The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

COUNTY ASSESSMENT IN AID OF SCHOOLS.

14. The Clerk of the Peace in each County shall annually, at or about the time when the assessment for ordinary County and Parish rates is usually ordered, but so as that in fact the assessment herein directed may be made up, assessed and levied at the same time as other County and Parish rates (if any) are made up, assessed, and levied, determine upon a sum which shall be sufficient to yield an amount equal to thirty cents for every inhabitant of the County, according to the last preceding census, together with an amount not exceeding ten per cent. for probable loss and expenses of disbursing, and shall apportion such gross sum amongst the several Parishes, Cities, and Towns, in the same proportion as other County rates were next preceding the issuing of the warrant, as hereinafter mentioned, apportioned, or assessed, or ordered to be apportioned or assessed upon and amongst the several Parishes, Cities, and Towns, as nearly as the Clerk of the Peace may be able to get at such apportionment; or in the want of any such previous apportionment, then according to what the Clerk of the Peace may deem to be the relative valuation, for taxable purposes, of the real and personal property and income of the several Parishes, Cities, and Towns; and the Clerk of the Peace shall forthwith in the like manner as if the same had been ordered by the Sessions, and either by warrant in form A, hereunto appended, or by including the same in any warrant issued for other County or Parish purposes to the Assessors of such Parish, City, or Town, specifying therein that the same is for a County School rate, order and direct the Assessors of Rates of the several Parishes, Cities, and Towns, to assess and levy the amount so apportioned upon the several Parishes, Cities and Towns respectively, together with expenses of assessing and collecting; and the amount so ordered shall be assessed, levied and collected in the same manner as if it had been by the Sessions ordered to be assessed, levied and collected for ordinary County purposes: except where provision is in any City or Town otherwise made for the expense of assessing and collecting, a sum not exceeding, for

assessing, two and one-half per cent., and for collecting, five per cent., shall be included in the warrant, if such warrant shall be transmitted to the Assessors in time to be proceeded upon at the same time as other rates (if any), but if not, or if there be no such other rates, then not exceeding, for assessing, five per cent., and for collecting, ten per cent.—35 Vic. c. 12, s. 6.

15. The Clerk of the Peace shall, upon issuing the Warrants as aforesaid, notify the Superintendent of Education of the amount so ordered to be assessed and levied as a County School Rate upon the entire County, exclusive of the expenses of assessing and collecting; and the County Treasurer shall notify the Superintendent of Education of the amount received by him on such warrants, exclusive of the expenses of assessing and collecting; such amount shall be held by the County Treasurer as a County School Fund, and shall be paid out upon the order of the Superintendent of Education, and not otherwise, except as herein directed; and the County Treasurer shall, for receiving and disbursing such County School Fund, be entitled to receive one per cent. on the amount thereof.—36 Vic. c. 12, s. 7.

16. The Superintendent shall apportion one half of such amount at the close of each half year to the Trustees of Schools conducted in accordance with this Act and the Regulations of the Board of Education, to be applied towards the payment of the Teachers' salaries, and in the following manner:—There shall be allowed to the Trustees of each District, in respect of each qualified Teacher, exclusive of Assistants, by them employed, the sum of thirty dollars per year, and the balance of such amount shall be apportioned to the Trustees according to the average number of pupils in attendance at each School, as compared with the whole average number of pupils attending the Common Schools of the County, and the length of time in operation; one half the sum assessed as a County Rate in the several Counties for the support of Schools, shall be advanced from the Provincial Treasury at the close of the Spring term, to be refunded in October following, after the first day of which month interest on such advance will be charged against the County.—34 Vic. c. 21, s. 13; 36 Vic. c. 12, s. 17.

17. In addition to any other security required to be given by the County Treasurer, he shall be required by the Sessions at the time of his appointment, or by the Clerk of the Peace, in case the same shall have been neglected, to give a Bond to the Queen, with two sureties, being freeholders of the County, to be approved by the Sessions or Clerk of the Peace, as the case may be, in the probable amount of the

sum to be raised upon the entire County for County School purposes, for the faithful discharge of the duties of his office ; which Bond shall be lodged with the Clerk of the Peace, and shall, although in terms for one year, unless cancelled or another Bond be taken, remain a continuing security so long as the County Treasurer shall remain in office.—36 Vic. c. 12, s. 8.

18. In construing the foregoing Section, the term 'Clerk of the Peace' shall not mean or include Secretary-Treasurer.—36 Vic. c. 12, s. 9.

19. The County Treasurer shall, if directed by the Governor in Council, pay all orders drawn upon him by the Superintendent of Education on account of County School Fund, out of the first or any moneys belonging to the County or Parish which may come to his hands, excepting moneys (if any) assessed and on hand for redemption of Debentures issued by the County or Parish, or for payment of interest thereon, and shall recoup such moneys out of any funds subsequently paid to him on account of the County School rate.—36 Vic. c. 12, s. 10.

20. The Warden of the Municipality of York, and the Mayor of the City of Fredericton, shall annually on or before the first day of January in every year after the passage hereof, but in the year 1873, on or before the twentieth day of April, determine upon a sum which shall be sufficient to yield an amount equal to thirty cents for every inhabitant of the County as aforesaid, together with the allowance as aforesaid for probable loss and disbursing, and determine how much of such sum shall be raised by the Municipality and City respectively, determining the same as nearly as may be according to what may be considered the relative valuation of the real and personal property liable to be rated in the Municipality and City respectively ; and the said Warden shall forthwith certify to the Secretary-Treasurer of York the amount to be raised upon the Municipality ; and the said Mayor shall forthwith certify to the City Council of Fredericton the amount to be raised upon the City of Fredericton ; and the Secretary-Treasurer shall, in the manner provided by the *fourteenth section, cause the amount so certified to him, to be apportioned, assessed and levied upon the several Parishes in the Municipality ; and the City Council of Fredericton shall, at the time, and in the manner of ordering other City rates, order the assessing and levying of the amount so certified to it, and the same shall be assessed, levied and collected as other City rates ; and such amount when collected, shall forthwith be paid by the City Treasurer

* "Sixth section," 36 Vic. c. 12, s. 11.

to the Secretary-Treasurer: The Secretary-Treasurer shall receive, hold, and pay out the moneys so collected and paid into his hands, whether raised in the Municipality of York or in the City of Fredericton, in the same manner as provided in the *fifteenth section.—36 Vic. c. 12, s. 11.

21. If the Warden and the Mayor are not able to agree upon such apportionment at or before the date or dates aforesaid, it shall be lawful for the Governor in Council to determine and certify the same to the Secretary-Treasurer and City Council, and the like proceedings shall be had as if the same had been determined as by the preceding section provided.—36 Vic. c. 12, s. 12.

22. The City Council of Fredericton shall have power and it shall be its duty, within one month after the passage of the Act 36th Vic. c. 12, to order the assessing, levying and collecting of the amount which shall be so as above determined and certified as the portion of the County School rate to be raised upon the City of Fredericton, and the same shall be assessed and levied, together with the other City rates ordered to be assessed and levied in the year 1873, the same as if such amount had been included in any Warrant regularly issued for City purposes for such year.—36 Vic. c. 12, s. 13.

23. In case the Secretary-Treasurer for the County of York has before the passage hereof directed an amount to be assessed and levied upon the Municipality of York as a County School rate, the amount to be raised in the year 1873 upon the City of Fredericton, as provided in the † twentieth section, shall bear the same proportion to the amount so ordered in the Municipality, as the amount which would have been determined upon for the City of Fredericton would have borne to that determined for the Municipality of York, if such amount had not been ordered.—36 Vic. c. 12, s. 14.

24. If for any reason in any County no warrant should be issued for the assessing and levying of a County School Fund as aforesaid prior to the first day of May in any year, or if any warrant so issued, or any assessment thereon, should in the opinion of the Lieutenant Governor in Council be defective, or be quashed, set aside, or adjudged defective, or if a writ of certiorari should be granted to remove any such warrant, or the assessment and proceedings thereon, into the Supreme Court, for the purpose of quashing or setting aside the same, it shall be lawful for the Lieutenant Governor in Council, in any of such cases, to direct the Clerk of the Peace to issue a new warrant, and the like proceedings shall be had and taken thereon as if the same were regularly issued;

* "Seventh section," 36 Vic. c. 12, s. 11.

† "Eleventh section," 36 Vic. c. 12, s. 14.

and upon the issuing of such warrant all proceedings for the assessing, levying and collecting upon or in respect of such former assessment, shall be discontinued and abandoned; and any amount paid on such first assessment shall be considered a payment on such latter rate *pro tanto*; any excess being repaid, and any deficiency collected, in the same manner as other rates.—36 Vic. c. 12, s. 15.

25. All amounts prior to the 14th day of April 1873, by the Sessions or Clerk of the Peace directed to be assessed and levied as a County School rate, shall be taken to have been correctly ordered, assessed, and levied, unless the total of such amounts ordered to be assessed and levied in any County exceed by more than twenty six per cent. the amount of thirty cents per head upon the population of the County.—36 Vic. c. 12, s. 16.

DISTRICT ASSESSMENT.

26. Any sum required by any District in further payment of Teachers' salaries, over and above the sums provided by the Province and County, and any sum required for other School purposes during the year, including, without limitation by reason of such particularity, the purchase or improvement of School grounds, the purchase, erection, repair, furnishing, rent, care and insurance of School houses and outbuildings, the purchase of fuel, light, prescribed maps apparatus and books (for use of indigent pupils), the payment of interest accruing during the year on money that has been borrowed, or that may be borrowed, any indebtedness on account of such objects previously incurred, contingencies, and unforeseen expenses, and personal expenses incurred by the trustees in the execution of the trust when sanctioned in writing by the Inspector, together with any other expenses required for providing and maintaining an efficient School or Schools, may be determined upon by the School district at a meeting having power to vote money, and any amount so determined upon shall, whether or not the several purposes be specified, be assessed and levied as follows:—Every male person twenty one years of age and upwards, having resided in such district for the period of one month next before the making out of the district assessment, as herein-after provided, shall be assessed, and shall pay the sum of one dollar as a poll tax, but not more than one such poll tax shall be assessed in a year; the balance of the sum authorized to be raised shall be assessed and levied, in respect of real and personal property and income, according to the following provisions:—

(1) Residents of the District shall be rated and assessed in such district in respect of their real and personal property and income rateable for Parish purposes.

(2) Non-residents of the Parish owning real property in any district in the Parish shall, in respect of such property, be rated and assessed in the district in which it lies.

(3) Corporations and Companies, (subject to the provision of thirty third Victoria, Chapter forty six), Firms where any of the partners reside without the Parish, persons liable to be rated in a special capacity as trustees, executors, &c., and persons non-resident in the Parish but liable to be rated as inhabitants by reason of carrying on business therein, shall, in respect of personal property and income, (as the case may be), be liable to be rated and assessed in the district in which their chief works and business lie, or in which the trustee, executor, &c. resides, (as the case may be); and shall, in respect of real property, be rated and assessed in the district in which the real property is situated: The Company or Corporation may be rated as such, or in the name of the President, Manager, or Agent; and the Firm shall be rated in the name of the Firm; and the rates shall be collected from such officers (for the time being) or from any member of the Firm, as if they had been rated on their own account.—36 Vic. c. 12, s. 18.

27. It shall be the duty of the Assessors of Rates, upon receiving any warrant for the assessing of any County, County School, or Parish rate, to call upon the Trustees of every District which, in whole or in part, lies within the Parish, for a copy of the boundaries of the District, and for the names of all non-residents of the Parish who own real estate in such District, and of all Corporations, Firms as aforesaid, and persons not being residents, liable as aforesaid to be rated in respect of real property in the District, together with the nature of such property; which statement of names and property, and copy of boundaries, it shall be the duty of the Trustees forthwith to give.—36 Vic. c. 12, s. 19.

28. The Trustees may also at the same time furnish the Assessors with a list of the names of all other persons liable to be rated for School purposes in such District, and a statement of their rateable property.—36 Vic. c. 12, s. 20.

29. It shall be the duty of the Assessors of rates in making up their general assessment list for any County, County School, or Parish rate, to specify clearly therein, or on a separate paper or papers filed with such list, the School District or School Districts in which the real estate of each non-resident of the Parish assessed by them on real estate is situated, and also the valuation thereof in each such district, and also the district or districts in which the real estate of each Corporation, Company, Firm as aforesaid, or other person referred to in sub-section three of section *twenty six, is

* "Section eighteen," 36 Vic. c. 12, s. 21.

situated, and also the valuation thereof in each such district, so as to enable the Clerk of the Peace (when called upon by the Trustees of any district), to place upon the list of names furnished him by them, the correct taxable valuation of the real estate in such district, owned by any non-resident of the Parish, Corporation, Company, Firm as aforesaid, or other person above referred to.—36 Vic. c. 12, s. 21.

30. REGULATIONS
OF THE
BOARD OF EDUCATION.

Of School Districts.

REFERENCES TO THE LAW.—Board of Education empowered to divide the Province into School Districts, to create new Districts from time to time, to alter boundaries: area of Districts: union and division of Districts, liabilities, &c., dyked marsh or river islands: secs. 5 (3) 6, 8.—The Cities of St. John and Fredericton (and incorporated Towns organized under sec. 93), to be each one District, sec. 92 (1).—The Chief Superintendent of Education to furnish the Clerk of the Peace (sec. 1) with the numbers and boundaries of the Districts within the County, and any subsequent alterations thereof, sec. 9 (4).—The Certificate of the Clerk of the Peace to be evidence of District Boundaries, sec. 9 (4).

Regulation 1.—Applications to the Board of Education for changes in the established boundaries of any School District, are to be transmitted to the Chief Superintendent, *through the County Inspector.*

REMARK 1. The requirements of the Law [Secs. 57, 71 (2)] respecting the grading of Schools, the employing of teachers and class-room assistants, and the classification of the pupils according to their attainments, render it highly advantageous to establish Districts of good size. Experience has shown that small Districts usually have inefficient Schools. The resources of the people should be concentrated, with a view to the establishment, *thorough equipment, and permanent maintenance of Schools of a high order.* In this way good Schools may be created, accessible to all the people, without imposing burthens upon any. Parents living near the extremes of the Districts, can, in most cases, secure conveyance of their children to and from School during inclement weather. The Board of Education earnestly desires that the people of every District should enjoy the benefits conferred by a permanent and efficient School.

Of the Grading of Schools.

REFERENCES TO THE LAW.—Pupils to be classified into Elementary, Advanced, and High Schools, wherever the population is sufficient for the purpose, sec. 57. Different grades of these divisions to be established in very populous Districts, sec. 57 (*last clause*).

When the Trustees establish more than one department or School in a District, all the pupils are to be classified according to *attainments*, sec. 57 (*third, fourth, fifth and sixth clauses*), 92 (16); and are to attend such department therein as they shall be found *qualified for*, as determined by the Trustees aided by the Teachers, secs. 71 (2), 92 (16), 94.

REMARK 1.—The more dense the population, other things being equal, the more cheaply and efficiently can Schools be carried on. The Board of Education would call the special attention of School officers to the necessity of a careful compliance with the explicit provisions of the Law respecting the classification of the pupils into regular grades. The following are some of the advantages secured by the grading of the Schools, prescribed by the Law:—

(1) *It saves Time and Labor.*—In miscellaneous Schools the attainments of the pupils are varied, and the number of the classes must be large. In each branch of study several classes are required, to instruct which requires far more time and labor than if the attainments of the pupils were such as to permit the Teacher to combine all the classes in a given branch into one, or at most, two classes. Graded Schools diminish the number of separate classes, and thus save time and labor.

(2) *It diminishes the Cost of Teaching.*—If graded Schools lessen the number of classes, they likewise lessen the number of Teachers required to conduct them; and in this way diminish the cost of teaching.

(3) *It renders Teaching more Effective.*—Both pupils and Teachers take less interest in small classes than in those which are of good size. Every one conversant with Schools is aware that a class of ten or fifteen pupils will make greater progress than one composed of two or three. The pupils being of about the same attainments, each feels the influence of his fellows, and thus all are stimulated to high efforts and honorable emulation.

By grading, it becomes possible for Trustees to give the Schools the advantage of the special talents or tastes of Teachers. But few persons can teach ten or a dozen branches equally well. Yet this number is often required in miscellaneous or ungraded Schools. Well-managed graded Schools will be conducted by Teachers chosen for their special fitness for the departments of which they have charge.

(4) *It promotes Good Order.*—From the very nature of their organization, graded Schools admit better system and discipline than is possible in miscellaneous schools. When large and small pupils are taught in the same apartment, many sources of disorder arise which their separation would remove. The easiest School to govern, other things being equal, is one composed of pupils of nearly the same attainments and years.

(5) *It prompts the Ambition of Pupils.*—The pupil knows that there are higher departments of the School; he sees his companions transferred to them, and he naturally gives himself to diligent study to hasten his own promotion. If judiciously managed, the constant spur of such a motive may be made a powerful element of success in school work.

(6) *It renders it possible to give considerable Instruction in the Higher Branches of Learning.*—There is but one opinion among those who are competent to judge, as to the value of what are called the higher branches of education; and that is, that no one is able to appreciate the true worth of knowledge who neglects the study of them. To develop the talents of our people, and to place the children alike of the poor and the rich on the road to liberal learning, the course of study must be sufficiently extensive to embrace at least the elements of several of the higher branches. But this cannot be done in a satisfactory degree, in a miscellaneous school, without neglecting those branches of study which must always hold the first place in the Common Schools. To do justice to reading, writing, arithmetic, geography, British history, and English grammar, is well-nigh the utmost limit of the Teacher's ability. The law, therefore, most wisely requires the grading of the Schools in all populous places, otherwise the education of the vast majority of our people would of necessity stop at this point.

(7) *It brings the means of an Advanced Education within the reach of the Homes of a large number of children.*—It has been shewn that by the grading of Schools the elements of an advanced education can be taught with a good degree of success; and this, in very many cases, removes the necessity of children leaving home to obtain an education. The dangers of school life generally increase in proportion to the distance the child is removed from the family. A system adapted to secure a good education, and which at the same time permits the pupil to be under the immediate charge of his parents, must commend itself to every right-thinking parent and earnest educator.

REMARK 2.—Only in thickly settled rural districts, in villages, towns, and cities, is it possible to have graded Schools. Yet the Board of Education wishes to point out to the inhabitants of all Districts

having a school attendance of upwards of 50 children, that the Law, in requiring class-rooms and assistants, designs to realize for their Schools the nearest approximation to regular grading that is possible in the circumstances. This arrangement will, in any case, require but slight changes in School houses:—

(1) Wherever from 50 to 80 pupils can be brought together, the Law requires that there be sufficient sittings for all of them in the School-room, and that there be a good class-room attached. The Teacher is to have the direction and control of the whole, while the assistant is to render aid by drawing off from time to time during the day, classes into the smaller room. In many oral lessons, reviews, and the like, the Teacher can so adapt the exercise as to interest the entire school. By the employment of a Teacher and an assistant, the instruction can be rendered highly efficient.

(2) Where there are from 80 to 100 pupils in attendance sittings are to be furnished for them all in the School-room, and two class-rooms are to be provided off the School-room. One Teacher and two assistants are required. If the number of pupils reaches 100 or upwards, it will generally be found best to provide two apartments (under the same roof, if possible), and to grade the School into an elementary and an advanced department, with a Teacher for each. The employment of a second Teacher will secure to the Trustees about \$30 more annually from the County Fund.—See "*Of the Salaries of Teachers*," 2.

REMARK 3.—The advantages of the above plans are very obvious. The older children can lend their protection to the younger ones in going to and coming from School. The increasing number of pupils can be accommodated by enlarging existing houses whenever they are sufficiently good to warrant it. The Trustees will be enabled to secure qualified persons as Teachers, since they can better afford to pay good salaries. The assistants could, in some cases, be chosen from among the oldest and best qualified pupils; their services would not usually be required more than four hours a day, and they would need but a moderate compensation. Under the direction of an efficient Teacher, they would do fair work, especially if selected because they desired to become Teachers. See "*Of the Salaries of Teachers*," Remark 3.

3. *From the School District*, sec. 11:—Any sum required by any District in supplement of the above in aid of Salaries, to be determined by the District School Meeting, sec. 26, [or by the Trustees, secs. 45, 92 (10)] and to be raised by District assessment, secs. 11, 26, 36, 37, 92 (10).

Trustees to employ Teachers (and assistants), to be responsible for their salaries over and above their *Provincial* grant, according to the terms of a written contract made with them under authority of Law, secs. 71 (3), 81, 92 (1) (5), 69, 78: and to suspend or dismiss any Teacher for gross neglect of duty, or immorality, and notify the Chief Superintendent of any such action, sec. 71 (3).

The Board of Education empowered to make regulations under which moneys may be drawn and expended, sec. 5 (7).

REMARK 1.—It will be seen that the amount of Provincial and County moneys to be received in any District in aid of Schools, will depend almost exclusively upon *local exertion*, or the direct efforts made by the inhabitants of each District in maintaining their own Schools. The 26th Section of the Law enables the people of every District to put forth local effort to an extent commensurate with their means to provide a good School for all their children, and every such effort will be duly supplemented by funds from the County and Province. But no public moneys can be received by Districts which fail to establish Schools in accordance with Law.

REMARK 2.—The sum to be received by the Teacher from the Province is definite, but the exact amount that will be received by the Trustees from the County Fund on account of the average attendance of pupils, cannot be known at the time of the School meeting. The meeting should, therefore, be careful in voting its estimates to authorize a sum amply sufficient to enable the Trustees to meet the liabilities of the year. Any balance remaining in the hands of the Trustees, is, of course, to be carried to the credit of the next year, while any deficit arising from an authorized expenditure may be carried forward and provided for in the estimates of the following year.

REMARK 3.—The providing of a fair or even a liberal salary for the Teacher will be found the best economy. Every Teacher should receive whatever his services will command in the educational market. If Districts vie with each other in providing a competency for the efficient and worthy Teacher, there will soon be no reason to complain of lack of men and women of high qualifications in the teaching profession.

Assistants (*i. e.* those employed in class-rooms, see p. 37, Rem. 2, 3) will not, of course, expect so much remuneration as Teachers upon whom is devolved the management of Schools or departments. The Law provides a sum equal to one half the amount of Teachers' allowance from the Provincial Treasury to licensed persons employed as assistants. The Trustees will not receive any sum from the County Fund in con-

sideration of an assistant, but they will receive from this Fund an equal sum per pupil on the average attendance of *the entire School*, whether taught wholly by a Teacher, or by a Teacher and one or two class-room assistants. It may sometimes occur that some advanced pupil in the District would render valuable aid in the capacity of an assistant, during four hours of the day, and Trustees may employ such if they desire, even if unlicensed. See "*Of the Grading of Schools*," Remark 3.

Regulation 2.—Form of Teacher's Agreement: Each Teacher and assistant before entering on duty in any District, is to make a written agreement with the Board of Trustees, (each party retaining a duly executed copy of the same), in accordance with the following form:—

CONTRACT made this — day of — A. D. 18 —, between [name of Teacher or Assistant], holding a valid License of the — class, granted under the authority of the Board of Education of New Brunswick, hereinafter referred to as the Teacher, of the one part; and "The Trustees of School District Number — in the Parish of — in the County of —," [or "The Board of School Trustees of Saint John," or as the case may be], hereinafter referred to as the School Corporation, of the other part.

The Teacher, in consideration of the below-mentioned Agreement by the School Corporation, hereby agrees with the School Corporation diligently and faithfully to teach a School in the said District during the School Year [or Term] ending on the — day of — A. D. 18 —, or as much thereof as is unexpired.

And the School Corporation agrees with the Teacher licensed as aforesaid, to pay the Teacher in half-yearly instalments, [or quarterly, or monthly, as may be agreed upon] at the rate of — dollars for the School Year [or Term] exclusive of the Provincial allowance to be received by the Teacher from the Chief Superintendent.*

And it is mutually agreed that this Contract shall continue from School Year to School Year † unless notice in writing of an intention to determine the same shall be given by either of the parties hereto at least one month before the time herein limited, or the time to which the same may be so as above continued.

And it is mutually agreed that both parties to this contract shall be in all respects subject to the provisions of the Common Schools Act, 1871, and any Acts in amendment thereof and in addition thereto, and the regulations thereunder made by the Board of Education. ‡

In testimony whereof, the said parties have hereunto set their seals.

Regulation 3.—Fixed Salaries: The amount which the Board of Trustees of any District is to receive from the County Fund, being largely dependent on the regularity with which the pupils are kept at School, and therefore unknown at the date of the written agreement (Reg. 2) to be

made with any Teacher or assistant, the Chief Superintendent is not to recognize any Contract by which a Teacher or assistant may agree to receive such unknown sum as a portion, or the whole, of his or her remuneration from the Trustees, but shall require that a fixed and definite sum or rate be distinctly named in each and every agreement.

Regulation 4.—*Attendance, and County Fund to Trustees*
—*Limitation*: In the semi-annual apportionment of the County Fund to the various Boards of Trustees, the Chief Superintendent is not to recognize any attendance on a department or School in excess of an average of *fifty* pupils daily present for the time the department or school has been open during the Term, unless in the case of cities, towns, villages, and populous rural districts, it shall appear that the whole number of pupils registered in the department did not exceed fifty six; and in the case of rural districts generally, that the requirements respecting the number of sittings in the school-room, and the employment of class-room assistants, have been duly regarded.

For *site* of School House, see "*Of School Grounds*," p. 46.

Regulation 5.—*Capacity of School-room* * : At least 150 cubic feet of air, or 7 square feet of area, are to be allowed for each sitting provided

REMARK 1.—Every pupil should have room to sit and move without being confined or jostled. Every child has a right to his own personality and his own share of uncontaminated air. Comfort and convenience in sitting and moving depend upon the area of the room; the quantity of air, upon the area and the height combined. The height of the smallest School-room should be twelve feet, and this should be increased even up to sixteen feet in the larger houses. Two hundred and fifty cubic feet of air for each sitting is better than one hundred and fifty.

REMARK 2.—In building new houses, sittings should generally be provided for about one-quarter of the entire population of the District.

Regulation 6.—*Cloak Rooms* : A hall or room separate from the School-room, for depositing hats, cloaks, &c., and supplied with hooks or pegs, regularly numbered, should be provided for each school or department; and wherever the building will permit, two such rooms should be supplied, one for the use of the boys, and the other for the use of the girls.

Regulation 7.—*Form of Desks and Seats* : Whenever new furniture for pupils is procured by any District, it is prescribed that the desks do not accommodate more than two pupils each; that the Seats for the same have suitable backs, and be so graduated with respect to height that the pupils of different ages may be able to sit with their feet squarely upon the floor.

REMARK 1.—The physical comfort of the pupils is necessary to their mental improvement, while good order is impossible where there is constant uneasiness and discomfort. Seats without backs, and ungraduated, produce suffering and even distortion. To relieve the overstrained muscles, unnatural postures are assumed by the children, and crooked spines are a probable result.

REMARK 2.—The best arrangement for seating School-rooms is that of single or double desks, placed in parallel rows, with aisles between of sufficient width to permit passage. By this plan the pupils all face the teacher's desk, and are able to give direct attention to the Teacher.

* See note on previous page.

Benches do not afford the necessary support to the body, and are not adapted to an efficient organization of the School. They may, however, be used with advantage in class-rooms, and for the supply of extra seats for visitors at examinations. Care should be taken to fasten the common double desk firmly and neatly to the floor. The most approved double American desk has the seats separate from each other and from the desk, while both seats and desk are supported by light iron castings screwed to the floor. This, as well as the single desk, has been manufactured in New Brunswick, and though of considerable cost, will be found economic in the end.

REMARK 3.—Trustees and Teachers will find the following table of service in graduating the height of seats and desks, and in arranging the furniture in rows :—

Age of Pupils.	Height of Chairs or Seats.	THE DESKS.				Space between Desks for Chairs or Seats.
		Height of side next to pupil.	LENGTH OF		Width.	
			Double Desks.	Single Desks.		
5 to 6 years,	11 inch.	21½ inch.	36 inch.	18 inch.	12 inch.	14 inch.
6 to 8 "	12 "	22 "	36 "	18 "	12 "	14 "
8 to 10 "	13 "	23 "	40 "	22 "	12 "	14 "
10 to 12 "	14 "	24½ "	46 "	24 "	15 "	17 "
12 to 14 "	15 "	26 "	46 "	24 "	15 "	17 "
14 to 17 "	16 "	27½ "	46 "	24 "	15 "	17 "
17 & upwards,	17 "	29 "	48 "	26 "	18 "	17 "

A space of four to five feet, extending across the room, should be left between the Teacher's platform and the pupils' desks. From one and a half to two and a half feet should be allowed for aisles between each row of desks, and, if possible, the aisles next to the walls of the room should be three feet. When single desks are used, eighteen inches to two feet between the rows will be sufficient. The size of the pupils for which any room is intended must determine the width of the aisles between the desks.

REMARK 4.—The desks should always be so placed that the pupils may face the entrance of the room. The entrance and exit of pupils or visitors attracts the attention of the School. If the backs of the pupils are toward the entrance, the pupils will turn round whenever the door opens or closes, presenting an unseemly appearance, as well as seriously interfering with the study and recitation. Also, when strangers or others visit the School, or call at the School-room, the Teacher is obliged to receive them at the rear end of the room, instead of the front—which is awkward and inconvenient. Further, the door or doors leading to the woodhouse or back yard are more convenient at the rear of the room, and this can only be when the arrangement of the room fronts the entrance.

Regulation 8.—Ventilation: It is required that every School-room have ample provision for the admission and circulation of pure air, and the escape of impure air.

REMARK 1.—Without proper ventilation the School-room must be an unhealthy place, and one pervaded by bad odors. Nothing but a continuous supply of pure air can prevent restlessness and nervous irri-

tability on the part of both Teachers and pupils ; headaches, bronchitis, and weak lungs ; a sluggish vital action, depriving pupils and teachers of half their mental activity ; and weariness and exhaustion of all the members of the School during the latter half of each day. The only reason why life is not destroyed in some School houses is the loose and imperfect construction of the buildings.

REMARK 2.—Economy in the use of fuel, equal distribution of heat through the room, and a plentiful supply of pure and properly tempered air, are problems involved in securing a proper system of ventilation. Open fire-places cause a free circulation, but the heat is unevenly distributed and there is great loss of heat up the chimney. Stoves consume much less fuel, but the heat is not evenly distributed, and there is almost no ventilation connected with the process of heating. Windows opened at the top admit the air freely, but the cold current settles at the bottom of the room, and keeps the feet of the pupils uncomfortably cold. On its way it strikes the unprotected necks and shoulders of many of the pupils, causing colds like any other draught. An opening in the ceiling is often made, but when it merely connects with a room overhead, no currents are created and no ventilation is induced. When the outlet is through a flue directly into the outer air, the hot air at the top of the School-room is drawn off, and the foul air below remains. The air is changed but little, while the waste of heat is very great. Two separate flues from the ceiling, or the division of a single flue into several parts, are frequently employed. This plan secures an upward current through one and a downward current through the other, and causes a change of air in the room. But when a door or window is opened the descending current ceases, while the hot air continues to ascend. This method of admitting cold air exposes pupils to draughts and cold feet, as in the case of admission by the windows, and there is a great loss of heat.

In School houses not having an economic and faultless method of ventilation, the air in the School-room must be thoroughly changed at each recess by opening the windows and doors. During School time, while the pupils are seated, the windows opposite the wind can be opened just sufficient to allow the escape of hot air, but not to admit cold air. By causing the pupils to rise from their seats and engage in physical exercises, the windows can be safely opened at both the top and the bottom. In summer, good ventilation can be constantly had by means of the doors and windows, but care must be taken to protect the pupils from draughts.

REMARK 3.—Recent improvements in hot-air furnaces have satisfactorily solved the three problems, already referred to as involved in a system of ventilation. But hot-air furnaces are too costly for use in any considerable number of Schools. It is, however, within the reach of almost every country district erecting a new School-house or effecting alterations in an existing one, to secure an inexpensive system of heating and ventilation, which possesses all the excellences of the costly apparatus mentioned. The details of the plan are as follows :—

(1) The chimney is to be built in one of the *front* corners of the School-room, commencing at the foundation. In ordinary School-rooms a single chimney is sufficient. By placing it in front, long stove-pipes are avoided, and with them the radiation of heat downwards upon the heads of the pupils, and their smoke, dripping, and getting out of place. The chimney requires two flues,

separated by the thinnest possible partition: one for smoke, and the other for ventilation. (The results sought can be effectively attained by having a clay pipe for the smoke carried up through the centre of the chimney.) From the ventilating flue of the chimney, air-tight horizontal tubes are to be laid under the floor to the opposite sides of the room, terminating in registers opening through the floor beside the base-board.

(2) The stove used may be the ordinary box stove for wood, or upright cylinder for coal. The stove is to be placed in one of the front corners of the room, and enclosed by a case or jacket of sheet iron or galvanized iron, for the double purpose of preventing the intense primary radiation, and of providing space for the heating of air. A pure air tube connecting with the outer air is to be laid under the floor, and brought up directly beneath the stove.

(3) Operation: When a fire is kindled in the stove, the heat escaping from the clay pipe raises the temperature in the surrounding ventilating flue, establishing an upward current. This causes a draught which acts upon the air of the room through the registers at the extremity of the ventilating tubes, pumping the cold air from the bottom of the room.

The stratum of air which surrounds the stove becoming heated, a hot current is produced, which escapes into the room by the opening in one side of the jacket at the top. The hot air then rises to the top of the room, where it accumulates, and pressing downward upon the cold air, forces it out through the registers, thus directly aiding the draught of the ventilating flue.

The pure air, heated and properly tempered, soon has entire possession of the room. The ventilating register attracts it to the farthest part of the room, and the heat is evenly distributed. No warm air can escape from the room while there is any cold air in it, and so no heat is wasted. The currents through the room are continuous, and the foul air is carried off as fast as generated. The whole system is brought directly under the Teacher's control by having adjustable registers at the opening into the ventilating tubes and in the cold air tube, and by proper dampers in the stove. The air may be tempered with moisture whenever required, by having a basin of water placed upon the jacket, near the opening for the escape of the heated air. Great care should be taken that both the basin and the water are always clean.

The use of fuel is more economic than that of air-tight stoves, for the necessity of opening doors and windows for air is entirely obviated. The extra cost of the case or jacket for the stove, and of the ventilating tubes and clay pipe, but a few dollars at the most, will be saved in fuel in a single winter.

Regulation 9.—Outhouses: It is required that separate and commodious outhouses be provided, and kept in a cleanly condition, for the use of pupils of different sexes.

REMARK 1.—The outhouses should be commodious, inoffensive, and screened from public observation. A high tight board fence should extend from the centre of the rear of the School-house to the farther edge of the lot, dividing the rear grounds into two parts. The outhouses should *not* be placed beside this fence, but at a little distance from it, and sufficiently far from the School house to secure their being inoffensive to the School in warm weather. The approaches should be guarded by a suitable screen or hedge.

REMARK 2.—Each outhouse should be supplied with a well-stoned vault, five feet deep, so arranged as to admit of being cleaned out. Care should be taken to prevent the water running into the vault from off the roof; access to the vault, therefore, must be provided at the *end* of the building.

REMARK 3.—The adjacent figure will serve to indicate a suitable building for the use of the girls. Where there are more than one girls' department, a larger building will be required. (See published Plans for details.)

The building for the use of the boys should contain two apartments, divided by a close partition, as in the annexed figure. A strong brace of plank should be firmly affixed to the frame of the building, so that the covers of the seats cannot be opened beyond an angle of 60 degrees,—to prevent standing upon the seats. (See published Plans for a building to accommodate more than one boys' department.)

In the buildings for each sex, the seats should have lids hung with strong butts, and the vault should be ventilated by a hollow wall opening into a chimney on the top. The buildings should be well plastered and painted, and finished in the same general style of architecture as the School house. The plaster should be left very rough, and a heavy coat of coarse sand should be mixed with the paint, to render scribbling and obscene figures impossible.

REMARK 4.—Locks should be placed upon the doors, so that the outhouses cannot be entered, except during hours when the Teacher can have them under his personal supervision. When constructed after the plans indicated, Trustees can properly hold Teachers responsible for keeping the outhouses in good order. See REG. 22 (10).

REMARK 5.—A shed for storing wood, and a covered play-ground for the use of the pupils in cold and stormy weather, will be found to contribute much to the comfort of the School.

REMARK 6.—If any District is unable to erect a framed house, the Board of Education would urge the building of a log house. Separate entries, playgrounds, and outhouses, for boys and girls, can readily be provided in connection with such a School-house. So, too, of the prescribed shape and size of the rooms; the form and heights of the seats and desks and their arrangement on the floor, and the distribution of windows in the walls; while a good fire-place will secure ventilation in the winter, when windows and doors cannot be used for this purpose.

Of School Grounds.

REFERENCES TO THE LAW.—Grounds to be provided by District Assessment, sec. 11: by purchase, secs. 26, 54, 70 (2), 92 (5); by lease, secs. 26, 70 (2), 92 (5).

Money may be borrowed by the District for the purchase or improvement of School grounds, secs. 11, 70 (3), 92 (6) (9).

Grounds to be selected by the Trustees, sec. 92 (5), [and sanctioned by the Inspector, sec. 70 (4)], and may be taken in certain cases without the consent of the owner, sec. 70 (4).—Grounds to be held in trust for School purposes by the Trustee-Corporation, secs. 70 (1), 58, 92 (1) (15); who may sell or dispose of the same, sec. 92 (1) (5), [when authorized by the School meeting, sec. 70 (1)].

Regulation 10.—*Location*: The School house should be located at a distance from all sources of malaria, such as swamps, stagnant water, and the noxious gases generated by

some manufactories. It should also be situated away from the dust of the street, and the noise of the mill, the workshop or the railway station. A dry, airy position (with a very gentle slope and a southern exposure, if possible), commanding as attractive a prospect as natural facilities will permit, will be found best adapted for School purposes. It is indispensable that the ground be thoroughly dry, and if not so naturally, that it be well drained. For the moral health of the pupils, the School house should never be placed in view of even occasional scenes of brutality or debauchery. In choosing School sites, Trustees and Inspectors* are to secure those of readiest accessibility to the majority of the people to be accommodated, subject to such modifications as a due regard, in any District, to the foregoing considerations may require.

Regulation 11.—*Size of Lot*: In the country, School grounds should be an acre in extent, but not less than half an acre; in villages, not less than a quarter of an acre; and in towns, not less than one-eighth of an acre. Separate play-grounds are required for girls and boys.

REMARK 1.—Ample grounds should be provided wherever possible. Exercise is as essential to the health of children as air is to their life, and every School should have suitable grounds for games and amusements. The relaxation and stimulus arising from physical exercise in the fresh air, at certain intervals during the day, are productive of a very salutary influence upon the intellectual vigour of the pupils in their school work. Higher benefits are also secured by good play-grounds. They furnish an arena for the display of the real tempers, dispositions, habits and manners of the pupils. The Teacher, while superintending the pupils in the playgrounds, will obtain knowledge which, in his subsequent instruction, he can turn to the best account, both in the encouraging of what is right, and in the dissuading from what is wrong; in a word, in the moulding of moral character.

REMARK 2.—In a lot of one acre, sixteen rods front and ten deep is a convenient form. Any other form might be adopted, and the nature of the ground will often render some other preferable. Whatever may be the width or length, the School house should be placed in the centre of the front, and at a little distance from the highway. A high close board fence, extending from the rear of the School house to the rear of the lot, will make a suitable division of the playgrounds.

Regulation 12.—*Walks*: In order to the health and comfort of the pupils in wet weather, and to the cleanliness

* The sanction of the site by the Inspector should be in writing, and the Trustees should preserve the paper among the public documents of the School District.

of the School room, a suitable plank or gravel walk should extend from the highway to the front door of the School house. Similar walks are also required from the School house to the outhouses.

Regulation 13.—*Improvement of Grounds*: Rough or wet grounds are to be rendered as smooth and dry as the nature of the ground will permit. In effecting any such improvements, Trustees and Teachers are earnestly solicited to use every care to preserve the ornamental features of the grounds, wherever the same may not interfere with the requirements for the playgrounds.

REMARK.—Oftentimes without incurring any expense, and generally by a comparatively trifling expenditure, the School grounds may be so arranged as to be attractive to the pupils, affording them constant pleasure during their school days, and cultivating in them a taste for the beautiful in nature. For the purposes of ornament, trees are at once the most beautiful and the most enduring. "Airy and delicate in their youth, luxuriant and majestic in their prime, venerable and picturesque in their old age, they constitute in their various forms, sizes, and developments, the greatest charm and beauty of the earth in all countries. The most varied outline of surface, the finest combination of picturesque materials, the stateliest country house, would be comparatively tame and spiritless without the inimitable accompaniment of foliage. * * Buildings which are tame or even mean in appearance, may be made interesting and even picturesque, by a proper disposition of trees. Edifices, or parts of them, that are unsightly, or which it is desirable partly or wholly to conceal, can readily be hidden or improved by wood; and walks and roads which otherwise would be but simple ways of approach from one point to another, are, by an elegant arrangement of trees on their margin, or adjacent to them, made the most interesting and pleasing portions of the residence."—(A. T. Downing.)*

* The following hints are appended for the assistance of those who wish to render the memory of school life most pleasant to the children, and the school grounds great powers of refinement and important influences for good:—

In a hilly or very broken region, the tall, spiry-topped trees, like the pine, fir, spruce, as well as the cedar and hemlock, would harmonize with the general features of the landscape. The round-topped and symmetrical trees, like the oak and maple, are better adapted to the quiet scenery of a level region.

While a variety is always desirable, yet the different kinds chosen for a given spot or group should be somewhat similar in shape. A group of oak, maple, and bass-wood, for example, would be harmonious, while one composed of a Lombardy poplar, weeping willow, and fir would be incongruous.

Single trees should be such as have a graceful and beautiful outline, and convey to the mind the feeling of completeness. The drooping elm, as a single tree, is unsurpassed for grace and beauty, when sufficient space is left for expansion. It is specially adapted to a level or moderately hilly region. The maple, bass-wood, and yellow birch, are admirable, either as single trees or as members of a group.

Groups may consist of several kinds of trees, that are harmonious in character, planted so closely together that at a little distance they have the appearance of a single object. They should always be composed of one principal tree, larger and taller than the rest, with the others grouped around it as subordinates. The oak is one of the noblest trees as the central object of a group.

Regulation 14.—*Fence*: The School lot should be enclosed by a close picket, board, or post-and-rail fence, substantially built.

REMARK.—Pupils should not be permitted to roam at will during recess, or to play on the public highway. The School grounds, moreover, cannot be kept in order unless they are properly enclosed. The gates should be so arranged as to prevent the entrance at any time of roadside cattle.

Of Apparatus and Text-Books.

REFERENCES TO THE LAW.—The Board of Education empowered to prescribe Apparatus and Text-Books, sec. 5 (5).

Prescribed maps and apparatus for the School house to be provided by District assessment, sees. 11, 26, 54, 92 (10), and prescribed text-books for the children of poor parents, sees. 26, 71 (4) (5), 92 (16) (10),—to be procured by the Trustees, sec. 92 (5), [as authorized by the School meeting, sec. 70 (2)].

If, after notice, any parent, master, or guardian, refuse or neglect to furnish any child with the prescribed books required in his classes, the Trustees are to supply the books to the pupil, and the parent, master, or guardian, (the same not being indigent), to be liable for the cost, sees. 71 (5), 92 (5) (16).

Regulation 15.—*Apparatus*: It is required that each District provide such apparatus as shall be found necessary for the efficient teaching of any branch of study pursued in the School.

REMARK 1.—Some Teachers have little or no idea of the necessity of apparatus for the purpose of establishing facts and illustrating principles. Others have a mistaken notion that a large amount of costly apparatus is necessary to the success of a School. No money should be wasted in the purchase of useless articles, but the things essential should always be furnished. The ingenious Teacher will usually explain and illustrate his lessons by the aid of such common things as can be readily obtained. Expensive apparatus for illustrating principles of natural philosophy, is beyond the reach of most country districts; but almost every necessary experiment can be performed with articles procurable in the neighbourhood. The lever, the compound lever, the pulley, the wheel and axle, the inclined plane, the wedge and the screw, may all be illustrated by the common steelyard and a couple of pulley-blocks, a wheel or two from an old clock, and a wooden screw. Hydrotatics and hydraulics can also be illustrated by a few tin tubes, or bits

The single trees and groups should be so disposed about the School premises as not to interfere with the playgrounds, and at the same time to produce as great a variety as possible in the appearance of the landscape. If the situation is a fine one, openings should be left to afford views of distant objects, such as a lake, river, mountain, or the sea; all of which objects will appear more beautiful seen through a vista, bounded by the shifting foliage of the trees.

Shrubs should be planted in curved lines, in such a manner as to completely screen the approach to the outhouses, and to cover up such portions of the buildings as should not be exposed to public gaze.

Wherever the site of a school house is in an exposed position, the grounds should be protected by a thick-set row of white spruce.

of lead pipe, and vessels of wood or tin, if the Teacher has zeal and a little ingenuity. Pupils should be encouraged, also, to make experiments themselves with apparatus of their own devising.

REMARK 2.—The following apparatus should be considered essential:

(1) *General Apparatus*:—A small clock, hand-bell, thermometer, ball-frame, blackboards,* chalk and rubber†, a large map of the Province (and of the County, when possible), the hemispheres, pointer‡, a terrestrial globe, dictionary, gazetteer, and a Merit-Book for the daily keeping of the School Standing of the pupils and the daily reporting of the same to their parents.§

(2) *Special Apparatus*: (a) For use with young children: blocks representing geometric solids; the conventional standards of measure and weight; illustrations of the primary colours, with shades and tints; reading cards (to introduce the Primer); pictures of animals and vegetables (natural history); and a box of colored crayons (for blackboard use).

(b) An advanced Common School should be provided with a large map of each country for the study of its Geography; charts for the study of History and Natural Philosophy; and, where it can be afforded, some Chemical apparatus, and instruments for Surveying and Navigation.

(c) In addition, for use in High Schools, a full set of Ancient Maps; Physiological Diagrams, both vegetable and animal; and a Celestial Globe. The following additional apparatus will be found convenient: A tellurian; a magnet and small galvanic battery; and an orrery.

*Blackboards should extend around the walls of the school and class-room. Too much blackboard surface cannot be provided.

As school-houses are being built or repaired, cheap and excellent blackboards can be made as follows:—Upon a "scratch coat" of plastering on *sawed* laths, lay on evenly, but without "smoothing," a second coat, one-sixth of which is plaster of Paris. Take lampblack, and, after subjecting it to a sufficiently strong heat in an iron vessel to free it from oily matter, mix with alcohol or burning fluid in a thick paste. Take clean freshwater sand, lime, putty, calcined plaster (rather more plaster than putty), and a small quantity of flour of emery; mix thoroughly, and add enough of the lampblack paste to make the mortar jet black. Lay this upon the "second coat," and polish very smooth with the trowel. These "boards" will last as long as the building. They should not be often washed, but cleaned with a lambskin rubber.

Or the following:—4 pecks of white finish or white coating, 4 pecks of beach or other fine sharp sand, 4 pecks of ground plaster, 4 pounds of lampblack, and 4 gallons of alcohol or strong whiskey. This quantity will make a mixture sufficient to cover twenty square yards of surface. A little flour of emery will prevent the mixture from "setting" immediately, thus giving time to put it on the wall with necessary care. If emery be not used, only a small quantity should be mixed at a time. This black mixture takes the place of the usual white coating, and is put on in the same manner. After the black surface is on the wall it must be carefully dampened and rubbed, in order to fill up all the pores and make the surface *hard* and *smooth*.

If wood is used it must be well-seasoned pine or poplar, of fine quality, and the blackboards must be well made and carefully painted. The following makes a good paint:—10 oz. pulverized pumice stone, 8 oz. pulverized rotten-stone, 12 oz. lampblack, and one gallon of alcohol. Mix with enough alcohol to make a thick paste. Grind the mixture very thoroughly in a paint mill, and then dissolve 14 oz. of shellac in the remainder of the alcohol. Stir the whole together, and the paint is ready for use.

The "Eureka Liquid Slating," or the "Rival Liquid Slating," manufactured in New York, makes a superior blackboard surface. It is sold in cans. Care should be taken to have a firm, smooth and dry wall. The "Rival" is somewhat cheaper than the "Eureka."

† Rubbers for wiping the chalk from the blackboards, can easily be made from lambskins cured without the removal of the wool.

‡ Pointers should be tipped with a bit of soft leather or rubber, to prevent the surface of maps from being scratched and destroyed.

§ The teacher should add to this "general apparatus," by diligent effort, a collection or cabinet of curiosities and common things. It will form an unfailling

REMARK 3.—Hooks should be placed upon the walls, from which maps and charts may be suspended. A closet should be provided for preserving the apparatus when not in use.

Regulation 10.—*Text-Books*: Pupils are to be provided by their parents or guardians (unless too poor, in which case the Trustees of the District are to provide the books) with the text-books herein prescribed, as may, from time to time, be required by the course of instruction pursued in the School:—

- [5] Evening Schools shall be graded according to the attainments of the pupils.
- [6] In all cases, the Board of Education would greatly prefer that the Teachers of Evening Schools should be other than Teachers of Day Schools; but where this may not be practicable, the Board of Trustees may permit the Teacher of the day school to teach four days in the week, and evening school three evenings in the week.

Regulation 18.—The School Year and School Terms: For purposes of administration, the School Year shall be regarded as beginning on the first of November, and shall be divided into two Terms: A Winter Term, opening on November 1st, and closing on April 30th; and a Summer Term, opening on May 1st, and closing on October 31st.

Regulation 19.—Holidays, Vacations, Teaching Days, Substitute Holidays and Teaching Days, and Length of Daily Session: The following are prescribed and authorized:—

1. *Holidays:* (1) The anniversary of the Queen's Birthday shall be a holiday in all the public Schools; also any day proclaimed as a public holiday throughout the Province, and Good Friday. - (3) In the Cities of Saint John and Fredericton, and in incorporated towns organized under sec. 93 of the Law, there shall be ten days additional in the Summer, with an Easter Vacation (beginning on Good Friday) of three days, the same being week days other than Saturdays.
3. *Teaching Days* : All week days not allowed as Holidays, or included in Vacations by the foregoing provisions, are to be regarded by all parties concerned as prescribed Teaching Days.
4. *Substitute Holidays and Substitute Teaching Days* : (1) When for any cause the Board of Trustees shall deem it desirable that any prescribed Teaching Day should be given as a holiday, the School or Schools may be kept in session on the Saturday of the week in which such holiday has been given, and such Saturday shall be held to be in all respects a legal Teaching Day.
- (2) When, owing to illness, or for any other just cause, a Teacher loses any number of prescribed Teaching Days, such Teacher shall have the privilege of making up such lost days, to the number of *six* during any Term, by teaching on Saturdays; but No School or Department shall be kept in session more than *five* days per week, for any two consecutive weeks; Nor shall any Teacher teach more than five days per week on the average (vacations not being counted) during the period of his engagement in any Term.
5. *Length of Daily Session* : The hours of teaching shall not exceed six each day, exclusive of at least an hour allowed at noon for recreation. The Board of Trustees, however, may, if it desires, restrict the number of hours to five. A short recess shall be allowed about the middle of the morning, and the middle of the afternoon sittings. In Elementary departments especially, care should be exercised that the pupils are not confined too closely or too long in the School-room. [The Board of School Trustees of Saint John may, in its discretion, permit one daily session during the Winter Term; but the Board of Education reserves to itself the right of withdrawing at any time the permission herein granted.—Dec. 21, 1872].

Regulation 20.—*Symbols or Emblems in the School-room* : Symbols or Emblems distinctive of any national or other society, political party, or religious organization, shall not be exhibited or employed in the School-room, either in its general arrangements or exercises, or on the person of any Teacher or pupil.

But no Teacher may compel any pupil to be present at these exercises against the wish of his parent or guardian expressed in writing to the Board of Trustees.

Regulation 22.—*Duties of Teachers:* It shall be the duty of each and every Teacher:—

(1) To maintain a deportment becoming his position as an educator of the young; and to strive diligently to have exemplified in the intercourse and conduct of the pupils throughout the School, the principles of Christian morality. The Teacher shall carefully preserve every such permit till the expiration of the Term. In the event of any pupil being transferred from one department to another during the Term, a line shall be ruled in the Register opposite (to the right of) his name, and the words "*Transferred to — department*" (or *school*) written thereon. *The following are modes to be adopted or avoided:—

Improper.—Contemptuous language, reproof administered in passion, personal indignity or torture, and violation of the laws of health.

- (14) To make the affidavit required by sec. 84 of the Law, and furnish the Board of Trustees, when solicited by them or their Secretary, every reasonable assistance in making the Returns required by the Education Office.

The affidavit of the Teacher's successor is, in such a case, to include only that portion of the Term during which he has had charge of the School or department, and is to be executed on the blank form contained in the Trustees' Return.

All such Reports shall be forwarded to the Education Office by the Trustees, in connection with their half-yearly Return.

Regulation 23.—Meetings of Teachers: It shall be the duty of all Teachers, unless expressly exempted, to attend any meeting or institute convened or established by the Chief Superintendent, or under his authority, for the purpose of systematizing and perfecting the modes of Management and Teaching employed in the public schools under their charge, or imparting special instruction in the subjects of English Reading, Vocal Music, Industrial Drawing or other special subject. And in case compliance with this requirement should compel any Teacher to close his school for a part or the whole of any prescribed teaching day or days, no deduction shall be made therefor from the Provincial or County moneys to which the Teacher and Trustees would otherwise have been entitled.

Regulation 24.—*Collections, Subscriptions, Presents, &c. :* No collection shall be taken up, or subscriptions solicited for any purpose, or notice of shows or exhibitions given in any School, without the consent of the Trustees; nor shall any Teacher act as agent for text-books, or sell stationery, or receive presents, (unless presented to him on his retiring from the School), nor award prizes or medals of his own to the pupils under his charge.

rules and instructions as he may deem expedient for the due conduct of the examination. The examination papers shall be securely sealed, and the seal on each package shall be broken only in the presence of the candidates when required for actual use in the examination.

(5) *Chief Superintendent to have charge of the Examination—Reading:* The Chief Superintendent of Education shall, either in person or by his deputy, preside at every examination; and shall, previously to distributing any question-papers to the candidates present, determine by oral exercises whether any candidate's knowledge and abilities with respect to Reading are sufficiently accurate and excellent to permit such candidate to undergo further examination for the class of License for which application has been made.

(6) *The Examination to be undergone in good faith:* The Chief Superintendent, or his deputy, shall place on file in the Education Office, a sworn report of the examination, in which he shall record any known infringement of the Regulations of the Board. In the event of any candidate taking into the room any book, notes, or any thing from which to derive assistance in the examination, or copying from another, or allowing another to copy from him, it shall be the duty of the Chief Superintendent, or his deputy, to dismiss such candidate at once from the examination, and to remove his name from the candidates' list; but if in any case the evidence of want of good faith be not clear at the time, or be obtained subsequent to such dismissal, the case shall be duly recorded in writing, and the candidate's papers shall be rejected if the evidence be conclusive.

(7) *Estimation of Candidates' papers:* At the close of the examination the Chief Superintendent shall promptly forward each candidate's papers to the examiners appointed by the Board of Education, a portion to each, viz: to the Examiner in LANGUAGE, the Examiner in GEOGRAPHY and HISTORY, the Examiner in MATHEMATICS, and the Examiner in TEACHING and SCHOOL MANAGEMENT. Each Examiner shall express his judgment of the merits of each paper submitted to him, by means of numbers—taking 100 as the highest possible mark. The Examiner shall return the papers as promptly as possible to the Chief Superintendent, who shall preserve them on file for a period of five years.

(8) *Spelling:* Each Examiner shall note and report the number of ordinary words mis-spelled by each candidate; and the average of marks obtained by any candidate on his whole examination shall be increased by .5 as many times as the number of words so reported shall be less than 6. No candidate who mis-spells upwards of 6 ordinary words in the course of the examination shall be deemed qualified to receive a license in advance of the second class. At the September examination in each year, an exercise in spelling shall on application be prepared for candidates who at any previous examination made an average of 60 or upwards on the papers of the first class, and were debarred from receiving license of the first class by reason of bad spelling. The exercise shall not exceed one hour in length and shall be confined to common words, and any such candidate not making more than six errors shall be granted a license of the first class without further examination.

(9) *Standards of award*: In awarding Licenses, the following principles shall be strictly adhered to:—

- (a) To obtain the class worked for, the average of the Examiners' marks (the regulations respecting spelling being duly observed), must be 50 or upwards; to obtain the next lower class, the average must be 40 or upwards; and to obtain the second below the one worked for, the average must be at least 30.
- (b) In each case, there must be no mark further below half of the required average than the actual average is above the requirement, with this limitation—that where there are more than one paper demanded under one general subject (as in the case of History, Mathematics, &c.,) if the average of the marks on these papers equals the required *general* average, these papers shall be exempt from the operation of this principle; and that any candidate making the required average for a given class, shall not be debarred hereby from receiving the next lower class.
- (c) In order to obtain a License of the Grammar School Class, candidates will be required to make a general average of 50 or upwards on the whole examination, with no mark in the English branches further below 37.50 than such average is above 50. In Latin the average of marks must be 50 or upwards, and in Greek, 37.50 or upwards. Candidates for this license who have previously made an average of 75 or upwards on the syllabus prescribed for the first class, are to work papers on those subjects only which are peculiar to the syllabus for the Grammar School Class.
- (d) Candidates for either the first or Grammar School Class, working the exercises on professional subjects only (1), will be required to make an average of 75 or upwards.
- (10) *Results of Examination*: Each candidate shall be notified by mail of the result of his examination, and be furnished with a memorandum of the estimates placed upon his several papers by the Examiners.

REMARK 1.—The Trustees represent the inhabitants of the District, and are to transact all School business in their stead, and on their behalf. The interests of Education cannot thrive in any District unless these officers efficiently discharge their duties. Much of past weakness and imperfection is remedied by enlarging the powers of Trustees, and defining more specifically their important duties. Sound judgment should be exercised by the various Districts in choosing fit men for the office—men of intelligence, of business habits, and of educational zeal. A faithful discharge of the duties of a Trustee will require no small labour. But every community may fairly claim the services of its best men in a matter of universal interest and importance. Besides, pro-

vision is made for the retiring of one of the members of the trusteeship annually.

REMARK 2.—By the provisions of sec. 71, it is made the duty of the Trustees to provide school privileges free for all the children of the District, and to contract with Teachers. Every Board of Trustees should exercise all its powers under law in a wise discharge of these duties, submitting a clear report to the annual meeting of the educational condition of the District, the receipt and expenditure of all school moneys, and the amount that the Trustees estimate to be required for the due discharge of their duties for the year. It is for the meeting to add to or diminish this estimate, according to its best judgment of the requirements of the District. Should the meeting fail to vote the means necessary to meet liabilities arising from agreements or contracts already made by the Trustees, or to be made during the year in order to provide school privileges free for all the children of the District, the Trustees are empowered to levy and collect their estimate on its being authorized by the Board of Education, sec. 45. The occurrence of the annual meeting near the middle of a School Term, need not, therefore, in any way prevent schools from being carried on without interruption.

REMARK 3.—Each member of the Board of Trustees should be notified of any meeting of the corporation. It is competent for a majority of the Trustees thus convened to transact business.

REMARK 4.—The Trustees are to procure the School Register prescribed by the Board of Education, from the County Inspector. They should satisfy themselves that the Register is properly kept by the Teacher. The Register, when filled, is to be carefully preserved by the Trustees as a part of the School documents of the District.

REMARK 5.—The Trustees (and not the Teachers, as under the former Law) are to make Returns to the Chief Superintendent. See Regulation 22, (14) (15.)

REMARK 6.—The provisions of the Law respecting the duties of the Trustees, and their Secretary, and the Auditor, are too explicit to require explanation. The above "REFERENCES TO THE LAW," and the general Regulations of the Board of Education, will supply necessary information on the several subjects treated of. The following Forms are appended for the assistance of the Trustees.

If such an execution shall not have been satisfied, proceedings may, upon the return thereof, be taken against the real estate of the ratepayer; for which purpose the Secretary shall make and subscribe an affidavit in the Form A, and any two Justices of the Peace of the County shall thereupon, on the application of the Secretary, issue a Warrant B, directing the Sheriff to sell the real estate. The affidavit shall be annexed to the Warrant; and the Sheriff shall execute the Warrant according to the exigencies thereof.*

 2. An average of recitation, for the full term, less than 75 shall disqualify for class SUPERIOR ; less than 50, for class GOOD ; less than 37½, for class FAIR.
 3. The professional standing of those eligible for classification shall be obtained by an average of the following :—

- [d] The estimate on written exercises on professional subjects.

Of Inspectors.

REFERENCES TO THE LAW.—Board of Education empowered to appoint fourteen Inspectors, to apportion \$4,000 between them as salaries, to prescribe their qualifications and duties, and to provide for the uniform certification of all candidates for inspectorships; Sec. 5 (2).

The Chief Superintendent to have the general direction of the Inspectors, Sec. 9 (1), who are to aid him in carrying out a uniform system of education by giving effect to the provisions of the Law and the Regulations of the Board of Education, Sec. 10 (3).

for their share of the County assessment Fund, as the same shall be, from time to time, provided by the Chief Superintendent.

REMARK.—The sum placed at the disposal of the Board of Education for Inspectors' salaries is insufficient to secure the services of professional Teachers for the office. As soon as this condition is reached, the work of inspection proper will require especial attention, and demand professional qualifications for its successful discharge, as contemplated by the following Regulation:—

Regulation 42.—*Uniform certification of candidates for Inspectorships:* In view of the operation of Section 13 of the Law, all candidates for the office of Inspector thereunder shall have taught for a period of at least three years, and shall have obtained a license of the Grammar School Class in accordance with Regulations 30 and 31; and upon appointment to office each Inspector shall spend one term at the Provincial Training School, or such time as the Board of Education may require, with a view to a more perfect acquaintance with the methods of School Management and Teaching to be employed in the schools of the Province.
