FIRE AT ST. MARY'S. Store of A. & E. S. Haines Damaged by Fire This Afternoon.

FARMINGTON, Jan 16.—The general store of Messrs A & E S Haines at St Mary's had a narrow escape from destruction by fire this afternoon. Shortly after 1 o'clock volumes of smoke were seen issuing from the basement of the store. An alarm was sounded upon the whistle at McFarlane's foundry, which quickly brought almost the whole village to the scene. A bucket brigade was hastily formed, and after strenuous efforts the fire was extinguished without reaching the upper flats. The stock in the cellar was considerably damaged by smoke and water. The damage is estimated at \$300, covered by insurance.

PRACE PROPOSALS. The City Issues His Disarmament Circular.

LONDON, Jan 16.—The St. Petersburg correspondent of the Times, who confirms Friday's statement by the Vienna correspondent of the Standard as to the issuance of a circular from St. Petersburg to the powers, embodying a programme to be considered at the proposed conference on the limitation of armaments, asserts that the suggested limits of armaments are given with great detail. He cites, for example, the prohibition of employment of new inventions of the use of explosive, submarine vessels, and the practice of ramming vessels. The programme also proposes, he says, a discussion of the avoidance of war by recourse to arbitration wherever possible.

Police Force for Havana. HAVANA, Jan 16.—General Mascau and Captain McCallagh examined today three hundred applicants for positions on the police force here. About 50 patrolmen have been accepted so far, and of this number some 30 men are Spaniards. Mascau is acting fairly towards the Spanish candidates.

Seaman Washed Overboard. LIVERPOOL, Jan 16.—The British steamer Rosemore, which arrived here on Jan 14th from Baltimore, reports the loss of her deckload, had rails and stowage fittings damaged and a seaman washed overboard and drowned while on the voyage. The Rosemore lost 30 cattle overboard.

Free of Ice. CALAIS, Me., Jan. 16.—The St. Croix river is free of ice to the head of navigation.

Doctors now agree that consumption is curable. Three things, if taken together, will cure nearly every case in the first stages; the majority of cases more advanced; and a few of those far advanced. The first is, fresh air; the second, proper food; the third, Scott's Emulsion of cod-liver oil with hypophosphites. To be cured, you must not lose in weight, and, if thin, you must gain. Nothing equals Scott's Emulsion to keep you in good flesh.

OTTAWA, Jan 16.—J. C. Gates, who is here from Downon City, says that Ogilvie has recommended a reduction in royalty to 2 1/2 or 3 per cent on the net output.

IN MOOSBLAND.

NEXT TO THE BEAR THE OTTER IS THE MOST VALUABLE FUR BEARING ANIMAL OF NEW BRUNSWICK.

(By Old Sport.) Among the many animals that the New Brunswick game laws are protecting is the otter. It is so valuable that but few are mounted, though Mr. Cassell, the taxidermist, occasionally gets one to dress. It is an animal that is but seldom seen, and yet which is quite plentiful in the forest reaches of the lakes and streams of the province. It is very shy and it requires so much skill to trap it that it is generally allowed to continue in the quiet enjoyment of its life comparatively secure. It is more than a match for the strongest dog, and has no natural enemies, so that it is generally easy to secure an abundance of food.

The otter is a group of animals belonging to the family Mustelidae of the order Carnivora, distinguished from all their allies by their aquatic habits. The true otter consists of the genus Lutra of zoologists of which the species common to the British Isles may be taken as the type. It has an elongated, low body, short limbs, short broad feet, with five toes on each, connected together by webs and all with short moderately strong compressed, curved, pointed claws. The head is broad and flat, the snout is very broad, whiskers thick and strong, eyes small and black, ears short and rounded. Tail a little more than half the length of the body and head together, very broad and strong at the base, and gradually tapering to the end, somewhat flattened horizontally. The fur is of very fine quality. Length about 2 1/2 feet, weight of full size males from 15 to 24 pounds.

Other mammals which live in all parts of the province, their chief place of resort being about the smaller streams where there is abundant food. Hence they are found on the Upper St. Croix, Magaguadavic, St. John tributaries, Miramichi, Tobique, Nepisiguit, Restigouche, and the lakes connected with these waters. The otter is a fish eater and devours a great number of them daily. It is generally admitted that the best is generally admitted ever submitted by a county auditor in Albert of which the following is a synopsis: Total assessment \$13,238 28

Apportionment on parishes:—Alma—Contingent... \$ 149 78
Hillsboro—School fund... 268 88

SCOTT ACT MATTERS. The auditor says: The Scott act inspector has not made any report to the secretary for 1898 and therefore I am unable to make any report on his accounts. Section 83, chapter 34 of 61 Victoria, 1898, clearly intimates that the inspector's accounts shall be submitted for audit, as the municipality is liable for debts contracted by him in his official capacity and is entitled to credit resulting from fines for breach of the Canada Temperance Act. It is clearly impossible for any auditor to correctly state the financial position of the municipality when this report is withheld. An error in the audit of the accounts of Coversdale parish for 1896 amounting to some \$200 was discovered and rectified by the auditor. A vote of thanks was tendered the auditor. Adjourned.

Will Reduce the Royalty. OTTAWA, Jan 16.—J. C. Gates, who is here from Downon City, says that Ogilvie has recommended a reduction in royalty to 2 1/2 or 3 per cent on the net output.

along. In fact, he takes the same plain wooden sled, especially when there has been a heavy fall of snow. There he sits on the snow, not using his hind feet, but propelling himself along with his fore feet. He will do this for miles. If chased he can use all his legs and can get out of a narrow way with considerable speed, showing the spring cat-like race so well known in the mink. Sometimes the otter goes out to explore the country. Perhaps the spot where he has decided to fish all winter does not provide enough food, or it may be that the winter is very severe and it is almost impossible to keep an otter open. Then the otter goes on the search for a better site for a home, and sometimes falls into the hands of the hunter. It is not invariably gone in a direct line to water. I have followed an otter trail through the woods, hoping to find his home from home and was struck with the perfect straightness with which he travelled from his home to the new. Of course, I could not say that he had not been over the route before; but his trail now lay over rocks and hollow, across swamps and rock-covered ridges in one undeviating line. No surveyor could bias a path with greater accuracy. How did the otter know where there was water? Why did he not go in some of the hundred directions he might have gone? These were questions that came up but could not be answered. Does nature or nature's God give him that marvellous instinct that tells him where he will find his native element? I believe so. I cannot explain it. I do not want to explain it; it is one of those influences that tell one bird to build her nest on the ground, another to build in a tree, things that speak to us in sermons; telling of a great Creator and Preserver.

Sometimes the hunter's dog falls in with the otter and the dog is foolhardy enough to attack he finds an antagonist worthy of all his strength and ferocity. The loose skin of the otter allows him to turn and twist no matter how the dog has a hold of him, and he is also a very powerful animal. The strongest dog can do little with him. His bite makes a wound like that which would be done by a pair of shears or scissors. The otter bites it out, muscle and sinew, and the poor dog is soon almost devoured—indeed it is very seldom that a dog can be found to fight an otter to the death. No instance is yet recorded in this province of a dog killing a full grown otter and living after the battle. It is true the animal is hunted in the old country and Europe with other hounds, but generally the man does the killing.

Murphy, as mayor of Woodstock for the ensuing year. His opponent was Robt. B. Jones and the vote, when the poll closed, was Murphy 389, Jones 256. There were 10 candidates for the six seats in the council, and the result was the election of Graham, Gallagher, Henderson, Watts, Carr and A. E. Jones. The vote stood as follows:—Graham 418, H. Gallagher 404, Henderson 345, Jas. Watts 321, Carr 289, A. E. Jones 256, J. B. Henderson 256, John Lindsay 256, Thos. Fleming 211.

PUBLIC ACCOUNTS.

LARGE SURPLUS FOR THE FISCAL YEAR—SUBSIDIES PAID.

OWAWA, Jan. 12.—The public accounts for the year ending June 30th last were issued today. They show a consolidated deficit of \$46,555.23, and expenditure of \$38,832,536, leaving a surplus of \$1,722,712. The amount charged to capital account was \$4,265,974. The principal items in this account are: Intercolonial Railway, \$282,736; Prince Edward Island Railway, \$17,941; B. Lawrence canal, \$2,335,000; Trans. Vaik. canal, \$281,000; Dominion lands, \$227,500; militia, \$173,740; and C. P. R., \$302.

Subsidies amounting to \$1,414,934 were paid to the following railways: Atlantic and Northwestern, \$188,000; Coast Railway of Nova Scotia, \$90,000; Gulf Shore, \$25,000; Arampic and Pary Sound, \$37,235; St. Lawrence and Adirondack, \$94,450; Croix a Nest Pass, \$455,750; Montreal and Ottawa, \$40,000; Ottawa and New York, \$1,335,000; Saint Stephen and Milltown, \$5,212; Montreal Colonization, \$35,840; Units of Counties, \$1,458; Grand Trunk, \$151,238. Total, \$1,414,934.

Amount to the credit of debtors 30th June was \$50,111,118, an increase of \$1,781,143. Of this \$1,446,833 was added interest, but cash withdrawals amounted to \$339,894 over receipts. Dominion notes outstanding were \$2,173,363, \$139,902 less than at the same time last year. There is a steady increase in the demand for \$1 and \$5 notes. On the 30th of October last the amount outstanding touched the highest mark yet attained. The advance in that month over that of October, 1898, was \$48,083, an increase of 16 per cent. Increased energy and activity in business is immediately reflected in the circulation of the small currency. The amount invested in the sinking funds was \$3,569,956, which was less than the \$4,000,000 provided for in 1897. The net debt of the dominion at the close of the fiscal year was \$283,956,398, an increase of \$2,155,696 expenditure on capital account and C. P. R. \$1,414,934. Railway subsidies and \$930,482 discount on and expense loan of 1897, making a total of \$6,502,113. From this is to be deducted the surplus of \$1,722,712, sinking fund and \$2,335,000, leaving a net deficit of \$4,084,311 which leaves \$3,447,802 as the sum added to the public debt. The average rate of interest paid on the debt was \$310 per cent as compared with \$320 per cent paid last year and the net rate of interest paid fell from \$2,783,968 and \$1,630 in returns or in all \$4,084,311 which leaves \$3,447,802 as the sum added to the public debt. The average rate of interest paid on the debt was \$310 per cent as compared with \$320 per cent paid last year and the net rate of interest paid fell from \$2,783,968 and \$1,630 in returns or in all \$4,084,311 which leaves \$3,447,802 as the sum added to the public debt.

The number of officials under the old superannuation set dropped from 3,860 in 1896 to 3,417 in 1897. The contingent liability of the treasury so far as the old superannuation set is concerned, is growing less each year. The attention of Dr. Borden was called today to a statement published in this morning's Citizen, and no doubt telegraphed to other Conservative newspapers outside the city in reference to the military stores and supplies sent to Yukon via St. Michaels. It was said that the stores and supplies were stranded far down; the Yukon, and that the country was going to pay dearly for the food of the militia this winter in Yukon. "It is a surprise," said Dr. Borden, "that if storing such a statement the writer would not have called at the department and ascertained the facts. If he had done so he would have been informed that three out of the four vessels containing all the military supplies were reported by Mr. Ogilvie as being on their way to the Yukon on the 23rd September, as reported by Mr. Ogilvie, the commissioner, and that the remaining vessel was reported by Mr. Ogilvie as likely to arrive in the course of a day or two."

The story of a Dervish victory on the Nile appears to have no foundation to support it. Probably it was started by some French residents of Cairo for the purpose of relieving their feelings of indignation at the Fashoda affair.

MILITIA ORDERS. HONORARY AIDES-DE-CAMP-FEATURES OF APPOINTMENT.

OTTAWA, Jan. 18.-A militia general order was issued today regarding honorary aides-de-camp to his excellency the governor general.

With a view of conferring a distinction upon selected officers of the Canadian militia the appointment of honorary aides-de-camp to his excellency will, as far as possible, resemble that of A D C to the queen.

The following regulations will hereafter come into force:- Only officers of the rank of colonel or lieutenant colonel will be eligible as honorary A D C's with the exception that in very exceptional cases officers of the retired list may be appointed.

Honorary A D C's will be appointed by his excellency for the period during which he holds office, after which their appointments will lapse.

The names of honorary A D C's will be printed in the militia list under the heading of honorary A D C's to his excellency, and the appointment will be entirely distinct from that of extra A D C or personal A D C to his excellency.

Honorary A D C's will wear a gold sash on the right shoulder. At all ceremonies of state they will receive their instructions from the military secretary, who will keep a roster for that purpose.

In view of the possibility of honorary A D C's being summoned from any considerable distance for a state ceremony their travelling expenses will be allowed.

His excellency has power to appoint extra A D C's, for which appointments there will be no qualification as to rank. Such A D C's are to be appointed with a view to attending his excellency on his visits to the different provinces, if required.

The officers will be appointed by his excellency for the period during which he holds office, after which their appointments will lapse.

They will wear red and gold sashes (as worn by the general staff), but on the right shoulder.

Several workmen were employed about the mill, and they at once used the chemical fire extinguishers and got the force pumps to work, and it seemed at one time as though the progress of the fire could be stayed.

The lower flat of the carding mill was occupied by James S. Neill, of this city, as a boot and shoe manufactory.

GRIPPE EPIDEMIC. Again Sweeping Over Canada With Unusual Virulence.

The most violent attack since 1890, leaving behind a host of after effects that make life miserable. Prompt and effective means should be taken to strengthen the system.

La grippe, now sweeping over this country in one of its periodic epidemics, is one of the most treacherous and difficult diseases with which medical science has to cope.

It is in its after effects that it is particularly disastrous, and these assume many forms, prominent among which may be mentioned heart weakness, bronchial and lung troubles, nervous prostration, alternate chills and fever, a feeling of constant lassitude and an indisposition to either mental or physical exertion.

Even after a mild attack of la grippe it is imperative that the system should be thoroughly toned up, the nerves strengthened and the blood purified.

Dr. Williams' Pink Pills is the only medicine that can be depended upon for promptness and thoroughness in this emergency. These pills are a true blood leader, bringing to the vital fluid the constituents that give it richness, vigor and strength, thus driving out disease and acting as a tonic and bracer to the whole system.

In bidding for business through the Weekly Papers we make it a point to advertise articles of which we have plenty in stock.

Our mail order business has grown to such proportions during the year '98 that we have adopted this system, and very often when goods are advertised for both city and out-of-town trade—if we notice the lots getting small we immediately stop the city sale, and hold for our mail order customers.

We are quickly putting our out side customers at their ease by dealing with them the same as if they came in person to the store.

Our offering this week is as follows:  
MEN'S GLOVES—Lined Kid and Buck that originally sold from \$1.25 to \$2.00. Are now \$1.00.

MEN'S SHIRTS—all sizes, colored, and a pair of cuffs separate—originally sold at \$1.25 and \$1.50. Now 99 cents.

**ASTHMA CAN BE CURED.** And Is Being Permanently Cured Daily by Clark's Kola Compound. Here Is What a Hamilton Lady Says—  
Mrs Gilbert, 105 Rebecca street, Hamilton, writes: "I suffered from a bad form of asthma over nine years, and notwithstanding all the doctors could do for me, got worse and worse so that my night's rest was almost impossible. For six weeks at a time I could not get up on down stairs, and was in a miserable condition. My daughter who works in a drug store, had heard of a good deal of Clark's Kola Compound, and got me to try it as a last resort. I paid \$1 for a bottle, but that is nothing, for it is worth more than that for every teaspoonful. Two doses gave me splendid relief, and after using but one bottle I was as well as ever, and feel like a new creature. Clark's Kola Compound has been a godsend to me, and I took upon it a marvelous remedy. You may use this testimonial as you see fit, and I shall be glad to give further particulars to any one inquiring. I gratefully endorse Clark's Kola Compound."
