Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may elter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.			L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dens la méthode normale de filmage sont indiqués ci-dessous.

elure.

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

New Brunswick Museum Saint John

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exempleires originaux dont le couverture en papier est imprimée sont filmée en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'iliustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmée en commençant par la première page qui comporte une empreinte d'impression ou d'iliustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaître sur la dernière image de chaque microfiche, seion le cas: le symbole → signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seui cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

A

LETTER

FROM

WILLIAM SHIRLEY, Efq;

GOVERNOUR OF MASSACHUSETTS-BAY,

TO

His Grace the Duke of Newcastle, &c.

Louisbourg, October 28, 1745.

My Lord Duke

point on the literal man

HE Council, and House of Reprefentatives of the Province under my Government having taken Occasion in a late Address to me to desire, that upon my Arrival here "I would give Orders, that "a full Account of the Proceedings "of the New-England Forces

" raised under my Commission, for the Reduction of " Cape-Breton, during the late Siege of this Place, to

"the Time of its Surrender, should be transmitted in the most effectual Manner, and as soon as possible,

" to his Majesty," I have caused the inclosed Account

of their Proceedings and Services, from their first landing at Canfo, to the Time of the Surrender of this Place, to be taken upon the Spot, from Persons who were privy to every Part of the Transactions, and to be laid before Sir William Pepperrell, and other principal Officers of the Army, for their Perusal and Attestation; and am perfuaded from my own Observations upon the Spot, as well as the Accounts of these Gentlemen, that it contains a justRepresentation of the Conduct and Behaviour of the Troops in the Reduction of this Place: and now take the Liberty to transmit it to your Grace, pursuant to the Assembly's Request to me. The Sum of this Account is, That the New-England Troops having failed from Canfo the 29 to of April; the which Time they were detained there by the unusual Quantity of Ice in Chappeau-Rouge-Bay, came to an Anchor the next Morning, between Nine and Ten, in the Bay, at the Distance of about two Miles from Flat-Point-Cove, where being discovered by the Enemy, a Party of about 1.40 Men were detached from Louisbourg, under the Command of Captain Morepang and M. Boularderie, to oppose their landing: That General Pepperrett having made a Feint to land a Party in Boats at the Cove, in order to draw the Enemy thither, did, by a Signal from the Veffels, cause those Boats suddenly to row back, and join another Party of Boats under his Stern, out of which were landed, at twolvilles Distance from the Cove, about one Hundred of our Men, before the Enemy could come round to oppose them, who, notwithstanding the Enemy had the Advantage of being covered by their Woods, attacked them fo brilkly, that they killed fix of them upon the Spot, took as many Prisoners, (among whom was M. Boularderie) wounded feveral more, and, after exchanging fome Shot, put the rest to Flight, (some of whom were: taken fustaine wound faine I the Da tachme North where in that from t **struck** that Ba Canno Ordna which they of withou other I riages : aParty. that th drove (there i stood Enem from t Fire f Town. the Ifla Troop in the

om were

taken

taken Prisoners the next Day,) with the Damage fustained on our Side, of only two Men's being slightly wounded: That 2000 of the Troops were landed the faine Day, and the Remainder, being near 2000 more, the Day following: That, on the next Day, a Detachment of 400 of our Men marched round to the North East Harbour, behind the Range of Hills there, where they burnt all the Enemy's Houses and Stores in that Neighbourhood, at the Distance of about a Mile from the Grand Battery, whereby fuch a Terror was struck into them, that the same Night they deserted that Battery, leaving the Artiflery confisting of 28 Cannon of 42 lb. Shot, and two of 18 lb. and the Ordnance Stores belonging to it, (except their Powder, which they threw into a Well) fo precipitately, that they only spiked up their Cannon in a slight Manner, without knocking off any of the Trunnions, or doing other Damage to them, and but very little to the Carriages: That the next Morning, being the 3d of May, aParty of about fifteen or fixteen of ourMen discovered that the Enemy had abandoned the Cound Battery, and drove off a Party of them, which attempted to reland there that Morning in Boats, notwithstanding they stood on the open Beach, exposed to the Fire of the Enemy's Cannon from the Town, and their Musquetry from the Boats: That notwithstanding an incessant Fire from the Enemy's Cannon and Mortars in the Town, at the Distance of 5913 Feet from it, and, from the Island Battery, at the Distance of 4800 Feet, our Troops, by the next Day, cleared three of the Cannon in the Grand Battery, which pointed against the Town, and returned their Fire upon the Enemy there, and also from other of the Guns, which pointed against the Island Battery, and were, by Degrees, unspiked in a few Days: That our Troops, within the Compass of

23 Days from the Time of their first landing, erected five Fascine Batteries, against the Town, consisting of Cannon, some of 42 lb. Shot, others of 22 lb. and others of 9 lb. Mortars of 13, 11, and 9 Inches Diameter, with fomeCohorns; all which were transported by Hand, with incredible Labour and Difficulty, and most of them above two Miles, all the Ground over which they were drawn, except small Patches, or Hills of Rocks, being a deep Morass, in which, whilst the Cannon were upon Wheels, they feveral Times funk so deep, as not only to bury the Carriages, but the whole Body of the Cannon likewise: Horses and Oxen could not be employed in this Service, but all must be drawn by Men, themselves up to the Knees in Mud at the fame Time; the Nights in which the Work was to be done, cold and Foggy, their Tents bad, there being no proper Materials for Tents to be had in New-England, at the Outset of the Expedition: But notwithstanding these Difficulties, and many of the People's being barefooted, and almost without Cloaths, by Means of this Service, in which they had worn them out, and their being taken down with Fluxes, so that at one Time there were 1500 Men incapable of Duty, occasioned by their Fatigue, they went on chearfully without being discouraged, or murmuring, and by the Help of Sledges transported the Cannon and Mortars over these Ways, which the French had always thought impassable for such heavy Weights, and was indeed impracticable by any People of less Resolution and Perseverance, or less Experience in removing heavy Bodies; and besides this, they had all their Provisions and heavy Ammunition, which they daily made Use of, to bring from the Camp over the same Way upon 11 1 11 115 7 1 1.11 their Backs. not be a second of the second of the and onew from Batte main ced off by

King'

To annoy our People in making their Approaches, and carrying on their Batteries the Enemy erected new Works, where they mounted fome Cannon, from whence, as well as from the Cannon of other Batteries, and from their Mortars, they continually maintained a ftrong Fire, till their Cannon was filenced by being difmounted, or having their Men beat

off by our Cannon.

The most advanced of our five Batteries, which was finished on the 17th of May, was within the Distance of 250 Yards from the West Gate of the Town; so that from this Battery several of the Enemy were killed by our Musquetry, as were some of our Men by the Enemy's from the Walls; and indeed this Battery was so near the Enemy's Works, that our Men were obliged to load the Cannon there under the Fire of their Musquetry, which was very sharp on both Sides, the Enemy generally opening the Action every Morning with the Fire of their Small Arms upon this Battery, for two Hours, which was constantly returned with Advantage of our Side. The Execution done from these, and the Grand Battery, was very confiderable: The West Gate was entirely beat down, the Wall adjoining very much batter'd, and a Breach made in it at about 10 Feet from the Bottom of the Wall. The Circular Battery of 16 Cannon, 24 Pounders, near the West Gate, (and the principal one against Ships next to the Grand Battery, and Island Battery) was almost entirely ruined, and all the Cannon but three dismounted. Their North East Battery consisting of two Lines of 42 and 32 Pounders, in all seventeen Cannon, another principal Battery against Ships, was damaged, and the Men beat off from their Guns. The West Flank of the King's Bastion belonging to the Cittadel, and the Bat-

Way upon

tery there of fix 24 Pounders, which pointed to the Land Side, and greatly annoyed our Works, was almost demolished. Two Cavaliers of two 24 Pounders each, raifed during the Siege, and two other Cannon of the same Weight of Metal, run out at two Embrazures cut through the Parapet near the West Gate at the same Time, (all pointing against our Batteries) were damaged and filenced. The Cittadel was very much damaged; feveral Houses in the City entirely demolished, and almost every one more or less hurt; and Maurepas-Gate, at the Easternmost Part of the City, shatter'd; And as cross Fires from the Cannon and Mortars, and even from our Mufquetry ranged through the Houses and Streets in every Part of the City, and through the Enemy's Parades, whereby many were killed, it drove the Inhabitants out of their Houses into Casmates, and other cover'd Holds, where they were obliged to take Refuge for feveral Weeks: And besides this, the Fire from the Grand Battery damaged also the Barracks of the Island Battery.

During this Time our Parties of Scouts to thoroughly ranged the Woods, that they feldom returned without bringing in some Prisoners, which very much confined the Enemy within their Walls, who were constantly worsted in all Skirmishes, and repulsed in every Sally which they made, and frequently by an inferior Number of our Men, and with very little Loss, upon these Occasions, sustained on our Side; the Chief of which was a Party of 18 of our Men stragling contrary to Orders being furprized and cut off by a large Number of Indians, and another of Nine coming on Shore, out of one of the Cruizers to water, without their Arms, being likewise surprized and cut off by some That on the 26th of May, after some ineffec-

tual Preparations for making an Attack upon the Enemy's Island Battery, which is a strong Fort built on a rocky Island at the Entrance into the Harbour, mounted with 30 Cannon of 28 lb. Shot, and having feveral Swivel Guns upon its Breast Work, and two Brass 10 Inch Mortars, and 180 Men, it was at Night attempted by a Party of 400 of our Men in Boats; but from the Strength of the Place, and the Advantage which the Enemy had by being under Cover, and our Men exposed in open Boats, the Surf running high, our Men not being thoroughly acquainted with the best Place for landing, and the Enemy besides (as is most probable) being apprized of their Design, they were repulsed with the Loss of having about 60 killed and drowned, and 116 taken Prisoners; yet under these Disadvantages several of them advanced within the Enemy's Battery, and maintained a Fight with them for some Time before they surrendered, and killed some of them: That it being judged of the utmost Consequence to make ourselves Masters of the Mand Battery, as it was thought extremely dangerous for His Majesty's Ships to have entered the Harbour 'till the Enemy could be annoyed in that Battery; and it being after the last Attempt thought impracticable to reduce it by Boats, it was determined to erect aBattery near the Light-House opposite to it, at 3400 Feet distance from it; and the same was, by the 11th of June, notwithstanding the almost insuperable Difficulties, which attended the drawing of the Cannon up a steep Bank and Rock, raised in such a Manner, as not to be exposed to more than four of the Enemy's Cannon, and at the same Time to flank a Line of above twenty of their Guns; and two Eighteen Pounders were on that Day mounted, and began to play, and by the 14th of June Four more Cannon of 18 lb. Shot were

were added, and on the 15th a Mortar of 13 Inches Diameter was removed thither, out of which 19Bombs were thrown, 17 whereof fell within the IslandBattery, and one of them upon the Magazine; and this, together with the Fire from our Cannon, to which the Enemy was very much exposed, they having but little to shelter them from the Shot, which ranged quite through their Line of Barracks, fo terrified them, that many of them left the Fort, and ran into the Water for Refuge. And now, the Grand Battery being in our Possession, the MandBattery (esteemed by the French the Palladium of Louisbourg) fo much annoyed from the Light-house Battery, that they could not entertain Hopes of keeping it much longer; the Enemy's North-East Battery being damaged, and fo much exposed to the Fire from our advanc'd Battery, that they could not stand to their Guns; the circular Battery ruined, and all its Guns but three difmounted; whereby the Harbour was difarmed of all its principal Batteries; the West Gate of the City being demolished, and a Breach made in the adjoining Wall, the west Flank of the King's Bastion almost ruined; and most of their other Guns, which had been mounted during the Time of the Siege, being filenced; all the Houses and other Buildings within the City (fome of which were quite demolished) fo damaged, that but one among them was left unhurt; the Enemy extremely harraffed by their long Confinement within their Casmates, and other covered Holds, and their Stock of Ammunition being almost exhausted, Mr. Duchambon fent out a Flag of Truce to the Camp on the 15th Day of June in the Afternoon, defiring Time to confider of Articles of Capitulation, which was accordingly granted them 'till next Morning, when they tent Articles in, which were rejected by the General and Commodore, and others proposed by them

ted by the d by them in their Stead, and accepted by the Enemy: And Hostages being exchanged on the same Day for the Performance of the Articles, on the 17th of June the City was surrendered to Mr. Warren and General Pepperrell, and the Garrison, consisting of about 650 Regular Troops, and the Inhabitants of the City being about 1300 effective Men, besides Women and Children, made Prisoners by Capitulation, with the Loss on our Side of no more than 101 Men killed by the Enemy and all other Accidents from the Time of their Landing to the Reduction of the Place, and about 30 who died of Sickness.

I omit mentioning the Breaking up of the Settlements at St. *Peters*, and eight other Fishing Settlements upon this Island; and the Burning of several Houses at St. John's Island within the Time of the Siege, by Com-

panies put on board fome of our Cruizers.

By this Representation of the Services of His Majesty's Land Forces, I would not be understood to intend to exclude his Majesty's Ships from their just Share in the Reduction of this Place. Mr. Warren, upon whom I very much depended from the Beginning for Affistance and Success in this Enterprize, did, upon his receiving Orders by his Majesty's Sloop Hind, the 9th of *March*, to proceed to *Bofton*, and concert Measures with me for the Protection of Nova Scotia, and the Annoyance of the Enemy's Settlements, \mathcal{C}_c . immediately proceeded with his Majesty's Ships Superbe, Mermaid, and Launceston, under his Command for Boston; but upon getting Intelligence at Sea of the Departure of the New-England Land Forces for Canfo, tho' he was then within 30 Leagues of Boston, without Refreshments, or his Complement of Ordnance-Stores, and one of his Ships not very fit for immediate Service, fail'd directly for that Place; where having overtaken the Forces, and conferred with the General by Letter, upon his Majesty's Service in the Expedition; and it being thought adviseable by both, that the Ships should directly proceed before Louisbourgh Harbour to cut off all Supplies and Intelligence from the Enemy, immediately proceeded there, and most effectually blocked up the Harbour; and by engaging and taking the Vigilant, a French Ship of War of 64 Guns, bound for Louisbourg with some Ordnance Stores, cut off from the Enemy all Hopes of any Supplies or Succours, and gave great Spirits to the Land Forces in carrying on the Siege; and afterwards, upon his Majesty's Ship Chester's Arrival from England to reinforce him, and receiving Advice that the Canterbury and Sunderland were following, determined to enter the Harbour as foon as those Ships should join him, and attack the Town and Batteries with his Majefty's Ships, whilft the Land Forces made an Affault upon the City by Land; which was agreed on, between Mr. Warren and the General, to be made the 16th of June, and the Ships were accordingly clearing on the 15th of June, in order to enter the Harbour, but were prevented by the Enemy's making Propofals for a Capitulation: And indeed Mr. Warren offer'd his Affiftance for His Majesty's Service in every Shape.

It is unneceffary for me to trouble your Grace with a Detail of the Plans proposed during the Siege for a more speedy Reduction of the Place; as far as I can judge, it was effected most happily in the Manner which it was reduced in, as the Success of the Event was much more secure in this Way; and it has cost sewer Lives; and the Place was gained without the least Damage being done to any of his Majesty's Ships.

Grac Man I hope these Serves of the New-England Troops in the Field, which seem to have equalled the Zeal of the Massachusett's Council and Assembly within their Province, for His Majesty's Service, upon this Occasion, may be graciously accepted by His Majesty, as a Proof of that perfect Duty and firm Loyalty which, I am persuaded, all the Colonies concerned in the Reduction of this Place (but especially that of the Massachusett's Bay, for which I can more particularly answer) bear to His Majesty's facred Person, and to his Government, and of their ready Disposition to promote the general Welfare of his Dominions: And I humbly beg of your Grace to lay this Account before His Majesty, in such Manner as your Grace shall think most proper.

I am, &c.

OURNAL

Of the SIEGE of

LOUIS BOURG, &c.

HE Forces raised within the Province of the Massachusett's Bay, being about 3250 Men, exclusive of Commission Officers, embark'd the 24th of March, 1744-5. 1744-5, in feven Weeks from the Mar.24. Time of iffuing Governor Shirley's Proclamation for raising them, under Convoy of the Shirley-Galley, then in the Employ of that Government, and now his Majesty's Frigate Shirley, Captain Rose Commander, and arrived the 4th of April at Canfo, appointed by the Governor to be the Place of Rendezvous for the Transports and Cruizers, and for a Communication of Intelligence between himself at Boston, General Pepperrell's Camp before the Town of Louisbourg, and Mr. Warren from the Ships before the Harbour, and for lodging all Stores not in immediate Use in the Camp and Fleet, where they found the New-Hampshire Forces, being 304, inclusive of Commission Officers, arrived four Days before them, and were joined the 25th of the fame Month by the Connecticut Forces, being 516, including Commission Officers. Chapeaurouge Bay, which was the Place appointed for landing the Troops, being fo fill'd with Ice, as to make their landing impracticable

practicable before, they were detained there till the latter End of the Month: in which Time the General drew up and reviewed the Forces on Canso Hill, and formed the feveralDetachments ordered to be employed in the feveral Attacks proposed to be made immediately after their landing at Flat Point Cove, within three Miles of the Town of Louisbourg, to the W. S. W. and four Miles distant from the Grand Battery to the S.W. according to the Plan of Operations concerted at Beston, and there given him in Charge by the Governor's written Orders. During the Stay of the Troops there. a Blockhouse was erected on Canso Hill, and called Cumberland, the Flag being hoisted on his Royal Highness's Birth-Day, picketted without, and defended by eight Cannon of nine Pound Shot, and to be garrifon'd by two Companies of Soldiers of 40 Men each, besides Officers. From thence two arm'd Sloops were fent to Bay Verte, to take or destroy some Vessels that, according to Information, were to carry Provisions from thence to Louisbourg.

And the 18th of April the Renomee, a French Ship of War of 30 Guns, nine Pounders, with 300 Seamen and 50 Marines, being charged with publick Dispatches, fell in with the arm'd Vessels in the Service of the Massachusett's Government before Louishourg Harbour, where she maintain'd a Running Fight with them, but got clear by out-sailing them. This Ship afterwards fell in with the Connecticut Troops under the Convoy of their own Colony Sloop, and the Rhode-Island Sloop, the latter of which she attacked and damaged considerably; but finally the Sloop got off, as did the Troops with their other Convoy during the Engagement. And after having made two more Attempts to push into the Harbour, and been again hindred and chased by the Massachusett's Cruizers, returned to France with-

ance without And on the 23d Mr. Warren, in his Majesty's Ship April 23 Superbe of 60 Guns, with the Launceston of 40 Guns, Captain Calmady, and the Marmaid of 40 Guns, Captain Douglas, under his Command, and after staying there some Hours, and having conferr'd with the General by Letter, Mr. Warren, with the rest of the King's Ships, sailed to cruize off Louisbourg.

On the 29th of April the Troops embarked in four Divisions of Transports, and sailed for Chappeaurouge Bay, under Convoy of one arm'd Snow and two arm'd Sloops in the Service of the Massachusett's Government, under Fire of whose Cannon they were to land. And at the same Time a Detachment of 270 Men, under the Command of a Colonel, and Convoy of an arm'd Sloop in the Pay of the New-Hampsbire Government, were sent to St. Peter's, a small French Settlement on Cape-Breton, with Orders (pursuant to the before-mentioned Plan of Operations) to take the Place, burn the Houses, and demolish the Fort, which was accordingly effected.

On the 30th of April, between Nine and Ten in the Morning, the Fleet, having the main Body of the Troops on board, came to an Anchor in Chapeaurouge Bay, at the Distance of about two Miles from Flat Point Cove; upon the Discovery of which the Enemy immediately fired some Cannon, and rang their Bells in the Town, to alarm and call in their People living in the Suburbs, and sent out of the Town a Detach-

ner

ment of about 150 Men, headed by Captain Morpange and M. Boulerderie, late an Officer in the Duke Regiment in France, to oppose the landing of our Troops; upon the Sight of which, the General made a Feint of landing a Party of our Men in Boats at Flat Point Cove, in order to draw the French thither, (which had it's Effect;) and upon a Signal from the Vessels, the Boats returned, and joined another Party of Boats under his Stern, from whence under the Fire of our Cannon, was landed, two Miles higher up the Bay, about 100 of our Men, before the Enemy could get up with them; and upon briskly attacking them, though under the Advantage of being cover'd with their Woods, after exchanging some Shot, killed fix of them upon the Spot, took as many Prisoners, (among whom was M. Boulerderie) and wounded several others; forced the Remainder to make a precipitate Flight towards the Town, with the Loss of some others, who were the next Day taken Prisoners before they recovered it, which was done with the Damage on our Part of only two Men being flightly wounded. On the fame Day about 2000 of the Troops were landed without any farther Opposition.

On the next Day, being the 1st of May, the Remainder landed, and begun to getProvisions andStores The landing of Provisions, Ammunition, and heavy Artillery, was attended with extreme Difficulty and Fatigue, there being no Harbour there, the Surf almost continually running very high, so that frequently for fomeDays together there was no landing anyThing at all; and when they did, the Men were obliged to wade high into the Water to fave every Thing that They had would have been damaged by being wet. no Cloaths to shift themselves with, but poor Defence from the Weather; at the fame Time the Nights were

And on the 3d of May we took Possession of the May 3. Grand Battery which the Enemy had deferted, owing, as it is supposed, to the Surprize they were in, from the firing the Houses in the Neighbourhood. had abandoned this Battery in so much Hurry and Confusion, that they had only spiked up their Guns, without breaking off any of the Trunnions, or much damaging their Carriages. There were found here 28 Cannon of 42 Pound Shot, and two of 18 Pound, 350 Shells of 13 Inches, and 30 Shells of 10 Inches, and a large Quantity of Shot. The fame Day a Party of the Enemy in Boats attempted to regain the Possession of it, but were beat off by about 15 or 16 of our Men, who had before taken Poffession of the Battery, and stood on the Beach exposed to the Enemy's Musquetry from the Boats, and Cannon from the Town, which played continually upon them. The Distance from the Grand Battery to the Island Battery is 4800 Feet. This Battery commands the whole Harbour from the Entrance between the Lighthouse Point and the Mand Two Flanks of two Guns each point from hence against the Town, and a Line of 10 Guns against the Island Battery. The Remainder to the North East Part of the Harbour. By the Fire from hence during the Siege, the Citadel and Houses in the Town suffered very

very much, as also the Barracks at the Island Battery. The Towers of this Battery were formething damaged, one Man killed and a few wounded by the Enemy's Cannon, which fired very briskly upon it, as did also their Mortars from the Town and Island Battery, especially at the Beginning. In a few Days the Camp was formed about Half a Mile from the Place where they made a Feint of landing, but without throwing up Lines, depending only upon their Scouts and Guards; but afterwards they encamped regularly, and threw up Lines near the Place of landing their Stores; and Scouts during the Siege were constantly fent out, who feldom returned without bringing some Prisoners, and very much confined the Enemy within their Walls,

and prevented their making frequent Sallies.

May 4. May the 4th, we began to fire from the Grand Battery, from three Cannon which had been cleared, as likewise to bombard the Town from Greenbill, being the Place where the first Battery was planted, of one 13 Inch Mortar, one of 11 Inches, and one of nine Inches, two Cannon nine Pounders, and two Falconets, being two Miles distant from the Camp, 1550 Yards from the Cittadel. Five hundred Men were ordered to fustain this Battery; but finding the nine and eleven Inch Mortars would not reach the City, they were removed

The 7th of May, and planted with 10 Cohorns at May 7. the Distance of 900 Yards from the Cittadel, where a Battery was erected

The 10th of May, of four 22 Pounders: May 10.

The 13th two of them bursted, owing to their not May 13. being found.

The 15th of May, four 22 Pounders more were May 15. brought to this Battery, as also the two 9 Pounders and 13 Inch Mortar from Greenbill. From this Battery the

the City was bombarded, and as the Shot from this Battery ranged through the Centre of the City, it damaged not only the WestFlank of the King's Bastion, which it flank'd, but also the Cittadel and the greatest Part of the Houses in the Town, and even Port Maurepas in the Eastermost Part of the City. Battery was fustained by the same Forces that sustained the Birtery at Greenbill. The Damage received at this Battery was the breaking the Trunnion of one Cohorn, and bursting another; fix Men wounded, of whom one died by the Bursting of two 22 Pound Cannon. One Man killed and two wounded by the Enemy the

The 25th of May, the 13 Inch Mortar was burfted, May 25. and a Bombardier wounded, occasioned by some Flaw in the Shell, which broke in the Mortar. Another 13 Inch Mortar from Boston was mounted in the same Place, and play'd the eighth Day after the other was The Transporting the Cannon was with almost incredible Labour and Fatigue, for all the Roads over which they were drawn, laving here and there small Patches of rocky Hills, was a deep Morass, in which, while the Cannon was upon the Wheels, they feveralTimes funk, fo as to bury not only theCarriages, but the whole Body of the Cannon likewise. Horses and Oxen could not be employ'd in this Service, but the whole was to be done by Men, themselves up to the Knees in Mud; at the fame Time the Nights, in which the Work was done, cold, and for the most Part foggy; their Tents bad, there being no proper Materials to be had for Tents in New-England, at the Time the Forces were raifed: But notwithstanding all these Difficulties, and the People being taken down chiefly withFluxes, so that at one Time there was no less than 1500 incapable of Duty, occasion'd by their

Fatigue, they went on chearfully, without being difcouraged or murmuring; and by the Help of Sledges of about 16 Feet in Length, and five Feet in Width, and 12 Inches thick, they transported the Cannon over these Ways, which the French had always thought impassable for such heavy Bodies, and was, indeed, impracticable by any People of less Resolution and Perseverance, or less Experience in removing heavy Weights; and besides this, they had all the Provisions, Powder, Shot and Shells that they daily made Use of, to transport over the same Ways upon their Backs. During this Time the French erected two Cavileirs of two Guns each upon the Rampart of one of the Faces of the King's Bastion, planted a great Number of Swivel Guns upon the Wall facing the Harbour, and to fecure the low Wall at the South East Part of the Town, added to the Top of it a Plank-work picketted, to raise it to the same Height with the rest of the Wall, and a Range of Pallifadoes at a little Distance within the Walls, and raised a little Battery of three small Guns upon the Parapet of the lower South Bastion fronting Cape Noir, a small Hill which very much commands the Town.

May the 7th, a Flag of Truce was fent into the Town with a Summons to deliver it up to his Britannick Majesty: To which an Answer was returned by M. Duchambon Commander in Chief, That the King his Master having entrusted him with the Desence of the Island, he could not hearken to any such Proposals till after the most vigorous Attack, and that he had no Answer to make but by the Mouth of their Cannon.

The 13th, notwithstanding all the Care and Vigi- May 13. lance of the Men of War and the Colony Cruizers, a Snow from Bourdeux got in, which they attempted to fire by a Fire-Ship from the Grand Lattery, but in

May the 16th, the Cohorns and nine and eleven May 16. Inch Mortars were removed to a Hill within 440 Yards of the West Gate; from whence they annoy'd the Effeny very much and received no Damage at A Party of 100 Men came out of the Town in the Night, and landed near the Lighthouse Point, and the next Day attempted to furprize a Party that was posted at the Lighthouse, who first discovered the Enemy from an Eminence, where they were on Guard: Forty only of our Men advanced towards them: The Parties met in a Wood, and the Enemy were routed; five of them killed, and the fixth, the Lieutenant wounded and taken Prisoner. The rest that escaped joined some others and 80 Indians about Mera, and were attacked two Days after by another Party of our Forces that were out on a Scout. This Dispute lasted a confiderable Time; and several of our Men made thirty Discharges each on the Enemy, who were again routed. In this Action there was but one Prisoner ta-Upon Return of this Party, another Scout was fent out the next Day, who returned in two Days, and brought ten Prisoners, who reported, that many of their People were killed and wounded in the last Skirmish. Our Scouts and Cruizers, at different Times, took and burnt most of their small Settlements, and took about 300 Prisoners.

The 17th of May the advanced Battery was raised, May 17. bearing W. by N. half N. 250 Yards Distance from the West Gate, and one 18 Pounder mounted; and the next Night another 18 Pounder and two 42 Pounders

The

were mounted. They were all brought from the Grand Battery, upwards of two Miles, as the Road goes, over a very rough, rocky, hilly Way: From hence not only the West Gate was beaten down, but a Breach made in the Wall adjoining, and the North East Battery was damaged and render'd almost useless, their Guns lying entirely open to the Fire from this This Battery being fo near the Town there was no Safety in loading the Cannon, but under the Fire of the Musquetry, which was very smart on both The Enemy generally open'd the Action in the Morning with the Fire of their Small Arms for two Hours, which we returned with Advantage on our Side. We were likewise warmly entertain'd by the Enemy from a Flank of their North East Battery, from the West Gate Battery, and the West Flank of the King's Bastion, which last flank'd this Battery; and therefore,

May 20. On the 20th a Trench being dug on the South End, one 18 Pounder and two 9 Pounders were brought from the Eight Gun Battery, and mounted upon the South Line against the Flank, which, with the Remainder of the Guns at the Eight Gun Battery, difmounted some of the Enemy's Cannon, and annoy'd them so much, that they were silent the rest of that

Day, which was often the Case afterwards.

Particularly May 22, the Fire was hot on both Sides till Twelve o'Clock at Noon, when the French were

beat from their Guns.

The 23d of May the Enemy mounted two new Guns at the West Flank of the King's Bastion, but in four Hours were forced to leave them.

The 6th of June they had two Guns run out of new Embrazures, cut thro' the Parapet near the West Gate, which foon began to play with great Fury, and we were obliged to turn three Guns against them, and in three three ther with being nen great mage wour mean to ba The Batte gazi Boat Tim gent

three Hours we dismounted one, and filenced the other for that Day. The nine and eleven Inch Mortars with constant Use straining their Beds, occasioned their being removed to this Battery, which was nearer the nemy, as were also the Cohorns. The Bombs in great Number fell all round, but did very little Da-There were 10 Men killed, and 15 or 16 wounded, several of them with Musket-Balls. In the mean Time the Enemy worked constantly in the Night: to barracade the Gate-Way, wherea Breach was made. They also made a Retrenchment across the Circular-Battery, and raised another Work to cover their Magazine, and laid a Boom before the Town to hinder Boats from landing under their Walls. At the same Time our Men of War and Cruizers were very diligept, and took feveral Prizes. And

On the 19th of May there was an Engagement off, May 19. the Harbour, in Sight of the Camp, between some of

our Ships; and a French Man of War.

The 21st a Letter came to the General from the May 21. Commodore, acquainting him he had taken the Vigilant, a French Ship of 64 Guns; besides the Superbe, the Mermaid, Eltham, Massachusett's Frigate, and Shirley Galley, were all in the Engagement, and at the taking of her. Three Days after the taking the Vigin lant, Capt. Edwards, in the Princess Mary of 60 Guns, joined the Commodore; and the next Day, Capt. Cornwall, in the Hetter of 40 Guns.

The 20th of May the North West Battery, com- May 20. monly called Titcomb's Battery, was erected, bearing North West by West about 800 Yards Distance from the West Gate, and two 42 Pounders mounted, which were brought from the Grand Battery; and about a Fortnight after were brought three 42 Pounders more. This Battery did great Execution against the Circular,

D 2

Battery: By Means of this Battery and the Advance Battery, not only the West Gate was demolished, but a large Breach was made in the Wall to within ten Feet of the Bottom of the Ditch. The Circular Battery was almost entirely demolished; but three Guns out of sixteen were left standing, and these so exposed to the North West Battery, that nobody could keep the Platform. The West Flank of the King's Bastion was almost entirely ruined, but in some Measure repaired with Timber. This Battery, the Advance Battery, and the Eight Gun Battery, were sustained by 1350 Men. After many fruitless Preparations for an Attack on the Island Battery, it was attempted

On the 26th of May at Night, by a Party of 400 Men; but from the Strength of the Place, and the Advantage the Enemy had of being under Cover, and our Men exposed in open Boats, which a Musket Ball would fink, the Surf running very high, and their not being thoroughly acquainted with the best Place of Landing, they were repulsed with the Loss of about 60 killed and drowned, and 116 taken Prisoners.

June 10. The roth of June, the Chefter arrived from England, and joined the Commodore; and,

June 12. On the 12th the Canterbury and Sunderland; as did likewife the Lark, with a Store-ship under her Convoy, bound to Annapolis-Royal. It being of the utmost Consequence to be Masters of the * Island Battery, and, after the last Attempt, thought impracticable to reduce it by Boats, it was determined to erect a Battery near the Light-house opposite to it, which would be 3400 Feet distant, and in such a Manner, as to be exposed to the Fire of but sour of the Enemy's Guns, and at

The Island Battery is a strong Fort at the Entrance into the Harbour, mounted with 30 Guns 28 Pounders, and seven Swivels, baving two Brass ten Inch Mertars, and garrison'd with 180 Men.

the same Time to flank a Line of above 20 of their Guns; which, notwithstanding the almost + insuperable Difficulties that attended it, was happily effected, and two 18 Pounders mounted the 11th of June;

foners.

And by the 14th four more, sustained by 320 Men. June 14. Powder growing short, the Fire had for some Days been very much flacken'd, and the French began to creep a little out of the Casmates and Covers where they had hid themselves during the greatest Fierceness of it; but this being the Anniversary of his Majesty's happy Accession to the Throne, it was determined to celebrate it as became loyal Subjects and good Soldiers; and Orders were given for a general Discharge of all the Cannon from every Battery, at Twelve o' Clock; which was accordingly done, and follow'd by an inceffant Fire all the rest of the Day; which much dishearten'd the Enemy, especially as they must be senfible what must be the Consequence of this new Battery. It was now determined, as foon as possible, after the Arrival of the Canterbury and Sunderland, to make a general Attack by Sea and Land r Accordingly they arriving the next Day, all the Transports were order'd off to take out the spare Masts and Yards, and other Lumber of the Men of War. The Soldiers were employ'd in gathering Moss to barricade their Nettings, and 600 Men were fent on board the King's Ships at the Commodore's Request: The large Mortar was order'd to the Light-house Battery; and a new Supply of Powder arriving, the Fire was more fierce from this Time to

The

+ The Difficulties were, transporting the Cannon in Boats from Chapeauroge Bay to the Eastward of the Light house; the getting them up the Bank of the Shoar, which was a steep craggy Rock; the hawling them a Mile and a Quarter over an incredible bad Way of Hills, Rocks, and Morasses.

June 15.

The 15th, than ever. When the Mortar began to play from the Light-house Battery upon the Island Battery; out of 19 Shells, 17 fell within the Fort, and one of them upon the Magazine, which, together with the Fire from the Cannon, to which the Enemy was very much exposed, they having but little to shelter them from the Shot that ranged quite through their Barracks, so terrified them, that many of them left the Fort, and run into the Water for Refuge.

The Grand Battery being in our Possession; the Mand Battery being so much annoy'd by the Lighthouse Battery; the North East Battery so open to our Advance Battery, that it was not possible for the Enemy to stand to their Guns; all the Guns in the Circular Battery except three being dismounted, and the Wall almost wholly broke down; the West Gate demolished, and a large Breach in the Wall adjoining, the West Flank in the King's Bastion almost ruined; all the Houses & other Buildings almost tore to Pieces, but one House in the Town being left unhurt, and the Enemy's Stock of Ammunition growing thort, they fent out a Flag of Truce to the Camp, defiring Time to confider upon Articles of Capitulation. This was granted till next Morning, when they brought out Articles, which were refused, and others sent in by the General and Commodore, and agreed to by the Enemy: Hostages were exchanged; and

June 17.

On the 17th of June, the City and Fortresses were surrendered, and the Garrison and all the Inhabitants, to the Number of 2000, capable of bearing Arms, made Prisoners, to be transported to France with all their personal Effects. During the whole Siege, we had not more than 101 Men killed by the Enemy and all other Accidents, and about 30 died of Sickness, And

according to the best Accounts, there were killed of the Enemy within the Walls, about 300, besides Numbers that died by being confined within the Casmates.
