THE ALDINE, while issued with all regularity, has none of the temporaty or timely interest characteristic of ordinary periodicals. It is an elegant miscellany of pure, light, and graceful literature; and a collection of pictures, the rarast specimens of artistic skill, in black and white. Although each succeeding number affords a fresh pleasure to its frienda, the real value and beauty of THE ALDINE will be most appreciated after it has been bound up at the close of the year. While other publications may claim superior cheappess, as compared with rivals of a similar class, THE ALDINE is a unique and original conception—alone and unapproached—absolutely without competition in prior or character.
