grounds of desertion, bigamy and adultery. This notice is duly signed by the solicitors for the applicant. The Ot-tawa Journal gives the following par-ticulars of the case :---

some of the largest woollen factories in Scotland, and for the past two years at the Cornwall cotton mills. This loom will be in operation in a few days, and in the hands of the skilful operator will no doubt turn out a first-they would make 'a handsome and happy couple. They themselves heard bunches piled in this flat, testify to the

The huge pile of wool in sacks and bunches piled in this flat, testify to the popularity of the Gordons as practical, painstaking and reliable workmen; and as they have been to a large ex-pense in purchasing and fitting up an expensive plant for the carrying on of this new industry in our midst, it ship. It to happened, just after Will

	A Prophecy.	
In ho	have not measured depths or heights, your own heart, of human passion; 'all its terrors and delights, estless days, its sleep-scared nights.	
Y(ut	u have taught others, siren-fashion, you-you were so very fair, would not mar your face with care.	

You knew the secret known to few, The foe to youth is strong emotion, Your beauty was so much to you, You only read low's preface thro'; You never ventured on the ocean, But in the calm bay idly tossed, While ships sailed by you and were lost.

But hark you now ! this little world Is but one phase of our existence ; To other forms our soils, unfurled-To other spheres and planets hurled-Shall compass all the seas of dista And all the pleasure or the pain We once bestowed, we shall attain !

And yon—now mark me, lady fair !-You shall in your next incarnation Know all the anguish and despair, The mighty love, the grief, the care, That here had been your soul's salvation We must receive what we have given Before we reach the final heaven.

Your heart shall be torn into strings, And thrummed at some hand's idie pleasu You shall know all the pain joy brings— You shall feel passion's thrills and stings— And plunge in depths fear cannot measu God's last eternal rest above Is gained through an firing and—love. —Ella Wheeler Wilcox

Musical and Dramatic Notes.

John O. Freund, the well-known jour by a strong company, in the following repertoire: "Huguenot Captain," "Gar-touche," "Ruy Blas," "Joorisse ohe Jug-gler," "Grimaldi" and "Valjean." Mr.

Fround's success on the stage since he made his *debut* at the opening of Mo-Vieker's Theatre last July has been marked, and his endorsement by the press emphatic. Jefferson is one of the wealthiest actors

in America. He is not making so much money now as he used to do, for the simple reason that he does not give himself the trouble. He only works on the stage about sixteen weeks in the year, and this affords bim all that he needs for his yearly main-tenance without at all impairing his capi-tal. Mr. Jeffrston's fortune is variously estimated at from \$400,000 to \$600,000.

Minnie Palmer has still \$5,000 on cffor in the English papers for the best and most novel means of advertising. A masher recently suggested to the vivacious young actress that ebe should print her advertisements on toothpicks, for then, he declared her name was sure to be in everybody's her name was sure to be in everybody's mouth. This excellent idea is supposed to be the only one the masher ever had, if, indeed, he did not borrow it.

Patti has signed a contract with H. E. Abbey to open in New York November 15th a series of operatic concerts in costume. She will travel as Mme. Patti-Nicolici. Mr Abbey says concerning the engagement "I contract to furnish her a special saloo engagement car, fitted with every convenience. I shall take this car to Mexico and California, where she will also make tours. This, American tour will not only be her last, her farswell tour, but positively her very final American farewell."

Gilbert & Sullivar's new opera is to be called "The Khedive," and is will be pro-duced in New York about November 1st. Sig. Perugini, of the McCaull Company, makes an ideal lover in Audrade' opera now running at Walled's Theorem I. makes an ideal lover in Audraba's opera now running at Wallack's Thesare. He is necommonly handsome, dresses with dezz-ling richness, sings well and acts with the requisite fire and dath.—New York World. Sig. Perrgini is Johnny Chatterson.

Barah Bernhardt is to receive for her American tour \$110,000, in addition to American Cour \$110,000, in addition to which she is entitled to one-half the receipts over \$2,000 and her travelling expenses, which will amount to \$8,000. This last which will amount to \$5,000. This last sum is, perhaps, not excernive, considering her boxes, 123 in number, containing her immense wardrobe, which she will have to transport hither and thither. She brings with her a large retinue, including six maids, her son, M. M. Bernhardt, her sister and her son.

and her son. Johann Strauss, of Vienna, was recently

engaged as chief of orchestra to conduct a series of concerts at St. Petersburg. His conditions were 100,000 france, with botel and travelling. and travelling expenses for three persons. This last stipulation was exacted by the This last stipulation was exacted by the great musician on account of his inordinate passion for tarok, a game which requires four persons to play it. Stranss is so fond of his favorite tarok that he must play it while travelling in the cars as well as when enjoying himself in his rooms. Mr. Wilson Barrett is apparently going to rely very strongly on his scenery for success in this country next season. I understard that he has sent to Lonicity.

BIG BEAR'S CAPTIVES. Anniversary of the Escape of Mrs. Gow lock and Mirs. I lock and Mrs. Detaney. A large number of the friends of the family of Mr. Henry Johnson, of Tintern, Lincoln county, gathered together Thurs-day at his residence to celebrate the anoiversary of the eccaps of Mrs. Gowan-lock and Mrs. Delancy from the Indians by a bionic. It will be remembered that these

With a String.

With a String. The last new thing in hats, says the St. James Gazette, beats all that has gone before it, and is scarcely likely to be equalled by anything that can follow after it. Herr Luders, of Gcriitz, has patented a "photographic hat." The novel head-dress contains in its upper parts a small photo-graphic apparatus and a pumber of a

graphic apparatus and a number of pre graphic apparatus and a number of pre-pared plates. In the front of the hat there is a small circular opening, behind which the lenses are fixed. By means of a string on the out-side of the hat its wearer, whenever he finds himself epj ying a pleasant view or attended by an agreeable person, can instantaneously photograph the landscape, the lady or gentleman inconsciously within range of his instrument. range of his instrument. The hat will probably be in demand by

two sorts of persons—by lovers and detec-tives. The former, by merely pulling a string, can set the image of his beloved not only in his heart but in his hat.

SCRAPS.	-

WHERE IS LOVE GONE ? I whistled the song of the Miller of Dee: Nobody cares, nobody cares; The jolly old fellow and I agree-Where is lowe gone? ere is love gone

On the other side of the garden wall Nobody cares, nobody cares; Nobody cares, nobody cares; She sang the trifle they played at the ball— Where is love gone?

I looked in the gate and she smiled to see ; Nobody cares, nobody cares I have forgotten as well as she, Where is love gone?

Once we had blushed and sighed and kiss

Once we had blushed and blushed ares; Nobody cares, nobody cares; Now we go whither and when we list; Where is love gone ?

Frank is her smile as a smile may be ; Nobody cares, nobody cares; I went on whistling the Miller of Dee. Where is love gone?

CO-OPEBATIVE HOUSEKERPING. A STRANGE STORY. ccess of an Experiment on a Large The Superstition Connected with Photo Scale in France.

For 25 years there has been in (x steine a very successful experiment in co-operative husekeeping, on a large roade. The loca-tion is in Gause, in France, about 100 miles northeast of Paris, and every student of social tendencies who goes, abroad turns out of his way to inspect this associated bome, with its co-operative housekeeping. No one has brought back an unfavorable report.

The families in this home can cook in their own kitchens, if they choose, and as they all co-operate in purchasing the house-keeping stores, there is great saving in the materials used. Or they can buy cooked food, hot and freshly prepared for every meal, and take their meals in their own dining-rooms. Or they can be served at the public table. Hot and cold water is served to every family aven if is croome

Not once in the twenty-five years has there been a single law suit or police case among the members of this co-operative home. This association was founded by one man of wealth, large-hearted and large-brained, who planned the whole scheme, and who furnished the capital. The participation of labor in this organization has been eight times larger than that of capital. But so great have been the prefixe of this co-opera-tive association that the workers have come

to own nearly one-third of the social capi-tal, which is \$1,320,000. At no very distant day they must own the whole. Who can estimate the happiness of this associated

life, where every family enjoys complete family reirasy, and yet has a common industrial life, founded on jusice, that secures abundance and guards sgainst povarty ?

House-Cleaning Hints. In this season of general up-turning and

house-cleaning it may not be amiss to re-member that ammonia in water cleanses glass and raint much better than soap does;

 -Exiract from the matrimonial market report: "Pulled woole are quiet."
-Contrary to expectation, President Olevelaud wore white gloves at his wed-ding.
-Rev. Dr. Howe, of London, has been elected rector of St. Paul's Church, Hälifar, N. S.
-Kerosene oil is going up," says an ex-ohange. Undoubtedly; so is the stove, so is the hired girl.
-The unique first edition of Bunyan's "Pilgrim's Progress" cost the Britten museum \$300.
-Kerosene sientist declares that bread that it sometimes costs less to have a badly-

graph the result. The friend did so, and deepatohed him that it was all right. Well batified with his arrangements, he had the bishop, his wife and the forty-eight descendants, besides numerous friends, assembled in a group, and the photographer obtained three fine large negatives of the wonderful assembly. The work was well done, and the artist congratulated himself on the success of his venture. He brought the negatives to his studio in Macon. Now comes the strange coincidence

meal, and take their meals in their own dining-rooms. Or they can be eared at the public table. Hot and cold water is served to every family, even if its rooms are at the top of the house, as the reser-voirs are on the roof, into which the water from artesian wells is forced by a steam ongine. Sixty large wash-tube are set in the laundry, and the water is expelled from the clothes by centrifugal force, which de from the clothes by centrifugal force, which form the clothes by centrifugal force, which de from the clothes by centrifugal force, which form the clothes by centrifugal force, which form the clothes by centrifugal force, which fathors, and as they have movable wooden dations, and as they have movable wooden patrolled by night watchmen, while a perfect fire organization is maintained among the members. Careful provision is made for the care of the col when they cannot work, for the sick when they acc invalled of the share of the co-operat-ing labor and for the payment for medicines, nurses and medical attendanos. Not conce in the twendy five years has there been a single law suit or police case among the members of this co-operative home, the among the members of the co-operat-ing labor and for the payment for medicines, nurses and medical attendanos. Not conce in the twendy five years has there been a single law suit or police case among the members of this co-operative home, the among the members of the so-operative basen asingle law suit or police case among the members of this co-operative home, the addition and for the payment for medicines, nurses and medical attendanos. This association was founded by one man of wealth, large-hearted and large-brinned, the members of this co-operative home, the addity are clock. The man the medicines are then a farge-brined, the addition a different the medicines and farge-brined, the membere of the payment for the addi minutes, came the telegram announcing that Bishop Piercs was dead. The nega tives were broken just as the spirit of the grand old Christian hero took its flight. It

as a strange coincidence, to say the least.

Fever and Drink. When John Howard, the philanthropist, was dying of fever, he said to his friend Admiral Priesiman: "My mode of life has rendered it impossible that I should get rid of this fever. If I had lived as you do, eating heartily of animal food, and drinking wine, I might, perhaps, by alter-ing my diet, he able to enbdue it. But how can such a man as I am lower his diet, who has been accustomed for years to live upon vegetables and water, a little bread and a little tes? I have no method of lowering r y nourishment, and therefore I must die. is such jolly fellows as you, Priestman, who get over these fevers." An English magazine asks: "What do temperance people and vegetarians think of these words," and adds that they mean " that vegetarianism and total abstinence hept him too weak to resist illness." As a matter of fact this may have been so, but Howard's words prove just the contrary. They prove only that he was governed by the radical notions of his day; bolieved that a fever required depletion by meagre was dying of fever, he said to his friend Admiral Priestman, " My mode of life d has rendered it impossible that I should get rid of this fever. If I had lived as you do, eating heartily of animal food, and to faithing wine, I might, perhaps, by alter. I is gung diet, be able to subdue it. But how has been acoustomed for years to live upon vegetables and water, a little bread and i tiltle tes? I have no method of lowering to words," and hear for I must dia, while the source of a state the sun, and the distance of a state the sun had passed. Furthermore Professor Ferrel's ing my diet, be able to subdue it. But how has been acoustomed for years to live upon vegetables and water, a little bread and a little tes? I have no method of lowering to words," and hear for I must dia, who get over these favers." An English magazine asks: "What do temperanee words," and ado that babeinence kept the radical notions of his day ; believed that a fever required depletion by meagre-thats a fever required depletion by meagre-thats a fever requires. Fever patients need highly concentrated fool and stimu-too words in the upon er in the upon er

TOBNADOES, THEIR CAUSE AND EFFECT. Remarkable Case that is Puzzlin

TOBNADOES, THERE CAUSE AND EFFECT. When it is considered that in nine counties in Ohio alone the loss by the recent cyclone is computed at two million dollars, the necessity for an earnest effort to discover the cause and find a remedy, fall or partial, for these periodical calami-tics must be conceded. With this object in view the United States Signal Office has made a special study of the facts reported from the great tornadoes of April 14th, by which the cities of St. Cloud and Sauk Repide, Minn., were nearly destroyed. We learn from the report just published that the farthest westerly appearance of the storm was at Jamestown, Dakots. The total path of the storm was thirty five, mites long and in its course it killed sixty-mice geople and destroyed over \$200,000 worth of property. At the same time there was a storm at Benton, Mills county, which proceeded in the same general direction and passed through a dozen towns in the course of 110 miles. Another was reported from Monroe, Mo., about the to asy the most eastern tornadoes occurring four or five hours later than the western. The importance of endowing had be made by the Signal Service of fior these made by the Signal Service of its deductions made by the Signal Service of doces in the econversion from the reservent of the deductions the fact that they are inclined to build theories somewhat different from these which have generally been accepted with the fact that they are inclined to build theories they the signal Service different from these which have generally been accepted with theories that they are inclined to build theories the fact that they are inclined to build theories the theories there divertion the reported to the theories the fact that they are inclined to build theories the theories there divertion the set which have generally been accepted with theories the theories the fact that they are A Bermarkable Case that is Fuzzling the Medical Protestion. The death of little Georgie Cutter, the 3 year-old child of Dr. George R. Cutter, of Bedford avenue and Taylor street, Brooklyp, at the residence of his grand-tather, Mr. John D. Prince, in Flahbush, has given rise, says the New York World, to much speculation on the part of eminent physicians, and the real cause of death will no doubt be the theme of medical debate for years to come. The strange symptoms and suddenness of death make the case a remarkable one. Grandfather Cutter, who appears to have been the primary, though, of course, innocent, cause of the little one's taking off, is well known in New York philauthropic circles, and has had much to do with the betterment of the condition of Slate prison inmates. About six weeks ago Dr. Cutter's mother died el' diphtheris, and shortly afterward Lex husband, who had been ailing with throat and ear troubles, the supposed result of blood-poisoning, wisited his son, the creached his son's house, and had to be aided upstairs. Dr. Cutter, Dr. Latham and several other epecialists who had been called in saw that there was no hope for the old gentleman, and deter-mined that he was a viotim of blood-poisoning. He died the house his two little grandchildren, Essie, eged 4 years, and Georgie, aged I year and 11 months, ran the Medical Protession.

DEATH IN A KISS.

made by the Signal Service officials lies in the fact that they are inclined to build theories somewhat different from those which have generally been accepted with rygard to tornadocs. Prof. Ferrel, the prin-cipal authority on these violent outburns, says that where on account of greater heat, or a greater amount of aqueous vapor, the atmosphere at any places be-comes more rare than the surrounding portion, it ascenda and the surrounding heavier atmosphere blows in below to supply its place, while a counter current is produced at its conter current is produced at its down in the sourcounting densed atter rising to a cortain height and forms clouds and rain, the calorie given out in the condensation produces a still greater rarefaction and doubless adds very much to the disturb-ance of equilibrium, and to the motive power of storms. The United States Bignal Office takes objection to this theory on the ground that it demands a more complete mixing of warm and cool air than ever takes place in nature—that there is no such sudden uprush of air due to a possible heating of the sun. While the earth's sur-face may become very hot, yet this intense thes and error such as the general there the sur-face may become very hot, yet this intense thes atorms seem to develop along certain lines from southwest to north-cast and are not generally over εiy large region. Storms are not stationary, but have a well-defined course and move exacely as if propelled by some force es a part of the cause of the storm rather than by successive upsettings of cquilibrium from place to place. Another fact is that storms generally erise about half, past 8 o'clock in the afternon, just a little after ward when it becomes cooler. If there was to be aoy upheaval of equilibrium from jace to place. Another fact is that storms generally erise about half.past 8 o'clock in the afternon, just a little after poisoning. He died shortly afterward. When he entered the house his two little grandchildren, Essie, eged 4 years, and Georgie, aged 1 year and 11 months, ran to meet him, and he took the former in his arms and aissed her. It is not known whether or not he kissed Georgie, but it is thought that he did not. On the day following Essie was taken with the diph-theria, and from that time up to the pre-sent has lingered between life and death. Fearful of results should the disease be communicated to Georgic, the parents obtained the services of a trained nurse, and sent the little one to its mother's parents' home in Flatbush. This was on Sunday two weeks ago. The little fellow was as lively as a cricket from that time up to Tuesday of last week. A small sore began to work its way through the skin on the right side of the neck. At first it was soareely visible, Lue it grow rapidly and coaused the little follow mother and the since. and right side of the neck. At first it was scarcely visibly, it is it grew rapidly and caused the little follow much uneasiness. A sms!! pletter was placed over it in order to prevent his scratching it. It finally be-came so painful that he tore the plaster away and made a slight incision in it with his neils. As he grew visibly worse minute by minute Dr. Homer L. Barrett, who is a pear peighbor of Mr. Deiser minute by minute Dr. Homer L. Barrets, who is a near neighbor of Mr. Prince, was summoned and at once dia-gaced the case and amounced that the little one had diphtheria of the most malignant form. On Wednesday the child grew steadily worse. Dr. Ingraham, a prominent specialist, was called in concul-tation. Dr. Cutter was alled in concul-tation. Dr. Cutter was alled in concul-tation. Dr. Cutter was alled in concul-ted the three remained at the bedside of the little sufferer unwil Thursday morning, when Georgie died. The little one was hyp.

the little sufferer nubil Thursday morning, when Georgie died. The little one was bur-ied in Greenwood on Friday. The genoral impression prevails that little Essie was impregnated with the poison through kissing her grandpa, and that she alterwards, evan before she had shown symptoms of such impregnation, had communicated the disease to her little brother through kissing him, as the two were constant playfollows and were seldom out of each other's company. Dr. Bartieti could not be seen yesterday, but a reporter saw and had a conversation with Mr. John D. Prince, who said. " I think that the case is one of the most

THE STAGE DRIVER'S ROMANCE He Emulates the Gallant Cos

Weds the Millionaire's Daughter It is not a coachman this time, but a stage driver. His name is William Under-hill. Ho is 21 years old, and he some-tinces varies the monotony of life by digging clams ab low tide. The lady in the case is Miss Clara Mascor. She is 27 and her mother is the widow of a millionaire, with a house on Fifth avenue. The scene of the romance is Oyster Bay, L. I., and the good folk down there have not had such a too.'o for gossip since the Rugg murders. The couple met in William's stage. Then they saw each other in the Episcopal Ohuc's, where his manly baritone swelled the volume of the choir and made the heart-strings of the village belles vibrate. Afser that they held trysts anywhere and every-where. The gossips talked. Miss Mascon's mother rested in blissfal ignorance. Cn Wednesday Underhill took his parents for a drive. On the cutskities of Oyster Bay they picked up Miss Mascon. All four drove to the Episcopal rectory at Oold Spring Harbor. There the Rev. E. Foloom Baker made the two young hearts one. The control for key and the set of the set of the the two young hearts one. The ord for large and blessed them. The control It is not a coachman this time, but Harbor. There the Rev. E. Folsom Baker made the two young hearts one. The old folk kissed and blessed them. The party drove back to the humble Underhill home When young Mrs. Underhill's younger sister read the note in which the bride announced her marriage she fainted on the spot. So did young Mrs. Underhill's astonished mother. The reconciliation hes not taken place yet, but the young coucle and gostips are happy. and gostips are happy.

Why He Wept.

Why file Wept. Among the crowd present at the pano ramic battle of Gettysburg the other ever-ing was a boy about 15 years of age. He had been gazing around him for about fifteen minutes when he began to weep. The fact was noticed, and directly a gentle-man said :

man said: "Abl poor lad! This painting revives some spisode of grief in his life. My boy, why do you weep?" "Ca-ca-cause, sir!" was the broken

"Ca-ca-cause, sir !" was the broken reply as his tears fell faster. "Does the right of this battle move

you ?" "Y_yes!" "Y_yes!" "Did your father lay down his life on this field ?" " No."

"Loss a brother there?" "No."

But you lost a relation of some sort?" "Not-not that I know of." "Then it must be these bloody scapes

"Then it must be these bloody scenes which overcome you, poor child." "N-no, eir. I come in here on the money which dad gave me to buy molasses with, and it has just struck me that the whole Union Army can't stop him from givin' me a lawful whein' when I git bome. I reckon that feller over there on a stretcher is me-afasr dad gits through bringing up his reserves!"

bringing up his reserves !

News papers

New papers. No newspaper ever published pleased every body, and every sensible taker of a paper, in passing judgment upon it, desides the matter upon the whole appearance of the publication from week to week, not condemning it because he finds something printed therein that displeases him, or considering it infallible because it expresses, from week to week, his exact views. Otherwise the only suc-cessful newspaper would be the oro which was neutral upon all subjects, or co-which finterest, confining itself to mere items of news. These two classes of papers were never known to exist in an intelligent community, after being conducted acon Were never known to exist in an intelligent community, after being conducted, upon that principle for any length of time, for a community is judged by the outside world by the newspapers which it supports.

Victory at Last. Consumption, the greatest ourse of the age, the destroyer of thousands of our brightest and best, is conquered. It is no. longer incurable. Dr. Pierce's "Golden Medical Discovery" is a certain remedy for this terrible disease if taken in time. All scrofulous diseases—consumption is a scrofulous affection of the lungs—can be oured by it. Its effects in diseases of the throat and lungs are little less than mira-culous. All druggists have it.

Victory at Last

There is one public house for every 800 people in Japan.

ward when it becomes objer. If there was to be any uphasval of equilibrium owing to the suu's heat it would seem that

Fever and Drink.

understand that he has sent to Louisville suggestion that he will want 40 stage hands and twelve calcium lights for his engage-ment in that city. It is farther said that he proposes to bring ten tons of scenery and property to the United States. If the Louisville demand is a fair sample of what is to be done through the country, I hardly managers, as a general rule, are blink managers, as a general rute, are likely to enbhuse to any marked extent over Mr. Barrets's tour.—Dramatic Times. When Mrs. Langiry visits America next

when mere abays of the sector when mere abays with the sector with the sector

be judged from the fact that in the course of the three acts "Mrs. Langtry will wear five magnificent dresses—one plain riding-dress, two opera cloaks and two hats." Mary Anderson should learn to kiss, says the Deadwood Nugget, and kiss according to Hoyle. Kiss so that after the deal she would leave a royal flush on the oheek of the kisses. If Mary would pay a little more attention to kissing she could cultivate an attention to kissing she could cultivate an article that would cause the footlights to attention to assume the footlights to pale with envy and make the strge carpen-ter pound his ear on his tool chest with ad-miration. She is built right to kiss with stunning effect. Her lips are full and red; her neck is swan-like; she could approach a man from the rear, lean over his shoulder, her neck is swan-like; she could approach a man from the rear, lean over his shoulder, look down through his eyes into his boots, glue her lips to his, draw in her breath, compress her lips for an instant, then sud-denly part them—biff! bang! and with nesses would shut their eyes and yell for somebody to turn the hose on them. Miss Judic's company, having reached Paris from America, though a photocing Miss Judic's company, having reached Paris from America, spicily entertained the interviewers. Said a reporter : "Are you satisfied with your trip?" And the reply was : "We are very pleased to think that it is over. Barrels of gold would not induce us to recurn there. Never !" Mme. Patti, who is staying at her Welsh oxale, will be married to M. Nicolini on the 10th inst. It has now been decided that the civil ceremony shall take place at the oaste, and that the religious marriege shall be celebrated at a little church close by.

Drew the Line at Snores. The organ-blower in a London church the organ-blower in a London church recently fell asleep during the service, of which fact the audience scon became con-scious by his vigorous blowing of his own organ. Rev. Arthur Hall, the preacher, after bearing it for awhile, stopped and remarked: "I do not object to a quiet nay on a hot day, and am flattered at being able on a hot day, and am natured at being able to contribute to anybody's repose. But, while proud at being able to give the beloved sleep, I wish it to be distinctly understood that I draw the line at snores. There is a man shoring in the congrega-tion, and I shall be obliged if somebody will waken him." The fiender was quickly roused. - Chicago Tribune.

A writer in the Philadelphia News says that Keely, of motor fame, was in early life a cannon ball tosser in a circus. "You that Acety, of mover taking, was in early life a cannon ball tosser in a circus. "You see," he says, "he is not only a juggler by nature, but by education." Inconstated the removal of half the larynx, The surgeon, who travelled from Berlin to perform the operation, received a fee of 1,000 guineas. "Is it wrong to toasi an exchange. easily rescued by stimulants. For the stimulants have lost their effect.-Detroit Free Press.

Middleton on the Gatling Guns, General Sir Fred Middleton, in his report to the Minister of Militia and Defence, puts a new phase upon the battle of Batcohe. In speaking of the use of Gatling guns, he says: "With regard to the Gatling one at meant the of the use of

of Batoohe. In speasing of the use of Gatling guns, he says: "With regard to the Gatling guns, at present two of them are with the two batteries in the Northwest, and on their return I recommended that they and the other two, which are in store, should be handled over to the four schools of infantry, as I think it is becoming a general opinion that machine guns should be handled and used by infantry. In the late rising the actual effect of the Gat-lings was morel, and that only lasted for a short time. The various unofficial ac-counts of the effects caused by the Gatling were very much exeggerated and distorted. At Batche what really happened was this: The artillery, on a rising piece of ground, were suddenly exposed to a tremendually hot fire from an enemy concealed in rifle pits in a coulee below, and I had ho retire them, and the Gatling concealed in rifle pits in a coulee below, and I had to retire them, and the Gatling was advanced and opened fire into the coulee. At first the rapid fire and novelty stopped the enemy's fire, but only for a few minutes, when it gain grew so hot that the Gatling was obliged to retire behind the crest, with the loss of a man wounded (who afterward died).

A Fall in Feathers.

A Fail in Feathers. The value of ostrich feathers has long been declining, until the price of prime whites has sunk from £50 to £10 per pound. Indeed, at a sale last month at Cape Town 1.620 pounds of mixed feathers only realized a total of £3,047, values having fallen 15 per cent. from previous sales. This serious depreciation may be attributed to various cauces, among which, probably, gintted markets, the dictates of fashion, general depression and previously ashion, general depression and previously raggerated prices are the chief. The viden dreams indulged in by the Cape armors a decade since have been rudely dispelled, and they are now returning to their first love, wool-farming, which during the ostrioh craze had been somewhat neglected.

There is Profit in Suicide,

There is nothing like good advertising. An undertaker has struck out an original, line in announcing his funerals in the following terms: "Why live and be miserable when you can be buried com-fortably for £3 10s.?"—From the French.

Au Armor Plate that Shot Cannot Plerce The latest viotory in the long drawn match between the gun and the armor plate has been scored in favor of armor. At Spczzia a German chilled steel armor plate, five feet nine inches in thickness, weighing 100 tons, was fixed against the face of theodiff and battered with chilled shot from the 100-ton gún. A thunderboil weighing almost exactly a ton was hurled against the face of the plate by the explosite of 71 ewt. of powder without producing more than a slight indentation and some tr fling cracks. Three shots failed to make any serious impression upon the plate, which has thus come off victor in the struggle. It would seem that feet of chilled steel.—Pall Ma'l Gazette. There is one streak of consolstion in marrying a girl with a squint. The prairies of the Western States, under all the circum. stances, appear to be a good Canadians to keep away from. good region for

According to recent investigations in Paris and London there is a close relation-ship between diphtheris and manute beaps. Epidemies of the disease have been especially noted in the vicinity of large stables, where manure is kopt in large quantities, and the principal sufferers have been those whose living rooms were situ-ated over the stables. Man cannot live on a purely vegetable dist without injury. To abstain entirely from meat is for the mass of people as great a mistake as it would be to abstain alto-gether from vegetables. In some forms of disease abstinence from a particular kind of food, whether vegetable or animal, may be necessary, but in health and to preserve health, a mixed diet is best. Vegetatians themselves confess the fallacy of their theory by using milk, eggs and butter— each of which is animal food. Abundance of sleep is necessary for ohildren. Up to 4 years of age the smalleet amount of sleep should to twelve hours out of the twenty-four; from 4 to 7 years, eleven hours; from 10 to 15 years, ten and a-half hours; from 10 to 15 years, ten hours; from 15 to 20, nine hours. A Glimpse of Russin.

A Glimpse of Russin. Mr. Ruskin is the very preux chevalier needed for English girlhood, grizzled though his beard may now be. Has he not said somewhere, "I would make my body a bridge for the passage of a girl that was pretty and good?" His attitude toward his young disciples at Whitelands may be typified in a story Mrs. Severn drew from her memory. "When I was once walking through a garden with Ruskin, when I observed him to stoop low down and glacoe eideways at the sky. Wondering at this movement of his I heard him say, 'Do put your head down here and you will see what he. A. And so I bent down also, and saw what he had dis-oovered—the wondrous lovelinees of a tree's buds against the sky." It is this seeking for sweetness and light that has given Mr. Ruskin the secrets of power over human human from 15 to 20, nine hours.

The Testimony

The Testimony Of hundreds of druggists bear hear witness to the efficacy of Poleon's NERVILINE as the most potent pain remedy in the world for all kinds of pain. Nerviline is composed of newly discovered ingredients, and is equally good for internal or external use. Purobase a ten cent sample bottle, and test is at once. T. R. Melville, Prescott, writes: "My customers who have used Nerviline speak bighly of it, and I am satisfied it will take a leading place in the satisfied it will take a leading place in the market before long." Try Poleon's Nervi-line for pains. Sold by druggists and outputy dealers everywhere.

Date of the forest curiosities of the Isth-mus of Darien and lower Central America is the tree killer (matapalo). This starts in life as a clinker upon the trucks of large forest trees, and owing to its marvel-louely rapid growth, soon reaches the lower branches. It then begins to throw out many shoots, which entwine themselves all around the trunk and branches, and also aerial tendrils, which, as you as they reach the ground, take root. In a few years this gigantic parasite will completely envelop the trunk of the tree which has upheld it, and kill it. The whole of the inner dead tree will then rot away, leaving the hollow matapalo etsnding alone and flourishing. This " tree killer " is a Ficus

His Enemy Stole Upon Him and Pour

It Into His East

A Baltimore despatch gays: Jacob Rosenthal attempted to murder Louis Goldstein, this morning, by pouring vitriol in his ear. The two men, who have been enemies for some time, had a fight recently, in which Rosenthal was worsted. He de-clared that he would have his revenge. trimming, it is durable enough to defy a dancing room crubh better than flowers, either real or artificial either real or artinoial. White coston embroidery in all-over designs is seen upon colored Sootoh ging-hams, and also brown, dark blue, and garnet leaves and flowers on pale cream grounds. American zephyrs and ginghams are much finer in texture and more hand-somely colored than, aver hefore and are Both men, who are Poles, boarded in the same house, their rooms being on the same floor. About 20 clock the inmates of the nely colored than ever before, and are seemely colored than ever before, and are shown in stripes, "Mikado" designs, and embroidered patterns in boxes. The gay tartan colors are also brought out for ladies' morning gowns and for obildren's dresses. On obambrays embroidery suggestive of South Kensington is seen, and appliques tfrants are also introduced. house were alarmed by Goldstein's shricks They found him rushing up and down the floor with the side of his face badly burned. floor with the side of his face badly burned. While he was asleep, he said, Rosenthal orept into his room and poured the vitriol into his car. Rosenthal denied the accusa-tion, but, as his fingers are burned at the order three is thought to he little doubt South Kensington is seen, and appliques effects are also introduced. For the cool days of summer short, fancy wraps of colored velvet will be worn of golden brown, marine blue, Russian green and black, the backs and fronts out bias, thus doing away with darts, while still allowing the manile to fit the form closely. Many of these are edged with beads matching the color of the wrap material. Some of the most expensive of these dressy garments have large dolman sleeves made of velvet-striped etamine, broche net, or figured grenadine, wrough with beads, and edged with lace also beaded. One white dress for the summer may be made to do the duty of three or four. ends, there is thought to be little doubt that he had been handling the deadly stoff. His victim is lying in a critical condition, suffering the most exeruciating pain. Resenthal has been arrested. "TRE FLYING DUTCHMAN." How the Phantom Appeared to Royal Eves-The Spell Worked.

FASHIONS FOR LADIES. Newest Designs in Millinery and Headgear.

DAINTY DRESSES AT A SMALL OUTLAY.

Embroidery lace will form a conspicuous part of house toilets, both in black and white. The work is done on crepe lisse or net, and outlined with small beads, in various shades, to match the lace which

various shades, to match the lace which also comes in colors. New lace flouncings forty inches deep come in perpendicular stripes running from the edge of the flounce upward, and two-thirds of the way across the width. They are in some cases very heavy, and others are very light and delicate. Much of the indignation sgainst killing birds for decorations seems to have passed by, as more of the innocents are seen on

by, as more of the innocents are seen on millinery than should be tolerated, and the whole matter depends upon the ladies, who should refuse to wear them.

should refuse to wear them. Blouse bodices for young girls are plaited in front and are belted at the wast. They open over an embroidered plastron or one of some contrasting material and have a revers collar of velvet. These bodices are

only entrate for velves. These bodices are only entrate for slight figures. There are natural objections made to black grape or lises ruffliogs at the neck on the score of unbecomingness and soil, while orepe lisse or five narrow folds of white ealk or lisse, intermingled with a little black, is more satisfactory in every way. A quaint little dress worn over a guimpe waist in white is made of pink chambray, embroidered in white. A V is orth roidered in white. A V 18 cut out of emproduced in white. A V is cut out of the top of each sleeve and in the front of the waist, and a piece of blue chambray set in and overlaced with narrow white braid. The whole contrasts prettily and produces a very stylich effect. Black stockings comlete the costume.

An exquisite fan neted is in light, highly At exquisite fan ne'ed is in light, highly polished sticks inlaid with gold. The fan is of white gauzs, hand painted in bird and flower designs, over which is a rich lace cover, the painting through with charming effect. The top is ornamented with a very odd heading of small catrich feathers, over-lapping each other in the meter.

lapping each other in the most unique Among lace importations are elegant sash

Amorg lace importations are elegant sach materials. They show a twilled surface, and through the middle of the fabric are satin stripes about a floger wide and also upon each edge. The goods are of erquisite quality, about twenty-four inches wide, and come in 10 yard pieces. They can be used as cashes or drapery, may be fringed or hrotted, or cut in fishtail points. College commencement dresses will be very generally of lace this year. One model snows the princess slip of white surah, the back cut off a little below the waist line, and full breadths of silk gathered in so as to hang gracefully over the tournure. At the foot of the skirt there are three bias ruffles about a finger wide, put on very scant and with a cord at the top. The body of the dress is perfectly plain, cut square neck and without sleeves. A pleating of lace is set in the neck and around the arm holes. The overdress of flat val net has a flource half a yard deep set around the bottom, above which are incks that reach nearly to the waist line.

fiat values has a flource half a yard deep. set around the bottom, above which are tucks that reach nearly to the waist line. The lace waist is cut without darts or back forms and gathered into a belt and finished cless at the threat with a standing ruche. forms and gathered into a belt and finished oless at the throat with a standing ruche. The elbow sleeves of lace are tueked around the arm and finished with a fait of lace and bows of white moire ribbon. A bow of the same is set at the side of the throat. A wide moire seeh is tied in a large bow at the back, fastened to a belt also of moire ribbon. Long white hid gloves will be worn, and white boots with white silk stockings. The hand bouquet will be of English violets and lilies of the valley. Bows of mibbons are still favored as trimmings for airy evening gowns. They are made with short end, very much fringed, and are arranged in rows running vertucally or disgonally across the ekirt, or set here and there like butterflies among the billows of tulle, lace or craps. The best sort of ribbon for the purpose is the glace assenct, with picot edge. It is as bright as eatin, and can easily be fringed out, besides being firm enough to form gracetul loops. Only the best quality should be chosen, and, though a simple trimming, it is durable enough to defy a danoing-room crush better than flowers, either real or artificial.

ment where the derivation for increase of wages or reduction of hours is contern-plated. Action upon proposed reduction of wages or other difficulty to be agreed upon in like manner; and that in the settlement of any difficulties between employers and employee, the organizations represented in the establishment shall be parties to the terms of settlement.

TO THE GENERAL PUBLIC.

The members of the General Assembly of the K. of L. desire to inform the public that all newspaper reports of seriour sensions am g the lutely unfounded. The General Assembly is practically a unit on all questions that have been brought before the body. The reports that the election of the members of the Auxiliary Executive Board is of any significance are also without foundation, as the members were elected without regard to any specific ends or purposes, but accord-ing to the desires and predictions of indi-vidual representatives. All charges of intrigues and machinations against General Master Workman Powderly or any member of the Executive Board can have originated only with men anxious for personal gain of notoriety. No voice has been raised either e session or privately against the pri-character or official action of Mr. in the ses Powderly or any member of the Executiv Board, and the only reason for the effortion of an Auxiliary Board was to relieve the members of the old Board of the immense amount. of labor that had accumulated in their hands owing to the extraordinary increase in the membership of the Order. As these auxiliary members have neither

nor vote in the Board proper, but are to be simply assistants, their selection can by no possibility be construed to indicate a lack of confidence on the part of this General Assembly in the Thermit General Assembly in the Executive Board. We take great pleasure in expressing our most unbounded confidence in the integ-rity, patriotism and houesty of purpose, not only of General Master Workman Powderly, but of every member of the Executive Board, and ask all papers that have been misled into publishing state-ments to the contrary, emanating from avil digrad and day, where the state of the evil disposed and designing men, not representatives to this General Assembly, evil-dispo and, in some cases, not members of the

Order, to publish this contradiction. After the passage of an address in reply to the National Grange Pations of Hus-Grange Pations of Hus ndry, and in which the latter are cor dially invited to join the Kuights of Labor, and the transaction of some routine business of no public importance, the General Assembly at 5 o'clock adjourned

In this fashion she wears it on the street, this issuids are wears 11 on the street, cometimes with black velvet collar, ouffs, belt and bows. At a recent dinner-party she removed the vest and filled in the front with Oriental lace, turned back the sleaves and edged them with lace; and for a ball dress she covered the front with a yard of deep Oriental lace and made a little pointed and decollete waist of white

Ribbons that have become faded and piled should be placed in a bas an of warm soapsuds, and after a half-hour or so taken out without wringing, wrapped tightly about a bottle and left until dry. They will be almost as good as new if of fine quality.

Basques of white cashmere are to be worn over dark skirts this summer and will be found very useful. Dresses should never be turned on the

Dresses should hever be taken to old-wrong side before hanging up, as the old-fashioned custom wrinkles the very bouffant drapery now worn. Skirts should be hang on two or three hooks, so that they will stand out well.

Beads put on bonnets and hats should be strung on wire and then sewed to the brim with silk or strong cotton. The high crowned straw hats with ar

row brims are trimmed very simply and prettily with a roll of velvet or gauge about the crown, and large bows of ribbon on the left side near the front. A pompon or fasher may be added.

Tiny black straw bonnets with loopings of yellow and black velvet are cheap 'and

flying in his mouth while he was in the middle of rendering a beautiful musivests of white pique may be made at home at a trifling expense. A yard of the material will make four. Narrow white cal selection. The hard-winged specimen tape is fastened at the top and bottom to hold the vest in place about the waist and
