in Hamilton and Western Districts, would invite
public attention to the same. They have now on
hand samples of this most safe, economical and
beautiful light, in a variety of forms, for Private
Houses, Stores, Churches-Public Building, &c.,
and are prepared to take orders for supplying their
customers with any pattern they may select.

The light is produced by the burning of az
eriform Gas, which is emitted in beautiful jets
from small perforations in Platina.

The Gas is generated, as it is used, by the heat
of its own combustion on the burner, connected
with the liquid in the Lamp. Thus it is a perfect and portable apparatus for creating and burning an æriform Gas.

Its construction is such, that all possibility of
accident from its use is entirely removed, and the
great simplicity of its arrangement renders it less
liable to get out of order than any other kind of,
Lamp. It requires no cleaning and trimming,
as do the Oil and Camphene Lamps and burns
equally well either with or without a glass globe
or shade, and perfectly free from smoke or odour.

The opinions of the scientific may be learned
from the fact, that at the Annual Fair of the American Institute in 1845, a Slavan Meral, was

ADVANTABE OF PLANTING FRUIT TREES IN DECLIVITIES.—Dodart first observed that trees pushed their branches in a direction parallel to the surface of the earth. If a tree stands on a slope, it pushes both towards the hill and toward the declivity, but en both sides it still preserves its branches parallel to the surface. As there is an attraction between the upper surface of leaves and light, I am also persuaded, though not equally certain of it from experiment, that there is an attraction of the same nature between the under surface of the earth. This I consider to be the true cause of the phonomenon I had long observed that the most fruitful obshards and most fertile trees are those planted on a declivity; and the suggest it is, though not quite a precipice, the more fertile they prove. It is well known that he spreading of trees always renders them truitful. On a plain they incline to shoot upwards; and therefore art is employed by skillul gardeners and applied in various ways to cheek their perport of the point is obtained on a declivity by nature, there a true leaves its tendency to shoot upwards and in order to preserve its branches parallel with the surface is constrained to gush than its accessed affectivency. From this calculation it may be assumed, that good Canada has at least paid her debt, and that Upper Canada, has at less paid at seven the see stands, on a footing of equality with Lower Canada, in money matters. It is unnecessary to make more than a passing allusion to me fact, that while the two sections of the Province, are according to the province are according ng to the census recently taken, nearly on a pa point of numbers : Lower Canada continu draw annually a large amount, far exceeding the allowance in Upper Canada, for School purposes and the administration of Justice.

Mr. Hincks in his Circular states, that "the

ronduct of the Legislature for having alismated two branches of the general revenue, which were more productive in Upper than in Lower Canada. The reasons assigned, and proved valid at the time when the acts were passed, will probably be considered sufficient now, and to justify the selecconsidered sufficient now, and to justify the series than then formed the general fund, viz., that in both instances the people of Upper Conada were taxed more highly than in the Listern section. In the latter, the highest charge for a tavern license was £5, with 75 6d collecting fee; in the former

the tavern licenses ranged up to £10. So again with the marriage licences, which in Opper Canada are paid by two thirds other population, and in Lower Ganada by not one tenthe-she Runan Catholic holies being whill exempted from the It may be not to very hourst man, so maker what way his party convictions whether it was not to mit such important features from a circular purporting to give the real fact of the case, and whether it was not in effect a mere piece of juggiery and fraud which no honest man can venture to stamp with his approbation? The position taken up by the opponents of the measure now introduced by the Government is, that to re-limbures any other but layal or innocent parties, would be a premium on treason; to a lopt any other mole of anymentant the one pursued in Upper Canada would be anjust to that section of the Province. Great stress has seen fail by the Government on a particular passage in the instructions fothe Government on a some some appointed by the late administration which gave authority to act, was impuded by the late administration of the Con mission which gave authority to act, was impuded by the late administration to mark the sole difficulties. To the People of Upper Creates of all Classes, and of all States of Political Opinion.

The Inspector General. Mr. Hincks, having issued a Gircular purporting "to put you in possession of the real tacts," in regard to the Rebellion claims of Lower Canada, and the President of the Council, Mr. Merriu, having, in his place in Parliament, instructed the House as to the proper mole of ascertaining the relative financial position of Upper and Lower Canada, and urged the various reasons which justify the proposed charge on the consolidated revenue funt, the operation of Upper and Lower Canada, and urged the various reasons which justify the proposed charge on the consolidated revenue funt, the operation of the proper mole of ascertaining the relative financial position of Upper and Lower Canada and urged the various reasons tiself, by a careful examination into facts and a dispassionate consideration of the arguments adduced by the advocates on either added to which measure. The Government contend that all parties who suffered loss by the Rebellion in the measure is the convenient of the points in fiscate the interest of the Compensation, those allower Canada stand on a fooding of equality, a regards their title to compensation should be excluded who have been convicted by a sentence of a Court of Law.

And if this subject is again under the present singular circumstances, brought forward; we have to thank the members and infatuation of a faction which the memoirs an industration of a factor's whiten now at least, does not represent the inhabitants of Canada. And he presented this toast as intro-duced under singular circumstance. I trust I shall not be accused of useless digression if I re-call the events of the last few weeks. It is but a lay or two ago indeed when I, with many who were present, saw our respected grest undergo a mock trial before the House of Assembly—but neture no British tribunal—we saw him dragged a distance of 300 miles to receive, under the mocerv of a trial, a sentence which a vindictive ninister and cowardly supporters had determined m. There, for the first time in my life, I felt that liberty for a Briton was a vain word. He saw liberty for a Briton was a vain word. He saw howereastly and hijastice might; on her a tyrannical government, be perpetrated. Even under our free constitution, we see what bold, had men might dary to do. How weak integrity and virtue might prove against such and attack. But unhal has been the result 1—the ministry by their unhallowed proceedings against Mr. Vansittari, nave succeeded in exciting the digust and concern of every good and true man in Canada. The last speaker said that the présent ministry have done duchthing for the country. But he is wrong they have done much for us, no thanks to then, however, but by their infatuated proceeding they have united Englishmen, frishmen and So scheme in the bands of a loval brother hold. MEASURES, NOT MEN.

THURSDAY MORNING, MARCH 8, 1849 We were right in our prediction that the

Signal would give "a flaming account" of

the Stratford meeting at which resolutions were carried in approbation of paying the rebels of Lower Canada out of the Consolidated fund; for we find in that paper two or three columns devoted to the wonderful sayings and doings of Mr. Thomas Daly the shop-keeper, and by between twenty or thirty individuals, including sundry laboring men in Mr. Daly's employ; but, we regret to say, endracing also two or three respectable individuals, that we are ashamed to hear were amongst the number The Stratford Parish meeting called by three justices and attended by thirty boys is all important-there were even two of amazing demonstration and it has so taken the Western townships aback and will prove such a cup of comfort to the expectto be superfluous. The Goderich meeting -called together by a rejusition of eighteen District Councillors - most of the macould with such a short notice become parties to it, and at which without any printed men of the District were present, was by our veracious contemporary called great meeting on a small scale" Believing as we do that the gentlemen returned cillors honestly represent the feelings and wishes of their constituents, we consider Fontaine's measure. the almost unanimous approval of the resolutions passed at the Goderich meeting. stamped those resolutions with a weight they could not have derived from any other Town of Goderich attended the meeting it ought not perhaps, have been considered a fair representation of the feelings of the no mistake-there could be no mistake and there shall be no mistake." Indeed the importance of the County meeting and ferent gatherings is however so distinct last relellien!" that it may not be amiss to explain how it is, that from the shores of the Huron to lieve there was never introduced a mea- goda" when forgetting the chargeder in

beloved folds. (Tremendous cheers.) Take cheers the British ebects of Strurday night, tell in a voice of thunder that, we are English yetenglish in body and soul. Oh nof we are not really to estrange ourselves from our unitive land, we remember the glories of Blake, of Nelson, of Wellington, of the galaxy of heroes who, under England's fing our flag, have fought and bled, but never died, for they live in our hearts. We cannot tear assunder the links that bind our souls, to England. England's mines of glory are ours; her greatness is ours; her liberties are ours; and by the grace and help of God, they shall all, all be our children's. (Prolonged and tremedous cheers.) In this love, in this loyalty, we have the support of all Upper Canada. We shall sait, be runt of the fight at least we are in the vanguard surrounded by enemies such as they are flagibler, and the brunt of the fight at least we are in the vanguard surrounded by enemies such as they are flagibler, and the weak of the course we are ready to pursue, for the occasion which has drawn us together to-night was to express our sympathy with our Upper Canadian friends; and I am satisfied that the remarks I have made cannot be the glit unconnected with the roast which I am about to propose, it is our advocate the interests of the industrial masses-but never in the history of a nation or of a province was there such a unity of opinion in the public mind as the last few weeks have shewn us. How is it then that the majority of those that attended the meeting of Guelph and Stratford-the ony two exceptions-have run counter to the est of the Province? Is it that they approved of the obnoxious measure or is it not rather, that whilst the ministry is waiting upon Providence they are waiting upon the ministry expectant of a boon in the shape of District offices. We leave Guelph to our Contemporary

the Herald, but we have one word to say about Stratford, as it is well that our Contemporaries, who have spoken honorably of the promptitude and unity displayed by the men of Huron, should not be misinformed regarding the animus of the Stratford people, or rather that little portion of it. that by a majority of five approved of Mr. Lafoutaine's resolutions Stratford. as every one who reads the proceedings of parliament is aware, is ambitious of beng a county town she is praying to be divided with her eight townships from the District of Huron, and there are in her boundary, men. who are ambitious enough to be Sheriffs and Wardens and Clerks of the Peace and Council Clerks and Registers and God knows what, and who to attain such lucrative situations, would not scruple-did not scruple to oppose the feelngs of their fellow countrymen-they sold their birth right as freemen and Englishmen-bowed the neck to French dominion for the sake of a miserable mess of District pottage. These gentlemen of whom we speak know full well, that if the present ministry could not maintain its position heir hunger is not likely to be speedily satisfied and therefore it was their interest o lead the forl in hope, and by any means to carry their resolutions in favor of the government and by timely fetching in half dozen labouring men, they succeeded Of the two District Councillors that at

Library for Railway Travellers.—A very important addition to the confort and convenience in the travelling public has been suggested by the general manager of the London and North Western Company. Capt. Haish, and is likely to be rought into early operation. Our readers may have obserted that at the principle stations there are hook-talls, where popular literature as well is new-papers can be purchased; the supply of solds is about to be largely increased and improved in character; and the whole of the station on the line being now undertaken by one party (Mesers, Smith and Son. of the Strant!,) Capt. Haish proposes to establish a gigantic circulating library on the plan that the passenger may select a book at a stall, paying the price thereof, and after travelling and distance on the railway (where his juggery terminates) deliver; it at the stillon, reactiving back the witte, less a triff for the perusal. When it is considered that the London and Doorth-Western Railway extends over early 500 miles, and that more than six millions of passengers travel upon it annually, we cannot conceive any plan more lifesty to while away a tedious hear, and improve the time necessarily spent in juarnaying.
