage plant for the purpose of better handling of meats during the summer. The company realizes that the less meat is handled the better it is for all concerned. In order to do away with all unnecessary loss of time and also preserve the quality of meats during the warmer months the new plant will be installed.

E. E. Welch, the local manager of the company, has made all the arrangements for the work and the machinery is now being manufactured. It will be a month yet, however, before the plant will be ready.

The company has taken a long lease of the premises now occupied by them and will extend their shops so as to include the cooler now in use as a fruit stand. The machinery to be put in place will be of the most modern character. The premises will be otherwise altered to meet the requirements, and the meat market will be made one of the very best in the country.

UNITED STATES SENATORS.
Proposal That They Be Elected by Direct Vote of the People.

Washington, D. C., April 12.—A resolution providing for the election of senators by direct vote of the people has been favorably passed upon by the house committee on election of president, vice-president and representatives in congress. The resolution which makes the term of members of the house four years instead of two years. Both propositions are to be accomplished by amendments to the constitution. The reasons why the term of members should be four years are stated to be because no party can inaugurate its policy in two years.

The United States war department has about completed the issue of rifles to the troops in the United States. Both infantry and cavalry are now being supplied with the same model of rifle, a modification of the model of 1902. This is about six inches shorter than the Krag and about two inches longer than the carbine now being discarded by the cavalry. For the present the rifles are being used with the rod bayonet.

GOOD SEASON FOR POTTERY COMPANY
AN ACTIVE DEMAND IN VARIOUS LINES
Orders From Outside Points--Large Contract For C. P. R. Hotel is Being Filled.

Mention was made in these columns a few days ago of a large order which had been placed with the B. C. Pottery for a supply of sewer pipe by the city of New Westminster. This company has been doing business in the city of Victoria for the past 15 or 16 years and during that time has made steady progress, increasing from time to time the capacity of the works and the lines of goods manufactured. At the present time the company employs about 30 or 40 men the year round

MADAME ALBANI.

Great Prima Donna Will Be Heard In Victoria On May 15th.

It was thought that, on account of Victoria being engaged for the only dates available for the appearance of Madame Albani and company, the Canadian coast cities were to be excluded from the opportunity of hearing the diva on the occasion of her last appearance in Canada.

A STITCH IN TIME.

A man appeared the other day at the counter of a post office and asked for £5 worth of silver.

BRITISH COLUMBIA AND ITS FUTURE

In the course of an article in the Mercury Post, a British Columbian writes: In May of last year the Canadian Pacific Railway Company bought the Esquimaux & Nanaimo Railway (33 miles in length) from the Dunsmuirs, and with it what is left of its land grant—about 1,500,000 acres—and at once put its hands to the plough.

In 1891 Vancouver had a population of 15,000; she now has an estimated population of at least 60,000. In 1891 the mineral output of this province was valued at \$5,500,000; last year the value of our minerals reached \$19,000,000.

The great assets of British Columbia are (1) her gold, silver, copper, and lead; (2) her coal and iron; (3) her lumber; (4) her fisheries; (5) her climate, beauty and sport. To take gold first. We have told the world of the Cariboo millions. That is an old story.

ELECTION HUMORS

W. PITT RIDGE. For ten days the road endured frontal attacks, sniping, fiery denunciations every other post. For ten days Tremela road, declining to recognize the hubbub and clatter of the outer world, kept its windows fair and clear, went about its domestic work with no signs of argument or contention other than the differences usual between mistresses and servants.

WARNING—GLANDERS.

In districts where the existence of glanders is suspected, the police authorities have occurred, the adoption of the following precautions is imperative. 1. Horses or mules having a nasal discharge or other suspicious symptoms should not be admitted to livery or stable yards, blacksmith shops, clubs or school sheds, railway stations, private stables or other places where they are likely to come in direct or indirect contact with animals of the equine species. 2. All stables, yards or sheds used for the accommodation of horses or mules should be regularly and frequently cleaned and disinfected in the manner prescribed below.

HEALTHY AND BEAUTIFUL

Mrs Henry Symes

Sunshine as A Hair Tonic

The best way to apply soap.

MANY women, as soon as their hair begins to fall, or lose its life and lustre, spend much time and money trying various tonics, scarcely waiting to give one a trial before discarding it and trying another, thus losing all chance of obtaining good results from any.

In many instances they overlook the best tonic of all, which is always close at hand and costs nothing at all. This is just pure, unadulterated sunshine, than which there is no better tonic. It is more potent than any compound or drug to be found in the apothecary's shop.

I receive letters from many mothers asking advice as to what tonic they shall use on their children's hair. I venture to say that not one of them has ever tried the sunshine cure. It is well worth while, and if mothers would commence this treatment when the child is still very young, there would be more heads of hair to be seen and fewer cases of baldness and scraggly locks.

A healthy, active scalp is necessary for beautiful, healthy hair, and there is scarcely a disease of the scalp that sunshine and, of course, cleanliness will not cure.

Timely Advice to Correspondents

PHYLIS—Orange-flower cream will feed the tissues of the skin and round out the face. Massage every night is beneficial. When the desire to increase the flesh, movements should be given gently. Cocoa butter and lanolin should not be used when there is a tendency to growth of superfluous hair.

MRS. J.—The physician's remedy usually has a yellowish appearance. Several applications are sometimes necessary to obtain the desired effect.

ANXIOUS—From your description I think you need scalp treatment to improve the condition of your hair. Have the ends of your hair carefully trimmed, shampoo it thoroughly and treat the scalp with vaseline for at least two weeks—four would be better. Rub a little into the scalp every night. After you have finished with the vaseline treatment, remove all oil by thoroughly shampooing, and then apply the quinine tonic until your hair is in good condition again.

Quinine Hair Tonic.
Sublimate of quinine, 3 drams; rosewater, 4 ounces; dilute sulphuric acid, 15 minims; essence of ginger, 2 ounces. Mix, then further add glycerine, 4 ounces; essence of rose, 2 ounces; essence of lemon, 2 ounces; solution is complete. Apply to the roots every day.

A. K.—I think the egg shampoo will be more suitable for your hair than the one you are using. You will find the quinine tonic most beneficial. While using it shampoo the hair about once in two weeks.

Egg Shampoo.
Yolk of egg, one pint hot rainwater, eight of rosemary, one ounce. Beat the mixture thoroughly and use it warm. Rub

Nervous Mannerisms That We Should Avoid

Care of the Nose and Ear
By Dr. Emma E. Walker
(Copyright, 1906, by A. S. Barnes & Co.)

PERHAPS we have less to do with the appearance of the nose than with that of any other feature. However, during the years of growth to very shape of the nose is moulded at will to a very considerable extent.

In adult life much can be done to give the nose a fine outline at the tip. Wiping the nose side with a handkerchief over the finger is very detrimental to the fine lines of the nostril. The nostril is easily stretched out of shape. It will recover its natural lines to some extent with appropriate treatment. If there is serious deformity, the treatment then becomes a surgical operation.

The same advice may be given in the case of the nose as is given in relation to the ears. Let it alone. Unless you have special directions from a nose specialist, you should never touch the nose in any way. The mucous membrane of the nose was not made for water.

USE OF KERCHIEFS
When in a normal condition, it would scarcely ever need the use of a handkerchief, but in our ordinary climate this is not the case. Handkerchiefs are most necessary.

It is a pretty little tradition that the handkerchief was never in evidence among polite people until one of the French queens became afflicted with catarrh. Since that time its ordinary use has been considered quite proper.

However, the toilet of the nose, so far as possible, should always be carefully performed. In private carelessness in this regard is a most disgraceful habit, and great attention should be paid to this detail. It is well to blow the nose on walking, as a routine measure, but hard blowing of the nose is never good, and is sometimes very detrimental.

If you are troubled in any way with obstruction to breathing, go at once to a nose specialist, and let him give you the proper treatment. Such afflictions often result from a cold, and may be cured. I can't think of any better advice in regard to your ears than to say, the less you do to them the better.

If you feel in any way that they are not in good condition, you should go at once to an aurist. Such habits as picking at the ear with hairpins, or washing them out, or putting anything into them as sweet oil, or doctor them for earache at home, are all too dangerous to be indulged in.

If, however, you are not where you can consult a doctor, and an insect should crawl into your ear, the best way to get rid of it is to fill the ear with oil. The insect will then generally back out, though a syringe of water may be necessary to wash him out.

If you know that you are going to hear a very loud sound, it is well to open the mouth, as the shock will then be neutralized.

If you have a noise in the ear, it is always wisest to consult an aurist. Rest in bed, with a light diet, generally brings comfort in this trouble.

NOISES ARE OMINOUS
Noises in the ears are most annoying, and sometimes resist all treatment. They are often associated with deafness, and should therefore receive due attention.

Some girls have the practice of wearing little pieces of cotton in the ear, which is a very bad plan. Of course, there are certain cases in which the ear is very sensitive to cold, this might then be allowed, if one was to be exposed for several hours, but the constant habit of thus protecting the ear is a very bad one.

The opening of the ear varies widely in different people. The wider the opening, naturally, the greater the sensitiveness of the ear to cold. Even a thin veil is a great protection in such cases.

The ear can be carefully wiped out when it is washed, with the tip of the finger covered with a soft handkerchief. No water should be allowed to get into it. This process will do no harm, and will keep that part of the ear clean.

B. W.—In massaging the face always use a rotary movement, upward and outward. After using the cream at night simply wipe the face off with a soft cloth.

Mrs. Symes' Formulas for the Care of the Hair, Face and Figure

Skin Very Oily
Would you kindly publish in your valuable column a good skin tonic? I do not want to use any of those that will irritate the skin, but this has been very beneficial to me. But it is very oily, and, therefore, much to my regret, I do not use it.

So I ask you kindly to give me the formula for a skin tonic that will not irritate, but will produce oil, and some of the best of the kind. I will be glad to send you a sample of the oil, if you like.

I do not know if it is necessary to use your tonic for oily skin, but I will be glad to try it.

To Remove Freckles
In one of your health and beauty articles you give the formula for Dr. Szymes' Bleach for freckles, but you do not tell how often it should be applied to the face. Will it remove "permanent" freckles? VIOLA.

The freckle bleach may be applied once a day without harmful results. It is not an infallible cure, but has proved successful in many cases.

Bothered by Dandruff
I have many times read your articles, but have never found what seemed to exactly suit my case.

I am bothered greatly with dandruff that seems to cover the scalp almost like a skin, not being very noticeable until I scrape the scalp with my fingers. Shampooing does not help, as the dandruff appears again in two or three days.

I do not think it can be cured, but I would like to know something to rub on the scalp so as to keep it free and the pores open without having to shampoo the head every time. Hair is dry and dead-looking, and very much split on the ends, and comes out continually. ANNA B.

To Remove Dandruff.
Tincture of cantharides, 1 ounce; liquid ammonia, 1 dram; glycerine, 2 ounces; oil of thyme, 1 ounce; rosewater, 4 ounces. Mix all together with six ounces of rosewater. Rub on the scalp thoroughly with the preparation until no further evidence of dandruff is noticed.

To Darken the Eyebrows
Will you kindly inform me how I can dye my eyebrows and lashes, as they are almost white? My hair is auburn, so I would not care to have them black. Would like a brown or auburn dye.

My dear friend, tell me how to cure enlarged pores and oblige. Yours truly, R. B. S.

When the eyebrows are almost white, and a particular shade is desired, by far the most satisfactory way is to have a hairdresser dye them the desired color. This is very inexpensive, and only takes a short time. The Chinese eyelash stain, which I frequently recommend, will produce a very dark shade. The following lotion will be beneficial for enlarged pores:

Lotion for Enlarged Pores.
Boric acid, 1 dram; witch hazel, distilled, 4 ounces. Apply with a piece of oil linen or bit of absorbent cotton.

Where to Procure Remedy
Having never written you before, would ask your advice as to enlarging the hair. Where could I get the Vaucaire remedy for freckles? Have auburn hair and light freckles. ANNA B.

Lemon and Glycerine Lotion.
(For light freckles and sunburn.)
Citric acid (lemon), 3 drams; hot water, 11 ounces; borax, 2 drams; red rose petals, 1 ounce; glycerine, 1 ounce.
Dissolve the acid and borax in the water; infuse the petals for an hour; strain through a jelly bag after twenty-four hours, decant the clear portion and add the glycerine. Apply as often as agreeable.

Wants Hair Darker
What I want to know is, if you could not give me something to use on my hair that will make it a dark shade of brown. It is now kind of dark red, but I want to try to get that red off entirely, so ask your advice, which, I know, will be good. I would also like to ask if you think that vaseline is a good thing for making the hair dark. WAITING.

Continued use of vaseline on the hair will make it darker. You can, of course, dye your hair brown, but advise you to be contented with the color nature has bestowed upon you.

To Develop the Bust
Will you kindly publish a good formula for developing the bust? I am, as you are so kind to say, a very thin woman, and have quite prominent hips and scarcely any bust. Can you recommend a liquid to take inwardly, or is a good massage better? Something that is simple and not harmful, and at the same time give desired results? Thanking you for your kindness, I am, ROSE B.

Take the Vaucaire remedy internally, and in addition to that massage with a good skin food.

Dr. Vaucaire's Remedy for the Bust.
Liquid extract of galega (goatweed), 10 grams; lacto phosphate of lime, 10 grams; tincture of fenel, 10 grams; simple syrup, 400 grams.

The dose is two spoonfuls with water before each meal. Dr. Vaucaire also advises the drinking of mineral spring waters.

Message Cream for the Bust.
Lanolin, 1 ounce; sweet almond oil, 2 ounces; castor oil, 1 ounce; essence of rose, 1 dram; extract of Portugal, 4 ounces; oil of neroli, 2 ounces.
Mix as you would any cream of the sort. Rub on gently at night.

Pimples and Blackheads
Do you know of a harmless formula for removing pimples and blackheads from the face?

I am giving you lotion for the removal of blackheads. Pimples usually indicate some internal disturbance, but the following cream is excellent, used externally.

Blackheads of the Skin.
Boric acid, 2 drams; alcohol, 2 ounces; rosewater, 4 ounces. Use, with friction, twice a day on the skin affected.

Fossati Cream for Pimples.
Lanolin, 3 grams; sweet almond oil, 5 grams; sulphur precipitate, 4 grams; oxide of zinc, 2½ grams; extract of violet, 10 drops.
