Rowell Walks on Gridiron Says Premier at Cobourg

Flings Out Challenge to Liberal Leader to Show Where He Stands on Temperance and Bilingual Schools—Ontario Government's Progressive Policies Effectively Reviewed.

RY. BOARD CRITICS DON'T CAUSE WORRY

COBOURG, Nov. 15.—(Staff Special.)—It was no mere opening gun in the Ontario political campaign that Sir James Whitney fled here to-night, it was a perfect broadside, a fusillade of words achieved that stand out before the electors in bold relief, not as promises visionary or uncertain, but as things actually accomplished in the interests of the people of Ontario.

But about with this armor of what the government has accomplished in the seven years of its existence, Sir James boldly opened the centre of this crowded Liberal riding of West Northumberland to give an account of his stewardship.

No Partisan Spirit.
 Victoria Opera House, where the big meeting was held, was crowded to the doors. The townspeople, whatever their party affiliations were, put them aside for the time being and vigorously applauded the premier as he recounted the different measures of progressive legislation that are now being enforced by the government of the premier province of the Dominion.

Frank Field, K.C., chairman of the West Northumberland Conservative Association, presided. Among those on the platform with Sir James were, Capt. Hugh McCullough, Conservative candidate for West Northumberland in the legislature; C. A. Munson, M.P., West Northumberland; J. W. Johnson, M.L.A., West Hastings; Sam Nesbitt, M.L.A., East Northumberland; J. J. Preston, M.L.A., East Durham, W. C. Nickle, K.C., Belleville; T. G. Carstairs, M.P., for Lennox; Robert Smetzer, Herbert Rosewar and many others.

A Law Maker's Needs.
 "I speak under somewhat of a disadvantage after the flattering words said about me by the previous speakers," said Sir James Whitney. "If I continue to receive the approbation such as I have received here to-night, I will continue to do direct my public life that you will not regret it as the days go by. Conscience and intelligence are the two main things required in the legislature by those representatives who are elected."

Sir James, therefore, complimented Capt. McCullough on his intention to preserve his individuality if elected, but assured the captain that he would see nothing objectionable done by the government. (Hear, hear.)

Rowell a Sidelighter.
 As Sir James remarked, the new leader of the opposition had issued a remarkable manifesto, endorsing practically three-fourths of the government's program, while on the questions of temperance and bilingualism, he hedged and shuffled and utterly failed to adopt any definite policy.

After referring to Mr. Rowell's statement that the Liberal platform aimed

CONSERVATIVES GAIN IN N.S.

Digby and Lunenburg Captured in Provincial By-elections.

HALIFAX, N. S., Nov. 15.—The Conservatives captured the two seats where by-elections were held in Nova Scotia to-day, for the provincial legislature—Digby and Lunenburg.

In Digby, H. H. Marshall, Conservative, a lumberman, is elected by a majority of about 500 over A. E. Wall, Liberal, who was the candidate in the Dominion election on the Liberal side. In Lunenburg, C. S. Zwicker, Conservative, has a majority of nearly 200 over William Duff, Liberal. The vacancy in Lunenburg was caused by the retirement of Hon. A. K. MacLean, who ran and was elected in Halifax for the federal house.

The opposition in the Nova Scotia legislature will not number 13, the government strength being 25.

CAN GRAHAM COME BACK?

OTTAWA, Nov. 15.—(Special.)—The resignation of T. A. Low, Liberal member for South Renfrew, is said to be in the hands of Sir Wilfrid Laurier, to be forwarded to Speaker Sproule as soon as arrangements for the candidature of Hon. G. P. Graham are completed. The hitch is still the disinclination of the Conservative organization to facilitate the return of the ex-minister.

NOT C. P. R. THIS TIME.
 LONDON, Nov. 15.—(C. A. P.)—The Amsterdam correspondent of The Times telegraphs that proposed new steamship line between Europe and Canada is not financed by the C. P. R., but by Dutch and French bankers, who purchased two ships from the C. P. R.

NORTH LIBERALS PIN HOPE ON OLIVER

Comes Out With Extremely Advanced Platform, Embracing Big Reforms—Has Choice of Either Seat—Labor Men Vainly Suggest a Coalition of Support.

Ex-Mayor Oliver was last evening given the Liberal nomination for North Toronto, and will contest seat A or B, according to his wishes.

The main planks of the candidate are: The abolition of the three-fifths clause, the closing of every bar in the province, the doing away of bilingual schools, single tax, public ownership, the extension of the T. and N. O. Railway to Toronto and on to Windsor and Niagara Falls.

A resolution was passed to the effect that there should be but one constituency in each riding, and in keeping with their views the association nominated only one man.

Several representatives of the Labor party were present and tried in vain to persuade the convention to nominate a man for either riding, in order that they might have a representative in the other. They promised that if the convention would promise the vote of the Liberals in the constituency in which they placed their candidate their adherents would return the compliment in the other riding.

The convention failed to give its promise to support the Labor man and left itself only responsible for its own candidate whom it expects to unseat Hon. J. J. Fay, for that is most likely the seat which Mr. Oliver will fight for.

After thanking the meeting for their hearty support, Mr. Oliver went on to expound his platform. His position on the bilingual school question was that if the parents of scholars wish their children to learn other languages than English they can pay for it, and that it is entirely out of place to teach French or any other language exclusively in any school, as the scholars can not go far miles without feeling handicapped in not having a knowledge of the English language sufficient to carry on an intelligent conversation and transact business.

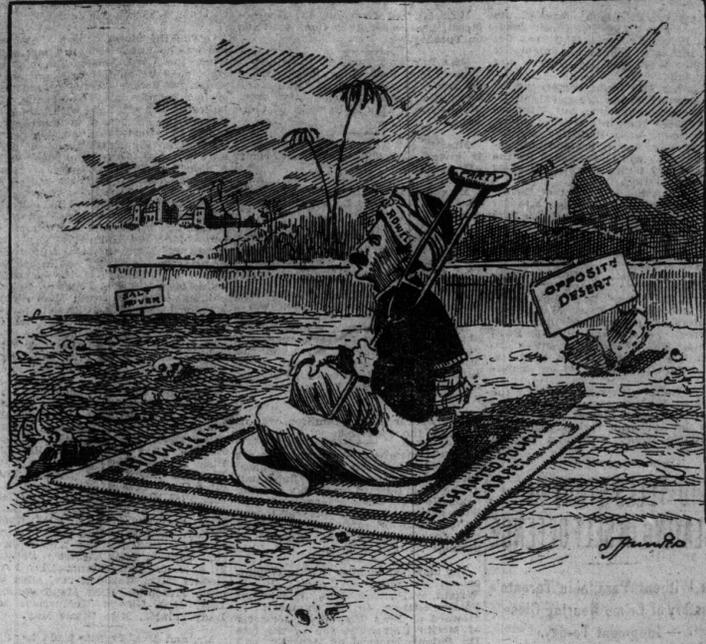

Down With Bars.
 As to the removing of the three-fifths clause and the abolition of the bar, the speaker was inclined to believe that it is better to remove a temptation from a man rather than give him the opportunity to fall into its snare.

Many in the meeting spoke at some length endorsing the stand taken by Mr. Oliver and declared that he is the only man who could wrench the riding of North Toronto from the Conservatives.

A number of protests condemning the action of the Whitney Government, and others in honor of the new Liberal leader were passed. The first was in connection with the Ontario Railway and Municipal Board. It found fault with the board in that it was organized for the protection of the citizens and claimed it has fallen short of its mission. The convention advocated that the Ontario Railway and Municipal Board be reorganized.

Another resolution endorsed the new leader, N. W. Rowell.
 Dr. J. A. Macdonald spoke admirably for the chief of the meeting. He referred to the time when Joseph Oliver was mayor of Toronto, and said that he acted as a wise and learned man, while filling that important civic position, and that having experience in municipal affairs, he should be an excellent candidate for that riding.

HIS ONE HOPE OF GETTING THERE

NEWTON WESLEY BEN ROWELL: We'll give this enchanted carpet game a try out anyway.

UP TO YUAN SHI KAI TO CHOOSE HIS CABINET

To Quiet Rebellious Provinces is First Task—Bloodshed Not Yet Over.

PEKIN, Nov. 16.—1:25 a.m.—Yuan Shi Kai has accepted the premiership and will assume office probably to-day (Thursday). Yesterday's Official Gazette contained an expression of thanks from Yuan Shi Kai to the throne for his appointment, but the truth is that he did not undertake the task before him without receiving guarantees that he would have practically a free hand in conducting affairs while he retained his official position.

The new premier yesterday received several foreign ministers. In conversation with a foreigner, Yuan Shi Kai said that he intended to form a cabinet immediately and endeavor to carry on the government by securing the support of as many provinces as possible, allowing the remainder to retain their independence for the time being. It would be his endeavor also gradually to win back their allegiance to the throne.

Another important development in the capital was the issuance of an edict yesterday ordering Hsiangling, formerly viceroy of Manchuria, to assume command at Jehol, where the summer residence of the emperor is situated, in place of Puting, the Tartar general. This appointment has led to the belief in certain quarters that the court may retire to Jehol, leaving Yuan Shi Kai as chief executive until the opportunity arrives for the court to resume a measure of authority.

Wooing the Provinces.

Australia Fears German Peril.

MELBOURNE, Nov. 15.—(C. A. P.)—Grave concern is felt throughout the commonwealth over the assertion that all overseas vessels subsidized by foreign countries are easily convertible into commerce destroyers in war time. Private advices received in this country state that liners flying the German flag are especially equipped for this contingency, and as a result there is this feeling of apprehension.

A resolution was moved in the federal parliament to the effect that action be taken forthwith to discourage such shipping by trading in Australian waters.

Premier Fisher said: "We must emphatically state that ships other than of nations which come to trade in our waters must not presume too much on our good nature and equip themselves so that they may act."

Boy Murderer to Jail For Life

MAIDSTONE, Vt., Nov. 15.—Without betraying any emotion, Arthur Bean, the 19-year-old boy who confessed last Monday that he murdered his mother, Mrs. George Bean, and his sister, Miss Nina Bean, with a rifle heard himself pronounced guilty of murder in the first degree and sentenced to life imprisonment at hard labor, in the superior court here late to-day.

Judge Fred M. Butler, who presided at the trial, said that the most charitable view he could take of the crime was that the defendant's mind had dwelt upon his loss of property willed to him by his father and had been excited and controlled by passion. "This condition," the judge continued, "was stimulated by intoxicating liquor furnished by his own mother. The evidence was clear beyond question of doubt that a double murder like this must have been premeditated."

Don't Want Pulp On U.S. Free List

Now That Reciprocity Has Received Quietus, Paper Manufacturers Think They Have Real Grievance.

BOSTON, Nov. 15.—Just before adjournment of its meeting here to-day, the Home Market Club went on record as against the free importation of wood pulp and print paper from Canada and the possibility of the extension of this policy to other pulp and paper exporting countries.

The resolution, which was adopted unanimously, was as follows: "Whereas wood pulp and print paper have been placed on the free list so far as Canada is concerned, notwithstanding that the expected concessions on the part of Canada have been denied us, and whereas demands are now being made under the favored nation clause by all paper exporting countries for the same tariff privileges, which have been extended to Canada:

"Be it resolved, that we protest against this unjust treatment of American paper manufacturers, and respectfully petition congress to repeal this legislation."

Secretary Marvin, after the adoption of the resolution, pointed out that in 1906 and 1907, the paper producing countries of Europe, led by Norway, Germany, the Netherlands, Austria, and Great Britain, had a surplus for export amounting to \$337,127,000, or nearly twice as large as the entire paper and wood pulp production of the United States.

BORDEN, LAURIER HAVE OPENING CLASH

It Arose Thru Sir Wilfrid's Naive Suggestion That Speaker Marcell Should Remain in Office—Premier Aroused by Taunts as to Professions of Party Loyalty.

OTTAWA, Nov. 15.—(Special.)—A scrap on the first day. Quite an unexpected and almost unprecedented air of belligerency marked the usually tame and peaceful ceremony of electing a Speaker of the house of commons at the opening session of the 12th parliament to-day.

Hon. R. L. Borden, who, on rising for the first time in his place as premier, was greeted with prolonged and tumultuous cheers and applause, after a short historical review of the functions of the Speakership, an office which, he declared, demanded a man of intellect and experience in the rules and procedure of the house, one who should be in a sense the representative on both sides of the house, a man impartial, courteous, had nominated, seconded by Hon. George E. Foster, Thomas Simpson Sproule (East Grey), as one in whom these very qualities would be found to reside.

Sir Wilfrid Surprised.
 Then came the surprise. Sir Wilfrid Laurier, who was heartily cheered by his followers, rose to remark that while he could take no exception to the appreciation of the merits of Dr. Sproule uttered by Mr. Borden, he was surprised at the selection, not on the qualifications of the hon. member for East Grey, but his surprise arose out of the very set of circumstances under which the present administration had come into power.

The British system, he said, had been to continue the Speaker of the previous house in the chair, and if the government were as devoted to British institutions as they had professed to be, they ought to have elected Mr. Marcell as their candidate. (Laughter.) But British institutions had been relegated to the backyard, to the dust heap of oblivion.

"Loyalty has always served the Tories well as election time," he said, "whereupon applause arose from the government benches, followed by counter applause from the left.

Sproule All Right, But—
 "Dr. Sproule," continued Sir Wilfrid, "is able, painstaking and conscientious, according to his lights, altho his lights are not my lights. The only fault I have to find with him is that he is a Tory, a Tory of the Tories, the very quintessence of Toryism."

He trusted, however, that when Dr. Sproule ascended the three steps that lead to the Speaker's chair he would leave his Toryism on the floor of the house.

"But if I was surprised at the selection," continued Sir Wilfrid, "I was not surprised at the selection of a Tory as Speaker."

Treat for Theatregoers To-night.

A veritable treat may be expected by theatregoers when Ethel Barrymore appears in "The Witness for the Defence," at the Princess Theatre this evening. Aside from the striking merits of the play, it is doubtful if a more perfect balanced company, or one more nearly attaining perfection in its work, has been seen in recent years. The selection of the different players was a matter of special care on the part of Charles Frohman, for the reason that he takes infinite pride in the Ethel Barrymore combination. "The Witness for the Defence," it may safely be said, deserved his care, for it is not only a capital play, but it gives Miss Barrymore a tremendously effective part.

Watch for Imitation Fur.

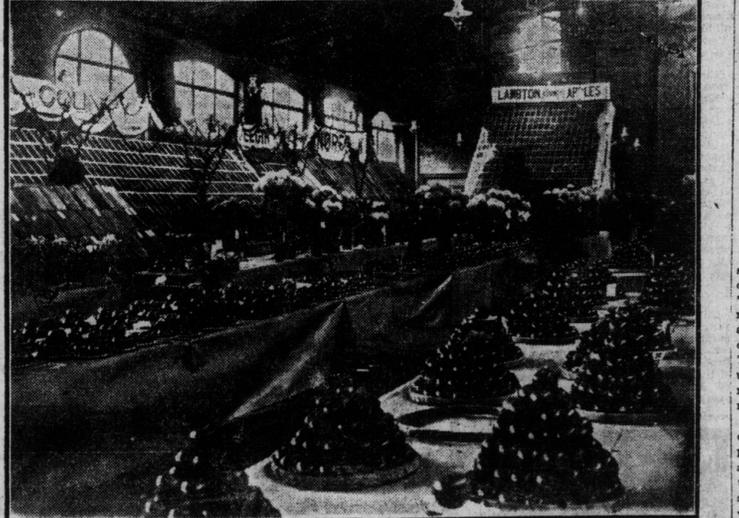

The Canadian fur market has been badly flooded recently with spurious goods, particularly in the shape of muffs, stoles and ties. Most of these furs came from the United States, the German fur itself is very good and which we should state came properly labeled to Canada, but are being sold as real fur now by some unprincipled dealers. The public is warned against purchasing furs from any but reputable merchants. It is easily to be detected with the imitation article, because the fur itself is very good and dense, but the felt is generally so delicate that the garment does not last over a few weeks at the most. The Deane Company take this occasion to advise the public of the danger of purchasing furs beyond the regular dealers, and beg to again call the attention of its customers to the fact that their stock of furs and fur garments now on sale is complete, and exclusive.

Felon Stripes for Those Who Break Anti-Trust Law

Texas Member of Congress, Dissatisfied With Supreme Court Interpretations, Would Substitute "Big Stick" for "Rule of Reason"—Bill Likely to Carry.

WASHINGTON, Nov. 15.—"Felon's stripes" as a punishment for "trust criminals" in the United States to end "commercial piracy under benevolent rules of reason," are proposed in a bill amending the Sherman anti-trust law, drafted by Representative Henry of Texas, to be introduced in the house upon the opening of congress next month. Its introduction probably will mean its passage in the house.

The bill specifically defines just what constitutes a trust, legislates from the present statute the "rule of reason," as interpreted by the supreme court in the Standard Oil and Tobacco decisions, and provides as punishment for violation of the law, imprisonment from two to ten years in the penitentiary. It will be referred to the judiciary committee for deliberation.

MANY EXCELLENT ENTRIES IN AN ANNUAL POULTRY SHOW

Exhibits High in Quality—Sir H. Pellatt and Jos. Russell Win Prizes.

The eighteenth annual show of the Toronto Poultry and Pet Stock Association in St. Andrew's Hall, was declared officially opened last night, by Controller Ward and Ald. Sweeney and McCausland.

Altogether 1260 birds, comprising all of the popular breeds, are on exhibition. They are less in numbers, but of far superior quality than in preceding shows.

On account of a limited space, no water fowl are shown, but adequate accommodations will be furnished for the entire poultry family at the next show of the association.

Joseph Russell was there with his famous white wyandottes, some securing first prizes.

Sir Henry Pellatt is showing high-class birds, while Duran & Shields were "in the money" with their showing of Rhode Island Reds.

Several more motorists appeared before Magistrate Jelfs in police court this morning, each charged with violation of the speed bylaws.

GRIRO TELLS STORY OF SLAYING IN SELF DEFENCE

Case Without Parallel in Toronto's History of Crime Nearing Close - Judgment To-day.

Frank Griro, who is on trial in the criminal session for the murder of Frank Tatro, a companion, last July, was in the witness box from 8.30 yesterday morning until 6 o'clock testifying in his own defence.

With dramatic force the prisoner told a tale absolutely unique in Toronto's history. Pursued by members of the society of the Red Life, he told how he endeavored to extort money from Mafia, and declared that he threatened to denounce him at the police station.

"You got me into the police station, and I know he was going to kill me, so I pulled out my revolver and shot him."

Mr. Griro testified that he had been warned against going to 150 York street, and the address of the shop of Napoli and secured a second revolver.

Here is a New Kind of COFFEE

And We Give You A Pot To Make It In—Free. To get to the heart of the coffee question, you must do as we did—get to the heart of the coffee berry. The coffee berry is protected by a tough inner shell or coat. This shell is indigestible and other ill-effects so common with coffee drinkers. Yet there is no other beverage in the world so thoroughly wholesome and healthful as good coffee when properly made.

Dalton's French Drip Coffee

is this good, wholesome, delicious coffee. It contains no chicory and by our special process of grinding, every particle of the bitter tannin, which is the cause of indigestion, is removed. We take out all the injurious parts. We leave the meat—the heart—the flavor—the aromatic essences that mean so much to coffee-lovers. The Perculator, or French Drip Process, is the only way to make really good coffee. We have secured sole rights for a practical, economical, reliable French Drip Coffee. We will give it to you free so that you can try Dalton's French Drip Coffee as it should be made. Read our offer. We have put up Dalton's French Drip Coffee in two Blends DALTON BROS. Sold in 25c. and 50c. tins. If by any chance, your grocer is unable to fill your order, write us and we will see that you are supplied promptly.

Just an Imitation. Sir James referred to Mr. Rowell's remarkable manifesto, three-quarters of which was devoted to a denunciation of the government program issued a few days ago.

Mr. King since September last has been going around looking for a rest for the sake of his fort, and found none; hence he attacks the appointment of a chief justice.

WONDERFUL CASE

Three Months in Hospital and Came Out Uncured. Zam-Buk Cured Him in a Few Weeks.

Mr. Fred Mason, the well-known publisher and mattress manufacturer of St. Andrews, N.B., says: "I had eczema on my knee, which caused me terrible pain and inconvenience. The sure parts would itch and burn and tingle, and then when rubbed or scratched, would become very painful. When the knee got worse, and the itching and burning became more and more unbearable, I tried various remedies, but got no relief, so I decided to go to Montreal and get special treatment. I received treatment at the Montreal Hospital for thirteen weeks, but at the end of that time I was not cured, and almost gave up. A friend advised me to give Zam-Buk a trial.

PLUDGE REDEEMED

"To conduct the movement in the country in a business way," said Sir James, "that is the plain and simple way of describing what the government of Ontario has tried to do, and will continue to do. Before we came to power, the government was an incapable of conducting the government of the country, but what has been done since we have taken office is to conduct it in a business way."

SOUND FINANCING

"The need of the provincial university have also been attended to, \$488,000 having been granted to that institution. The sum of \$385,000 has been spent during the year on the construction of roads, and since the present government came into power the finances of the province have been put on a sound and stable footing. The revenue of the province has increased in three and one-half years, and there has been no scandal in all these years that the government has been in power."

SCORES MACKENZIE KING

"We have made arrangements for a law for compensation for workmen, and Sir William Meredith, the commissioner, is gathering all the necessary information. The passing of this law is slow, but necessarily so, because it is desirable to get a somewhat uniform law all over the Dominion in the different provinces of the Dominion."

ORDERS WERE "BUCKETED"

NEW YORK, Nov. 15.—Testimony to show that E. H. Scheffels & Co., not only failed to fill customers' orders by actual purchases of stock, but charged commissions on transactions that had never taken place, was piled up today at the trial of George Graham Rice, E. H. Scheffels and others, for alleged bucketshop swindling.

NEW YORK'S FILTHY BAKERIES

NEW YORK, Nov. 15.—Filthy bakeries, unsanitary public laundries and the fresh air problem in manufacturing plants were matters which were discussed at or discussed at today's session of the state factory investigation commission.

The passing of this law is slow, but necessarily so, because it is desirable to get a somewhat uniform law all over the Dominion in the different provinces of the Dominion."

SIR WILFRID AND THE NATIONALISTS

Sir Wilfrid Laurier gave the keynote of the immediate house policy of the opposition yesterday. It was that of soundness and of curbing criticism and an intimation of fighting all along the line hereafter. Sir Wilfrid showed in these remarks the proposal of Mr. Borden to make Dr. Sproule Speaker of the commons that he was especially sore on the Nationalists who had attacked him in his native province, that he was sore on the loss of power and that he intended to vent himself on the victors. He may be sore also on some of his own friends, who led him into a policy that worked his ruin.

He experienced all this when he carpaled at Dr. Sproule and jibed at Mr. Monk and the Quebec Nationalists who were supporting Mr. Borden's nominee. Mr. Borden in considerable heat came back at Sir Wilfrid by charging him with bad temper and with proposing in opposition what he had neglected to carry out in office. Moreover, said Mr. Borden, he feared to put his position to the test by dividing the house.

At this the government side cheered and the effective thrusts that their leader had given the old chief. The government scored on the first encounter, the new leader of the house against the old one. But the real thing that came out, and it is coming out in other directions, is that Nationalism in Quebec meant, more than anything else, a movement to help Sir Wilfrid out of power. That has been accomplished, and Nationalism is not now a live issue in federal politics, and Sir Wilfrid's remarks yesterday in this direction went to show that he is after the Nationalists for their war on him. The result will be that the Nationalists will be conservatives for purposes of defence and Nationalists to keep Laurier from getting back. They will concern themselves less about fiscal matters; they will rally to fight Sir Wilfrid, who has put on his war paint to scalp them if he can.

PALAUER OR POLITICS

There has probably never been a finer political meeting gathered together in Ontario than the great Massey Hall meeting on Tuesday evening, when Mr. W. Rowell, K.C., told the Liberal party what he proposed to do on assuming the leadership. Certainly not since the Liberal convention in 1904 has the party done anything so impressive, and on Tuesday night there was an attitude of expectation and hope which might be illustrated by Bunyan's hero after his burden had fallen into the pit. But after Mr. Rowell had spoken for some time it became clear that he had a bit in his mouth, and the reins were being manipulated. There is no more being manipulated. There is no more being manipulated. There is no more being manipulated.

Those responsible for the issue of the memorial, after referring to the numerous instances of successful co-partnership between capital and labor, remark that "it has been well said that nothing is settled which is not settled right, and we are convinced that the wage system alone is not capable of removing the deeper causes of the labor unrest which prevail. We know," they continue, "that no mere change of machinery can be a substitute for a right spirit, the right machinery and a right spirit act and react to perfect one another. But our practical experience of co-partnership emboldens us to call upon the great employers and trusted leaders of labor and the general body of men and women of good intent to consider whether co-partnership be not at least a great part of the solution of the industrial problems which have of late so forced themselves upon our attention." Only a few days ago it was announced that Lord Grey, Canada's late governor-general, had decided to devote his efforts to the promotion of co-partnership as the most effective method of restoring harmony in the industrial field. And the labor leaders who have been inclined to look askance on the principle should seriously consider whether it does not provide a practical and immediately possible way of securing that measure of co-operation required for industrial efficiency and stability.

CIVIC LIGHTING

A Toronto man who is an authority on lighting writes The World re the new civic system as follows: "The new system of lighting the streets of the city, while effective and

Rowell's statement, instead of the beginning. This may be regarded as a small matter, but it is characteristic of the subtle way in which the public are constantly misled. Unless Sir James Whitney changes his ground there is nothing to choose between the parties on the bilingual question.

On the temperance question the secretary of the Dominion Alliance has already spoken. Mr. Spence thinks the Liberal party would seem to be guided by the same sinister counsels which have brought it to defeat and disgrace in the past, rather than by the well-known personal inclinations of the new leader. And Mr. Spence points out that when Mr. Rowell denounced the Whitney government as responsible for the existence of 421 bars which would have been closed but for the three-fifths requirements, it would have been in order for some one to have loaded on the Liberal party the responsibility of the whole 1875 licensed places which Sir George Ross and his predecessors refused to suppress.

But Mr. Rowell had one plank on which everybody is unanimous. This is the re-constitution of the Ontario Railway and Municipal Board. It remains to be seen whether Mr. Rowell will be the Paris to reach the vulnerable heel which Sir James, the doughy Achilles, appears anxious to conceal.

COPARTNERSHIP OF INDUSTRY

British public opinion is no longer inclined to accept without question the dictum of the Manchester school of political economists, that labor is a commodity subject to what they termed the law of supply and demand. That fallacious assertion with its corollary of laissez faire—that there should be no interference with the freedom of the individual worker—whether man or woman, boy or girl—was mainly responsible for the terrible labor conditions that resulted in the Factory Acts and other remedial measures, bitterly opposed as these were by the early free traders. The persistence of the notion that labor is a commodity to be bought at the lowest price, led directly to the fierce antagonism created between the employer and the employed, to the strikes and lockouts that have so injured and hampered industrial progress, to the growth and diffusion of the cult of Socialism. Now it is being clearly seen that while that notion persists the problem of reconciling the present conflicting interests of capital and labor cannot be solved except by methods that increase the public burden, and only postpone the final day of reckoning.

So British students of political and social movements are turning to the principle of co-partnership as offering the best hope of reconciling the two indispensable means of modern progress. As it has been well remarked, the true question is not one of wages, but of equitable distribution of profit between the providers of capital, the higher executive and the manual worker. A recent memorial issued in London by a representative body of public men says: "Can we be satisfied, men are asking, with a system which divides those engaged in the necessary work of producing wealth into two armies, usually in a state of armed neutrality toward one another, but ever and anon breaking out into violent hostilities? Is there no better way which, without robbing any man or enslaving any man, will unite their interests and their efforts? We think not. To point out that the co-partnership of labor with capital is capable of indefinite modification to fit the needs of varying industries. The worker, it urges, should receive more than the standard wages of his trade and should be encouraged in becoming a partner in the business of which he is a necessary part.

Those responsible for the issue of the memorial, after referring to the numerous instances of successful co-partnership between capital and labor, remark that "it has been well said that nothing is settled which is not settled right, and we are convinced that the wage system alone is not capable of removing the deeper causes of the labor unrest which prevail. We know," they continue, "that no mere change of machinery can be a substitute for a right spirit, the right machinery and a right spirit act and react to perfect one another. But our practical experience of co-partnership emboldens us to call upon the great employers and trusted leaders of labor and the general body of men and women of good intent to consider whether co-partnership be not at least a great part of the solution of the industrial problems which have of late so forced themselves upon our attention." Only a few days ago it was announced that Lord Grey, Canada's late governor-general, had decided to devote his efforts to the promotion of co-partnership as the most effective method of restoring harmony in the industrial field. And the labor leaders who have been inclined to look askance on the principle should seriously consider whether it does not provide a practical and immediately possible way of securing that measure of co-operation required for industrial efficiency and stability.

WHERE SNEEZING IS PERILOUS

Sneezing is one of the greatest perils that confront aeronauts, declares Harry G. F. Putnam, the American aviator, who is creating new United States records for long distance flights. "On my flight over Cleveland, Ohio," says Mr. Putnam, "a small insect flew into my eye, and the sneezing convulsion coming on and fought against it. Realizing that a sneeze was inevitable, I braced myself so that I would not lose possession of my senses even for an instant. It was the first time I ever had to sneeze while in the air, and it immediately dawned on me that more than one aviator probably owed his death to a sneeze—the spasmodic jerking of the head, the brief loss of sense direction, and the possibility of a jerk of a lever which made a jerry job of balance impossible. Believe me, I never again want to sneeze while flying. It is one of the most serious perils of aviation."

even brilliant in certain districts, is not as a whole satisfactory. A drive thru the side streets at night gives one the impression that something is lacking and that the lighting is dim, and that the whole effect, while pleasing in artistic is not quite what the citizens want. I suggest two remedies: firstly, that the globes of the lights be replaced by others of plain glass, so as to reduce the absorption which must be at least 20 or 30 per cent; and, secondly, that the intersections of streets be better illuminated, either by more lights placed at the corners, or still better, by some system of overhead lights.

WEIGHT OF BRAINS

Editor World: Would esteem it a favor if you will publish in Thursday morning's World the weight of a man's and woman's brain (average), to settle an argument. S. Taylor.

A NEW INDUSTRY

The average male brain weighs 46 1/2 ounces; the average female 43 ounces. Male brains range from 46 to 58 ounces, female from 41 to 47 ounces. Caver's brain weighed 64 ounces; Dr. Abercromby's 63 ounces. But quality, not quantity, counts.

Large American Factory Located in Toronto

Among the new companies receiving an Ontario charter recently is the Canadian Hanson & VanWinkle Company, Limited, with \$100,000 capital, who will locate a factory here; they at present operate large factories in both New York and Chicago. Mr. Rupert G. Bruce will be in charge of the local organization as general manager. The Canadian Hanson & VanWinkle Company, Limited, has recently purchased the business of the R. G. Bruce Company, Limited, who have been operating a factory here for the past two years, at 114 Jarvis-st. The Canadian Hanson & VanWinkle Company has purchased a block of land situated on Morrow-ave. The Canadian Pacific Railway are having a siding extended into this property, on which the new company is erecting numerous factory buildings, among them a splendidly equipped mill, the first to be erected in Canada, which will produce all kinds of nickel castings for the nickel plating trade. There is also being erected an order-alloying factory building which will be mill constructed and fire proof throughout. The factory will be equipped with dynamo, which have come into such prominence through America, together with full line of their patent electrical apparatus.

COTTON WEAVING INDUSTRY IN INDIA

The City of Calicut, on the Malabar coast, which with Surat, was an ancient cotton center, has a name to the variety of fabric known as "Dacca." Some qualities of this were so fine that it is said, that one could hardly feel them in the hand, and the weaver, when spun, was scarcely discernible. Dacca, once of most important city in the north-east of India, sent out from its looms a certain quantity of those wonderful tissues of fine muslins made from a staple too short to be woven by hand machinery.

Even after the advent of the British in India there is recorded an instance of a piece of muslin twenty yards long and one-quarter yard wide weighing only fourteen ounces, says Harper's Weekly. With the rudest almost impalpable threads, and woven fabrics that for fineness of quality have never been successfully imitated elsewhere. In the decay of the native Hindu courts, the chief customers of the demand ceased and the manufacture was for the most part stopped. Dacca today is little more than a ruin. But the art survives, and the Government, by the native weavers throughout India. Of course, there are a number of hand-shuttle looms in successful use in certain localities, but these are not favored by the natives.

MOTOR SHOW IN ARMORIES

Event Will Take on Military Arm-Motor Trucks a Feature.

E. M. Wilcox, manager of the coming automobile show in Toronto, Feb. 21 to 23, has been notified that the official sanction for use of the armories has been granted by the militia department for the use of the armories.

Since the announcement of the show, a great interest has been shown by exhibitors and indications are that the show will probably be the largest ever held in this city. This applies particularly to firms showing automobiles, including Canadian manufacturers.

In the same way as the horse show has its military aspect from the cavalry standpoint, the automobile show will have its military features, particularly from the transport end. During the past year there has been an important development in the use of motor cars for military purposes, especially in European countries.

The militia department in Ottawa also is actively interested in motor transports, and conducted experiments with motor trucks during the past year.

\$1000 for Slender. PEMERROKE, Nov. 15.—R. Rudd of Armprior was awarded \$1000 and costs in his libel action against W. A. Cameron, M.D., of Armprior, in the assizes before Judge Britton this afternoon. G. T. Blackstock, K.C., Toronto, appeared for the plaintiff, and Stafford Dudgeon, Armprior, for the defendant. The action was for \$10,000 and alleged the circulation of injurious statements by the defendant.

How Toronto Piano Firm Set Out to Overcome a Prejudice and Succeeded

Worked Out an Idea and a Conviction, and the Instrument That Conscientious and Earnest Endeavor Produced Made Good on its Merits.

THE GREAT SUCCESS OF THE GOURLAY PIANO

Looking backwards, the success of the piano that is high-priced, but worth the price, seems the most natural thing in the world. The average man, wise in his generation, is apt to say, "Naturally they succeeded. They had knowledge and experience. Why shouldn't they succeed?"

But nine years ago the Gourlay Piano firm was a mere idea in the mind and imagination of the firm who made it. At that time the reputation of Gourlay, Winter & Leeming to equal the world's best was not held by the trade with certain broad reservations. They sized up the situation like this: "Make a piano equal to the best in the world, and we will sell it. But it is one thing to sell a picture and quite another to paint it." They admitted the fact that the firm had capabilities as salesmen, but as piano makers—never!

Forty-one years ago Mr. Robert S. Gourlay had his first taste of competition. He applied for a position as book-keeper in answer to a "want ad." in the Toronto paper. It speaks well for the ability of the firm that in these early days 63 others went running for the same position. They were disappointed, however, and Mr. Gourlay made his debut in the piano business.

This was in 1870. The manufacture of pianos in Canada in that time employed about a dozen men and as much capital as the making of say artificial flowers, does now. Their combined efforts resulted in a "A Yearly Output" of something over 200 instruments of a quality which we will call "fair" in order to let our honors rest upon us as down as gently as possible. But in those days the manufacture of pianos in Canada meant practically the assembling of imported parts.

A peculiar feature of the piano business in Canada at that time was that an instrument could be purchased in New York for American paper currency, 15 per cent "greenbacks" brought here, 15 per cent Canadian duty added, and in the United States or England gold, and could be sold here for less than its cost. This was during the American Civil War, when gold was scarce, and "greenbacks" but the promise to pay of a government whose credit was not at all.

Well, as stipulated in the advertisement, Mr. Gourlay's many years as a book-keeper, but by reason of circumstances he was rather a piano salesman who kept books, and also, by the way, made frequent excursions out on the road, punctuated by quick dashes back to the office to straighten out said books.

Mr. Gourlay's father was a Scotsman, who had a furniture manufacturing plant in Toronto. He had old-fashioned ideas on the value of practical knowledge, and his son, in conformity therewith, must spend two years "at the bench." He must know not only that furniture was made of oak or walnut or mahogany and glass, but how it was made. This training and the working knowledge he gained was invaluable to him when in the fall of '73 he was made a partner in the firm that he joined as a humble bookkeeper.

In '81 the firm received notification from a schoolmaster in Waterloo County that he had a piano for sale, and that he would sell it for \$100. Mr. Gourlay was right, the schoolmaster was to be sold the piano, and what is more to the point, he was to be sold for \$100. The demand for Gourlay Pianos is every year increasing, and the result of their merit, artistic, mechanical, and intrinsic.

Some time ago when Mr. Gourlay was speaking at a convention of the National Association of Piano Manufacturers in Detroit, he was afterwards approached by a gentleman, who is president of a prominent piano-making firm in the United States. "That was a good speech, Mr. Gourlay," he said. "It is a man who can make as good a piano as any man in the world, and my brother and I am free to say I never saw or touched a better instrument."

It may be a broad-sounding statement, but there is no better way known to make a piano than the Gourlay way. One does not buy a piano often. To find a piano deprecating is like losing faith in a friend.

It is for people that appreciate this that the Gourlay built, those who temper their piano with business and true economy and select a piano for its tone. "Artistic Value and stability. A Gourlay piano, if mahogany, is all mahogany; if walnut, all walnut. If something in strength and consistent quality of tone is to be gained by a change of piano-making material, it is done. The added time, trouble or expense is not considered.

Yes, they sold pianos. The new firm was a success. The unique service they gave gained sales for them every day. Then things took a turn which at that time looked very much like a misfortune. Disappointment in a mild form reared its head between the new firm and some of those makers whose pianos they sold.

Things were in this shape when one day Mr. John E. Hoare dropped out. He was a piano builder. He knew a piano as you know the top of your desk, or the top of your sewing table, and the case may be, he was a man that he was about to make pianos on his own account—better pianos than had ever been made in Canada. To make a short story short, he joined the embryonic firm of piano MANUFACTURERS as Manufacturing Partner. You will find that down in the new factory to-day doing sentry duty so to speak, and the piano that gets past him to the shipping room must have the post-word "Gourlay" stamped on it. He was nine years ago that Gourlay, Winter and Leeming commenced to make pianos which would accomplish two things: first, overcome a widespread misfortune. Disappointment in a mild form reared its head between the new firm and some of those makers whose pianos they sold.

They had the knowledge and experience, the conviction and a taste, and the courage thereof. They know every make of Canadian and foreign piano. Naturally, their weak and strong points. They started to manufacture where others left off. They did not set out to build a piano to sell at a certain price, but used the reverse idea—that they built a piano, then set the price. A lifetime of association with the highest efforts of the piano maker's art, and the result was a piano that with another, had outlasted them with high ambitions.

Now let's see if they have "made good." Nine years ago in an old factory building in King-street, Toronto, Gourlay, Winter and Leeming started seriously and earnestly to embody the piano maker's ideal of a "high-priced piano that would be worth the price."

By and by they overtook into some adjacent buildings, which were recently bore the inscription in letters four feet tall, "The Gourlay Piano, high-priced, but worth the price." Mr. Gourlay tells us that he never saw a "Pardonable Satisfaction," how some, more interested in his defeat than success, viewed this sign with satisfaction, judging it to be a suicidal admission.

However, by dint of much inconvenience to workmen and considerable ingenuity of management, the output of this insufficient factory together with additional buildings scattered about town, was brought up to nearly 1000 instruments a year. Then the inevitable happened.

In the east-end of Toronto, on Logan-street, a new factory, it has been occupied now for over a year, it stands four square, and the windows are so wide and deep that 150 workmen can sit at the light and sunshine that ever a man could need. The mechanical part of piano making, while, of course, highly important, is not the heart of the matter. It is this that is meant that the spirit and interest of the piano maker, the moral and social reform was advocated. The Rowell platform did not go far enough along these lines and Sir James Whitney was standing still. Evidence was the fact that 42 municipalities had come under local prohibition as against 380 still "wet." The abolition of race-track gambling was urged.

MGR. CANALI NOT CHOSEN

Appointment of Apostolic Delegate to Washington Deferred. ROME, Nov. 15.—Mgr. Canali, under secretary of state at the Vatican, will not be appointed apostolic delegate to Washington to succeed Mgr. Folonico, as has been reported. It was positively asserted at the Vatican to-day that Mgr. Canali would not be transferred to Washington in the present position, nor did the papal secretary of state, Cardinal Merry del Val, wish him to abandon the office of the home of the accident. It is likely that the appointment of the new apostolic delegate will be delayed until the consistory, which committee will come before the papal secretary. Among the candidates mentioned for the office, Mgr. Agius, apostolic delegate to Manila, is most favored.

The pope has decided to create Archbishop Farley cardinal under the title of the Church of Santa Maria sopra Minerva, the title held by the late Cardinal McCloskey, the first American cardinal. Archbishop O'Connor will be assigned to the titular church of St. Callistus, attached to the Benedictine monastery of that name.

Engineer Caused Fatal Wreck

NEW BRUNSWICK, N.J., Nov. 15.—A coroner's jury has rendered a verdict against the engineer who caused the fatal wreck in the Bell County, in which Fireman Bishop and Brakeman Egan were killed last week. The finding places the blame of the accident on the engineer, who was driving the engine at high speed. Carr has jumped the company.

Overseas Club Meets

Stalls Fought; Gets Six Months

Ernest Cluhne, caught in the street with a bag of provisions stolen from Dallmore Brothers' grocery store, which he said he stole because he was hungry, was sent to the Central Prison for six months from police court yesterday.

Factory Site Sold

The sale was closed yesterday of a factory site, 132 by 900 feet, on Eastern-avenue, near Pape-Avenue, to W. B. Levey for \$18,000. R. A. J. McMullin were the brokers negotiating the deal. The factory will be used for tannery purposes. Work on the buildings was formerly owned by the Denovan estate.

Favors Railless Trolleys

City Engineer Rust said yesterday that he believed that railless trolley cars could be run on the streets of Toronto without interfering with the franchise of the present railway system. The railless trolleys were not railroads, he declared. Mr. Rust has considerable faith in the system. They are run successfully in Leeds, Eng.

TORONTO CHAUFFEURS PLAN ORGANIZATION

Will Hold Examinations to Test Ability of Those Who Wish to Drive.

The Toronto chauffeurs took a definite step forward when they announced last Tuesday their intention of organizing to protect the public and themselves against the reckless and incompetent motor driver.

The association will be known as the Toronto Chauffeurs' Protective Association, and its object will be the maintenance of a high standard of efficiency amongst professional drivers. An expert will be employed to examine those desiring membership in the association. He will test them as to their ability to drive and keep a car in proper condition, and the applicant makes a satisfactory pass, a card will be issued to him. Thus, any owner engaging a driver who holds the certificate of the association will be getting a competent and a careful man. A strict watch will be kept for joy riders, and those proven guilty of taking out his employer's car without permission, and will be expelled from the association, and depend of his card.

It is the intention later to try and induce the provincial government to back the association by compelling every professional and possibly every amateur driver to pass a proper examination before they are allowed to drive in Ontario.

The promoters of the association said that the association will be a union, or to put it vaguely, it is probable, however, that a sick benefit fund will be organized. The association is employed to look after the interests of members of the association.

This is a movement which should receive the hearty support of every chauffeur, every car owner, and every automobile driver, and the public in general. It will mean better men, better driving, and above all, will make for the increased safety of all road users.

A mass meeting for the purpose of organization will take place in Victoria Hall to-night, with Mr. J. W. Leeming in the chair. The meeting is public and anyone interested is invited to attend.

SONS OF TEMPERANCE

Neither Whitney Nor Rowell Sufficiently Progressive, Say Meeting.

The 62nd annual meeting of the Ontario Sons of Temperance was held in the Temple Building yesterday, when T. N. Willmot, grand worthy patriarch, of Orillia, in the chair. An increase of interest in all kinds of moral and social reform was advocated. The Rowell platform did not go far enough along these lines and Sir James Whitney was standing still. Evidence was the fact that 42 municipalities had come under local prohibition as against 380 still "wet." The abolition of race-track gambling was urged.

In his opening address the president of the Canadian Independent Telephone Association, Dr. W. Doan, said yesterday morning that "the best method to cure a monopoly like the Bell Telephone Co. was to promote competition."

In the afternoon a resolution asking the government to take over long-distance lines was passed. The occasion was the sixth annual convention of the association. It was held in the city hall.

RESTRAINTS ON BRITISH TRADE

LONDON, Nov. 15.—(C. A. P.)—A curious restriction imposed by the U. S. A. upon British trade in Canada was mentioned in the Birmingham Chamber of Commerce yesterday, when a member complained that, upon attempting to do business with the Dominion, he had been requested to send samples to Chicago laboratories with a preliminary fee of \$20. Other similar complaints had been received, and the chamber referred the matter to the board of trade.

TWO YEARS FOR BANK ROBBER

PORT ARTHUR, Ont., Nov. 15.—A R. Fanning, ex-bank clerk of Port William, who pleaded guilty of robbing the Royal Bank of \$330, Oct. 22, was sentenced to two years in Stony Mountain penitentiary by Judge O'Leary, who at the same time made some caustic comment about the conductor at the Central Prison, Toronto, as a place to send youths for whom there was hope that they might reform.

My Corns Don't Hurt A Bit

Tired, Ailing, Swollen, Smelly, Sweaty Feet, Corns, Callouses, and Bunions, TIZ Cures Right Off.

Say good-bye to your corns the very first time you use TIZ. You will never know you have a corn, bunion or callous, or sweaty, tired, swollen, aching feet any more. It's just wonderful the way the pain vanishes. Rub the corn-killer on the sore place, and you'll feel better in no more than a few minutes. If it has never been a blemish on your feet, doesn't that sound good to you? Don't miss it! Then read this:

"The corns on either of my toes were as large as the tablets you make to cure them. To-day there is no sign of corns on either foot, and no soreness. It's an up-to-date 'Good-bye'—Sam A. Hoover, Progress, N.C."

Just use TIZ. It's not like anything else for the purpose you ever heard of. It's the only foot remedy ever made which acts on the principle of drawing out the poisonous exudations which cause sore feet. Powders and other remedies merely clog up the pores. TIZ cleans them out and keeps them clean. It works right off. You will feel better the very first time it's used. Use it a week and you can forget you ever had sore feet. There's nothing on earth that can compare with it. TIZ is made only by Walter Luther Dodge & Co., Windsor, Ont., and is for sale at all drugstores—25c per box.

Dr. Doan said further that there were 240 independent companies in Ontario at present. Of those about 100 had been incorporated.

H. O. Garble, K.C., spoke on the agreement proposed by the Bell Company for connections with independent telephone lines. The delegates did not agree with those terms on the ground that it was too favorable to the Bell Company and charges proposed were too high.

The legislation committee met late and recommended that the agreement be approved, which will be done.

The Popularity of the Grand Trunk Route to Montreal

is due to the perfect roadbed (laid with 100-pound steel rails), the excellent equipment (the finest obtainable), the scenic route (along the shores of Lake Ontario and River St. Lawrence); moreover, it is the only double track line. PLAINS AROUND EDMONTON DOTTED WITH FACTORIES

Candidate for Mayor of Western City Tells of Industrial Progress — Kennedy Sells Factory Site.

Just back from his second trip to the west within a month, H. C. Kennedy, interviewed by a World representative, yesterday, spoke glowingly of the way Edmonton, which he regards as the best city on the prairies, is growing industrially.

"North Edmonton is becoming one of the greatest factory districts in Canada," said Mr. Kennedy. "Already millions of dollars have been expended by big firms in establishing extensive plants there. American concerns are negotiating for locations in the vicinity, and while away this last time, closed a deal with a large industrial firm for 50 lots in Industrial Heights, a new factory district in the City of Edmonton."

"Another man who spoke to The World in convincing optimistic terms of Edmonton's growth industrially, is W. J. Magrath. He is staying at the Queen's for a few days, and is in the city to see Mr. Magrath has announced his intention of running for mayor of Edmonton next year. He will run on a most progressive platform, and has several advanced civic measures. Commission form of government is one of his planks.

He is here to look into the operation of civic utilities and enterprises, with a view to adding to Edmonton's progressiveness along those lines.

Mr. Magrath has every confidence in the present high property of his home city being continued for many years. Edmonton, he stated, is jumping ahead in the proverbial leaps and bounds, but the growth, while fast, is solid and safe.

The increase of the number of factories in Alberta's capital city, Mr. Magrath declared was one of the big features of the west.

SALVATION ARMY CHANGES

Many Staff Officers Shifted in Canadian Duties.

The following is the complete list of staff changes announced by the Salvation Army:

Transparent Butterfly of the Jungle

William Beebe of the New York Zoological Park, in his book "Our Search for a Wilderness," describes his first sight of the transparent butterfly—Insecta ptera-of British Guiana, an insect whose outstretched wings any substance on which it rested can be clearly seen.

As we crossed a swirling creek on the trunk of a mighty fallen tree, says the writer, something fluttered ahead. We could not see what it was. Closer we came and still the object remained indistinct. We seemed to see a butterfly, and yet that appeared impossible. At last we marked it down on a fern frond and crept up until our eyes were within two feet of it. Nothing was visible but the graceful lacework of the frond, until a slanting beam of sunlight struck it, and there, close before us, was the ghost of a butterfly.

It spread fully three inches, but was wholly transparent, save for three tiny spots of azure near the margin of each hind wing.

As we looked it drifted to a double-

"Chinamen."

On the subject of surprising modern words it is notable that the Oxford Dictionary finds no earlier instance of "Chinamen." In the sense of a native of China, that word was used by Emerson in 1854. The previous word was "Chinese," from which the plural "Chineses" was formed by Milton and his contemporaries, and by usage before 1854. The Oxford Dictionary gives three instances of it from London directories of 1773, 1781 and 1829, but does not notice that in 1783 one "Crowther," "Chinamen" was gazetted as a bankrupt. "Chinamen" in a similar sense goes back to Ben Johnson—London Chronicle.

Mining Market in Fine Fettle Prices Continue on Up-Grade Porcupine Issues Definitly Strong Under Broad Speculative Demand—Several Sharp Advances Shown.

World Oms, Wednesday Evening, Nov. 15. Porcupine stocks continued in fine fettle in the mining exchanges to-day, further sharp advances in prices being shown practically throughout the whole list under the strenuous buying demand which was again in evidence.

Trading was more active than for some time, the day's transactions being of a substantial nature and well distributed throughout the list. The outside speculative movement showed definite indications of broadening, and as stocks were in somewhat scant supply except at advanced prices, the buying was kept about in a purely natural manner.

Big Issues on Rampage. The big issues showed up in better shape to-day, sharp advances in Dome and Hollinger serving to keep the whole market in a cheerful mood. The former stock, which has assumed the front rank in the higher priced Porcupines, was decidedly strong, advancing \$2 a share to \$7.50 and being in better call than at any time during the week.

Market Boiling Over. The cheaper issues were decidedly buoyant, and trading at times was of a feverish nature. Advances of two to three points were general throughout the list, and the gains were held right up to the close, the bid prices at the last call being practically at the top for the session.

Crown Chartered was one of the prominent features. These shares were badly wanted, and under a sustained buying demand rose to a new high for the movement at 32.14, an advance of over two points. They were bid for at the close.

Vipond continued on the up-grade, and a further bulge of two points was piled on top of the advance of yesterday. The high for the day was 23.25 and the gain was held right to the close.

Dome Extension came in for more activity than in a long time, with the demand over two points to 77 before the property continued of a highly favorable nature, and sentiment in the shares is more bullish than for some weeks.

Other strong spots were Foley-O'Brien, which sold off early, but made up all its loss in the afternoon; Preston, which gained a fraction at 23.4; East Lake and Porcupine Central. The latter issue was up to the four-dollar mark again.

The Cobalts were quiet in the extreme and showed no inclination to break away from their chronic dullness.

PRICE REDUCED ONE shipment of overcoats was delayed so that we could not show it earlier in the season. It just passed the customs—on the 9th inst.—and to press the sale rapidly we have

CUT \$6.00 OFF THE PRICE. These overcoats should sell for \$36. Prompt buyers are privileged to take their choice of these at \$30. Brodericks Limited 113 WEST KING ST.

RAPID PROGRESS MADE AT DOME EXTENSION Shaft Will Reach 185 Foot Level This Week—Another Important Discovery.

SOUTH PORCUPINE, Nov. 15.—Since the completion of the buildings on the Dome Extension additional forces of men have been taken on and this property is the scene of great activity.

The buildings are of brick, steel and cement and afford very comfortable quarters for the men. The work of developing the property will now go ahead with a greater energy than ever.

It is considered that an enormous tonnage of milling ore will soon be blockaded in the triangle composed of the Anchor vein running east and west, the Little Dome in the east and the Little Dome in the west.

From the main shaft, now nearing the 200 foot level, cross-cuts will be run to the east and west, and the Anchor vein and the Little Dome vein to the north and south to cut the Anchor vein and the Little Dome vein.

Extensive Ore Bodies Highly Promising Developments at American Goldfields Property. A careful study and survey of the works on the properties of the American Goldfields Co. has been made by the engineer in charge and other prominent engineers from New York City.

This company up to date has been saying little and doing much, as is proven by the large amount of development, buildings, plant, etc. and the number of prominent veins opened on the property.

NORTHERN DELORO SHOWING UP WELL Aggressive Winter Campaign is Under Way—Development Work on Several Properties.

PORCUPINE, Nov. 14.—(From Car Man Up North.)—One dollar now, with the railway line running into Southern Tiedale, does more development work than two dollars did at this time last year.

Work on the Maiden-McDonald properties was started a month ago. Cleaning up the lands and washing the rock exposures for a better view in sampling occupies the attention at present.

Near the Maiden-McDonald are the Sam Doble holdings, where activity reigns. Doble is working on the McKay lot to the west of the Imperial Mines, a holding recently purchased.

Recent purchases by a Boston syndicate are also under development. A. S. Fuller, broker, took over several lots in northern Deloro last summer and just now the fall and winter work is on.

Developments in the Porcupine Camp are getting ahead of this market. I strongly advise the purchase of Dome, Hollinger, Dome Extension and Vipond. I look for a steady rise in all of these stocks.

Wall Street Sentiment Continues Depressed - Market Lower

Staying Power to Market and Further Declines Result

Wall St. Situation Weakened by Recent Depressions—No Evidence of Consistent Support—Toronto Market Weak

NEW YORK, Nov. 15.—That the position of the stock market has been weakened considerably by the extension of the last few days was indicated by the movements of prices today. The tone was heavy and the market lacked staying power. The period of declining prices which followed the recent advance has now extended beyond that of a normal reaction with no evidence of consistent support for the market from either the public or the large bankers. The possibility of a further decline is attracting much attention in Wall Street and it is realized also that attempts to be made to secure legislation having to do with government ownership of corporations. The recent advance according to the common explanation, was predicted on the basis of the announcement of the American tobacco reorganization plan, but the news of the independent tobacco interests today in again opposing the plan, has quickly lost their advantage. The market became heavy and remained in that condition until just before the close, when it moved upward briskly, presumably owing to covering of short stock put out during the day. The collapse of the speculative movement in the market, which had been pushed up actively for several days, added to the heaviness of the market. Leigh Valley led the drop with a decline of 3 points, after announcement that the directors at their meeting had taken no action in regard to distribution of stock representing the company's coal holdings. Canadian Pacific showed the heaviest loss among the more prominent railroad stocks at the end of the day, with a decline of 2 points. A number of important issues, including Union Pacific and Southern Pacific, virtually made up their losses.

DETROIT EDISON CUTS "MEIN". NEW YORK, Nov. 15.—At special meeting of the Detroit Edison Co. today the proposition to increase the capital stock from \$3,000,000 to \$15,000,000 was ratified. Announcement will be made in near future of offering of \$15,000,000 of the new stock at par to stockholders to the extent of their holdings. This will mean "rights" to stockholders, valued at \$4 or \$5.

DETROIT UNITED FINANCING. Within the near future it appears that the Detroit United Railway will have to do some additional financing. Not only do \$1,500,000 5 per cent. notes mature on January 1 next, but there are also a sizable floating debt. What form the financing will take is not yet settled. To satisfy the notes Detroit United Railway has \$1,500,000 consolidated 4-1/2 in its treasury. There would still remain the floating debt to provide for. Recluding the \$1,500,000 notes, the company's floating debt exceeded \$1,150,000 on December 31, 1910. At present the floating debt aggregates approximately \$1,700,000.

ON WALL STREET. Erickson Perkins & Co. (J. G. Beatty) writes: Stocks showed great irregularity today with renewal of bear pressure. The market was heavy and we should expect a fairly rally before long. At the same time, we look for further irregularity, and stocks should be bought on dips. The range is one to three points for the present. Railroad purchases are increasing as shown by New York Central's order for 17,000 freight cars and 120 locomotives, calling for an outlay of some \$20,000,000. The significance of so large a purchase should not be overlooked. The advances in wages by New York Central and Southern Railway, in which Mr. Morgan is a potent factor will be interpreted as meaning that the government will not appeal the American Tobacco case. Whether it does or not, we do not believe that it will make a case.

CHARLES HEAD & CO. TO J. EWART OSBORNE: There was the usual lack of definite trend on the speculation this morning. Prices from London were fractionally higher and the market opened here in line with advances ranging from 1-1/2 to 1-3/4 points. C.P.R. news was conspicuous by its absence in both markets. The New York Central Railroad is expected to bring out an issue of \$15,000,000 Equipment Trust certificates to pay for a like amount of equipment, consisting of 120 locomotives and about 22,000 freight cars. Steel prices continue low and cutting for new business is general. Steel rails being practically the only article to remain fixed. In the afternoon early business was dull on the break. The Union Pacific statement expected tomorrow will, it is said, make an excellent showing. Closing prices were steady at small recovery from low point. We rather look for a further rise in the early dealings to-morrow.

COTTON MARKETS. Cotton market was heavy today. Offerings on the opening bid were supplied the moderate demand, and bears took cover and sold freely on the rumor that revision this afternoon would be made.

COTTON LOWER. Bears Raid Markets on More Favorable Advice from the South. Erickson Perkins & Co. (J. G. Beatty) wired: The cotton market was heavy today.

MONTEAL STOCK MARKET. Price Movements Irregular in Particular Daily Session. MONTEAL, Nov. 15.—The Montreal stock market opened into dullness today and price movements were irregular with the general tone easy. Montreal Power was a weak feature, opening at 123 1/2 and declining under liquidation to 119 3/4, with the last sale at 120.
