Nothing Retween the Two Powers that Cannot be Amicably Settled-Interest-

ing Debate in the Reichstag.

BERLIN, Jan. 10.—The reichstag to-day resumed the budget debate. On a motion to grant an appropriation of \$45,000 for the construction of coasting steamers to be sent to Cameroons and a steam launch for the use of the government, Bismarck said that he regretted that the reichstag yesterday refused to grant a credit of \$37,500 for explorations in Central Africa. If the reichstag wanted no colonies it should say so plainly, and thereby save the country useless expense. If it wanted colonies it must provide the necessary funds. A governor for Cameroons was aurgently needed. The government, Bismarck said, received advices at the beginning of December that British subjects had created disorders in Cameroons. Germany thereupon requested England to instruct the English consul at Cameroons to copperate with the German consults may be a subjected when the last few years have lived in London. Granville promised to institute immediate inquiries as to the origin of the disorders. Later advices announced that the English consul was not possessed of sufficient authority to act in the matter,

A polish newspaper asserted that an individual named Roderosinski was trying to influence the inhabitants of Cameroons against German in favor of British protection, to effect which object Roderoniski was conveyed along the coast on board a British gunboat. On the other hand England has officially declared that she was not aiming to establish British protection over Cameroons. said he feared the government's colonial policy would lead to foreign complications. He wished to know whether the navy could be increased sufficiently to meet all contingencies, and moved the vote be re-

ferred to the budget committee.

Bismarck, in reply, criticised Windthorst's remarks. In addition he said: There is no ground for rpprehension. We with France were never so satisfactory. A good understanding exists between Ger-many and England. The fact of England's many and England. The fact of England's expressing surprise on observing the alteration of the map in Germany's lavor does not necessarily lead to dissension. Moreover, it will be possible to place our navy on an equal footing with the navies of all maritime powers, excepting England and France." Bismarck referred to the reports of intended annexation of Samoa by New Zealand, which, he said, was an additional proof that delay in action by the reichetag was damaging Germany. The reichetag, he continued, had many. The reichstag, he continued, had surely not been constituted for the purpose of rejecting every proposal. The appoint-ment of a second director in the ministry of foreign affairs was absolutely necessary He mentioned that the report of German occupation of New Guinea meets with the opposition of the natives, and pointed out the remarkable coincidence of the combin-ation of natives there against Germany with the proposed annexation of Samoa by New Zealand together with the Cameroons incidents.

Richter and Windthorst declared in

favor of immediate discussion. The latter strongly urged caution and hinted at a possible war with England. Bismarck again rose and requested Windthorst not to speak publicly of warlations with Germany were so friendly as England's. He then said: "There is nothing in the topic that can lead to dissension with England. I cannot see why England should ever threaten war with Germany. Our little differences with England can

discussed the naval estimates, Gen. Von Caprivi, minister of marine, announced that the extra sums asked for in connec tion with colonial policy amounted to about \$1,250,000. The despatch of a squadron to West Africa had been decided upon, he said, in order to give the natives in doubt visible proof of the power of Germany, and also to protect Garman consular agents from insult. It would be necessary to retain men-of-war, especially flat bottomed boats, in which the navy was somewhat deficient, at Cameroons for some time to come. It was also urgent that vessels be completed of the best modern type. It was not proposed, however, to adopt a system of large iron clads.

The Squadron Does Effective Service. BERLIN, Jan. 10.-Commander Knorr. of the German squadron off the coast of West Africa, telegraphed that the corvettes Olga and Bismarck arrived at Cameroons Dec. 18. He landed 330 men and four guns because the natives of Hickorytown and Fosstown had expelled King Bell and threatened the merchants that they were going to burn Belltown. The expedition entered Hickorytown with little resistance and then attacked Belltown to rescue the German agent, Herr Pan-tanius. The troops landed at this point under a heavy fire and immediately stormed the hill. One man was killed and sixty wounded. Sixty men held the plateau two hours against 400 men firing from the bush. When supports arrived they stormed and burned Fosstown. The natives in the meanwhile had murdered Herr Pantanius. Subsequent to these engagements the natives bombarded Hickorytown.

The general impression among Irishmen,

ecording to the late vice president of the

Irish national land league, is that the attempted murder of Capt. Phelan was deliberately planned and connived at by O'Donovan Rossa, Patrick Joyce and a few of their followers. Rossa has always advocated a policy of persecuting men who were inclined to desert the cause of the dynamiters to the utmost extremity. The United Irishman has been in straits recently. Subscribers have been falling off and complaining that the leaders had done nothing for the cause of Ireland in punishing traitors who were assisting Eugland by ing traitors who were assisting England by "blabbing" to newspaper reporters in this country. One of the oaths which the country. extremists are obliged to take is that they shall not divulge the plans or intentions of their leaders under any circumstance on pain of severe punishment. If the secret told is weighty enough

the secret told is weighty enough to interfere with any important measure against England, the person who voices the secret shall be removed. Rossa is believed to be absolutely dependent apon subscriptions to his publication, as are the dozen or two men who are constantly prowling about his office. Any effort to interfere with this source of income, or any attempt to attract it into another course, would merit, according to these ourse, would merit, according to these nen, condign punishment. Subscriptions are for the cause as exemplified by Rossa.
When Phelan, who is accredited with eing a free speaker and a generous Irishman, was interviewed by a friendly re-porter of the Kansas City Journal, he told more than his promise should have permit-ted him, from the dynamiter's standpoint. His description of the attempt to blow up the Queen was given with such a wealth of detail as to carry conviction. The story involved the safety of Irishmen in this country and England. Rossa, it is stated, received demands from his followers that

of both Rossa and Joyce from the office of the United Irishman yesterday while the butchery was going on is regarded as suggestive that those persons knew what was about to take place. It is the custom of the office that when neither Rossa hor Joyce is there the door is double padlacked and all entry into its mysteries is impossible. The circumstance that while both Rossa and Joyce were at their nomes, and that the office was crowded by talf a dozen men, whom none of the lead-irs acknowledge they knew, is considered t least as presumptive evidence that the testations of innocence go for naught Rossa seldom visits his office after 4 o'clock u the afternoon. His visit yesterday a lusk, and the manifest nervousness he dis played when questioned as to the stabbing were both umusual. Persons familiar with Rossa's habits say he is always ready to

Cholera, Typhoid and Malaria. This is the age of sanitation, or at all events it professes to be such. Never since the giving forth of the laws of Moses, which were to a large extent sanitary a well as religious in their character, has the question as to the best means of preventing disease so much occupied the public mind. Newspaper accounts of new discoveries by the pioneers of science, with regard to the erigin and prevention of cholera, typhoid, consumption and what not are read with the keenest interest by thousands, to whom the various theories connected with these discoveries is as Greek, being beyond the popular understanding. To questions of life or death a powerful human interest attaches, and it will continue to attach

while men love life and fear death. What we call "sanitation" may be roughly defined as the science and art of using means for the prevention of disease. That fell destroyer of the human raceconsumption-has during two or three generations back largely engaged the attention of medical men generally, while not a few have made it their specialty. Within quite recent date, hewever, the sanitary problems of the day have had to do with chol era and typhoid. To these we may add malaria-a very wide and inclusive termwhich, if we go back to its origin, may be held to include a great deal more than is commonly understood by it. Typhoid and malaria are nearly allied to each other : as the poet says of great wit and madness, only "thin partitions do their bounds divide;" and what one doctor calls typhoid another may call malaria, as we see in Toronto to-day. It may be that these two types of disease run into each other some. times, so as to be scarcely distinguishable.

Without presuming to offer an opinion on the merits of what is called the "physiomedical" system by its advocates, we may say that the letter signed "Common nse," and printed in another column, has a suggestion or two that seem to be in harmony with received scientific doctrine, as well as with the writer's nom de plume. Beyond all doubt the very thing which we call "sewer gas" is generated within the human system as well as in the sewer. And, if the foul matter from which it takes its rise be not expelled when it ought to be, the noxious gas will be absorbed into the circulation, with typhoid fever, or symmetring very like it as the result.

A few years 20 an eminent medical

In typhoid and all low forms of fever A few years ago an eminent medical authority gave rather a remarkable illustration when he said that in dealing with typhoid and such like diseases, the sewers should be looked upon as being potentially a continuation of the human alimentary canal. This places in a striking light the part that foul matter, in either, or both, may play in causing typhoid fever; and it may help us to understand how typhoid occurs, not only in the city, where sewers are, but also in the country, where there are none. We may say that people living in the country are in danger from typhoid originating, in one way only-from foul and putrifying matter too long retained within the system. This particular form of danger will be governed very much by the constitution and manner of living of the individual, and will operate in both city and country alike. But while, leaving foul water aside, the resident of the country is exposed to danger from this source only, the resident of the city is similarly exposed to it, and to danger from the sewer in addition. The former has to guard against an enemy within the latter has to guard against the same enemy within and another without besides. It may be held to be clear enough that, as our correspondent indicates, the very perfection of sewerage and plumbing would not suffice wholly to prevent ty phoid, if measures medicinal and dietetic

The question as to the suction of foul air from sewer and basement through the action of stoves burning in houses with doors and windows tightly closed, is primarily one of chemistry and mechanics, rather than of medicine and physiology. And our correspondent's objection to what er semething very like it, did prevail extensively during July and August; are not these the months most remarkable for malaria exists?

Typhoid Fever. Editor World : Various opinions having seen recently published as to the cause of auses of typhoid fever, I have thought that the public might be somewhat interested in a few words on the subject from a tandpoint entirely outside (by law) of Canada! There is a large and very respectable school of medicine known as physicnedicalists in the United States (shut out f Canada by medical acts of parliament) who believe and practice upon a very different theory from either of the schools ferent theory from either of the schools (allopathic or homeopathic) tolerated here. To discuss the cause of anything it is positively essential to know what the thing itself is. Now, according to high medical authority, the great question, of over 2000 years standing: "What is fever?" has never been answered!

One eminent writer on medical diagnosis declares that "the essential element of

And from this cause, doubtless physicians often nestate and "wait for developments!" While (according to a present the sure of th While (according to physio-medicalism exciting causes of the fever) are be every hour more and more putrid and more deadly !

Physio medicalism recognizes in defange ons of the system (especially where here is fever) two sauses at work, namely, a procuring cause and an exciting cause.
In the human organism there can be no action in the absence of life, or the vital orce; it therefore is the procuring cause of that increased or accumulated action called fever. The condition to which the term fever properly applies, is not the disease, but only increased action on the part of nature to throw off disease, and which action may be excited by anything and everything that interferes with the free

these obstructing or offending diseases are the accumulation of matter that should have been (and in health is constantly being) carried off through the "sewerage" of the body.

Typhoid fever is found on the mountain sides, in the most healthy localities in the country, in Toronto in the most cleanly and healthy portions of the city, and in all

and healthy portions of the city, and in all places mostly affecting those in the prime and vigor of life. So that whatever imperfect plumbing or bad "city water" may have to do in causing this form of disease,

The causes of typhoid, be what they may, are insidious in their work. No one is suddenly taken down with typhoid—as one writer, after giving the many possible, but very unreliable symptoms, says: "In later the daughters of Heloise, which is Hele wis, hidden wisdom. There is, indeed, another form of Louisa, or

hort, the patient droops."

Many of the positive and reliable symptoms are only to be found in the later stages of the disease, and, in a majority appear for the simple reason that the causes of trouble are removed and the patient often convalescent before the time rives for them to show themselves! But facts are harder to get over than

Here is one of many that might be given: Reginald is not derived from Regina, and has nothing to do with a queen. THE CENUINE PIANO, Ianufactured by Rainer & Co., Guelph, Ont

The undersigned respectfully announce that on the 9th day of April, 1834, Joseph F. Rainer dissolved partnership with Frank Sweetnam and John Hazelton, as plane manufacturers, and that said Joseph F. Rainer, with his son, will continue to manufacture the original cross-scale Pianos, of which the said Joseph F. Rainer is the sole inventor.

Since the above dissolution, Mr. Rainer, sr., has greatly improved the small Cross-scale Piano by adding one string more to each note throughout the middle, making three strings to each note instead of two, thus giving the Piano a third more power of tone throughout the middle. There will be fifty-three notes from the treble down that will have three strings instead of twenty-four notes from the treble down as formerly. The undersigned will give to wholesale and retail customers the benefit of this improvement by letting them have these Pianos for the same price as the one's formerly made with two strings.

These Pianos have now been before the public for 23 years, and have always ranked among the very best, and are celebrated for quality of tone, great power and durability of action, prompt elastic touch, fine finish and elegant style of case, combined with every known improvement. The most complete and unbroken list on record, embracing a period of 30 years, and made up of 28 first prizes, medals and diplomes, received at the principal exhibitions in Canada—Montreal, Kingston, Toronto, Hamilton and dondon. At the Centennial Exhibition in Philadelphia, in 1876, we secured a favor with which the cross-scale pianos have been received for so long a period, and the reputation they bear, has induced others to imitate them. We therefore caution intending purchasers and dealers wishing to obtain the original cross-scale piano to see that the name of "Rainer & Co." is on each instrument. We make the Upright and Square Grand Pianos.

For further particulars, Price List, &c., address Rainer & Co." is on each instrument. We make the Upright and Square Grand Pianos.

SAVED BY A WOMAN.

BY W. M'ILROY. SR. The sun was just setting at the close of a long, hot day in June when Ernest Black and myself drove our wagons up to the bank of the Red river, on the territory side. We were hauling freight for the United States government, and were on our way to Texas for a load.

We signaled the ferryman, living on the Texas side, and, as soon as he came over began to cross. The boat was too small to take over both wagons at once, so I crossed Erst and came back to assist Ernest.

He had two refractory mules, which had always to be held in a ferryboat, and it sometimes took both of us to do so.

Just as the ferryboat neared the station a large, powerful horse, evidently nearly exhausted, came into view around a bend in the road, a double burden on its back. A young man of noble appearance, but looking weary and harassed, rode in front; behind, a beautiful girl, nearly white, but with sufficient Indian blood showing through the clear skin to add a piquant charm to the features.

It was more than I could stand, and I sprang toward him to strike him. He attempted to draw a pistol, but I closed with him and attempted to take it away. In the struggle the pistol went off, and he was shot dead. I stood for a mement stunned with horror when Lily's voice roused me.

They rode up to the wagon, and the young man without dismounting spoke to

"Sir, I am a white man, and some days since I had a quarrel with another, in which, however, he was accidentally shot. I am pursued by his brothers, who are close behind, and who have sworn to kill me on sight. I ask your help to cross the

river, if possible, unseen."
"Why do they," began Ernest, but the stranger cut him short: "Time presses, sir; you must answer 'yes' or 'no!' If not I must do the best I can for myself. I dislike to shed blood, but if I am too closely pursued—" and the gleaming of the blue eyes finished the sentence.

Ernest took another look at the open, manly face, which, whatever might be written there, showed no trace of crime.

Then he spoke, and fast—for the trampling of horses' feet, rapidly approaching, could now be heard.

"I suppose you wish to take the lady with you? Get into the wagon, and under a wagon sheet, which you will find there loose. I will hide your horse in the bushes."

The young man dismounted, assisted off the girl who was riding behind him, and did as directed, cowering down in the bottom of the wagon.

After depositing the sheet so as to look as if it had only been carelessly thrown in, Ernest led the horse a short distance from the road, and after taking off saddle and bridle he turned him loose and returned to

his team.

I had witnessed the scene from the boat, which by this time had reached the bank, and the wagon drove in. After giving the

The one on the bank started to draw his revelver, but before he could do so I had him covered. One learns to be quick with the pistol on the frontier, as a man's life may depend on his "getting the drog" on some ruffiso.

The forery onau, terrified at the scene before him, had remained quick, but now at a sign from Ernest, nephad the boat from the bank.

Ernest, keeping the prostrate man evered with the pistol, spoke to the one on the bank:

"I shall take your companion with us as a batage for your good conduct. If you shoot after us, he suffers. It member."

After seeing his captive in the skiff, first discharging all his weapons, he spoke to the now cowed man:

"When you get to the other side, stand on the bank until the boak returns. If you attempt to go into the bushes or try any other treachery I will shoot you."

The ferryman put him across the river and returned, and Ernest came to the bank to where the wagons were. Meanwhile I had driven up the hill and relieved the cocupants of the wagon from their undomifortable covering. They were nearly smothered, but had made no movement until all was aske.

The young man jumped to the ground and with a simple shake of the hand and the earnest words, "I thank you both," assisted his companion out.

attained by the Dixon treatment for catarrh. Out of 2000 patients treated during the past six months, fully ninety per cent, have been cured of this stubborn malady. This is none the ess startling when it is remembered that not five per cent, of the patients presenting themselves to the regular practitioner are benefitted, while the patent medicines and other advertised cures never record a cure at all. Starting with the claim now generally believed by the most scientific men that the disease is due to the presence of living parasites in the tissues, Mr. Dixon at once adapted his cure to their extermination; this accomplished, the catarrh is practically cured, and the permanency is unquestioned, as cures effected by him four years ago are cures still. No one clae has ever attempted to cure catarrh in this manner, and no other treatment has ever cured catarrh. The application of the remedy is simple and can be done at home, and the present season of the year is the most favorable for a speedy and permanent cure, the majority of cases being cured at one treatment. Sufferers should correspond with Mosses. A. H. DIXON & SON, 305 King street west, Toronto, Canada, and enclose stamp for their treatise on catarrh.—Montreal Star. 26.

At this moment however a pair of horses, covered with dust and sweat, came around the turn in the road, and their riders drew rein at the river side, They were two powerful, evil-looking fellows, with belts stuck full of revolvers, and a rifle across the pommel of each saddle.

The elder looking one of the two addressed Ernest:

And he stepped on the ferryboat. The other remained on the bank, with his brother.

The one on the boat approached the wagon and was about to raise the sheet, when Ernest, with his eyes gleaning dangerously, spoke to him:

TORONTO, April 12th, 1880.

I hereby certify that I have examined samples of JOHN LABATT'S INDIA
PALE ALE, submitted to me for analysis by JAMES GOOD & Co., agents for
this city, and find it to be perfectly sound, containing no ascetic acids, impurities
or adulterations, and can strongly recommend it as perfectly pure and a very
superior malt liquor.

HENRY H. CROFT. BEAVER HALL HILL, Montreal, Dec. 20, 1880.

I hereby certify that I have analysed several samples of INDIA PALE ALE and XXX STOUT from the brewery of JOHN LABATT, London, Ont. I find them to be remarkably sound Ales, brewed from pure malt and hops. I have examined both the March and October brewings, and find them of uniform quality. They may be recommended to invalids or convalescents where malt beverages are required as a tonic. Signed JOHN BAKER EDWARDS, Phy., Professor of Chemistry and Public Analyst.

Editor World: This catch-penny game is nearly played out. Mr. Fowler has been at it a long time—so long, indeed, that he seems to almost believe it himself; and well he may, for it has paid him finely. A committee of European scientists a few years ago essayed to establish its claims as by the principles of induction; sology could not endure the test,

but phrenology co

but phreuology could not endure the cost, and so the matter was dropped.

A simple address on human nature constitutes a lecture on phrenology; to emphasize a particular trait of character, any man may be right and even O. S. Fowler man have the word. may be wrong. The connection between mind and matter, or how or wherein they are united; or in or by what section of the brain any moral or mental power lies or acts, has not yet been ascertained, and never can be till mind rises above itself and

never can be till mind rises above itsen and becomes its own interpreter.

It has been questioned whether phrenology does more good than evil. I once knew a man arrested for stealing who blamed his bad head for the orime and asked the judge to feel his large bump of thievishness. Some lecturer had told him his head was bad. Such is the true base of phrenology. It is a sure road to fatalof phrenology. It is a sure road to fatal-ism and a little taffy of pious talk on self-

culture cannot veil it.

Mr. Fowler has his second sight, as it is called, though he attributes his good vision to "squinting;" perhaps he is right, but I doubt it, because his frequent reference to himself is another outcome of the age of second sight. So, also, is the occasional piping tones of his voice. O. S. F. must have it pretty bad, when he dictates to universities, and declares his pet hobby to be the greatest discovery of the ages, eclipsing steam, the press and telegraph. Oh? wad some power the giftie gie us, etc. E. H. Benson.

Instead of sending a post card informing me of its arrival, so that I might call for it, they carefully post card informing me of the property of the loaded it on their express wagon and brought it to the house, and it just cost me as much to get it from their office in the city as for carrying it 150 miles on the railway. The actual express charge by the driver's book was twenty-five cents, and I had to pay him fifty. Doesn't this strike you as a piece of extortion? In one trip they could deliver several hundred parcels of the same weight and size as the one I refer to, but let us suppose that they only deliver forty, and the company would receive ten dollars for the trip. It doesn't seem unreasonable that the express company would receive ten dollars for the trip. seem unreasonable that the express com-panies should send a post card, notifying those to whom parcels are sent, so that they might choose their own method of having them delivered. A Merry Gathering at Englinton-Sullivan's Friends Going Back on Him-Hard Glove Fight at New Orleans.

"Each annual dinner has been more largely attended than the previous one," said a leading member of the Toronto gun club on Friday night, "and the present is the most successful of all." It was indeed grand gathering of good fellows and overs of true sport that assembled at the club rooms, King street east, Friday evenclub rooms, King street east, Friday evening at 8 o'clock, preliminary to boarding the large open drag, busses, hacks and buggies that had been engaged to convey them to the scene of festivities at John Oulcott's, Eglinton. It was greatly regetted that there was no sleighing, but still the ground was hard and the air bracing, so that the drive there and back was thoroughly enjoyed. About 100 were present all told, including S. W. A peculiar charm of the whole affair was the theorement of formality, one and all

thorough absence of formality, one and all endeavoring to make things as pleasant for everybody else as for themselves. Whyte Millar, the esteemed and popular secretary, was indefatigable in his efforts to make things go off well and succeeded most admirably. During the evening Mr. Downey stated that possibly the club would send a team to compete in the great pigeon shooting tournament at New Orpigeon shooting tournament at New Orleans, the announcement being hailed with enthusiasm, as it was felt that it would afford the club's representatives just the opportunity they needed to prove that they were able to hold their own not only compare the heat shoots in their own country inst the best shots in their own country against the best shots in their own country but also in competition with those of the great republic. Messrs. Brown, Punshon, H. Humphrey, Lalor, Chambers and Professor Bonner materially added to the enjoyment of the occasion by their singing, recting and plane playing.

eciting and piano playing. The King Bully. Boston, Jan. 10. - Many of John L. Sulivan's friends profess to be heartily disgusted with his conduct during the past two weeks, and say that if the contest with Greenfield, booked for Monday night, is to be a serious affair Greenfield will be the winner. Sullivan was pursued by the mounted police on the Brighton road recently for reckless driving, but he escaped. He reached a Charlestown saloon at 4 o'clock Tuesday morning after his flight and there made merry until the sun rose. He afterwards attacked a conductor and He afterwards attacked a conductor and

He afterwards attacked a conductor and driver of a Metropolitan horse car, and escaped prosecution by paying liberal damages to the persons abused. It is stated by some of his acquaintances that he is becoming rapidly involved in debt. Sullivan is now out of town, some say training and others say to accome arrest and others say to The officers of the society for the preven-tion of cruelty to animals say they will serve their warrants as soon as he returns, and possibly just prior to the time for his entering the ring with Greenfield. In the meantime every effort is being made to induce the aldermen to grant a license for the exhibition. It has not been granted.

Salaries of Baseball Players. The salaries of baseball players have reently become so high that in many cases the clubs are almost bankrupt before they go into the field, and if bad weather overtakes them they are at once plunged nto debt. It was owing to the high sala ries that so many clubs lost money last year. Since the close of the past season e managers of the different clubs have peen looking about for some means to scape paying out more to the players than they take in. The plan which has been generally agreed upon, and which will be submitted to the arbitration committee, is that the players be graded according to their work in the preceding season, and that a stated salary be made for each grade. President Lucas of the new league club at St. Louis is making very large offers to players.
