The copy filmed here has been reproduced thanks to the generosity of:

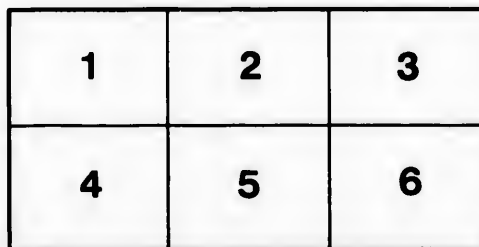

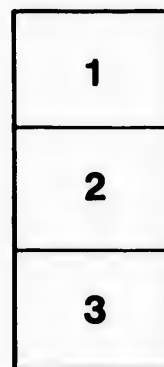

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

WEATHER GUIDE.

The following Table (the result of many years' actual observation) is ascribed to Dr. Herschel. It is constructed upon a due consideration of the attraction of the Sun and Moon in their several positions respecting the Earth, and serves to show what kind of weather will most probably follow the entrance of the Moon into any of her quarters:—

Moon.	Time of Change.	In Summer.	In Winter.
If New Moon, First Quarter, Full Moon, or Last Quarter, happens.	Between midnight and 2 in the morning.	Fair.	Hard Frost unless wind be S. or W.
	Between 2 and 4 morn.	Cold with showers.	Snow & stormy.
	" 4 and 6 "	Rain.	Stormy & rainy.
	" 6 and 8 "	Wind and rain.	Stormy.
	" 8 and 10 "	Variable.	Rain if wind W. Snow if E.
	" 10 and 12 "	Showery.	Cold and high wind.
	At 12 Noon, and to 2 in the afternoon.	Very rainy.	Snow or rain.
	Between 2 and 4 after.	Variable.	Fair and mild.
	" 4 and 6 "	Fair.	Fair.
	" 6 and 8 "	Fair if wind be N. W. Rainy if S. or S. W.	Frosty if wind N. or N.E. Snow if S. or S.W.
" 8 and 10 "	Ditto. Ditto.	Ditto. Ditto.	
" 10 and midnight.	Fair.	Fair and frosty.	

The nearer midnight any of the Moon's changes occur, the finer will be the weather during the succeeding week; the nearer noon any of those changes happen, the more foul and wet will be the weather that will follow.

FARMER'S work like woman's work is never done. From the 1st of January to 31st December, and from early morn till dewy eve or stormy night there is ever something which the farmer's hands may find to do. It is the object of these monthly notes to remind the farmer of the more important operations on the farm, upon the timely performance of which the profits of a crop very often depend.

quate, the best plan is to turn the poultry into the cow house at night, so that they may roost on the back of the cows.

So soon as the snow is deep enough sleighing operations should begin. Bring home from the woods the fuel that has been chopped, and deposit it in orderly piles in the back yard or close to the wood house. During wet and snowy weather it can be cut under cover, and will thus supply work for unfavorable days that would otherwise be lost. Haul fence poles to the lines where they are to be used on the opening of spring.

In other years we have a genial March, with sunshine and comparatively warm showers and fogs. The uncertainties of March and April should induce our farmers to get done with all their lumbering operations as rapidly as possible, so as to begin spring work on the farm without a single day's

delay. Look over your tools and implements, and have them all put in order and ready for use. Keep horses and harness and vehicles in good condition, in anticipation of the rough "breaking up" time, when even comparatively good roads become impassable. Make definite plans and calculations as to the crops to be put in, see that you have manure enough at hand for them, and lay in your supplies of seed, so as not to have to run to town and buy the first bad seed you can get, while your men are waiting in the field to sow it. Make up a hot-bed for cabbages, celery, salads, and such flowers as are required to furnish the beds in front of the windows. Dahlia roots may also be started; they do very well placed in a box with earth not far from the stove.

WHAT is the farmer to do this month? Everything that he possibly can. As soon as the frost is out of the ground sufficiently, ploughing should be commenced, fences put in order, and early peas, onions, carrots, parsnips, beets, mangels, and broad beans sown. Our best and earliest pea is the Paris and Prince Albert. In favorable seasons much grain is often sown in April, and towards the end of the month potatoes are planted. Everything, however will depend upon the

character of the season, and upon the state of forwardness of the farmer's work, by which he may be enabled to take advantage of every fine day. Fruit trees should be looked at, pruned and cleaned. The carting out of manure should be a daily operation when the horses are not engaged in ploughing. Where large quantities of potatoes are grown, every effort should be made to get the ground into thorough order as soon as possible, so as to plant on the large scale as soon as the ground has lost its winter chill. Early Rose is our most prolific potato of really good quality, but Jacksons and Calicos are of better quality in some soils.

EAQAR'S PERUVIAN BITTERS are recommended by gentlemen of the highest standing, socially and scientifically.

EVERY kind of seed not already sown (except turnips) is to be put into the ground sometime during the course of this month.—Oats, Barley, Wheat, Potatoes and Peas, as early in the month as possible. When the Indian Pear (so common in our woods) comes into bloom, it will then be time to sow Indian Corn, Bush Beans, Pole Beans, Cucumbers, Squashes, and other sub-tropical vegetables. If put into the ground earlier, when wet and cold, the seed of these will rot. Fruit

trees and bushes should be dug round with a digging fork, except in case of over-luxuriant trees, when a spade may be used, which is the most effectual mode of root-pruning to check over-growth. Salads may now be sown in the open ground,—Lettuce for early crop, and Cabbage Lettuce for use in August or September. The Early Frame and Early Turnip Radishes are best for first crop. The late Winter Radishes need not be sown till next month. At the beginning of the month, barrels may be put over Rhubarb roots to bring an early supply of blanched stalks, which are much more delicate than those produced without covering.

EAGAR'S CHOLERA MIXTURE cures Diarrhoea, Cramps
Dysentery, and all Summer complaints.

THE industrious farmer has now all his seed in the ground, with the single exception of turnips. He will now proceed to work his turnip land. No crop requires more careful preparation of the soil. Plough at least twice, harrow and roll and harrow again, pick off stones, and then throw the land into drills for sowing. The manure has previously been ploughed in, and bone dust or half inch bones should be sown in the drills with the seed. As a rule, it is not worth while to grow turnips without bones.

EAGAR'S Odontine Essence never fails to cure Toothache.

See page 237.

During this month early sown crops will now require attention. Seedling weeds will begin to green the surface, and as early hoeing saves a great deal of subsequent labour, no time should be lost in proceeding with the work. Carrots, onions and parsnips require careful hand weeding. The kitchen garden and flower garden should now be thoroughly cleaned and made tidy, bushes tied up, walks dressed, grass kept short on the lawn. If such is not done in June, there will be less time for it as the season advances, and the rapid growth of weeds is terribly discouraging.

On the Halifax Peninsula, haying commences about the middle or third week of July: but, throughout the Province generally, it is the better practice to wait till the first of August. When Grass is cut too early, it is more troublesome to make into good hay, and shrinks to a less weight. Many amateur farmers think that grass cannot be cut too early; this is a great mistake. Before haying commences all other

summer work should be finished up. Potatoes should, this month, have their final hoeing, cultivating and ploughing between the drills with the double mould-board plough. Turnips, when sufficiently advanced, should also be hoed. In fact, all root crops, mangels, carrots, parsnips, and also corn and garden vegetables, should be left in a perfectly clean condition at the beginning of haying, as otherwise the weeds will make such progress during the busy season that it will be hopeless to retrieve. We hope the barns are in good condition for the crop; it is only thriftless farmers who are found on the roofs of their barns nailing on shingles during hay time.

HAY being by far the most important crop produced in Nova Scotia, the operation of seeding down land to grass is entitled to much attention. In the past the common method has been to sow grass seed with basley or oats or wheat in Spring, and to look for a hay crop in the year following. The disadvantages of this plan are (1) that if the grain grows well, the grass plant will be partially smothered; (2) if the land is not very clean there will be an abundant crop of weeds and browntop in

the grass; and (3) by the time two or three crops of hay have been obtained, the land begins to show signs of running out. To overcome these disadvantages, it is now customary in some localities to prepare the land and sow the grass seed in August or September. By this method a full crop is obtained during the following summer. Potato land may be treated in this way so soon as the potatoes are taken up. Old grass land that requires renewing may be merely ploughed, harrowed, topped with manure and sown with timothy. Clover seed should never be sown in the Fall, but may be scattered over the fields in Spring time.

So soon as Haying is completed, there is much work to do that is too often deferred or neglected. In the first place, go over the Hay-fields and take out all stumps and large stones that have interfered with the free action of the Mowing Machine. Clear away old fence poles and other rubbish along the lines, and fill up hollows. If manure is available, spread it now as a top-dressing before the heavy fall

rains have softened the ground. It will also be well to roll uneven fields. Plough up old sod for spring crops, such as potatoes, and clear new land for the same. By ploughing now, the sod has time to rot partially before winter. Potatoes are usually taken up in the latter part of this month. Do not put them in heaps until they are pretty well dried, and be careful to have intermixed kinds picked out before storing, or rather in the field when taking up, so as to preserve your Seed in a state of purity. Early apples will have to be looked after, and, where near a market, they can usually be disposed of at once to advantage, before the store supplies come in in quantity.

Let them have air to dry the cuts before stowing away, otherwise the roots will be apt to rot. Carrots and

Mangles must also be taken up and treated in like manner. Parsnips may remain in the ground all winter, but if the fields are accessible to your own or your neighbour's sheep, you will find in spring time that the parsnips have been eaten over at the top and spoilt for market. Mulch fruit trees and bushes, and afford protection by boards or evergreen brush to strawberries, roses, and other delicate plants. Where raspberries are liable to winter-kill, peg down the canes to the ground for the winter; this is more effectual than any other kind of protection, as it is not the cold, but the winter sun and drying frosty winds that destroy woody plants.

EAGAR'S Dentifrice is the best Tooth Powder known.

CHEESE Factories are now in successful operation in several districts of Nova Scotia, and their extension is much to be desired, because they lighten very much the labour of the farmer's family, enable a better article of cheese to be produced than can be made on the farm, and bring a larger return for the milk used in the manufacture. The present month is a good time to begin a Cheese Company. Call your neighbouring farmers together, and talk over it, get a bill of Incorporation prepared, which your county member will pass through the House of Assembly for you, get out the frame for the building, order the requisite machinery, look out for a manager, and

everything will be in trim for commencing the manufacture as soon in the spring as there is milk enough. The Paradise Union Cheese Manufacturing Company has a capital stock of fifteen hundred dollars, with power of increase, in shares of ten dollars each, and may hold real estate not exceeding \$2000 in value. No member is liable for the Company's debts beyond double the amount of his share. The Nictaux and Wilmot Cheese Factory has a similar constitution. The Onslow Cheese Factory may hold real estate to the extent of \$6000; the capital stock is \$2000, and may be increased to \$20,000, in shares of twenty dollars each. In order to save labour in estimating the qualities of milk received at the factory, it is weighed, not measured, 10 lbs weight being reckoned as equal to one gallon. In the English factories 10½ lbs represent a gallon.

Respirators and Elastic Stockings at EAGAR'S, Halifax.

Societies are under the general control of the Central Board of Agriculture, from which they receive annual grants to the extent of double the amount of subscriptions raised and paid in the locality, such grants being limited, however, to \$240 to each County, and to \$200 where there is only one Society in the County. In consequence of the large number of Societies, these limited funds are not sufficient to ensure to each Society a grant double the amount of subscriptions, and therefore the money is apportioned among the Societies in rateable proportion to the subscriptions. These Societies have been of great benefit, and it is very desirable that one should be established in every thriving agricultural district. In some Societies quarterly or monthly meetings are held for the discussion of agricultural subjects. Some hold ploughing matches in the Fall.

BROWN BROTHERS & CO., Importers of Flower, Field and Garden Seeds.

Canada Life Assurance Company.

Established 1847. Capital, \$1,000,000.

Incorporated by Special Act of Parliament.

HEAD OFFICE, HAMILTON, ONTARIO.

DIVISION OF PROFITS, 1870.

Comparative Table, showing the Profits to Policy-holders, on Policies 5 years in force, payable either in Cash or in diminution of premiums for the next five years as compared with the annual premium.

AGE.	PREMIUM.	PROFITS.	
	Annual Rate.	Cash.	Annual Reduction.
21	\$16.80	\$25.44	\$5.99
25	19.00	27.95	6.00
30	22.30	31.41	7.47
35	25.70	34.95	8.22
40	30.50	39.34	9.45
45	35.90	43.76	10.54

EXAMPLES.

"CASH" PROFITS.

I.—The holder of a policy for \$4000 of five years' standing, commencing at age 30, received as his share \$136.64; not only paying his year's premium, amounting to \$89.20, but leaving him a surplus in cash of \$47.44, or about 53 per cent. over and above a full year's payment.

REDUCTION OF PREMIUMS.

II.—The holder of a policy for \$5000 of five years' standing, commencing at age 30, became entitled during the next five years to an annual diminution of his premium to the extent of \$40.05. Thus.—From his annual premium, \$111.50, the deduction was \$40.05, reducing his payment to \$71.45, or two-thirds his original premium. At the next division in 1875, a further allotment of profits will be made.

BONUS ADDITION.

III.—A bonus has been added to all Whole Life Policies, whose holders take their profits in this mode, at the rate of \$25 per \$1000 for every year the Policy has run since last division, in addition to all previously declared bonuses. Thus the addition to policies dated prior to 30th April,

1866,	} is,—for each \$1000,	} \$125.00	
1867,			100.00
1868,			75.00
1869,			50.00
1870.			25.00

N.B.—These results have been accomplished, after making ample provision for all the liabilities of the Company, notwithstanding the economical rates of premiums charged by the Canada Life, giving a present and continued assurance larger in amount for a given premium than other offices.

Attention is called to the fact that the Cash Bonus returnable to policy-holders of 5 years' standing, is equal to from 20 to 50 per cent. in EXCESS OF A YEAR'S PREMIUM, in other words, these policy-holders will not only have NOTHING TO PAY THIS YEAR, but will be MONEY IN HAND BESIDES.

NORTH BRITISH CATTLE FOOD COMPANY'S NUTRITIOUS CONDIMENT

FOR

Horses and Cattle.

GOLD PRIZE MEDAL

AWARDED, LONDON EXHIBITION, 1862.

At the Exhibition of British and Foreign Manufactures, held in the Crystal Palace, London, 1862, the Nutritious Condiment was awarded the Prize Gold Medal for genuineness and utility.

It will coax the most impaired appetite.

It renders coarse provender rich and palatable.

Horses fed on this Condiment for a short period of the year receive as much benefit as if they had been out to grass for a season.

The Nutritious Condiment is composed of pure herbs and roots, grown for their fattening properties and health giving qualities.

By using it, a saving of twenty per cent is effected in the cost of feeding, and the animals are in better condition.

It is not only the best but the cheapest Condiment for cattle in existence, being just half the price of any at present in the market.

Sold in Bags at \$1.25, \$2.50, \$4.25, and \$8.

BELCHER'S ALMANACK being "*the true guide board*" for Farmers, Fishermen and the public in general,

WOOLRICH

many of which have stood the test of time and use for the past thirteen years—and are each day becoming better and more favorably known.

WOOLRICH'S ARABIAN SPICE,

(The original article of its kind,) extensively used and approved of in Nova Scotia and the United States of America, for preserving good health and prime condition in

Horses, Cattle, Sheep, Pigs and Poultry, &c.

Remember it is a highly concentrated preparation, not made up in *bulk with Shorts or Cornmeal*, and THE DOSE IS ONE Tablespoonful (not three or four), consequently it is at least from 50 to 75 per cent cheaper than any article of the kind. (Please bear this in mind.)

WOOLRICH'S PICK-ME-UP BITTERS

Are a Tonic of true merit, and will cure Dyspepsia, Indigestion, Loss of Appetite, Heartburn, and Gloominess of Mind.

UNCLE JOHN'S PILLS

Should be in every house, as they are the best family medicine in use. (They work like a charm.)

WOOLRICH'S BLOOD PURIFIER,

Of known composition, will cleanse the Blood from all impurities, removing Blotches, Pimples, Boils, Scrofula, and all diseases of the skin, &c.

AYER'S HAIR VIGOR

For Restoring to Grey Hair its Natural Vitality and Color.

—:O:—

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. *It soon restores faded or grey hair to its original color, with the gloss and freshness of youth.* Thin hair is thickened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed; but such as remain can be saved by this application, and stimulated into activity, so that a new growth of hair is produced. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning grey or falling off, and consequently prevent baldness. The restoration of vitality it gives to the scalp arrests and prevents the formation of dandruff, which is often so uncleanly and offensive. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a HAIR DRESSING, nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving a rich, glossy lustre, and a grateful perfume.

CURES

Gravel, Stone in the Bladder, Dropsy,
and all Diseases of the Kidneys.

DIRECTIONS.—One wineglassful in as much water,
each morning, noon and night.

In all ordinary cases one bottle is sufficient, except for a
beast, when two or three may be required.

The Proprietors can highly recommend this medicine, as
it has been the means of curing over 200 persons before
placing it on sale, where it now can be had for \$1.50 per
bottle. ADDRESS,

R. C. MARGESON & CO.

HALIFAX, N. S.

CERTIFICATES.

MR. R. C. MARGESON,—

Dear Sir :—Feeling it my duty to express my gratitude for the efficacy
of your valuable Medicine as a sure and safe cure for the Gravel and Stone
in the Bladder, I do not hesitate to recommend it to all who may be afflicted
with the same distressing complaint. I suffered for four years, and spent a
great deal of money. After hearing of your Medicine I was induced to try
it. I took four bottles, and the result was that I passed some dozens of
stones, small and large, and in four weeks was well, and continue to be so.
You are at liberty to use this in any advertisement you see fit.

JAMES DOYLE,
Bedford, Halifax Co., N.S.

MR. R. C. MARGESON,—

Dear Sir :—Permit me to contribute my meed of praise for your valuable
Medicine as a cure for the Gravel. I only used one bottle, and in less than
one week I was perfectly cured of that most distressing complaint. I shall
feel great pleasure in forwarding the merits of your medicine to any I may
meet who are troubled with the same complaint. You are at liberty to
insert the above in any advertisement you see proper.

Keep constantly on hand a full assortment of Goods for Gentlemen's wear, at very Low Prices.

—:O:—

Every purchaser who desires to get the best possible value for his money, should visit their establishment for the following convincing REASONS:—

BECAUSE their House is the ONLY Tailoring Establishment in Halifax where the stock is personally selected in the European Markets.

BECAUSE the advantage they possess in purchasing direct from manufacturers, enables them to sell their stock at much lower prices than those who have to pay a large percentage to local Wholesale houses and Importing agencies.

BECAUSE their customers have no percentage to pay for other men's debts, as they sell only for CASH.

BECAUSE their Goods are all thoroughly shrunk before being made up.

BECAUSE they employ only the best work people, and use only the best trimmings and materials in the execution of orders entrusted to them.

BECAUSE they only turn out the most well fitting garments.

BECAUSE their prices are from 10 to 25 per cent. under the ordinary Halifax prices.
