Miramichi Advance.

Chatham, August 3, 1882. Miramichi as a Summer Resort. A valued correspondent, whose letter appears in another column, deals with a subject which ought to command more than passing notice. The ideas which are suggested by Mr. Mackenzie are so modestly put that we will be pardoned for dealing briefly with the matter in the hope that it may further assist in directing attention thereto and leading, eventually, to a practical development of Miramichi as a watering place. Rich as the locality is in historical interest, as the landing place of the Old-World pioneers of civilization in New Brunswick, as the scene of one of the greatest and most mysterious confederations of modern times, and as the home, from time to time, of so many sturdy champions of British rule and British traditions—men who have left the impress of their minds upon our statute books, and by their genius for business made the name of the Miramichi a familiar one to so many centres of European commerce—it possesses also those natural attractions and resources which are sought out by the tourist, the sportsman and the man of business, who desire to cease, for a while, struggling with the duties of commercial or professional life and see and enjoy those portions of the world from which man's enterprise, selfishness or necessities, have not succeeded in removing the birth-marks of nature. It is difficult to find a more inviting region than the Miramichi for those who have either long or short terms of vacation to spend, or one that is more accessible. Whether they come from the Upper Provinces or the United States, visitors will find the best facilities for travel at their command, the International Railway, which is second to none on the continent, placing them within five minutes walk of the centre of our beautifully situated river town. Here, a programme of attractions is to be found, and the sportsman who has a yachtman he has before him an ample river, in which a ship may be worked to windward, stretching down to the open Straits. If he has a taste for fishing, as well as sailing, he will find in the river and its many tributaries, a wealth of sport which, for variety and quality is not equalled anywhere. We do not know whether even those who are most familiar with the Miramichi have ever fully appreciated the abundance and variety of the fish which are taken in the Miramichi. It is quite possible, never been done, yet it is quite probable for a fisherman to start from his hotel at earliest dawn, reach a pool up river and kill his grise or salmon, return to town in time for dinner and go by steamer to the bay below and catch mackerel, bass, cod or other fish before night. Nobody does this, nor is it probable that anyone would do so to ruin the pleasure of sport as to rob it of its charm by unnecessary exertion and fatigue, but it is quite possible for one to indulge in a salmon fly fishing in the morning and close the day by tugging at the deep sea line with a codfish at the end of it, illustrates the range of our water-world which may be obtained by any who choose to seek it. Our trout streams of the first order are very numerous and they are reached in from an hour to four hours' travel from the town and, indeed, one can go in twenty minutes, from either Newcastle or Chatham and catch plenty of trout of a size that is most prized by many anglers. Our correspondent refers to shooting in the autumn, for our game animals and birds are sacred from the sportsman's quest in summer months. But even a tourist coming to us in the heated term, and who does not hunt, "A wet sheet and a flowing sea, A wind that follows fast, And fills the white and swelling sail, And bends the gallant mast," or who does not care to kill a salmon or catch a trout, can, if he likes big game, employ his time on horse back, bears and pay his guide by his presenting him with the animal's nose, for a paternal government gives three dollars each for these trophies of the chase, recognizing that beam must die, in order that cattle and sheep may live. Even the bay, however, is not without its attractions to the gunner in the summer season, for if he so desires he may, if he possesses the skill, emulate the Indian, who, in his back canoe, chases the porpoise and brings him to gaff with bullet or hatchet. It is, however, with September that sport with the gun begins. We have partridges in abundance within half an hour's drive of the town, woodcock in the covers much nearer, snipe and such smaller game in the marshes and by the shores, and waterfowl within easy distance. Geese and black-ducks abound, later in the season, in our lakes, and geese, brant and scores of birds of other varieties, team in the Bay below. The great feeding grounds of geese and brant from Sheldrake Island to Miramichi and from Point Ax to Esquimaux offer such attractions to sportsmen as are found in very few places on the Continent. For those who seek the less exciting enjoyment of a life—the peaceful and recreations in which the family may share—there is the fifteen minutes walk from the centre of Newcastle to one of the most beautiful spots imagin-

able—Mill Cove—its steep slopes clad with tree and wild-flower, whose foliage and fragrance charm the senses; the beautiful pond of the mills, with its cascade of waste water and picturesque surroundings, suggestive of romantic thoughts, day-dreams and poetic fancies. A twenty minutes row from Newcastle places one on Bear-bear's Island, where there are such excellent facilities for bathing. Here are giant trees towering above vegetation of smaller growth or shading the carpet-like walks beneath them—lovely retreats for a quiet ramble and the very ideal of a picnic ground, as so many who have enjoyed the Island know. Dozens of other spots, each with its peculiar attractions, might be mentioned, including private properties, such as those of Hon. Mr. Hutchison at Douglastown, Judge Wilkinson at Bushville, and others, where the beauties of the landscape have been, to many, impressed the more deeply on the memory by the hospitality which is one of the characteristics of our people. With such attractions—all so accessible—it is in order to enquire why we have not a large number of summer visitors! Indeed, the question was asked of the writer one day last week by a resident of Newcastle and answered as suggested by Mr. Mackenzie. The effect that nature had done much for us, but we have two towns near each other which do not work as well as they should together to promote the general interest of the Miramichi. There are local jobs only which occupy men to the exclusion of better things. Political feeling is carried too far and lasts too long. Our best people should realize that, even if all were united, they are so small in influence and wealth as to make the attainment of the best possible results for the community as a whole not an easy task. Our friend did not like to admit this, but it is true, as the best friends of the Miramichi realize. The hotel question is one to which our correspondent does not attach too much importance by any means. Indeed, summer tourists will never, to any appreciable extent, find out the merits of the Miramichi as a place of resort until a first-class hotel is established. Such an undertaking is not within the means of any one individual who might desire to promote it; and, being a public matter, it should be taken up as such. Leading men of the river—in Chatham, Newcastle, Douglastown, Nelson and elsewhere—should put their shoulders to the wheel and get up a joint stock company and supply this cardinal requirement. We should like, for many reasons, to be able to say that Chatham is the place for the pioneer hotel, but that of Newcastle is on the line of the International Railway, which is second to none on the continent, placing them within five minutes walk of the centre of our beautifully situated river town. Here, a programme of attractions is to be found, and the sportsman who has a yachtman he has before him an ample river, in which a ship may be worked to windward, stretching down to the open Straits. If he has a taste for fishing, as well as sailing, he will find in the river and its many tributaries, a wealth of sport which, for variety and quality is not equalled anywhere. We do not know whether even those who are most familiar with the Miramichi have ever fully appreciated the abundance and variety of the fish which are taken in the Miramichi. It is quite possible, never been done, yet it is quite probable for a fisherman to start from his hotel at earliest dawn, reach a pool up river and kill his grise or salmon, return to town in time for dinner and go by steamer to the bay below and catch mackerel, bass, cod or other fish before night. Malcompen-A Bridge.

Mr. Editor.—Being accustomed to travel and observe a lot, I often note the various and occasionally needless to some of the press, for it may be that I take an unparadise pride in seeing my own views in print. Having thus noted myself I would address your readers—I started from—well, I will not say where, but after a tedious journey over very bad roads, I, at length, reached Malcompen, at the corner of Gloucester settlement in the County of Gloucester. Here I remained a few days enjoying the country air, and the kind hospitality for which the people of this part of the province are so famous. Wandering up stream one day in search of the angler's sport, I left the main river and began to ascend what is known as the Malcompen brook. I had not proceeded far, when I noticed what I thought to be obstructions in the stream. Landing close by and feeling fatigued from the burning rays of a July sun, I sat down to rest. It was then that I first observed the Malcompen brook, and the work of nature which I was surrounded, my eyes rested on what I before termed obstructions, and then for the first time I saw the Malcompen brook. I had not proceeded far, when I noticed what I thought to be obstructions in the stream. Landing close by and feeling fatigued from the burning rays of a July sun, I sat down to rest. It was then that I first observed the Malcompen brook, and the work of nature which I was surrounded, my eyes rested on what I before termed obstructions, and then for the first time I saw the Malcompen brook. I had not proceeded far, when I noticed what I thought to be obstructions in the stream. Landing close by and feeling fatigued from the burning rays of a July sun, I sat down to rest. I had not proceeded far, when I noticed what I thought

PRUDENCE

(Continued.)

Mrs. Crane was looking at the large mass of color representing that most pathetic, marvellous moment in the life of Christ, Prudence was also studying the picture, but with the air of one ready to slip into smiles at anything more interesting and attractively personal.

remembered that she was among the most beautiful fabrics, the most artistic, the most harmonized, by the divine tint time can devise or money buy. Simonson's piano stood in a darkly polished space near the embrasure of those windows looking out upon the river, and the window-panes were in fact red velvet and panels of stained glass here and there, so that his listeners sitting there looked often like saints and a shrine, a sacred shrine, vibrating with some mysterious light—at least Helena thought of this on the days when Prudence visited the studio, and the girl sat for her picture in a desultory sort of fashion, interrupted by the fulfiling of the painter's mood, or Prudence's declaration that she was tired.

General Business.

TIME TABLES STEAMERS ANDOVER & NEW ERA, 1882. Capt. Wm. Beattie, Purser, Jas. A. Rundle.
