400 Acres Choice Farm Land for Sale

In the Township of Romney, Co. of Kent, which is the Garden of Canada.

These lots are situated on either side of the main road leading southward from Tilbury Centre toward Lake Erie. A portion of the land is within two miles of the lake and a half mile north of a station on the new Detroit River and Lake Erie Railway. It is also about five miles south of Tilbury Centre on the Canada Southern and Canada Pacific railways. The Grand Trunk is still one mile farther north. On either of these roads a person may reach Detroit in less than one hour. The soil, which is deep and rich, thoroughly drained, is covered with ash, elm, hickory, basswood, etc. Terms to suit purchasers.

ESTABLI HED - 1885. No. 82 Church Street, Toronto.

The President, James Goldie, Esq., in moving the adoption of the report on the business of 1892, said: I have much pleasure in drawing your attention to the fact that this company has verified, in a marked degree, every expectation set forth in the original prospectus when organized

Up to the present time the insurers with this company have made a saving, when compared with the current exacted rates, of \$91,004.20. And in addition thereto bonus dividends have been declared to continuing members amounting

to \$21,522.72.
Besides achieving such result, we now also have,

Besides achieving such result, we now also have, over all liabilities—including a re-insurance reserve (based on the Government standard of 50 per cent. (50%), a cash surplus of 1.93 per cent. to the amount of risk in force.

Such results emphasize more strongly than any words I could add the very gratifying position this company has attained. I therefore, with this concise statement of facts, have much pleasure in moving the adoption of the report.

The report was adopted and the retiring Directors unanimously re-elected. The Board of Directors is now constituted as follows: James Goldie, Guelph, president; W. H. Howland, Toronto, vice-president; H. N. Baird, Toronto; Wm. Bell, Guelph; Hugh McCulloch, Galt; S. Neelon, St. Catharines; George Pattinson, Preston; W. H. Story, Acton; J. L. Spink, Toronto; A. Watts, Brantford; W. Wilson, Toronto.

DECISIONS IN COMMERCIAL LAW.

TENNANT v. GALLOW.—An insolvent debtor, for the purpose of defeating the plaintiff's claim against him, by voluntary deed conveyed the equity of redemption in certain lands to another creditor, who, as previously arranged with the grantor, sold the property to an in. nocent purchaser, and applied the proceeds to payment of all encumbrances on the property, and all his own debts and those of certain other creditors of the grantor, and of a commission to himself in respect to the sale, and paid over the final balance to the grantor. Held by Meredith, J., that the plaintiffs had no right of action against the fraudulent grantee to recover any part of the purchase

BENJAMIN V. FAIRGRIEVE.—At the time of the formation of the firm of F. & C., F. was indebted to the plaintiffs in his personal account, and, to induce G. to join in giving them the firm notes therefor, F., at the plaintiff's suggestion, assigned to C. a half interest in a patent right held by him. Held by the Court of Common Pleas that, under s. s. 4 of s. 30 of the Bills of Exchange Act, the words, "Given a patent right," should have been written across the notes; and, in the absence thereof, the plaintiffs could not recover thereon.

GRAHAM V. CANADA LIFE ASSURANCE COMPANY. -A husband, on the 24th of December, 1878, and 16th May, 1880, effected two policies of insurance on his life for the benefit of his wife, and died in 1892. On the 26th of October, 1886, the wife assigned the policies to P. as collateral security for the payment of a note for \$500 made on the same day by the husband in favor of P., and endorsed by the wife, but on the express agreement that certain of the husband's property should be returned to him. Held by the Court of Common Pleas that P. was entitled to recover the amount due him by virtue of the assignment.

Brown v. Defoe .- A building erected for a billiard table manufactory, and used as such for nine years, was converted into a warehouse and used as such for about nine months. whent it collapsed through the breaking of a beam supporting the ground floor, occasioned by there being dry rot in one of the beams, and a quantity of goods stored therein was damaged. No negligence was shown in the construction of the building or the selection of the materials used therein, or in not discovering the existence of the dry rot; and except therefor the building would have been capable of sustaining the weight put upon it. In an action for the damages sustained to the goods warehoused in the building, held by the Court of Common Pleas that the defendant was not liable.

GRANT V. ARMOUR.-Where there is a positive contract to do a thing not in itself unlawful, the contractor must perform it or pay damages for non-performance, although in consequence of unseen causes the performance of the contract has become unexpectedly burdensome or even impossible. Where, therefore, the defendant had hired the plaintiff's scow and pile driver, etc., at a named price per day, and agreeed to be responsible for damages thereto, excepting the engine and ordinary wear and tear, until returned to the plaintiff, and while in the defendant's custody, by reason of a wind storm of unusual force, almost amounting to a hurricane, they were driven from their moorings and damaged, the Court of Common Pleas held that the defend-

ant was liable for the damages thus sustained, notwithstanding they were occasioned by an unforeseen accident, the plaintiff being liable also for the rent while the scow, etc., were being repaired.

O'CONNOR V. HAMILTON BRIDGE COMPANY .-A drilling machine, manufactured by a wellknown manufacturing company, and the same as those used for many years, was put by the company for the defendant in his factory. The plaintiff, acting under the order of the defendant's foreman, was oiling the shaft on which the drill worked, when his clothes caught on a projecting screw, and he was injured. The machine was not in motion when the plaintiff received his orders, but at the time of the accident was working with great rapidity, having been put in motion without the foreman's knowledge by a fellow workman. The machine had only been in use a few days, and the defendant was not aware of its being in any way dangerous. In an action for the damages received by the plaintiff, the jury found that the accident was caused by the defendant's negligence, and without any negligence on the part of the plaintiff. On appeal to the Divisional Court, the court was equally divided. On the right of the defendant to have the verdict set aside, Galt, C.J. held that there was no evidence of negligence to submit to the jury, either at common law or under the Workman's Compensation for Injuries Act, nor any liability under the Factories Act, but Rose, J., thought there was evidence of negligence both at common law and under the Workman's Compensation for Injuries Act; the want of a guard, as required by the Factory Act, constituted such negligence at common law, and the absence of such guard being also a defect in the condition or arrangement of the machinery within the Workman's Compensation for Injuries Act.

SIMMONS v. SIMMONS .- An endowment certificate for \$1,000 was issued in 1889 by the Canadian Order of Foresters to a member, and payable on his death, half to each his father and mother, containing a provision that, should there be any change in the name of the payee, the secretary should be notified, and an endorsement thereof made on the certificate. The member subsequently married, when he informed his wife that he would have the certificate changed, as he intended it for her, giving her the certificate, which she deposited in a trunk used by both in common. Held by Chancellor Boyd that this was not sufficient to displace the terms of the contract as manifested on the face of the certificate; and further, so far as the mother was concerned, she was amply protected, the provisions of the Act respecting Contracts of Life Insurance, which applied to the certificate in question, creating a trust in her favor.

FOWELL v. CHOWN.—Section 46 of the Patent Act of Canada, protecting and governing purchasers of the invention before another obtains a patent, does not authorize one who has, with the full consent of the patentee, manufactured and sold a patented article for less than a year before the issue of the patent, to continue the manufacture after the issue of the patent, but only to use and sell the articles manufactured prior to the issue of the patent, according to the Court of Queen's Bench.

The Quebec Permanent Building Society advertises a semi-annual dividend of 3 per cent. and a bonus of 1 per cent. on its permanent capital stock, payable on and after the 1st of May instant.

Mercantile Summary.

THE old firm of T. & J. N. Andrews, at Thornbury, have, says the Collingwood Bulletin, disposed of their store and stock to Mr. Cross, who has been a trusted employee for many years.

THE mayor and chairman of the finance committee of the city of Brantford were in town this week delivering to Messrs. H. O'Hara & Co. \$266,200 worth of debentures issued for consolidation of debt and sewerage, maturing in 1934, and bearing four per cent. per annum payable half-yearly. The bonds, which are A. 1, have been very favorably considered by investors, and the firm named have already sold \$143,000 of them.

In his autobiography, P. T. Barnum tells the following story, illustrating his opinion of the methods for arriving at business success: "A man said to me, 'I have tried advertising and did not succeed, yet I have a good article.' I said to him: 'My friend, there may be exceptions to the general rule, but how do you advertise?' 'I put a card in a weekly newspaper three times only, and paid a dollar and a half for it.' I replied, 'Sir, advertising is like learning, a little is a dangerous thing."

mercantile Summary.

THE long talked of dividend on World's Columbian Exposition stock is to be paid June 9th, and will be 10 per cent. The books close May 15th, and reopen June 11th. The dividend will be \$1,050,426, and the city of Chicago will receive \$500,000 of this amount. The corporation will have \$435,936 left in the treasury.

In Cornwall there has been an exchange of stores between Mr. W. H. Dunkin and Mr. A. Branchaud. Mr. Dunkin has moved into the store formerly occupied by M. E. Park & Co., while Mr. Branchaud has moved into Mr. Dunkin's old stand. It is said that Mr. Dunkin will have one of the best appointed grocery stores within many miles.

Owing to the holiday next week a slight alteration in our printing arrangements will be necessary. We should like our advertisers to know that copy for changes of advertisements on the first two and last two pages of THE MONETARY TIMES will have to be in our hands by Tuesday. For all the other pages we shall require the copy by Wednesday, 23rd.

THE annual meeting of the Galt and Preston Railway Company was held at Galt, last week, when the following gentlemen were elected directors :- T. Todd, president; R. G. Cox, vice-president; D. Spiers, W. Lutz, H. McCullough, sen., F. Clare and John D. Moore. The road is nearly built and will be equipped on the Westinghouse system, by Ahearn & Soper, of Ottawa. Patterson & Corbin, of St. Catharines, have a contract for three of the

MACABE, ROBERTSON & CO.

8 Wellington West, Toronto.

D. ALMAS & Son, at Hagersville, are beginning the erection of a new block opposite their store.

A Montreal syndicate have a \$60,000 job at Campbellton, N.B., constructing the new waterworks for that town.

S. P. THOM, of Quebec, who has conducted the cigar stand in the new C.P.R. hotel, the Chateau Frontenac, has assigned.

THE annual meeting of shareholders in the St. Stephen's Bank, will be held in St. Stephen, New Brunswick, on Monday, 25th June.

An assignment has been made by P. E. Gallant, general dealer, Acadieville. N.B. He had been a telegraph operator, and began business just about a year ago on limited capital

THE Evening Record of Windsor, Ont., which has just passed its fourth year, is manifestly prospering, as its enterprise deserves. Beginning with six columns, it enlarged to seven, and now has eight columns per page.

THE secretary of the Montreal Stock Exchange, Captain John Law, has had a long illness. His numerous friends will be glad to hear that he has sufficiently recovered to be able to leave the house.

THE failure of Wm. Samuel, furrier, Montreal, will prove a disastrous one for general creditors, whose claims total \$58,598, [while there is only \$8,120 of apparent assets, out of which \$1,238 of privileged claims have to be provided for.

A CAREFUL farmer near Cornwall, says the Standard, who is also a successful one, estimates that the loss to the farmers of the united counties by the use of narrow wagon tires, through wear and tear of horse flesh, loss of time, etc., amounts to \$10,000 per year.

WE learn that Mr. Geo. A. Stimson, debenture broker of this city, has purchased a \$7,500 block of debentures of the township of Sarawak. These have twenty years to run, bear 41 per cent. interest, and were given by way of bonus to the Georgian Bay and G.T.R. The same broker, we understand, has just completed the purchase of \$10,000 town of Woodstock 20-year debentures; \$25,000 Province of Prince Edward Island bonds, and a similar amount of Province of New Brunswick. These last two blocks of bonds bore only 4 per cent. interest.

Leading Wholesale Trade of Toronto.

A Montreal carriage maker named Pierre Gauthier has assigned, owing \$6,800 .the same city J. B. Deslongchamps, grocer, has also made an assignment. The liabilities are altogether local, and amount to about \$1,700.

MR. T. S. WEEKS, who about 1890 carried on a dry goods shop in St. John, N.B., and who sold out to go to Boston, has returned to St. John, and is about to re-engage in business. He has rented a shop on Mill street, and will keep millinery, dry goods and men's furnishings.

THE Waterous Engine Works, of South Park, St. Paul, were destroyed by fire last Friday night. The loss is estimated at \$40,-000. The business of the firm was that of manufacturing fire engines and other fire fighting apparatus. The St. Paul fire does not affect the Canadian business of the company.

A MONTREAL firm of warehousemen, etc., E. Beauvais & Co., who have been served with a demand of assignment by La Banque Nationale, have abandoned their estate. Liabilities figure up to \$68,137, of which the greater bulk is due to the bank above named .-—The liabilities of Cunningham & Robertson, wholesale picture mouldings, etc., Montreal, are \$17,350. The estate will likely be wound up.

R. S. CLINE, who deals in dry goods at Cornwall, Ont., has found it necessary to call his creditors together and lay! his affairs before them. He owes \$10,300, and shows assets of \$8,600. His proposition is to pay 65 cents on the dollar, 50 cents being secured, spread over a year, and 15 cents his own notes at longer date. This arrangement will likely carry.

AFTER narrating his experience, as a merchant, to the Stratford Beacon, Mr. C. McIlhargey, of that town, declared his resolve to adhere to the cash system. "I have been twelve years in the business," said Mr. M. and last month overhauled my stock, reducing the price of everything to a cash basis. Since 1st of May, nothing has been sold except for cash. I am satisfied it will prove profitable to my customers and relieve me of a great deal of unnecessary labor in arranging the business. I now have the cash to buy goods at the closest prices and take the cash discount, which enables me to sell the best goods at the smallest possible margin over cost. I have found no falling off in my trade, and customers are better satisfied."

Leading Wholesale Trade of Toronto

Wyld, Grasett & Darling

wyld, grasett & darling|

An item in our summary in the issue of 4th instant understated the nature and extent of the offer made by the city of Moncton to the Gaslight and Water Company of that city. The offer made, of \$30,000, was for the lighting plant only'; this amount, together with a previous offer of \$150,000, for the waterworks system, makes the total amount offered the company \$180,000 for the entire works.

G. S. WETMORE & Co., produce commission men at St. John, N.B., are reported as having assigned. The liabilities are about \$5,000, of which \$1,849 are preferred, and assets are put down at only \$1,300. The failure of Mr. Smith, general dealer at Nictaux, N.S., is noticed elsewhere in to-day's paper.— -Another failure in the same province is that of T. A. Tufts, a flour and produce merchant at Kingston, and formerly engaged in the milling and brick-making business.

Mr. C. Biggings, who signs himself "C. C Algoma Lodge Knights of Pythias," writes from Sault Ste. Marie, May 9th, to say, with reference to the article in ours of 4th instant entitled, "An Old-Time Settlement": "Permit me to say that the debt spoken of was a loan of \$100 of the funds of Algoma Lodge K. of P., made to Mr. Turner on the 25th March, 1891, and the only payment made thereon is that of a cheque from the assignee of the estate for \$12.12, which does not pay a low rate of interest on the loan. Trusting that this explanation will be satisfactory to your readers, the creditors in Wm. Turner's estate, and others who may be interested in establishing a just claim thereon."

FAILURES among Canadian traders are not numerous this week. We hear of the failure of Mr. Coffey, of Thornbury. About two years ago Coffey & Watson went into business in that place. They bought out Begg & Co.'s stock, amounting to \$4,000, upon which they paid \$2,300 cash. Of this, however, but \$1,000 was their own, the balance being borrowed. In March, 1893, they dissolved partnership, Mr. Watson retiring. Since then Mr. Coffey has not met with good success, and now he has assigned to J. W. Lawrence of this city.-Henry Bull, dealer in musical instruments at Belleville, has been closed out by his principal creditors, the Bell Organ and Piano Company.

J. N. Laird, a general store dealer at Foxboro, mentioned in our last as assigned, has succeeded in getting creditors to accept a compromise at 40 cents on the dollar, cash.

THE Nanaimo Gas Co. has declared a six per cent. stock dividend for the year. The officers elected at the annual meeting were : President, Dr. Milne; vice-president, J. Mahrer; secretary-treasurer, W. K. Leighton.

AT the present time there is not one single money order office in the lower Okanagan. This is a source of considerable inconvenience to residents and should be remedied without delay .- Fairview, B.C., Advance.

Following are a list of some traders' stocks sold: Joseph McEvoy's grocery stock in Toronto was bought by his wife for 50 cents on the dollar.---The general stock of Roy & Co... of Kinmount, sold for 45 cents, and that of E. Hallefreund, at Minden, for 55 cents on the dollar.—The clothing stock of George Adams at Toronto is advertised for sale on the 22nd instant.

From the far western provinces we hear of the following failures: R. W. McIntosh has been a hotel keeper at New Westminster for some time, and has assigned.——At one time F. W. Fisher, Lundyville, Manitoba, was employed by the Government, but in 1889 he bought a general stock and commenced husiness for himself. His assignment now is attributed to his failure to make collection of

THE druggists of No. 7 District, comprising the counties of Wellington, Halton, Dufferin, and Peel, in their annual assembly elected the following officers: President, R. H. Perry, Fergus; 1st vice-president, T. P. Smith, Elora; 2nd vice-president, A. Jamieson, Mt. Forest; 3rd vice-president, J. K. Dodds, Orangeville; treasurer, R. Phillips, Fergus; secretary, Chas. Law. Guelph.

Quite a large failure is that of J. H. Davis, fish dealer at Winnipeg; the information of

his assignment is received with a good deal of surprise. While it is true that when he first started a few years ago he had practically no means, it is equally true that by paying strict attention to business and economy he made steady headway, and in a statement made a little over a year ago he showed a surplus of over \$14,000. His turnover for that year amounted to between \$60,000 and

THE Toronto failures for the week can be counted on the fingers of one hand. A bailiff has sold out the effects of the Victoria Stained Glass Works .- One would almost think, to look at "Lem Felcher," that he was the owner of a gold mine in California, and a diamond mine in Africa. But Felcher & Bond, who have been partners in running a saloon on Yonge street for about eight years, have assigned, and it is said the estate will turn out poorly.---A week ago we stated that a mortgage against the Rose Cartage Co. had been foreclosed. Since then, they have assigned to E. R. C. Clarkson.— -From slackness of business, perhaps, caused by the falling off in the building trade, A. Cruickshank, plumber, has fallen behind and been sold out by the bailiff. Ten years ago R. Potter & Co. (R. Potter the only partner) began business in the furniture line. Two or three years ago he purchased 25 feet of Toronto real estate, and paid or rather agreed to pay \$400 per foot for it. Then he erected a building which cost about \$8,500, and finally mortgaged all for \$13,000. The dull times have made this load too heavy to carry, and he has called a meeting of his creditors for the 22nd inst.

CALDECOTT. BURTON AND SPENCE

Gloves & Hosiery Importers

The march of improvement is ever upon us: to keep up with the times we are bringing out for the fall season, a NEW PATENT CUT for Fabric Gloves, called the

"ADMIRABLE"

A glove cut thus has 4 parts instead of 8, and in the finger only 7 seams instead of 13. Thus this glove is perfect fitting, comfortable in wear, and less liable to split at the seams.

Our Representatives are showing this glove in their advance sample journey.

TORONTO, CAN. FRIDAY, MAY 18, 1894

THE SITUATION.

Lord Ripon, Secretary of State for the Colonies, has been convinced that the restriction on the admission into the United Kingdom of Canadian cattle ought to be removed, and he made a recommendation to this effect, naming April 15th as the day on which the change ought to be made; but Mr. Gardiner, of the British Board of Agriculture, refused to agree. Mr. Chaplin, ex-President of the Board of Agriculture, falls back upon a former outbreak of alleged pleuro-pneumonia in Scotland, which he insists came from Canada. That the disease was correctly described in this case is denied; and Lord Ripon finds it difficult to believe that it was a type of contagious pleuro-pneumonia, and not a disease due to the hardships and exposure of the journey across the ocean. Mr. Chaplin, the more he is pressed, the more resolute he becomes in resistance; so that the contest over the question is fast resolving itself into a comedy. It is now plain that the restriction on the admission of Canadian cattle will not be removed if he can prevent it; but fortunately he is no longer in a position to exercise official authority in the determination of the question. Mr. Gardiner, who is willing to abide by the tests to be made, occupies a position of much greater fairness.

Some years ago, when the inadequacy of the ferry service between the City of Toronto and the Island across her bay, threatened dangers to the crowds who wedged themselves in on the decks of the little steamers, the necessity of taking steps to protect the lives of Her Majesty's subjects was universally admitted. A by law was passed by the City Council to pre-Vent any boat of less than 300 passengers' capacity engaging in the service; and two large and safe boats were built specially for the traffic. Now it is proposed to repeal this

things, with its dangers increased with the increase of the crowds that make the passage. Small boats could probably be found that would reduce the fare below the 5 cents charged by the larger and safer boats, and if so, there would be a rush to them in numbers that would prove dangerous. The cause of threatened repeal of the bylaw is the rate of fare charged, several members of the council believing that it is too much. The owners of the boats reply that even at 5 cents, they are not making much more than simple interest on their investment. If so, the short season must be blamed for it. Some years ago, Mr. Gooderham offered, if granted's monopoly, to spend \$200,000 in putting a superior ferry service on the bay at a charge of 5 cents for both ways, half the present rate; but it is doubtful if the city could have legally granted a monopoly. In a matter of this kind, the safety of the lives of the passengers must be the first consideration.

Brazil has broken off diplomatic relations with Portugal. The Brazilian Minister to Lisbon has been recalled. The cause of the offence thus expressed is that Portuguese war vessels at Montevideo took on board a number of defeated rebels, on the collapse of the rebellion. It is not probable that the rupture will lead to war between the two powers, which occupy to wards one another the relation of father and son. Brazil is too much exhausted to send a fleet all the way to Lisbon to chastise the alleged offenders. But as Portugal will neither give up the refugees nor apologize, the two nations must be content to scowl at one another, and if that does not give the necessary relief, to scold in harmless tones for the benefit of onlookers. Portugal is not at all in a belligerent mood, and is inclined to take the rebuff coolly. England has been asked to mediate between Brazil and Portugal.

Among the senators at Washington are to be found some who desire that, in tariff legislation, the United States should treat Canada exceptionally with a view of coercing her into the acceptance of a form of reciprocity which would suit the views of these gentlemen. As a condition of applying to Canada a tariff which they would apply to all the rest of the world, they require we should declare a desire to make a material reduction in the duties on the products and manufactures of the United States. Why should we do anything of the kind, when our duties are already lower than the American? Why should this country be treated exceptionally by the United States, and to our injury? It is the old game of coercion, with the old machinery of commissioners to enforce a one-sided reciprocity. We are anxious to trade on fair terms with our neighbors, but we do not intend to be coerced commercially or politically. The unwisdom of Senator Gallinger's amendment to the tariff might suggest itself even to him, if he would only take the trouble to look back on the failure of all previous attempts of this kind. That the object of Mr. Gallinger and all who row in the same boat with the tripartite agreement for the control of

American Union-does not admit of a reasonable doubt. It is well that all who fish with that net should be reminded that they will get only disappointment for their

Just when the pressure of the coal strike in the United States was beginning to be felt in scarcity of coal, relief came in the form of foreign supplies. From Nova Scotia, Scotland and England coal has been delivered in New York, at an advance of only 45 to 50 cents per ton on the ordinary price. It is estimated that 100,000 tons more can be obtained in this way by the 10th June. Whether the supply will be large enough to fill the gap of the deficit in the home supply is a question. If it should prove to be so, American consumers will fare much better than the English did in the coal strike last year, when coal went up enormously in price. Canada has already begun to suffer from a scarcity of coal, prospective if not actual, and as a matter of precaution, the Grand Trunk has decided to receive for transportation only live stock, butter, cheese, eggs, grain, flour, potatoes, turnips, roots, general merchandise and similar articles. Cordwood and other forest products, hay, straw, ice, ashes, fertilizers and building materials, including stone, lime and clay, sand, slate. etc., will be declined unless under special authority from the general freight agent. Some affirm that enough coal can be got in Nova Scotia to supply all wants, and that to bring it to Western Ontario, a dollar of extra freight will suffice. But the thousands of tons which are said to be awaiting shipment would soon vanish if both the United States and Canada were to draw heavily on the supply; and the question would arise, at what rate production could be forced. The Grand Trunk authorities must have canvassed the whole question before they resolved to refuse the descriptions of freight named.

Senator Huston, of Virginia, and Senator Kyle, of South Dakota, appear to be authority for the statement that an attempt has been made to bribe them to vote against the tariff bill. The alleged bribery agent is reported to be an old hand at the business, having, it is said, been a member of the "carpet-bag "Government of South Carolina. He is said to represent New York interests, and to make the boast that a million of dollars will be spent if necessary in bribing Congress by his peculiar constituents. A charge of this kind ought to be investigated. Meanwhile the mere statement cannot be accepted as equivalent to proof. Where monopolies and combines flourish by favor of an excessive tariff, attempts of the kind alleged are to be expected, when the profits of the monopoly are threatened by legislation. Other stories of actual bribery have been published during the week, involving all the great Trusts. It remains to be seen whether proof of the accusations will be forthcoming.

Australia, it now appears, is anxious that by law and go back to the old state of him is political—to force Canada into the Samoa should not end. The arrangement does not work satisfactorily to the United States; the American Minister has made representations to this effect to the British Government. It is probable that the United States would be glad to be rid of the "entangling alliance," as Washington would have called it; but so far the government has not committed itself to avowing the fact. After the storm raised over the Hiawaian business, it is natural that the executive should be cautious, and not do anything which public opinion would be likely to negative. Germany is, perhaps, less willing to let go her grip on the islands; but in that country the noise over Samoa is made chiefly by what is known as the colonial faction, the strength of which may possibly be over-estimated. The British Government is in correspondence with Germany on the question of the future management of Samoa.

THE COMING INTERCOLONIAL CONFERENCE.

For the first time in their history the larger of the scattered colonies of Great Britain will, next month, meet in conference to consider questions common to them all. The place of meeting will be Ottawa. At first, it was supposed that Canada and the Australian colonies only would be represented. After awhile invitations were sent to Cape Colony and Natal; but the replies were that neither of them could send representatives at so short a notice. Cape Colony has reconsidered the matter, and finds that it will be able to send Hon. Sir J. Henry de Villiers, Chief Justice and President of the Legislative Council, and Sir C. Mills, its Agent-General, resident in London. The widening of the scope of the conference will increase the interest that will be felt in its deliberations. Questions of intercolonial trade, including means of communication, will form the staple of the discussion, but the problem of the defence of the Empire is likely to claim at least passing notice.

The colonies that will be represented know but little of one another, and it is desirable that the barriers which the absence of knowledge of each other's wants and capacities may raise, should be removed. Canada, by sending a representative to Australia last year, began the good work. and Australia is now to respond. Cape Colony will at least be an attentive listener at the conference, and she will probably have some representations to make on her own account. The South African colonies of Great Britain, without being homogeneous, are actuated by strong feelings of self-reliance; but it is self-reliance in isolation, rather than in the form of federative co-operation. The obstacles to union are always strong in a group of colonies which has sprung up side by side; and if it was so in the case of New England, where the population was homogeneous, much more is it so in South Africa, where the Boer element counts for much. Cape Colony can speak for herself at the conference, and she bids fair to exercise a dominant influence in that part of the world. There remain vast regions of South Africa to be subdued

argely by the cluster of British colonies which have been established at great cost to the Mother Country, through wars with the native tribes. The attempt to federate them has been a signal failure; though the concentration and development of their strength will be found in federation. If, like Canada, they had a federal authority to speak for the whole, their wishes upon trade questions could be collected and expressed with a facility which is now impossible. No one can foresee the advantages which the conference may confer by making us, in some measure, acquainted with the wants and capabilities of South Africa; for, until we learn to what extent Canada and South Africa can be useful to one another, the conditions of the problem cannot even be stated. It is satisfactory to know that each country is willing to learn something about the other that may be useful to itself.

The conference will probably do much towards settling the conditions on which the colonies will aid the projected Canada-Australian cable and steamship communication. What Great Britain will do, if anything, in this direction, must be decided elsewhere; though what the conference does may form the basis of the whole work. Australia is not a unit any more than South Africa; like South Africa she comprises a group of colonies, some of which are not likely to support the scheme of a British as opposed to a French cable. The dissentients may possibly be reduced to two; but this will not prevent the realization of the cable scheme, if the majority can agree upon a basis of contribution. Steamship communication is practically assured, though it is necessary to ensure permanency to what can at present only be considered as an initial

The idea of preferential trade is pretty certain to be broached at the conference. France treats her colonies and her colonies treat her preferentially; but France is not in this respect necessarily a model which British colonies should desire to imitate. She has a minimum and a maximum tariff, which is really a form of reciprocation of civilities and of incivilities. The question of the distribution of the burthen of protection will arise out of the other projects which the conference is likely to favor. Who is to protect the Canada Australian cable when it is laid? a British official, who speaks in the name of the Government, has already asked. This will bring up the question of the distribution of the burthen of protection, on a limited scale, and once touche'd on, whole problem will be laid open. Protection and preference may be bracketed together, or they may be treated separately. There is not likely to be any great enthusiasm in volunteering to share in the cost of national protection; it would surprise no one if a general disposition to hold back, on this score, were manifested. It is generally in the presence of danger that offers of this kind are volunteered, and they somtimes take a practical form without much preliminary parley. This is very different from discussing the Lastly, these cities expend on their fire

in cold blood. The attitude and temper of the conference are not likely to evoke spontaneous bursts of enthusiasm which would demand heavy sacrifices to translate into acts. In any event, the conference can scarcely fail to do good. It will showthe colonies how far they are prepared to co-operate for the mutual advantage of intercourse mostly of a commercial character. It will tend to lessen narrowing influences and to broaden the views of the several peoples represented. This will be a distinct gain, though its value may not be at once appreciated; it will bear fruit, if not at first, later on.

The question of the future of Samoa will be likely to come up; and if so, Canada may begin to feel an interest in lands which now, from their remoteness, seem to the ordinary Canadian to have no interest for

Victoria has sent as representatives to the conference, Sir Henry John Wrixon, and Messrs. Simeon Frazer and Nicholas Fitzgerald.

TORONTO'S DANGER.

"I am informed," said Alderman Bailey in the Toronto City Council on Tuesday evening last, "that the water pressure in the west of the city to day was so weak that the firemen could not reach the roof of Mr. Prittie's house with the stream. If this is true it is time to do something.'

There are others than Mr. Bailey who feel that it is time to do something, but the trouble appears to be to get those in authority to move. Toronto is not properly equipped to fight fire. The Chief of the fire department has urged again and again that one or more steam fire engines should be procured, because the city pressure cannot always be relied on. The city council pays no attention to him. Here, within two weeks, are two instances—the Globe clothing house fire and the Prittie fire-in which the pressure was faulty. Happily these were calm nights. But suppose a strong east wind, with poor pressure and no steam fire engines, where would that King street block have been if the flames had got a start? Swept into smoke and ashes, from Rogers' fur store to the St. Lawrence Hall, and Heaven only knows where the flames might have been stayed.

Do our aldermen and our citizens generally understand how defective Toronto really is in fire appliances? Take, for comparison, two cities near our own size, about 200,000 people each, Minneapolis and Milwaukee, and compare their equipment with ours. Both cities have the same system as ours, gravity and direct pressure, but one has 18 and the other 15 steam fire engines -we have none; one of them has 8, the other 7 chemical engines—we have 2; they have water towers and fire boats-we have neither; one has 40,000, the other 23,000 feet good hose—we have 16,000; they have 136 and 150 horses—while we have 33; they have 520 men between them-Toronto has 122. Even in alarm boxes, hose carriages, hook and ladder trucks, chemical extinguishers, these places outnumber usto civilization, and the work must be aided question purely in its financial aspect and departments, the one over \$200,000, and the other over \$300,000 annually, while the of these places. Whatever may be the total cost of the Toronto department last narrow ideas of a number of our city year was \$155,000, of which a third was for water supply.

But not to confine the comparison to two cities, we present herewith a comparison of the fire appliances) of sixteen American and one Canadian city, by which Toronto's relative standing may be learned:

fathers as to "economy," falsely so called, in the matter of provision against fire, it is B.C., to say that there must surely be evident that the other cities named have had in view, over and above the risks of ordinary fires, the contingency of a great conflagration, to which certain of our Toronto aldermen persistently shut their Underwriters would imply that these

CHEMICAL FIRE ENGINES.

Mr. H. G. Ross writes from Victoria, something wrong in our item on pages 1348 and 9, Monetary Times, April 27th, saying, in speaking of chemical engines, "And yet the action of the Associated Fire

*Of this amount \$56,747 is for water supply.
:52 cents per capita for feronto, if cost of water supply is deducted.

thus shown to be less in Toronto than in score of economy, to provide the steamers any American city cited in the list. We and chemicals which the fire underwriters could expend \$50,000 more than the \$155.-000 already spent, and still be at a less relative expense than any one of the United States municipalities named.

The argument is often used that Toronto has escaped serious fires of recent years, and therefore we may "let well enough alone." Those who use it seem to believe that this city's freedom from conflagration arises from the superiority of its fire appliances. Hence, they argue that not only do we not need to spend any more money on our fire brigade, but that we should get insurance cheaper. Let us examine this argument.

;

The comparative list given above of fire appliances existing in fifteen American and two Canadian cities, of which four are smaller and twelve larger than 'Toronto, will serve to show how mistaken is the reliance placed in our fire equipment, defective as our water pressure at the hydrants has been shown of late to be. Every other city in the list, even Rochester, Syracuse, or Hartford, has more steam fire engines than we-ten have more chemical engines-fifteen have more Babcocks or other extinguishers—ten have more hose carriages-fourteen have more hose-all but one have more horses, and at least a dozen have more men. A number of the cities have water towers, standpipes, Patrol wagons, which we have not.

Are we to suppose that our American neighbors provide all this fire-fighting machinery for fun? Is it reasonable to conclude that these other cities of like size with our own are spending needlessly from \$50,000 to \$100,000 a year each more than the cost of our department? The notion would imply little sense in the authorities

The per capita cost of the fire brigade is eyes. If this city is right in refusing, on the advise and the fire brigade chief has repeatedly asked, then surely other cities are insanely extravagant in the more liberal provision they have made. In 1898 Chief Ardagh writes to the Fire and Light Committee of the Council: "Once more I call your attention to the necessity of purchasing and equipping a first-class steam fire engine. The many high buildings that have been recently erected in the central portion of the city is a strong reason why this request should receive most serious attention."

> We have received from Montreal a copy of the report of the chief engineer of the fire department. That city is ahead of Toronto in steamers (9), chemicals (3), Babcocks (40), hose and carriages, men and horses. While her population is greater than ours, her area is less.

> To show that the organ of our mercantile body perceives, if this city council does not. the necessity for improved equipment of our fire brigade, we append a copy of the resolution passed unanimously by the council of the Toronto Board of Trade, May 15th, 1894:--

> "That this council strongly endorses the representations made to the city council by the Toronto Board of Fire Underwriters. That in order to ensure the maintenance of a proper fire protection, especially to the mercantile community of this city, one or more steam fire engines should be provided without delay. And that Messrs. the president and two vice-presidents be a committee to act in conjunction with the committee of the Fire Underwriters' Association in urging these views upon the Mayor and corporation."

machines are of no value." Mr. Ross adds this valuable testimony: "These engines have saved many a serious loss in New Westminster, Vancouver, and Victoria, and have paid for themselves many times over. Only last Saturday night I saw a fire extinguished in a dwelling and another in the mantle department of a dry goods store, on the second flat. In this case no water whatever was used, while in the other what was used was on the roof and outside. The chemical engine did all the work necessary to put out the fire in both cases."

Our correspondent will by this time have received the succeeding issue of THE MONE-TARY TIMES, which made it plain, page 1379, why we criticised the action of the Canadian Fire Underwriters' Association in respect of chemical fire engines. It was, we still consider, an undue belittling of these valuable machines as a means of fire extinguishment.

THE SHIPPING TRADE.

It is not too much to say that the present depression in the shipping trade throughout the world is the most serious that has been experienced in many years. Floating carriers are, for the most part, a weariness to their owners, whether on the ocean or on the Great Lakes. Freights are scarce on salt water, and the rates paid for the little that can be obtained are exceedingly low, so that the remuneration for the capitalist who has his money in floating craft is precarious. Mr. John Torrance, manager of the Dominion line, and vicepresident of the Montreal Board of Trade. says the shipping business was never in a more deplorable condition. Nearly all vessels coming out are in ballast to Mont. real.

Many ships and tramp steamers have to go long voyages in ballast in order to obtain a cargo. We happen to know of a ship of 2,000 tons, which is owned in New Glasgow, Nova Scotia, and last week was lying at Dublin. She is now under charter to carry a cargo of grain from Portland. Oregon, to the United Kingdom, at 33s. 9d. per ton; but she is compelled to sail in ballast, earning nothing, all the long way round the Horn, from New Glasgow to Portland. A little more than two years ago, on a similar voyage, this vessel netted her owner over \$15,000. The ship referred to is now nearly four years afloat, and during the first two years she sailed, she earned a dividend of 50 per cent. on her cost. So that in this case the owners, if they "evened-up" the seasons, are not so badly off. The contrast of present rates is, however, the more painful.

The present outlook is that the owners of this ship may feel thankful if at the end of the present year they find that they have averaged 3 per cent. on their investment for the past two years. A very marked contrast in so short a period. And this instance, we are told by a Halifax correspondent, fairly represents the general condition of the shipping trade all over the world.

"ECONOMY AND NECESSITY—NOT OUTLAY AND LUXURY."

The condition of mercantile and financial affairs in the United States is not inaptly summarized by a resident of California, an extract from whose communication we give elsewhere. "Economy," says this observer, "not outlay, is the order of the day. Necessity, and not luxury, rules." Strange language this for a resident of a favored State in that favored land, whose citizens boasted themselves so long as the most prosperous, and, according to some, the most extravagant nation in the world.

The writer of this letter, indeed, takes the view that, so far from encouraging further immigration, there are already too many people in the United States for the requirements of the country, and the doors of immigration for all foreigners will have to be closed. "This industrial movement, so called, tends to retard the loaning of money. Capital is very sensitive, and capitalists are not anxious to invest money in any scheme where labor is required. All over the country, where large bodies of men are employed, their employers are on the anxious seat; this prevents monied men from investing, and thus millions of capital lies dead, which might otherwise be in circulation.

"Never, in my experience in this State, have I seen money so scarce. In the banks there is no scarcity; they make loans only on what is gilt-edge security, and on improved, income-bearing property, and not more than 50 per cent. of appraised value. I offered \$40,000 of building, residence property in San Francisco for a loan of \$8,000, and found none to accept, preferring to let the money lie idle. This is a bad state of affairs, and none can tell when a change for the better will arise!; people must wait."

CREDIT AT RETAIL.

On this subject we have received two communications, one from a merchant, another from a gentleman who, though not in trade, has a very sensible idea of the system to which we took exception last week. In respect to the giving of credit by merchants to Government employees, writes one:

"You have voiced very correctly what is the experience of mercantile men in this city, and I am quite confident also the experience elsewhere. Could we not find," he asks, "a practical remedy for the evil in the adoption of a fortnightly instead of the present monthly system of paying wages? The short period would mean ready cash in the large majority of cases, and prevent opening accounts with all its expenses to the merchant, and its temptations to overbuy to the purchaser. As I see it here, the monthly plan of paying is most mischievous in its effects." It appears to us that the retail merchants of Toronto, Ottawa, and other provincial capitals can remedy matters if they like, by insisting upon the Government adopting the practice in vogue in all large business establishments, of paying the officials fortnightly. There would then be no excuse for book debts. It would be much better to adopt this than to attempt anything in the direction of special legislation. An Order in Council would easily accomplish the former.

SMELTING WORKS IN HAMILTON.

Hamilton, one of our successful centres of manufacture, is about to add smelting works to its other varied industries. The Hamilton Iron and Steel Company, which has the work in hand, owes its existence to the energetic promotion of Mr. J. J. Morehouse. The Atlantic Trust Company has undertaken to guarantee an issue of \$250,-000 six per cent. bonds, at 30 years date. The bounty offered by Ontario on iron produced in the province comes just in time to be serviceable to the new industry. If, by any reasonable means, our mineral resources could be largely developed, the effect would be beneficially felt in many directions, especially by the carrying interests. In the United States, within a fraction of one-half of the freight carried by the railways comes from the mine, a fact which will bear some thinking over. Full development of our mineral resources would turn some of our non-paying railways into profitable concerns. At the same time, we do not recommend people to lose their heads over a mining craze. In view of the hazardous nature of most mining operations, mining should be, undertaken in a cautious tentative way, and only by persons who understand its intricacies.

THE FRENCH BUDGET.

France, according to one of her best-known publicists, needs a public loan, and the pretence of her Finance Minister that she does not is a piece of "dissimulation." In L'Economiste Francais, M. Leroy Beaulieu criticises the French Minister of Finance,

M. Burdeau, very severely. He writes: "M. Burdeau (Minister of Finance) leads the public into error in making believe that the expenditure is less than in 1894, whereas it is considerably greater; he covers by disguised loans some expenses of a permanent nature; he exaggerates the receipts by abandoning the usual method of estimating them; his budget contains a germ of expenditure that will increase rapidly in succeeding years. M. Burdeau has subordinated the composition of his budget to two objects: first, to mask, as far as was possible, a deplorable situation, which is the best means, by prolonging delusions and deceptions, of rendering it still worse; secondly, to avoid, at any cost, or at least to postpone, a public loan, which, if the finances were carefully managed, would be necessary, and would have served as a warning that the expenditure should be energetically restricted." The Parliaments of 1885 and 1889, M. Leroy Beaulieu reminds us, made some efforts to constitute a normal budget, one that would be complete, clear, and in equilibrium; M. Burdeau makes no attempt of the kind. He concludes by saving it would be difficult to find in France during the present century a budget which for dissimulation of deficits and charges, and the discounting of distant resources, could be compared to that of 1895. "For precedents it would be necessary to go back to the eighteenth century, to the time of Calonne."

LIFE ASSURANCE LEGISLATION.

A bill to amend the Canadian Insurance Act has been introduced into the Senate during the present session, and, we understand, has now got into the Lower House. Its main provisions appear to alter the time within which annual statements of companies may be rendered to the Insurance Department; to restrict the variety of kinds of insurance which any one company may undertake; and to prevent any future company, organized upon the assessment plan, from undertaking endowment assurance or the granting of annuities.

Dealing first with the matter last named, as the most important of the three, we remark that the language of the bill seems to us to lack clearness and directness. Section 39 of the Act, Cap. 124 Revised Statutes of Canada, is proposed to be amended by adding the following sub-sections:

(10) No company which assures to any of its members a certain annuity, either immediate or deferred, whether for life or for a term of years, or any endowment whatever, shall be eligible for registration or license as an assessment company under the foregoing provisions of this Act.

(11) No company shall be eligible for license as an assessment company, if (a) a new company [with 500 applications for not less than \$500,000, etc.], or if (b) a company already in business, unless it has 500 members holding policies for \$500,000, etc.

Would it not be more explicit and more in accordance with what we presume to be the meaning of the bill, to say: "No life assurance company or fraternal society working on the assessment plan shall hereafter assure or issue to any of its members a certain annuity, etc., or any endowment whatever"? The enactment of the Massa-

chusetts Legislature to prevent any assessment society issuing endowments or annuities is definite and peremptory. If it is, as we think it ought to be, the aim of the Government of Canada-since this is a Government bill, under charge of Senator Angers—to prevent any credulous person relying on an assessment concern for such essential returns as are implied in annuity or endowment contracts, the Act they pass should be more explicit than the bill we have cited.

It is proposed to amend section 20 of the Insurance Act, so as to enlarge from a fortnight to a month the time within which any life assurance company shall send to the Superintendent of Insurance a preliminary abstract of the Canadian business of a calendar year. And to give to any life company liberty, by the expression "or within three months thereafter," to withhold its full statement to Government of a year's business until the 1st April next ensuing. We are unable to perceive any necessity for so much latitude, though possibly the Superintendent of Insurance may have found reason to justify it. The issuance of the complete Canadian insurance report is already months later in the year in appearing than those of the principal American States; and the proposed amendment appears to us to afford an opportunity to such Canadian companies as desire to do so to defer their reports until they can incorporate in their statement, say for 1895, insurances written during the first one, two or three months of 1896. This is a custom rather to be reprehended than encouraged.

We do not find in this bill any clause dealing with penalties exigible for violations of the Act. And here, it seems, some amendment might be made with advantage. The Act, as it stands, provides a penalty for a first offence in contravention of its provisions, but the language with respect to a second or third offence is so vague as to make the punishment of a second offence difficult, if not impracticable. The language of the Ontario Insurance Act of 1886, viz., 49 Vic., chap. 45, sec. 22, is explicit enough on this score. The adoption of its language would result in greater lucidity, while it would have the added advantage of making the Dominion and the Provincial law uniform upon a point of no small importance.

A

THE FARMER MERCHANT.

It is no new thing for farmers, who are apt to think themselves the hardest-worked of mortals, to look apon the occupation of the country storekeeper as an ideal one. He does not have to work such long hours, apparently, as a cultivator of the soil; he has very little out-door work; he is generally well-dressed and his family has a piano or an organ. Ergo, he must be prosperous, and his business must be a desirable business, certainly an easy one. But what the farmer does not see is the difficulty of buying goods rightly, and the further difficulty of selling them and getting paid for them. The expenses of conducting a business. the risks of it, the worries of it, he knows nothing about until he tries them. And when he does try them, he is handicapped by the lack of any previous knowledge of merchandige.

Still, we continue to hear of people who will leave the plough for the counter. We learn from Ottawa that a general merchant of some five years standing, W. J. Nicholson, of Riceville, in Prescott County, Ont., has made an assignment, after having been sued by several of his leading creditors. He was originally a farmer, and though well-meaning, had not the business experience and training requisite to success. Yet another instance comes to us from Montreal. Vachon & Co., general storekeepers at St. Justine de Newton, have failed. J. D. Vachon was a farmer, who began in the mercantile line a few years ago, only to meet with disaster in February, 1892, when he failed owing \$3,800. The estate was sold out, and he resumed business in the name of a brother, but has met with no better success. At Nictaux, Nova Scotia, a general dealer named M. Smith has assigned. He has been in business only since the fall of 1891. Previously Mr. Smith was a farmer, and though reported as being a very industrious man and a general favorite, still the lack of experience in mercantile matters stood in the way of his виссеяв.

FIRE UNDERWRITERS IN VICTORIA

The annual meeting of the British Columbia Board of Fire Underwriters was held in Victoria on the 5th inst.

It was decided that the home companies be requested to approve of a uniform mortgage clause to be used by all companies doing business in the province. Another matter taken up was that of a uniform policy for insuring electric and power plant, and Messrs. H. T. Ceperley, J. J. Banfield, H. F. Heisterman and H. G. Ross were appointed a committee to draw up a form of policy to be submitted to the board for approval at a later date. The rating of sawmills was discussed, but dropped, it being decided to leave matters as heretofore. The next annual meeting is to be held at Vancouver.

The election of officers for the ensuing year resulted as follows: President, H. T. Ceperley, Vancouver; first vice-president, C. E. Woods, Westminster; second vice-president, J. C. Maclure, Victoria; secretary and treasurer, C. R. Townley, Westminster. Executive committee: Victoria, C. E. Dickenson, J. St. Clair Blackett, and J. Holland; Vancouver, C. F. Yates, A. H. Smith, A. A. Boak; Westminster. A. W. Ross, F. J. Hart, and T. R. Pearson Nanaimo, J. M. Rudd, Marcus Wolff, and A.

A SOFT PROPOSAL.

A sub-committee of the Toronto City Council, according to the Globe, have grown angry at the fire underwiters for refusing to reduce premiums, and for "asking for more" in the shape of fire equipment. What does this committee do but compile a statement estimating the profits of the fire underwriters derived from Toronto premiums these several years past, and declare that the rates are fifty per cent. too high. Then they recommend to the council the formation of a Municipal Bureau of Insurance for Toronto, with a full staff, with power to effect insurance and with full charge of the fire brigade! This may be all very well as a joke, or as a piece of "bluff." but one would expect more sense from some at least of the committee. The antiquated and long exploded scheme reminds us of a story. told some weeks ago in an American exchange, the Chicago Investigator, if we do not mistake. May we commend its moral to the intrepid is \$21,319.30, of which sum \$3,700 is reframers of the municipal insurance scheme:

A good old story is told of the farmer's boy, who remained away from church one fine Sunday morning for the purpose of breaking a young steer to yoke. He fitted one bow of the yoke to the neck of the steer, and the other to his own neck, and took to the main road. They got along nicely until something frightened the steer, when with a snort he dashed forward, carrying the boy with him at a hurricane gait. They neared the church as the congregation came out, and the boy in an agony of fear yelled: "Here we come, damn our fool souls! Somebody head us." We believe some Iowa men will be in the boy's predicament soon, judging by the following which we clip from the Des Moines Leader :

"March 5, 1894, will be an historic date in the annals of Iowa insurance. The Commercial Insurance Company will then have cleared the port of perfect preparation, ready to sail the business sea, as staunch a ship as was ever launched. Frank T. Campbell is president; S. C. Lee, secretary; B. J. McKee, vice-presi-S. C. Lee, secretary; B. J. McKee, vice-president, and W. B. Bentley, N. P. Nelson and H. C. Lamb, associate vice-presidents. The company is assured of success, because it is endorsed by the merchants of Iowa, and insures the property of merchants of Iowa and of no other class of business men." [See page 1450.]

THE MIDWINTER FAIR.

The people of San Francisco did themselves credit for enterprise and thorough-going energy in conceiving and carrying out their Midwinter Fair immediately after the great Chicago Exhibition. The pity is that the financial circumstances of the time were unfavorable, and the results have therefore been disappointing. A letter from San Francisco, written early this month, tells how the Fair impressed a beholder:

"We were much pleased with the exhibits from Russia, Italy, Austria and Sweden. In the Bohemian ware there was much to admire. In all quarters there was a great deal to interest a thinking mind. Of course in the few hours of one day it could only be a glance one could give to each. The exhibitors to a unit expressed regret at the want of purchasers; very few sales are being made, and none exceeding the sum of twenty dollars, which sum seems the maximum of the ventures. This is very discouraging after all the outlay and expense of freight and incidental expenses to the exhibitors. To very many it will prove a dead loss, and not at all creditable to our coast, but the times are out of joint, and business men must realize this fact. Economy, not outlay, is the order of the day. Necessity, and not luxury, rules."

MARITIME PROVINCE ITEMS.

A new warehouse for the Enterprise Foun dry Company, at Sackville, is being built by John Estabrooks. It is 60 by 45 feet and three stories high.

The take of oysters on P. E. Island shores will likely be smaller this year than last. The weather has been rough and fewer fishermen engaged in the work.

The Sackville Post says the buildings for Chas. Fawcett's foundry are getting along. The fitting shop frame is up and the foundation of the moulding shop is laid.

Fire protection for Dorchester, N.B., has become an assured fact. A large sum has been subscribed and appliances will be purchased at once.

The assessment of Amherst, N.S., this year quired for interest on water debentures. This must mean that the amount of taxes to be raised for the assessment of Amherst must be a dozen times \$21,000.

About forty of the merchants of Yarmouth, N.S., gathered on the evening of the 10th May for the purpose of forming a board of trade. They proceeded as far as they could with their organization, but could not complete it until the charter was received.

At Alberton, P.E.I., Thomas Wilkinson has opened to the public the upper flat of his store as a showroom for boots and shoes and clothing, an indication of increasing business. We also learn that there is being built an addition, 30 feet by 40, to the hotel of Ellis Bros., three stories in height. It is to be finished with a French roof and surmounted by a tower.

Never in the history of Amherst was there ever such a demand for houses as at the present time, says a correspondent of the Chignecto. Post. If some of our moneyed men would erect comfortable tenements to rent at fair rates, it would be a splendid investment and return a good percentage.

Two new quarries have been opened up at Westcock, New Brunswick, this spring. In one situated near the aboideau is found a stone of a brown color, and in the other, three-quarters of a mile nearer Woodpoint, the stone is of a lighter color.

We are glad to hear that steps are being taken to resuscitate the Midland Railway Company, says the New Glasgow Chronicle. This company was organized some years ago and graded some miles of the road projected along the East River. Since the New Glasgow company have completed their road up the va ley of the East River, the most important feature of the Midland Railway scheme is its extension eastward to some harbor on the Atlantic coast. This road would open up a fine timber district, tap several valuable iron deposits, and come within easy reach of some of the best gold mining districts of Guysborough county.

Referring to the work of the dairy school recently held at Sussex, N.B., by Dominion Government instructors, three new butter factories are to be established outside of Sussex, one at Waterford, near McAfee's; one at Newton, on Smith's Creek, and another at Jeffrey's Corner, on new line of road.

A company to be known as the Wine Harbor Gold Mining Company, limited, capital \$160,000, headquarters Truro, applies for incorporation in Nova Scotia. The applicants are: Thomas G. McMullen, lumber merchant; Charles A. Kent, hat manufacturer; Alex. S. Archibald, engineer; Alfred T. Dalrymple, merchant; and Harry T. Harding, solicitor, all of Truro; Andrew Kirkpatrick, and James A. Kirkpatrick, of Shubenacadie; John P. Chipman, judge, and William P. Shaffner, solicitor, of Kentville; and Wm. H. Knowles, farmer, and Frederick Knowles, contractor. of Avondale.

A number of New York gentlemen-Messrs J. D. Williamson, banker; F. B. Bard, solicitor; Strang, Lee & Monroe, contractors; Newcombe and Wells-visited Halifax last week, representing the South Shore Railway Co., which proposes to construct a standard gauge railway from Yarmouth to Shelburne, a distance of 81 miles, with an extension to Lockeport. What troubles these gentlemen is that the Coastal Railway Co., as it is called, which proposes to build a narrow gauge railroad, has had the start of them in some degree. The gentlemen named say that they are ready to proceed at once with the work whenever the local subsidy of \$3,200 per mile The deceased gentleman, who died in his 60th Some of the new tan shades are embroidered

is guaranteed to be paid when the road is completed and equipped. A meeting of the Halifax Board of Trade was called for Monday, 14th inst., to consider whether the narrow or the standard gauge project should be supported. The latter project has their preference. These gentlemen had addressed the citizens of Yarmouth on the previous Thursday, when Mr. Wells and Mr. Williamson announced that they had completed all financial arrangements, would ask no credit, would build the road in eight months, and not issue a bond until the road was complete, but they expected and asked the people to aid them in getting the subsidy and other concessions from the Province.

The General Mining Association, which operates the Old Sydney Mines, had a meeting in London recently. The sales of coal from the Sydney Mines during 1893 were 209,186 tons, compared with 178,080 tons in 1892. The purchase price for the Bridgeport property and for the Low Point, Barrasois and Lingan Mining Company has been received, and the directors propose to make a return of £2 10s. per share of capital. Negotiations for the purchase of the Sydney Mines having lapsed, it is intended to increase the output and facilitate the shipping and delivery of the coal.

FOR MANUFACTURERS.

Mr. E. D. Tilson, of Tilsonburg, has received an order from Hanover, Germany, for a carload of his make of oatmeal.

A tannery is to be established in Georgetown, so says the Guelph Mercury. The firm will be composed of E. B. Nicklin, of Stewartown, and Moses Smith, of Acton.

In Berlin, Mr. H. J. Hall has been fitting up Schantz's old planing mill, putting in a new boiler made by I. E. Schantz & Co., and making other changes, to be in running order by the middle of this month.

The Alberni, B.C., paper mill is ready for operations, the machinery being tested some days ago and found to work most satisfactorily.

Unless they get more orders, the Hamilton Bridge Company works will close down about the end of this month. Since the first of the year there have been but eighty men on the pay roll instead of several hundred.

From Sarnia we hear that the Lowrie Works are again open, and doing carriagemaking and general blacksmithing. Also that McCloskey, Watt & Co. are shortly to begin, in that town, making a novel patent thresher.

The silk trade of Macclesfield, England, the staple industry of the place, is in a deplorable state of dulness. Opinions are not agreed as to why it is so depressed? Some assert that the question of bi-metallism has to do with it. Whatever be the cause, the proprietors are at their wits' end what to do to keep the mills going, and much poverty and suffering exist among the work people. The member for Macclesfield, Mr. W. Bromley-Davenport, takes the bold step of proposing in the House of Commons a motion as follows: "That this House, having regard to the lamentable decline of the silk trade in this country, and the distress caused thereby, is of opinion that a moderate duty, affecting only an article of luxury, should be imposed upon all manufactured silks."

The pioneer in what has become an important branch of Canadian industry, namely, the manufacture of buttons, died on May 6th, in the person of Mr. Emil Vogelsang, of Berlin.

year, was born in Barmen, Germany, and came to Canada in 1866, choosing Berlin as his residence. Starting with small capital, he built up a good trade. In partnership with Jacob Y. Shantz, the first button factory, the one lately vacated by the Shantz Button Co'y, was built. Nearly all the button men in business in Canada to-day served under Mr. Vogelsang, says the Record. In 1880 he built the old part of the factory now occupied by the Williams, Greene & Rome Co'y, Limited. who bought the building in 1884, upon which Mr. Vogelsang moved to Port Elgin, where he had a button business for about five years He returned to Berlin two years ago and started his dye works. He was a man of energetic and straightforward character.

TEXTILE NOTES.

The Merchants' Manufacturing Company, Montreal, has added a new fire pump to its plant.

The employees of the Dominion Cotton Co., in Kingston, have accepted a ten per cent. reduction in wages.

The mills of the Rosamond Woolen Co. at Almonte are at present closed down. The tower of No. 1 mill is being raised and other improvements made.

The new carpet factory of Messrs. Gates & Syers, in St. Catharines, is now running with 10 looms in operation. This it is expected will be increased to 20 looms during the

The T. H. Taylor Co. (Ltd.) have completed the alterations and additions to their woolen mills at Chatham, and have commenced running again.

Mudge-Some villain got into my room last night and stole a pair of brand new trousers. I had them made in London.

Yabsley-London made, eh? Oh, you are all right, then. They will turn up the first day it rains .- Indianapolis Journal.

Mr. R. Secord, the fur trader, left last week for the Athabasca Landing, from where he will go into the Mackenzie and Peace river districts, and inspect his trading posts in that region. The Calgary Herald says he will not return for several months. When last year's furs are brought here it is expected they will be worth from \$20,000 to \$25,000.

The importers of linens are in somewhat squeezed position at present. The European manufacturers have to advance prices on new shipments, while the market conditions on this side will not allow of any advance at present. For the last six months an enhancement of the values of all linen goods has been expected, says the Dry Goods Economist: yet, while there is no doubt that prices here are very firm, the majority of our linen houses hesitate to advance prices of goods intended for fall delivery amid the general conditions now prevailing.

The annual general meeting of shareholders in the Canadian Colored Cotton Mills Co., limited, is to be held at 1,774 Notre Dame Street, Montreal, on Wednesday next, 23rd

In spite of the fact that black hosiery has been tabooed in Paris, it still retains the first place in England. The women there are very conservative; and having worn black stockings for so long, will hesitate some time before sending them to the wall. A black stocking with a brown shoe looks ugly and conspicuous, so tan stockings are worn with tan shoes. with tiny spots and long floral trails in black

What do you think of a stocking to lace up the front? Such an one has just been brought out by a London Court hosier. These extraordinary hose are of black spun silk. They have colored silk laces, and a colored lace top to match. Just fancy the bother of having to lace up one's stockings! There are new tan Balbriggan stockings with vertical stripes at the ankle, check calf, and graduated horizontal stripes under the knee--the whole carried out in many tints.

The proportion of the proposed cotton acreage planted May 1st was, according to Bradstreet's, about 4 points less than at the same date of 1893, and about 8 points less than an average. The area devoted to cotton is said to be about 1.9 per cent. less this year than in 1893. Evidently the reduced cotton acreage appeals fell on stony soil.

There are no fewer than thirty thousand operatives in Belfast, Ireland, engaged on flax in fibre, and five out of six of them are women. They live for the most part cheaply, tea and bread forming a large share of their diet. The report of the British Inspector of Factories says they are not careful enough as to diet and dress, for they object to wearing flannel.

Canada, with its small population of five millions, is actually the largest foreign buyer of carpets we possess. During the March quarter our exports amounted in value to over £89,000. To illustrate the importance of the Canadian market in a more forcible manner. we may state that during the March quarter we shipped to the five millions of people inhabiting the Dominion nearly £10,000 more goods than to the 160 millions of people inhabiting Germany, Holland, Belgium, France, Spain, and the United States combined .- Textile

Both of the cotton mills in St. John, N.B., owned by Messrs. Wm. Parks & Son, have closed down for the usual season's repairs. A notice has been issued to the employees that wages will be reduced when the mills re-open, but the amount of the proposed reduction is not stated.

We learn from the Canadian Journal of Fabrics that contracts for next year's clothing for the Montreal police force have been awarded as follows: R. Charlebois, officers' coats, \$30; men's coats, \$18; men's pants, \$5.25. G. H Pearson, officers' pants, \$6.50. J. B. Lanctot, gloves, \$16.50 per doz. Boisseau Freres, mitts, \$10.50 per dcz.

FOR GROCERS AND PROVISION DEALERS.

The opening fair and the annual meeting of the Listowel Dairymen's Board of Trade was to be held yesterday.

Mr. George Matthews proposes building a large pork packing establishment in Hull.

A clockmaker is the only one who can wind up his business affairs and have them continue to run.-Chicago Inter-Ocean.

Above all things, a grocer should be a man of his word, and punctual to the minute with his engagements, whether to meet a note or to deliver a cheese. "Punctuality," said Louis XIV. of France, "is the politeness of kings as well as grocers."

May be the following is not properly either a grocery or provision item, but here goes any. way: "On Friday, John Guy shipped 1,200 or five days. lbs. of turtles to Port Clinton, Ohio. They Last Tuesday night the retail fruit dealers were all caught at the mouth of Big Creek."

This is from the Amherstburg Eche, which paper also has the following: "The tug 'Annie Robertson' took a load of forty sturgeons from here to Sandusky on Tuesday." Now we are pretty well assured that sturgeon are things proper to eat; but as to the turtles, if the folks in Port Clinton did not want them for food, what did they want them for-to stock the pond of a town park?

The cheese sub committee of the London, Eng., Produce Exchange calls attention by circular to the increasing importation of spurious cheese - otherwise "margarine," or "filled cheese" - chiefly from Germany and the United States, in edam, gouda, and cheddar shapes. This substance, says the circular, is not cheese at all. We think it right to seriously warn the trade against the article. It is certainly being sold to the public as genuine, and is, therefore, an offence against the law.

If a bomb shell had been thrown into the camp of local cheese men, says the Brockville Recorder, they would probably have experienced no greater surprise than was occasioned here by the report, which seems to be well founded, that W. T. Ware, of Montreal, has contracted for 35,000 cheese in this district. It is understood that the contract includes all of the Evertts Combination, nine factories.

The No. 2 salt well of the C.P.R. at Windsor was started on Saturday, the obstructions having been removed. The works are now turning out about 700 barrels a day, and, although they have refused all orders since February. they are 12,000 barrels behind.

The crop of grapes in the county of Essex, at the extreme southwest of Ontario, will be all right. So says Mr. McNeill, a well-known grape grower. Notwithstanding the French treaty, there will be a great deal of wine made this year. The prospects are that grapes will bring a fair price this year.

The Canadian Dairy Commissioner, Prof. Robertson, states that the Canadian Pacific Railway will agree to build creameries at convenient intervals along their railway in the North-West, in the same way that they have already erected grain elevators. These factories will be rented to farmers at a rate of not more than 5 per cent. on the investment. The Department of Agriculture will co-operate and supervise the manufacture of butter.

A number of press representatives and other citizens of Montreal spent a pleasant and instructive time, at Morrisburgh last week, as guests of the Eastern Dairymen's Association of Ontario. A feature of the trip was a visit to the new cold storage warehouse of Eager & Denesha, which was formally opened on that occasion. Three rooms in it will hold 55,000 tubs butter, another can contain 30,000 packages cheese. Altogether, these premises, old and new, will hold 150,000 packages of dairy produce.

On Monday the fruit cargo of the steamer "Fremona" was sold in Montreal. About 50.000 boxes were offered, making it probably the largest single sale ever held in Canada. Half the quantity sold will be shipped to the United States. Here are some of the prices: Fancy lemons, 300s, sold at \$2.40 to \$3.10; 360s, \$1.75 to \$1.90; choice, \$1 to \$1.80; and common, 30c. to 90c. Oranges showing some waste sold at \$1 50 to \$4, and half boxes at \$1.10 to \$1.20.

An improved California fruit train service has been inaugurated, and shipments in ventilated cars will be made to Chicago in 120 hours,

of Toronto held a meeting and discussed the

formation of an association. Some of the objects to be accomplished by an association are the adoption of standard packages of fruit, the fixing of the time of arrival and sale of fruit, and protecting dealers as well as the public from the practice of palming off packages of bad fruit simply by placing a layer of good fruit on top. An adjourned meeting will be held on the 21st.

There steamed into port an odd looking craft yesterday afternoon, says a Montreal exchange, flying the Norwegian flag. It proved to be the steamship "Craggs," in charge of Capt. Johnsen, from Bergen, with 3,500 barrels of herrings from Norway on board. The "Craggs" is bound inwards to Chicago. In order, however, to pass the canals, 2,500 barrels are being put in a lighter, and for 180 miles the "Craggs" will tow the barge, and then take back her full cargo.

SHOE AND LEATHER NOTES.

A Kingston firm shipped last week a car load of leather destined for Liverpool.

Respecting seal fishery on the Pacific Coast. a letter from Captain J. G. Cox at Yokohama, received on the steamship "Victoria," brings news that the schooner "Umbrina" has 850 skins, "City of San Diego " 400, "Penelope" 400, and "Carlotta G. Cox " 480.

Pennsylvania tanners are obliged to look to Wisconsin and other Western States for supplies of tanbark, for they say there is only five years' supply of hemlock bark left in the first. named State. A railway commissioner from the C. M. and St. P. road thinks there are millions of cords in central Wisconsin. He has been assisted by expert woodsmen in the several localities, and finds that the hemlock forests cover an area of 3,600 square miles, commencing at about Junction City and extending north to Tomahawk. The forests extend about 30 miles on each side of the track in this distance, forming a square about 60x60 miles. Some of the townships have as high as 400,000 feet of hemlock to the 40

H. Charlebois & Co., Hull shoe dealers, whose failure we noted lately, are making an offer of 50 cents on the dollar, 40 cents payable in cash, balance spread over eighteen months. The liabilities are \$14,564.

Joseph Plouffe, dealer in shoes at St. Louis de Mile End, a suburb of Montreal, has called a meeting of his creditors.

The Hon. Mr. Foster gives notice of the following further tariff changes: Upper leather, including dongola, cordovan, kid, lamb, sheep and calf, dressed, waxed and glazed, $17\frac{1}{2}$ per cent.; old tariff 20 to 25 per cent., new tariff proposal 15 per cent.

A black woman went into a store in Cincinnati and asked for "some of dem shoes yous make for colored people." The clerk told her they had nothing special of that kind. She called his attention to a sign at the door: "Nobby styles, colored shoes." There were explanations and then a sale.

A stylish and comfortable looking shoe for men, says the Shoe and Leather Reporter, is a new Oxford of dongola, without side seam. It is of medium height, with almost straight line at the top, patent leather tipped, and broad lace pieces of same material. This is made in two styles of toe, the Piccadilly and the St. Louis, with broad, low heel. It will make a cool summer shoe for men who still prefer black to colors.

A light, summer cloth lace shoe for men is

produced in American factories, the top of which is of a modest neutral tint; the foxings are patent leather, Blucher front, with a square cut, perforated tip. A broad, low heel and medium toe secure for the wearer the results aimed at, that of a comfortable walking shoe.

The Pictou boot and shoe factory, which has been closed for about a year, is to be reopened by Mr. Gilbert Harrison, of Amherst.

Queen Victoria has very pretty feet, despite her bulky frame. They are smaller and daintier than the feet of any of her children. She always wears an old-fashined congress gaiter, and her last is in the keeping of the provincial boot-makers at Windsor and Balmoral, as well as the court maker in London. Next to her Majesty's sleeping chamber is the dressing-room, in which, on long, low shelves, her mantles, caps and shoes are laid. They make a curious picture—a study in black and white.

The payment of every fraudulent loss is a direct inducement to other fraudulent attempts. It is unquestionably true that a large part of the present excessive cost of fire insurance is due to increased losses from moral hazard. This increase is mostly due to indifference to doubtful claims on the part of insurance companies, and this indifference can be traced directly to poor treatment from the courts.—Boston Advertiser.

INSURANCE ITEMS.

The Montreal office of the Union Assurance Society has been removed from 55 St. Francois Xavier street, to the first floor of the new Bank of Toronto chambers, corner St. James and McGill streets.

At the monthly meeting of the directors of the London Mutual Insurance Company, on Friday, the board decided that owing to the increase of business it became necessary to appoint an agency inspector and general agent. The appointment will likely be made on June 1st.

The annual meeting of the Hamilton Board of Fire Underwriters has been held. There was a large attendance of members. The following officers were elected for the ensuing year: Robert Dunlop, president; J. M. Burns, vice-president; George A. Young, secretary-treasurer.

Mr. J. E. E. Diokson has been promoted assistant general manager for Canada, of the Union Assurance Company, with headquarters at Montreal. So says the St. John Record. Mr. G. D. D. Otty will succeed Mr. Dickson in charge of this agency.

At a meeting of the board of directors of the North British and Mercantile Insurance Company, held on 17th April, Mr. A. Gillies-Smith, in consequence of ill-health, resigned his appointment as manager, which resignation was accepted with great regret. The directors have unanimously appointed as his successor Mr. Philip R. D. Maclagan, who has for upwards of eleven years occupied the post of secretary to the company in Edinburgh.

BOOKS RECEIVED.

BEAUTIFUL JOE. — A story of a real dog, whose real name was "Beautiful Joe." * It

is skilfully and tenderly told. Evidently the purpose of the author [a Canadian lady] has been to do for dogs by this book what that wonderfully successful story entitled "Black Beauty," did for the horse. As Mr. Butterworth says, in his introduction: "The story speaks, not for the dog alone, but for the whole animal kingdom. Through it we enter the animal world, and are made to see as animals see, and to feel as animals feel. . . . Through it we learn to understand the language of those creatures that we have long been accustomed to call dumb." Quite evidently Lady Aberdeen perceives that in our treatment of the lower orders of creation-

Evil is wrought by want of thought As well as by want of heart,

for she says: "So much of the cruelty that we see daily practised amongst us arises from want of thought, that the circulation of a book like 'Beautiful Joe' must do vast good in leading the young especially to understand their pets and their needs better." The book is very attractive, in type and illustration, having photographs of the hero, and of other dogs and animals. And the story, sometimes exciting as it is and sometimes touching, indeed, in a most unusual way, is always fresh, natural and benign.

THE TEMPLE BUILDER.—A magazine of 100 pages, "devoted to Christian Work and Methods in all the World"; Canadian agency, Willard Tract Depository, Toronto. The associated work of Christians is evidently the aim of this publication. It contains many particulars of the International Christian conventions held since 1885 in various cities of the States, and reminds us that the ninth of these conventions will be held in the Massey Music Hall, Toronto, October 25th next.

ANSWERS TO ENQUIRERS.

W. H. G., Pittsburg, Penn., writes to ask: "What is to be understood by the Golden Dog of Quebec? Is it a thing or a story; a book or a tradition?" We reply that it is pretty nearly all four. Le Chien d'Or, which is French for the Golden Dog, is a piece of rough sculpture representing a dog gnawing a bone. This was placed, about 1748, over the door of the residence of an eminent Quebec merchant of that day named Philibert, with a legend in old French, which has been translated thus:

I am a dog who gnaws his bone, I sit and gnaw it all alone; The time is comivg, but is not yet, When I'll bite him by whom I'm bit.

Philibert had quarrelled with Bigot, who was the Intendant of the colony, ranking next to the Governor. Bigot, in return for putting this rhyme over his door, quartered troops upon him. Repentigny, the officer commanding these soldiers, insulted Philibert, who answered with a blow. The officer ran the merchant through the body, and then fled. Bigot got him pardoned, and he afterwards went to France. But Philibert's son, who was but 11 when his father was killed, went also to France. Become a man, he sought out his father's murderer, followed him to Pondicherry in the French Indies, and there killed him. This condensed story is related by Mr. Dawson in E. B. Biggar's Canada, a Memorial Volume, published in 1889. Mr. Kirby's novel, Le Chien d'Or, is a fine description of those lawless days in what is now the Province of Quebec.

—In the room of M. Moise Branchaud, who has resigned his membership in the corporation of La Banque du Peuple, M. Toussaint Prefontaine was last week admitted a member of the said corporation.

UNITED STATES PATENTS TO CANADIAN INVENTORS.

The following list of United States patents to Canadian inventors, granted May the 1st and 8th, 1894, is reported by James Sangster, patent attorney, Buffalo, N.Y.:

Leather-skiving machine, Napoleon Dufresne, Montreal, assignor of one-half to Robert White, same place.

Paper box, Arthur L. Reeves, Hamilton.

Paper-outting machine, Joseph Spencer, Cornwall.

Metal fence, George D. Hamilton, Innisfail. Attachment for shovels and spades, Thomas Walsh, Montreal.

CLEARING HOUSERE FUR NS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, 17th, compared with those of the previous week:—

| | May 17. | May 10. |
|----------|--------------|--------------|
| Montreal | \$11,373,500 | \$11,397,609 |
| Toronto | 5,730,330 | 5,933,622 |
| Halifax | 1,184,412 | 1,254,561 |
| Winnipeg | 778,042 | 837,572 |
| Hamilton | 667,124 | 703,374 |

Total \$19,733,408 \$20,126,738 Aggregate balances this week, \$2,432,029 last week, \$2,897,804.

-A suggestion was made the other day with respect to immigration into Canada which is worthy of some consideration by Canadians, especially in the present untoward state of affairs in the United States. Mr. A. W. Austin, manager of the Winnipeg Street Railway Company, on his return from a trip to England, was asked what he thought of prospects of immigration into Canada from the United Kingdom. His reply was: "For Manitoba and Canada the prospects not so good as for Africa or the States. Africa is the point, apparently, just at present. People in England have a rooted idea which they gather from pictures and Christmas cards and other trifles that Canada is an invariably cold country. I think our field for immigration lies to the south of us." The speaker went on to explain his view, which was that instead of our spending money in oringing over a few people from England, it would be vastly better to bring in from the States people who understand the Canadian climate, who have not far to come, and can, if satisfied, bring over numbers of their friends in a very short time-There are, we believe, a good number of people in the United States who could without much effort be made immigrants to Canada. Mr. James Anderson, superintendent of the Canadian exhibit at San Francisco, reports that a party of fifteen leaves San Francisco for our North-West, to be under the charge of Mr. Bouchier. Mr. Anderson has on his books names of 100 Californians who are desirous of settling in Canada.

—A firemen's tournament is to be held in St. John during the visit of Lord Aberdeen to that city in August. It is proposed to invite all firemen in the Maritime Provinces, Bangor, Portland, Lewiston, Augusta, and Montreal. The Montreal fire brigade, we understand, purposes going out to Waterloo, Que., on the Queen's Birthday, for a review. The Waterloo folk are busy getting up a gala programme, have engaged the Granby brass band, and will have races, sports and games.

^{* &}quot;Beautiful Joe," an autobiography, by Marshall Saunders, of Halifax, N.S., with introductory note by the Countess of Aberdeen, and introduction by the editor "The Youth's Companion." Toronto: Baptist Book Room, 1894. The Williamson Book Co., King Street West.

The statement of the Bank of Montreal for the year ended with April shows net earnings of \$1,313,289, or just about eleven per cent. on the capital. Thus, after paying a dividend of ten, there will be \$113,000 to carry to profit and loss. The bank must be considered to have done well, for the year was a difficult one in various respects, rates being low, conditions seriously disturbed, and business risky where it was not dull. Then the profits were reduced by a decrease of half a million in note circulation and a decline of nearly a million in deposits not drawing interest. Doubtless the transactions of the New York and Chicago agencies of the bank, while requiring to use the greatest discretion during the financial squeeze in the States last year, assisted in the profitable results recorded.

-The Dominion Bank authorities are to be congratulated on the fact that the earnings of that institution have within twenty-three years from the time of its foundingnot a long time in the history of a bankproved sufficient to build up a reserve equal to the paid capital, \$1,500,000 each. The Dominion Bank has been conspicuously well managed, and has had the advantage of a small capital in proportion to its deposits.

-The Sarnia Board of Trade.at a recent meeting, gave orders for the opening of correspondence with the C. P. R. with a view to having that company extend its track to Sarnia. A like instruction was given to ask the M. C. R. to extend to Petrolea. A concern in Kalamazoo, Mich., proposes to open a branch of its works in Sarnia on certain conditions, to make sleds and novelties. A long discussion took place on the question of reducing tolls on the Sarnia and Florence road.

...The Board of Trade of Levis, Que., held its annual meeting last week, on which occasion officers were elected as follows: President, E. Dupuis; vice-president, D. Laine; secretary, A. Lemieux. Committee: J. B. Michaud, Geo. Lambert, E. Dussault, A. Lambert, P. Robitaille, C. Darveau, Dr. Lacerte, E. Belleau, L. O. Audet, Dumontier, T. Arsenault, J. E. Mercier.

-We learn from last week's Fredericton Herald that Mr. Robert Inglis, agent at that place of the Bank of British North America, has been promoted to the charge of the London branch of that bank, and will be succeeded in Fredericton by Mr. J. Taylor.

Correspondence.

THE SPIRIT OF THE NEW COMMERCE.

Editor MONETARY TIMES:

SIR,-In the experience of a voyage around the world, now much more rapidly accomplished than formerly, one learns to appreciate the importance of maritime situation. not been the real estate infatuation that gives not been the real estate infatuation that gives life and hope to these Pacific shores, but their "maritime situation," the abundant fish, timber and resources, and a stupendous railway and steamship system. "Odd it is," said a west-bound traveller the other day, "to see so much development on the shores of the Atlantic and comparatively so little on the Pacific." But it is this want of development that is proving of the greatest importance to the Dominion. Were the trade at its decline the Dominion. Were the trade at its decline instead of in its infancy, the picture would not be so roseate. It reminds one of the saying of an old sea rover: "When you go west always keep in sight of the 180th degree"—by which I suppose he meant this was the limit, but it the sminds of the "phylloxera," have largely invasion of the "phylloxera," have largely the currant vine, and prices have been greatly depressed by the large surplus of the 1893 crop left on hand in consequence. The demand is, however, increasing in other directions, notice-

implies a good deal of salt water, and if I mistake not it was very much in sight of that meridian that Bret Harte's derelict kept sailing to and fro apparently without much of a rudder, or being bound to any particular haven.

It has been said that there is no other country like British Columbia, and consequently, it is easy for the traveller to determine his latitude and longitude by the sea green of the foundation walls of the buildings, or the vegetation which, even in midwinter, has a tentation which, even in midwinter, has a tendency to grow, or the snow on the mountains. One, however, sees names which are unmistakably British Columbian, and meets with object-lessons which plainly tell him that he is in the west coast province, where the civilization has a foreign look, where it is cosmopolitan, self-reliant, and independent, if such a word may be used in these days when man depends so much on man. But if he have any doubts, let him look out of his window down to the bay—to the wharf at Vancouver, whereat he may see the swan-like hull, and the curving boom of the steamer "Empress of India," which lies with steam up.

which lies with steam up.

Vancouver's significance rests in the fact that it is the terminal point of a great railway line and the initial point of a steamship line with the Orient, with "far Cathay." Here with the Orient, with "far Cathay." Here the traveller is confronted by those very factors which built up Halifax. St. John and Montreal. The railway we have, but the line of steamships must work out its own destiny. This, I contend, it will undoubtedly accomplish, since the line is established along the natural highways of trade, and represents the shortest distance between two points though shortest distance between two points, though we must remember,

"The straightest line that you may draw At best will bended be; The ship that sails the straightest course, Yet sails the convex sea."

A place read about and a place seen are entirely different; things seen are mightier than things heard. So he who looks up and down the inlet will see strange pictures of real life; the snarling tug wrestling with some giant nautical problem; the Siwash in his cockle-shell craft sailing under two or three yards of cotton; the barque from India; the ferry steamer from Victoria, and the Mother Burch boats ready for hire.

The people here appear to be contented, and as a rule prosperous, though all are complaining that times are dull. As times here, until a short time ago, were of the rushing order, it is, perhaps, not surprising to find the air filled with complaints. An extensive real estate dealer who did a large business during the lively times, complained that as fast as he made money it went into other property. This, I thought, is the trouble with all kinds of business everywhere. A man makes money in his proper business, and then he has to reinvest it in the ordinary course of business; a flat time ensues, his cash is locked up in the a flat time endues, in cash is locked up in the inaccessible rocks somewhere, and he has to go into the courts. It is a fitting tribute to the haste to get rich, though you will often find the so-called boomster of the West a man of generous instincts, only rarely cold-blooded, and although his passion for accumulating wealth is very great, he is oftener poor than rich, since his desire to amass too often overcomes his prudence and strands him "land poor," when public report sets him down a millionaire. millionaire.

TRANS-CONTINENTAL. Vancouver, B.C., April, 1894.

THE GREEK CURRANT CROP.

The estimated crop of currants in Gree last year was 170,000 tons, as against 122,583 tons in the previous year, and 127,570 in 1887. On the other hand, the French took for wineproducing purposes only 3,500 tons, as against 20,627 tons in 1892, an average of 40,000 tons in 1890 and 1891, and 70,401 tons in 1889. With the revival of the French vineyards, and the imposition of an increased duty on Greek currants, it is expected that the French demand will practically cease. This has been a severe blow to the Greek growers, who, under the stimulus of the French demand since the increase of the "phyllogene" have been a invasion of the "phylloxera," have largely

ably in the north of Europe and in South Meanwhile the depression of this branch of Greek trade, with the other embarrassments of Greece, has had an adverse effect on the import trade. "In consequence of the on the import trade. "In consequence of the great rise of (foreign) exchange and the high cost of bills on England," writes Mr. Consul Wood, "and owing also to the great commercial depression existing in this district, and in this country generally, the value of British goods imported to this port (Patras) by British consult direct only computed to \$128.665 (in vessels direct only amounted to £128,665 (in 1893), against £176,620 (in 1892), and £278,700 (in 1891). Unless some improvement takes place in the current trade, the importation of goods from foreign countries cannot increase, as the current is the principal staple produce of the country, and unless it can be sold at remunerative prices by the growers, it is natural that the consumption of foreign imported articles should decrease."— Grocers'

NOVA SCOTIA FISHERIES.

The following report for 1893 on District No. 3, comprising the counties of Kings, Annapolis, Digby, Yarmouth, Shelburne, Queen's and Lunenburg, by Inspector J. R. Kinney, we find in the Yarmouth *Times*, addressed to the Minister of Marine and Fisheries:

In submitting the customary annual fishery statistics, I beg to call your attention to the decrease in the value of the products, this shortage being attributable to the lessened take of cod, herring and mackerel; these three items when compared with the products of 1892, standing thus:

Cod short 38,932 cwt. Mackerel 10.240 hrls

This loss is to a considerable extent made good by the increased catch of lobsters, alewives and salmon; these items standing thus: Lobsters shipped alive.. increase 1,450 tons.

" preserved 55,138 cans. 4.971 brls. 28.187 lbs. Salmon

LORSTERS.

The increased take may be attributable to wo causes: first, the increased number of those employed in the industry; and secondly, the fishermen have learned the once popular idea that those fish were to be taken only in inshore waters, has been exploded, hence this branch of fishing is now largely conducted miles at sea.

The present fishery regulations are satisfactory, with, of course, the exceptional cases—one of which is, that in some localities where winter fishing cannot with any degree of success be carried on—the fishermen do not feel satisfied that others more favorably located shall reap the good results of the good prices obtained in the early part of the year.

ALEWIVES.

The aggregated take of this fish in the counties of Annapolis, Kings and Yarmouth has nearly doubled that of 1892.

MACKEREL AND THE COD FAMILY

showed a decided decrease, the autumn run of mackerel not making their appearance and the run of spring fish being a slim one.

SALMON.

Exhibit a phenomenally large run in King's county, but not at the mouths of the rivers. In this county the increased take was 200 per cent. over the catch of 1892. And in the county of Digby the increase was 300 per cent., whilst Shelburne exhibits a shortage. The take on the Clyde falls short about 50 per

HIGHWAY TRACTION.

There are now said to be more than 8,000 steam engines used for transport service on highways in Great Britain. The fact was stated by Lieut Col. Templer, at the Royal United Service Institution, some days ago, in a lecture advocating the use of steam transport for army purposes. He said that extensive experiments had shown that a train of wagons can, on the best roads, make but fifteen to twenty miles a day, while a traction engine can transport the same train sixty to seventy

miles a day and at a less cost. Horses sooner or later give out, but the engine can keep right on, day after day, under all circumstances. The 8,000 engines mentioned are, of course, used for a great variety of work, mainly about farms, besides simple transport. There are 22,000 miles of turnpike road in Great Britain.

A LABELLING MACHINE.

The Lightning Labelling Machine, invented by W. G. Trethewey, and perfected and patented by Messrs. Trethewey & Chamberlin, this city, has been taken over by Messrs. Robert Ward & Co., Victoria, as sole agents for its manufacture and sale throughout the world. This arrangement was completed yesterday, and Mr. Trethewey returned to the city to day with the papers signed and sealed. city to day with the papers signed and sealed. Messrs. Robert Ward & Co. have absolute control of the machine, and are bound by the agreement to push its sale in every country in the world where canning operations are extensively carried on. The patentees receive a minimum royalty of \$100 on each machine, and in countries where the cost of manufacture is cheaper than in British Columbia, the royalty will be considerably more.

The Lightning Labelling Machine was described in The Columbian some months ago. It labels all sizes of round cans, such as are used by salmon and fruit canners, at the rate of 60,000 cans per day, and does the work more perfectly and cleaner than by hand. As a labor saving device, it is one of the most important of modern inventions.—New Westminster Columbian, May 3rd.

THE BRIDGE AT BROCKVILLE.

A regularly advertised meeting of the Brockville and New York Bridge Co. was held Thursday afternoon at two o'clock, in the law office of Wood, Webster & Stewart. The principal business on hand was the election of a permanent board of directors, which resulted in the selection of the following gentlemen:—Col. W. H. Cole, D. Derbyshire, D. W. Downey, Geo. H. Weatherhead, W. B Smellie, Brockville, L. H. Howland and C. J. Pusey, Irondale. At a subsequent meeting of the board, Mr. Pusey was elected president, Col. Cole, vice-president; and L. H. Howland, Lawrence Railway Co., of New York, under the name of the Brockville and St. Lawrence Bridge Co. This agreement will be submitted bridge Co. This agreement will be submitted to a meeting of the shareholders, which will be held on May 17th, for confirmation. The St. Lawrence Co. will hold their meeting at New York city early next week, when the agreement will be submitted to their shareholders. At that meeting the permanent board of the New York Co. will be named.— Brockville Recorder.

MONEY WORN BY CIRCULATION.

A number of patriotic sons of Erin were seated around a table one night discussing a little of everything, when one of them began a lamentation over a lightweight silver dollar he had.

"Th' hid an th' tail's worn down that foine ye wouldn't know th' hid from th' tail if it wasn't that th' hid's always on th' other

"Got worn by cirkylation?"

"So they say, but Oi belave some smarr-rt divil's tuk a jack plane and soraped a doime or two off her for luck. Cirkylation can't wear a dollar down loike that."

"It can, too, and Oi'll prove it," said a third. "Have ye got a good dollar, Dinny?"

Dinny, curiously enough, had one and produced it.

"Now pass it around the table."
Around it went.
"Twicet more."

Twice more it went around.

Wance more, and let me hov it."

Once again it circulated, and finally it rested in the palm of the instigator of the performance. He then leaned over to the owner of the dollar and handed him a silver quarter.

Phwat's this?" asked the latter.

"That's yer dollar, Dinny."—Exchange.

AN APT COMPARISON.

When a New York daily journalist is hard pressed for inspiration wherewith to grind out a column of manuscript, he straightway hunts up the only and incomparable Chauncey M. Depew. The great railroad man thereupon Depew. The great railroad man thereupon puckers his brow an instant, and then dictates what the night police reporter denominates "hot stuff." We append a brief extract from a recent interview. It is excellent, as is everything emanating from Mr. Depew:

There is a slow improvement apparent in "There is a slow improvement apparent in the general business situation, but it is spasmodic. There will be a general resumption in some one industry for a brief period, and then a discouraging falling off again. The process seems to be a repetition of that of a man climbing up three steps and falling back two, the only encouragement being that after each effort he is at least one step ahead, however much the loss of the two may try his temper and patience. The railways reflect these un-natural conditions in their earnings. They vary more largely one day with another and one week with another than ever before."

AMATEUR FIRE UNDERWRITING.

Experience is a stern teacher, although there are many who reject every other pro-cess of instruction. The N. Y. Journal says: This sentiment is exemplified in the prevailing infatuation to engage in fire underwriting by those wholly ignorant of the intricacies and hazard of the undertaking; and who per-ceive no discouragement from the heavy losses that have characterized the profession for the past three years, and which defied every device of the most experienced underwriters to modify or surmount. As a warning, however, to the more susceptible, an extract from the *Investor* of Los Angeles, Cal. gives the result of an undertaking of this description, called the Southern Californian Insurance Company, which, although organized by a group of gentlemen of commercial ability and wealth, has retired from a field that appeared so prosperous to the imagination, with a heavy loss to the stockholders. We anticipate no more successful course nor less disastrons death will attend numerous American Lloyds. Our contemporary says:-

A LESSON IN FIRE INSURANCE.

The report of the meeting of the defunct Southern California Insurance Company, which is given in another column, furnishes an instructive object lesson to those people, and they are neither few nor are they regarded as short-sighted, who have at various times clamored for insuring in home companies on the ground of keeping all the money at home, much stress being laid on the large amount of gold that is sent away in premiums and the comparatively small amount which returns in the shape of payments for the losses incurred. In 1885 this feeling was very strong in Los

tion, but although they were good business men they were amateurs in fire insurance, and the company, prosperous enough at the start, soon began to lose ground. It was found that, although the money paid for premiums was kept in circulation at home, yet when the time came to pay losses the funds to pay them had to be forthcoming also from home sources, and the belong of the beautiful to be companied. and the balance of trade became unprofitable, resulting ultimately in the turning over of the business to the London & Lancashire, and the payment to them of a handsome bonus for re-insurance. In addition, the eight directors afterwards had the felicity of each contributing \$3,000 towards the deficiency fund, and they or their estates may be considered fortu-nate if a realization of the company's assets results in re-imbursing them for this last out-

—Not long ago, another hundred English lads on their way from the Fegan Homes, London, England, to various Ontario farms, were received in the Wm. Gooderham Distributing House, George street, Toronto, where they were welcomed by a group of ladies and gentlemen, Mr. H. P. Dwight being in the chair. How those fresh colored lads did sing and cheer those fresh-colored lads did sing and cheer—how civil they were when any one spoke to them—how prompt to obey orders, showing the value of the discipline they had undergone. There is good stuff in them, and they only need the chance to work out a future which this agency gives each of them. In the report of his work which Mr. Brace, the superintendent, read that night, he told of receiving an appli-cation for a lad from a farmer near Aurora, Ont., who turned out to be one of Mr. Fegan's old boys, who "thad married a widow with a farm and a nice little family, all to hand." Another of the lads who had passed through Mr. Brace's hands in former years, has recently bought a farm of 100 acres some thirty miles from Toronto, subject to a mortgage of \$1.100 at five per cent. He writes gratefully \$1,100 at five per cent. He writes gratefully Brace, and adds: "I have a team of to Mr. Brace, and adds: "I have a team of horses, Sir, a good stove and some furniture, a log house and a good barn, and near enough seed for this year. And I have sent for my mother to come out, Sir, and she will be here in a month." Better this than to roam the slums of London and become a criminal.

The old Logan residence, on Ramsay street, in this town, is being pulled down. This is another old landmark gone. The timbers are mostly of black walnut, and some of white oak and ash, and are as sound as when put up, possibly 75 or 80 years ago, at the time of the 1812 war. In fact nobody remembers when, for the "oldest inhabitant" only remembers it as an old house. Frank Salmoni found an old Spanish silver coin dated 1780, under the floor, during the demolition of the building. It is whispered around that there is a barrel of them buried around there, and Frank is keeping his weather eye open. The timbers, which are 12 x 6 inches, hewed, will be used in the waterworks dock.—Amherstburg Echo.

This is the description given by a French insurance journal, L'Argus, of the way they prevent panics in burning buildings in Russia. In the theatre of Homel, in that country, fire recently broke out at about nine o'clock in the evening just as the representation of the second act of a play was beginning. The scenery at the back of the stage took fire, and it spread rapidly. The moment the police officer on duty saw signs of a panic among the audience, he stepped forward to the footlights, a revolver in his hand, and, addressing the spectators, said: "If I see anyone acting in a way to create disorder, I will shoot him dead." His calmness and resolution had the desired effect. All the people left the house quietly. Not a person lost his life, or was injured. The theatre was burned to the ground

"I think the law has been broken, although personally you may have had no knowledge of it," was what the Police Magistrate said last week to Mr. John A. McGillivray, supreme secretary of the I.O.O.F., after the evidence had been taken on the charge of In 1885 this feeling was very strong in Los Angeles, and the above named corporation was formed, with a capital stock of \$200,000, all paid up, and backed by many of the wealthiest and best business men in this section proceed against. HOW MONEY GROWS AT INTEREST.

More than sixty years ago City Marshall Badlam, of Boston, arrested one William Doyle and found on the person of the latter a deposit book on the Provident Institution for Savings, showing that Doyle had deposited there \$60. The city marshall took possession of the book. Doyle served his sentence, and on leaving prison was lost to sight. In 1824, it appears, Doyle died in Charleston, leaving, so far as known, no relatives or widow. In 1887 the bank book was found by a descendant of City Marshall Badlam and turned over to a or City Marshall Badiam and curried over to a public administrator, who, on November 30th, 1887, filed a petition setting up the fact that Doyle had died in 1824; that he had left no widow or next of kin so far as known, and askwidow or next of kin so far as known, and asking that his estate be administered upon. Appraisers were appointed, and they filed an inventory showing that the \$60 deposit, by the addition of interest alone, had amounted on January 6th, 1892, to \$2,068. The customary legal notices were inserted in the papers calling upon Doyle's heirs to come into court, and, as none appeared last week the Probate Court of none appeared, last week the Probate Court of Suffolk County entered a decree by which the sum on deposit, which now amounts to about \$2,100, will go to the Commonwealth.—Boston Transcript.

VIBRATIONS OF TALL BUILDINGS.—During the recent heavy gales in Chicago, says The Scientific American, March 17, when the wind attained a velocity as high as 84 miles an hour, observations were taken on the vibration of two tall office buildings—the Monadnock, 182 feet high, and the Pontiac, 175. A plumbob suspended from the 16th floor of the former and hanging down to the second floor traced a and hanging down to the second floor traced a circle just one half inch in diameter in one case, and in another an ellipse seven-sixteenths by three-eighths of an inch. Observations with a transit showed a vibration of one-fourth to one-half inch. The results in the other building were comparable in magnitude to these.

Commercial.

MONTREAL MARKETS.

MONTREAL, May 16th, 1894

Ashes. — Receipts are falling off. The steamer "Laurentian" took out 40 brls. to Liverpool, on Saturday, and some smaller lots went to London and the United States. First quality pots are quoted at \$4.10 to 4.15; seconds, \$3.65; pearls weaker and nominal at about \$5.30.

CEMENTS, FIREBRICKS, ETC.—A fair quantity of Belgian cement is now on the wharf, and of Belgian cement is now on the wharf, and has been offered in 1,000 brl. lots by some importers at \$1.70; the range is from \$1.70 to 1.90; English, \$2 to 2.10. Bricks, \$15.50 to 20. Drain pipes, which have been much cut in price the last couple of years, are much firmer, an understanding having been arrived at between all the leading importers and domestic manufacturers.

DAIRY PRODUCTS .- The volume of trade is limited. Receipts of new cheese are as yet moderate. Prices are firm in England, and all that is coming in is being s-nt forward. We quote 103 to 11c. per lb. There is good grass in the country, and receipts of new butgrass in the country, and receipts of hew dotter are increasing; prices are earler. We quote creamery 20 to 21c; Townships dairy, 19 to 20c.; Western, 17 to 18c. per |b. Eggs, 10½ to 11c. per dozen and sufficiently plentiful.

DRY Goods.—Wholesale trade has been quiet during the past week, and travelling salesmen

report it not an easy matter to sell goods. Particularly is this true in Western Ontario, where, owing to the open winter, many retailers were left with heavy stocks of goods this spring. With regard to values of textiles we learn of nothing new.

STORES CONTRACTS

Tenders are invited for stores of various kinds required by the company at Montreal, London, Hamilton, Portland and other places during the twelve months commencing July 1st, 1594.

Forms of tender, with full particulars, can be had on application to JOHN TAYLOR, General Etorekeeper, Montreal.

Tenders endorsed "Tender for Stores" and addressed to the under igned, will be received on or before Thursday, May 31 t.

GROCERIES .- The extent of business being done is not up to expectations, or the average done is not up to expectations, or the average of what it should be at this season, and country dealers generally seem to be confining their orders to immediate wants. The Japan tea market opened rather weak as compared with last year; but a cable received here Monday announced an advance of \$2 to 3 the picul. A few small parcels of fancy new teas have come to hand, but nothing of consequence has yet come forward. Samples of teas nave come to hand, but nothing of consequence has yet come forward. Samples of teas grading at about 22c. will likely be fairly plentiful about the first of June. Granulated sugar remains at 4½c. per lb. at the refinery, this figure being held pretty stiffly. Low grade yellows are available at 3½c. A scarcity of medium grades still exists, but several carges of raws have now arrived and this short goes of raws have now arrived, and this shortgoes of raws have now arrived, and this shortness will doubtless soon be remedied. Molasses is easier, and is being jobbed at 29 to 30c., though supplies near at hand will cost over 30c. laid down; prices are, however, lower on the island. The rice milling people are very non-committal, and will sell only small lots in the meantime. Canned goods remain very flat; a little salmon is selling in the country stal 30 to \$140. lobsters range from \$6 to \$8 at \$1.30 to \$1.40; lobsters range from \$6 to \$8 the case.

HIDES, &c.-Green hides are coming pretty freely, but do not show much improvement in quality, being still grubby. Prices are rather steadier, and some dealers profess to be getting steader, and some dealers protess to be getting 4c. per lb. from tanners now pretty generally for No. 1 inspected, which are bought at 34c. Calfakins easy at 5c., and no demand; lamb-skins 15 to 20c., and sheepskins 75 to 85c. each. Tallow is rather easier in price, and moves slowly.

LEATHER.—Shoe manufacturers generally report that orders are coming in quite slowly as yet; the Quebec trade is also reported quiet, and as a consequence little leather is selling. Values tend to easiness, and the making of prices largely rests with the buyer. Splits, prices largely rests with the buyer. Splits, aggregating several tons, are being shipped to England this week from this port, also some fair lots of buff from Quebec. It has apparently been decided to fix the duty on upper leather, which had been reduced from 20 to 15 per cent. leather, which had been reduced from 20 to 15 per cent., at 17½ per cent. We quote:—Spanish sole B. A. No. 1, 19 to 21c.; do. No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 18 to 19c.; No. 2, 16 to 17c.; No. 1, slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; British oak sole, none here; waxed upper, light and medium, 24 to 26c.; ditto, heavy, 20 to 24c., grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 15c.; do., small, 10 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebbled cow, 12½ to 18½c.; russet sheepskin linings, 30 to 40c.; har uisn, 19 to 21c.; colored pebbled cow, 12½ to 13½c.; russet sheepskin linings, 80 to 40c.; har ness, 18 to 25c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 11c.; rough, 16 to 18c.; russet and bridle. 40 to 50c.

METALS AND HARDWARE .- Prices of iron are easier in Britain. Warrants are now quoted at 41s. 8d., and late cables quote Summerlee a shilling easier, and other brands 3d. to 6d. lower. Apart from a few sales of No. 1 Siemens at \$16.75, we hear of little business locally. Other lines are also dull and weak. Canada plates have sold in moderate quantity at \$2.25, which figure may now be given as a quotation. Black sheet iron, No. 26 gauge, has also sold at the same figure. A little more interest is shown in ingot tin, but other metals are dull. We

quote:—Coltness pig iron, \$20; Calder, No. 1, \$19.00; Calder, No. 3, \$18.00; Summer-lee, \$19 to 19.50; Eglinton, \$18.25; Gartsherrie, \$19.00; Langloan, \$20; Carnbroe, \$18.00; Shotts, none here; Middlesboro, Signature of the collection of the coll sherne, \$19.00; Langloan, \$20; Carnoroe, \$18.00; Shotts, none here; Middlesboro, No. 3, none here; Siemens' pig No. 1, \$16.50 to 17.00; Ferrona, No. 1, \$16.50 to \$17.00; machinery sorap, \$14.00 to 15.00; common do., \$8 to \$11; bar [iron, Canadian, \$1.75; British, \$2.25; best refined, \$2.40; Low Moor, \$5.25; Canada Plates—Blains, or Garth, \$2.25; all polished Canadas, \$3; Terne roofing plate, 20 x 28, \$7 to 7.25. Black sheet iron No. 28, \$2.40; No. 26, \$2.25; No. 24, \$2.25; tin plates—Bradley charcoal, \$5.25 to 5.50; charcoal I. C., \$3.50 to 3.75; P.D. Crown, \$4; do. I.X., \$4.75 to to 3.75; P.D. Crown, \$4; do. I.X., \$4.75 to 5; coke I. C., \$3.00 to 3.25; coke wasters, \$3.00; galvanized sheets, No. 28, ordinary brands, 4½ to 4½c.; Morewood, 5½ to 6c.; tinned sheets, coke, No. 24, 6 to 6½c.; No. 26. 61 to 620.; the usual extra for large sizes. Hoops and bands, per 100 lbs., \$2.30 to 2.35. Steel boiler plate, 1-quarter inch and upwards, \$2.00; ditto, 3-sixteenths inch, \$2.60; common tank iron, \$1.65 to \$1.85; heads, \$3.00 to 3.25; tank iron, \$1.65 to \$1.85; heads, \$3.00 to 3.25; Russian sheet iron, 10½ to 11c.; lead per 100 lbs., pig, \$2.75; sheet, \$4 to 4.25; shot, \$6 to 6.50; best cast steel, 10½ to 12c.; spring, \$2.50; tire, \$2.50 to 2.75; sleigh shoe, \$2.40, round machinery steel, \$3; ingot tin, 18 to 20c.; bar tin, 25c.; ingot copper, 9½ to 10½c.; sheet zinc, \$5.00 to \$5.25; spelter, \$4.50 to \$4.75; American do., \$4.50 to \$4.75. Antimony 10½ to 12c.; bright iron wires Nos. 0 to 8, \$2.65 per 100 lbs.; annealed do., \$2.70; galvanized, \$3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples 3½c. Coil chain, ½ inch, 5c.; ½ in., 4½c.; 7.16 in., 4½c.; ½ in., 3½ to 4c.; ½ in., ½c.; ½ in. 3½c.; ½ in. and upwards, 3c.

OILS, PAINTS AND GLASS .- Linseed oil continues to be sold at 53 to 54c. per gallon for raw, and 56 to 57c. for boiled, though the market in England within the last ten days has stiffened equal to an advance of 1½c. laid down here. Turpentine easy at former quotations. A little machinery clive oil, from which the duty of 20% has been removed, is which the duty of 20% has been removed, is available at about 90c. per gallon. Leads, glass, &c., show no change in price. We quote:—Turpentine, 45c. per gallon for single barrels: two to four barrels, 44c. Linseed oil, raw, 54c. per gallon; boiled 57c.; 5 barrel-lots 1c. less; olive oil, machinery, 90c.; castor, in cases, 6½ to 7c.: tins, 7½c.; Nfld. cod, 40c.per gallon; Gaspe oil, 38c. per gallon;

steam refined seal, 46 to 47c. in small lots. steam refined seal, 46 to 470. In small lots. Leads (chemically pure and first-class brands only), \$4.50 to 5.00; No. 1, \$4.50; No. 2, \$4.25; No. 3, \$4.00; dry white lead, 50.; genuine red do., 4\forall o.; No. 1 red lead, 40.; putty, 20. in bladders per brl. London washed whiting, 500.; Paris white 90c. to \$1; Venetian red,

FIR.—Regarding Church's Potato Bug Finish which I purchased from you last season, I can fully endorse all you say regarding it. My potato crop was threatened with destruction by the potato bug. I gave the plants one dose. It made the plants stronger, potatoes better, and the one application which r. mained on the plants for weeks was all that was necessary. I have recomnended your Bug Finish to many of my brother farmers, and although I have used raris Green and London Purple, Church's Bug Finish excels all.

Also similar testimonials from Albert J. Howell, John H. Bond, D. Ballingal, Albert Peel, Myron Ames, J. E. Ausebrock, Titus Peart, and Edward Burrill.

Paris. Ont. April 19, 1894.

TO THE PUBLIC:

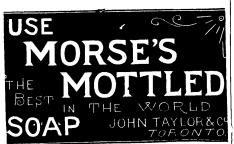

Paris, Ont , April 19, 1894.

I am acquaint d with the parties giving the foregoing testimonials relative to Church's Potato Bug Finish, and have seen the original testimonials, and I believe them to be worthy of confidence as they are made by practical farmers residing in this locality.

Wool.-Wool dealers still report very little doing and many of the mills running only in a spasmodic sort of fashion. London prices are reported keeping fairly steady. Cape is quoted at 13½ to 15½c.; greasy Australian, 16 to 18c.; B.A. scoured, 28 to 33c.; pulled, unassorted, 20 to 22c.; fleece, 17 to 19c. per lb.

TORONTO MARKETS.

TORONTO, May 17th, 1894.

Toronto, May 17th, 1894.

Drugs.—Business is quiet, being affected to a not inconsiderable extent by uncertainty as to tariff changes both in Canada and the United States. Prices for opium remain strong; mercurials are advancing; there is no change in quinine; new cod liver oil is firm, but some lots of old are selling cheap. Carbolic acids (both crude and crystal) are in active demand. The following are all lower: Oils of bergamot and of lemon; oils of sassafras and wintergreen. Most heavy chemicals are cheap.

Dry Goods.—We have found but little of

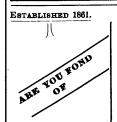

DRY GOODS.—We have found but little of any consequence to report this week, as the movement in the various lines of dry goods has been unexpectedly quiet. Grey flannel is 10 per cent. lower at the mills. There is a noderately steady enquiry for some kinds of spring goods, but the colder weather of the past few days has not been without an immediate effect on this branch of the business, and in consequence, unexpected dulness prevails, A slight improvement in payments is reported.

Fish.—Owing to large supplies of sea salmon prices are lower. Fresh fish is coming in freely, but white fish and trout from Lake Ontario are not so plentiful.

FLOUR AND MEAL.—Scarcely anything has been doing during the week. A few small lots of straight roller have sold at \$1.22 per bag; the same grade was offered in barrels at \$2.70 without selling. Bran is weaker, and yesterday was quoted at the mills at \$16 per ton for bran and \$17 for shorts. Oatmeal is unchanged, with a few sales at \$4.20 and of granulated at \$4.50.

GROCERIES.—Only a moderate movement has been going on during the week. The enquiry for sugar has slackened somewhat. A quiry for sugar has slackened somewhat. A fair enquiry exists for medium and low grades of teas, especially Japan and Indian of teas, especially Japan and Indian teas. Coffees are quiet and unchanged. Valencia raisins are rather scarce and prices are firm with an advancing tendency. The best prunes are firm. Little demand just now for fancy fruit. The Canadian Packers' Association has advanced the price of canned corn 2½c., and all lines of canned goods are firmer; tomatoes and corn are in short supply. Payments are not altogether satisfactory.

Grain.—In wheat the influences have all been depressing, and reports point to large production in the chief wheat-growing countries of the world. Wheat has been especially dull here the last few days. At the close yesterday some red and white lying west sold at

| • | | |

84,000 bushels. The quantity of wheat in sight at 16th May, 1892, was 35,411,000, and the total of the five grains 44,340,000 bushels.

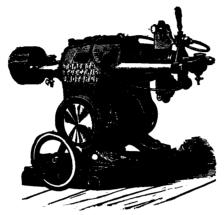

IRON AND HARDWARE .- Business continues moderately good, and prices are practically unchanged in all important lines. There is a tendency towards greater ease in lead; rope is firmer. Payments are improving.

HIDES AND SKINS .- Trade has been quiet all the week. Green hides are in ample supply at unchanged prices; cured are slow, choice offered at 3\frac{3}{2}c. Green calfskins are more plentiful; No. 1 is quoted at 70c.; No. 2 at 40 and 50c., and culls at 15 and 20c. Sheepskins are unaltered at 90c. for choice green, and dry as low as 60c. Lambskins are easy at 15 and 20c. each.

LEATHER.—There is little change of consequence; a fair amount of export business to

England is fortunately in progress, but otherwise trade is below expectations and much below what was doing at the corresponding period of last year. Prices keep firm, stocks as a rule are low, and a revival of business is considered imminent by those likely to be best

LIVE STOCK.—This week the import trade has displayed more activity, and though prices are low, a fair amount of buying is in progress; at the western cattle market shipping cattle bring from \$3.75 to 4.40 per cwt.; but the latter quotation is so far an exceptional figure. Butcher's cattle are in steady demand at from 3 to 3½c. per pound, with inferior stock as low as 2½c., and the market overstocked with second-rate and common cattle. Good grain-fed yearlings are wanted at from 4c. to 44c. per pound; spring lambs not much enquired for, but selling at from \$3 to \$4.50 each. Good calves are wanted. Hogs are also wanted at \$5 per cwt. as an outside price.

TORONTO ELECTRIC MOTOR CO.

MANUFACTURERS OF

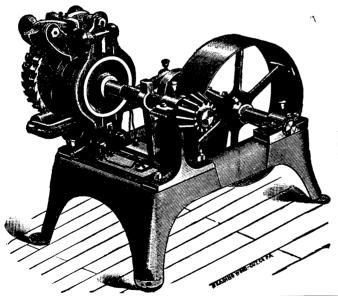

Dynamos AND Motors.

ARC LAMPS FOR INCANDESCENT CURRENT. REPAIRING A SPECIALTY.

107 Adelaide St. West, Toronto.

MONTREAL ELECTRIC CO.

Agents for Province Quebec, 302 St. James St., MONTREAL

ELECTRIC

WATER WHEEL GOVERNOR

Variations in speed de-tected by fast running, sensitive Governor Balls. Gate movement instantly set in operation by elec tric current. Quick and powerful action.

Thirty days trial. Write for particulars.

PAINTS AND OILS .- Business is keeping up well, and payments just now are comparatively weil, and payments just now are comparatively good. There is nothing particular to report this week. Linseed oil is quoted at 55 and 58c. per gallon; turpentine at 43c., net, and white lead at \$4.75. Other prices are steady and unchanged.

unchanged.

Provisions.—There has been a fair average movement of both dairy and hog products. Butter has been in ample supply at rather easier figures for all grades; on the street pound rolls sold slowly at 18 to 20c. Cheese is steady at 11c. for new, and 11½ to 12c. for small lots of the fall make. Eggs have been more than plentiful, but the packing demand has maintained prices. Offerings of pork have been small; prices are steady, with a little trading in small lots. Bacon keeps firm, and better prices are expected; scarcely any movement in trade lots. Hams are steady and unchanged. Lard is selling well at last week's figures.

WOOL.—There has been rather more demand, but prices are low. Some large sales of the last crop are stated to have been made on private terms. Pulled is weak, extra is quoted at 20 and 22c., super at 17c., with sales made at this figure. There is nothing doing in

FARNWORTH & JARDINE'S WOOD CIRCULAR.

Under date Liverpool, 1st May, 1894, Farnworth & Jardine, importers of wood, say: "The arrivals from British North America "The arrivals from British North America during the past month have been one vessel, 770 tons, against one vessel, 1,293 tons, during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1892, 1893 and 1894 has been 57,066, 41,874 and 43,537 tons respectively. Business during the month has been of a slow dragging nature, with little prospect of improvement; the consumption has not been on as large a scale as could be desired; prices generally rule low, leaving little margin for shippers and importers, and stocks of many articles are too heavy

shippers and importers, and stocks of many articles are too heavy.

"CANADIAN WOODS.— Of waney and square pine the deliveries have been very small; values are practically unchanged, and stocks, though not heavy, are sufficient for the limited demand. Red Pine.—The demand is almost nominal, the stock is light, but quite sufficient. Oak.—The deliveries have been on a very small scale; values have a downward tendency, and the stock is excessive. Ash moves off very slowly, prices are somewhat lower, and the stock is heavy compared with recent previous years. Elm has been in somewhat better the stock is heavy compared with recent previous years. Elm has been in somewhat better request; prices are steady and the stock light. Pine Deals.—The deliveries have been about the same as last year; values have been fairly maintained; several sales have been made for shipment, and the stock has been reduced to a more moderate compass.

more moderate compass.

"New Brunswick and Nova Scotia Spruce
and Pine Deals.—Of spruce deals only 350
standards have arrived; the deliveries have
been 3,888 standards, which compare favorably with recent previous years, and stocks are moderate; considerable contract sales have been made round the coast, which have strengthened the hands of shippers, but prices

locally do not show any improvement. In pine deals little has been doing, and stocks are

light. "Birch.—There has been no import of logs or planks during the month; the deliveries have been unsatisfactory; prices continue very

in the been disastisticated by the con-low, and stocks are very excessive.

"UNITED STATES OAK.—The import of logs and planks has been on a large scale; the consumption has not kept pace with it; sales have been difficult, most of them at very low prices, and stocks are far in excess of the require-

ments of the trade.
"PITCH PINE.—The arrivals during the past month have been 6 vessels, 5,150 tons, against 8 vessels, 6,255 tons, during the like time last year. The consumption of both hewn and sawn has been on a limited scale, and stocks of both are far too heavy. Only one auction sale has taken place, but buyers' ideas were so low that the entire cargo (a cargo of Apalachicola hewn) was withdrawn, and is still on the mar-ket unsold. Prospects are far from encour-aging, and the import for months to come must be on a small scale before any improve-

must be on a small scale before any improvement can possibly take place.

"SEQUOIA (CALIFORNIAN REDWOOD).—There has been no import; the demand continues very limited, but the bulk of the stock previously in first hands has been disposed of to local dealers at very low prices. The stock is very heavy, and there is nothing in the state of the market to induce further imports for a long time to come

of the market to induce further imports for a long time to come.

"OREGON AND BRITISH COLUMBIAN PINE.—
There have been no arrivals, and the stock is quite ample for the limited demand.

"United States staves have again been imported on a large scale; the demand does not imported took are heavy and values have

improve, stocks are heavy, and values have slightly declined:

"BALTIC AND EUROPEAN WOODS.— The arrivals during the past month have been 33 vessels, 17,840 tons, against 32 vessels, 18,667 tons, during the like time last year. Fir Timber has arrived more freely, all on timber merhants, economic the approximation has been ber has arrived more freely, all on timber merchants' account; the consumption has been very small; the stock is also in a very moderate compass. Red and White Deals have arrived very sparingly; the deliveries have been on a moderate scale, but prices are steady, and the import is in a fairly healthy condition, stocks being much lighter than in previous recent years. Flooring Boards.—The arrivals, chiefly on contract, have been very excessive, the result being anxiety on the part of importers to force sales ex quay; this has depressed the market, and prices have had a downward tendency; stocks are now excessive. Masts and dency; stocks are now excessive. Masts and Spars.—The demand is only limited, and stocks Masts and are entirely in dealers' hands."

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as o residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the short at single premium endowment.

Agents wanted in unrepresented districts. Application may be made to the Head Office, Winnipeg, or to

HEAD OFFICE : TORONTO. GEORGE GOODERHAM

HINTS TO LIFE AGENTS ABOUT ARGUMENTS TO USE.

If there is any one business more than an other which requires those who pursue it "to be all things to all men," it is that of life insurance, but under no circumstances is it necessary or advisable for the agent to present anything but the facts, plain and simple, not distorted nor magnified. It is not possible therefore to print any infallible rules which should be followed in every case, and which are guaranteed to prove successful. I well remember that when I first began soliciting, my success was somewhat phenomenal, my acquaintance being large; and on a visit to the home office of the company one of the officials asked me how I managed, being new in the business, to send them so many appli-cations; and said, "now go to work and try to insure me, so that I may see how you do it.' My reply was that I had no stereotyped story I told, but that my endeavor was to interest every man, and in so doing, I found it neces-sary to know my man and approach him on his soft side.

There are, however, certain general arguments of universal application that the agent must present during his canvassing, and it is only necessary for him to select the proper ones to use at the proper time. The rich man needs a different reason for insuring from that which would obtain with the man of moderate means, while the young man with-out a family would not be controlled by considerations which would influence the husband and father. Carefully select, therefore, the

arguments as they are needed. The one great and controlling reason why every man should insure his life is that it has a marketable money value measured by its earnings, and is therefore a proper subject for insurance. It is this dollar-and-cent view of the question that it is necessary in many or the question that it is necessary in many cases to present. Upon the capacity of this life to produce an income depends the support of the family, and upon the ceasing of that life the income is cut off. Upon the capacity of the life to produce money depends the enlargement of the wealth of the capitalist, and mone the ceasing of that life the growth and upon the ceasing of that life, the growth of the estate ceases. The life is in fact the dynamo that keeps the productive machinery in motion, and as everything depends upon its duration it is as essentially a matter of insur ance as is the house, the stock of goods, the factory, which are, as a matter of fact, only the products of the earnings of the life, and which if destroyed may be restored again by the future earnings, or the accumulated earnings, of the same life. Having thus established the fact that the money value of the life is a proper matter for insurance, it is best to show how uncertain as to continuance this value may be. Of all the subjects coming within the scope of insurance none other is of such uncertain duration. Not the house which may never burn, not the ship that may cross and re-cross the ocean, and finally decay, nothing but has a stronger title than the life, held by a little thread, yet of so much greater value than all the other possessions. It is only a short ride from the happy home, full of dependent loved ones, to the cemetery where all power to shelter them ends; and the time is not remote, may be almost present, when this journey must be made. Life insurance is

A DESERVED PUNISHMENT.

the only perfectly certain way to protect the family.—H. S. M. in the Monitor.

An instance where a debtor was arrested and imprisoned down in Miramichi the other and imprisoned down in miramion the other day for a rascally attempt to beat his credi-tors and to cheat the whole country side by means of "green goods," deserves to be made widely known. Happily the law permits, in exceptional cases, an order for the arrest and imprisonment of a debtor. One of these was heard on a summons returnable before His Honor Judge Wilkinson, at Chatham, N.B., early in May. It was predicated on a judg-ment in the Gloucester County Court obtained by the Merchants' Bank of Halifax against Richard Peters, of Canobie, in that county, for \$372.28 on September 29, 1892. The grounds were that the debtor had since the commencement of the suit the means to pay the whole or part, and had refused or neglected to pay, and that he had divested himself directly or indirectly of the said means to pay

with intent to defraud the plaintiff in obtain-

ing satisfaction of his judgment.

The facts disclosed at the hearing were of a very unusual and extraordinary character, says the Chatham Advance, and were proved by the statements and admissions lately made by the statements and admissions lately made by the defendant himself. These were con-tained in the testimony of Peters taken under oath before John E. O'Brien, Esq., a magis-trate of Bathurst, on 10th April last, and which was attested by Geo. Gilbert, Esq., at the Judge's chambers last week, as having been taken down in his presence. Peters is the man who went to New York with \$500 to purchase \$7,000 in "green goods," and was swindled. swindled.

The Judge, having heard the evidence and the necessary preliminary proofs, read the section of the act to the defendant and said it was quite impossible for him to say that Peters had not had means from which he could have paid the whole or some part of the judgment. Among other money he had was \$100 received from Mr. Ryan and others in 1893, and a few weeks later \$400 received from an insurance policy—the result of a fire—which happened in time to enable him to take this \$400, to-gether with the \$100, to New York to negotiate with a lot of sharpers in an impudent, barefaced transaction of fraud—the purchase of what is called green goods—by which he expected to get \$7,000 of frandulent counterfeits for his \$500, \$7,000 or franculent counterfells for his \$500, to enable him to deceive, and cheat, and rob simple, confiding people. But, fortunately, he himself became the victim, his conduct being as despicable and dishonest as that of the sharpers themselves. They had played on his credulity and criminal intentions and dishonesty, and had cheated him out of \$500. But it was his intention to cheat and defraud honest peo-ple out of \$7,000, could his nefarious intention have been carried out.

Fortunately for the accused, the judge said this barefaced outrageous matter did not come before him in its criminal aspect, as a crime, but it was impossible not to say that this \$500 that he had so foolishly thrown away could not have been applied in payment or part payment of this judgment, and in his [the judge's] judgment it should have been. The evidence judgment it should have been. The evidence had satisfied him that, said his Lordship, the defendant had divested himself of this and other property with intention to defraud the plaintiff in obtaining satisfaction of his judgment, and, therefore, he made order that the defendant should be imprisoned in the Glou-cester county gaol for six months without bail.

A BOOK ON AMERICAN RAILWAYS.

In the May issue of the always welcome Annals of the American Academy is a review by Dr. Emory R. Johnson of "Addresses Delivered before the World's Railway Commerce Congress, beld in Chicago, Ill., June 19-23, 1893." Official report. Pp. 265. Chicago: The Railway Age and Northwestern Railwaydage 1803 Railroader, 1893.

"It would be hard to conceive a more useful book for students of transportation than the work by Mr. Van Oss. The author is an Englishman who set about to study the American railway as a whole, and our several systems of railroads in detail, in order that he might tell American, and, especially, English investors just what sort of an enterprise American railroading is. The first hundred pages of the work are taken up with a discussion of the 'Railroads and the Republic' and the 'Railroads and their Rivals.' This is the least satisfactory part of the book. The author portrays well the methods of management that unrestrained competition gave rise to, and the evil consequences that have resulted; never-theless he thinks, 'Competition is the soul of trade all the world over, [and] competition in transportaion is the foundation, the foremost necessity of commercial and industrial life. He condemns pooling, because it 'tyrannized over the public and deprived it of the benefits of competition.' Mr. Van Oss is by no means insensible of the harmful influence of excessive competition. He calls it the 'great curse of the railroad system'; and when he makes the true and trenchant criticism of the Interstate Commerce Act that 'a law which endeavors to abolish discrimination, a consequence of competition, and permits competition itself to rage unabated is, to say the least, incom-plete, we are prepared to hear him advocate the legal control of competition; not so, how-ever. He does not think the solution of the

problem can come by law. He thinks the attempts have thus far been unwise. would not strengthen the Interstate Law. as well as for the railroads, that the Act had from the outset such weaknesses as would prevent its being applied rigorously, and as would destine it to become a failure.' Neither would he frame the law according to different principles; he does not think legal interference will solve the railroad problem. The solution must come from the railroads. The public has taught them that abuses can be punished; self-interest will lead the railroads to abolish abuses. The improvement in the business morale of the railroads is at present rapid, and by means of consolidation they are eliminating the evil results of competition by restricting without destroying competition. This is a more roseate view of the situation than I am able to take. Consolidation is desirable, is inevitable, but it renders efficient governmental supervision none the less desirable, and essential to the best "The denunciation of the ticket 'scalper'

is most justly made, and ought to be read by every member of Congress before he votes upon the bill recently introduced into the United States Senate to amend the Interstate Commerce Act by prohibiting 'scalping.' Likewise the chapter on capitalization is a very suggestive one. It is interesting to know that from the investor's standpoint the 'much abused "water" was a real blessing

in disguise. "The largest and the best part of the book is devoted to the description of our railroad lines and systems. He divides them into six groups, the Eastern, Central, Northwestern, Southwestern, Pacific and Southern. scription of each group is preceded by an outline of the geographical and industrial conditions of the States composing the terriconditions of the States composing the territory served by the railroads of the group. The several systems of the group are then described; the history of their growth is briefly given, and their component parts are named. and set forth with sufficient detail. Full financial statements of each road are given in tabular form. There are five colored maps by means of which the railroad systems of the country are clearly shown. They are an excellent feature of the book. The book as a whole is to be commended both for consecutive perusal and for reference."

SPECKLED CHICKENS.

The following remarks by a colored preacher are suggested by the state of things in too many other churches besides his own:

An old colored preacher was asked how his

church was getting on, and his answer was, "Mighty po, mighty po, brother."
"What is the trouble?"
"De 'cieties," he replied. "Dey is jist drawin all de fatness and marrow out'en de body an' bones ob de Lord's body. Hit pears like we can't do nuffin' widout de 'ciety. Dar is de Lincum 'ciety, wid Sister Jones and Brudder Brown to run it; Sister Williams mus' march in front ob de daughters of Rebecca. Den dar is de Darcasses, de Marthas, de Daughters of Ham, and de Liberian Ladies. Heaps ob 'cieties."
"Well, you have brethren to help in the church," we suggested.

"No, sir, dar am de Masons, de Odd Fellers, de Sons of Ham, and de Oklahoma-Promised Land-Pilgrims. Why, brudder, by de time de Land-Pilgrims. Why, brudder, by de time de brudders and sisters pays all de dues, an' 'tend all de meetin's, dar is nuffin' left for Mount Pisgah church but jist de cob; de corn has all been shelled off an' frowed to dese speckled chickens."—The Temple Builder.

Halifax customs receipts for April were \$83,407, an increase of \$2,787.

-The bar at the entrance of the River Mersey, and which has been such a source of trouble to the city of Liverpool, has now been so far lowered that there is a minimum depth of nineteen feet over a channel 1,000 feet wide, and a minimum of twenty feet over a width of 500 feet, and the river authorities say that at no distant date the channel to Liverpool will be open to all vessels at all states of the tide. It is also stated that vessels drawing 21 feet 6 inches can now successfully navigate the Manchester ship canal.
