10X	12X	14X	16X	18X	20X	22X	24X	26X	28X	30X	32X
						/					

The copy filmed here has been reproduced thanks to the generosity of:

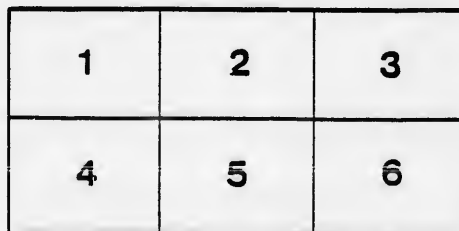

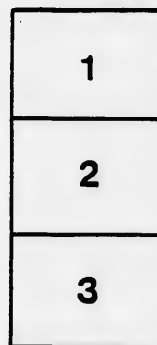

Musée du Château Ramezay,
Montréal

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Musée du Château Ramezay,
Montréal

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

— DEALERS IN —

Rubber Belting & Hose,

594, 596, 598 ST. JOSEPH STREET,

MONTREAL.

In this Exhibition Catalogue we would direct the attention of Manufacturers, Saw Mill proprietors, Iron Founders, Agricultural Implement makers and Machinists generally to the following description of Barry, Smith & Co's.

LEATHER BELTING FACTORY.

Of the many industries that of late years have been added to the manufacturing world, there is none which occupy a more important place among manufacturers of every description than the production of leather belting; machinists, engineers, millwrights, cotton mill, woollen mill, saw mill, flour mill proprietors and manufacturers in general finding this article one of the necessities of their several trades. Much skill is required by the workmen in the several departments and large experience in the selection of the materials which form the belting. Among those who, from long experience in this business, have attained an enviable position with the trade, is the firm of MESSRS. BARRY, SMITH & CO., Nos. 594, 596 and 598 St. Joseph Street, Montreal. This house, which has

Sm
mar
they

been established a number of years, has become well known to the trade, and for the following reasons we would in this Exhibition Catalogue give it a still wider reputation.

The leather of which the belting is composed is tanned in the most approved style, only the best pure bark tanned leather that is known in the market being employed, and is entirely free from acids or other injurious application which in inferior grades of leather affect the elasticity and durability of the belting. There are three things wherein lie the secret of good belting and these three must be combined. First, the leather must be made from steer hides and tanned only with the best pure bark. Second, nothing but the heart or solid part of the leather, or in technical phraseology, what is called the butt of the hide should be used, The shoulder and belly should be cut off as they are generally soft and spongy and make miserably poor belting. Third, the strips of leather that form the belting should be cut lengthways and not crossways of the hide, and then cemented and riveted with **SHORT LAPS**. The house of Barry, Smith & Co., is the only one in Canada, that has made a specialty of turning out almost exclusively **SHORT LAP BELTING**—combining with it all the other requisites herein mentioned. Another matter affecting the superiority, durability and finish of Messrs. Barry, Smith & Co's belting is that great care, practical skill and experience are exercised in every process, rendering their work uniform in every respect. The factory is divided into several manufacturing departments where the leather is cleansed, scoured, etc., before it is put through the process of stuffing, stretching and drying : also the departments where it is cut, trimmed, guaged, cemented and rivetted. Every process is carried on with the aid of improved machinery. The arrangements, throughout the establishment are of the most complete order and it is the largest factory of the kind in the Dominion of Canada. The workshop departments are under the supervision of an able manager, who has had a long extended experience in some of the best Belting Manufactories in the United States and Canada. Barry, Smith & Co's lace leather is also of a superior quality, and to the manufacture of leather belting Fire Engine Hose and lace leather they give their exclusive attention.

INTRODUCTION.

It is not our intention to give a long dissertation on Industrial Exhibitions but consider a few remarks will not be out of place on such an one as is about to be held now in this the Metropolis and most important City of our great and largely increasing Dominion of Canada, great and important in many respects for we are regarded and watched all the world over, more particularly from the Commercial Countries of Europe, the merchants of whom are now watching our actions, in a most critical manner, for they believe as well as ourselves, that we are destined in the future to become one of the greatest and most important Actors in the Drama of this World's History, not only the different countries of Europe are regarding us with a watchful eye but also Asia and Africa are looking at us, and trying to see how we are to be made useful to them in a commercial way, and more particularly our sister colonies in those countries, and also the West Indies to whom we are so nearly geographically allied, and then again our most important, and powerful neighbours, from whom we are only divided by an imaginary line, that is in territory are watching us very jealously.

Industrial Exhibitions were held many centuries ago, but the first in our own times was that inaugurated by our Prince Albert, the beloved husband of Queen Victoria, now very nearly thirty years ago.

The object of the Exhibition held in London 1851 was to create a healthy stimulus to Industry of all kinds, hence the well-known name Industrial Exhibition, and was it attained? There can be but one answer, for it brought together all the nations of the earth to exhibit their wares, we can scarcely name a product or a manufacture that was not then shown to the public, and what was the consequence? It stimulated and emulated the different people of all nations to vie with each other to produce something better than they had seen at the great Fair, ideas and thoughts were exchanged not only between Exhibitors themselves, but among all manufacturers and other producers of almost every article of commerce, and such a stimulus was given to trade as had never before been experienced.

After the great Exhibition of 1851 others were held in different great centres of the world, and amongst them the great Centennial at Philadelphia.

From these larger Fairs sprung the smaller ones, which have been held and are now holding in the principle cities of our own country, all of which are helping to develop the important and vast resources of our land, not only of our valuable agricultural and timbered lands, but the abundance of our minerals and other natural resources not equalled in any other country, and which will be the means, if properly developed, of making Canada, if rightly and properly governed in the future, one of the greatest nations of the Earth.

Should not therefore this idea stimulate us, both small and great, to do all in our power to bring all these vast resources into use, and one of these means is the holding of these Exhibitions, where the different products and manufactures are brought together to be seen by all people, and who have there and then the opportunity of exchanging thoughts and ideas, thus causing improvements to be made that probably would have never been thought of, let us therefore give a helping hand, one and all, to forward these Fairs and Exhibitions.

MONTREAL
DOMINION EXHIBITION GUIDE.

MONTREAL

This the great Commercial Metropolitan City of the Dominion and the most populous of Canadian cities, is situated at the head of navigation for ocean vessels, 540 miles from the Gulf of St. Lawrence, on the Island of the same name, which lies between the two great rivers of the north, the St. Lawrence and the Ottawa. The island is about 30 miles in length and at its widest some 10 in breadth. With the exception of the mountain, which rises to the height of about 550 feet, it is nearly level, and forms one of the most fertile districts of the Dominion, the climate being particularly favorable to the growth of nearly every kind of grain, vegetables and fruit, and from the display of the latter at the present Exhibition, will prove that no better can be grown in any part of the world.

The following are some of the noticeable incidents of the City and its commerce.

THE PORT.

Montreal is the point at which ocean navigation terminates and inland navigation commences. Prior to 1851, only vessels of light draught could pass through Lake St. Peter and come up to the wharves; but a lapse of twenty-nine years shows a great change, for vessels drawing twenty-two to twenty-five feet water now pass down from Montreal to the sea.

THE HARBOUR.

There is at present existing more than four miles of whartage in different points from Mill street to the cotton factory at Hochelaga of which more than one-half is in 24 feet depth of water and the Harbour Commissioners have been duly justified in providing such extensive accommodation, by the immense increase of shipping, arriving in the port this summer, for any person visiting the City will be well repaid to visit the wharves, and witness the number of ships from the largest steamer, and first-class sailing clipper, to the smaller, barques, brigs, schooners etc. now moored along side the wharves, from one extreme end to the other.

THE WHARVES.

The wharves are surmounted by a massive cut-stone wall, along the height of which is a pleasant promenade and wide street, affording a fine view of the

CHARITABLE INSTITUTIONS.

Among the Principal of which are the following,

THE MONTREAL GENERAL HOSPITAL.

Owes its origin to the philanthropic efforts of a number of ladies who, about the year 1815, formed themselves into a Society called the "Ladies Benevolent Society." The inhabitants entered so heartily into the scheme that, in 1818, a fund of £1,200 was raised for the purposes of the Society, and a soup kitchen was opened, where the ladies superintended the distribution; but more than this was needed, and the necessity of providing for the sick was presented to the public. The citizens determined to proceed with the erection of a building, and on the 6th day of June, 1821, the foundation stone of the building (which now forms the centre portion) was laid with Masonic honors, by the Right Worshipful Sir John Johnson, Bart., Past Provincial Grand Master of Canada. In less than a year the building was finished, and on the first of May, 1822, it was opened for the reception of patients. On the 18th May, 1831, the Hon. John Richardson, the first President of the Institution, died, at the age of 76 years. His friends, desirous of erecting some monument to his memory, at first decided to place a cenotaph in Christ Church, but, when the subscription list was closed, it was found that the amount subscribed for exceeded that required for the work, and, as the demands for admission to the hospital were greater than its capacity, it was resolved to devote the money thus acquired to the enlargement of the building, by erecting a wing, to be called the "Richardson Wing."

In 1848, the widow of the late Chief Justice Reid added the wing known as the "Reid Wing," as a monument to the memory of her husband.

Two years ago another wing was added in memory of Mr. Morland. This building fronts on St. Dominique street.

THE WESTERN HOSPITAL.

An Act of Incorporation having been obtained in 1875, a subscription list was opened, and in a very short time upwards of \$30,000 was subscribed to build a hospital in the western part of the city, to be called the "Western Hospital," for the benefit of the sick poor, irrespective of creed, country or color. A large block of land was purchased upon the corner of Dorchester street and Atwater avenue, and upon one corner of this property Major Mills has erected a handsome building, costing \$13,000 dollars, which, will give room for about fifty beds.

The Governors have wisely determined not to open this building until they have sufficient money on hand to pay off a balance upon the land, and to complete and properly furnish the building. A great advance has been made towards obtaining this money, through the handsome legacies of \$2,000 by the late Benaiah Gibb, Esq., and of \$5,000 by the late lamented president of the hospital—Wm. Workman, Esq., and it only remains for some of our philanthropic citizens to follow their noble example, to enable the Governors to open an institution that would be a priceless blessing to the sick poor of the western part of the city, as well as to the many poor fellows who meet with accidents in the numerous manufactories along the canal, and upon the Grand Trunk Railway.

THE HOTEL DIEU

Was founded in 1644 by Mdme. de Bouillon for the reception of the sick and poor, and was situated in St. Paul street, along which it extended 324 feet, and on St. Sulpice it was 468 feet in depth. The buildings consisted of a hospital, convent and church. Before the establishment of the Montreal General Hospital this was the only place to which the afflicted poor of the city could be sent for relief. It furnished for many years a refuge for the miserable, and help for the sick, to whose comforts the Sisters devoted themselves with the most praiseworthy benevolence. The increased demand for aid rendered it necessary that more extensive premises should be obtained, added to which was the fact, that the neighborhood was so thickly built up, that it became necessary to remove the hospital to a more open locality. To meet this the present extensive premises on St. Famille street were erected. This is the most extensive religious edifice in America. It is composed of the church, convent and hospital. The grounds are surrounded by a massive stone wall, the circumference of which is one and a half miles. The physicians of the Institution are the Professors of the French School of Medicine. The surgical cases for the most part coming under the care of Dr. Hingston, late President of the Canada Medical Association, and one of the most accomplished surgeons on the Continent. Previous to the Conquest the Hotel Dieu was supplied with medicines and other necessities by the French Government; at present the funds are derived from rents of lands, charitable bequests or donations, and an annual grant from Parliament.

THE GREY NUNNERY

Is a large hospital and nunnery situated on Guy street, and extending south to Dorchester street. Of the size of the institution we may form an idea from the fact that at present it contains 139 nuns [known as Sisters of Charity], 37 novices, and 500 inmates, while over 5,000 visits are made annually to the sick

and poor of the city, and from the Dispensary over 10,000 prescriptions are given to the poor during each year.

THE PROTESTANT ORPHAN ASYLUM,

On St. Catherine street, cares for boys and girls until they are twelve years of age, when they are placed with families who are to report annually on their conduct and welfare.

ST. JOSEPH'S ASYLUM,

On Cemetery street, for the reception of orphans of both sexes. At present there are 250 inmates.

THE PROTESTANT INFANTS' HOME,

Guy street, receives infants, and provides for them till of an age to be placed in families, or adopted.

THE HERVEY INSTITUTE,

A handsome stone building on Mountain street, where young children are cared for.

ST. PATRICK'S ORPHAN ASYLUM,

Connected with St. Patrick's Church, contains about 200 inmates. It was founded in 1849, solely for Irish orphans and aged persons. In connection with this asylum is an infant school, also taught by the Sisters, which is attended by 450 pupils.

THE MCKAY INSTITUTION FOR DEAF MUTES,

Named after its generous founder, Joseph McKay, Esq., is situated at Cote St. Antoine, and is one of our handsomest and most deserving institutions, a drive to the place will well repay any one.

DRIVES.

The drive to Back River, 6 miles from Montreal, is one of the most pleasant in the vicinity of the city. The roads are in splendid condition, and the scenery along the way is varied and attractive. On the banks of the River [the Ottawa] are situated the Convent of the Sacred Heart [one of the largest in the Dominion], the Palace of the Archbishop of Montreal, Jesuit's College, paper, saw, grist mills, &c.

Here also is situated "Peloquin's Hotel," one of the largest and best situated country hotels in the Dominion. It commands a magnificent view of the Ottawa River, and from the piazza rafts may be seen shooting the Rapids and passing under the Bridge. Fishing, bathing and amusements of all kinds may be enjoyed here.

The Canadian carriage is kept with scrupulous neatness: the drivers are your willing and obliging servants, knowing every inch of the routes by which they convey you, and the charges are exceedingly moderate.

By far the pleasantest drive is to the brow of Mount Royal through the Mountain Park. There are two roads, the shorter returns to the city by McTavish street, the other by Bleury street. The Mountain Park, recently laid out, was planned by Mr. Olmstead, the designer of Central Park, New York,

whose achievements there have been recognized by a statue adorning one of the entrances. The view from Mount Royal is very beautiful; suddenly, after an easy ascent by a winding road, we are looking forth on the city with its spires, its gardens, and avenues; beyond is the broad flowing St. Lawrence, with the Victoria Bridge and the Lachine Rapids just visible in the distance; fading away toward the horizon are the hills of Vermont, many miles away. A road from the Park connects with the Mount Royal [Protestant] and Roman Catholic Cemeteries, two beautiful burial places, with many fine monuments and tombs.

The next drive is the one "AROUND THE MOUNTAIN." This was, until lately, the drive, and still remains a pleasant and attractive one; beautiful bits of scenery may be seen all along the route.

The drive to LACHINE, nine miles distant, is of great interest; the Rapids can be leisurely viewed, and the descent of a steamer observed by properly timing the excursion. The great masonry works on the new canal will also shew some of the resources of modern engineering, in the powerful steam derricks and excavators used.

Another favorite drive is, in an opposite direction to the last, to Longue Pointe, passing through the village of Hochelaga. The river scenery in this direction is very fine, and of quite a different character from that west of the city. It takes us through the village of Hochelaga, the terminus of the new railroad recently constructed, the Quebec, Montreal, Ottawa and Occidental. About a mile from the depot is the beautiful convent of the Sisters of the Holy Names of Jesus and Mary, where many young ladies from the United States receive their education. The next noteworthy building is the Lunatic Asylum. This immense house, containing nearly eight hundred maniacs, idiots and imbeciles, is controlled by the Sisters of Providence; these ladies, with the exception of a physician and six guardians for desperate characters, having sole charge. They find no trouble in the care of the numerous inmates, and, by their kindness and tact, restore the mental balance in all the cases where a cure is possible in a time of the time it used to take in the old days, when the insane were treated with harshness and cruelty.

On our way to Longue Pointe we notice St. HELEN'S ISLAND, now, a free public park, with its disarmed fortifications, and the villages of Longueuil, Boucherville and Varennes on the opposite bank of the river.

NELSON'S MONUMENT.

This monument, erected in 1808 to the memory of the hero of Trafalgar, stands in Jacques Cartier Square. The monument is built in limestone, and the ornaments are of a composition invented by Code & Secly, of London, Eng., and were executed by them. The base is square six and a half feet broad on each side, and about ten feet high. From the top of this a circular shaft or column rises fifty feet in height and five feet in diameter. It is of the Doric order, and finished with mouldings. On the top of the pillar is a square tablet, the whole surmounted with a statue of Nelson, eight feet in height. The principal ornaments are in panels on the four sides of the base or pedestal, and are emblematical of the battle of the Nile. On the panel on the upper side are cannon, anchors and other naval trophies, with a laurel wreath, which surrounds the following inscription:—

LUBY'S PARISIAN HAIR RENEWER

Will restore Gray Hair to its natural Color and stop its falling out.

IN MEMORY OF

The Right Honorable Vice-Admiral Lord Viscount Nelson, Duke of Bronnte, who terminated his career of naval glory in the memorable battle of Trafalgar, On the 21st of October, 1805, after inculcating by signal, this sentiment, never to be forgotten by his county :

" ENGLAND EXPECTS EVERY MAN WILL DO HIS DUTY." This monumental column was erected by the inhabitants of Montreal in the year 1808.

THE VICTORIA BRIDGE

Serves the important purpose of giving uninterrupted rail communication between the Eastern States, Canada and the Great West. It is used only for railway transit, and gives to the Grand Trunk Railway full control of railway approaches from the East. This great work, was completed in 1860, under the superintendence of Robert Stephenson and his associates, and is one and a quarter miles in length or two miles including the extensions. It is supported on twenty-four piers, the central span being three hundred feet, the remaining ones two hundred and forty-two, with massive abutments ; the bridge tubé is of iron twenty-two feet high by sixteen wide, slightly lessening at the ends. It was erected at a cost of \$6,300,000. The height of the centre span above ordinary river level is sixty feet. Three million cubic feet of masonry and ten thousand tons of iron enter into the construction of this gigantic work. Near the centre there is an opening which affords a magnificent view of the river and city. No railroad train is allowed to enter this bridge without a written permit from the proper officer, this insuring exemption from collision or accident ; the passage is somewhat cheerless, occupying some six minutes, though seeming much longer to the passenger. By obtaining a permit at the Grand Trunk offices, tourists can inspect a portion of the interior of the bridge. The river beneath the bridge has a swift current, and the piers are calculated to withstand immense pressure from descending masses of ice.

ST. LAWRENCE HALL, MONTREAL.

For the past thirty years this Hotel, familiarly known as the "St. LAWRENCE," has been a "household word" to all travellers on the continent of North America, and has been patronized by all the Royal and noble personages who have visited the City of Montreal.

This Hotel has been recently re-taken by **Mr. Henry Hogan**, the former proprietor, who has handsomely and appropriately decorated and renovated the interior, and completely re-fitted the whole of the apartments with new furniture.

The Hotel is admirably situated, being in the very heart of the City, and contiguous to the General Post Office, the principal Banks, Public Buildings, Law Courts, Commercial Exchanges, Railway and Telegraph Offices.

The Hotel will be managed by **Mr. Samuel Montgomery**, under the immediate personal supervision of **Mr. Hogan**, than whom no one is better qualified to conduct an hostelry of such magnitude as the St. Lawrence Hall, and than whom no one has gained a better reputation as an obliging, generous and considerate host.

PROGRAMME :

The Exhibition will open at 9 a.m., on Tuesday the 14th of September, and continue open until two o'clock, p.m., on Friday, the 24th of September, closing daily at six p.m.

His Excellency the Governor-General will formally open the Exhibition on Tuesday, the 21st September, at two o'clock in the afternoon, when an address will be presented to His Excellency by the Committee.

The Industrial portion of the Exhibition, including Manufactures, Arts, Implements and Machinery, &c., (by no means the least interesting branch), will be on view from the opening to the close. The show of Horses, Cattle, Sheep, Pigs, Poultry, Agricultural and Dairy Products will take place during the second week, when every branch of the Exhibition will be in full operation.

It is also the intention of the Committee to provide several prominent attractions outside of the regular Exhibition, during its continuance.

Great alterations have been made, and also many additions to the grounds for the present Exhibition. Seven acres have been taken in, and numerous edifices have been erected, and quite changed its aspect and appearance. They front on Mount Royal Avenue, the road connecting Bleury and Main streets. Bleury runs on one side of the grounds and the continuation of St. Urban on the other. The main entrance is from Mount Royal Avenue and, for the public, will be through registering turnstiles. There will be six of these, three entrances and three exits placed at convenient distances, so that there may be no confusion for people going in or departing from the grounds. It will be necessary to present the right change for admission, which can, however, be procured at the Exchange Office close by the Turnstile Entrance. There are also two carriage entrances, one at each end of the

34

AUTHORIZED OFFICIAL CATALOGUE.

front on Mount Royal Avenue. At this end of the grounds is also the Office of the Committee, Secretary, Judges, Press, Telegraph, Police, Parcel Room, &c.

After passing the gate the visitor has a fine *coup d'oeil* of the grounds and Buildings. Away up the centre is the main building, the Crystal Palace as it is called, and on the left hand side, extending towards the gate, the Carriage Building, the Main Restaurant, the Root and Grain Building. To the left of these are very fine stalls for over two hundred horses, extending almost the whole width of the grounds.

On the right hand side, as the visitor looks up the grand avenue that leads to the centre building, are the Machinery Hall, nearest the top of ground, the Poultry House, and Piggery, two long buildings for sheep, and about five hundred stalls, from five to seven feet wide. There is also stabling for seventy-five animals for Exhibition purposes.

Having seen this prospect the visitor can march up the Avenue to the main building, but his attention is first attracted by the great ring for cattle. Here it is intended to have a prize cattle procession every day, so that visitors may the easier view the animals. The splendid horses which will be exhibited this year will show their paces in the ring.

THE MAIN BUILDING.

This it is seen is built after the model of the Great Crystal Palace, erected by Prince Albert to receive the first world's exhibition in 1851, and will attract the attention of every person on entering the grounds, it is of brick except the dome and roof which are made of iron and glass. It is capacious, well lighted and ventilated. It is in the shape of a large cross, being one hundred and eighty feet long, eighty feet wide, and the transepts each eighty feet by sixty feet in width—from the ground floor to the top of the dome is 120 ft. high. An annex has been added to this building and is connected by a 24 feet wide passage, the dimensions are 145 feet in length by 73 feet in breadth. This gives a very large area to the Main Building, and forms one of the finest Exhibition Buildings in the Dominion.

Large galleries also extend around the Main Building.

THE MAIN RESTAURANT.

This, altho' perhaps of minor importance to some, is of great importance to the many, for it is not probable that exhibitors or visitors would like to undergo the "Tanner" principle—therefore it has been provided that those who do not wish to do so should be well taken care of, and consequently good arrangements are made for them. The principle building for it is close to the Crystal Palace, inclining to the left, it is eighty-five feet long by fifty-five feet wide, with a capacious kitchen attached. This Restaurant is under the management of the well known caterer, Victor Ollevon, lately *chef de cuisine* at the Windsor, here can be procured refreshments from the light lunch to the most recherché dinner, and all at City prices.

For the convenience of the many persons who will visit the grounds three lesser Restaurants are provided where may be obtained anything, from a sandwich to a more substantial repast, also temperance drinks of all kinds, these are situated in different parts of the grounds to suit the convenience of the public.

THE MACHINERY HALL.

On the right of the Main Building will be seen the Machinery Hall, this will be a great centre of interest. It is a spacious building and has a very fine appearance—it is 120 feet long by 50 feet wide, with two transepts each 31 feet wide. The machinery will be driven by a line of shafting by a very powerful engine. This engine has been supplied by Messrs. Thompson & Williams, of Stratford, at their own expense. The boilers are supplied by Messrs. W. P. Bartley & Co, of Montreal. The large leather belt supplied by Messrs. Barry, Smith & Co, at this city (free of expense) is well worthy of inspection.

Thus all machinery of the different manufacturers will be put in motion, ex-

hibitors providing themselves with loose pulleys to attach to the shafting. In this way, a silk manufacturer will weave his delicate fabric, a shoemaker will turn out his shoes, &c. &c.

CARRIAGE BUILDING.

On the left of the Main Building is the building devoted to Carriages, here may be seen every kind and variety of carriage, and in all their various parts and with all things connected therewith. This building is 156 by 50 feet.

ROOT AND GRAIN BUILDING.

At a short distance from the Carriage Building is the Root and Grain Building. It is 205 by 47 feet, here will be displayed all kinds of grain and roots.

MANITOBA BUILDING.

A short distance from the Root and Grain Building will be seen the building for the Manitoba exhibits, no doubt this will attract much attention to people from all parts. This country now becoming a very important part of the Dominion. This building is 100 by 36 feet..

POULTRY HOUSE.

This building, a short distance from the Main Building is 100 by 37½ feet, and will be exhibited every variety and sort of Poultry, and things generally connected with a Poultry show.

SHEEP PENS.

There are two of these close to each other, each 239 by 38 feet.

PIGGERY.

The space allotted for the show of Pigs is 205 by 38 feet.

PRESS, POLICE, TELEGRAPH & PARCEL OFFICE.

This is near the Manitoba Building and will be found very convenient. Parcels may be left here and taken care of, a great convenience to the many visitors, and also every thing connected with Police, Telegraph and Press.

SECRETARY, TREASURER, BANK AND COMMITTEE.

These offices will be found on the right as any one enters at the entrances, and here all officers connected with the different departments may be found, and all information connected with the same be obtained.

DIMENSION OF GROUNDS.

The side facing Mount Royal Avenue is 832 feet, its opposite side 857 feet, and the two sides each 1380 feet.

WATER.

This is supplied by the City, and will be utilized in every possible manner it may be required both for man and beast, no person need be in want of a drink of water if required, and no poor dumb animals should be without it if properly attended to by their overlookers, in fact not only water, but every thing necessary for the wants of every person or things has been carefully and particularly provided for, as it is wished no person shall go away dissatisfied with the arrangements made for their comfort.

THE ECLIPSE WINDMILL.

This Windmill is erected in a tower on the ground. It is 45 feet in height. It has a pumping attachment for pumping water from a well—it has also a rotary at-

tachment to which there is a grinder in operation, and it can also be used for driving a churn, saws, lathes, and many other uses—it is well adapted for farmers, and others requiring power to drive machinery

This Windmill is erected by Messrs. R. H. Buchanan & Co, 662 Craig Street, Montreal.

REFRESHMENTS, FRUITS, &c.

Several of these stalls are erected on different parts of the grounds, independent of the Main Restaurant, and also, smaller restaurants, where visitors can rely on getting a hot substantial dinner, &c., at most moderate prices.

ADMISSION TO THE GROUNDS.

The price of admission will be 25 cents each time of entering. The admission will be by means of registering turnstiles, and each person must be provided with proper change before entering.

Necessary attendants upon stock and machinery, &c., will be furnished with special passes, on applying at the Secretary's office on the grounds. Each pass will bear the name of the person to whom it is issued, and if presented by any other person will be forfeited.

One Exhibitor's ticket, admitting an exhibitor only *once* each day, and *positively not transferable* may be purchased by any individual exhibiting, and if a firm, by any one member thereof, at the Secretary's office, on the grounds, at the following rates, viz., for one week, \$1; two weeks, \$1.50.

Judges, distinguished visitors, and members of the press, will be furnished with badges. No other tickets whatever will be issued.

The entry tickets upon animals or articles will admit the person bringing them to the Show Grounds for exhibition, along with such animals or articles without the use of any other ticket. Afterwards, such parties must be provided with proper passes, as above.

FIRE AND POLICE PROTECTION.

Every possible precaution will be made to guard against fire; and with the precautions taken it is believed the danger of such an occurrence is very remote, but exhibitors desiring insurance must give the matter their personal attention.

An ample police force, detailed for the purpose by the city, will be on duty night and day during the continuance of the Exhibition. A full corps of watchmen will also be present at all times; but exhibitors are expected to exercise constant supervision over their articles on exhibition, as the Committee will not be responsible for loss or damage by theft, fire, or otherwise. Small and valuable articles should be exhibited in show cases, which may be securely locked when desirable.

TELEGRAPH AND POST OFFICES.

The Montreal and Dominion Telegraph Companies will have offices on the grounds; and a Post office will also be provided for the delivery and dispatch of letters. Telephone communication will also be established with the City.

VISITORS.

Visitors may be assured of finding on the grounds everything necessary to the convenience and comfort of young or old, during the entire day. An ample restaurant and lunch rooms managed by experienced caterers, and under the supervision of the Committee, as to price and quality of food, will serve meals and refreshments during hours of exhibition at reasonable rates. Baggage rooms for the deposit of satchels, cloaks, &c., and in charge of responsible parties, are conveniently located for the accommodation of visitors.

LIVE STOCK.

New and commodious Buildings are provided upon the grounds for all Live Stock. Hay and grain for horses, cattle, sheep, and pigs, will be for sale upon the grounds at reasonable prices. Exhibitors will please report at once if exorbitant prices are exacted.

PAYMENT OF PRIZES.

The Treasurer will be prepared to commence paying the premiums at his office on the grounds for all classes immediately after the close of the Exhibition.

Parties who shall have prizes awarded them are particularly requested to apply for them before leaving Montreal, or leave a written order with some person to receive them, stating the articles for which prizes are claimed.

Persons entitled to Cash premiums must apply for them at the Secretary's office, who will give *Orders on the Treasurer* for the amount. These orders must be endorsed, as they will be payable to order, not to bearer, and on presentation to the Treasurer, properly endorsed, will be paid either in cash, or by cheque on the Bank.

Orders for premiums not applied for as above, will be given by the Secretary, and the amount forwarded by the Treasurer, on receipt of proper instructions.

All persons to whom prize are awarded must apply to the Secretaries of the Committee for payment thereof, on or before the 30th day of November following Exhibition or such prizes will be forfeited.

PROGRAMME OF ATTRACTIONS.

DEVINS' VEGETABLE WORM PASTILLES.

A safe and certain Cure for Worms in Children or Adults.

MOTHERS ! SAVE YOUR CHILDREN

DEVINS' VEGETABLE
WORM PASTILLES

DEVINS' VEGETABLE
WORM PASTILLES

The best remedy known for the different species
of Worms that infect the Human Body.

**Approved by the Medical Faculty as the safest and most
effective remedy known for Worms in Children or Adults.**

The following very flattering notice is taken from the *Medical Journal*.

"DEVINS' VEGETABLE WORM PASTILES are the greatest medical improvement of modern times. They combine what has hitherto been considered the most opposite and distinct qualities—being as agreeable to the taste as the most delicious confectionery, as delightful to the smell as fresh flowers, and more effective in their medicinal operation than any preparation hitherto discovered ; they are safe for the most delicate child, and are guaranteed to remove every vestige of worms. The genuine have the word "DEVINS" stamped on each pastille."

**I will forward by mail, post paid to any address in Canada on
receipt of 25 cts, a box of DEVINS' WORM PASTILLES.**

CAUTION.—In justice to the merits and reputation of these Pastilles,
observe when purchasing that you do not receive in their stead some
of the numerous and worthless Worm Lozenges with which the country is flooded.

NEWELL'S PATENT UNIVERSAL GRINDER.

(CLASS 3—GROUP 5—SECTION 29.)

THE most useful Mill yet introduced to public notice is the **NEWELL'S PATENT UNIVERSAL GRINDER**. There are many machines so named, but the simplicity and effectiveness of this one has fully established its claim to the title used to describe it. Although originally invented to dispose profitably of the bye-product of a lumber mill, the inventor found by experiment it was quite capable of dealing with every substance known to Commerce. It has now been in operation on all kinds of material, for several years. Phosphates, Barytes, Lead, Coal, Iron, Copper, Pyrites, Plumbago, Gold Ore, Quartz, Plaster, Black Oxide, Zinc Ore, Mica, Asbestos, and other Minerals, have all been successfully treated by this Mill.

Wheat, Oats, Corn, Flax, Buckwheat, Peas, Rice, Yewoods, Bark, Marabolams, Sumac, Cork, Malt, Spices, Drugs, and all other vegetable substances.

Animal substances have been just as surely and cheaply reduced, and include Bones, Horns, Guano, Hoofs, and all refuse materials.

It is clear, therefore, that no grindable article can be named which the machine is not able to reduce to any degree of fineness. To the manufacturer of Cements, Chemicals, and Fertilizers, this Mill is indispensable. To the Miller it offers a method of reduction, which, for cheapness, economy of the material ground, uniformity in the sample, and coolness, cannot be surpassed. It is the only machine which has ground ROSIN without clogging.

Wherever a large quantity of work requires to be done, the Mill is seen at its best. It is now employed on Public Works in Washington City, grinding North River blue lime-stone, for making asphalt sidewalks. The United States Mail Contractor has used it for crushing Corn and Oats, for the horses in the Department.

Testimonials may be had on application to the General Agency for the Dominion of Canada.

The Machines can be seen at work at the Mill premises, 572 William Street, St. Gabriel Locks. The City Passenger Railway Cars, from the Post Office, pass the Works every ten minutes, stopping at Chatham Street. A cordial invitation to visit the Mills is extended.
