TURKISH BLACK SALVE.

THIS SALVE, prepared from the original Pukini, (physician) of Smyrns, in Asia Minor, and which has obtained an unprecedented celebrity and which has obtained an unprecedented celebrity in Great Britain and the East Indies, from the art tonishing Cures performed by it in both these countries, has lately been introduced into Montreal. As might be expected, its pepularity has followed it, and its use is becoming general among all classes. The Proprietors, prempted by the all classes. The Proprietors, prempted by the very flatforing reception it has met with in the Metropolis, have determined on extending its useulness to all other parts of Canada ; and, for that ourpose, have established Agencies in all the prins cipal Cities. They flatter themselves that when its wonderful properties shall become more gene-rally known, they will meet with that encourageally known, they was more or anch a valuable medicament into a country justly entitles them.— The contracted limits of an advertisement necessarily precliftles their entering into any adequate etail of its merits, but, for the inform public, they intend to publish, from time to time, uch statements of cures as have or may occur,

If used in time, it will prevent or cure Cancers, also, Swellings arising from a blow on the Breast, Ring Worm, Pains in the Back, Rhedmittists, Goat, Palits, in the Chest, Palpitetion of the Reart, Complaints in the Liver, Spine, Heart and Hip, Rushing of Blood to the Head, Swelled Face and Toolinche. In fact, it is impossible to enumerate half the com-plaints that have been cured by the application of his Sulve. turne your recountry seems to be commented The country seems to be quite alive to the importance of the question that has arisen between the Press and the Assembly. With the exception of the Montreal Gazette and the Quebec Chron cle, not one paper of respectability that we have toos, has espoused the cause of the Assembly, a sees, has espoused the cause of the Assembly, not one but has manfully adhered to the common cause, ably supporting the position taken at first by those of our besthren who were present in Teronte when the outrage upon the Press was perpetuated by Mr. Rohert Baldwin. As to these two journals, the Chronicle appears to us totally to misunderstand, the question at issue, and, after much counideration, we have come to the conclusion that the conduct of the Guzette has some curious, connection, with its coppera-Morocco stating that in consequence of the Guzette has some curious consection with its conperate believe the gentlemen thought that, if he continued for report, when his contemporaries refused to do to, he would sell more papers, and that that is just the short and the long of the matter. The rest of the Press of the Province is sticking manfully together, and it is really not a little delightful to see that, no matter what the politics of the journal, the liberty of the Press, which is in reality, the liberty of the Press, which is in reality, the liberty of the subject, is resolutely contended for. The people are supporting their own Press, and it is very evident, from the turn which things are taking in Upper Canada, that the Assembly will have, ultimately, to knock under We earnestly recommend the example of the inhabitants of the County of Oxford and of Brockville to be followed up in every electoral constituency; let meetings be salled, resolutions be acceptable, died of incuddaries.

The state of the Chamber to Peres of the Imperial has some curious connection with its copperapresent in the House, to publish such reports of the dehates as they (the Press) may choose, according to their convenience, and to be accounto their convenience, and to be accoun-properly, and protected from interrup-

The House of Assembly must be distinctly given to understand, by the people, that they (the people) will neither recognise nor tolerate their ion to exercise the Privilege of Parliament is it is understood in England; that such pretension is not in accordance with the spirit of the age, or with the habits of thought and action pecu-liar to the people of this country; that they have no sympathy with the relice of a harburous age still existing in England, and will resist their in-troduction here. And all this must be made a test question at the next Election; if the present House of Assembly persists in its obstinate con-

the House of Assembly has the same power that all other public bodies have, to preserve order during its deliberations, and that is to have a police-man in attendures to wine and carry out any man who makes a noise or cause an interruption of the proceedings, and the man so estated can be taken before a Magistrate and by Branch to transmit steads and be fined or impriso taken before a Magistrate and be fried or imprisonof for being ristons and disorderly 3 though, upon
our conscience, we think most of the arrests
would have to be made midden the Bar. This is
the legal way to preserve order, and no other
power would we give the eighty-last wind-bags.
By the way, the indicrous conclusion of the
Reporter squalable, so far as the precious Parliament is expectated in this one berrilly could be a Reporter squalitie, so far as the precious Parlia-ment is concerned, is, that one horrible noodle has ment as concerned, is, that one horrible noodle has given notice of a motion to the effect that mea-sures be taken for the "condign punishment of those Reporters who shall not give correct and impartial reports" of the proceedings of the Legis-lative Assembly. This is great too, and only shows with what a mass of ridicule a man may cover himself, without the assistance of others.

In another place will be found, the Resolutions passed by Mr. Hincks' constituents in the County of Oxford, relative to the conduct of the House of Oxford, relative to the conduct of the House of Assembly towards, the Reporters. They are pretty strengly worded, and are, in fact, a good breach of the privilege of the House, if the House has the privilege it chains. Now, we shall see whether the House has the courage to punish, or attempt to punish, the gentleman who presided at this meeting, the movers and acconducts of the Resolutions.

which in 1848 amounted to ten millions and a half, has been reduced to three millions and a quarter. The fierce attack upon the Assembly in the semi-official journal d'Lesoir, causes great sensation in political circ es. The subject had been considered at a Cabinet Council, but nothing was

considered at a Cabinet County, positively known, and positively known, and at 96.55, closed 96.10.

The commercial accounts for the past week are excellent. The Paris manufacturers have more orders than they can execute, and operatives are in great demand.

box of Kiel commenced on the 18th. Several couching vessels have been seized by the Danish frigate.

The Danish Army is under the command of General Von Krogh; that of the Duchies of General William. The Danish troops are advancing rapidly. Commercial intercourse has been interdicted. Accounts of the 17th state that a smarr engagement, had occurred between the advanced posts of both armies in the vicinity of Fleusburgh, and advices from Altons of the 18th state that, on the 18th, the Danish fleet, con sting of reven vessels of war, supported by troops, took possession, amidst a heavy canonade of both siden, of the Isle of Frehmarn. The German Empire.

All Germany is ringing with speculations upon the result of the war in Holstein. From Hamburgh we learn that a second Russian fleet, with ten thousand troops on hoard, is on the point of leaving the port of Cronatadt, for the Schleswig Holstein coast. Sweden also is to send a squadron under the command of Prince Occur, and it is not thought improbable that England may send a miaratime force at least equal to that of Russia. There would then be four fleet more or less hostile to the German cause in the Duchies.

The Hanoverian Chambers we still firm in their support of Germany, and consider the peace concluded between Princes and Demmark as dishonorable to the Empire.

Accounts from Vienna state that the Minister at War has resigned in consequence of Haynan's diaminast. Radetaky has tendered his resignation, it is said, on the same account:

Meeting, the Constitution of the Province of Candad does not guarantee to the Members of the House of Assembly the privilege claimed, of admitting Reporters of the Public Press by sufferdance, and that if any data exist, by which this privilege can be claimed by Members of the Imperial Parliament in England, the rule cannot extend to, nor be applied, in the Colenies.

4th. Resolved.—That, as the rights and privileges of Parliament must be based upon some positive enactment or law of the land, and that as no such law appears on the statute book, by which the Hou. R. Baldwin, or any other Member of the House of Assembly, can have the power of moving a Resolution for reprimending, punishing, or excluding Reporters from that House, this Meeting considers the recent conduct of the House as arbitrary in the extreme, and exceedingly unjust to the public.

5th. Resolved.—That, in the opinion of this Meeting, Robert Christie, Esq., M. P. P. for Gaspe, has been ganity of ungentiemanly and improper conduct towards Mr. Ure, a Reporter for the Globa newspaper, in the House of Assembly, and to all the Reporters, in preventing, by his noise, goesip, and indecorous tattling, the proceedings of the honorable House from being heard and correctly reported to the public.

6th. Resolved.—That this Meeting expresses surprise that any Constituency should send a Member to Parliament who has not more discretion, nor more correct delate of decent manuscript and who seems to regard his own amusement and more importance than that the public should be acquainted with the doings of the Legislature, and who seems to regard his own amusement and feelings, as to lake advantage at the barbarous and antiquated privileges claimed by the British Parliament, to punish an innocent individual, honorably intent on the performance of his duties to his employer and the public.
