Fur Week at Swift's.

Wood of the best quality is selling in Oil Springs at \$4.50 per cord. Another advance in the price of the price of the paper is announced for

Carr's Mackinaw and Sheep-lined Coats, sizes 38 to 48.—A. Brown &

Don't forget your taxes are due. Come and get your receipt before they get any higher.

Service as asual in the Watford Baptist Church, Sunday, November 28th, at 7 p.m. Subject "Enemies of the Soul." Come and bring a friend.

Credit auction sales may soon be a thing of the past. Now a farmer seldom gives his note for cattle purchased as all have the cash and are anxious to take the discount.

Rev. E. H. Sawers will preach in the Methodist Church next Sunday evening in the absence of the pastor, Rev. A. C. Tiffin, who is commencing a series of special services at Zion on the 2nd line.

A very enjoyable evening was spent at the home of Mr. and Mrs.

E. D. Swift on Thursday of last week when Lambton's 149 Chapter, I.O.-D.E., entertained about forty gentlemen at a card party. A very tasty lunch was served at the close.

Sheep lined Coats for Men. All sizes at Swift's. S. S. McDermand, U. F. O. candi-

date, polled the winning vote in the Dominion bye-election in East Elgin on Monday, his majority being 208 over the Conservative candidate, John L. Stansell, and 1,134 over W. G. Charlton, Liberal.

"Is this the hosiery department?" said a voice over the phone. "Yes," replied the weary saleslady. "Have you any flesh-colored stockings in stock?" asked the voice. "Yes," replied the weary saleslady, "Whaddy ya want—onk, yellow or black?"— Chering Sale of Millipary at

Clearing Sale of Millinery at

Mr. Robt. Taylor was called to London last week over the sickness and death of his youngest brother, Mason Taylor, who passed away at Victoria Hospital, following an operation for stomach trouble. The funeral was held from his home at Brigden on Friday, November 19th.

The Women's Missionary Society The Women's Missionary Society of the Methodist church will meet Thursday, Dec. 2nd, at 3 o'clock in the church. Mrs. W. B. Smith, District Superintendent, Petrolea, will be present and address the meeting At the close of the program a social hour will be spent. All the ladies of the church are most cordially invited.

Rev. Ernest Thomas, associate sec-retary of the Evangelism and Social Service department of the Methodist church, preached here last Sunday evening to a deeply interested congregation. He was one of the speakers also at the November meeting of the Strathroy district in the Bethesda church on the Brooke circuit on Wednesday afternoon and evening.

Read Swift's Fur Specials—a great opportunity to buy excellent pieces at drastic reductions.

If young people in country places only realize the real value to them of a training in practical journalism such as every news editor in a community receives, many more would apply for the privilege. Next to pub-lic speaking, writing for the new-papers affords a practical opportunity for correct expression and facil-ity in writing.—Canadian Statesman.

Nothing is gained by making people believe you are better than you are, or richer than you are. It would be funny if it were not sad, to see how much energy people put into giving an impression of prosper-ity not justified by facts. Indeed the same incennity some neonle use in same ingenuity some people use in keeping up appearances would go a long way toward making them really prosperous if they applied it rightly.

Opened this week-25 smart overcoats for young men, bought to sell from \$8.00 to \$15.00 below their value.—A. Brown & Co.

The Ambrose J. Small mystery was renewed again on Tuesday when his private secretary, John Doughty, who disappeared last January, about a month after the disappearance of multi-millionaire, was arrested while working in a paper mill in Oregon. Doughty refuses to speak about Small's disappearance, but admits that he stole \$100,000 in Victory Bonds. He is being brought back Toronto.

Very special values in Men's China dog and Siberian beaver coats, Qual-ity the best—prices the lowest.—A. Brown & Co.

Stanfield's and Turnbull's Under-

Right here from Scotland. The good old scotch tweeds are here, the old Ironclad pure wool tweeds we have twenty rieces and will make up this lot to order, best trimmings and linings, at \$45.00 the suit.

In the list of convictions for the three months ending August 31st, recorded by the J.P.'s of Essex county, forty-six of the seventy convictions were for violation of the Ontario Temperance Act. Prohibition does not seem to be making the people of Essex strict law observers.

A number of our subscribers in Windsor have not yet notified us of their new street numbers, and as a result, mail carriers are having difficulty in delivering their papers. As the old numbers will not be recogniz-ed after the 31st of December, we would be pleased if subscribers in Windsor would look at the date label on their papers, and if same does not bear the new street number, kindly bear the new street number, kindly notify us so we can make the desired

Notwithstanding the very disagreeable weather and the muddy roads a good-sized crowd attended the play, "Miss Fearless & Co." in the Lyceum on Monday evening under the auspices of the Women's Institute. The various parts were taken tute. The various parts were taken by members of the Alvinston Women's Institute, who kindly con-sented to give it in Watford, After paying expenses, a nice sum will be realized, to be donated to the new Childrens Hospital, London. Miss Nellie Kinnell and Messrs. R. D. Swift and V. Dodds rendered very acceptable music during the inter-

Horse hide and Galloway Coats at right prices.—Swift's.

The new auto license fees for 1921 were announced Wednesday by Hon. F. C. Biggs, Minister of Public Works and Highways. They are slightly advanced from this year. Passenger cars of not more than 25 horsepower and not more than four cylinder advance from \$10 to \$13; six cylinder \$15. 25 to 35 horsepower six cylinder \$15, 25 to 35 horsepower four cylinder, \$15; six cylinder \$20. Trucks under two tons \$13 instead of \$10; o.e. two tons, and under eight, \$6 per ton instead of \$5. Aneight, \$6 per ton instead of \$5. Another feature is the introduction of a license fee for "trailers". On a small trailer the fee is \$2; over one ton and under two, \$5; over two tons,\$3 per ton. The fee for transfer of license is also increased from \$1 to \$2.

Friday and Saturday-Men's \$2.50 \$3.00 and \$3.50 neckwear at \$1.50. No luxury tax.—A. Brown & Co.

### WARWICK

A good heavy weight blue working shirt, all sizes, the price is \$1.75 .-Swift's

Mr. William Brock returntd home week after visiting relatives in Strathroy.

Grace Church, 4th line, intend holding their Christmas entertainment on Thursday evening, December 23rd. Particulars later.

Mrs. Asahel Bryson has returned home after spending a week with her mother, Mrs Richard Demaray, of Belmont, who has been quite ill.

Rev. R. G. McKay, of Alvinston, and Rev. W. J. Knox, of London, delivered two splendid and impressive addresses in Knox church, Warwick, on Monday and Tuesday evening. Rev. J. McLeod, of Wyoming, will deliver the addresses the manual control of the deliver the addresses the sadresses the sadress deliver the addresses this Thursday and Friday evenings.

The Birthday Party given under the Zion Epworth League last Friday evening was largely attended by the evening was largely attended by the whole local community and many from Arkona, Bethesda, Kerwood and Watford. The financial proceeds were most satisfactory and the program for the evening of a highly chifying and entertaining character.

Rev. A. C. Tiifin and his congregation of the Zion Methodist church are commencing a series of special meetings in that church. They start with two services next Sunday at 2.30 p.m. and 7.30 p.m. and continue the following week at 8 o'clock. Mr. Tiffin will be assisted from time to time by neighboring ministers. These services will be bright and attractive and every person is welcome.

and every person is welcome. Mill ends. Flannelettes, Cottons, Linen and Union Towelling, 2 to 5 yards .- Swift's.

The Women's Missionary Auxiliary of Zion Methodist church held their regular monthly meeting at the home of Mrs. Edward Robertson on home of Mrs. Edward Robertson on Nov. 11. There were 13 nembers and three visitors present and two new members were enrolled. A bale of clothing valued at \$49 was packed for the Deaconess Home, Toronto. The ladies are holding a special service of prayer this Thursday afternoon at the home of Mrs. Robert Wynne. The next regular meeting will be held at the home of Mrs. Russell Robertson on Thursday, Dec. 9, at 2.30 p.m. Visitors are welcome.

#### BROOKE

Mr. N. Seed, of Ade'vide, visited last week with his daughter, Mrs. Higgins, 12th line, Brooke

Christ Church, Sutorville, hold their Christmas entertainment on December 17th. Particulars later.

#### LANTERN LECTURE "HEROES OF THE CROSS"

The thrilling story of the early Christian martyrs in Jerusalem, Rome, Ephesus, etc., coming across the centuries to the Covenanters of Scotland and the Pilgrim Fathers of New England, will be told in narrative form by Rev. T. DeCourcy Rayner in the Congregational church, Watford, on Monday, November 29, at 8 p.m. The story will be illustrated by fifty lantern pictures. Admission by silver collection. Children must be accompanied by an adult.

### PERSONAL

Miss Beatrice Cooke is visiting in Waterloo.

Mrs. D. Genge, of Alvinston, was visitor in town this week. Mrs. Chas. Moore, Sarnia, spent Friday with Mrs. T. Fortune.

Mr. and Mrs. Leo Dodds of Sarnia visited friends here this week. Mrs. Richard Lucas, Sutorville, spent the week end with her sister, Mrs. Robt. Taylor.

Mr. and Mrs. Albert Trowbridge, visited over Sunday with the former's sister, Mrs. Robt. Taylor. Mrs. W. Willoughby and daughter,

Dorothy, spent the week end in London visiting friends. The Rev. T. DeCourcy Rayner is away in Toronto this Thursday, attending a meeting of the executive committee of the Young People's Department of the Congregational Union of Careda.

ion of Canada. Mr. Roger Shepherd left last Saturday on the return trip to South Africa after spending the past four months visiting relatives in this vic-inity. Mrs. Shepherd will remain here for the winter.

### HIGH SCHOOL EXAMS

The following are the average marks attained by the individual pupils at the Warford High School in their term examinations. The parents will however receive individual reports which they are requested to examine thoroughly and return as promptly as possible. The standards are, for Honors 50 per cent. on each paper 67 per cent. on aggregate. paper 67 per cent. on aggregate. per cent. on aggregate. The number in the bracket refers to the number of subjects in which the pupil failed

#### **CHOP STUFF**

Potatoes are quoted at \$1.90 a bag wholesale at Strathroy.

Strathroy will enter two teams in the O.H.A.—intermediate and junior. A Wheatley man raised a pumpkin which measured six feet in circumference and weighed 103 pounds.

Detroit Masons turned the first sod on Thursday in the erection of a new \$5,000,000 Masonic Temple.

The Canadian Courier, the weekly magazine which has been regularly isued since 1906, has suspended pub-The Royal Arch Masons of West-ern Ontario will raise \$5000 for the War Memorial Hospital to be erected

ht London.

According to government reports for October clothing has dropped 18 per cent. and farm products 21 per cent. below 1919 figures.

Compulsory schools for wives to equip them for the responsibilities of matrimony, are urged by Arthur F. Lederic of the Detroit Public schools. Two bottles of beer and a plate of pretzels have been placed under a glass case in the Milwaukee museum to be viewed by future generations as extinct articles.

Rev. J. D. McCrae, of Petrolea, Presbyterian church, has resigned, and will accept an appointment at Almonte, Cnt. He will preach his farewell sermon on December 5th.

A young married woman to whom triplets were born blames her hus-hand's musical friends who serenaded him just before marriage, when they played "Three Little Maids" from the

Over fifteen thousand dollars' worth of cigars' were smoked at the Spa conference of the League of Nations in July How much would the bill amount to if the U.S. had been represented?

"All right back there ?" called the "All right back there?" called the conductor from the front of the car. "Hold on," came a feminine voice. "Wait till I get my clothes on." The entire carful turned and craned their necks expectantly. A girl with a basket of laundry!

basket of laundry!

On Nov. 12th Geo. B. McCallum of the Industrial Farm brought into Welland a sheaf of wheat and oats, stalwart stocks a foot and a half high and well headed. The odd thing about this 12th of November sheaf is that it is from a second crop grown and brought almost to the point of ripeness during the glorious autumn we have hai.

Mrs. Walter Carr. 4th con. of Englishment of the control of th

Mrs. Walter Carr, 4th con. of Enniskillen township, died on Tuesday. Sleeping sickness is given as the cause of death. The deceased was a bright young woman of 30 and her untimely death. untimely death came as a shock. She was a daughter of Mr. Thomas Symington, 6th line. The funeral was held to Hillsdale cemetery on Thursday afternoon.

The Chicago News points out that a survey of four counties in Indiana disclosed the following facts: Ninetysix per cent. of the farmers have automobiles; 79 per cent. have no electrice light; 94 per cent. have no bathrooms; 81 per cent. carry water into the kitchen by hand, and, not least, the farmers' wives worked 15 hours per day in summe, and 12 hours per day in summe. and 12 hours per day in winter. We wonder hours per day in winter. We wonder wherein Ontario differs from these figures?

A story comes from Arkansas that J. A. McMillan of Dewitt has been dubbed champion duck hunter as a result of having killed 18 big matlards at one shot. Twenty-five ducks to the man is the legal limit permit-ted under the Arkansas statutes for one day's hunt, hence Mr. McMillan gathered up his game and expressed fear to shoot again lest he might exceed the legal limit. It is well to bear in mind that Arkansas is a long way off and that the number of duck killed may have swelled during the long journey.

Canadian householders are buying salmon by color, rather than by quality, according to Dr. Edward Prince, chairman of the Biological Board of Canada, who states that the best flav-ored salmon on the Pacific coast is in small demand, because the color is small demand, because the color is pale. The inferior salmon which is of a rich red color brings the best price and takes first place on the Canadian market. The price of pink salmon is stated to be about one-half the price of the red. The Sockeye, known as the red salmon, is in great demand and the species is threatened with ultimate extinction, and there is a consequent rise in prices. consequent rise in prices.

WHO WON THE WAR ? Beneath his load, a camel groan'd And he was vexed sore. But though the beast in anguish

moan'd,
They added one more straw,
And when his back was heard to crack

This straw exclaimed with glee,
"T was I who broke the camel's I won the victory."

THE SEEING EYE

Principal Reynolds of the Ontario Agricultural College thus delivers himself in the Agricultural Gazette of Canada: The teacher who hopes to take a

The teacher who hopes to take a right place in the life of the country school district must cultivate the seeing eye and the understanding heart for persons and things rural. The usual, popular, melodrama, comic supplement, moving picture conception of the farmer and of country people must be forgotten. It is essentially and perniciously false. The farmer is something of a humorist and takes delight in deceiving the simple-minded by a somewhat unfinished exterior. The city-bred person makes the fatal mistake of judging by outside appearances. To the city-trained eye there are two classes of persons, one wearing over-To the city-trained eye there are two classes of persons, one wearing overalls and the other wearing white collars. The former class work with their hands. The latter class work with their brains. That is the superficial judgment, which ignores the fact that there is a very great deal of clear, hard thinking done today by the men wearing overalls. At any rate, the farmer belongs to both classes. The more he understands of classes. The more he understands of those discoveries, which it is the business of the agricultural college

### TO SUBSCRIBERS

to make, the more he absorbs the teaching which it is the business of the college to spread abroad, the better farmer will he be.

nigh a friend came to him and said unto him, wilt thou have the two hundred shekels with which to pay thy debt? And he answered, I know

some debtor who owest to the hundred shekels? And he answered that alas he had not.

And the friend said: Hast thou perchance one hundred debtors who owe to thee two shekels apiece? And he answered, yea, verily, and besides these others likewise. And then some

so moreover.
And the friend said: Go get thee And the friend said: Go get thee busy among thy small debtors and collect thy debts, lest he to whom thou owest come upon thee and find thee lacking. For behold they that owe to thee should pay their debts and thou knowest that "Mony mickles make a muckle."

And behold the certain man was the publisher of a newspaper and the certain debtors were his subscribers. What sayest thou to these things?

### THE GUIDE-ADVOCATE

I am the friend of the family, the bringer of tidings from other friends I speak to the home in the evening light of summer's vine clad porch or winter's lamp. I help to make this evening hour; I record the great and the small, the varied acts of the days and weeks that go to make uplife. I am for and of the home; I follow those who leave humble beginnings; whether they go to greatness or to the gutter, I take to them the thrill of old days, with wholesome messages. I speak the language of the common man; my words are fitted to his understanding. My congregation is larger than that of any church in my town; my readers are more than those in the school. Young and old alike find in me stimulation, so ace, comfort. I am the chronicle of birth and love and death—the three great facts of man's existence. I birg together buyer and seller, to the benefit of both; I am part of the market place of the world. Into the home I carry word of the goods which feed and clothe, and shelter, and which minister to comfort, ease, health and happiness. I am the word of the week, the history of the year, the record of my community in the archives of state and nation. I am the exponent of the lives of my readers. I am the Country Weekly. You should support and put your faith in the Watford Guide-Advocate.

### Landmarks of Mackenzie

INCE William Lyon Mackenzie King, the Liberal leader, has been visiting some of the shrines of his illustrious forebear, from whom he gets his Christian names, it is permissible for the average citizen, regardless of his politics, to do the same.

The remains of the rebel leader rest beneath the low spread branches of a mountain ash in the Necropolis in Toronto. Within a small plot, bordered by a hedge, four little stones, only a few inches high, mark a row of graves. One bears the word "Father" and below "William Lyon Mackenzie, next to it is a stone marked "William Lyon and George Mackenzie," and the fourth "Barbara and Helen." A substantial monument has been erected to William Lyon Mackenzie in the same God's acre where a granite shaft commemorates Lount and Matthews, two of his chief lieutenants, who gave up their lives for the faith they had in their leader

and his cause.

Parts of the basement walls of the old Toronto Jail, in a cell of which Lount and Matthews were kept till their execution, are still traceable in the office building at the southeast corner of Toronto and Court streets.

From the Necropolis we pass to Bond street where at No. 82 stands the three-storey dwelling in which Mackenzie died. Toward the end of Mackenzie died. Toward the end of his strenuous life, which was one of almost continuous opposition to things as they were, some of the rebel leaders' friends, moved by sympathy for his condition, presented this property to him, though against his will, for his native Scottish independence never forsook him.

Here he spent his closing years—years of gloom and despair, it is said, and with a consciousness that he had

and with a consciousness that he had not achieved all he sought in the realm of reform. After sixty-six years of strenuous struggle he passed away, and with his passing a page of Canadian history was closed

As one sits at the old desk used by Mackenzie when a member of the Upper Canada Legislature (now preserved in the cabin of the York Pioneers in Exhibition Park), it is easy to conjure up the exciting scenes in which he figured and of his five successive expulsions from the old Front street chamber. It must be admitted that he drew fire as when he wrote that "the House was an assembly of sycophants" and the Government "a band of public robbers." "If a Government emanating from England can cherish such a corrupt star chamber crew (as the Family Compact), then Behold a certain man owed two hundred shekels.

And as the time of payment drew nigh a friend came to him and the days of the infamous Scroggs and Jeffreys are returned upon us! They were tools of a servile power, official fungi more numerous and positional fungi more numerous and positional functions. than the quagmires and marshes that encircle Toronto!"

undred shekels with which to pay y debt? And he answered, I know ot.

And the friend said: Hast thou not ome debtor who owest to thee two enemies, a reptile, a spaniel dog, a enemies, a reptile, a spaniel dog, a seditious little liar, a firebrand, a political mountebank, a squip scribler who began to feel his importance among small people and, like the frog in the fable, to swell with

pomps and vanity.

Another Mackenzie reminder in Toronto still exists in the old Doel house, on the northwest corner of Adelaide and Bay streets. John Doel became associated with the leaders of "the Party of Reform." During the exciting days preceding the actual outbreak of the rebellion at the skirmish at Montgomery's Farm, the house was a renderyous for

actual outbreak of the rebellion at the skirmish at Montgomery's Farm, the house was a rendezvous for Mackenzie sympathizers, while larger gatherings were held in the adjoining brewery where "The Canadian Alliance Society" was probably discussed if not formed, and other plans laid for the raising of an armed force, and where their leader no doubt frequently met with them. Yet another visible reminder of Mackenzie is a pleasant one in his portrait, in the City Hall, as the first Mayor of Toronto, in 1834; indeed, as the first mayor ever elected in Upper Canada. It was during his year of office that the "little mountebank" proved to be a hero in personally risking his life during a cholera plague; in fact, he was stricken with the disease, but fought it successfully. Among the Mackenzie relics in the John Ross Robertson collection in the

John Ross Robertson collection in the Toronto Public Library are some of the military orders issued by Mac-kenzie and his rebel army, as well as the proclamation offering £1,000 for his capture. A curio in the Normal his capture. A curio in the Normal School Museum is a cane apparently given to Mackenzie by some political enemies in a spirit of irony, the lettering reading: "This vine was cut on Navy Island, C. W., after the Lion (Mackenzie) and his pirate followers fied to the boats on January 16, 1838, finding the grape of Canada too potent for their relish." (Signed) "HEMP."

More than one old Ontario farm-More than one old Ontario farmhouse has legends of having given
him sanctuary during his flight. A
cave near Dundas is still pointed out
as one of his hiding places, while,
in the same town, the building which
he once occupied—the Leslie House,
has survived the passing of the years.

Queenston also holds a pathetic re-

POULTRY NEED AIR.

Hen Is Fast Breather—Houses Must Be Open.

"The prime essentials in poultry houses," says an expert of the United States Department of Agriculture, "are fresh air, dryness, sun-light and space enough to keep the birds comfortable."

This expert here names principles in poultry house construction that have a universal application. Just why these are the important items is evident when we consider the nature of the birds. Mr. Charles L.

nature of the birds. Mr. Charles L. Opperman gives these characteristics in a recent issue of the Country Gentleman, as follows:

"The hen is a fast breather, has a high body temperature — average 106 degrees — and oxidation within the body is very rapid. Unlike most animals, she does not sweat or pass liquid urine, which necessitates rapid respiration to throw off pass liquid urine, which necessitates rapid respiration to throw off most of the body moisture. Thus it is plain to be seen that unless the air in the house is changed constantly it will soon become laden with moisture and contaminated by impurities given off by means of respiration and feces."

Obviously the air of the poultry house becomes saturated very quickly unless the air he of the best And it

unless the air be of the best. And it is just here that we find the explan-ation of the success of the open-front house. We have all noticed in the closed house in cold weather how quickly the moisture frosts on the walls. This would be inimical to the health of any animal, much more the warm-blooded hen. Hence, in all countries, no matter how cold, the countries, no matter how cold, the open-front house is proving its merit.
Mr. J. W. Clarke tells of a hotel-keeper in North Bay, Ont., whose hens roosted in the trees with the temperature 40 degrees below. Thuse hens, Mr. Clark tells us, were perfectly healthy and were laying. We fectly healthy and were laying. We would not advocate such exposure, but the incident does illustrate the foolishness of wasting good money in building what are mistakenly called "comfortable houses."

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a local disease, greatly influenced by constitutional conditions, and in order to cure it you must take an internal remedy. Hall's Catarrh Medicine is taken internally and acts through the blood on the mucous surfaces of the surternally and acts through the blood on the mucous surfaces of the suytem. Hall's Catarrh Medicine was prescribed by one of the best physicians in this country for years. It is composed of some of the best blood purifiers. The perfect combination of the ingredients in Hall's Catarrh Medicine is what produces such wonderful results in catarrhal conditions. Send for testimonials free.

### **BIG CROP WAS WASTED**

NEITHER GROWER OR CONSUM-ERS HAVE PROFITTED.

Amount of Fruit In Niagara Orchards In 1920 Established Something like a New Record, But Shortage of Sugar and Supplies Caused Much Waste and Outcome Was Unsatisfactory.

The fruit season just finished has been the most disappointing to grow-ers and consumers of any in the past many years, and its effect is certain to be noticed for at least another season. Never in the history of fruit growing in the Niagara Peninsula was there so much waste of good material as there has been this sea-son and it is doubtful if would-be consumers were ever more poorly supplied, even though the demand was not at all in keeping with the prosperous condition of the class of people usually looked to to account for the bulk of fruit crop in a season when the crop is heavy, and prices reasonable.

reasonable.

Since the first fruit of the season began to mature, a series of adverse conditions has occurred so far as both grower and consumer are concerned, and the result is that the bountiful crop has proved no greater benefit to the country than would have a very ordinary, or even a poor crop. Beginning with strawberries, the package shortage prevented efficient distribution, and to this was added the high sugar price, which became most evident when sour added the high sugar price, which became most evident when sour cherries began to come to the market, and continued through the plum season, making plums a drug on the market because people could not afford the expense of canning them. As a result of conditions when the crop was at its height, thousands of trees of cherries were left unpicked, and though plums were cleaned up fairly well, it is doubtful if the growers more than cleared expenses on the crop, in the face of prices that ers more than cleared expenses on the crop, in the face of prices that were no higher than those of pre-war times, when labor cost little more than half what it does now. Small fruits probably paid all who had them to sell, nainly because the supply was entirely too small for the number of consumers to be supplied. The production of strawberries and raspberries has got to a stage where it is so far behind the possible demand, that the amount of fruit available is only sufficient to provide for immediate consumption, and preservimmediate consumption, and preserved fruit of that sort is becoming a thing of the past so far as the average consumer is concerned. Black currants, always a laxury, are now beyond the means of all but the

The most that can be said about it by one who is not acquainted with all the underlying reasons, is that it was most unfortunate, that when was most unfortunate, that when a slight drop in sugar prices occurred, just when the season for best can-ning peaches brought a phenonemal supply of cheap fruit within reach of those who desired to preserve as large a supply as possible, the supply of glass jars gave out It is comof glass jars gave out. It is commonly remarked that it is impossible to continue with the manufacture of glass during the warm weather of account of the tremendous heat thrown off by the furnaces, Br. if this is the case surely the meanifest this is the case, surely the manufac-turers of glass jars for preserving fruit have learned long before the fruit have learned long weather gets too warm.

However, there are conditions within the control of the fruit growers that have been responsible to a great extent, for the unsatisfactory disposal of the peach crop this sea-son. Much inferior fruit has been shipped. Fruit that is inferior in size degree of ripeness, and general con-dition, made up far too great a pro-portion of the shipments arriving in Toronto, one of the principal mar-kets. This resulted in a general low price being established, and consumers, having had experience of the low quality of the cheap fruit were afraid to bid higher for what looks like good

Size, which has a lot to do in de-Size, which has a lot to do in determining the attractiveness of peaches to the average consumer, has been lacking in much of the fruit shipped this year. Growers can be found who are willing to admit that this lack of size could have been avoided by thinning the crop, but they claim that the cost of the operation looked as though it was too ation looked as though it was too great to permit of a profit under average prices. Labor costs were high when the time for thinning arrived, and moreover, such a big crop as that of 1920 was not expected until the last moment. The high even this rived, and moreover, such a big crop as that of 1920 was not expected until the last moment. The big crop, after several years of short crops was responsible for much of the trouble in shifting the crop this season. It was because of lack of demand for baskets in the past two or three seasons, that many of the big manufacturers gave up making baskets; and it is possible that the same condition influenced the glass jar supply. In many sections, no special effort to distribute the crop was made until too late in the season, and last but not least, lack of production of fruit in the past seasons, has to bear some responsibility, with lack of production in other lines, for the increase in freight rates, which is no small item of expense in the fruit respects.

Wedding Announcements and Invitations of the finest quality at The Guide-Advocate.

In painting the interior walls of the wood silo do not use lead and oil paint; use carbolineum or some other creosote wood preservative. One of our subscribers advised us that he painted the interior of his silo with lead paint and the paint came off in small scale. After feeding silage for some time the cows showed signs of poisoning and seven died. A chemical poisoning and seven died. A chemical analysis of the contents of the stom-achs showed that lead poisoning was the cause of death,

Control of Insects.

farmer in most districts.

Insects which attack vegetables may be divided into two groups—those which eat or chew the leaves or fruit, and those which suck the plant juice.

Biting insects may be poisoned by spraying the plants with polsonous solutions or by dusting them with poison powders. Potato beetles, fiea beetles, cabbage worms, striped cubeetles, cabbage worms, striped cu-cumber beetles and similar biting in-sects may be held in check by spray-ing the plants with arsenate of lead ing the plants with arsenate of lead paste at the rate of two pounds to 50 gallons of water. The spray sticks better, especially on smooth plants like cabbage, if a little soap or molasses is dissolved in the spray. The arsenate of lead may be obtained as a dry powder, mixed in a quantity of flour or alr-slaked lime and dusted on the plants.

Sucking insects like plant lice may

Sucking insects like plant lice may be held in check by spraying with soap suds, kerosene emulsion or to-

Colorado Potato Beetle and "Slugs" or Larvae at Work.

bacco decoction. Most insects are also repelled to a greater or less degree by the presence of fine dust, which tends to close their breathing pores. For that reason, it is best to keep the surface soil well tilled to maintain a dry, surface dust mulch. Wood ashes, air-slaked lime, insect powder or tobacco dust sprinkled on and about the plants also help to keep down insects.

Most fungous diseases such as celery rust and potato blight, may be held in check by spraying with bordeaux mixture: four pounds copper sulphate; four pounds lime; 50 gal-

ns water.

Where both insects and fungi are present, it is well to add two pounds of aresnate of lead paste to the 50 gallons of bordeaux mixture. This combination spray is to be recommended especially for potatoes to control the potato beetle and potato

Canadian Holsteins for France.

A commission firm of Toronto has Secretary Clemens reports, received an order from the French Govern-ment to buy 150 Holstein bulls around eighteen months of age. It is rather remarkable that France should send across the Atlantic for Holstein bulls when the country of their origin is so close at hand, but it is undoubtedly due to the large re-cords made on this side of the water and the reputation for producing ability which has been built up for Hol-steins in Canada.

Caring for Tomatoes. The chief advantages of pruning and staking tomatoes are:

1. A larger number of plants can be set on the given area.

2. The tomatoes will ripen a little

earlier when plants are pruned and staked. 3. The fruit is kept off the ground, is clean, easy to gather, and less like-

ly to decay.

4. The quality of the fruit is usually better on plants that are pruned and staked.

One of the most effective vermifuges on the market is Miller's Worm. Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

SENSATIONAL SPEECHES.

Sir Auckland Geddes Reads Industrialism a Lecture. The Canadian Bar Association owes

The Canadian Bar Association owes its origin and rapid growth chiefly to the fostering care of Sir James Aikins, who, being impressed with the utility of the American Bar Association, has devoted his energies to creating a parallel organization in Canada. At the recent meeting held in Ottawa, two very sensational addresses were delivered which will have echoes up and down the land for some time to come.

Mr. W. E. Raney, the Attorney-General of Ontario, in moving a vote of thanks to Lord Cave seized, the opportunity to condemn the main reasons urging this change: firstly, it is quite inconsistent with our new

it is quite inconsistent with our new claims to full national status that Canadian courts should not be good enough to interpret laws made by Canadian legislatures; and, secondly, the heavy expense of Privy Council appeals imposes an unfair handicap upon poorer litigants and often forces inequitable settlements. Mr. Raney's daring venture was backed up by Mr. W. D. Gregory and received support from an unexpected quarter in Mr. R. B. Bennett. Naturally the Attorney-General brought down upon his head the stern disapproval of most of the delegates, though he probably reflects the opinion of a large ma-jority of the general public. Sir James Aikins and other leading legal lights were obviously pained, but wisely held their peace and it was left to Mr. Hartley Dewart to make mmon cause with an unbending pressing angry horror at what they considered the disloyal and improper oposals of the Attorney-General.
But if Mr. Raney behaved with im-

ropriety, his crime paled its ineffectual fires beside the misdeeds of Sir Auckland Geddes. In Britain Sir Auckland is classified as a Tory and an Ambassador is supposed to have no political or economic opinions. But to the astonished association he delivered a speech which had a flavor of earnest radicalism, and while it gained him many fresh admirers, lost him some old ones. Consider the irony of the situation. Here has the Labor Department been spending funds on pamphlets seeking to prove runds on pamphiets seeking to prove that the country is honeycombed with Bolshevist agitation. And now along comes Sir Auckland and tells his audience in categorical terms that de-nunciation of agitators is about as profitable a pastime as swatting mos-quitoes, and that just as malaria can-not be got rid of until the swamp profitable a pastime as swatting mosquitoes, and that just as malaria cannot be got rid of until the swampy pools in which the mosquitoes breed are drained, so industrial unrest will continue till industry is humanized and intelligent and drastic readjustments of the existing system come to pass. He also brushed aside the theory that democratic unrest is merely a temporary aftermath of the war and will soon subside. Sir Auckland knows better and gave a moving account of his discoveries as Director of Recruiting in Britain, which apparently made him a reformer. Without undue emotion he narrated how he found on every side terrible evidence of the evil effects of unbridled industrialism, the physical ill-being of millions, the ghastly overcrowding, the destruction of home life and the reduction to mental stupor produced reduction to mental stupor produced for multitudes by the dull task of minding soulless machines. His meas-ured indictment of industrialism will ured indictment of industrialism will not secure him an early invitation to address the C. M. A. in session. But his speech made a deep impression upon his audience. He spoke with a Calvinistic force and sincerity and obviously has not only thought deeply and clearly upon all current problems but he also claimed for himself complete freedom of utterance when the opportunity to strike a shrewd blow for sane progress offers. blow for sane progress offers.

FRIDAY, NOVEMBER 26, 1920. A BAD CASE OF PREJUDICE

To show what prejudice will do, a Canadian manufacturer tells the following incident: His factory makes a particularly high grade of both men's and women's shoes. For the women's shoes he adopted a name that clearly indicated that they were made in Canada. The name "killed the line," he said. But he was able to develop a splendid demand for exdevelop a splendid demand for ex-actly the same shoes when he chang-ed its name to one which suggested ed its name to one which suggested that his shoes were made in the States. This shows that Canadians must learn to judge articles on their merits, and not buy things just because they are "imported." Imagine what would happen to Canada if the idea spread and people commenced to demand that the things they eat, their fruit, fish, vegetables, flour, meats, also be "imported."

#### PUBLIC SCHOOL EDUCATION

According to statistics only 6 per cent. of the boys and girls of Ontario ever get beyond the public school. How necessary is it then that the Public school system of our province should be made efficient enough to give every boy and girl up to 14 years of age a good, practical, elementary education. We fear that in these days of many subjects, too little attention is given to reading ementary education. We fear that in these days of many subjects, too little attention is given to reading, writing and arithmetic. Drawing may train the hand and eye, and art may develop the aesthetic, but after all, being able to enjoy reading after the school day is over, and that is where the benefit of geography, history and literature comes in; having the ability to write a legible hand, and knowledge enough of arithmetic for the farm or business are the subjects that count in everyday life. There should be more elasticity in our public school program. Why should a boy or girl who can never become a good speller be kept in the third book for an extra year when he could easily be at the head of a fourth book class in other subjects? We never could see why the school regulations should step in and prevent a student who has no natural ability in one or two subjects from starring in other subjects.

DEATH OF MRS. JOHN KNIGHT

On Sunday morning, Nov. 15th, there passed into the great beyond in her 66th year one of Strathroy's much respected women in the person of Mrs. John Knight, formerly Janet McIntyre of Adelaide Township. Mrs. Knight was married on Sept. 18th, 1878, and, with her husband, lived in Metcalfe Township until three years ago, when they sold their farm to Geo. A. Bennett and moved to Metcalfe street, Strathroy. She had not been in good health for the past four years on account of heart trouble, of which she and her family were aware. The end came suddenly, without pain, which is some consolation to the sorrowing husband and children. On Sunday morning, Nov. 15th,

to the sorrowing husband and children.

She leaves to mourn her loss her husband and two daughters, Mrs. Russel Brown, of Adelaide, and Eva, at home. Four sisters, Mrs. John Anderson, of Wyoming, Mrs. Geo. Marr, of Manitoba; Miss Rebecca McIntyre, of Watford, and Miss Martha McIntyre, Strathroy, and one brother, John U. McIntyre, Dewan St. Strathroy, also survive.

Mrs. Knight was a faithful member of the Anglican Church. The funeral was held on Tuesday afternoon, Nov. 15th, to the Strathroy cemetery, the service being conducted by Rev. H. F. Deihl, of Adelaide.—Dispatch.

#### BEEKEEPERS PLAN TO FIGHT DISEASES

Sarnia, Nov. 18.—The second joint convention of St. Clair County, Mich., and Lambton County beekeepers was held in the public library here today. Matters of importance to the bee industry were discussed, including a campaign to combat existing bee diseases. The speakers of the day included John L. Wilson, president of the Lambton Association; Herman Betten, president of the St. Clair Association; W. E. Haskell, secretary-treasurer of the St. Clair Association; C. L. Brody, Port Huron; F. Erie Millen, Ontario Provincial Apiarist, chief inspector for Ontario; B. F. King, Michigan State Apiarist, and chief inspector; Clare M. Waldo, demonstration agent, Port Huron; W. P. McDonald, district representative, Petrolea.

WOULD NOT BE WITHOUT BABY'S OWN TABLETS

Once a mother has used Baby's Own Tablets for her little ones, she would not be without them. They are the ideal home remedy for the baby, being guaranteed to be absolutely free from opiates or other harmful drugs. They are a gentle but thorough laxative and have been proved of the greatest aid in cases of constipation, indigestion, colic, colds and simple fevers. Concerning them Mrs. Ernest Gague, Beausejour, Que, writes: "I have used Baby's Own Tablets for constipation and colic and have found them so successful that I would not be without them. I would strongly recommend every mother to keep a box in the house." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Air-Tight Storage Kirls Weevils.

Air-Tight Storage Kirls Weevils.

It has been found that grain insects sealed in air-tight vessels, with at without wheat, succumb as soon as the oxygen has been used up, a corresponding amount of carbon dioxide being produced. The complete absence of oxygen is alone sufficient to kill weevils, without taking into account the presence of carbon dioxide, though the weevils are able to remain alive when only small percentages of oxygen are present. The general advantages of air-tight storage of grain, are summarized in the age of grain, are summarized in the report of the Grain Pests Committee of the Royal Society, and the im-portance of this method is urged as a means of maintaining a reserve of cereals in case of war or failure of crops.

Rooster Is Not Necessary.

So far as egg production is con-cerned, it is absolutely unnecessary to keep a male bird in the flock. The hens lay just as many eggs and frequently more and you have the added

PALLID CHEEKS

AND DULL EYES Tell the Story of Watery Blood-How to Regain a Good Color

and Health. To be rundown in health and to lose their attractiveness is the double misfortune of many young girls. Their pallid cheeks and dull eyes tell everyone that they are doomed to days of wretched headaches and are victims of breathlessness and bloodlessness. The anaemic girl, if she neglects her health, may be a sufferer all her life; for an active happy woman cannot be developed out of a bloodless, consumptive looking girl, without the help of new, rich, red

bloodless, consumptive looking girl, without the help of new, rich, red blood.

Pale, weak girls should take heed Bloodlessness must not be neglired. Plenty of good off, a nourishing diet and rest will help to u, but the care you need most premaily is new blood. Good new blood in abundance, such as makes all the difference between sound health and poor health to girls and women, is supplied by Dr. Williams' Pink Pills. Their one mission is to make new blood which reaches every organ and every nerve in the body, bringing to anaemic girls and women new color, bright eyes, an elastic step and a feeling of joy in living. The value of Dr. Williams' Pink Pills to young girls is shown by the cure of Miss Bessie Clarke, R.R. No. 1, Stevensville, Ont., who says: "Two years ago, while studying for the entrance examination, my health broke down and I fell away to a mere shadow of my former self. When the day for the exminations came I should have been in bed instead or trying them, but I went on with the work and when through was almost on the verge of collapse. I thought then that a rest would help me, but I did not regain my strength. Then my mother was advised to have me try Dr. Williams' Pink Pills, and after taking them for about a m mth I found myself restored to halth, with good color and a change for the better, which people who knew me readily noticed. I am very thankful for what Dr Williams' Pink Pilks did for me, and hope my experience will beuefit some other weak girl."

### The Great Happiness

BY EVELYN CLAIRE FORTNER

The Little Millionaire sat pondering—a sad, faraway look in his brown eyes. Yes, it was a strange world and a stranger Fate which ruled its inmates. He fingered idly a novel which had lately been published, by Rupert Carew, and called "The Great Happiness". He was deciding what his greatest happiness would be if it could be granted him. He sat on a rustic bench in a large park. Above his head softly waved a willow tree, At his feet flowed a laughing, bubbling stream, on which the sunshine flashed and shone, making the water a liquid mass of silver and gold. Through green trees gleamed ivory statues, and great pink, white and red roses ran riot everywhere. It was a garden in which nothing seemed to be tended methodically or stiffly, and yet not a single ug'y weel could be strong had not be bronze here as pondering as the mild of my utmost;" replied Nicholas, tenderly, lifting a stem on which a red rose was drooping 'sadly. "But I will need your help because I think that flowers know our thoughts toward them, and when you love them, so, that ought to help a great deal."

"Oh, do you believe that too?" She was smiling now. "I often have heard about you and how you loved the growing things, and I have longed to meet you. I know your name, of course, because we were expecting you. Mine is Mary Arlee, and I'm is secretary-companion to Madame.Now that we've properly introduced ourselves, let's begin working at once," she finished.

So together they worked and Nicholas Barton thought he had never met so sweet a girl. He loved to have the sunlight play on the bright is the proper that the sunlight play on the bright is the proper that the sunlight play on the bright is the proper that the sunlight play on the bright is the proper that the sunlight play on the bright is the proper that the sunlight play on the bright is the proper that the proper that the sunlight play on the bright is the proper that the prope selves, let's begin working at once," she finished.

So together they worked and Nich-olas Barton thought he had never met so sweet a girl. He loved to the seen. If a person, at ranoom, chose one of its numerous walks and strolled down it, he might accidently come upon a little green door and opening it would find himself in a mineature fairy garden, indescribable in its quaint beauty and surrounded by walls of high green trees. If he chose another of the paths he might come upon a stone gate and opening it would enter the kitchen garden with its rows upon rows of cabbages, beets, tender asparagus and berrybushes. Over the low stone wall which surrounded this, he would see great fruit trees cheerfully bearing their rosy burdens. On the other, side of the orchard, in a large fenced field, deer and rabbits looked mildly and shyly at one and then scampered away into a deep, green grove, through which flecks of sunshine away into a deep, green grove, through which flecks of sunshine shone down and checkered the cool, green flooring. To the right of the tiny 'zoo' was an ideal long, log bungalow clambered over and almost hidden by vines and lovely roses. Yes —you have guessed correctly—it belongs to the head-gardener and looks beautiful enough for a king to dwell therein, or at least the master of the estate. But above the park trees peep little towers and we know that this is the home of the fortunate owner of this veritable Garden of Eden.

But we must return to the solitary

But we must return to the solitary Little Millionaire sitting thinking, by the brook, where we left him.

"My 'Great Happiness'," thought the man wistfully, "would be to be back once again in the rose-bowered bungalow with my Mary beside me She never cared for riches and I find now that I do not care as much as once I thought I would." While the Little Millionaire is dreamily building 'Castles in the Air', let us leave him once more and go back through his past.

Ten years before this, he was not

Ten years before this, he was not a millionaire—not even a little one. He lived in England, in the great city of London, and was an architect. He planned houses and plots and gardens—but his special line was garden-planning. "He could", exclaimed flower-lovers, "simply make a garden live." He loved the flowers and trees as if they were his children. He sorrowed over a premature-ly withered rose as if it had been a

The spring of his twenty-fifth birthday he was sent for, by a rich, old broker, who was having a large house built and gardens planned and wished to engage the young architect.

The day he had finished this contract, the broker called him in and told him that an old friend of his in the United States wished an expert gardener to live on his old colonial estate, which he had just bought, to rejuvenate the old park which was beautiful but had been almost completely ruined in its complete lack of care. The broker had recommended the architect—Nicholas Barton as

a reliable competant man.

Nicholas was then engaged to, and
very much in love with, Mary Arlee, wery much in love with, Mary Arlee, a secretary-companion to a very rich old lady, on whose only son Madame wasted all her money and her love. As a result he was ungoverned and terribly dissipated, thus almost breaking Madam's proud old heart.

The first day Barton had ever seen Mary was when Madam had sent for him to restore a blighted rose-tree, whose red, velwet petals were fading and dying from a certain plant dispand the second second

whose red, velvet petals were fading and dying from a certain plant disease. On arriving at the place he went straight to the garden, and there, stretched full length on the grass before the rose-tree was a girl, face downward and crying as if her heart would break. The man looked at her tousled, bronze head and then said,

"Are you-er-that is can I help you any?" When she heard his voice she sat up quickly and raised silky-fringed, tear-filled grey eyes to his, say-

"Oh, are you the flower charmer? Can you restore this dying rose-tree to health? Ever since I have lived with Madam I have loved it. I visit it every morning and the roses' always smile up to me from their deep velvet flepths. I love every flower in this garden, but I love these roses best."

after he had finished at Madame's and the velvet roses were strong and the velvet roses were strong enough to look up again, the friendship continued and deepened into love, and a year after Nicholas asked Mary to be his wife.

"I can't give you wealth, dear," he had said, tenderly, "but I can give you comfort and love."

"Nicky, dear," she had replied, "that is all I want. Haven't I seen what money did to Madame's son, and how it almost broke her proud, old heart. I want love and flowers and you, Nicky, and that's enough for any weman."

They were married a few weeks before they am arried for America—which was to be their honeymoon also. For Barton had accepted the old broker's proposition. Three weeks later they were sailing on bright, blue gest the son levels and the sailing on bright, blue gest towards their says levels and the sail of the sailing on bright, blue gest the sail of the sailing on bright, blue gest towards their says levels and the sailing on bright, blue gest towards their says levels.

later they were sailing on bright, blue seas towards their new life. On the morning of the third day, how-ever, the skies grew dark and menacing. It grew so dark that those on board could not see a yard in front board could not see a yard in front of them; the ocean was a writhing, green serpent foaming at its mouth, and the wind shrieked and moaned like a mad demon. Children clung to their mothers' skirts in speechless fear, and even the old sailors shook their hoary heads in doubt. Three hours later a horrible, deafening "Boom!" was heard and a long shudder shook the ship from end to end. It had struck a rock! Lifeboats were quickly lowered and the women and children were ordered to be lowered first. On the lower decks stood the "flower charmer" and his grey-eyed, white-faced little bride.

"My lover, my heart, how can I

and children, and Barton was lowered to the men's boats alread; and rapidly filling.

One month later Nicholas Barton

ans. The park was ever opened to tired wayfarers and children and thus, many a merry shout could be heard among the trees.

So five more years rolled peacefully, if not entirely happily, by, and the Little Milhonaire sat pondering, one afternoon, in his beautiful grounds, and wondering what his great happiness would be, barring every impossibility.

Ah, yes! Well he knew what it would be. Suddenly a sharp pain shot through his head and involuntarily he raised his hand and pressed it to the spot. In a moment the pain

it to the spot. In a moment the pain ceased and left him weak and trembling. But every few days it returned and he was compelled to consult his medical friend, Dr. Hall. When he described his illness to him the described his illness to him the

doctor said,

"Nick, old friend, I advise you to
take a long trip, free from care. You
need a complete change of air and
scenery. I have often heard you exneed a complete change of air and scenery. I have often heard you express a wish to see and visit the sea islands. Take your yacht and go. You will find yourself a different person, old man, if you take my advice."

As a result, a few weeks later, Nicholas Barton was sailing away once again, over bright blue seas. Many were the strange islands which he and his crew visited. Wonderingly the 'flower charmer' looked upon stranger flowers—flowers of such varied and marvellous beauty, that the Little Millionaire wondered if he had died and gone to Heaven. As had died and gone to Heaven. had died and gone to Heaven. As he slept under pure tropic skies; drank in the balmy breezes, and watched the golden sun rise from and sink into the warm, lapping waters—leaving a molten bridge of gold across them, the pain in his head came less and less frequently and finally cassed coming at all

finally ceased coming at all.

One day as they were visiting the last of the wonderful islands before returning home, Barton noticed far returning home, Barton noticed far in the distance back of the island, and seemingly isolated, a tiny spot. It fascinated him and taking an eye glass looked towards it. He could distinguish a few waving trees but not a living thing. From where he stood it looked bleak and desolate, but somehow it attracted him strangely and going back to his boat, ordered his men to sail towards it. ordered his men to sail towards it. After some time they anchored and went ashore. It appeared at first barren and uninhabited. Half a mile from shore high rocks seemed to form a complete circle about it. Advancing, the men found an opening, and entering found themselves in the most beautiful place they had ever seen. Large, soft palm and cypress trees nodded gently in the warm, caressing breeze. The most delicate, the most beautiful flowers and plants aire fingered them wonderingly, his eyes feasting on their marvellous beauty. Gay plumaged birds flashed from tree to tree, some carolling exquisitely. And in the faroff distance gurgling, falling water could be heard.

first. On the lower decks stood the "flower charmer" and his grey-eyed, white-faced little bride.

"My lover, my heart, how can I t leave you?" she cried sobbingly.

"My Mary of Argyle, we shall meet again—if not in this world, in the next. My wife, my little wife, good-bye."

He strained her hungrily to his heart, and their lips met in a last, long, clinging kiss. Then a sailor hurried her to the last boat of women and children, and Barton was lowered to the world was lower.

the women was a fairer one. One whose bronze-gold hair shone and ed to the men's boats alread, and rapidly filling.

One month later Nicholas Barton registered his name in a San Francisco hotel. He waited a week for news of the survivors and scanned eagerly the papers. At last he found it—"Survivors of the Wrecked Orphelia." Breathlessly he read the column of names. Mary's was not there! The paper dropped from his nerveless grasp and he buried his face in his hands.

whose bronze-gold hair shone and rippled in the tropic sunshine. She was clothed in a long, loose robe was clothed in a long. Loose robe was clothed in a long, loose robe was clothed in a long. Loose robe was clothed in a long, loose robe was clothed in a long. Loose robe was clothed in a long loose robe was clothed in a l

umn of names. Mary's was not there! The paper dropped from his nerveless grasp and he buried his face in his hands.

"Mary," he moaned, "my little Rose Wife, how can I live without you?" But he did live without her. He determined that he would not be selfish and hug grief to himself, but would make others happy, with the flowers he loved.

He then went to New York and invested the snug, little sum which had saved during his bachelor life, in a Wall Street stock speculation. Then he went back to the broker's old friend, who had sent for a gardener. With wonderful skill he set to work on the ruined old park and garden, and soon converted it into a Paradise, in which we left the Little Millonaire were not evening at sunset. "If only she could be living here in the rose-bowered bungalow!"

During this time his investment in Wall Street stock was increasing rapidly. It had multiplied, doubled, trebled, and five years after he landed in America he found himself, almost unwillingly, a millionaire. He then bought the great colonial house from the broker's old friend, who had been ordered abroad for his health. It was then that he gained the title of the "Little Millionaire"—not because he was little in stature and certainly not little in heart or soul, but because he was such an unotrusive millionaire. He never entered society life and almost always hed nis hone filled with little orph.

People of average means can hardly afford in these days to keep servants. Households which formerly wants. Households which the kept two or three now get along with one maid. Many manage with half a servant, sharing her with a neighbor. Not a few housewives have been driven to the necessity of doing their own cooking and sending the washing to a laundry.

ing to a laundry.

This has meant a great deal of discomfort, but there has been an incidental gain. Waste is enormously

incidental gain. Waste is enormously reduced.

Servants make nearly all the waste of a household. Many housewives, deprived of "lady help," have been astonished to observe a shrinkage of their food bills, notwithstanding the present doubled and trebled prices. When a domestic establishment employs half a dozen servants the waste is enormous. Nearly always in

waste is enormous. Nearly always in a house run on that scale the butler and cook "stand in" with the butchand cook stand in with the butch-er and grocer, and their rake-off in-creases with the amount of food they throw away.

Recent investigations proved that

the average family living in a private house, with one or more ser-

vate house, with one or more servants, throws away a pound and a quarter of perfectly good food every day.

It was found that the average apartment house family throws away only one-fifth as much—largely, doubtless, because such families reduce domestic service to a minimum. In the tenement districts of Toronto one garbage can usually suffices to hold the food refuse of twenty. fices to hold the food refuse of twenty families. But in the "private house districts" it was found that 163 fami-

the had 175 garbage pails, or more than a pail apiece.

Examination of the 175 pails revealed eighteen pounds of bread and rolls, fifty pounds of meat, thirty-five pounds of potatoes, sixteen pounds of cereals and large quantities of per-fectly edible fresh vegetables.

Always the amount of food waste varies directly with the number of servants employed. As a matter of fact, the full garbage pail seems hitherto to have been regarded in this country as a manifestation of pros-perity. Not until very recently have people begun to think that possibly this was a foolish idea

Mitchell Kept the Bridge.

A modern Horatius at the bridge was Capt. C. N. Mitchell, V.C., of the 4th Battalion, Canadian Engineers, who is now located at Scottsbluff, Nebraska. It was due to his valor and decisive action that an important bridge across the Canal de L'Escaut, near Cambrai, was saved from de-struction in October of 1918. In total darkness, and unaware of

the position or strength of the enemy at the bridge-head, he dashed across the main bridge over the canal. This bridge was found to be heavily charged for demolition, and whilst Capt. Mitchell, assisted by his N.C.O., was cutting the wires, the enemy attempted to rush the bridge in order to blow the charges, whereupon he at once dashed to the assistance of his sentry, who had been wounded, killed three of the enemy, captured 12, and maintained the bridge head until reinforced.

Then under heavy fire he continued his task of cutting wires and removing charges, which he well knew might at any been fired by the enemy.

Lamp wicks which will last a year are made of sabestos boiled in wax.

### What Prominent Ontario Women Say

### A HAMILTON WITNESS

Hamilton, Ont .: "A few months ago I was stricken down and was confined to bed about ten days. My strength all left me. It was my first illness since a child. I lost five pounds and felt awfully weak afterward. I could hardly do my work. I was advised to try Dr. Pierce's Favorite Prescription in tablet form. I tried a couple of bottles and before I knew it, I was well and strong and had gained 9½ pounds. I can recommend Dr. Pierce's Favorite Prescription to build one up."-MRS. E. MARTIN, 397 Dundurn St.

After suffering pain, feeling nervous, dizzy, weak and dragged down by weak-nesses of her sex—with eyes sunken, black circles and pale cheeks—such a woman is quickly restored to health by the Favorite Prescription of Dr. Pierce. Changed, too, in looks, for after taking Dr. Pierce's Favorite Prescription the skin becomes clear, the eyes brighter, the cheeks plump. It is purely vegetable, contains no alcohol.

Peps will give you relief.'
Simply dissolve a Peps tablet in your mouth. Your breath carries the medicinal Pine vapor, which is released, to all parts of the throat, nasal and air passages, where a liquid medicine could not possibly reach. This vapor destroys all germs with which it comes in contact, soothes and heals the inflamed membranes and fortifies you against coughs, colds, sore throat, bronchitis and grippe. Peps contain absolutely no harmful drugs and are therefore the safest remedy for children.

FREE TRIAL Cut out this article, write across it the name and date of this

across it the name and date of this paper, and mail it (with Ic. stamp to pay return postage) to Peps Co., Toronto. A free trial packet will then be sent you. All drug-gists and stores sell Peps, 50c. box.

of some of the provisions of OLLOWING are brief outlines certain bills passed at the last session of the Legislature, and which touch very closely the interests of farmers of the Province, furnished by the Agricultural Gazette of Canada:

Cream and Milk Purchase Act.

This is a measure designed to protect the producers of cream in the matter of test. It provides that all cream purchased in a wholesale way shall be purchased on a basis of the butter-fat content, and that all milk that is paid for on a butter-fat basis shall be tested by the Babcock method. At the present time, of course, practically all cream purchased by wholesale is bought on a basis of its butter-fat centent, so that the chief purpose is to standardize the test and see that the producer gets a fair test. The Act and Regulations prescribe the method of testing, and also provide that the shipper shall be entitled to a statement in detail of the quantities of cream received and the amount which each tested. The inspectors are given authority to enter factories at all hours and make tests, and also look over the books of the companies, and check up the quantities of cream received and the manner in which it is disposed of.

Dog Tax and Sheep Protection Amendment Act.

The dog nuisance is so general and so serious to owners of sheep that there is an effort almost every session to further strengthen the legislation to protect sheep owners from losses by dogs. The act introduced at the recent session provides that all dogs in the province shall wear tags, to be secured from the officers of the municipality. Any dog found off the premises of its owner and not under the control of any person and not wearing a tag may be killed by any person, and there is also a fine to the extent of at least \$10 for those who fail to secure tags. This section, however, does not come into effect until April 1, 1921, so as to give peo-

ple concerned proper notice. Another amendment gives the councils of counties power to take over all dog taxes collected and to pay out the losses which may be incurred through damaged. curred through damages to sheep. At the present time these losses are borne entirely by the townships, which also receive and control the

revenue from the dog tax. The Sale of Formaldchyde.

For some years past the Department of Agriculture and many lead-ing farmers have been advocating the use of formaldehyde for the treatment of seed grain for smut. Frequent complaints were heard that as formaldehyde was only handled in drug stores, it was not convenient in many rural sections where drug stores were often ten or twelve miles apart. It was found that all that was needed was a slight change in the Pharmacy Act which would put for-maldehyde in the same class as Paris green and other poisons that are handled by hardware stores or gen-eral stores. It is, of course, provided that formaldehyde can only be sold in sealed packages carefully labelled "Poison" so that the handling may be properly safeguarded.

The Marketing Loan Act.

This is an important measure intended to grant financial assistance to organizations of producers incor-porated under the Companies Act porated under the Companies Act who desire to construct and operate seed centres or potato warehouses. A loan up to fifty per cent. of the value of the land, building, and equipment may be made, provided that such loan does not exceed the sum of \$3,000 in any one case. This loan is free of interest for a period of two years, but fifty per cent. must be repaid in five years, and the balance at the end of a further period of five years. The of a further period of five years. The act provides the usual machinery for the safeguarding of the investment. This measure is introduced in response to an indication that there is a real need in Ontario for encouraging the development of local seed centres where modern continued. centres where modern equipment for cleaning seed grain can be established, and in this way a market secured for the good seed produced in many sections. Similarly, there are indications that several sections would like to erect potato warehouses in order to carry their products.

A measure passed having for its object the prevention of the spread of diseases among bees provides for the enlargement of the scope of the the enlargement of the scope of the act which has been on the statute books for some time. The old act, however, is confined to foul brood. While this is one of the most serious diseases of bees, there are other that have developed later that require the attention of the inspector. The amended act also provides that bees or appliances from apiaries where disease has exitsed may be moved on certificate from the Provincial Apiarcertificate from the Provincial Apiarist. Formerly there was prohibition against moving bees or appliances under any condition.

### SWAT THE SCRUB BULL

Big Campaign On for Improved Type of Cattle.

The Scrub Bull a Menace to the Cattle Industry—Like Begets Like—Use Pure-bred Bulls With Proven

(Contributed by Ontario Department of

HE great subject of conversation among the rural people to-day is the present scrub bull campaign. Already, meetings are being held in a great many of the counties in connection with it and at every agricultural meeting of any importance at all, the scrub bull is being "cussed" and discussed with a vim and vengeance that people have seldom put into other branches of their work. It seems as if the veil of mystery has suddenly lifted and people have been enabled to see distinctly the vast importance that a pure-bred sire of good individuality and breeding has on the stock of the country.

It is also true that a great many are taking exception to the campaign, and they raise some objections which they think are perfectly legitimate, but which do not hold water when analyzed by the practical man, who has made a success of live stock by the use of a pure-bred sire of good ,by the use of a pure-bred sire of good breeding. Some farmers are saying that the Government has no right to try to make them discard their scrub sire and use a pure-bred of good quality. The Government is not, in any way, trying to force anybody to dispose of his herd sire for a better one; everybody has a right to use any kind of an animal that he wants to and it is nobody's affair but his own. But what they are doing, is to make plain to the owners of grade and plain to the owners of grade and scrub pure-bred sires the value of a bull that has a reasonable amount of individualism and breeding behind him, and then leave the whole ques-tion to be turned over and threshed out in the farmer's own mind.

Although the present campaign in Ontario is a new idea in this province, such work has been going on for some time in different parts of the United States, particularly in Wisconsin, which is one of the banner states of that country. In that state they are going about it in a little different manner than is being adopted in Ontario. Instead of the state Covernment doing the greater part ed in Ontario. Instead of the state
Government doing the greater part
of it, the different breed associations
are the "men behind the gun." They
got the school children interested in
taking a census of the cattle in the
different counties. After this was finished, meetings were held in different parts of the county and discussions on the value of good bulls were
held. In order to give the campaign
a starting impetus the different breed
associations decided to donate purebred sires to a common cause. These
pure-bred sires were given to a farmpred sires to a common cause. These pure-bred sires were given to a farmer in exchange for his scrub pure-bred or grade sire, which was in turn sold for beef and the money received, used to carry on the campaign to a greater extent. In this way there was no money exchanged between the farmer receiving the good tween the farmer receiving the good pure-bred and campaign authorities; pure-bred and campaign authorities; the farmer thereby getting a good bull for the price of beef, and a surety of reaping some benefit from the influence on his herd. The campaign was carried on very energetically and systematically and gave ex-cellent results. Other counties and states have adopted their general methods and are carrying on campaigns in different localities with good results, and it is safe to say that if the rural people of this province are as easy to teach, and there is no reason why they shouldn't be, the compaign in Ontario should be a the campaign in Ontario should be a

huge success.

In dealing with the scrub bull or grade sire there are one or two prin-ciples in breeding that are easily understood, and should be compre-hended by all owners of bulls. The old saying that "like begets like" goes to a certain extent, but in using a grand sire one is one always sure of what one is going to get in the off-spring because, in the use of an ani-mal with several infusions of blood, there is always a breaking up and segregation of characters which does not get anybody any place in the de-velonment of their herd. Whereas, in

The or the pure-orea of good quantity there is always a chance of any resulting service being better than the parents. Pure-bred sires of good breeding are endowed with a character or power called prepotency, which means that an animal has the power to stamp on his offspring some desirable characteristic more than some other. When we consider that the grade sire is likely to throw anything in the way of calves, and the scrub pure-bred has no prepotency, there is a reason that this class of animal should be discarded as soon as circumstances will permit and good ones substituted.—J. C. McBeath, O. A. College, Guelph.

Conquering Quack Grass.

Conquering Quack Grass.

Clean cultivation is the most practical method. The only successful way is to give the cultivation when it is needed no matter what the other work may be. Such a plan, however, makes it necessary to limit the eradication operations to such a sized field as can be handled with the other farm work. Ploughing quack grass infested land which has been to clover this year as soon as the to clover this year as soon as the first crop is removed and keeping it absolutely free from all green plants from then on to freezing-up time, continuing this in the spring until plant-ing time, and then plant to corn or potatoes and keeping the crop clean, usually deals the weeds a knock-out blow without losing a crop. The plough, disk and spring tooth harrow are the only implements needed to do efficient work.

IMMIGRATION.

Trade Will Not Flow Strongly For Over a Year.

Probably a year, or slightly more than a year, will elapse before the movement from Great Britain to movement from Great Britain to Canada reaches a really large number, in the opinion of Hon. James A. Calder, Minister of Immigration and Colonization. Mr. Calder, who has returned to Ottawa, after an official trip to England and Scotland, finds that shipping conditions are at present operating to restrict the movement. Moreover, Canadian immigration agents overseas have instruction agents overseas have instruc-tions to take every precaution to see that no more people migrate to the Dominion than can at present be

They advise persons not likely to find employment within a reasonable time of their arrival in Canada to defer their departure from England. Shipping agents, too, in view of the penalties to which they are liable for bringing unsuitable persons to the Dominion, are careful to scrutinize applicants for passages. In consequence, Mr. Calder asserts that Canada is securing a better and more suitable class of new citizens than

ever before.

The shipping situation, however, prevents any immediate increase in he volume of immigration. Mr. Calconference was informed that accommodation was informed that accommodation on vessels coming to Canada was booked for about a year. In so far as the outlook for immigration in the future is concerned, it will depend a good deal upon economic conditions in Great Britain. For instance, Mr. Calder states that there is at present almost as great a shortage of domestic servants in England as in Canada. Women, who were trained for domestic service, found trained for domestic service, found employment in industry during the They are only gradually leaving that field and returning to do-mestic service. The Minister of Immigration, however, found in Great Britain a feeling that a fairly ser-ious unemployment situation might develop there in the near future. Such a condition would tend to drive people to seek homes and livelihoods in other countries. It has been variously estimated, moreover, Mr. Cal-der points out, that Great Britain has a surplus population over pre-war days of from 600,000 to 1,200,000. Before the war 250,000 people left Britain every year. At the same time, having regard to the shipping situation, Mr. Calder inclined to the view that immigration would not reach really large numbers for prob-ably a year, or until the spring of jously estimated, moreover, Mr. Calably a year, or until the spring of 1922.

### An Ulcer Lost me 6 Months Pay

"Four years back," writes Mr. R. Howard, of Bracebridge, Ont., "a scratch on my leg turned to an awful ulcer. It took six months treatment to cure me and all the while I was laid up, never earning a cent."

"Recently, an injury started inflammation and ulceration on my other leg. Knowing about Zam-Buk, however, this time I acted very differently. I used Zam-Buk alone, and not only was the ulcer speedily and thoroughly healed, but I didn't less day's work while the cure was in progress. Get this grand healer to-day! THE HOME TOWN PAPER

It's like a smiling, friendly face, It's like a voice you long have known,

You see it in some distant place, And rush and claim it as your own The paper from your old home town Has bridged the long and dreary

miles,
And with it you can settle down

Among familiar tears and smiles,
It speaks of every friend you know,
It tells of scenes you yearn to see;
It brings back joys of long ago
And tells of joys that are to be,
And as you run its columns o'er,
Your vesterdays come transies Your yesterdays come trooping back,

back,
You fancy you are home once more,
And golden seem the letters black.
It's speech is one you understand,
It tells of grief that you can share,
It brings you in a foreign land
Glad messages to banish care.
There, among scenes and faces
strange.

There, among scenes strange, strange, The old home paper seems to be The faithful friend that doesn't hange, are glad to see

The faithful friend that doesn't change,
A friend that you are glad to see.
I know not just what heaven is like,
Nor just what joys beyond life's tide
Await for men, when death shall

Await for men, when death shall strike
And I shall reach the other side.
But this I know, when I am gone,
To dwell in realms divinely fair,
My soul will yearn to look upon
The old home paper over there.

STRONG DIET FOR HENS.

It Will Improve the Number of

Eggs. Hens given meat, fish, or milk products in their diet will lay from 38 to 66 per cent. more eggs than those which have only grain food and what bugs and worms they can pick up on

free range, recent experiments made by the U. S. Department of Agricul-ture show.

The birds used in the experiments were given conditions as nearly like those on a normal farm as possible.

The experiments were repeated under The experiments were repeated under different conditions and in different years to avoid, as far as possible, any error due to the varied characteris-tics of the birds.

The average farmer feeds very lit-

tle meat, fish, or animal protein feed of any kind to his poultry, and con-sequently gets few eggs during the late fall and winter when eggs are selling at the highest prices.

In the experiments conducted on the Government poultry farm, pens of pullets on free range were fed a mash of corn meal, bran, and mid-

Fowls Given Free Range.

dlings and a scratch mixture of wheat, oats, and corn. This is greater where bugs, green feed, and worms were plentiful. Other pens were given the same ration, with one pound of commercial meat series and do to of commercial meat scrap added to every four pounds of mash. The pullets without the meat scrap

laid only 90 eggs apiece (which is more eggs per hen than the average farm flock lays), while those receiv-

ing meat scrap averaged from 125 to 150 eggs apiece.

Meat scrap is not produced on most farms, and has to be bought at a higher price than grain. It produces eggs, though, several cents a dozen cheaner, than where no meat scrap is cheaper than where no meat scrap is used. Milk products or fish give as good results as meat in increasing egg production.

Chopped Stuff.

American markets are reported full of trashy cattle.

A Quebec lumber firm recently bought a car of heavy horses in Chicago at \$280 each.

An American breeder drove 1,500

An American breeder drove 1,500 miles through Iowa and Minnesota and saw more than 1,000 mares, but only nine foals.

On one farm near Fenelon, Man, there are 227 acres in flax, which produced nearly 250 tons of flax straw this year.

In order to feed off two inches daily from a 14-foot silo, it will take from 30 to 35 cows fed at the rate of 30 pounds each per day.

A production of timothy seed of approximately 80 per cent. of last year in the United States, is indicated from reports received by the Bureau of Markets.

Provincial Dairy Commissioner Reed says that Saskatchewan, which produced 6,620,000 pounds of creamery butter last year, is expected to produce 7,000,000 pounds this year.

Wheat Supply Approaching Normal. Wheat Supply Approaching Normal.

Wheat shipments from the last season's crop in Argentina have exceeded all estimates, and in India the monsoon, on the whole, was favorable. The area under wheat in Australia is 55 per cent. above the previous four-year average. The wheat crop is reported as good in Bulgaria, Denmark, France, Luxemburg, Netherlands, Roumania, Serbia-Croatia-Slavonia and Sweden; average in Germany, Scotland, Ireland, Poland, and Czecho-Slovakia, and below average in England and Wales.

age in England and Wales. In Belgium, Spain, Italy, Switzer-land, Canada, United States, British India, Algeria, Egypt, Morocco and Tunis, the wheat crop of 1920 is esti-mated to produce 48.9 million metric tons as compared with 49.0 millions in 1919 and an average of 50.1 millions during the five years 1914 to

Trick of Painter's Trade.

Many farmers do a great deal of their own painting, interior and exterior. An amateur painter cannot avoid some paint on the hardware, such as locks, hinges, handles, pulls, etc. This gives the finished job a botched appearance and partly spoils the effect of the new coat of paint.

Here is a little trick of the painter's trade that will serve the amateur.

er's trade that will serve the amateur painter well. Before beginning to paint the woodwork apple a coat of vaseline to the hardware; let the paint dry thoroughly; then wipe the vaseline off the metal parts and the paint will come off with it. This insures a neat, clean job of which the painter may be proud.

Count your stock of poultry, old and young, and make your plans to have the surplus handled so as not to crowd the birds you are going to keep over the winter.

A thoroughly equipped "Medicine Chest" is a source of comfort in every home. A scald, a burn, a cut, a tcothache, earache or backache may "happen" anytime; everybody becomes constipated or has diarrhea, catches cold, "breaks out" or has some ill befalk him nearly every day.
