## A. D. FARRAH & CO. Newcastle

## Youth Found Dead Near His Home

A sad fatality occurred here on Saturday evening when LeRoy Vye, fifteen year old adopted son of Mr. Addington Vye was found dead near the school house with a shot wound in his body just below the heart. When found a gun lay alongside the body.

It appears on Saturday forenoon the boy had been asked to take the gun, which was not in working order and a broken garden hoe into town to be repaired. He was not seen again by his people until they found him dead near the edge of the woods back of the Vye home at eleven o'clock at night, when they set out in search of him on account of his failing to return home.

Immediately upon finding his body Dr. Park was called. He said that the young lad had been dead for some time. Coroner Dr. Bell was also called and gave orders for the removal of the body.

The consensus of opinion here is that an accident had occurred and it is surmised that the young lad had accidentally struck the trigger and

the shot entered the body. That death had not been instantaneous was discernable by the fact that deceased's cap was found quite a few feet away from the body, while his post office key was found in another spot. It was also found that deceased had apparently taken sick and had vomited about ten feet away from where his body was discovered. The barrel of the gun was also packed with mud at the muzzle, which would indicate that after the fatal shot deceased had used the gun for the purpose of supporting himself in his endeavour to reach home.

The supposition is that the lad had returned from town towards evening and had gone to get the cows before coming to the house and it was at this time that the sad fatality happened.

The deceased young lad is survived by his mother, Mrs. Bertha Wry, who is housekeeper for his foster father, also by two sisters, one of whom resides in California and the other in Truro. One brother, Preston Wry, of Sackville also survives.

## CONSERVATIVE CAMPAIGN OPENS WEDNESDAY

The Liberal Conservative Campaign of Northumberland County in the interest of their Candidate, Mr. Chas. E. Fish will begin with bumper meetings in Baie St. Anne and Hardwick, on Wednesday, October 7th. The speakers will be the candidate, C. P. Hickey, John S. Martin and D. S. Creaghan. From now until the close of the campaign Mr. Fish and other speakers will address the electors in every polling division of the county. The committee in charge are arranging for outside speakers to assist the candidate at intervals throughout the campaign, announcement of which will be made from time to time.

## SPLIT IN THE LIBERAL RANKS IN NORTHUMBERLAND

Fred M. Tweedie of Chatham, was chosen to succeed W. B. Snowball, the Liberal standard bearer in this county recently deceased, at a special convention of the party held here Friday. Three names went before the convention, the other two nominees being C. J. Morrissey of Newcastle, and R. J. Gill of Barnaby River. On the first ballot Mr. Gill was low man and his name was dropped. The result of the second ballot was Tweedie 93, Morrissey 77. Mr. Tweedie was accordingly elected.

In a rather half hearted way the selection was made unanimous, on the motion of the two defeated candidates. The convention was held in the Opera House, there being 156 delegates present. A rather significant fact was that there were 169 votes cast on the first ballot and 170 persons voted on the second ballot. That dissention was rife in the ranks of the Liberal Party in this county and that a split is imminent was strongly evidenced by the proceedings.

Before the balloting took place, I. J. Soy of Amherst and Chatham, a spectator at the nomination proceedings, created a furor when he stated that the late W. B. Snowball had informed him that Mr. Morrissey had told him (Snowball) that he intended to run as an independent and that he had an offer of \$7,000 campaign money from prominent Conservatives.

This statement was greeted with a storm of protest from Mr. Morrissey's supporters and its truth was denied by Mr. Morrissey in his address after the end of the voting.

Hon. W. E. Foster, the newly appointed Secretary of State, was present at the gathering. He spoke briefly to the delegates. He said he did not rightly know the issues of the present campaign but later when he learned what they were he would come back to Northumberland County and tell the electors. Mr. Tweedie and Mr. Morrissey delivered brief addresses, predicting a Liberal victory in this county on Oct. 29th.

A resolution was passed expressing regret at the passing of the late W. B. Snowball. The convention closed after giving three hearty cheers for Mr. Morrissey apparently overlooking their candidate, Mr. Tweedie.

## NEWCASTLE CLUB TENNIS TOURNAMENT

Miss Jean Jardine is this year the winner of the ladies' singles in the tennis club local tournament and thus won the bracelet presented by Campbell Clark. The final results were: L. Manny won from Annie Bell by default; Mrs. J. A. Creaghan won from Mona Lindon, 6-0, 6-4; Jean Jardine won from Margaret McCurdy 6-2, 3-6, 8-6; Alleen Creaghan won from E. Nicholson by default; Louise Manny won from Mrs. J. A. Creaghan 7-5, 6-1; Jean Jardine won from Alleen Creaghan 6-2, 6-2.

In the final round Jean Jardine won from Louise Manny 6-2, 5-7, 6-4.

## DOAKTOWN VISITED BY SERIOUS FIRE

Doaktown received a severe scourging from fire at an early hour Saturday morning. The northwest side of the main street opposite the C.N.R. station was cleared out before the fire stopped and the loss is placed in the vicinity of \$25,000. For a time it was thought that the fire would communicate with the opposite side of the street where the exchange of the New Brunswick Telephone Company is situated but fortunately the fire did not spread in that direction. The Aberdeen Hotel, the post office and three other buildings were destroyed.

## THE DIOCESAN CONVENTION OF C. W. LEAGUE

At the diocesan convention of the Catholic Women's League held at Campbellton on Tuesday and Wednesday, the following were elected officers for the ensuing year:

Mrs. D. Fraser, Chatham, President

Mrs. C. J. Morrissey, Newcastle 1st. Vice

Mrs. McMurray, Campbellton, 2nd. Vice

Mrs. Jas. Nowlan, Nelson, 3rd. Vice

Miss Annie Fraser, Loggieville, Recording Sect'y

Mrs. G. F. McWilliam, Newcastle, Corresponding Sect'y

Mrs. W. F. Cassidy, Chatham, Treasurer.

Mrs. C. J. Morrissey, Convenor of Immigration and Child Welfare committee.

Mrs. Madden, Campbellton Convenor of Organization committee

Mrs. S. Blanchard, Dalhousie, Convenor of Magazine committee.

The Presidents of each sub-division are to be diocesan councillors ex-officio.

A new sub-division was established at Athol on Wednesday afternoon. It was decided to hold the next annual convention at Newcastle.

## Big Slash in Prices This Week

Don't send your Money out of Town---We have filled Several orders in the past week. You can do better here, thus keeping your money at home. All out of town orders will be given our careful attention.

**CANNOT USE COSMETICS**

School teachers have been forbidden to use cosmetics by one municipality in British Columbia, and as other there has been no action taken, how many teachers must not dress. A town in Virginia has discharged a teacher because she entered

ed a beauty contest and won it. But why stop with a little regulation like that, "Why not," says the Toronto Globe, "regulate for all our women teachers their hours of sleeping and eating, restrict them in dress to uniforms, require them to be of plain appearance, and abolish their salaries?"

**Removal Of Sales Tax to be Asked**

Complete removal of the sales tax in Canada will be one of the subjects brought forward for discussion at the national conference of Canadian Boards of Trade, which will be held in Winnipeg this winter.

## Town Topics

"Bits on the Tip" of Everybody's Tongue

Vol. 2 No 40 NEWCASTLE, N. B. OCT. 6 1925 FREE

### NEW XXX

Who was it said that a cook who invented a new flavor was entitled to a kingdom? Let him cede over eight to Moirs forthwith--for here are that many additions to the XXX list of Chocolates--Plain Silky Raspberry Silky Mint Silky Valva Molasses Taffy Cream Brzils Creamed Almonds Cream-O-Milk Chocolate Wafers

No-Moirs are not responsible for the chocolate coating that created such a sensation in Picadilly lately. It was worn by an Oxford undergraduate.

**AFTER EVERY MEAL**  
**WRIGLEY'S**  
 makes your food do you more good.

Note how it relieves that stuffy feeling after hearty eating. Sweetens the breath, removes food particles from the teeth, gives new vigor to tired nerves. Comes to you fresh, clean and full-flavored.

### REGISTRATION OF VOTERS

Recent changes in the election law of Canada make it necessary for quite half of the population to personally register themselves as voters. If they are to have their influence on polling day. The list of voters prepared under the provincial laws include all householders and real estate owners. The women voters and men who do not figure on the provincial lists must secure their votes by registration. Fairly adequate facilities are provided for the service. In most cases there are registration offices within a short distance of the voter's residence, and as they are open in the evenings, any who neglect the duty of registration will themselves be to blame.

The election on October 29th will have important meanings. There are serious issues dependent upon its result. Whoever would make his voice effective in their decision and who is not included in the provincial lists, should register as a preliminary to voting. All women and all young men, or old men, who are not householders, are concerned.

### Has Design for New Flag for Canada

Regina, Sask., Sept. 28—The question of the amalgamation of all veterans' organizations in Canada under one banner as suggested by Earl Haig during his recent visit will probably be the most important subject to be discussed at the meeting of the Army and Navy Veterans' Association which opens in Regina Tuesday morning. About 250 delegates are expected to attend from various parts of the Dominion.

W.S. Simpson, New Westminster, B. C. has submitted a design for a suggested flag for the Dominion of Canada to be submitted to the convention for consideration. The design shows the Union Jack in the top left hand corner with the great dipper on a red background.

**Put Real Mustard in Your Kit**

Right at the top of the list of camping necessities is a tin or two of real Mustard.

Men who fish and men who shoot know what a spiciness and flavour mustard freshly mixed with cold water, adds to the ham, bacon, fowl, venison and other good things they eat in camp.

### Seeks To Abandon Losing Railroads

**Boston & Maine Reports Losses of \$600,000 Yearly on some branch lines**

Applications for authority to discontinue rail operation on six branch lines, aggregating sixty-three miles, on which the annual operating losses are said to exceed \$150,000 were filed with the interstate Commerce Commission on Saturday by the Boston & Maine Railroad. Losses totaling \$600,000 annually are said to be involved in all of the lines now before the commission in such proceedings by this railroad.

In a statement, announcing the new petitions, the Boston & Maine asserts that the public and the industries on these lines are now being served to some extent by motor vehicles, and in most instances can be served adequately by motor bus and motor truck routes.

The lines on which the application was filed include: Reformatory branch, from Bedford to Reformatory Station, seven miles; Bedford to North Billerica, seven miles; Lissag branch, six miles; Ashburnham branch, three miles, all in Massachusetts; Kenebunkport Branch, five miles, in Maine; and Rochester to Lakeport, thirty-five miles, in New Hampshire.

### LONDON IS SWEEPED BY THE DANCE CRAZE

London, Sept. 30—Amateur musicians are pouring into London from all parts of Britain, to take advantage of the dance craze that is sweeping London.

The winter season promises to be a record breaker. Hotels, restaurants and cafes are making big preparations to accommodate an unexpected host.

Where dancing facilities do not exist the floors are being laid and hands engaged.

The demand for bands which can play good dance music is becoming important, and is tempting many musicians hitherto devoted to classical programs and concert work.

London now possesses 200 good dance bands, it is estimated. New bands are being booked constantly for engagements this winter at the old dance centres and at the new ones which are appearing at every hand.

### High Shoes New Style

Leicester, England, Sept. 29—Marked changes in the style of women's footwear are indicated by orders received by local shoe manufacturers for 20,000 pair of high-legged, Russian style boots for women. The drift of the market seems to be away from oxfords and other low shoes for women, and dealers are asking quotations on various sorts of extremely high shoes.

### Canadian National Railways Earnings

The gross earnings of the Canadian National Railways for the week ending Sept. 21st, 1925 have been \$5,264,236.00 being an increase of \$883,003.00 or 20% over the corresponding week of 1924.

The gross earnings of the Canadian National Railways from Jan. 1 to Sept. 21, 1925 have been \$161,454,188.00 being a decrease of \$4,242,753.00 as compared with the corresponding period of 1924.

### Canada's Wool, Woollen and Knit Goods Industry at the C. N. E.

Mrs. Cockshutt, wife of the Lt.-Gov. of Ontario, looking exceedingly smart in an "all-Canadian" costume, in which she attended the opening of the Canadian Woolen Goods exhibit at the C. N. E. The two-piece sports costume is of purple iridescent fabric with grey at the collar, cuffs and pocket, the wool being grown, spun, dyed and knitted in Canada. The ensemble cost is of \$750.00. A magnificent specimen of pile cloth with a silver fringe from a Canadian loom. The coat has a straight back with pocket flaps, with a shawl collar and cuffs of grey Canadian wool. The dress with grey and purple stripes is also made in Canada. The exhibit of Canadian Woolen Goods is held in the Exhibition Building at the C. N. E.

Tens of thousands of people obtained an entirely new idea of the wool growing and wool manufacturing possibilities in Canada at the exhibit of the Wool, Woollen and Knit Goods Industry at the Canadian National Exhibition. The pillars of wool from the nine provinces of Canada supplied by the Canadian Co-operative Wool Growers Association excited considerable comment, and emphasized the fact that although we maintain only 2,500,000 sheep and lambs in Canada, the size, feed conditions and climate would permit the keeping of 25,000,000, and that sheep keeping is the most profitable branch of agriculture. Also that of the 70,000,000 lbs. of wool used annually to clothe the population of our country, some 50,000,000 could be grown here instead of only 15,000,000 lbs. as at present.

The small factory installed with twenty operatives showed the actual manufacture in Canada of fine woollen cloth and worsted yarns, the weaving of fine blankets, woollen cloth and worsted cloth, and the knitting machines making underwear and hosiery. It was a miniature representation of the work that is being done in over two hundred and seventy woollen and knitting mills in over one hundred and forty municipalities.

The finished goods display, which showed what the completed goods looked like after being made on the machines, showed that in quality and style the \$75,000,000 worth of goods produced by the industry annually were equal, and in many cases better, than goods made abroad. It conclusively showed that so far as climatic, physical and technical conditions in Canada are concerned there is no reason why 90% of the woollen and knit goods used in Canada should not be produced in Canada.

**Travellers' Cheques**

WHATEVER way you travel, the safe, dependable method of carrying your money is by Travellers' Cheques.

No one but yourself can negotiate them, and they are as good as cash wherever you may go.

Any of our Managers will be glad to explain the advantages of Travellers' Cheques.

### HER NERVES BETTER NOW

Received Much Benefit by Taking Lydia E. Pinkham's Vegetable Compound

Chatham, Ontario.—"I started to get weak after my second child was born, and kept on getting worse until I could not do my own housework and was so bad with my nerves that I was afraid to stay alone at any time. I had a girl working for me a whole year before I was able to do my washing again. Through a friend I learned of Lydia E. Pinkham's Vegetable Compound and took four bottles of it. I gave birth to a baby boy the 4th day of September, 1922. I am still doing my own work and washing. Of course, I don't feel well every day because I don't get my rest as the baby is so cross. But when I get my rest I feel fine. I am still taking the Vegetable Compound and am going to keep on with it until cured. My nerves are a lot better since taking it. I can stay alone day or night and not be the least frightened. You can use this letter as a testimonial and I will answer letters from women asking about the Vegetable Compound."  
—Mrs. CHARLES CARSON, 27 Forsythe Street, Chatham, Ontario.  
Mrs. Carson is willing to write to any girl or woman suffering from female troubles.

### HALF HOLIDAY ELECTION DAY

Ottawa, Sept. 27.—The afternoon of Election day, Oct. 29, will be a half holiday in the Dominion as the result of an order-in-council passed on Friday and signed yesterday noon.

This is due to the efforts of Hon. James Murdock, Minister of Labor, in having rectified an error in routine of last session.

In June when the Dominion Elections Act was being considered in the House of Commons an amendment was submitted by A. W. Noll, (Comox-Alberni) providing that the afternoon of election day be a half-holiday. That amendment was carried by a vote of 54 to 32.

This amendment and the vote approving it were recorded in Votes and Proceedings. As a result the amendment was not contained in the bill as submitted to the Senate and given royal assent. It was discovered a short time ago and Hon. Mr. Murdock took steps to have it remedied. The remedy, however, is likely to be criticized on the ground that the Governor-in-Council is not competent to amend or rectify the omission of an amendment to legislation. It is held, though, that it may designate any day a public holiday if the occasion demands.

BUY AT HOME

### Danish Count To Hunt In N. B.

Fredericton Gleaser.—Count Heinrich Shimmelman, who arrived in the city from his home in Lydenburg, Denmark, accompanied by the Countess, to spend three weeks in hunting trip in New Brunswick on Cain's River, is one of the largest timber-land owners of Denmark. An extensive traveller, Count Shimmelman was advised to visit New Brunswick not only on account of the natural attractions which it has to offer the sportsmen in search of big game, but also as the result of recent investigations made in the interests of immigration from Denmark to Canada. He has been quite pleased with what he has already seen of the opportunities offered emigrants from his country here during his brief stay and is engaged in visiting points of interest in and about the city, including the Dominion Experimental Station. In order that he may gain a comprehensive idea of what he comes in contact with during his brief stay in the city, arrangements were made for the services of an interpreter to guide him. Everett Akselheim, a native of Norway and a professional interpreter, is acting in this capacity as companion to the Count and Countess.

### DISCOUNT RATE REDUCED TO 4

LONDON, Oct. 1.—The Bank of England today reduced its discount rate from 4½ to 4 per cent.

The reduction, which came as some what of a surprise to the money market is believed to be due principally to the plethora of money and the fact that discount rates recently weakened so much as to make a 4½ per cent rate ineffective.

Treasury bills, lately have been issued at such low rate of interest, that discount houses have been doing business at one per cent, under the bank rate, and had it not been for an afflux of gold, the official minimum would have undoubtedly been reduced earlier.

The trading community will benefit by the reduction, although it is unusual for such a move to be made in the autumn, when there is so much American cotton, wheat and other commodities to pay for.

The reduction surprised and cheered the stock exchange, where business in first-class issues immediately broadened, causing an advance of from 3-8 to 1-2 per cent in British government stocks, and corresponding gains in most other departments.

The feature in the foreign section was a spurt in French bonds of from 1 to 2 per cent, on prospectives of a favorable outcome of the debt negotiations in Washington.

NEW YORK, Oct. 1.—The unexpected reduction in the Bank of England's discount rate to 4 per cent today, created further confusion in the mind of the financial district regarding the prospects of a change in the Federal Reserve re-discount rate. Many bankers have held that the recent stiffening of money rates will be recognized by the re-discount bank through its re-discounting but it was recalled that the rate of the British rate in August had a flow of money to the United States and quickly checked talk of an increase in the New York rate that time.

**BUILDING DESTROYED**  
The unknown origin completely destroyed the residence of Weelock at Quarryville recently. Mrs. Touchie, a daughter of Mrs. Jarline, was the only occupant of the house at the time of the fire. Neighbors were able to salvage practically all of the household effects and furniture from the ground floor. The building was a one-and-a-half story structure and was burned to the foundations.

### Not a Lawyer, But Practised Ten Years

NEW YORK, Sept. 6.—How a lawyer was able to practice law in New York City for ten years without ever having been admitted to the bar, or without even taking the examinations through a proxy, was described by Assistant Henderson of the Bronx yesterday before County Judge Albert Cohn.

Mr. Henderson asserted that William Grossner, who was under arrest on a charge of grand larceny, had had a prosperous legal career in the Bronx up to the time that the charge of grand larceny was lodged against him. Grossner disappeared for a time after that, and a statement of the facts was submitted to the Grievance Committee of the Bar Association as a cause for the man's disbarment. One Grievance Committee reported that it could not throw Grossner out of the legal profession because he was never in it. There was no record of his ever having been admitted to the bar, or having transferred here from another state.

A further search of the records of Bronx County showed that Grossner had been practicing there with considerable success for ten years, having started on his irregular practice ten years ago. Grossner apparently found ignorance of the law no excuse for not practicing it. Assistant District Attorney Henderson said that he represented various individuals, corporations and fraternal organizations he appeared almost always in civil cases, according to the Prosecutor, fastidiously holding himself aloof from the criminal practice.

The charge of larceny was brought against Grossner by William F. Muller, 932 Hoe Avenue, the Bronx. He said that Grossner had collected \$4,000 in cash for him in a real estate transaction but had failed to turn it over. When pressed Grossner gave him a bad check to pay off the indebtedness, according to Muller. The grand jury found an indictment last week. Grossner had collected \$4,000, but Grossner could not be located. Yesterday, however, Thomas Turley, a lawyer of 161st street and Brook Avenue, telephoned to the District Attorney and said that Grossner was ready to answer the indictment. Judge Cohn fixed his bail at \$5,000.

### 23 Candidates Take Tests For Scalers

Twenty-three candidates presented themselves last week at the Department of Lands and Mines for the regular October examinations for New Brunswick scalers' licenses. The examinations are held by the special examining board composed of Chief Scaler A. T. Murchie, Chief Forester L. S. Webb and R. A. McFadgen, and consist of both written and practical tests, the latter being carried out at the Victoria Mills. Candidates for licenses must be 21 years of age, British subjects, and have more than two years of scaling experience before being permitted to take the examination.

**—it Lasts**  
"In the year 1900 I bought one of your Climax Furnaces, which I have used ever since with perfect satisfaction. It has never cost me a cent from the day I bought it till now and apparently is just as good as the day I installed it in my basement."  
—John Miller, Bathurst, N. B.  
A heavy furnace, the Fawcett of 1900. Put it to the test and you will find it is the best of its kind. It is the only furnace in the last quarter of a century

**Furnaces - Stoves - Heaters**  
SACKVILLE, N. B.  
Local Dealer: —The Lounsbury Co., Ltd.

**—and L-a-s-t-s**  
"The only repairs I have had on this furnace in twenty-four years was rivets on the radiator once two years ago. This radiator rivet was burned out through long and hard wear. I do not think that any one can ask a furnace to last any longer."  
S. R. Shirley, Bathurst.

We do, Mr Shirley. For example, the feed neck section in all former furnaces came close to the radiator. In all the new Fawcetts it is so designed to allow free circulation of air thus lengthening the life of dome and radiator even above that of your fine old furnace.

**—and L--a--s--t--s**  
"We have had one in our home for nearly thirty years and only three years ago that any replacements were required excepting a grate being broken when shaking."  
H. S. Hoyt, Westmouth, N.S.

Although there are more Fawcett Furnaces in use than any other Maritime Make, the Fawcett business wouldn't last a week if it had to depend on replacement orders. In the future there are going to be fewer still, because Fawcett Furnaces of the improved type are made of sturdier material, with a greater factor of safety than ever before. Consider the new radiator, instead of being cast iron (strength, minus good radiating) or steel (radiation, minus strength) it is of Toncan Metal (strength, plus good radiation). We measure the progress of our industry not by the parts we replace but by the customers we please.

**This Prize**  
—a handsome Baby Grand steel, nickel and enamel range; a miniature but usable range, will be given for the best story, in not over 200 words, received not later than Oct. 31. It doesn't have to be about the Fawcett, though it won't be barred if it is. Tell what your furnace, your heater, your range, have meant to you; some interesting episode about them; their age; the part they have played in the Christmas banquet—anything in fact of human interest. The story is more than the style. So enter and win.

**Free!**  
Send 10c for postage and wrapping: we'll mail an all-steel Fry Pan, single egg size, Everlasting Handy. Set the type of heating in your home same time.

**"For Public Service"**  
The medal reproduced above was awarded to Fawcett Furnaces, Heaters, Ranges at the Vancouver Exhibition for 1925, against coast to coast competition. The Daily Province, leading British Columbia newspaper, editorially referred to them as doing a "public service."

**Furnaces - Stoves - Heaters**

Ingenious Device  
Recently Invented

Attachment for Motor Cars to Show When Speed Limit is Exceeded-

A bright light flashing at the side of the car and a raucous horn sounding, as soon as the vehicle exceeds the speed limit is caused by an ingenious device recently invented by a Frenchman according to an article in another publication.

Becoming anxious at the alarming increase in motor vehicle accidents and fatalities in that country French authorities called for an efficient remedy of the ever present danger, with the result that a fellow-country man announced his invention.

While not preventing accidents, the device acts as a warning to pedestrians and other drivers that a car is approaching at a good rate of speed and at the same time, if an accident does occur, police constables or bystanders are instantly aware of the fact that the vehicle was exceeding the speed limit at the time.

The principle of the attachment is radically the same as a "governor." When the speed of the engine reaches a certain limit the apparatus functions, and immediately the speed is reduced, the light is extinguished and the horn is silenced. The light is perfectly visible at the side of the car, and the horn may be heard at a great distance. The mechanism is periodically inspected by police officers to ascertain whether or not it has been tampered with.

It is said that the attachment may be adjusted to two speeds, one for the city and one for the country, 15 and 20 miles per hour respectively, or whatever the speed laws call for in the vicinity. To change from one rate to another is the work of an instant. The two lights are of different colors and the horns of different tone, so that if a motorist is driving in the city with the device adjusted to the country rate, the deception may be instantly detected.

The attachment also eliminates the possibility of a motorist charged with a speeding offence, or a witness, swearing that the car was not exceeding the speed limit, or stating that the officer who made the report erred in his judgment, as the light and sounding horn are conclusive proof that the car was violating the speed law.

It is understood that efforts are being made to have the French government rule it compulsory to have manufacturers make the device standard equipment on new cars, and to compel motorists to have one placed on their vehicles.

MUST PASS RIGID TESTS

Father John's Medicine is Made Under Watchful Care of Experts

At the laboratory, where Father John's Medicine is made in Montreal, and in Lowell, Mass., very high standards are maintained in every department. The various ingredients are subjected to most exacting tests and are then prepared under the watchful eye of experts who have had years of experience in making what has come to be recognized as the greatest body builder.  
Father John's Medicine is a scientific blending of cod liver oil with other ingredients by means of specially designed apparatus.  
The preparation is untouched by human hands from the opening of the original containers until the bottle cap is sealed in place by automatic machines.  
Years of study and research have been devoted to developing the process of compounding and, while the formula remains unchanged, its method of preparation has been so improved that it stands today as the finest blending of cod liver oil and other ingredients obtainable.  
It is guaranteed free from alcohol or dangerous drugs in any form.

EDITORS MAIL

We are not responsible for opinions expressed by writers under this heading. Correspondents would oblige by writing legibly, and on one side of the paper only, name and address not necessarily for publication, must always be sent. Correspondence should be as concise as possible.

To The Editor of The Advocate,  
Dear Sir:-

Mr. Barnjum's demands grow apace. A mere pulpwood embargo will not satisfy him now. His political demands, besides, that there shall be a government regulation of prices. From his last reply to me published in The Labor Leader, I observe that he wants to have the cut of timber and pulpwood restricted by statute "to a point where the home demand would equal the supply." And for what purpose? "So that prices might be advanced, both for lumber and pulpwood, to a level where the lumbermen and pulpwood operators could make a profit instead of suffering a loss as they are doing today."

As Dominic Sampson would have said "Tremendous". In these days, when others cry out against excessive prices, this philanthropist wants to see prices artificially forced upward by government action. He has improved on his first idea of raiding the woodlot owners in the interest of those mills for which, naturally, he is so concerned. What he now suggests is that woodlot owners and mill owners should make common cause against those who have to buy the ultimate products of the forest, and that governments should help them.

Here is a hint for other concerns. Why not restrict the amount of coal that may be hewn in the mines, so that there may be an assured profit for the miner and operator alike, thus getting rid of the tiresome coal question? Or what about restricting the amount of grain that may be harvested on the prairies? Force up the price in each case. Are not coal and grain "natural resources" which we should conserve? If in the process of conserving, we make their products dearer, what of that? It will hurt only the consumer. Let him either borrow the money for fuel and food, or be content with a cold house and less nourishment. There is, in truth, no limit to the vista of assured "profit" that is here opened up. It should make the very heart of a profiteer rejoice.

I like Mr. Barnjum's conclusion—"Canada needs a Mussolini." Many, many acts of coercion over the individual are indeed done by the Italian Dictator. But it is not Canada that needs him. It is men like Mr. Barnjum and his associates who need such a chieftain if they are to have their way. And whether our personal rights would all collapse before a Mussolini or not, we are still courageous enough for a fight against Mussolini's local understudy.

Yours,  
Economist.

MAR DEL PLATA, Argentina, Sept. 28—The Prince of Wales, is homeward bound after a six week's visit to South America. H. M. S. S. pulse with the Prince aboard, sailed yesterday.

PROSPERITY FOR CANADA

The policy on which the Conservative Party is appealing to the country is a constructive policy in its every particular. Its application will bear directly and at once on the vital points of the nation's economic establishment. There is nothing speculative or experimental about it. The manner in which it will reset conditions now obtaining may be readily visualized.

The development, progress and prosperity of Canada depends on our being to the greatest extent possible a producing and selling nation instead of a nation consuming the production of other nations. Production and prosperity, in relation to the future of Canada, are synonymous terms. We are equipped with all the basic essentials for becoming a great producing nation; all that is necessary is that we will avail ourselves of them. All the sources of wealth and more than make the United States the wealthiest nation on earth we possess. We have only to employ them to our advantage.

Look at our natural resources. What are we doing with them? We are turning them over to other countries for their enrichment. Our forests are a heritage in themselves but we are not drawing the dividends. Of the wood we export 64% is sold in the raw and only 36% manufactured or partly manufactured by Canadian labor in this country. We import wood—13% of it raw and the rest finished. Others are prospering on our consumption. Of our non-ferrous metals we send out 77 1/2% in the raw, finishing or partly finishing only 22 1/2%. Of what we import 73% is finished. The profit on the manufacture of our own resources is going to people in other lands—providing dividends on their capital wages for their workers, building up their towns and cities, increasing their population, enlarging markets for their farmers and all other producers, giving traffic to their railways. It is helping to make another country great and wealthy and content.

Note what we are losing in the matter of pulpwood alone. Of our exports of this product a third goes out in the raw, a third as pulp, and the remaining third as paper. For the pulp we get \$9,000,000 and for the paper \$99,000,000. That is, we are allowing the people of other countries to make \$99,000,000 on the pulp we export alone. Why do we not make that \$99,000,000 ourselves—pay, wages out of it, provide increased markets for our farmers, business for our merchants, traffic for our railways?

Canada possesses between eighty and eighty-five per cent of the asbestos supply of the world. We sell it almost wholly in the raw and receive seven or eight million dollars for it? It is manufactured in the United States and sold for seventy-five million. We are doing the same thing with our nickel. We receive as much for the thirty percent of our nickel exports in manufactured form as we do for the seventy per cent that goes out in the raw. And we are sending the raw materials from our exports of which other people are making

profits. We have a tremendous advantage in regard to their manufacture in our power resources. We have the facilities for manufacturing them economically.

The manufacture of Canada's raw materials in Canada means more work and more wages for our people, employment for newcomers, larger consuming markets for our farmers, increased trade for our merchants and all others who supply the needs of a prosperous people. It means traffic for our railways from which they will pay their fixed charges and dividends. It means a distribution of the burden of taxation over a larger population. Work and wages and the profits of industry will keep our own people in Canada and bring immigration.

The Canada-First protective policy of the Conservative party is not alone a policy of tariff protection against imports. It proposes the conservation for Canadian development of our essential and irreplaceable resources in material and power. That part of the policy was prominently set forth in the resolution embodying the Conservative policy moved in the House of Commons by Rt. Hon. Arthur Meighen on June 2 last. Speaking on that Prosperity for Canada—2—

phase of the policy Mr. Meighen declared: "I want to say that the time has come in Canada—it is brought home to us by an experience very, very bitter—that we must assert every advantage that we possess, and we must assert it in absolute fearlessness of retaliation or anything else."

By its tariff protection policy the Conservative Party means \* to give home production similar advantage in the home market of Canada to that which the United States and other countries find it profitable to give in their domestic markets to their own production. It proposes that when other countries are maintaining tariff barriers against our products we should not further discourage our producers by allowing the products of these countries to rob them of the Canadian market. In that part of the protective policy as in the other the principle is that of the encouragement of production.

Hundreds of thousands of Canadians have gone to the United States because the United States is steadily increasing its production and thereby advancing its prosperity—making it easier to live, making life more comfortable. Millions in other countries are trying to get into the United States because of conditions there. They would come here if we had similar conditions. The policy of the Conservative Party is designed to create such conditions. A United States magazine boasted the other day of the better conditions obtaining in that country than in others. It attributed these conditions to production, and prosperity. Here, in part, is its boast:

"America is a land of high wages and large production—The large production of the United States makes large wages because there is large buying. The wage earner buys an automobile, a radio set, a phonograph. He spends.

"All America spends. A French peasant saves. He is the great example of thrift. His life is one of hard toil, seup, and an occasional fowl in the pot. Property remains in families for hundreds of years. Life does not change or broaden.

"The American spends. His whole life is geared up to spending. Foreign markets are important, but the American spender makes the great domestic market for American industry. Americans are living by taking in each other's washing. It is not so bad a way. It is a conservation of work into things desired in life."

The means of prosperity and wealth and comfort are in our hands. We have only to avail ourselves of them: If we do our people will never look with envy on those of other lands.

MURPHY CREAMERY  
**October Drive for Bigger Business**  
Special Prices prevail on all articles in our store. All goods have been specially marked to attract hundreds of new customers to this popular shopping centre.  
Underwear, Dress Goods, Sweaters, Ladies Coats, Hosiery, Gloves, Scarfs, Men's Overcoats, Mackinaws, Heavy Shirts, Etc.  
All are included in this store wide price reduction to enable us to double our regular October business.

Sunday Work Cut

In future no employe of the Dominion government will be required to work on Sunday except in circumstances of emergency or necessity.  
If any employe is required to work he shall be allowed the next six days of the week a period of 24 hours for rest.

The above is the effect of an order-in-council which has been passed by the Dominion government. It declares that there shall be no exceptions to the above rule except by departmental authority and then only when there is no substitute to do the work.

THE WAR AGAINST INSECTS

It is estimated that from 10 to 25 per cent of all crops grown in Canada is lost by the ravages of insects and that the annual loss in value each year reaches the enormous total of over one hundred million dollars. The crusade against this devastation, which is carried on by officers of the Dominion Entomological Branch at Ottawa

and in the various provinces, is thus of a herculean character. As circumstances warrant it who's districts are brought under quarantine to prevent the pests in particular localities being shipped out on products upon which they prey. Trenches miles in length have been dug to trap the horribly destructive army worm; aeroplanes have been used to survey areas infected with the spruce budworm; poison gas has been experimented with to kill grasshoppers; parasites of different species are bred and used as auxiliaries in this gigantic warfare, and drugged baits are distributed at strategic points, that is, where it is thought their use will be most effective. In no division of the work has greater activity and vigor been shown than in fighting the vicious corn-borer. Cities have practically been placed in a state of siege by men being stationed with rights of search to enforce the regulations and to see that no transportation of corn contrary thereto takes place. All of this important work has resulted in the saving of crops worth millions of dollars. The farmer, fruit grower and citizen generally are appreciating more and more the assistance rendered by the Dominion Entomologist and his officers.

**THE ONTARIO APPLE CROP IS BOUNTIFUL**

Toronto, Oct. 1—The apple crop in Ontario is the best for twenty years, it was reported at the local branch of the Dominion Department of Agriculture this morning. Not only is the fruit far more plentiful than usual, but it is stated to be of good quality and size, and free from fungus and injurious insect pests. Packers are badly needed to help harvest the crop and get it ready for shipment, for there are not nearly enough men to cope with the unusual demand for harvest help. An instance was cited of two men endeavoring to pack a carload of apples due to be shipped at a certain time, and working day and night to accomplish their task.

Consumers are urged to place their orders for apples early in order to start the crop moving and relieve the congestion which is sure to take place if the farmers keep their fall apples after the winter fruit is ready to be shipped. The supply is so heavy that prices should be reasonable this year.

The crop in Quebec is patchy. An abundant harvest is looked for at St. Hilaire between 25,000 and 30,000 barrels, despite the storm which uprooted thousands of trees. The quality is also very good.

**The Teacher's Trouble**

The Teacher's Trouble  
Ask any school teacher what she thinks of the indulgent mother. She will tell you that home indulgence is responsible for most of the laziness and absence, ignorance and impudence she finds in her pupils. Because Johnnie does not want to go to school, mother permits him to stay home and then gives him the atrocious example of writing a note asking the teacher to excuse him because he was sick! The child does not want to study. Mother yields to his request, entreaty or tears and sends another mendacious excuse because the home-work is wanting. Yet, she insists that her child be promoted. She forgets or ignores his record for absence, his monthly report and his examinations. With fire in her eyes and rage in her heart she demands her rights and does all she can to force teachers to violate rules and act against their conscience. She will not have her child disgraced just because he could not answer a few stupid questions!

Indulgence perverts the nature of the child. He knows that his weak foolish mother has made him a moral cripple and an intellectual pauper. He resents it and resentment makes him bitter. That bitterness condemns to a back room or home for the aged many a mother whose omissions have simply spoiled her children. They reap what they sow. The spoiled child does not think right. He has no affection. Too late she learns, as did King Lear:  
How sharper than a serpent's tooth!  
It is to have a thankless child!

Apply Minard's at once. It halts the pain and stops inflammation. Removes all poison from cuts and sores.

**THE MIRAMICHI FIRE**

This is the truth, what I now tell you  
For mine eyes in part did see  
What did happen to the people  
On the banks of the Miramichi.

The seventh evening of October,  
Eighteen hundred twenty-five,  
Two-hundred people fell by fire,  
Injured those that did survive.

Some said it was because the people's  
Sins did rise like mountains high,  
Which did ascend up in Jehovah,  
He would not see and justify.

In order to destroy their lumber,  
And the country to distress,  
He sent a fire in a whirlwind  
From the howling wilderness.

'Twas on the north-west first discovered  
Twenty-two men there did die,  
When it had swept o'er the meadows  
To Newcastle it did fly.

While the people were sleeping,  
Fire seized upon the town,  
Though fine and handsome was the  
village.

It soon tumbled to the ground,  
It burnt three vessels that were  
building,  
And two more at anchor lay.

Many that did see the fire  
Thought it was the Judgment Day.  
Twelve more men were burnt by fire,  
In the compass of that town:

Twenty-five more on the water  
In a snow upset and down.  
A family below Newcastle,  
Were destroyed among the rest.

Father, mother and three children,  
One an infant at the breast.  
Thirteen families were residing,  
Just out back of Gretna Green,  
All of them were burnt by fire,  
Only one alive was seen.

Then it passed to Black River,  
Where it did burn sixty more;  
So it forced its way with fury  
Till it reached the briny shore.

Forty-two miles by one hundred  
This great fire did extend;  
All was done within eight hours,  
Not exceeding over ten.

As I have spoke of things collective,  
Now I intend to personate,  
And speak of some of my acquaintance,  
With whom I was an inmate.

A lady was drove to the water,  
Where she stood both wet and cold,  
Notwithstanding her late illness—  
Had a babe but three days old.

Six young men, both smart and active  
Were to work on the north-west,  
When they saw the fire coming,  
To escape it tried their best.

About two miles from where this  
camp stood,  
They were found each one of them  
But to paint their sad appearance,  
I cannot with tongue or pen.

To see these fine, these blooming  
young men,  
All lay dead upon the ground,  
As their brothers standing mourning  
Spread a dismal scene around.

Then we dug a grave and buried  
Those whom did the fire burn,  
Then each of us that are living  
To our dwelling did return.

I heard the sighs, the cries and  
groaning,  
Saw the falling of the tears;  
By men this will not be forgotten,  
Should I live a hundred years.

Sisters weeping for their brothers,  
Father crying for his son,  
And with bitter, heart's sorrow  
Said the mother, "I'm undone."

It killed the wild beasts of the forest  
In the river many fish,  
Such another horrid fire  
See again I do not wish.

**Here and There**

The output of silver from Cobalt during July amounted to about 400,000 ounces, according to preliminary estimates. This had a value of less than \$300,000, or at the rate of about \$3,500,000 a year.

All attendance records for the Central Canada Exhibition were broken this year. There was a total attendance of 349,200, or 42,400 greater than the previous record of 307,000, made in 1922.

The first Italian ship to visit Vancouver in several years will be the steamer Piave II, of the Navigazione Libera Trestina, due here at the end of this month. This boat will inaugurate a new service between this port and points on the Mediterranean.

Production of paper by the Powell River Company, at Vancouver, will be increased 80 per cent by the completion of a \$5,000,000 development programme, now under way, according to an announcement made by M. J. Scanlan, a director of the company. At present the plant is turning out about 75,000 tons a year.

Signs of returning prosperity to Canada are evidenced by the fact that more Canadians are registered in the Canadian Pacific Rocky Mountain resorts during the past week than at any time since the beginning of the year. These resorts, which are usually filled almost entirely by Americans, contain a guest list last week which is 50 per cent Canadian.

Production of gold in Ontario for the first six months of this year amounted to \$14,506,219, as compared with \$11,810,060 in the corresponding period of last year, according to a report issued by the Provincial Department of Mines. Silver production increased from \$3,262,100 to \$3,792,662. Total mineral production was \$41,560,355, as compared with \$37,997,776.

John Edwin Hoag and Frank S. Wilton, who travelled across the entire continent in a small motor-boat arrived recently in Montreal and moored their craft to Canadian Pacific Pier No. 8 having come from Astoria, Oregon, via Columbia River, Celilo Falls, Fort Benton, the Missouri and Mississippi Rivers, the Chicago Drainage Canal and Lake Michigan since May, 20th. From Montreal they continued their journey to New York and returned to the States, via Canadian Pacific Railway to Vancouver and Seattle in order to see the country.

The groundwork for what promises to be a big industry is now being developed by the Singer Sewing Machine Company at Thurso, a point on the Canadian Pacific Railway, on the north shore line to Ottawa. It is planned by the Singer Company to manufacture at Thurso all the woodwork required for their numerous plants in different parts of the world. Work on the new plant is being pushed with all possible speed and it is anticipated that shipments from Thurso will commence sometime early next year.

While the Canadian Railway Commission is besieged with all kinds of applications for reductions in Canadian freight rates, the Western group of railways in the United States is asking for a five per cent increase and the northwestern section of the group is asking more than that "as a measure of relief." Some of these roads are in the hands of the receivers. Yet these American railways already have higher rates than the Canadian roads, the freight revenues in the U.S.A. being 1,293 cents per ton mile on western lines as compared with 1,011 cents on all Canadian railways. The average American rate is 28 per cent above the average Canadian rate. Owing to the low grain rates in Canada, the C.P.R. average rate is 1,011 per ton mile, so that the average rate on American western lines is more than 80 per cent above the average C.P.R. rate.

**Arrested When About To Wed Rich U. S. Girl**

Pasadena, Calif., Sept. 30--Pasadena was gossiping over the arrest of "Robert A. Winthrop," on advice from Bend, Or. charging him with grand larceny and obtaining money under false pretenses. "Winthrop" had posed as a young millionaire since he came here some time ago and was engaged to have been married in less than two weeks to one of the wealthiest society girls of the city.

Several hundred invitations had been sent out, 200 presents had been received, and the wedding was to have been one of the events of the season.

The young man, who is said to be a member of a prominent Massachusetts family was arrested at an advertising agency in which he recently purchased a half-interest. He denied the charges declaring they were fabrications to embarrass him and his prospective bride.

Private detectives say that he admitted to them shortly after his arrest that he has a wife living on Beacon Hill, Boston.

Advices from Oregon, state that charges were brought against "Winthrop" for offenses alleged to have been committed in October, 1924. His bond was set at \$5,000 on each of three counts.

**Hermits Doubt Existence Of Automobiles**

St. Clairsville, O. Sept. 30, When John Furbee, a deputy sheriff called at a secluded home a mile from its nearest neighbor, he found two aged brothers who believed that Theodore Roosevelt still was President. They said they had heard something about there being a war several years ago but they were skeptical.

They not only knew nothing about electricity but they refused to believe "light could go through a wire." They were equally skeptical when Furbee attempted to describe an automobile to them.

Their nearest neighbor said he never more than "passed the time of day with them" and said he believed their contention that they had not left their farm for more than 15 years. Both men said they had no desire to visit a city because they regard cities as works of the devil.

**DECLINED ADVICE OF OTHER EXPERT**

Lakehurst, N.J., Sept. 30--Disregarding the advice of his other expert, Commander Zachary Lansdowne held the airship Shenandoah on her course until she was drawn in to the storm that wrecked her. Lieut. Joseph B. Anderson, aerologist on board testified yesterday before the naval court of inquiry.

The suggestion that the ship be turned to the south was made at least half an hour, and probably an hour, before she was wrecked, Anderson said, adding that Lansdowne had declined to heed the advice because the aerologist had been unable to point to any specific immediate danger signal in the skies to warrant a change of the course. After the Shenandoah was caught in the storm and had made her first rise, and then levelled off, Anderson's advice that a southeasterly course be followed then in an effort to get out of the

storm, also went unheeded, he declared. Commander Lansdowne wanted to follow it but the other officers in the control car, advised against it, because storm clouds were in that direction. This discussion took place while the great hull was being buffeted in the storm and the officers were exhausting their resources in trying to save her. It was described as brief but the aerologist indicated that it was sharp.

Cross examined by the court on this point, Anderson said whether the ship could have escaped from the storm at that time was wholly problematical. "I am not trying to argue that a southeasterly course would have saved the ship," he said.

**NO INDIAN SUMMER**

An American weather authority says there really is no such thing as Indian summer, but that in some years we do get a period of mild, lazy weather in October, and sometimes in November. Whatever the right name for it is, it is not infrequent in this country and people who gladly will probably continue to refer to it by the old name. Even the expectation that Indian summer will come along is a help.

**Quality**  
The most urgent requirement in Canada's Agricultural Products

CANADA produces every year large quantities of wheat, oats, barley, butter, cheese, bacon, beef, eggs, apples, potatoes, grass seed and clover seed that she cannot consume. Her natural outlet for these products is, of course, Great Britain—the one great consuming country of the world with an open market.

Unfortunately, nearly every other country with any surplus of food products seems to want to send its surplus to this same market.

The keenness of the competition on this, our only market, and the energy and resourcefulness of our competitors began to impress themselves upon the Department of Agriculture some time ago, but it is only within very recent years that the real and only way to grapple with this problem has been discovered, or at least put into effect. This Department now believes, as do also most of the farmers of this country, that the "grading" of our agricultural products is the policy and practice that is seeing us through the struggle and will assure us of our rightful place on the British market.

"Grading" means the classifying of products, whether they be hogs, butter, cheese, eggs or anything else, into what might be called in a general way "BEST," "GOOD," "FAIR" and "POOR" classes.

These exact words are not used in describing the grades, but that is what is meant. The purpose served in grading is threefold—

(1) Educational. When the producer sees the relative quality of his product he is spurred on to maintain and gradually everybody gets to know to improve the quality where necessary.

(2) Fair Play. When products are not graded the inferior article for various reasons often brings as much as the superior article, and the credit and advantage of putting the superior product on the market is lost to the one who really deserves it.

(3) Facilitating Trade. The dealer learns to have confidence in the article he is buying and buys more freely, because it is guaranteed by grading, and gradually everybody gets to know what the "best" article really looks like or tastes like. In short, grading brings about standardization and assures to the producer the best price.

Canada now grades her cereals, grass seeds, hay, potatoes, apples, eggs, butter, cheese, wool and bacon hogs. The result has been in every case beneficial and in some cases quite markedly so, even though the grading system has been in effect in some cases for only two or three years, thus—

**Cheese**—Grading began April 1st, 1923. Canadian cheese the year before had fallen into such disfavour on the British market that New Zealand cheese was quite commonly preferred. Today Canadian cheese commands cents per pound higher than New Zealand.

**Butter**—Grading began same time as for cheese. The reputation of our butter was then indeed at low ebb. Canadian butter today, while not the best on the market, is rapidly improving in quality and gaining in reputation.

**Hogs**—Over two years ago the Department of Agriculture began to grade live hogs at the packing houses and stock yards. The 10% premium paid by the packers for "select" bacon hogs as against "thick smooths" as classed by departmental graders has done wonders to improve the quality of our hogs and develop the bacon industry.

Best Canadian bacon, which ordinarily was quoted two years ago from 10 to

18 shillings a long hundredweight below Danish, has gradually grown in the estimation of the British wholesale buyer until it is now quoted at only from 1 or less to at most 5 or 6 shillings per long hundredweight below the best Danish.

This improvement in price is, of course, due to quality and has come about very gradually, the spread narrowing down by a shilling or two a month until now it is not at all a rare occurrence to see best Canadian selling on a par with the Danish article.

**Eggs**—Canada was the first country to grade and standardize eggs. These grades and standards apply not only to export, interprovincial and import shipments, but also to domestic trading.

The basis is interior quality, cleanliness and weight. Standardizing Canadian eggs has established confidence between producer and consumer and between exporter and British importer, and has resulted in a greatly-increased demand for the Canadian egg both at home and abroad.

Other products might be mentioned where grading has worked to the great advantage of the producer and to the advancement of Canadian agriculture.

Already Great Britain recognizes our store cattle, wheat, cheese, eggs, apples and oats as the best she can buy.

It is for us to so improve our other products, particularly our butter and bacon, as to bring them into this list of "the best on the British market" and consequently the highest priced.

Grading enabled us to do this for cheese, wheat, eggs and apples. Grading is helping us to do it for butter and bacon.

**Quality Counts**  
Quality is thus the first objective for the Canadian export trade, and then steady, regular supply. It is, along these lines the Department of Agriculture is working by educational methods, and the result of this policy is seen in the growing volume of Canada's agricultural exports. Look at these figures—

**Canada's Principal Exports of Farm Products**

	1922-23	1924-25
Wheat (bus.)	159,716,157	191,744,537
FLOUR (bbls.)	6,017,082	11,023,227
Bacon and Hams (cwt.)	92,354	1,298,721
Beef Cattle	298,211	215,000
Pork (lbs.)	9,739,414	24,701,800
Cheese (cwt.)	1,950,267	1,829,423
Apples (bbls.)	1,358,499	1,406,237
Oats (bus.)	14,221,048	20,777,761
Barley (bus.)	8,852,513	22,329,434
Rye (bus.)	3,201,450	7,324,386
Bran Shorts and Middlings (cwt.)	819,781	3,667,038
Oatmeal and Rolled Oats (cwt.)	397,236	830,046
Clover Seeds (bus.)	179,285	417,907
Tobacco (lbs.)	290,153	2,827,623
Cream (gals.)	1,279,195	3,384,198
Flax Seed (bus.)	1,341,201	2,500,106

## Local and General News

**HELD, CORN BOIL.**  
A corn boil was held at Vye's Beach on Wednesday night, by the Young People's Club of the Methodist Church. The evening was a delightful one and much enjoyed by all.

In connection with the Harvest Festival at St. Mary's Academy a Tag Day will be held on Thursday, Oct. 22nd.

**HUNTING SEASON**  
The hunting season is now on in full. The open season for moose began on Thursday, Oct. 1st, and many hunters are already in the woods seeking big game.

**FOR SALE**  
One good general purpose mare weighing 1350 pounds, age 9 years.  
Apply to  
M. L. HACHEY,  
Newcastle, N. B.  
Phone 136

**PRESBYTERIAN SERVICES**  
Rev. Albert A. Martin of New York, who will be in charge of the Presbyterian services at Newcastle and Chatham during the month of October, will conduct services in the Opera House, Newcastle, at 7 o'clock p. m., Sunday, October 11th. A cordial invitation is extended to all.

**POST OFFICE IMPROVEMENTS**  
"It's an ill wind that blows nobody good." It is also a good thing that a Federal election is in sight, or Newcastle residents would still be waiting for the much-looked-for improvements in the local post office. However, now that we are to have an election, masons are at work cutting a new entrance in the building. It might be a vote catcher, but the electorate nowadays are wise to such political tactics.

**Harvest Festival and Chicken Supper in St. Mary's Academy, Wednesday and Thursday, Oct 21st and 22nd. Keep these dates in mind.**

**A POLITICAL RUMOR**  
Reports are current about town that James Robinson of Millerton, will be a candidate in the forthcoming federal election to be held October 29th. It is stated that Mr. Robinson will run as an Independent with Maritime Rights as his chief platform. The entry of Mr. Robinson will make a three-cornered fight in Northumberland and the result will be awaited with anxiety by the active workers and supporters of the several candidates.

**PRESENTATION**  
On Monday evening a genuine surprise was given Mr. and Mrs. Roy T. Baldwin, Douglasfield, when about forty friends motored from Newcastle, and spent a very enjoyable evening. The time was spent in cards, games and music, after which dainty refreshments were served. Mr. and Mrs. Baldwin were presented with a beautiful Limoge dinner and tea set. The recipients thanked the donors in a few well chosen words.

**IMPRESSIVE FUNERAL**  
The funeral of Mr. W. B. Snowball took place on Wednesday afternoon, at Chatham, and was one of the largest and most representative seen there for many years. An impressive service was conducted at the house by Rev. R. G. Fulton, of Saint John, assisted by Rev. G. M. Young, Chatham. The pall bearers were G. H. Harrison, A. A. Davidson, R. H. Anderson, F. M. Tweedie, George E. Fisher, A. J. Thompson, Fredericton. The mourners were F. L. Snowball, Walter Snowball, MacDougal Snowball, Bunting Snowball, the members of the Town Council of Chatham, and the Town Council of Newcastle. The funeral tributes were numerous and came from all over Canada.

**INSPECTORS HERE**  
Steamboat inspectors Bennett and Dalton of St. John were on the Miramichi River last week making their annual inspection of boats.

**SCHOLARSHIP**  
The Northumberland County Scholarship has been awarded by the N. B. University Chancellor, Dr. C. C. Jones to Miss Eva Fleiger, of Chatham.

**SUCCESSFUL ONES**  
Mr. Arthur Mannal drew the wrist watch and Mr. B. W. Waucho drew the necklace of pearls at H. W. Weston & Co's package sale Saturday.

**PARTRIDGE SCARCE**  
Partridge are reported scarce in New Brunswick this year, and from the reports to L. A. Gagnon, chief game warden, it is expected that steps will be taken to investigate the causes. It is expected that with the opening of the partridge season this year specimens will be secured for examination.

**RUMMAGE SALE**  
Advance Notice  
The W. A. of St. Andrew's Church, Newcastle, give notice that the annual Rummage Sale, will be held on Thursday morning, October 22nd, at 10 o'clock, in the Sunday School.

**MUCH SICKNESS**  
There is considerable sickness in town, especially among children. The epidemic resembles "la grippe", the patients becoming feverish, weak and lose ambition. As a result many children are detained from school.

**FELL INTO STEAMER HOLD**  
While working on a steamer at the pulp mill at Douglastown Saturday the second mate, whose name was given as Fletcher, fell into the hold, a drop of 16 feet. Dr. Marvin was summoned from Chatham and had the man removed to the Hotel Dieu.

### A Little Booklet Mothers Should Have

It Tells What a Mother Ought to Know for Baby's Sake

Above all things every mother wishes that her child, or children whatever their age, may be bright, healthy good-natured, rosy boys and girls; clear eyed, clear skinned babies; good sleepers, bright wakers. Every mother's wish for her little folks is that they may be well.

It is natural for little folks to be well. No wise mother thinks that her child at any age is in a natural state unless it is well and happy. No mother can expect, that her child will escape all the ills to which baby hood and childhood are subject, but she can do much to make baby's battles for health easily won.

A valuable little booklet entitled "Care of the Baby in Health and Sickness" has been prepared and as it is something every mother should have, a copy will be sent free to any mother on request who will mention this paper by The Dr. Williams' Medicine Co., Brockville, Ont.

### Trail Rangers Of Newcastle Elect

The Trail Rangers of St. John's United church met at the home of Rupert Kethro, Tuesday evening Election of officers for the coming year resulted as follows: Chairman, A. W. Brown; mentor, H. D. Atkinson; chief, Blair Auld; sub-chief, A. Brown; secretary, Byron Petrie; treasurer, Ambury Jarvis; entertainment committee, Sidney Brown, Willis Delano, and Arthur Brown.

## Beaverbrook's Racing Stable

Much Money Invested In Thoroughbreds

Lord Beaverbrook is assembling a stable of thoroughbreds to race on English courses. At the recent Doncaster sales "the beautiful short-necked bay colt, by Gainsborough-feebound, the pick of the bunch," says London Sporting Life and Sportsman, "went to Dudley Ware for Lord Beaverbrook at 5,800 guineas. This is his Lordship's first venture in bloodstock and the colt who looks sure to race may be trained by Oswald Bell. Lord Beaverbrook will also keep some mares, William Spiers having charge of them, and no better selection could have been made." At the same sale, Lord Beaverbrook acquired an attractive filly by Friar Marcus for 1,100 guineas, but it is stated does not compare with the exceptionally good dark bay sister to Badenoch that his Lordship is not likely to regret buying for 4,400 guineas. This filly is by Buchan-Hersell by Neil Gow, and was the property of Laddy Sykes Another Beaverbrook purchase is a brown filly by Phalaris-Rufosina by St. Frusquin for 2,300 guineas. The sum of 5,800 guineas was paid for a bay colt by Gainsborough-Glaciale by Polymelus.
