5000 BUNDLES COTTON WARP: Parks and Mispeck Manufacture

Watchmaking in Switzerland. [From the Swiss Times of May 30th.] WE have already drawn attention to the annual meeting of the Society of Arts held on the 23rd current, under the presidentship of M. Th. de Saus-ure, and are now able to furnish some further details.

Professor Soret, in delivering a most interesting report, passed in review the operations of the Industrial section, in reference to Commerce, laying great stress upon the competition that has taken place in the manufacture of chromometers. This competition was instituted with the object of testing the workmanship and precision of chromometers turned out by Genevase manufacturers, and none but those adopted for pocket use were admitted. They were deposited in charge of the authorities at the Observatory, and underwent the most searching ordeal possible to be applied to pocket instruments of this class. The lury specially retained to decide the difficult question as to whom to award the palm of excellency unanimously decided in favor of Messrs. J. M. Badollet & Co. This firm having carried off the sole prize by exhibiting a chronometer which fulfilled in the dether first success by gaining honorable mention for two other chronometers. The allusion to his triple honor was received with enthusiastic applause, and Professor Humbert, President of the Fine Arts Section closed the meeting with a happy and humorous dissertation upon subjects connected with this department.

(Concluded.)

Among the dearest though less sparkling gems of Literature there are few examples which touch the heart strings more than those in which decayed prosperity i pictured, and I have somewhere seen a painting in which, if we apply the best interpretation which actual facts suggest, the same idea occurs. The scene is laid in twilight and banks of clouds are cles n round a flush of light beyond the far horizon which seems more distant by contrast with the shadowed hills. Between these hills and the immediate foreground lie of shadow and falling night and darkness pervades the whole. In the center, reflected from the single piece of cloudles, sky, appears a lumined space of water and there, in bold relief, stands an Indian in his

Professor Soret, in delivering a most interesting report, passed in review the operations of the Industrial section, in reference to Commerce, laying great stress upon the competition that has taken place in the manufacture of chronometers. This competition was instituted with the object of testing the workmanship and precision of chronometers turned out by Geneves manufacturers, and none but those adopted for pocket use were admitted. They were deposited in charge of the authorities at the Observatory, and underwent the most searching ordeal possible to be applied to pocket instruments of this class. The jury specially retained to decide the difficult question as to whom to award the palm of excellency unanimously decided in favor of Messrs. J. M., Badollet & Co. This firm having carried off the sole prize by exhibiting a chronometer which fulfilled in the highest degree every condition required, crowned their first success by gaining honorable mention for two other chronometers. The alusion to this triple honor was received with enturistical places, and Professor Humbert, President of the Fine Arts Section, closed the meeting with a happy and humorous dissertation upon subjects connected with this department.
