BUTTER

The quality of Butter coming forward so far this season, shows quite an improvement over former years. This is caused largely by farmers having more cattle and herefore producing a larger and more uniform quality then they have formerly been able to make from smaller dairies. We are pleased to note that very few Boxes are being used this year, and we hope that merchants who are receivers of Butter at country points, will use their influence to induce farmers to use tubs only, and also to advise using the larger sized tubs during July and Augus', retaining the small sized tubs for the months of September and October. Butter made during the early months of the season will be exported to a large extent, while Fall made Butter will be consumed locally, and the small tubs are always in demand during the fall and winter months. We have a very large trade locally and also export largely, having every facility for handling great quantities.

We solicit your shipments to this market and can guarantee prompt and satisfactory returns.

Our Ammonia System of Cold Storage is the finest West of Montreal, and we will be pleased to quote rates for the storage of Butter and Cheese.

All enquiries, either by mail or wire, answered promptly.

PREPARED FOR VISITORS.

The wholesale traders of Winnip and business community generally have made fullest preparations for the entertainment of visitors next week. It is not anticipated that very much business will be done, but a general exchange of views on all business questions will be had, and the visitors will be given as good a time as pos-Travellers have been called in off the road, city warehouses have been put in apple-pie order, and all the clerks will have on their best company clothes and manners, in anticipation of a big string of callers. Many wholesale houses have issued special invitations to their customers and friends to visit them during the

THE SATURDAY HALF HOLIDAY.

A writer signing himself "Half-Holiday made a plea this week for a weekly half-holiday for clerks and storekeepers, which is worthy of considera-The suggestion made is that after the exhibition the retail stores of Winnipeg close at noon on Saturday until the end of August. This may seem to be a radical suggestion, but it is a good one, and could be carried out the merchants of the city would only make up their minds to do so. It it true, no doubt, that some transient trade would be lost to the stores were they closed on Saturday afternoon and evening, but the volume of this lost trade would not be so large as to much more than offset the difference in expenses and the gain in vigor and health to both merchants and clerks would, we feel sure, be well worth the investment. A good many people have already given up the practice of shopping on Saturday afternoon and evening in the summer months, and all could be educated to buy at other times if a little effort were made in that direction.

SENECA ROOT.

5

0

The seneca root situation is an interesting one at present. A state of nervous tension exists in the trade here, and it would not take very much to unsettle the market badly. Seneca closed very high last season, and the cold, wet weather which prevailed up to the end of June this year prevented digging, which tended to give prices a buoyancy which was most unusual for the opening of a season. The fine weather which has prevailed so far

this month has given diggers a chance ville, \$1.25; Ochre River, \$4.45; Pempers of the policy of the to get to work, and the next few weeks may witness such an increase in the receipts of root that prices will decline sharply. It is generally lieved that the market is now too high for safety, and consequently no dealer is willing to load up with root at these figures. It is quite true that a certain amount of root must be had before the end of this season to satisfy the regular demands of the trade, and if takes high prices to do it this root will be secured, but there are no people in the trade at Winnipes who care to take the chance of buying any quantity at present prices, unless they have an order for the goods. Another week or two should determine the course which the market is likely to take, as present prices are high enough to tempt every digger out. Country merchants should encourage their customers to dig all the root they can, and to market it such good shape as to secure full prices. Poor and dirty root will not sell nearly so well as clean, bright root, which is free from bulbs. It should also be made a rule to keep all root shipped as closely as possible, as prices may decline any day.

THE BUSINESS SITUATION

Saturday, July 19.

Continued fine weather is having a beneficial effect upon business in the West. During the past, week the weather has been almost perfect, and trading and industrial operations have responded fully to the stimulus which such favorable conditions are calculated to give. Wholesale business in season lines is a little quiet. perhaps, but staples are moving freely and many houses are working right up to the limit of their capacity. great has been the increase in trade in the West that several wholesale concerns are figuring on doubling the size of their buildings next year. Some of these have only recently occupied new buildings, which they ex pected would be large enough for all possible needs for the next ten yeas. Values in a wholesale way are steady, with an upward tendency in some important lines, such as stoves, hardware, lumber, implements, etc. way traffic in the west, which is heavy, has been interfered with to ome extent by washouts. This delay is now about over, however. Labor is well employed in all lines, and at good The Canadian Northern strike is still on, and is the only serious disturbance. A settlement is expected shortly. The exhibition next week is expected to attract large crowds of people to the city. Bank clearings at Winnipeg maintain their rate of increase over previous years.

WINNIPEG MARKETS

Winnipeg, July 19. (All quotations, unless otherwise speci-fied, are wholesale for such quantities as are usually taken by retail dealers and are subject to the usual reduction on large quantities and to cash dis-counts.)

CLOTHING.

The placing of orders for men's clothing for fall have been much larger than usual, and a satisfactory trade is, therefore, assured the whole-sale dealer. Travellers are all in now for the exhibition, and preparations to entertain callers have been made. Larger stocks of clothing are now heling earried by Winnipeg houses than ever before, and it is expected that this will lead to a better sorting trade

in the fall, as full ranges of everything are now to be had here on short

DRY GOODS

Sorting trade is fairly active, especially in outing lines, which are much wanted for the holiday trade. Travelers are all in for the exhibition, and all visitors will be well cared for next week. Values hold steady for most lines. Cottons are still very firm, and weoliens show an upward tendency.

FISH.

There is a good demand for fish, and prices remain unlanged, as follows: fo

GREEN FRUITS

The warm weather is creating a big demand for green fruits and the mar-ket is very active. There has been a great scarcity of bananas both here and in Southern markets owing to the great scarcity of bananas both here and in Southern markets owing to the fact that recent cargo arrivals at New Interest of the Section of th there and no outmans are to be not. The season for cherries and apricoits Washington box apples was shipped this week to this market and will arrive shortly. southern Alberta has scarcely been appreciated outside of the territory affected, as the scanly reports receivaries, and the scanly reports receivable of the real condition of affairs. The following article from the Macledo Gazette gives a review of the situation in that locality, which of the situation in that locality, which of the situation in the country can be seen to those whose farms and buildings were on the lower lands adjoining the rivers, it is impossible to adjoining the rivers, it is impossible to seen to those whose farms and buildings were on the lower lands adjoining the rivers, it is impossible to stip the seen to be seen to those whose farms and buildings were on the lower lands adjoining the rivers, it is impossible to those with Macleed has practically and builtongs were on the rower same said outlings were on the rower same say at this writing, as all communications with Macleod has practically been cut off for going on two weeks. So far as we have been able to dishable the row of the row

be expected when the water began to rise rapidly.

Apart from the loss occasioned in the river bottoms directly by the flood itself, the main anxiety is the lateness of the season. The continuous rain lasting until the end of the first week lasting until the end of the first week in July, has greatly retarded the growth of all crops, and the question now anxiously discussed is, will they mature? This, of course, is a question of conjecture and conjecture regard-ing the weather does not go for much

It may not be a very great consolation for all the damage done, but in any case it is something that similar conditions prevail, not only in all parts of Manitoba and the Territories, but practically all over the continent. There is some comfort also in the thought that it all human probability there will not be a similar beautiful there will not be a similar continual and all the present century, and that the present century, and that the continual contin

bability there will not be a similar condition of affairs during the present century, and that this season we have incredity appeared on those extended the control of the has been entirely suspended. The effect on the business interests of the town has been serious. Business has been almost at a standstill, and the large number of people who depend

on Macleod for supplies have been much inconvenienced

Chicago, July 15.—The famous John W. Gates' corner in July corn came to an abrupt termination to-day, when to an abrupt termination to-day, when to an abrupt termination to-day, when the control of the

the deal a couple of the time at which it would have ended by liquidation there was no one to say him name at which it became known the corner was at an end was the unusual purchasing of July corn, in small lots, by various commission houses. The pit trade during the day, however, was not much over 500,000 however, was not much over 500,000 bushels. Manager Scotten would not

discuss the settlement price. This price, however, was not a matter of accided interest to the trade generally. With the knowledge that Monday night's closing price was \$1 cents, and the opening to-day from 79 to 80.

and the opening to-day from 79 to 89 to 80 the consensus of opinion among the outsiders was that Mr. Gates had demanded either 80 or Si cents from the manded either 80 or Si cents from the way from the solid solid him corn all the way from the solid so called as high as 25,090,000 bushels, but, more generally 25,090,000 bushels, but, more generally 25,090,000 bushels. It is a matter of common knowledge that since they began to make deliveries on July contracts, the Harris Gates people have taken in, and paid for about 3,000,000 bushels. This would leave settlements on some 17,000,000 bushels.

ofit by the deal would necessitate knowledge of the average price at this the property was bought. It is a knowledge of the average price at which the property was bought. It is estimated, however, by close observers of the transaction that Mr. Gates' profits will not exceed \$1,500,000. This amount will be divided hetween ten or a dozen millionaires who were interested in the deal.

Reviewing the seneca root market in their latest circular, the McMillan Fur and Wool Company of Minne-apolis say: The seneca market is Fur and Wool Company of Minnapolis say: The seneca market is bare of old root and it will take 25,000 pounds to supply the immediate dependence of the senecal says of gers to s-cure all the root possible. advise shipping frequently
