The Slater Broad-Foot Shape

While "The Slater Shoe" is built on 12 different models, each one has its own peculiarity, each its special feature.

"The Broad-foot" is designed for the heavy man who wants the highest combination of wear and comfort. The acme of hard wear, easy walking, and good appearance withal.

Double sole of the best quality sewn with extra stout thread.

Every pair Goodyear welted in black Canuck Calf, widths, D, E and F. The name and price branded on the sole in a slate frame, the makers' trade mark. \$3.50 and \$5.00. Catalogue free.

The Slater Commonsense Shape

Of the 12 foot fitting shapes in which "The Slater Shoe" is made, the "Commonsense" is a general favorite. Ostensibly a business man's shoe, varying very little in width from the ball of foot to toe.

Will be most appreciated by gentlemen who buy shoes for wear and comfort first, at the same time this shape is strictly up to date.

Laced, button and elastic sides. Leathers most reliable and colors most fashionable. Every pair Goodyear welted.

Prices \$3.50 and \$5.00 stamped on the soles in a slate frame—the makers' trade mark.

Catalogue free.

LAST HONORS TO THE DEAD.

Queen Victoria's Remains Laid Peacefully Away Beside Those of

Her Late Husband—Scenes at the Castle and Burial Place—Royalty Still Present.

Windsor, February 5. — The last honors have been paid to Queen Victoria. Her body now rests peacefully near that of her husband in the mausoleum at Frogmore. The final ceremonies were more of a pathetic character than any of the obsequies which preceded them. Shortly before three o'clock yesterday afternoon, in the presence of the royal mourners, the Grenadier guard hoisted the coffin from its temporary resting place in the Albert memorial chapel and placed it on a gun carriage. In the meanwhile the Queen's company of Grenadiers, drawn up in the quadrangle, presented arms and wheeled into line, their rifles at the reverse, and with slow, measured steps marched toward the castle gate. At the head of the procession was a band playing Chopin's funeral march. Slowly the cortege passed under the

massive archway on to the Longwalk, which was a mass of black brilliantly edged with scarlet. Life Guardsmen kept the crowds back.

In place on the gun carriage was the same regalia which attracted the eyes of millions since the march to the grave began at Osborne. Close behind walked the King, Emperor Wilhelm and the Duke of Connaught, wearing dark military overcoats and plumed cock hats and looking pale and careworn. In similar dull attire were the kings of Portugal and Belgium. All heads were bent. The blue and gray of the German princes reflected the royal group from perfect sombreness of color. Behind these walked Queen Alexandra and the royal princesses deeply veiled. The Queen carried an umbrella but the others had their hands folded. As the last trio of the veiled women passed out from the castle there came two boys dressed in bright tartan kilts and velvet jackets. Between them was a young girl, her fair, loose hair glittering against the drapery of her mourning. Two of these were children of Prince's Henry of Battenburg and the other was little Prince Edward of York. His tiny legs could hardly keep pace even with the slow progress of the mourning band.

The rear of the procession was brought up by the suites of the king and princes. The royal family and relatives entered the burial place so dark to the late Queen, ranging themselves on each side of the coffin. The Bishop of Winchester read the last part of the burial service. After further singing by the choir the benediction was given, and amid the privacy of this family tomb the last farewells were said, the funeral came to an end, the mourners drove to the castle and the crowds dispersed.

THE KING TALKS TO HIS PEOPLE BEYOND THE SEAS.

He Also Issues an Address to the Whole Empire—Promises to Walk in His Mother's Footsteps.

London, Feb. 5.—The King has sent the following message to all the British colonies and dependencies:

"To my people beyond the seas: "The countless messages of loyal sympathy that I have received from every part of my dominions over seas testify to the universal grief in which the whole Empire now mourns the loss of my beloved mother.

"In the welfare and prosperity of her subjects throughout Greater Britain the Queen ever evinced a heartfelt interest. She saw with thankfulness the steady progress which, under the wide extension of the self-government, they had made during her reign. She warmly appreciated their unflinching loyalty to her throne and person, and was proud to think of those who had so nobly fought and died for the Empire's cause in South Africa.

"I have already declared that it will be my constant endeavor to follow the great example which has been bequeathed to me. In these endeavors I shall have confident trust in the devotion and sympathy of the people and of their several representative assemblies throughout my vast colonial dominions. With such loyal support, I will, with the blessing of God, solemnly work for the promotion of the common welfare and security of our great Empire over which I have now been called to reign.

EDWARD."

TO THE WHOLE EMPIRE.

King Edward has gazetted the following to his subjects throughout the Empire:

"Now that the last scene has closed in the noble and glorious life of my beloved mother, the Queen, I am anxious to endeavor to convey to the whole Empire the extent of deep gratitude I feel for the heart-stirring and affectionate tributes which have everywhere been born to her memory.

"After alluding to the common sorrow, the King concluded by again pledging to walk in the footsteps of the late Queen "in the fulfilment of my great responsibilities."

THE DELEGATION BRING A VERY FAVORABLE REPORT.

Concerning the Establishment of a Beet Sugar Factory Here—What They Saw at Lyons, N. Y.

Ald. Taylor and Mounteer were the only absentees at the special meeting of the city council held last evening to receive the report from the civic delegation who visited Lyons, N. Y., in the interests of establishing a sugar beet industry in the Maple City.

The Mayor opened the meeting sharply on time, many representative citizens making up the audience.

Without further introduction the clerk read the following report: To His Worshiping the Mayor and Council of the City of Chatham.

Gentlemen,—Your deputation appointed to visit the beet sugar factory of the Empire Sugar Co., at Lyons, N. Y., beg to report as follows:

Leaving Chatham on Monday night, Jan. 28th, we reached Lyons next morning accompanied by Mr. Truitt. Arrived at the factory, Mr. O. H. Edge, superintendent took us in charge and explained the operations throughout.

Beet Shed.

This building, where the beets are received, is built of wood, sixty feet white by four hundred feet in length, and has a storage capacity of three thousand tons of beets. There is a driveway through the centre twenty feet wide with bins on each side twenty feet in width, running the whole length of the building. These bins have hopper shaped bottoms. Under the centre of each there is a flume in which water runs for the purpose of

conveying the beets to the factory, there are trap doors at intervals in the bottom of the bins; these are opened when required and the beets raked or shovelled into the flume, whence they pass to the factory proper. The beets are weighed at one end of the shed on the farmers' wagons, which drive in at that end, unload into bins and drive out at the other end. This building is constructed mostly of six by six timber and two by five scantling, open at the sides with a flat roof.

It is claimed there should be storage capacity for five thousand tons of beets for a five hundred ton factory, so as to have about ten days' run to guard against any possible delay in the delivery of the beets. The tops of the beets are trimmed off in the field where grown, providing food for stock.

The Factory.

This building is substantially built of brick, sixty feet wide by three hundred in length, three storeys in height with a fourth storey over part. The first floor is concrete, the others are wood, iron pillars and steel beams support the floors. The building is completely filled with machinery, a wing extends on one side, which contains a steel lime kiln, another wing contains a battery of six steam boilers. We shall now endeavor to follow the progress of the beet through the factory. As stated, it drops into the flume at the beet house, and is carried to the factory, where a large wheel or disk revolves, the rim all on one side. On the inner side are shelves or buckets. The beets are conveyed by water to the bottom of this wheel, the buckets pick them up and

elevate them into a large iron tank or trough, where they are washed; a shaft with arms attached revolving in the trough with a screw motion, which moves them along. When they reach the end of the trough they are washed clean, the passage through the flume, of course assisting. At the end of the trough fingers on the shaft lift them out, when they fall into a hopper and are elevated to the third storey, where they are weighed by a self registering, automatic scale, which weighs seven hundred pounds at a draft and drops once per minute. The scale dumps them into the elevator, a large disk or wheel, revolving horizontally in a case. On the arms of the wheel are knives with grooves, which cut out a piece of the beet the shape of a pencil. These are termed "cossettes," and, as cut, drop down on a moving belt running in a frame, and conveying the cossettes, or pulp, to the diffusion battery, where the juice is first formed. This part of the machine consists of a number of tanks connected from the bottom of one to the top of another, by pipes and a system of valves for admitting water and steam. Water pressure is used to express the juice, but the water taken up has to be evaporated out again, and therefore the less that can be used the more economical the process. From the diffusion battery the juice goes to the measuring tanks, thence to heaters, heated by exhaust steam, thence to a lime tank, where it is thoroughly mixed with lime, the heat generated assisting in extracting the juice. The percentage of lime used depends on the quality of the land on which the beets were grown.

It is almost needless to say that chemical tests have to be made at every stage of the process, consequently a staff of chemists necessary. The juice being taken out the pulp is elevated by a screw conveyor getting smaller towards the top end, which presses out the moisture partially, at the top it drops through a post to one ready for shipment. The juice then goes to the carbonation tanks, eight in number, five for the first passage, and three for the second; a chemical change is produced in these tanks, carbonic acid gas being used which is obtained by a vacuum pump exhausting the gas from the top of the lime kiln, where it is formed by the burning lime, the vacuum also serving to produce a draft in the kiln. The gas enters the tanks at the bottom, rising up through the juice, from these tanks the juice is pumped through the filter presses, six in number, which form a pipe; they are required to remove the lime, the juice then goes to the evaporators, four in number, these are large square steel boilers, with arched tops, having a steam chamber in lower part filled with one inch brass tubes. Steam is used in the first one only, the top of the first being connected to the steam chamber of the second and so on, so that the vapor from one serves to evaporate the contents of the next, and as the air is exhausted by vacuum pumps the boiling point is lowered, and the world one economically. From the evaporators the juice goes to the sulphur tanks, where sulphurous acid is passed through purifying and taking out the coloring matter, thence through mechanical filters, thence to thick juice tanks, which are similar to large boilers, a revolving shaft with paddles on running through the centre, thence to its vacuum pans, two in number, where the sugar is crystallized—both live and exhaust steam can be used for the purpose, thence to the mixer; the sugar also passes through other crystallizers. The mixer is a long iron trough in which revolves an iron screw shaft keeping the sugar in position. The sugar is dropped from this trough into the centrifugals which extract the molasses; the sugar then drops on a conveyor, thence on an elevator, thence to a dryer or granulator and from there to sugar house where it is put up into barrels ready for shipment. From the time the beets go into the factory until the sugar comes out is about fifty hours.

Beets grown in that locality contain about

HEAT SCRAP-IRON ASSESSMENT.

It is gratifying to learn that the Ontario assessment commission will report against the system of "scrap iron" assessment and that the local legislature will be asked to change the law. Under what was known as the "junk" or "scrap iron" system of assessment large corporations, plants were not assessed by municipalities with any regard to the earning power of the plant, but at its actual value as "scrap." For instance, a telephone company's poles and wires could not be assessed as part of an expensive operating plant earning dividends for its shareholders, but as so many yards of wire and so much timber represented by the poles. The principle was decidedly unjust to municipalities. It applied equally to the plant of gas companies, street railways, telegraph and electric light companies. Efforts have been made previously to have the act changed, but without success. The theory, of course, was that a company might be doing business in several municipalities and it was claimed that they should not be assessed as a going concern in several different places at once. The result was that they escaped assessment as "going concerns" in all municipalities and their plant was assessed only as "junk" irrespective of its value as an earning power.

HARD ON THE ORATORS.

The Duke of Argyll, formerly Marquis of Lorne and Governor-General of Canada, is not a believer in oratory. He appears to believe that the man who can talk "like a streak of greased lightning," as the boys used to say, is not much good for anything else. In an article in the North American Review he declares:

"Indeed, too great eloquence in any responsible statesman in a perilous luxury. It delights the audience, thrills for the moment the public, and then, like even the best whiskey, is apt to be succeeded by a chill which is the penance for the passing exhilaration. The greatest orators are usually the worst political guides. Judgment is necessary for affairs. A man who has enough imagination to be supremely eloquent is not in a condition to have his judgment firmly seated. His own phrases, struck from burning imagination or its imitation, have too extended a reach. If taken seriously, the praise or dispraise exalts or abases in a degree which becomes in practice outrageous. The majesty of perspective is lost in the intoxication of phrase and passion." The one-time Canadian Governor-General proceeds to wind up the speaker who sways a crowd with the melody of his sentences is too apt to have none of his sweet notes for the equal scales of justice. His burning words may be good to incite to war, or during a contest, but are not of the essence of that economy in all things which is desired by good Liberals. Luckily, we have now scarcely any rhetoricians. We may have busy men on both sides, especially if lawyers may be considered men of business. Our orators are laudably dull. Our good talkers are in the ascendant."

And still we have no effective snow-shovelling-by-law.

If some alderman would only prepare a snow-cleaning-by-law in July or August it might be ready for use by the time the blizzards of winter arrived.

No one can deny, on this Sabbatharian Saturday, that Hamilton is a loyal town.—Hamilton Herald.

That extract is from the Saturday Evening Herald. Where did its Sabbatharian Saturday come in?

The Hamilton Herald points out that the Hamilton jail is no joint stock affair; that city owns the whole institution. We know of no city that requires to own a whole jail more than Hamilton.

A famous oculist, who has made a close study of the visual organs of his patients has come to the conclusion that most people are right or left sighted, as they are right or left handed. Possibly that is the reason they often take a one-sided view of things.

We notice that a minority of the evening papers throughout Ontario so far forgot themselves as to publish on Saturday. Can they give any good reason why a bank, a store, or a factory should close out of respect to Her late Majesty, while a newspaper can go on doing business as usual?

A well-known citizen who appreciates the humane work done by Henry Duggan, has handed \$5 into The Planet office which he wishes to be made the nucleus of a fund to pay that officer. Two other citizens have also stated that if the fund goes ahead they will subscribe \$5 each. The matter rests with the people. If they come forward it will not take long to raise \$250.

"Want of Watchfulness Makes a Thief."

Many cases of poor health come from want of watchfulness. But if you keep your blood pure no thief can steal your health.

The one effective natural blood purifier is Hood's Sarsaparilla. It never disappoints.

Impure Blood.—My wife suffered with pain and distress from an affection of the throat caused by impure blood. She was almost in despair when she turned to Hood's Sarsaparilla. Six bottles of this medicine completely cured her. J. W. WOODMAN, Oak, Ont.

Scrofula.—Hood's Sarsaparilla has cured me of scrofula. I was weak and debilitated but it made me strong and well. After a severe cold had catarrhal fever. Again resorted to this medicine and it cured me. SARAH E. DUNSTON, Annapolis, N. S.

Hood's Sarsaparilla
Never Disappoints
Hood's Pills cure liver bile, the non-irritating and safe cathartic to take with Hood's Sarsaparilla.

Commenting on the fact that the Presbyterians more than raised the million dollar fund the Montreal Gazette says:—"Amid all the questioning about the steadfastness of the people in the old faith, religion still has power to touch the Scotchman in the place which is proverbially hardest to get at."

Hysterical American papers are talking overtime about Great Britain wanting to form alliances. Herein they show their ignorance of foreign politics. Realizing years ago her position of "splendid isolation" Great Britain has since avoided all formal alliances as entangling. What she seeks and offers is friendship, not cast iron agreements.

GET READY FOR THIS COLD WAVE
Ottawa Citizen.
Prof. See, the astronomer in charge of the telescope at the Naval academy in Washington, calculates that in 3,000,000 years the sun will have burned out, the solar system will be in darkness, and all life will be frozen to death. Wouldn't that chill you!

NOT A PLEASING PICTURE.
Lady's Pictorial.
Gambling, intrigue, extravagance, selfish luxury, vulgar ambition, were just as rampant among women a hundred years ago, as they are to-day, with the deplorable addition that in

THE COUGH
left by the grippe is dangerous; it irritates and weakens the throat and lungs. It opens the door for consumption. SCOTT'S EMULSION heals the inflammation; strengthens the lungs and the whole body. Every doctor knows this.

What is

CASTORIA

Castoria is for Infants and Children. Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It contains neither Opium, Morphine nor other Narcotic substance. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays Feverishness. Castoria cures Diarrhoea and Wind Colic. Castoria relieves Teething Troubles, cures Constipation and Flatulency. Castoria assimilates the Food, regulates the Stomach and Bowels of Infants and Children, giving healthy and natural sleep. Castoria is the Children's Panacea—The Mother's Friend.

Castoria.

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children."

DR. G. C. OSGOOD, Lowell, Mass.

Castoria

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me."

H. A. ARCEP, M. D. Brooklyn, N. Y.

THE FAC-SIMILE SIGNATURE OF

Chas. H. Fletcher

APPEARS ON EVERY WRAPPER.

Chatham's Millinery Store

Bargains in Hats

Trimmed Hats from 75c to \$1.98

Beautifully trimmed in all the newest styles of the season.

C. A. COOKSLEY, Opp. Market

'd'ont draw
Your Feet!

"Wet weather—slushy streets—catch cold—pair of rubbers—'draw your feet'—give you corns—hurt your eyes—Doctor says so. Cost money—cost time—comfort—health. Wear the new wet-proof, snow-proof, calf skin footwear. The Goodyear Welt gives flexibility to the sole, durability to the upper—case to the foot."

"Slater Rubberless Shoe."

The Canadian Flour Mills Co.

Successors to the Kent Mills Co., Limited, Large Quantities of Wheat, Barley and Beans. THE BEST IS THE CHEAPEST. USE KENT MILLS FLOUR. Flour made by the new bolting and dust extracting system takes more water, and gives you a larger, whiter and sweeter loaf, and makes more loaves to the barrel than any other flour. Stevens' Breakfast Food and Family Cornmeal, freshly ground, always on hand. Farmers' Feed ground on quick notice by three reduction roller process, much ahead the old system of chopping.

QUEEN AS A HEROINE

DOUGLAS STORY RELATES SOME NEW VIEWS OF VICTORIA.

British War Correspondent Depicts the Aged Monarch Waiting in the Rain to Review Troops—Sensitive as to Her Walking—Love of Queen for Her Womankind—Religion Argued by Royalty.

One day in August twenty years ago I saw the Queen for the first time. It was in Edinburgh, and her Majesty had come north to review the volunteers' forces of Scotland. All Scotland had poured forth its citizen soldiers, and in the fore part of the day the Queen's park was checked, like a highland tartan with its multi-colored bodies of troops.

Before the parade commenced, such a rain settled down as Edinburgh has not known from the day to this. In an open carriage, protected by an umbrella and mackintosh, Her Majesty sat while 25,000 men slipped past her in the mud. Marching was impossible. At parts of the route the volunteers were mid-rough in water, and the long lists of death from pneumonia, and phthisis that followed exceeded those in many hard fights.

But Queen Victoria faced it through—faced it with the memory of the fact that her husband caught in the same city nineteen years before. But there has been no other review, and if my memory serves me rightly, she has never slept a night in the Scottish capital since.

The following day I was present at the great military review in Wimpoleton park, when the young Princes Albert, Victor and George returned from their tour around the world. The occasion was memorable because on that day were more of the immediate descendants of the Queen gathered together than ever again met on one field.

My memory of the Queen at that time is of a little lady, very plainly dressed in black, who sat extremely upright in her carriage and bowed with a slow, sweeping inclination, vastly expressive of her dignity. Behind her carriage, on the rumble, stood John Brown and the other Scotch gillies, in the royal Stewart tartan—stern men, whose devotion to the Queen was as pure and spontaneous as the air of their native glens.

Years passed before I again saw Her Majesty, and then it was on a long country road near Balmoral. It was autumn, and as I stood on the fallen leaves by the wayside she smiled over to me and bowed—a gentle little lady sitting very low in her low-swinging carriage, with the Princess Beatrice beside her, and a single attendant on horseback. She had aged greatly in the intervening fifteen years, and there was a pathetic wistfulness in the long ago that did not reappear in the long ago. There in her highland home she was woman rather than Queen—a good and kindly woman, who sent jellies from the castle to the frail old bodies in the cottages, and who still drove out occasionally to wait in a shepherd's hut or a gamekeeper's lodge.

Down in the village of Grathie was the little church she had built, and every Sunday the Balmoral party sat listening to the chaplain's royal of Scotland—Princess Story, Dr. Norman Lees, Dr. MacGregor, Dr. Norman MacLeod. Many a curious sermon has royalty heard from these stout old upholders of the Scottish faith, and many an earnest discussion has Her Majesty waged over the luncheon table afterward. An Episcopalian in England, a member of the church of Scotland, in her northern kingdom, the Queen had her chaplains and respectful friends on both sides of the Tweed.

Once more I saw the Queen apart from her public appearance in London less than two years ago. It was at Windsor, and Her Majesty was to review the Honorable Artillery Company there, and had accompanied a famous colonial Minister to the park, and the Queen had intimated through Sir James Reid, the physician, that she would like it if he would stand where she might greet him on entering her carriage. I was permitted to accompany the two gentlemen to a spot on the terrace near where the carriage was standing.

As we walked over, Sir James told how Her Majesty was very sensitive as to any but her immediate suite being present when she walked these latter days. She had grown so heavy of late years walking had become a pain to her, and she dreaded any publicity of her suffering.

Arriving at our point of vantage we saw that a long gangway had been raised to the carriage to obviate the necessity of Her Majesty's stepping up or down. Quickly the door opened and the Queen appeared, leaning on the arm of her Indian servant and on a thick ebony walking stick. Very slowly she crossed the distance to the carriage, and once seated turned to us and bowed her gracious greeting.

We stood for some minutes gazing after the carriage as it rolled away to the reviewing ground, and then the colonial premier at my elbow shook himself and said: "Reid, I would not change my position as a subject of that woman to be president of the proudest republic on earth."

Last May I was enabled to cable from the Transvaal certain news of moment to Her Majesty. Months later, when I returned to England, I found a graceful little telegram of thanks from the Queen. To-day it hangs framed in my study in London, and I possess no prouder treasure.

It is difficult for an Englishman to write or speak intelligibly of his feeling for the Queen who passed so gently away. Twice in my life I have been in the position where it was treason to sing "God Save the Queen," and the most impressive incident of my career was the singing of the grand old anthem when Lord Roberts unfurled the Union Jack in

Pretoria on June 5 last. There was not a dry eye among the released prisoners by my side, and many a bronzed and battered veteran brushed away a tear as the rude prayer rose from the Kirk square.

Then, as now, we were thinking not of Queen Victoria's majesty might, but of the frail little woman, soothing the fretted beds at Netley, carrying fruit and jellies to the poor at Osborne and Balmoral, of the infinitely tender mother of nations.

The picture that clings most persistently to me is of the young girl Queen on the balcony at Buckingham Palace. Beneath, a regiment is leaving for Syria, and as it passes below the porch the girl bends, draws off her little satin shoe and casts it after the soldiers for luck. Sixty years later she lies dead, the most loved queen of whom history has any record.—Douglas Story.

QUEEN WILHELMINA'S JOKE.

A Tongue-Twisting Name Sprung on a Learned Christmas Visitor.

The German papers are telling the story of one of the jokes in which the Queen of Holland delights. One Christmas day she, as usual, received the professors of the Dutch universities. When one learned man greeted her she met him with an air of childish relief and confidence. "Oh, my dear Myneheer, I am so glad that you have come," she said. "I have wanted you. Here is a letter of thanks from a little king. We conferred the Order of the Lion upon him because he was so good to our Dutch subjects. Now we want you, who are so famous a linguist, to pronounce for us the name of our friend."

The flattered professor took the paper, looked at it, stammered and blushed until the kind-hearted little Queen relented.

"Never mind about that now," she said. "Take it home and study it." The name signed to the letter was Djozakarthia, Hamangakal Boenwonder Senoyantling, ngalogo Ngabdsor Rahman Sajidon Panoto gduo Lafakotlat VII.

The New Cut.

Robert Chambers, in one of his excellent essays, tells of an old tailor in an inland town of Scotland who had gone out of fashion there, and who was asked one day by the aged and old-fashioned clergyman of whose church he was an officer, how it happened that the congregation was thinning out so rapidly.

"Don't you know," replied the knight of the shears, "that half the parish go over the hill to hear the new preacher, young Porly o' Gingle-kirk?" "Oh, yes," said the minister, "but I can't understand what the people see in that young man that is more than ordinary." "Neither can I," quoth the tailor, "and I would say the same thing of that young child that has taken my trade over my head. But it's just the new cut, sir; it's just the new cut."

What He Could Do Best. While there are some governors of prisons who are never happy unless they are signing their names to every official document they can obtain, there are others who look upon signing official documents as altogether outside what their duty ought to be. One of the latter class, at the reception of a number of new prisoners into prison, said to a man, who happened to be a forger, and who, on a former conviction, had learnt the governor's objection to signing papers: "Now, we'll set you to work to-morrow. What can you do best?" "Well," replied the convict, with a grin, "if you give me a week's practice on your signature, I'll sign your official papers for you."

Preventing Potato Scab. Potato scab can be prevented by the use of corrosive sublimate or of formalin on the seed potatoes. Experiments made this year at the Vermont Experiment Station on the potatoes treated with corrosive sublimate showed less than four per cent. of the crop scabby, and those treated with formalin showed nine per cent. scabby. In the same soil and from the same seed, untreated potatoes came out with 41 per cent. scabbed. An increase of 37 per cent. in the measure of first-class potatoes ought to be worth any man's time.

Buy Them by the Pound. There is a big difference in the weight of eggs of pullets and hens and of those laid by different breeds. Poultrymen who sell by count, and not by weight, do not always get full value for their product. An English authority gives the following differences: S. C. Brown Leghorn pullets 17½ oz. per doz., hens 21½ oz.; Light Brahma pullets 23½ oz., hens 28½ oz.; Black Langshan pullets 24 oz., hens 28½ oz.; Pekin ducks 35½ oz.

Barnyard Wasteage.

The washing and leakage from the barnyard should be utilized. Instead of letting it run to waste to befoul the waters of the creek plan to divert it on to the garden and small fruit and then just see things grow. They used to do just as you are doing 50 years ago down east, and now they are obliged to pay \$20 a ton for some stimulant to ginger up any sort of a crop.

Feeding Carrots.

Experiments in the feeding of carrots, beets and small potatoes to cows show that milk fever is less liable to occur when cows are fed liberally on root crops than when they are confined to hay and grain. No corn should be given for six weeks before calving. Linseed meal may be allowed with the hay, which should be cut fine and the linseed meal sprinkled over it.

Italian Prisoners Liberated.

Nearly 13,000 prisoners were liberated on the occasion of the new king of Italy's birthday. Forty thousand others were granted reductions in their sentences.

The Jolly Girl

Often changes to the jaded woman. "I can't see what's come over Mary; she used to be such a jolly girl," was the remark of a young woman visiting a married school-mate. Marriage changes a woman.

The drains and pains which are so often the sequence of marriage rob her of all vitality. Give her back her former strength and she'll be as "jolly" a wife as she was a maid. Doctor Pierce's Favorite Prescription gives back the lost strength by re-establishing the health of the delicate womanly organs. It dries the drains and stops the pains. It cures ulceration, inflammation and female weakness. It makes weak women strong and sick women well.

"For two years I had been a sufferer from chronic diseases and female weakness," writes Mrs. Allen A. Bobson, of 1115 Rodman Street, Philadelphia, Pa. "I had two different doctors, and they gave me medicine which only relieved me for a time. My niece advised me to take Dr. Pierce's Favorite Prescription. I concluded that to open a correspondence with you for advice would be safest, so I did, and have been highly benefited. I find that after taking six bottles of 'Favorite Prescription' and following your advice in regard to local treatment, I am now a strong woman. Accept my sincere thanks for the interest manifested in my case and the happy results obtained."

Sick women are invited to consult Dr. Pierce by letter free. Correspondence private. Address Dr. R. V. Pierce, Buffalo, N. Y.

CANADIAN VENGEANCE.

The Running Down and Killing of the Boer Villamon Described.

Two of Our Half Breed Scouts Chased Him Into Swampy Ground and Killed Him.

Toronto, Feb. 4. — Lieut. Morrison, of "D" Battery, who in a former letter gave a graphic description of the death and burial of Dan Spence, in a later letter concerning his experiences in South Africa, had the following paragraph:—In the rush of events before we left Belfast I forgot to mention an interesting incident at Nootkedacht, being the killing of the leader of the Boer party who shot young Spence and Ratcliffe, of the Royal Canadian Dragoons, so treacherously, several months ago. Villamon, the man in question, was known to both the Dragoons at Belfast and the C. M. R.'s at Nootkedacht. One fine day in November he borrowed his usual stamping ground around Belfast, and rode over Nootkedacht way, where he did not know the country so well.

"Casey" Callaghan, and David, the half-breed scouts, were returning in the early morning from an unsuccessful attempt to catch a field cornet, whom they had been laying for all night, when they sighted Villamon riding along all gallant and gay. They knew the country and they raced for a point to cut off the Boer's retreat, and succeeded. (He raced for another knot, and soon floundered, girth deep, in one of those treacherous Transvaal bogs. This was what the Canadian scouts had been playing for, and proceeded to take pot shots at Herr Villamon at 500 yards. Finally, his horse hopelessly mislaid, he jumped off and through the bog. They hit him the first shot, but did not stop him. He ran on screaming with fear. They hit him three times in five shots. As Casey graphically described, "He squealed like a pig."

The last shot caught him in the back of the head, scattering his thoughts upon the grass, and he died. They took his rifle, horse and bandolier and told some kaffir to bury him. The killing of Herr Villamon made a considerable impression on surrounding commandos.

Hours, 9 to 9, Parlor No. 1, Merrill
House.In the St. Thomas kidnapping case
the police magistrates found the de-
fendants, Cook and Donahue, guilty of
common assault and imposed a small
fine. It will be remembered that Col.
Burke, American Consul, requested
the defendants to remove his sister
from his residence to a boarding
house, as it was alleged she was mak-
ing trouble. They did so and were ar-
rested for kidnapping.The infant daughter of P. J. Goodwin,
of Grand Rapids, died last evening at
the residence of Peter Miller, Harvey street.
The circumstances surrounding the death
of the little one are particularly sad. The
mother, Mr. Miller's daughter, passed away
about six months ago, a few weeks after
the birth of the child. Everything pos-
sible was done to rear the child but
the baby, too, sickened and followed its mother
to the great beyond.DEATH OF MOTHER ROSE.
Yesterday, at 12 o'clock a. m., Mo-
ther Rose, of the Ursuline convent,
passed away. She had only been ill
a week with pneumonia. Her death
was a very unexpected one. As she had
lived so long, in the arms of her
beloved church. Mother Rose was
formerly Miss Kennedy, of Chatham
Township, and a number of her re-
latives still reside in Kent County.
For 15 years she has been a nun, and
for the past ten years, Sister Rose has
taught the senior room for girls in the
Separate School, and her instruction
was ever highly prized. After the
death of the Queen, Sister Rose painted
a beautiful Union Jack, which was
hanging in the Ursuline Convent dur-
ing the week of mourning for the
Queen. Requiem mass for Mother
Rose will be celebrated at nine o'clock
on Wednesday morning in the con-
vent chapel. Friends may assist at
the holy mass, but the funeral will be
private.AN EXCELLENT CONCERT.
One of the most successful anniver-
sary tea-meetings ever held at St.
Paul's Church, Hamwick, took place
last evening. After a splendid sup-
per had been served by the ladies, the
following excellent program was ren-
dered:Chairman's Address—J. B. Rankin.
K. C.

tette.Recitation—Miss Evelyn Barassian.
Address—Rev. Mr. Vance.
Solo—W. H. Brackin.
Duet—Misses McCormick.
Recitation—Miss Evelyn Barassian.
Address—Rev. Dr. Jamieson.
Violon Solo—W. H. Brackin.
Selection—No. 1 School House Quar-
tette.Vocal Solo—W. H. Brackin.
Accompanist—Miss Mary Brackin.FIRES IN JANUARY.
The fire department returns for January
are made up almost entirely of chimney
fires. Of the eight alarms responded to
the only exceptions were the burning of the
woodshed at the separate school and the
burning of some cornstalks in Mr. Mc-
Gregor's yard on Church street. The re-
turns are as follows: Jan. 5, chimney fire
at the residence of Mr. Payne, Park street,
no damage; Jan. 8, separate school wood-
shed, Cross street, damage \$15; Jan. 10,
chimney fire at residence of Mr. Payne,
Park street, damage \$25; Jan. 10, chimney
fire at the residence of Mrs. Sheldon, Mur-
ray street, no damage; Jan. 22, cornstalks
at the residence of Mr. McGregor, Church
street, no damage; Jan. 24, chimney at
residence of B. Blackburn, Selkirk street,
no damage; Jan. 26, chimney at the resi-
dence of E. Leroy, Grey street, no damage;
Jan. 27, chimney at the house next to the
Hollen homestead, King street, no dam-
age.Minard's Liniment Relieves Neural-
gia.

BETWEEN THE ACTS.

Nance O'Neill will play Macbeth at
Sydney, Australia.Mary Manning has made a hit in
"Justice Meredith."It is said that Coquelin wants to play
Gillette's "Sherlock Holmes."Clyde Fitch has written a play upon
the subject of Major Andre in which
Charles Richman may star.The full title of the new Sullivan-
Hood opera is "The Emerald Isle; or,
The Caves of Carrig Cleena."In the 12 years of his starring career
Francis Wilson has produced 11 comic
operas, at a gross outlay of \$100,000.John Philip Sousa will take his band
over to the international exhibition to
be held in Glasgow, Scotland, this year.There was a well defined rumor in
London recently that Ellen Terry had
decided to retire from the stage on ac-
count of nervous prostration.The Sultan of Turkey is a great lover
of the theater and a student of the
European drama, in which subject he
is said to be very well versed.Thomas A. Hall, who has a part in
"The Pride of Jennie," was one of the
first actors to play Uncle Tom in the
play made from Mrs. Stow's book.Mme. Sarah Bernhardt brought her
own carriage and coachman to Ameri-
ca, and throughout her entire Ameri-
can tour she is accompanied by her
own Paris physician."To Anna Held, from George H.
Ketchum," is the inscription engraved
upon a silver plated horseshoe pre-
sented to the comedienne. The shoe
was worn by Croesus, 2304, in the
great \$20,000 stallion race won by him
at Boston Sept. 27.

THEY FAVOR A
SANITARIUM.Board of Health Will Endeavor
to Get One EstablishedIn Kent County—The Most Approved
Methods of Fighting Tuberculosis.

The board of health held its first regular meeting Monday afternoon. There were present Chairman Thornton, A. D. Westman, R. S. Dunlop, Mayor Salmon, W. S. Richards and M. H. O. Dr. Hall.

H. Malcolmson wrote complaining of the escape of sewer gas on Wellington street, caused by an intake not being capped.

Dr. Hall said the evil was being remedied. Communication received. The Medical Health Officer further said that he felt that the subject of intakes and sewers should be taken up by the board of health. The sewers should be ventilated.

Mr. Dunlop—They should be trapped.

Dr. Hall—They are trapped, but the water dries up in the traps and they crack. The trouble is the lack of ventilation in the sewer. Other cities have their sewers ventilated. The only remedy is the free street ventilation along the sewer. Thus the gas would be spread all over and so situated as not to be dangerous.

REPORT ON CONSUMPTION.

The committee on Tuberculosis reported as follows:

That the consensus of medical authorities respecting consumption goes to prove the following statements as true.

That the discovery of the bacillus of tuberculosis by the German Professor Koch in 1882, was the commencement of positive knowledge of the import and subject, but that great strides have been made since the knowledge of its cause and the proper management of its treatment.

That this disease causes more than twice as many deaths as all other contagious diseases we know of.

It causes one death out of every eight from all causes.

Of all people who die between the ages of 15 and 60 years, 37 out of every 100 die of consumption.

In industrial occupations half the mortality and more than half the invalidism is caused by consumption.

Nine thousand people die annually in Canada from this disease alone, and 3,291 in the Province of Ontario.

Consumption is not hereditary, as generally understood.

It is a contagious disease.

Consumption is caused by a germ introduced into the body from without by inhaling minute dried particles of sputa floating in the air, and by food, especially from milk from tuberculous cattle.

In advanced stages of the disease millions of these germs are thrown off in the sputa each day by a single individual.

Consumption is preventable and curable in many cases.

If we knew 50 years ago as much about the disease as we do now, and used the knowledge to the best advantage, consumption would probably be as scarce now as smallpox, and a reproach to a community in which it occurred.

The conditions which seem necessary at present to cope with this disease in the general dissemination of knowledge amongst the people of what is known about the disease so that they may guard against infection and disperse their minds of false ideas, which they may entertain of the disease. The people should be educated on the subject.

It is stated positively by authorities that if consumptives could be placed in rural sanatoria, a great proportion of present invalids would be cured or have the disease arrested.

If relatives, friends and the public were thus protected the danger from contagion, and therefore new cases from them would cease.

If houses, offices, factories, etc., where consumptives have been for any length of time were thoroughly disinfected and if expectation could be stopped on the streets and public places almost every source of contagion would be stopped and new cases become rare.

Recent Ontario legislation secures government co-operation and help and makes it possible for municipalities to take steps for the erection and maintenance of sanatoria for treating consumption amongst all classes.

Your committee would therefore recommend that the board make an effort to get the city of Chatham and adjoining municipalities through the county council to build a sanatorium somewhere in the county in high ground—perhaps the ridge opposite the shore of Lake Erie would be considered suitable and might be selected by aid of municipalities, government and charity.

The institution would be open at all times for rich and poor alike.

And your committee further recommended that committees be appointed to confer with the county council, the medical practitioners, and municipal and charitable associations in the county of Kent to promote the scheme of establishing such a sanatorium, and to collect further statistics regarding consumption and its treatment in sanatoria.

Mayor Salmon moved, seconded by

R. S. Dunlop, that the report be adopted. Carried.

A HEALTHY MONTH.

Dr. Hall reported that there were no contagious diseases reported since the last meeting. The three cases of diphtheria reported at the last meeting had all recovered.

Moved by Mr. Richards, seconded by Mr. Dunlop that the health inspector visit all business places on King street and report on those that have not proper closets for the help employed. Carried.

Dr. Thornton said in regard to the convention at Ottawa called by Lord Minto, to discuss proper methods for limiting the disease, the railroads had offered a single fare rate.

Mayor Salmon—I think we should send the Medical Health Officer.

Dr. Thornton—There is no doubt of the importance of the subject.

Mr. Westman—The importance of the subject requires that some one should go as our representative would get better ideas from reports of the convention. Mr. Westman moved, seconded by Mr. Salmon, that the Medical Health Officer be sent as the representative of the Board. Carried.

It was moved by Mayor Salmon, and seconded by Mr. Richards, that whereas it has come to the knowledge of this board that there are persons afflicted with tuberculosis working in business places in the city, where they come in contact with the other employees, leaving them liable to contagion, this board advise that the employers take every means possible to protect the health of the employees against contagion from such cases. Carried.

A NEW DEPARTURE.

A New, Effectual and Convenient Cure for Catarrh.

Of catarrh remedies, there is no end, but of catarrh cures, there has always been a great scarcity. There are many remedies to relieve, but very few that will really cure.

The old practice of snuffing salt water through the nose would often relieve, and the washes, douches, powders and inhalers in common use are very little, if any, better than the old fashioned salt water douches.

To cure catarrh, whether in the head, throat or stomach an internal antiseptic treatment is necessary to drive the catarrhal poison out of the system, and the new catarrh cure is designed on this plan and the remarkable success of Stuart's Catarrh Tablets, is because, being used internally, it drives out catarrhal infection through action upon the stomach, liver and bowels.

Wm. Zimmerman, of St. Joseph, relates an experience with catarrh which is of value to millions of catarrh sufferers everywhere. He says: "I neglected a slight nasal catarrh until it gradually extended to my throat and finally even my stomach and liver began to keep up and day a day's work I let it run along until my hearing began to fail me, and then I realized that I must get rid of catarrh or lose my position, as I was a clerk, and my hearing was absolutely necessary."

Some of my friends recommended an inhaler, another a catarrh saline, but they were no good in my case. I was not at all satisfied. I heard of Stuart's Catarrh Tablets and bought a package at my drug store. They benefited me from the start and in less than four months I was completely cured of catarrh, although I had suffered nearly all my life from it.

They are pleasant to take and so much more convenient to use than other catarrh remedies that I feel I can not say enough in favor of Stuart's Catarrh Tablets.

A little book on catarrh and cure of catarrh will be mailed free by addressing F. A. Stuart Co., Marshall, Mich., and the Tablets are sold by all druggists in the United States and Canada.

RAIDS AGAINST THE JESUITS.

Crowd in Valencia Stone Windows of College of the Order.

Valencia, Spain, Feb. 5.—The anti-Jesuit demonstrations which began in Madrid in connection with the anti-clerical play "Electra" have spread to Valencia. Sunday morning a crowd in front of the Jesuit Church of the Sacred Heart, where a confirmation of children was in progress, and shouted "Liberty forever!" and "Down with the Jesuits!" A Jesuit who was leaving the church was hoisted, and then the crowd marched to Jesuit College and stoned the windows and doors, still shouting "Down with the Jesuits!" Finally the demonstration was dispersed by gendarmes.

HOW ARE YOUR NERVES?

If they are weak and you feel nervous and easily "flustered," can't sleep, and rise in the morning unfreshed, your blood is poor. Strong nerves depend upon rich, nourishing blood. Hood's Sarsaparilla makes the nerves strong by enriching and vitalizing the blood. It gives sweet, refreshing sleep and completely cures nervous troubles. Begin taking it to-day.

Nausea, indigestion are cured by Hood's Pills.

LOW RATES WEST AND NORTH-WEST.

On Feb. 12th, and on each Tuesday until April 30th, the Chicago, Milwaukee & St. Paul Railway will sell one-way second-class tickets at the following very low rates:

To Minnesota points - \$25.00
To North Pacific coast points 30.00
To California - 30.00

These tickets will be good on all trains and purchasers will have choice of six routes and eight trains via St. Paul and two routes and three trains via Missouri River each Tuesday. The route of the famous Pioneer Limited trains and the U. S. Government mail trains.

All Ticket Agents sell tickets via the Chicago, Milwaukee & St. Paul Railway, or for further information address A. J. Taylor, Canadian Passenger Agent, 4 King Street East, Toronto, Ont.

WILLIAM GORDON.

THE DISTRICT.

IRWIN.

The young people are busy preparing for a grand concert to take place in the near future. Announcements later.

Mrs. Frank Sutor fell off the veranda and fractured her arm at the wrist.

Frank Sutor, who has been seriously ill for the past week, is somewhat improved.

Miss Bessie Lee has become a student at the Krusche Conservatory of Music, the pupil of Miss Hillman.

To Mr. and Mrs. Sam. Sutor, a son.

BLOOMFIELD.

Miss Emma Wilcox was confined to the house last week with erysipelas. She is improving.

Sunday school is in good working order now, but the secretary is on the sick list.

Thos. Taylor, who got his finger severely cut, is improving, though he is not able to use it yet.

Wm. Hanning is looking after the sick and afflicted and getting the young men to go to Bloomfield Sunday school. William is one of the committee.

EAST BRANCH.

Fine sleighing on the river. Elegant moonlight nights. Good wheeling.

G. Seward is still confined to his room and is under the care of Dr. Mitchell.

A. Mikle shipped his hogs last week dressed.

Mrs. G. Powers has offered her farm for sale.

A. Brown, of Charlestown, spent Sunday at Allen's.

Mr. Becker, of Wallaceburg, spent a couple of days on the East Branch last week.

Mrs. C. Woolver received the news of the death of her father, Mr. Harris, of Michigan, on Friday last.

Miss J. McKee, of St. Thomas, is spending a few weeks the guest of her daughter, Mrs. J. E. Richardson.

A large number from here attended the memorial service of our late beloved Queen in the town hall, Wallaceburg, on Saturday afternoon.

The old bear certainly saw his shadow last Saturday and decided to go back and house up for another winter.

The hens in this neighborhood appear to be on the strike.

Mr. E. and Miss S. Nickle spent Sunday on the East Branch.

The geographical social and entertainment on Friday night last was indeed a decided success. The school room was beautifully decorated with evergreen boughs and the picture of our late beloved Queen was draped in black and was surrounded with many flags flying half mast and above this picture was this motto in large letters, "We mourn for one who was more than Queen." A beautiful program was rendered after which refreshments were served. J. N. McCoy occupied the chair. All enjoyed a very pleasant time. The sum of \$15 was raised.

NORTH BUXTON.

Mrs. J. O'Rourke is much better. Frank Shupe is convalescent.

Mrs. S. Deo is very low with inflammatory rheumatism.

The young men of Raleigh, who were so successful in the recent sparrow match with Tibury young men, tripped the light fantastic in Murphy's Hall the other evening at the expense of the latter contestants. They reported having spent an enjoyable time.

Miss Maggie Givens recently entertained a number of friends at a birthday party, where a pleasant time was spent. Miss Givens was the recipient of many handsome and useful presents.

Messrs. James Robbins and Herbert and William Morris, of Detroit, are under their respective parental roofs again.

W. H. Moore, Pittsburg, Pa., paid a flying visit to his parents here this week.

Messrs. Geo. Wilcoxson and Charles Shupe are busily engaged hauling logs for Wm. Drader, Chatham.

James Rhodes is getting in a stock of logs again this winter.

Thomas Wallace is getting out ma-

Miner's Liniment - Lumbago's Friend.

The Delegation Report Favorably

Continued from First Page.

involve per cent a charmer matter, and produce about eight and a half per cent of sugar.

The cost of producing the sugar including cost of beets is about three and a half cents per pound.

Low engines are two in number, one hundred and one-hundred and fifty horse power respectively. The boilers are six in number, set in pairs, water-tube construction, carrying a steam pressure up to one hundred and twenty-five pounds, providing a total boiler capacity of fifteen hundred horse-power.

This is an imperfect description, but the machinery is such that to describe properly would require more expert knowledge than your reputation possesses.

About sixty tons of coal are used, fifteen tons of limestone and one hundred and sixty pounds of sulphur, during twenty-four hours. Run of mine coal costs \$2.65, E. O. B. works, limestone \$1.40 per ton. Coke is used for burning lime. The best is obtained, costing \$4.35 per ton.

As to results, the information obtained was as follows: The plant cost in round figures about \$500,000, including railway switches, water pumping plant situated on river bank a quarter mile from factory, having a capacity of three million gallons per twenty-four hours; an elevator and canal for unloading beets from canal boats, electric lighting plant and machine shop, and everything necessary to make what we considered a first class plant.

This season thirty-five thousand tons of beets were received, producing five million pounds of granulated sugar, and one hundred and fifty thousand pounds of molasses. The quantity of molasses is also utilized in a number of other ways, besides a large quantity of molasses that is yet to market.

There is a large quantity of pulp or residuum produced, which is purchased by the farmers and others for feeding purposes, at a figure. The refuse lime is also utilized as a fertilizer, so that every part of the beet and by-products are made a source of revenue.

The whole of the above has netted the company the past season a very handsome profit, which they expect to very materially increase in the future, this being their first year.

It is claimed that all factories work to a disadvantage the first year in starting.

The season's operations (called a campaign) not yet being closed, we could not obtain exact details of the year's business, but they expect to have their balance sheet completed by February 14th, and we were promised a copy of same, which is to be treated as confidential.

We were, however, given sufficient information to satisfy us that such an institution would be of the greatest benefit to the farming community as well as the city and very profitable to the investor.

During four months of the year one hundred and sixty men are employed, the factory being run day and night, for the balance of the year, the skilled workmen are retained about fifteen or twenty in number, who are kept at work cleaning up the machinery and putting it in good condition for the next campaign.

We had a personal interview with Messrs. Thomas and Scott, principal owners of the plant, who expressed themselves as well satisfied with their venture thus far, and well pleased with the season's profits. They seem to take a deep interest in our efforts here and predict for the first campaign to build a beet sugar factory in Canada, a successful future, and from the information received as to this locality for the production of sugar beets, are willing to invest their money with us to the extent of more than half of the capital required. They want no monopoly in providing the plant, but will obtain the best machinery possible to get at the lowest possible price.

All matters considered, we believe that the construction of a beet sugar plant here would be money profitably expended, both for the investor as well as the public.

In conclusion, we beg to state that we were very courteously received by the gentlemen connected with the institution, and given every opportunity to get the necessary information. All of which is respectfully submitted.

(Signed) S. T. MARTIN,
FRED F. QUINN,
J. J. ROSS.

Chatham, Ont., Jan. 31st, 1907.

S. T. Martin, J. J. Ross and John Tru fant, who were in the audience, spoke briefly in endorsement of the report.

ASKING FOR A BONUS.

The Mayor read the memorial drafted by the clerk and himself to the government asking for a small bounty on beet sugar. This was unanimously endorsed.

Ald. Stone moved, seconded by Ald. Cowan, that the report of the delegation was both satisfactory and encouraging, and that the council urge the residents of the city to assist in establishing such an industry in Chatham, and that, in so far as they were legally empowered, the council would act.

The motion carried unanimously.

The Mayor expressed his satisfaction with the report and congratulated the delegation thereon. He saw they had spared no time and pains to get a complete report and get it quickly.

The council adjourned at 8.45.

TELEGRAPH NEWS.

The Sarney ministry in Italy is tottering.

The Duke of Cornwall and York has received enough to sit up for a brief period.

In view of the possibility of a Boer raid, all the ammunition surrendered by burghers at Komatipoort, has been loaded on lighters and moored in the bay.

BIRTHS, MARRIAGES AND DEATHS.

BIRTHS.
LENFESTY.—On Sunday, Feb. 3rd, 1907, at 81 Stanley avenue, Chatham, to Mr. and Mrs. A. E. Lenfesty, a son.

DIED.
GOODWIN.—On Tuesday, 4th inst., at the residence of her grandfather, Peter Miller, Harvey street, Mary Louise, only daughter of P. J. Goodwin, Grand Rapids, Mich., aged six months and seven days.

The funeral will take place on Wednesday afternoon at two o'clock.

THE PROBABILITIES.

G. N. W. Special.
Toronto, Feb. 5, 10 a. m.—Fresh to strong northwesterly winds, fair and cold; zero, or a little below in many localities to-night. Wednesday, fine and decidedly cold.

LOCAL BRIEFS.

Mrs. Thrasher is recovering from a severe attack of tonsillitis.

Mr. and Mrs. R. W. McDaniell, of London, are visiting Misses Binnett, Stanley avenue.

Walter Palmer took his family to Ridgetown to-day where he is engaged by Coats & Son.

Mr. and Mrs. Geo. Stephens were accompanied to Ottawa by Mrs. David Crombie, of Detroit, Mrs. Stephen's niece.

"The Casket Girl" Company, which played here recently, stranded and broke up at Dayton, Ohio, last week.

Mrs. John Edmondson and Miss Ada Hildabrandt left yesterday for Stratford to attend the funeral of Mrs. Edmondson's mother.

Farmers who are going to build fences will do well to buy their wire, hooks, staples, and fence tools from Geo. Stephens & Co. They have everything required for wire fences and their prices are right.

The Canadian Annual will be issued to all paid up subscribers on the 15th inst. There has been some delay that is our reason for the postponement of the date.

W. Newkirk and others, of Dover, are calling a public meeting to be held in the Levesseur Hall, Dover, South, on Thursday evening, at eight o'clock for the purpose of discussing the proposal for a beet root sugar refinery, a binder twine factory and a radial road. A number of prominent gentlemen will be present and address the meeting.

OFFENDERS MAY COMMIT SUICIDE.

If Not a Number of Chinese Officials Will be Executed.

Pekin, Feb. 5.—To-day will be held the first joint meeting between the foreign envoys and the Chinese plenipotentiaries. Only Li-Hung-Chang and Prince Ching had plenipotentiary rights. The other Chinese have merely the status of advisers. All rumors and reports that large numbers of offenders would be executed are without foundation, as only twelve provincial authorities have been named. The Chinese will be requested to punish commensurately with their misdeeds. There is no understanding that at least half of them will be executed or requested to commit suicide, while others must be banished or imprisoned. The real subject liable to cause delay is the punishment of the officials of Peking and the province of Chi-Li, regarding which the envoys have not yet reached an agreement.

FRENCH RUSHING THE BOERS HARD.

Better News From South Africa—Enemy Lose Two Guns.

London, Feb. 5.—Gen. Kitchener, in a despatch from Pretoria, dated Feb. 3, says:—

French's column, in driving the Boers east, captured a 15-pounder and picked up a second gun disabled by our fire.

The commandoes of the Colony are being hustled. The Midland commando is being chased by Haig in the direction of Steytlerville. Sixteen of them have recently been killed by our men.

Our casualties at Modderfontein were two officers killed and two wounded. It appears that the post was rushed on a pitch dark night, during a heavy rain, the enemy numbering 1,400, with two guns.

Campbell, south of Middleburg, engaged five hundred Boers, who were driven back with loss. Our casualties were twenty killed and wounded.

French is near Bethel, moving east, and driving the enemy with slight opposition. Fear of our ambulances, while seeking wounded, were captured. The doctors were released.

Grand Trunk Railway System THE PEOPLE'S POPULAR ROUTE.

From eastern points to west and the quickest and most direct route to the Pacific Coast, via Chicago and its through connections. Luxurious Pullman sleeping cars and elegant up-to-date day coaches run on all through trains. Any agent of the Grand Trunk Railway System will give all information as to routes, fares, etc., on application.

Minard's Liniment Relieves Neuralgia.

Many Noted Men Who Developed Late in Life.

The illustrious poet and novelist, Sir Walter Scott, was an exceedingly dull boy when at school. Professor Daisell said of him when he was at the University of Edinburgh, "Dunce he is, and dunce he will remain."

Richard Brinsley Sheridan, the eminent Irish orator and dramatic author, was so stupid when a boy that his mother upon one occasion introduced him to a tutor with the remark, "He is an incorrigible dunce."

Dean Swift, the eloquent divine and humorist, was by no means a brilliant boy. He was plucked at Dublin university and obtained his recommendation to Oxford "special gratia."

Oliver Goldsmith while a student at Trinity college, Dublin, was notorious for idleness and stupidity. In after years he spoke of himself as "a plant that flowered late."

Dr. Adam Clarke, the English theological writer, was so very obtuse when a boy that his father called him a "grievous dunce."

The poet Thomas Chatterton was sent home to his mother with the very discouraging accompaniment that he was a "fool, of whom nothing could be made."

Scotland's national poet, Robert Burns, was a dull boy, "good at nothing save athletic exercises."

The great Italian dramatist, Vittorio Alfieri, was a most unsuccessful student and left college but little wiser than when he entered it.

When a schoolboy Isaac Barrow was noted for his savage temper, his idleness and his stupidity. He caused his parents much trouble, and his father often said, "If it pleases God to take any of my children away from me, I hope it may be Isaac, the least promising of them all."

Sir Humphry Davy, the eminent English chemist and natural philosopher, was but an "ordinary" schoolboy, giving no promise of future greatness.

Robert Clive, the English general, was dubbed a "dunce" when a boy, and to get rid of him his family gladly permitted him to go as an ensign to India. He fought his way to a colonelcy by the time he reached manhood, distinguished himself in 1751 by his success against the French, and in 1756 saved the English rule in India by driving Suraj-ad-Dowlah out of Calcutta and routing his army.

Eventually he returned to England wealthy and covered with honor.

Dr. Thomas Chalmers, a Scottish divine and author, was so dull and cared so little for learning when a boy that he was dismissed from the parish school at St. Andrew's as being a "hopeless dunce."

GOT THEIR QUARTERS.
She Was Selling Souvenirs From the Southern Battlefields.

They were very busy when she entered, but beauty is far better for the eyes than figures, and they all dropped their pens and looked up.

"What do I do for you, miss?" said the confidential clerk, glancing at her, stunning gown and picture hat.

"I am afraid I am intruding on your time," she said sweetly.

"Rest assured you are not," she opened a dainty little satchel and brought forth several blocks of wood.

"Gentlemen," she said, "I am selling these souvenirs of Lookout mountain and Chickamauga battlefields for 25 cents each, the proceeds, after expenses are deducted, to go to a deserving charity.

These little blocks of wood, of course, possess no intrinsic value but the members have been listed for punishment are without foundation, as only twelve provincial authorities have been named. The Chinese will be requested to punish commensurately with their misdeeds. There is no understanding that at least half of them will be executed or requested to commit suicide, while others must be banished or imprisoned. The real subject liable to cause delay is the punishment of the officials of Peking and the province of Chi-Li, regarding which the envoys have not yet reached an agreement.

How much more she would have said can only be guessed at, but of course they would. The staff of clerks passed up their quarters like small boys before the circus wagon.

"Thank you, gentlemen," she said, bowing herself out. "You have indeed assisted in a noble work."

Then came John who follows get them little blocks?" he inquired.

"Bought them from a lady," responded one. "They are souvenirs from the battlefields of Lookout mountain and Chickamauga."

"Did she have on a pink dress?"

"Carry a little satchel?"

"Yes. Where did you see her, Jimmy?"

"Down in a furniture factory asking the foreman for little blocks. She told him she wanted them for a child to play with. Say, you fellows don't know Lookout mountain souvenirs when you see them. Them blocks come outen saw-logs."

Flies in Winter.
That flies are present in the summer and absent in the winter is a matter of common knowledge. But the flies do go in to winter, however, is a question which few can answer.

This mystery as to the whereabouts of flies in the colder months is deepened by the fact that flies, like Adam and Eve, are born fully grown and of natural size. There are no small flies of the same species, the little ones which you occasionally observe and feel being of a different kind from the larger ones.

In winter, if a search of the house be made, in a furniture factory asking the foreman for little blocks. She told him she wanted them for a child to play with. Say, you fellows don't know Lookout mountain souvenirs when you see them. Them blocks come outen saw-logs."

In these summer torments will be found in great numbers secreted in warm places in the roof or between the partitions of floors. Around the chimney myriads of them may be seen hibernating comfortably.

Rank Selfishness.
Clara—I hear, Carrie, that you have refused Frank Sweetser.

Carrie—I had to do it. He is so selfish, you know. He told me he could not live without me. Just thinking of himself.

For the Children's Sake.
"That boy he married her because he felt that his children needed a mother."

"Yes. He has just bought her a \$250 toy dog and sent his children to live with his first wife's mother."—Chicago Times-Herald.

Ebony is always soaked for 6 to 13 months as soon as cut. It comes chiefly from Mauritius and from Ceylon and the East Indies.

Widowers, like tumble down houses, should be repaired.—New York World.

MEN OF NOTE.

United States Senator Jonathan Ross has been chosen president of the Vermont Bar association.

John Wananaker has been re-elected president of the Pennsylvania State Sabbath School association.

The house of commons has lost three of its best chess players.—Horace Plunkett, A. Strauss and J. Howard Parcell, brother of the late Irish leader.

Lieutenant Colonel du Paty de Clam, who was so prominent in the Dreyfus case, will soon retire on a pension, as he has served for the regulation period.

Sir Edward Watkin, the great English railway magnate, has since 1804 lived in absolute retirement and rarely leaves his house. His health is said to be failing rapidly.

Though Joel Chandler Harris has left the Atlanta Constitution, his family is still represented on the staff, his son Evelyn being city editor, and his son Julian managing editor.

Colonel Frank S. Hastings, a retired millionaire of San Francisco, is erecting in that city's Golden Gate park, at a cost of \$4,000, the largest flagpole in the world—350 feet in height.

General O. O. Howard, one of the few surviving corps commanders of the civil war, was honored by his friends with a complimentary banquet in New York on his seventieth birthday anniversary, on Nov. 8.

John Huston of Milwaukee, who built the first brick business block in that city, has just celebrated his ninetieth birthday. He was graduated from Yale in 1833, and in 1839 went to Milwaukee, then a struggling frontier town.

Professor Wilhelm Oncken of the University of Giessen (Hesse), who was intimately acquainted with the late Prince Bismarck, writes to a Dresden journal that Bismarck's last prayer was: "Lord, I believe. Help thou mine unbelief."

Lord Wolseley, when he is free from his duties as commander in chief of the British army, will at once begin preparations for an extensive tour through Canada, as he has long had a wish to go over the scenes of his old exploits on the Red river expedition.

Mr. Schalkbarger, who is acting as president of the Transvaal in place of President Kruger, is said to have the personal appearance of an American Methodist preacher, but is a born fighter. He began as an assistant field cornet in 1861 and rose to be colonel of the Natal Mounted Rifles in 1882.

General Sir Anthony Blaxland Stanham, who recently died in England at the age of 94, was one of the most distinguished soldiers of the British empire. He gained his first experience in warfare in the Crimea, and was present at the destruction of the Turkish-Egyptian fleets in Navarino bay in October, 1827.

Colonel Marchand, before leaving Paris, had a most remarkable landlord. The African explorer hired a flat as a war office for one year at a rental of \$640. The landlord steadfastly refused to take a penny of the money due him, stating that he was sufficiently recompensed by having the honor of finding a residence for the intrepid soldier who crossed Africa.

THE DOMINIE.
Rev. Dr. Parker, the famous Congregational preacher of City temple, London, who is 70 years old, expects to retire next year.

C. D. Kenny, a merchant of Baltimore, is to build a Catholic church in Elkhridge, Md., to cost \$25,000 and to be a memorial to his brother, the late Rev. John T. Kenny of the Redeemerist order.

The Rev. Dr. Edward Everett Hale, in spite of his years, continues to be active in the work of the Boston Associated Charities, and himself does much of the necessary personal investigation and visiting among the poor of the city.

Professor Kraus of the University of Freiburg in Baden, has discovered a large picture representing Christ and the four apostles. It was found in the apex of the church at Niederli, on the island of Reichenau, in Lake Constance, and is said to have been painted in the eleventh century.

The Rev. Dr. David G. Wylie, who was unanimously elected as moderator of the synod of New York at Geneva, is one of the youngest men who ever held that office.

He is pastor of the Scotch Presbyterian church of New York city, which will celebrate its one hundred and forty-fifth anniversary next spring.

JEWELRY JOTTINGS.
A double Douglas heart daintily enamelled on a brooch, as is a simple little wreath of leaves in green.

Imported watch fobs, a French fancy, come in gun metal of showy and heavy designs, with circular pendants bearing classic heads and exploiting other original ideas.

Tie clasps or holders have become a standard article. Some are simply a triangular light frame, others a hollow ball with three openings, and others still a genuine clasp, fastening around the tie.

One might write a chapter on purses alone as they are this autumn exploited by the jewellers. Most popular, however, appear to be the chain purses, in which we have the new cut of mail, fish scale, fleur-de-lis, rings and dot meshes.

OUR JOCKEYS ABROAD.
The Jockey has his uses, and if making John Bull sit up is one of his faculties he has gained new value for his countrymen.

"It is English money they have come after," says the English of gambling Americans. Why not? We've sent a steady amount over in the way of horses.—St. Paul Dispatch.

T. Sloane has been dropped by the Prince of Wales and is probably now engaged in memorizing that little thing touching the dangers of putting one's trust in princes. Still Mr. Sloane has the consolation of knowing that his highness is likely thinking something similar about jockeys.

RAILWAY TIES.
When, in 1827, the first railway line between Dresden and Leipzig was established, no one was permitted to buy a ticket before he had shown his passport.

The New Orleans city council, by a vote of 12 to 4, defeated the ordinance proposing to renege the star car system and compel the negroes to use separate street cars from the whites.

T. & D. MANUFACTURING RETAILERS | T. & D.

Last Week

Was a busy one with us. Colder weather and genuine bargains gave an impetus to trade that keeps every department wide awake. Trade is life with us.

This week will see more surprises and bigger sales, that is the tendency—better and better each week. You'll find bargains all over the store. You can judge by these as well as anything—

One lot of Little Boy's Vesture Suits, 4 to 8 year sizes, very prettily trimmed, some in brown and others in dark green shadings, regular price \$4.50, reduced to—
\$3.50

12 Boys' 3 Piece Suits, medium and dark shades, all strong and well made suits, excellent value at original price, 10 to 15 year sizes, reduced from \$5.00, \$5.50, to—
\$4.50

Thornton & Douglas.

THE DISTRICT. Dr. A.W. Thornton

L. D. S. Toronto University.
Office—First Door East of Standard Bank Telephone 164

Hall Thursday, was a success. Fine addresses were given; songs and music were also good.

Miss Coulter is the guest of Dr. and Miss Shaw.

A surprise party which called upon Mr. and Mrs. Reid on Tuesday evening was well attended and had an enjoyable time.

Mrs. Rachel Lomax is home for a few days.

The late Jno. Hood was laid to rest Jan. 26th at Dresden cemetery.

A grand party was held at Mr. Liner Smith's last week.

TILBURY.

Feb. 5.—W. A. Houston, of the public school here, was quietly married in Paris on Saturday to Miss Stella Brown, formerly teacher here.

Geo. Chalmers drew the parlor suite at N. Smith's on Saturday.

Mrs. Rice and daughter, of Ridgetown, will move here this spring.

Mrs. Coutts and grand-daughter, Katie Quinn, leave to-day on a visit in Sudbury, with her daughter, Mrs. Holland.

The Ladies' Guild of the English church met at Mrs. Sharp's.

The hockey match in Windsor on Friday resulted in a tie 2 to 2. The Windsor club will play here Friday night.

Mr. LePouvre, of Tilbury West, died yesterday of pneumonia.

Will Stevenson, of the C. B. C. Chatham spent Sunday with his parents here.

The Daily Planet is on sale at Johnston's drug store.

THAMESVILLE.

Feb. 5.—R. Ferguson, M. P. P., was in London yesterday.

Miss Louise McKee, of Windsor, spent Sunday with her mother.

Miss McParlane is visiting friends in Whitby and Toronto.

Miss Butler leaves to-morrow to spend a month in London.

Miss G. Ripley, of Chatham, spent Sunday at home.

WALLACEBURG.

Feb. 5.—Misses Nellie and Dolly Dupont, of Marine City, visited friends in town last week.

J. A. Burgess and Miss Yula are visiting in Toronto this week.

Will Crist and Joe. Harrison visited in Dresden on Saturday last.

Mr. and Mrs. Shambless, Fraser and Clare visited relatives in town over Sunday.

Mr. Laycock and Mr. Fothergill, of the Bank of Montreal, visited in Sarnia on Saturday.

A very large crowd turned out to the memorial service on Saturday last. Speeches were delivered by the clergymen, the mayor and others.

Minard's Liniment Cures Diphtheria.

Municipality of Raleigh.

Take notice that the Municipal Council of the Corporation of the Township of Raleigh will meet in the Township Hall on Monday, the 18th day of Feb. 1907, at 10 a. m., for dispatch of business, and Court of Revision on the Burns Drain.

By order,
A. E. ROBINSON, Clerk.

Ceylon and India Tea Green or Black

To get clean GREEN tea use the machine-made tea of Ceylon and India. It contains no adulterants, no sticks, no willow leaves—its all tea.

The same is true of BLACK.
