LAWRENCE :—Return to Order, Correspondence with the Department of Marine and Fisheries, in the course of last autumn, in the matter of the distress among the fishermen of the North Shore of the St. Lawrence, and the replies of the Department to such correspondence. [*Not printed.*]

TABLES
OF THE
TRADE AND NAVIGATION
OF THE
DOMINION OF CANADA,
FOR THE YEAR ENDING 30TH JUNE,
1875.

COMPILED FROM OFFICIAL RETURNS.

*Presented to both Houses of Parliament by Command of His Excellency,
ISAAC BURPEE, Minister of Customs.*

*To His Excellency the Right Honorable Sir FREDERIC TEMPLE, Earl of DUFFERIN,
K. P., K. C. B., P. C., Governor General of Canada, &c., &c., &c.*

MAY IT PLEASE YOUR EXCELLENCY :

The undersigned has the honor to present to Your Excellency the Tables of the TRADE AND NAVIGATION of the Dominion of Canada, for the Fiscal Year ending 30th June, 1875, as prepared from Official Returns, and laid before him by the Commissioner of Customs.

All of which is respectfully submitted.

ISAAC BURPEE,
Minister of Customs.

OTTAWA, 26th January, 1876.

CUSTOMS DEPARTMENT,
OTTAWA, 31st December, 1875.

To the Honorable ISAAC BURPEE,
Minister of Customs, &c., &c., &c.

SIR,—In laying before you the annexed Returns of Trade and Navigation for the Fiscal Year ended 30th June 1875, I have the honor to inform you that I have earnestly striven to embrace therein, not only reliable general information respecting the aggregate trade of the Dominion, but as full and complete a detail as the means at my disposal would admit. To this end the specification of goods imported, has been extended beyond that of any preceding year, and several new tables introduced the whole presenting a great variety of statistical information, which I trust will afford satisfaction to all parties interested in the Commerce of Canada.

The tables have been constructed with a view to such a degree of simplicity, as to render necessary the least possible verbal explanation, and as subsidiary to the whole, I beg to call your attention to the following tables, specially prepared to facilitate comparisons of various phases of the Dominion Trade with former years.

The comparison extends to four years, and is so constructed as to render it easy to trace the increase or decrease of the trade in any of the goods mentioned, between Canada and either or all of the countries of production or exportation.

COMPARATIVE STATEMENT, showing the Quantity and Value of the undermentioned Articles entered for Consumption in the Dominion of Canada, and the Countries whence Imported, during the Fiscal Years ending 30th June, 1872, 1873, 1874 and 1875 respectively.

 NOTES ON THE FOREGOING TABLE.

BUTTER.

The great increase in the quantity of this article imported, is due entirely to the necessities of the provinces of British Columbia and Manitoba. The other provinces have had a large surplus for exportation.

CIGARS.

The great decrease in the imports of cigars during the last year is to be attributed in some measure to the increased rate of duty, but the stock in warehouse was nearly all entered for consumption in anticipation of the change of tariff, and was scarcely exhausted at the year's close. This is in part made up by a consequent increase in the consumption of the Canadian manufacture. The decrease in the quantity imported in 1875 as compared with 1874, reaches, 261,487 lbs, and the increase in Canadian Manufacture is, 73,328 lbs. The largest decline is in German cigars, which being usually of a very common and cheap description, are more affected by a high rate of duty than the finer brands, and amounts to 228,701 lbs. The imports from the United States alone shews an increase in this article, the value of which is about three times that of the German manufacture.

LARD AND TALLOW.

The combination of these two articles in the classification is to be regretted, and in future they will be given separately. The large increase in the importation is due as far as can be ascertained, to the scarcity and high price of butter during the greater part of the year, and the consequent substitution of lard for culinary and other domestic purposes.

MEATS.

The immense increase in the importation of meats in 1874 and 1875 over former years is, probably, to be accounted for, chiefly, in the great activity in lumbering operations, which rendered a large importation of salted pork necessary, for use in the lumber woods during the winters of 1873-74 and 1874-75. The imports of British Columbia and Manitoba, however, will account for about one and a quarter million pounds of the increase.

COAL OIL.

The steady and large increase in the quantity of this article, imported from the United States during the last three years, is the result of a great depression in prices in that country.

TEA—GREEN AND BLACK.

In an examination of the statements of teas, the figures for 1873 must be regarded as abnormal and consequently not available for comparison with other years. In that year the duties to which they were previously subject were repealed, and a very large surplus stock in warehouse was entered for consumption, in addition to the whole importations for the year.

Comparing the trade in teas in 1872, with 1874 and 1875 it will be observed that there was a decrease in green tea from Great Britain, in 1874 of 328,192 lbs, and in 1875 of 911,051 lbs, and an increase in black tea of 157,469 lbs and 901,685 lbs.

From the United States, there was a decrease in 1874 of 1,009,570 lbs in green tea and of 141,854 lbs, in black. In 1875, there was an increase in green tea from the same country of 77,455 lbs, and in black of 250,170 lbs, over the imports of 1872.

From China and Japan direct the quantity entered for consumption, in 1874 exceeded that of 1872, in green tea 2,182,409 lbs and in black 44,168 lbs. In 1875 there was still an excess over 1872, in green of 718,682 lbs, and in black of 53,950 lbs.

The importations from other countries constitute an almost inappreciable addition, presenting no feature worthy of observation.

SUGAR.

The aggregate quantity of sugar consumed in the Dominion in 1875 is somewhat below that of the preceding year, but is still above the average of the four years included in the statement.

There is a marked and steady annual increase in the quantity of sugar above No. 9 Dutch Standard from Great Britain during the last four years. The consumption in 1875 exceeding that of 1872 by 11,444,123 lbs, or over 50 per cent.

The sugar trade with the United States has been largely promoted by their regulations respecting drawback on sugar refined in bond and exported. Under a readjustment of those regulations which came into effect on the 1st January 1873. Refiners were allowed a drawback of 3 cts. per lb. on refined crystalline sugar, 2 cts. per lb. on refined B and C., lower grades, and 1 ct. per lb. on sugars produced from molasses. On syrup, product of sugar, 5 cts per gal., and product of molasses, 4 cts per gallon. All subject to a reduction of 10 per cent. These rates were supposed to correspond in amount with the import duty paid by the Refiners upon the raw sugar, but it is generally thought that, practically, it gave them a margin of profit on their exports. Probably owing to the favorable operation of this drawback, the importations of sugar, above No. 9 Dutch Standard, from the United States shews an increase in 1873 of 17,663,107 lbs over the preceding year, and in 1874, a further increase occurred of 2,792,113 lbs over 1873. In 1875, however, there is a considerable reaction observable, the imports from the United States, of the same classes of sugar showing a decrease of 5,420,401 lbs under 1874.

On the 3rd March 1875, an Act of Congress increased the import duties on raw sugars, and by an Order of the Secretary of the Treasury of the United States, a more than corresponding increase was made to the Drawback, the following being the rates then established.

On refined crystalline sugar.....	per lb.	3 $\frac{3}{4}$ c.
“ B and C lower grade.....	“	2 $\frac{1}{2}$ c.
Syrup of sugar.....	per gall.	6 $\frac{1}{4}$ c.
“ from molasses.....	“	5 c.
Sugar “ “	per lb.	1 $\frac{1}{4}$ c.

These rates being subject to a reduction of one per cent only, instead of 10 per cent as before.

Whatever may have been the fact in reference to the operation of the former drawback, there can be no doubt that the latter favored the refiners to a very considerable degree, giving them a bonus upon their exports and a corresponding advantage, not only over the refiners of Great Britain and Canada, but also over importers of the higher classes of West India sugars.

The operation of this drawback appears, however, to have proved unsatisfactory to the United States Government, and with a view to its proper adjustment, a committee was appointed to investigate into and report upon the question, The report of this committee was handed to the Collector of Customs of New York on 12th November last, and as the result, the following amended scale of Drawbacks was determined upon, and announced by a letter of the Secretary of the Treasury to the Collectors of Customs at the principal ports of the United States on the 18th December 1875.

On loaf, cut loaf, crushed, granulated and powdered refined sugar, stove dried, or dried by other equally effective process.....	3 $\frac{3}{8}$ c per lb.
On refined white coffee sugar, undried and above No. 20 Dutch Standard in colour.....	3 c per lb.
On all grades of refined coffee sugar No. 20 Dutch Standard and below, in colour.....	2 $\frac{1}{2}$ c per lb.
On syrup.....	6 $\frac{1}{4}$ c per gall.

These rates being subject to a deduction of 1 % on sugar and 10 % on syrup.

From the Committee's report, it appears that they "reached the conclusion that the product of well regulated refineries in hard or stove dried sugars is 60 %, and in soft sugars of inferior quality 23.60 %, and in syrup 11 $\frac{1}{2}$ %, the waste being 4.90 %.

The committee illustrate the bearing of the drawback upon the inferior grades of refined sugar by the following example. These grades they assume, may be produced from raw sugars of No. 7 to No. 10 Dutch Standard, the import duty on which is 2 $\frac{1}{4}$ cents per lb., in the following proportions of 100 lbs :

70 lbs. refined white coffee sugar above No. 20 Dutch Standard	3 c p. lb	\$2.10
13½ lbs. inferior quality.....	2½ c p. lb	0.33½
11¼ lbs. of one gallon syrup.....		6¼
5 lbs. Waste.....		0
Drawback, corresponding with import duty.....		\$2.50

The superior or hard stove dried Sugars the Committee allege, as resulting from the testimony of Refiners, required for their production the use of raw sugars from No. 10 to 13 Dutch Standard, the Import Duty on which is \$2.81¼ per 100 lbs.

The following being the product and calculation for Drawback :—

60 lbs hard Sugar.....	at 3.60 per lb	\$2 16
23.60 lbs soft and inferior.....	at 2.50 “ “	0 59
11.50 lbs or one gallon Syrup.....		6¼
4.90 lbs Wastes.....		0 00

Drawback, corresponding with the Import Duty..... \$2 81¼

From these examples the idea prevailing in Canada and other Countries, that, under the Drawback system, the United States Government have paid a bounty to their Refiners would appear to be incorrect. It must be remembered, however, that the respective proportions of the different classes of refined Sugars produced from the raw material, were arrived at by the Committee upon the testimony of the Refiners.

The Committee attribute the prevalence of the opinion, that the Refiners were receiving an undue advantage, to the “jealousy of foreign producers of a like article,” and endeavour to prove its erroneousness by the following means :—After stating that the exports of Refined Sugar for 1874 was 373,083 lbs, and admitting that it has since been exported on a much larger scale, they assert that it arises from “a combination of circumstances independent of governmental arrangements,” such as “an over-importation of Raw Sugars ; an over-production of Refined Sugars, and a diminished demand for home consumption, consequent upon the general depressed condition of trade, and the exceedingly low or merely nominal rate of freight both on Imports and Exports.”

The aggregate decrease in Sugar above No. 9 Dutch Standard in 1875, as compared with 1874, is 2,834,461 lbs, but there is a compensating increase in Sugars of No. 9 and below, amounting to 2,429,663 lbs, so that connecting both classes together, the quantity entered for consumption is very nearly equal in those years. It is a noticeable fact also that the direct imports from the West Indies, British and Foreign, combining all grades, shows an increase in 1875 over the preceding year, of 5,280,982 lbs, and is nearly that quantity in excess of any former year.

The value for duty of Sugars of all classes, and from all countries, averages in 1872, \$5.28; 1873, \$5.51; 1874 \$4.81; and in 1875, \$4.67 per 100 lbs, showing a decrease in 1874 and 1875 of 9 per cent and 11 per cent, as compared with 1872, and of 12½ per cent and 15 per cent as compared with 1873.

AD VALOREM DUTIES.

Goods paying Advalorem Duties, as shewn in these Tables, and in a more extended form, in the regular statements in the body of this Report, present no very noticeable features. It is true that the tendency has been towards increased importations, but the increase is generally distributed between the several countries from whence such goods are usually imported. Among the exceptional cases to this rule may be mentioned "Cabinet-ware or Furniture," the principal part of which has been imported from the United States. The value of these articles imported from the United States in 1872, was \$122,070, with a decided increase each year, reaching in 1875, \$328,536.

In "Chinaware, Crockery, &c," the chief importations are from Great Britain, and what is credited to the United States is chiefly British ware purchased by Canadians from large importers in Boston and New York. I may mention in this connection, that efforts have been made by American importers to introduce these and other classes of British goods on the basis of the original invoices, but, under your direction, this practice has been effectually checked, as being contrary to law and detrimental to Canadian interests. The American, and not the British invoices, have been insisted upon as the value for duty.

Cottons are essentially a British manufacture, but owing to the exigencies of trade in the United States, it would appear that they have been able during the last two years to supply an unusual proportion of what is consumed, but even in the last year the importations from thence have only attained the value of \$1,350,308 against \$8,457,247 from Great Britain.

SPIRITS, &c.

The following statements exhibiting the quantity of Sprits, Malt Liquors and Wines entered for consumption in each Province and in the Dominion, from the 1st July, 1867, to 30th June, 1875, may prove not only interesting, but very convenient in the consideration of questions concerning the legal status of that particular department of commerce. The average revenue for the eight years, in Spirits of all kinds, amounts to \$1,164,214.81 per annum; on Malt Liquors to \$36,510.39, and on Wines to \$217,859.03. This result would, however, be slightly different if the imports of the Provinces of British Columbia, Manitoba and Prince Edward Island had been included for the whole term instead of for four, five and two years respectively.

The total average Revenue on these articles for the Dominion, amounts to \$1,418,584.23 per annum, and the average of Excise Revenue on domestic Spirits and Malt Liquors, as gathered from the reports of the Department of Inland Revenue was, on Spirits, \$2,669,229; on Malt Liquor, \$330,538; together, \$2,999,767 per annum.

STATEMENT showing the quantity of Spirits, Malt Liquors and Wines, Entered for Consumption in each Province of the Dominion, and the Duty collected thereon, from 1869 to 1875 inclusive.

I have had the following statements prepared for the purpose of exhibiting in a condensed form, the value of the Exports of the Dominion to the different countries named for the years 1874-75, with the increase and decrease. The items under each heading will be found in their appropriate place in the general returns.

Perhaps the most interesting point observable in an examination of these statements is that in each Department, except the products of the forest, there is a considerable increase in the exports to Newfoundland and British West Indies.

EXPORTS.—TOTAL PRODUCE OF THE MINE.

	1874.	1875.	1875.	
			Increase.	Decrease.
	\$		\$	\$

Net Decrease of the Mine.....				99,166

The decrease in exports of this class of produce to Great Britain is in Mineral Oils, which have doubtless been supplied by the United States, owing to the exceeding cheapness of the article there.

The increase to the United States is in Coal, chiefly from Nova Scotia.

In comparing the rate of Advalorem Duty actually paid upon the gross total Imports of the Dominion, including the value of Free as well as Dutiable goods, I find the actual percentage for the last fiscal year is in advance of the previous year only 1.23 per cent, and of the year 1873, with which the comparison can be more fairly made, 2.31 per cent. Certain changes in the tariff having taken place at the commencement of the last quarter of 1874, its operation for nearly three months tended to increase the average per centage of the year, but as the tariff of 1873 remained in uniform operation throughout, and the present tariff also remained unchanged, with an inconsiderable exception, through 1875, the relative value of each as a revenue-producing source can be more fairly compared. On this principle the total revenue from customs duties would have been 2.31 per cent less in 1875 had the tariff of 1873 remained unchanged.

The average rate of duty chargeable upon goods subject to Advalorem Duties, entered for consumption in 1875 was, within a minute fraction, 16 $\frac{2}{3}$ per cent. The rating value of such goods being, in round numbers, \$69,000,000, and yielding a revenue of \$11,500,000. It is a well-known fact, that from the 1st July, 1873, to the present date, the tendency of nearly all manufactured articles, constituting the usual imports of Canada, has been continuously downward in value, and if the average decline during the year be rated at 10 per cent, which will hardly be considered by any careful observer an extravagant estimate, the result will show that without such decline the value for duty would have been \$7,666,000 more, and a proportionate additional revenue would have been realized, amounting to \$1,277,600.

In support of this position I may refer to the decline in the value of Sugars, as shewn on another page of this report, which in 1875, as compared with 1873, was 15 per cent. I may also refer to the well-known derangements in the Iron and Hardware trades, causing extreme depression in prices, and indeed in all the various departments of commerce the same state of things is so clearly observable, especially in the markets of the neighbouring republic, that it appears unnecessary to invoke further testimony. I am convinced, however, from information received from various sources, that the average reduction in values of imported goods might safely be estimated at 15 instead of 10 per cent, which would, of course, proportionally increase the loss from this source to the revenue.

In conclusion, I may allude to the efforts made during the year under your direction, for the improvement of the Warehousing system in the Dominion, the necessity for which has been constantly developing, and the advantages of the new regulations are now daily becoming more apparent. A more thorough system of checks upon this part of the Customs business has been established in this Depart-

ment, and at the end of the current fiscal year a new statement will be added to those now published which will give the full quantities and values of goods Warehoused during the year, the same Ex-Warehoused and the balance remaining in Warehouse.

All which is respectfully submitted

J. JOHNSON,

Commissioner of Customs.

SHIPPING STATEMENTS

(BY PROVINCES)

OF THE

DOMINION OF CANADA.

Shewing the Number and Tonnage of British and Foreign Vessels Entered Inwards and Cleared Outwards, *Seaward*, at each Port,—distinguishing whether with Cargo or in Ballast, the Countries whence they came, or for which they Cleared, and the Flag under which they Sailed. Shewing, also, the Shipping engaged in the Inland Trade between the Dominion and the United States. Also, Tables of Ships Built and Registered, &c., during the Fiscal Year ending 30th June, 1875.

No 17.—STATEMENT (by Provinces) OF VESSELS, British and Foreign, entered Inwards, from Sea, distinguishing those with Cargoes and in Ballast, at the following Ports, in the Dominion of Canada, during the Fiscal Year ending on 30th June, 1875.

PROVINCE OF ONTARIO.

No Vessels Entered or Cleared Seaward in this Province during the Fiscal Year ending 30th June, 1875.
