Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below / Ce document est filmé au taux de réduction indiqué ci-dessous.

| 10x | 14x | 18x | 22x | 26x | 30x |
|-----|-----|-----|-----|-----|-----|
| 12x | 16x | 20x | 24x | ✓ | 28x |

The copy filmed here has been reproduced thanks to the generosity of:

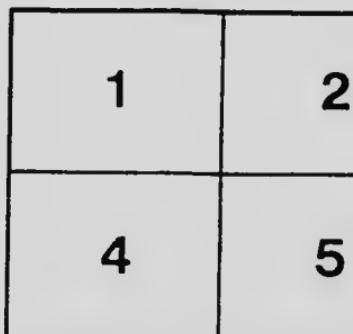

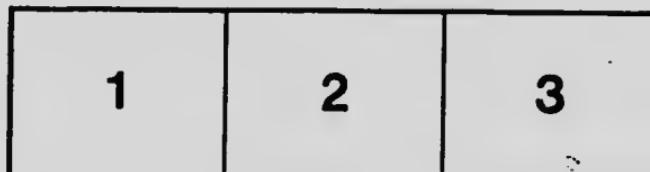

Library
Agriculture Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

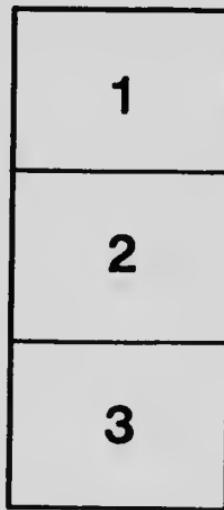

Bibliothèque
Agriculture Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires origineux dont la couverture en papier est imprimée sont filmés en commençant par le premier plet et en terminant soit par le dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plet, selon le cas. Tous les autres exemplaires origineux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

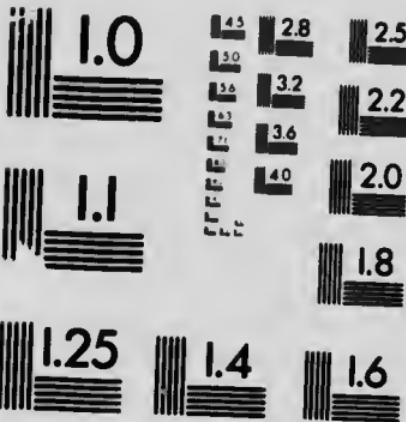

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "À SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

Hints to Exhibitors at Fall Fairs.

(Revised by WM. J. BONAVIA, Secretary, from Bulletin No. 48.)

Boxed Fruits--Selection and Packing.

IN preparing for a show, skill and experience are bound to win. The novice may, however, by taking care to follow the hints given in these directions and by observing their practical application in exhibitions, prepare some extremely satisfactory exhibits. In general displays of fruit and in district displays much depends on the attractiveness and arrangement.

Show fruit of all kinds should be sound, clean, well formed, and of good colour and shape for the variety. Broken skin, loss of stems, disease, decay, spray burning, worm-holes, stings, and blemishes of all kinds score against the exhibit. Where possible, exhibition fruit should be selected and picked from the tree so as to cause the least amount of handling and ensure against bruising, and spelling some of the best specimens for show purposes.

SIZE.

All box displays should be in commercial packages, as the object of these displays is to encourage the highest types of fruit and packing for market purposes. The sizes of fruit should be those of the greatest commercial value for the variety.

COLOUR.

The colour should be high, and is scored higher than any other point in commercial packages.

UNIFORMITY.

Under uniformity we expect fruit to be as even in colour, size, shape, and condition as it is possible to get. This is the foundation of successful grading. Moreover, in every respect the fruit in the lower layers should be the same as those in the top rows.

QUALITY.

Quality is taken into consideration only when two varieties are in competition. In single-variety entry quality is rated five points for all entries. When varieties compete, quality refers to commercial quality—market preference, and includes keeping quality, and range of season as well.

PACKAGE AND PACKING.

New clean packages of correct standard size, evenly cut, should be used. The wood must be clean, and it is preferable not to have the brand exposed in the exhibits.

HEIGHTS AT ENDS FOR APPLES.

The bulge must slope gently to both ends, at which the fruit must be only about $\frac{1}{4}$ inch above each end. This is sufficient to provide tightness when the cover is nailed on. Lower ends may go slack, while, if higher, the fruit will be bruised by the cover.

FULLNESS OR BULGE.

Boxes of peaches should be full up to the cover, but with no bulge. Plums and prunes packed in four-basket plumb-crates should have a bulge of about $\frac{1}{8}$ inch. Apples-boxes should have a total bulge, top and bottom, of $1\frac{1}{4}$ to $1\frac{1}{2}$ inches. As small as 1 inch may be satisfactory on the very tight packs, while $1\frac{1}{2}$ inches is none too much on the open packs. Too great a bulge causes too much bruising, and too small a bulge means a light-weight box and one that will not carry well. Pears require a heavy bulge, between 2 and $2\frac{1}{2}$ inches total, top and bottom, on account of the great shrinking of pears in shipment.

SOLIDITY OR COMPACTNESS.

The pack must be firm and solid, so that the fruits are immovable in any direction. Full weight is expected.

ATTRACTIVENESS AND STYLE OF PACK.

As packed, the box must be attractive, the wrapping smooth and even, with no torn papers; the general impression to be one of evenness, neatness, and uniformity. Of the three styles of packs, only the "diagonal" should be awarded a prize. "Square" or "offset" packs will be disqualified. A change of pack in the lower layers will also disqualify. The pack must be regular and it must be the correct pack for the shape and size of the fruit. Apples and pears should be shown wrapped, excepting the top layer, which should be packed unwrapped. As a general rule the close 2-2 packs in standard dessert varieties are preferred.

ALIGNMENT.

The rows of apples, across, along, and diagonally, must be in perfect alignment. This is the final evidence of skilful grading and packing. Proper alignment greatly increases the attractiveness of the packs.

PACKAGES AND SIZES FOR DIFFERENT FRUITS.

| | Apples. | Pears and Crabs. | Plums. | Peaches. |
|--------------|-----------------|---------------------|-----------------|---------------------|
| Length | Inches. | Inches. | Inches. | Inches. |
| Width | 18 | 18 | 18 | 18 |
| Depth | $11\frac{1}{2}$ | $11\frac{1}{2}$ | $11\frac{1}{2}$ | $11\frac{1}{2}$ |
| | $10\frac{1}{2}$ | $8\frac{1}{2}$ | $9\frac{1}{2}$ | 4 or $3\frac{1}{2}$ |

Four-basket Crates.—Baskets, $7\frac{1}{2}$ x $7\frac{1}{2}$ inches at the top, $6\frac{1}{2}$ x $6\frac{1}{2}$ inches at the bottom, $3\frac{1}{4}$ inches deep, measured perpendicularly. Crates, $15\frac{1}{4}$ x $15\frac{1}{4}$ x $4\frac{1}{4}$ inches.
