Liberals and Conservatives Lined Up For Approaching Elections—Conventions Arranged.

HAMILTON, July 30.—(Special.)—Dissolution of parliament, while, of course, expected at an early date, caused a mild degree of surprise here when announced in The Sunday World on Saturday night, inasmuch as the latest despatches published in the local papers on Saturday indicated an indefinite continuance of the session. The local organizations of both parties have lately been rejuvenated, and for the last few days have been waiting on tiptoes for the announcement made yesterday.

Now that the election is on, both organizations will get down to business at once, and rush out their candidates. At the last the Toronto Hamilton Conservative Association, more than a month ago, a resolution was passed providing that a convention be held within ten days for the purpose of nominating parliamentary candidates, but in the stress of the hydro campaign the convention was postponed by the local Tories.

Some Names Mentioned.

The convention will probably be held this week, and it is fairly certain that T. J. Stewart, M.P. for West Hamilton, and Samuel Barker, M.P. for East Hamilton, will again be the standard bearers in the two local constituencies.

The names of Geo. Lynch Stanton, K.C., and Controller Bailey have been mentioned as possible candidates for nominations in the Conservative, but it is understood that if these names are presented to the convention they will be withdrawn in favor of the present members.

Allan Studholme, the labor member of the provincial assembly is also regarded as a possible Tory nominee for the East Hamilton seat, but it is not considered probable that he will make any effort to take the honor from the present federal representatives.

Local Grits, when spoken to by The World to-night, were reluctant to discuss the political situation in this city, and little could be learned from them. One Liberal name prominently mentioned as a possible candidate for parliamentary honors is that of Controller and ex-Mayor John J. McLaren, who, it is thought, may oppose T. J. Stewart in West Hamilton. Mr. McLaren is at present in England, and it is not known what his attitude will be regarding the election, but it has been reported that he would take great personal pleasure in contesting the West Hamilton seat. Mr. McLaren, if elected, appears to be of any chance of success.

Back to Politics.

It is more likely, however, that Mr. Stewart's opponent will be a young man, the present collector of customs for the port of Hamilton, from whom Mr. Stewart wrested the seat at the last election. This young man, so far as is known, has made no announcement in regard to the matter, but it is said that he is making no effort to avoid the election.

Despite the reticence of the Liberals interviewed to-night, it was learned that a meeting of the Hamilton organization has been called for the night of the 31st for the purpose of considering names to be placed before the regular convention, which will probably be held this week.

The forthcoming election is not expected to disclose any material change in the political complexion of the two Hamilton constituencies and is practically assured. Any nominal advantage that may accrue as regards numerical strength at the polls will almost certainly favor the Conservatives.

The anti-reciprocity sentiment in the Ambitious City is naturally strong by reason of the great number of manufacturing industries which flourish here, and this sentiment has been recently strengthened to a considerable degree by the establishment of several manufacturing industries which probably would not have located in Canada under a treaty as is now supported by the Liberal Government.

Three Troupes of Gymnasts.

A first-class free vaudeville program has been arranged for patrons of Scarborough Beach this week. The headliners are the Ishakawa Troupe of Japanese acrobats and jugglers, who are heralded as the cleverest Japs in the show business. The Four Bards, who are probably refused to admit that the orientals can teach them anything about their art, especially about that department of it that consists of making leaps and dives. The Bards boldly advise themselves as the greatest gymnasts in the world.

Zeno, Jordan and Zeno, the comedy casters, have also been engaged, thus making 11 people who will figure in the free vaudeville performance this week. The 65th Regimental Band of Buffalo will render a program every afternoon and evening, and what the public of Toronto thinks of this track military organization may be judged from the fact that on Sunday afternoon and last night about 40,000 visited the park to hear the concert.

BAD WEATHER SPOILS EVENTS OF AVIATION MEET

High Winds Make Flights Almost an Impossibility—Willard Lights in a Swamp.

HAMILTON, July 30.—(Special.)—Bad weather in the shape of wind made it a long dreary wait at the aviation meet at the Tuckers farm over Saturday, but those whose patience lasted thru the ordeal were well rewarded by two pretty flights by McCurdy in his new racing biplane, which is entered for the speed contests at Chicago, and one spectacular effort by Willard in his Curtiss machine, which, while it is a pretty flight to watch, was fraught with a deal of danger and ended in a mishap which fortunately had no more evil result than slight injuries to the machine, when he was driven to land in a swamp to the west of the aviation ground.

J. V. Martin, the English aviator, again had trouble with his motor, and this, coupled with the wind, made it impossible for him to make any flights other than two or three short jumps of a few feet while testing his engine. He was therefore unable to take The World man into the air, as had been arranged, but expects to be in shape to do so Monday afternoon.

During a blustery and gusty wind, which blew from the field during the entire afternoon, making flights impossible until nearly 7 o'clock in the evening. No flights were made, but the flying machine was paraded and explained by Thomas P. Jackson of the McCurdy-Willard Aeroplane Co., who kept the crowd in good humor until the flying machine arrived on the scene and furnished inspiring music to the weary watchers.

Made Short Flights.

Mr. Martin, who had been working on the delicate engine of his machine all morning, succeeded in getting it in better shape than heretofore, and raised the hopes of the waiting crowd by several runs about the field, but sticking to the wheels save for three jumps of about four feet in length and ten or twelve feet in height. He could not take to the air with the wind as it was blowing across his lifting course.

"THE WIDER MARKET" IS NOT FOR CANADIAN SHEEP

Continued From Page 1.

buying sheep and selling meat, and the consequence is that they will do in Canada, once they have an opportunity, what they have done in the States: cut down the price to the farmer, and put up the price to the consumer, which they are well able to do by their cold storage appliances and their enormous business organization. The cry of the American public, farmers and consumers, is that the meat trusts have cut down the price for live stock to the farmer, and put up the price of meat to the consumer! That's your wide market. When reciprocity carries, there will be no dead meat business in Toronto, or if there is, it will be controlled by Chicago, and the chances are that people in the Ontario towns will be fed with mutton killed in Chicago and raised by western farmers. A lot of these sheep that are in the Toronto market to-day are from Chicago and how much from further west of Chicago they came we do not know, but to-day they can pay the duty, come in here and swamp the Canadian farmer.

So we ask again our good friends The Globe and The Star to take another try at this situation and explain it. In the meantime, The World's photographer has been up to the stock market and has got some splendid pictures of these sheep and it will be in our paper to-morrow. They are fine sheep, also some Canadian butchers aver that some of them are not of as good flavor as the Canadian meat. But on this point we know that the American sheep raiser has given more attention to breeding for meat than the Canadian, and he knows his business right down to the ground, and he is a man who is looking for "the wider market," and he is going to get it in Canada, and that is why the president of the United States, and the senate of the United States, and the house of representatives of the United States, and the newspapers of the United States are in favor of reciprocity.

Let this conclude for the present our sheep story for to-day. We may have a bigger one to-morrow, but in the meantime The Globe and The Star can try again and tell us all about this wider market. As a postscript to this article we append the following gleaned by our live stock reporter:

W. J. Neely, president of the Toronto Live Stock Association, and for many years a drover, who shipped stock both to Buffalo and Toronto, gave it as his opinion that the Ontario farmer would be driven out of raising sheep if reciprocity should pass.

John Black, Ferguson, of the firm of Rice & Whaley, a life long live stock dealer in sheep and lambs, said the price for sheep would be \$2 per head cheaper should reciprocity come into effect.

GREAT DANGER TO WEST IS QUEBEC ROMANISM

Rev. Dr. Hincks Says Dominion Government is Swayed by Solid Vote of Roman Catholics.

Preaching from the text "Render unto Caesar the things that are Caesar's," and unto God the things that are God's," the Rev. W. H. Hincks, at Broadway Tabernacle yesterday, made a trenchant attack on what he described as the ultraromanism of a section of the Roman Catholics. While making a tribute to many devout Romanists in the country, he spoke strongly of the work done by those whom he termed "priest-politicians." For a description of what he termed ultraromanism, he quoted from a Romanist, the late Franz Xavier Krans, in the following terms: "1st. Whoever places the idea of church above religion; 2nd. Whoever confounds the pope with the church; 3rd. Whoever places the idea of secular jurisdiction of the pope over prince and nation; 4th. Whoever holds that religious conviction can be imposed by religious force, or can be created by it; 5th. Whoever is always ready to sacrifice a clear injunction of his own conscience to the claims of an alien authority."

It was with the third-class that the preacher dealt in reference to the action of certain Romanists concerning the burning of the school at South Porcupine, and also on the subject of the marriage laws.

"Our danger in Canada," said Rev. Hincks, is the extension of Quebec Romanism to our vast dominions in the west. There is a solid vote on religious issues. Quebec and the Dominion parliament into subject servitude to Romanism. It was because of winds blowing from Quebec that separate schools were fastened on Alberta and Saskatchewan. Think of the outrage this perpetrated. Separate schools fastened on Alberta, a territory larger than the German Empire. Confessional schools fastened on the west coast of Canada. The fact that and before it is peopled, it is difficult to operate because of the high standard demanded, does not lessen the crime against Caesar contemplated.

"Probably no darker plot will ever blacken the escutcheon of every parliamentarian of both sides of the Atlantic, a party to that shameless transaction."

In dealing with the marriage question, the preacher said: "From the Atlantic to the Pacific, the Anglican Church has expressed herself as unalterably opposed to this 'No Timers' outrage. In her synods and in her house of bishops she has expressed her opposition against this ultraromanian encroachment on British liberty and law."

In conclusion, Rev. Hincks said: "The best of the sons of Romanism are opposed to the undisturbed dream of political Catholicism. Let us join hands with them for the unification of Canada, the Christianizing and strengthening of the empire, and the brotherhood of all men, and the final reign of love through the universe."

Reclamation of Everglades.

One of the greatest schemes of land reclamation is that which has been developed for draining the Everglades of Florida. Here more than five thousand square miles of land are under shallow water, sprinkled with low islands. Over the island, which is about three miles in circumference, and rises between 80 and 90 feet above the sea, there are usually flows an immense cloud of vapor, attaining an elevation of 10,000 feet, and surrounded with a hollow lake of acid charged water, covering fifty acres, and from which steam and sulphurous fumes are emitted with great force and noise. With care a boat can be navigated on the lake. The sulphur from White Island is very pure, but little effort has yet been made to procure it systematically.—London Globe.

Homely Sitter.

"I don't know what to do about this portrait," said the artist. "Can't you get the likeness?" "Oh, yes, but I'm doubtful about how far to make it make it look like him the critics will run it, and if I do him the price will be \$100."—Washington Star.

The committee have worked hard to get the details arranged and it only remains for everybody to show their appreciation. A special rate of \$1.50 for adults has been secured and at Victoria Park it is expected that a fine line of sports and amusements will be carried out. Games of all kinds will be carried out. Commercial Reports

Western Provinces Make Denial Of Crop Damage Thru Black Rust

Manitoba and Saskatchewan Not Affected by the Pest—Grain Market Eases Under Week-End Profit-Taking.

CHICAGO, July 29.—In view of week-end profit-taking on a liberal scale, the wheat market to-day held up remarkably well. The close was steady, 1 1/2c to 1 3/4c off from last night. Corn finished at 1-8c and 1-4c to 1-2c and 5-8c advance; oats unchanged to 5-8c lower, and provisions varying from 10c to a gain of 1-2c.

There were further reports of black rust damage to wheat in the Northwest, but not enough to check the markets of that section from reacting as usual at prices here. Besides Manitoba and Saskatchewan were forwarding denials that the crops there were affected. The weather, moreover, through the spring wheat belt, was well-nigh perfect. On the other hand, the bulls had help from the fact that field conditions both in Russia and India are becoming gloomy, and the market is showing signs of nervous tension concerning Morocco. Taking the day as a whole, however, trade was largely an evening-up process all around, the situation being considered uncertain to permit of either carrying much wheat or going heavily short over Sunday.

Corn showed strength on account of receipts here this week having been below the average, whereas shipments were nearly equal to the arrivals. Crop reports were conflicting, mostly favorably from Illinois, Indiana and the northwest, but the reverse about Iowa. Oats felt the effect of the heavy movement of the new crop to the elevators. Realizing sales also by long weighed on the market. The quality of a miscellaneous character, with prices inclined to stagnate.

Liverpool Wheat Market. There was a firm undertone at the opening, with values 1/4c to 1/2c higher, and following the Liverpool market, the quality of spring wheat is only fair, while the quality of winter wheat is poor and the yield is low. There are no arrivals yet of new wheat.

LANDLORD AN AUTOCRAT ROOM RENTS SOARING

High Prices Impel Many Roomers to "Double Up"—Costly to Live in Flats.

There is an unusual amount of room and house hunting at the present time in Toronto. Rooms are for rent in every tenable house. The trouble is that the rooming house mistress is striking for more money. Two, three, four, five, six and even seven dollars a week is now asked for some single rooms. The high price is forcing roomers to go in pairs, with the result that the price of the house has only half her rooms occupied.

A four-roomed unfurnished flat can be rented for about the same money as one single furnished room. Yet at the same time a furnished flat demands more rent than a small house. The abnormal prices are caused partly by the fact that the demand for flats is being increased by the early part of October about 10,000 students flock to the city, and rooms for all sorts of lodgers are needed those in the vicinity of the university.

The apartment house is guilty of raising the rental of flats. They have sprung greatly during the past few years, and have increased the rent of flats at the same time. These buildings are erected on the best of the city, and are occupied by young couples and small families who desire compact apartments where there is no unnecessary work. The tenement house supplies the want and demands a high price accordingly. The rental of the ordinary house flat is soaring higher and higher to keep in touch with the apartment dwellings.

NEW YORK, July 29.—The metal markets were quiet and practically unchanged on Saturday. Lake copper, \$22.75 to \$23.00; electrolytic, \$22.75 to \$23.00; casting, \$22.75 to \$23.00. Tin, \$41.00 to \$41.50; spelter, \$5.80 to \$5.90. Unchanged.

JOHN'S, Nfld., July 29.—The little town of Catalina on the northern side of Trinity Bay, with a population of 1500 persons was threatened when the demand in the Liverpool market was very slow, but owing to the small supply last week's prices were well maintained, and to-day's quotations are: United States steers, \$12 to \$14-c, and Canadian steers from 12 to 14-c to 13c per pound.

The August Furniture Sale Begins To-Morrow

After Months of Preparation, One of the Biggest Enterprises of Our Entire Year is Ready for Your Inspection on the Fifth Floor

This will be the most important Furniture Sale we have ever held. There is more furniture, better furniture and better bought furniture than we have ever been able to assemble before. About a year ago we completed arrangements that brought us into closest touch with the best Furniture Factories in the Dominion, and now these plans are beginning to bear fruit. Our customers will reap the benefit during August by purchasing all kinds of furniture at small prices.

The only kind of furniture you will not find here is that built for Summer sale purposes, the nondescript glued together stuff, that is brought so glaringly to your attention. During this month you will find that our lowest priced pieces are dependable and that the economies they indicate are lasting.

The economies of this sale will appeal as much to the household of limited means as to the man who buys expensive furnishings. Proprietors of hotels will find advantages in buying here that they cannot duplicate from any good factory in Canada. We are in a position to make this statement quite positively.

It Is Impossible to Present in Print
