Correspondence and Esturns relating to the Provincial Italiway Expenditure.

Provincial secretary : office.

Helifax; February 2011, 1857.

I am commanded by the lieutenant governor to request that you will furnish, for his excellency's information, the following returns connected with the great jublic work committed to your charge.

GENTI FLIFN

First—A detailed statement of the total cost of the portions of railway already comleted, distinguishing the cost of road and permanent way, stations, land damages, lant, rolling stock, &c.

Second—An approximate estimate of the amount required to complete and equip the unfinished portions now under contract, in addition to what has already been expended. Third—A similar estimate of the probable amount per mile, required to complete and equip the lines to Windsor, Truro, and Picton, from the termination of the existing contracts.

Fourth—An estimate of the probable annual receipts from goods and passengers' traffic between Halifax and the termini on the Gulf of St. Lawrence and the Bay of Fundy. Fifth—A detailed statement of all the different amounts received by the board, with their expenditure, during the years 1854, 1855, and 1856.

Six h—A detailed statement of the salaries, contingencies, office expenses, &c. of the board and staff of engineers, &c., during these years, including surveys, &c. Seventh—A statement of the working expenses on the line opened, distinguishing wages, repairs and other items of expenditure in the several years.

Eighth—A statement of the plant and other materials on hand. Ninth—A succinct statement of the various contracts, with names, dates, amounts, sections, &c., and whether performed and paid for in whole or in part.

Tam to request that you will furnish these returns with the least possible delay, as they shall from time to time be prepared, in order to their being submitted to the legislature at an early day.

I have the honor to be,

Gentlemen,

Your most obedient servant,

WM. H. KEATING,

Deputy secretary.

The commissioners for the construction of provincial railways, &c.

Nova Scotia railway office, Halifax, March, 1857.

For the information of his excellency the lieutenant governor, and in reply to your letter of the 26th ult., we have now to furnish the information required, as follows :--

SIR

Total cost of railway fully completed, say contracts 1 and 2, Halifax to Bedford, exclusive of terminal stations, in sterling monies, £50,859 19 8 Of this, the road and permanent way cost £46,401 Stations—Four-mile house, Nine-mile River, and 553 Bedford, 3 Land damages paid by board, 168 6 3,736 16 Rolling stock for 8 miles, 0 £50,859 19 8

It may be proper here to remark that the portion of the line actually completed in consecutive sections is about 8 miles, as above stated, lying between Halifax and Bedford. The next section beyond, after crossing the Sackville viaduct, which is completed, passes through a heavy clayey district for a short distance, and the embankments are not sufficiently consolidated as yet to justify their being finally dressed and faced. The engineer, however, assures the board that this can be done now at a small outlay as soon as spring opens.

Second—" An approximate estimate of the amount required to complete and equip the unfinished sections now under contract, in addition to what has already been expended."

To complete unfinished portions under contract—approximate estimate, £129,904 0 (

The equipment for these unfinished sections depend so entirely upon the amount of traffic, that it is difficult to furnish any satisfactory estimate.

At present the rolling stock in use upon the 22½ miles in operation, cost £10,509 7 1

This has furnished sufficient accommodation up to the present time; but the board anticipate that, as the traffic along the line becomes developed, this equipment may require to be materially increased.

Third—"A similar estimate of the probable amount per mile required to complete and equip the line to Windsor, Truro and Pictou, from the termination of the existing contracts."

The amount required to complete the line to Windsor, and as far as Stewiacke on the route towards Truro, all of which is under contract, is, as nearly as can be estimated, given in our reply to question No. 2.

The portion of road lying between Stewiacke and Truro has been located, but is not yet under contract.

The completion of this section will probably average for construction, exclusive of equipment, $\pounds 5,000$ per mile sterling.

That portion of the line lying between Truro and Pictou, except for about ten miles, is not yet located. Assuming that there are no greater engineering difficulties to encounter than exist upon that portion of the works lying between Grand Lake and Stewiacke, and now under contract, which includes the Shubenacadie bridge, one of the heaviest viaducts on the lines, to be constructed of stone and iron—then, as an approximate estimate, the mileage for construction may be fairly set down at £5,000 sterling.

The following tabulated statement gives the results at a view :	45 48 45
Whole distance—Halifax to Windsor and Truro,	138 miles.
Expended on 76 miles under contract, including expenses of every kind, as well for engineering as for stations, and contingen- cies of all kinds, per commissioners report and account ren- dered, Less 1-5th difference, c'y.	Stg. £466,752 3 5 93,350 8 8
Add to finish, as per estimate above,	£373,401 14 9 129,904 0 0
Remaining distance, say 62 miles, at £5,000 per mile,	£503,305 14 9 310,000 0 0
For equipment 138 miles, at £400 per mile, which allows 1 locomotive and 10 mixed cars to	£813,305 14 9
every 10 miles, $\pounds 55,200$ 00Less rolling stock on hand,10,50972	£44,690 12 10
Total for 138 miles,	£857,996 7 7

Being at the rate of £6,217 7s. 3d. stg. per mile.

This, it will be understood, is exclusive of way and terminal stations, except so far as already expended, and included in our accounts rendered, amounting at present to $\pounds 9,407$ 2s. 2d. It, however, includes a charge of upholdence of the works by the contractors for one year. Contracts 1, 2, 3 and 4 excepted.

attempt a reply.

In a young country like Nova Scotia, where the operation of railways is an untried experiment, and where no reliable data exist from which to prepare the estimate sought in a country known to abound with much of the crude materials of commerce, where the capabilities for manufacturing operations can hardly be surpassed—with the prospect of commanding a large share of the gulf trade, including that of Great Britain, Prince Edward Island, the north shores of New Brunswick and the River St. Lawrence on the one hand—on the other, that of the western counties of the province, the fine agricultural and richly endowed districts adjacent to the Basin of Minas; contemplating the increased intercourse certain to ensue with New Brunswick and the eastern parts of the United States by steam and other navigation of the Bay of Fundy, in view of a future so promising, the board feel that they may well be excused for declining to hazard a

conjecture as to the probable amount of receipts from goods and passengers' traffic be-

tween Halifax and the several termini proposed.

Indeed, what might constitute a reasonable estimate for such receipts for a first year's operations, judging from the results of railways and their introduction in other countries, would form a very imperfect criterion for a second or subsequent year, much less for an annual return. And, as lines from their location are unlikely to be subjected to rival influences, which is eminently the case with those under construction in Nova Scotia, just in the same proportion their productiveness may be relied upon as increasing and permanent. The experience of railway operations in other countries tends uniformly to establish this position.

Fifth—" A detailed statement of all the different amounts received by the board with their expenditure during the years 1854, 1855 and 1856."

The statement sought in the fifth requirement, has been furnished by the board quarterly, with the vouchers, to the financial secretary of the province, as by reference to that officer's department will appear. The several accounts for the years 1854 and 1855, it may be remarked, having been first audited by that officer, have been subsequently audited and reported upon by the joint committees of public accounts drawn from the two branches of the legislature. These documents are necessarily very voluminous, and would require a considerable period of time for transcribing.

----If, upon reference as above given, his excellency is still desirous that the board should furnish further copies, you will be pleased to signify his pleasure to that effect, and they shall be put in hand forthwith.

Sixth—" A detailed statement of the salaries, contingencies, office expenses, &c. of the board and staff of engineers, &c. during these years (1854, 1855 and 1856) including surveys, &c.

The returns required for salaries and for contingencies, has already been made to the financial secretary's office, the latter under the head of incidental expenses, to which the board desire respectfully to refer. Under the head of office expenses a detailed account has in like manner been rendered, and in each case quarterly, and with vouchers. The same observations apply to the return required for surveys under the head surveying.

Seventh-" A statement of the working expenses on the line opened, distinguishing wages, repairs, and other items of expenditure in the several years."

During the years 1855, the road was operated upon for but about six months. Interruptions from various causes occurred. Up to the first of January, 1856, the working expenses, although fully detailed and vouched, as by reference as above will appear, were not analized and systematized in the books of the board, as they have been during the year 1856.

For the year 1856, the working expenses have been detailed with much particularity, and the vouchers setting forth the nature of the disbursements have passed out of the possession of the board, under the control of the financial secretary, in accordance with the requirements of the acts of the legislature. But as these accounts are not very volumnious, the board have caused them to be again transcribed, and now annexed copies, see schedules A. B. C. & D.

Eighth-" A statement of the plant and other materials on hand."

Schedule E. contains a list of materials and plant.

Ninth.—" A succinct statement of the various contracts, with names, dates, amounts, sections, &c., whether performed and paid for in whole or in part."

Annexed marked (F.) will be found a tabulated statement furnished by the chief engineer, and showing the particulars sought under this head. All which is respectfully submitted.

[A.]

Locomotives account for the year 1856.

We have the honor to remain, Sir,

Your obedient servants,

JOSEPH HOWE, CHAIRMAN. J. McCULLY, WM. PRYOR, JUNR J. H. ANDERSON, THOS. S. TOBIN.

The hon. the provincial secretary, &c. &c.
