HAPPENINGS IN HAMILTON

ATTORNEY'S ROUTE, IF CITY COUNCIL WILL APPOINT SPECIAL ENGINEER TO MAKE A REPORT.

Hamilton, June 19.—(Special.)—A joint meeting of the board of works and finance committees by a majority of 8 to 3 voted John Patterson a route thru Dundurn and Hardy parks, provided no preferable route can be laid out by an independent engineer to be named by the council Wednesday evening.

The board of works got tenders from four companies for street lights. These gas companies offered rates from about \$22 a year to \$26; the Cataract Power Co. offered Nernst lamps at from \$33.50 for a 50 candle power light to \$28 for a 100 candle power light. It was agreed to test the lamps.

Miss Park, Herkimer-street, died this evening. The board of health this evening decided to call in the provincial board of health to help them get rid of the alleged nuisance caused by the coal oil inlet. The board called upon B. Johnston, North Hughson-street, to drain a pond on his property. He replied that he was not responsible, and a committee will try and fix the responsibility.

The county council this afternoon passed a bylaw giving the Hamilton, Caledonia and Lake Erie Railway Company two more years in which to build their line.

Mrs. August Walters, 88 Melbourne-street, died suddenly this afternoon of apoplexy.

At a large meeting of citizens in the board of trade this evening a resolution was passed expressing the opinion that Hamilton and Guelph Junction Railway would be a fine thing for Hamilton, and promised to aid in getting the same through the east-end manufacturing district.

Recovering. Daniel Nelson and family were poisoned by eating canned sardines. All are on the road to recovery.

The salaries committee of the board of education has agreed to advance the pay of the principals from a minimum of \$850 and maximum of \$1200 to the following schedule: Principals of eight- and ten-room schools, minimum, \$1000; maximum, \$1200; twelve and sixteen-room schools, minimum, \$1000; maximum, \$1500.

Dr. McMillan has dropped out of the contest for trustee in ward 4, but W. T. Armour has announced his intention of opposing W. J. Clark.

Lake & Bailey have given \$50 to the consumption sanitarium. Bishop Dowling will attend the commencement exercises at St. Jerome's College, Eary, Wednesday, and they will go to the Guelph Hospital to undergo another operation.

The Ontario Power Company and the Toronto and Niagara Power Company have both signified their intention of giving the Cataract Power Company opposition in Hamilton.

John Jamieson, chief operator at the local office of the G.N.W., was married this afternoon at Burlington to Miss Jeanetta Caroline Williamson.

Dr. B. Fairchild and William Drury, two hotelmen who were given three months in which to sell out, will not lose their licenses after all.

George Sellons, the city solicitor's clerk, has resigned.

The Knights of Sherwood (uniformed rank A.O.F.) had a moonlight excursion Monday evening, there being 400 on board the Modjeska. Credit is due the committee, Messrs. Sir Charles Harry James, Wm. Monk, Archie Martin, Bob Lanaway, Curley Tribbeck, A. Sheldrick, Henry Smith, Joe Savage, Wm. Johnson and McAlpine.

The Toronto Daily and Sunday World delivered to any address in Hamilton before 7 a.m.; daily, 25c a month; Sunday, 5c a copy. Hamilton office, Royal Hotel Building, Phone 565.

Martinas cigars, 5 cents a day, at Billy Carroll's Opera House Cigar Store.

Betty Won Emperor William Cup. Kiel, Germany, June 19.—The British yacht Betsey, owned by Ian Hamilton Benn of Cowes, won the annual Dover-Helgoland race for Emperor William's cup on sail and motor, crossing the finish line at 10:35 last night.

The British schooner yacht Sunshine, owned by Arthur H. Solomon of Rosslyn, which finished at 10:20 p.m., was second.

West End Y.M.C.A. Athletics. The regular weekly handup events, which take place at the West End Y.M.C.A. athletic field, corner of Devonshire-place and West Street, will be held on Friday evening of this week, instead of Wednesday, when Mr. Messing will have returned from Niagara where he is conducting the athletic meet at the soldiers' camp.

These weekly handup meets are doing much to round up the members of the three-cornered meet with Rochester and Buffalo Y.M.C.A.'s on the 30th. It is not only the Toronto athletes who have an opportunity of seeing the star athletes from the other side perform, but this opportunity will be given them on the 30th, as the membership of these two associations comprise many of the best amateur athletes in Western New York. Nor the West End Y.M.C.A. any mean team, with men like Worthington, Bricker, Packison, Creatch, Thompson and Roe, the Americans will have no easy proposition. In fact, the West End team is one of the strongest in Canada, and the boys feel that their chances for winning out are very fair. Besides the triangular contest, there will be two relay races open to teams from any of the city schools. Teams representing schools of 12 rooms and under will consist of four competitors, running 220 yards each, while the schools of over 12 rooms will enter four men to run 440 yards each. From the performance of the men in practice it is expected that some of the C.A.A.L. records will be broken at this meet.

Ottawa Professionals Defeated. Ottawa, June 19.—The Beverley, Mass., club defeated Ottawa's professional basketball team today in the series of exhibition games being played to put the Ottawa team in shape for the opening of the Ottawa League season. The score was 5 to 3 in favor of the visitors.

Toronto Canoe Crews Practicing. The rough water that has been the order of things on the bay the last few days has not deterred the Toronto Canoe Club crews from practicing last evening and the evening before. Two crews went over to the men in harness, and they are rounding into fine shape. The war canoe race this year promises to be one of the hottest aquatic events ever held in Toronto Bay, as there will not only be two T. C. C. crews, but two or three outside entries.

R.C.Y.C. Boys Enid. Enid of Hamilton has been bought by the R. C. Y. C. members and will be raced in the 20-foot class against Whirl, the L. V. B. A. 20-foot champion.

WHY PRISONS FEEL IN HEAVEN DUE TO DISHONEST MORTAR

Japanese Expert Declares Imperfect Building Material Caused Most of Damage.

San Francisco, June 18.—"Dishonest mortar—a corrupt conglomeration of sand and lime—was responsible for nearly half of the earthquake damage in San Francisco," says Dr. K. T. THE RISE AND DEVELOPMENT OF WHAT IS NOW THE LARGEST PUBLISHING BUSINESS IN THE WORLD

Reprint from "Profitable Advertising," Boston.

The history of journalism includes no more startling story of rapid progress than that afforded by the rise and development of the gigantic newspaper combination founded and controlled by Lord Northcliffe.

Eighteen years ago—on June 12, 1888—appeared the first number of a small penny weekly entitled Answers to Correspondents. It was managed and published in one small upstairs room at 26 Paternoster Square, London.

Mammoth Total Circulation.

From this small beginning has grown with unexampled rapidity the business of the Amalgamated Press, Limited, owning forty weekly and monthly papers and magazines with a circulation which the week before writing amounted to 6,033,320 copies.

Ideas that Won.

Answers owed its continued existence to a series of most brilliant journalistic efforts. Free trips to Paris were offered as prizes to its readers, and the English public was startled by a series of original and unprecedented offers culminating in a prize of £1 a week for life, which was won by a soldier.

More Harmsworth Papers.

After the establishment of two comic journals, in November, 1891, was published the first number of Forget-Me-Not, the leader of a series of highly successful papers devoted to women's interests, among which are included Home Chat, Home Circle, the Woman's World, the Girl's Friend, and the recently issued

The HARMSWORTH PUBLICATIONS

used monthly magazine, the World and His Wife.

In 1899 after two enlargements of premises a large printing works was founded under the name of the Geraldine Press. This was the first of the seven huge establishments, fitted with the most up-to-date plants, which are now engaged in printing the various Harmsworth publications.

Religious Papers.

In July, 1894, the firm published the first number of the Sunday Companion, a religious journal, made interesting to the general body of the people. Its success was immediate, and it is now the largest circulated religious journal in the world.

A Phenomenal Success.

In July, 1898, Lord Northcliffe founded the London Magazine, which reached a circulation of 1,100,000 copies with its second number, a success without an equal in the history of magazine production.

A special edition of the "London Magazine for Canada and the States has been ordered by the Toronto News Co. for all the branches of the American News Company, and will be published here by C. H. Murray.

Other monthly magazines issued by the firm include the Connoisseur—the leading illustrated magazine devoted to art and collecting—and the World and His Wife. This last, which was first issued in November, 1894, was conceived on entirely novel lines and at once attracted widespread interest.

In October of last year The Harmsworth Self-Educator was published in England, and has already found its way into more than half a million British homes. On December 14th, a special edition for Canada was published here by C. H. Murray, and met with a sensational success. So great has been the demand that arrangements are now being made to supply orders in the States that will reach half a million copies every month.

These are but a selection of the publications of the Amalgamated Press, Limited.

Profitable Mediums.

As advertising mediums the Harmsworth publications stand in the first rank, and it is a recognized fact, both in England and the United States, that

LORD NORTHCLEFFE

Founder of the Largest Publishing Business in the World

no large advertising enterprise which makes its appeal to the Anglo-Saxon races can succeed which does not avail itself of the very powerful help afforded by the newspapers and other publications controlled by Lord Northcliffe.

First Harmsworth Daily.

It was in September, 1894, that Lord Northcliffe embarked upon the enterprise of daily newspaper publication by purchasing the Evening News, which is now London's chief halfpenny evening paper. It had previously passed through a very chequered career, at least £180,000 having been sunk in it by its various proprietors.

FAITH CURE TRAGEDIES.

Father is Tried for Children's Deaths From Neglect.

For the second time within ten days Jas. Cook or Chapman, English, a member of the sect known as the "eccentric people," has been committed for trial charged with the manslaughter by neglect of one of his children.

35 Years at Bow Street.

St. James Vaughan, who was magistrate at Bow-street, London, from 1864 to 1899, died recently. He was 92 years old. He presided at the police court proceedings in several Penian fair-square riots in 1887, and he committed Jabez Balfour for trial in 1893.

Clever Finance.

A man named Zimmerman has been arrested in Paris for a series of thefts extending over 30 years. From the firm by which he was employed, his "ravings" out of a salary of £200 a year are at least £8000, and he is known to have lived at a rate of more than £400 a year.

No Education Question Here.

There is not a single Dissenter in the Parish of High-Road, Essex, England, which has a population of 400 persons.

Nature's Waste.

A German scientist, after several years spent in experiments, has calculated the value of a fish of lightning in electrical current at £280.

Poetic Plumber.

should surpass every existing paper in completeness and efficiency, and the whole face of the earth was so mapped out that nothing could happen anywhere without coming under the immediate cognizance of a paid representative having facilities for transmitting news direct to the London office.

Careful Preparations.

More than half a million pounds was sunk in buildings and plant before the first copy was issued, and this was altogether apart from the capital required for daily working expenses.

At the Head as a Medium.

The Daily Mail stands at the head of the newspapers of the world as an advertising medium, and is able to command from £350 (£1,750) to £400 (£2,000) per page for advertisements—about twice the rate of any other London daily.

"Overseas" Edition.

In November, 1904, a weekly Overseas edition of the Daily Mail was introduced in the special interests of English people in the colonies and abroad.

Continental Edition.

A further development of the Daily Mail was on May 22, 1905, in the

Issue of a daily Continental edition printed at Paris. By this means the paper has more than quadrupled its circulation in the chief European centres, where it already occupied the premier place in the matter of circulation among English journals going to the Continent.

A Woman's Daily.

The Daily Mirror was founded by Lord Northcliffe, as a penny ladies' daily in November, 1903, and after passing through a very stormy time, ultimately became firmly established as an illustrated half-penny daily, and has at the present moment a regular daily circulation of over 350,000 copies.

Another newspaper controlled by Lord Northcliffe is The Weekly Dispatch, which was 102 years old when he purchased it in July, 1903, and has now a regular circulation of about half a million.

Other Harmsworth Newspapers.

The Glasgow Daily Record, The Leeds Mercury, The Observer, Vanity Fair, The World, and The Manchester Courier are also included among the newspapers owned and controlled by the great journalistic genius who in eight years has built up from nothing the world's greatest publishing concern.

Wholesale Rabbit Trap.

A new rabbit trap is being used with great success in Australia. One trap has been known to catch as many as 630 live rabbits in a night.

Sensitive Shareholders.

The British Tea Tab Company has decided to close its shops on Sundays out of deference to the conscientious scruples of some of its shareholders.

THE NEW BOARD OF GOVERNORS. Favorable first impressions, if not always sustained, predispose to confidence.

The board as nominated is composed of men well qualified to solve the problems with which they will be confronted.

Nothing has contributed so greatly to the extraordinary increase and wonderful development of the universities of the United States as private benefaction.

The board would have been incomplete without Professor Goldwin Smith, whose name alone lends lustre to any organization.

At a very early stage in the deliberations of the board, the supreme test of its calibre must necessarily come.

AWESOME HILL. William Whyte, second vice-president of the C. P. R., sees the Yankee peril personified in James J. Hill and his

THE STAMP-SPOTTERS. The stamp-spotter is on the war path. His employers set him on those who exchange stamps for money.

It is as silly as it is irritating. Departmental stores, hotels, newspaper offices, drug stores and other business places find it excellent business to accommodate their customers.

INHERITED BURDENS. Censorious opposition critics of Premier Whitney labor under a double disadvantage.

From the Hon. Peter White to Tom Murray, M. P., is a far cry even for that part of New Ontario called North Renfrew.

The Process Building Complete This Week—Feature of Coming Fair.

Features for the exhibition are rapidly being arranged, said Dr. Orr yesterday. "The new process building is now complete, and will be laid out on the plan adopted by the Glasgow exhibition board, with avenue aisles raised eight or ten feet to enable spectators to view the operators from above. It is the intention to tender a banquet to the contractor in recognition of the despatch and efficiency displayed by him in putting thru the work so early."

The secretary also stated that arrangements have been made for a magnificent automobile parade on the scheme of the New Orleans Mardi Gras for the opening day.

INDIAN SLAYER CAUGHT.
Johnnie Jackson Will Pay Penalty for Four Killings.

Victoria, B.C., June 19.—(Special.)—John Jackson, who killed Axel Smalle over a card game last night on Reed Island, was surrounded and captured while asleep in the garage of a deserted house at 7 o'clock this morning. Jackson will be taken to Vancouver for trial in September. This makes the fourth murder that the notorious Indian has committed in twenty-four years.

Sin Against Health
Why the Usefulness of All Organs is Destroyed by Costiveness.

Most important to health and comfort is proper action of the bowels. By nature these organs are intended for the removal of the waste particles of matter which accumulate in the system.

Retain these wastes and you poison the blood, ruin digestion, bring on nervousness and anæmia. Habitual costiveness is best overcome by Dr. Hamilton's Pills, which establish regularity that is exactly consistent with nature.

Not a drastic purgative—not even a pain or sensation of gripe, because Dr. Hamilton's Pills are vegetable and free from irritating mineral substances found in so many widely advertised remedies.

In every case Dr. Hamilton's Pills do cure and bring sure relief from headache, biliousness and other manifestations of costiveness.

"I was comparatively a young man I have not enjoyed real good health. My appetite was good and strength kept up, yet I knew something was wrong. Frequently I took bilious attacks and violent headaches. My stomach was disordered, skin was murky, under my eyes were heavy dark rings."

"Last winter I read through the 'Polaris' Almanac and decided my trouble was constipation. I used Dr. Hamilton's Pills, and can hardly tell the help they have been. I am now as fresh, strong and well as a boy."

Just try the wonderful magic of Dr. Hamilton's Pills. Sold by all dealers, 25c per box, six boxes for \$1.00. By mail from N. C. Polson & Co., Hartford, Conn., U.S.A. or Kingston, Ont.

NO EVIDENCE YET TO SHOW CITY LANDS TO BREAK AWAY

Street Railway Co. Fails to Secure Injunction re Barton Avenue Car Barn Site.

The Toronto Street Railway Company have lost the action to prevent the city expropriating the lot on Barton-avenue, which the company bought originally for a car barn site, but which the city afterwards determined to acquire in order to do a good turn to the congregation of St. Paul's Presbyterian Church, which adjoins the place.

The following judgment, delivered by Chief Justice Meredith, is, however, confined to a declaration that there is nothing to show that the city has taken proceedings to expropriate the land, hence there is nothing to stop.

"There is no evidence," Sir William finds, "to justify the court in restraining the council from passing the by-law, even if the company be right in its contention that the lands in question cannot be compulsorily taken."

"What right have I to assume that the council will do an illegal act? For all that appears, the council will be properly advised and will refrain from passing an illegal by-law, but if it should not, what harm will be done? The by-law, if illegal, may be quashed, and if ultra vires, will, I apprehend, be quashed, but using them to secure an ulterior purpose which it could not directly accomplish lawfully."

Sir William does not deem it necessary to decide the company's contention that as railway property the lands in question were devoted to public use and so could not be expropriated, under the powers conferred upon the municipalities by the legislature.

"I adds that the by-law, 'if passed and ultra vires could do no harm to the plaintiffs, even though it were quashed, for it would be a mere waste of paper."

EDUCATION BILL

Agreement Reached to Close Debate Within 48 Days.

London, June 19.—After a heated debate lasting from early yesterday afternoon till 2.30 this morning, the house of commons, having voted down numerous amendments offered by the opposition, adopted a resolution offering to debate the Education Bill for a period of 48 days.

The resolution was adopted by a vote of 117 to 84.

SPIES IN AIRSHIPS

DEFEAT BRITISH ARMY

London—England is at last giving serious attention to the balloon as a practical adjunct to the army. Twenty balloons were sent up from the Aldershot Army Corps, having been conducting a sham battle over the Surrey Hills and the Hampshire Heaths, and the balloon section was brought into action under the King's personal observation.

Brigadier-General Alderson held the Cobham ridge with 3000 infantry on either side of their necks on the hillside, his force representing a rear guard covering the retreat of a beaten British army. Hidden in festoons of bushes and boughs were posted twenty big guns.

Against the concealed infantry and artillery came the invading army, consisting of 12,000 foot guards and a brigade of cavalry under General Paget. With Paget also were eighty guns and the balloon section.

It was Paget's object to discover the entrenched rear guard and the masked batteries, and in order to do so he sent up three balloons. Their aerial spying was completely successful.

The protecting force was discovered, and a terrific bombardment of the entrenched infantry and hidden guns was made. The result was a combined attack by the foot guards and a flank charge by the invader's cavalry. The rear guard was dislodged, the masked batteries silenced, and the rear guard was ignominiously routed.

It was the consensus of military opinion that the victory of the invader was largely aided by the use of balloons, and the King remarked that it was a lesson that the war office would do well to take to heart.

THREATENED TO BURN
AS AN ACT OF REVENGE

Brockville, June 19.—(Special.)—A strapping young man named Daniel Henry, of Prescott, was arraigned today for threatening to burn the plant of the fulminate of mercury works owned by the Ontario Government.

The trouble arose over employment of non-union labor. Henry and other employees were laid off during a slack period, and when operations were resumed he was not taken on.

DIES AFTER HEARTY MEAL.
Brockville, June 19.—(Special.)—After eating a hearty meal, which he seemed to relish, James Easter, an elderly citizen, fell from the chair at the home of his brother-to-day and suddenly expired. Yesterday he left the hospital, where he had been receiving treatment for a fortnight. He was 63 years of age.

The Ontario Bank

Annual Meeting of Shareholders Yesterday

The Annual Meeting of the Shareholders of the Ontario Bank was held at the Head Office, Toronto, on Tuesday, June 19th, 1906, at 12 o'clock noon. Among those present were: G. R. R. Cockburn, Donald Mackay, John Flett, Henry Lowndes, Thos. Walmsey, R. Grass, Hon. R. Harcourt, R. D. Perry, Henry Lowndes, Barlow Cumberland, R. Mulholland, Cephas Goode, F. B. Polson, J. K. Macdonald, T. H. Bull and others.

On motion Mr. Geo. R. R. Cockburn was called to the chair and Mr. McMillan was requested to act as secretary. Messrs. J. K. Macdonald and Henry Lowndes were appointed scrutineers. At the request of the chairman, the secretary read the following report: To the Shareholders: The Directors beg to present to the Shareholders the 49th Annual Report for the year ending 31st May, 1906, together with the usual statement of Assets and Liabilities.

Profit and Loss (brought forward from 31st May, 1905) \$ 62,445 79
The net profits, after deducting charges of management expenses accrued upon deposits, and making provision for bad and doubtful debts, were 156,915 83
\$219,361 62

Which have been appropriated as follows:
Dividend 3 per cent. paid 1st December, 1905 \$45,000 00
Dividend 3 1/2 per cent. payable 1st June, 1906 50,000 00
Added to Retained 5,000 00
Reserved for Officers' Pension Fund \$152,500 00

The Rest Account has been increased by \$50,000, which now stands at \$700,000 and the amount carried forward to the credit of Profit and Loss Account is \$66,861 62.

The Deposits have increased \$634,640.25 since our last Annual Meeting and the General Business of the Bank continues to steadily improve, which may be regarded as satisfactory.

Branches and Sub-branches of the Bank have been opened at King City, Port Hope, Millbrook, Warsaw and Peterboro (South End). Your Directors have decided that in future, all Dividends shall be paid quarterly.

All the Offices of the Bank have been inspected during the year, and your Directors have pleasure in acknowledging the efficient manner in which the staff have performed their respective duties.

G. R. R. COCKBURN, President.

NEW NATIONAL THEATRE.

Messrs. Carrere & Hastings Are the Successful Architects.

Messrs. Carrere & Hastings, the New York architects, who have recently opened offices here in the Lector Building with Mr. Eustace G. Bird in charge, have won the competition for the National Theatre, to be built in New York City. This theatre will be constructed along lines similar to the Grand Opera House in Paris, France, being in reality a home theatre. No expense will be spared in order to make the National the finest playhouse on the American Continent.

PEBBLE UNDER SCALP.

Sevre, Pa., June 19.—R. N. Steing, a restaurateur of this city, has in a peculiar manner overcome a severe pain in his head, from which he had suffered for several years. All efforts to alleviate it had been futile. A young man had had a customer make a small incision. Out dropped a pebble the size of a pea, and with its removal the pain stopped. Steing remembers that 25 years ago, while diving in shallow water at Calhoun, N.Y., he felt his head severely. The wound was stitched up and he believes that the pebble got under the skin and has been bothering him since.

A WOMAN'S BACK IS THE MAINSPRING OF HER PHYSICAL SYSTEM.

The Slightest Backache, if Neglected, is Liable to Cause Years of Terrible Suffering.

No woman can be strong and healthy unless the kidneys are well, and regular in their action. When the kidneys are ill, the whole body is ill, for the poisons which the kidneys ought to have filtered out of the blood are left in the system.

The female constitution is naturally more subject to kidney disease than a man's; and what is more, a woman's work is never done—her whole life is one continuous strain.

How many women have you heard say: "My, how my back aches!" Do you know that backache is one of the first signs of kidney trouble? It is, and should be attended to immediately. Other symptoms are frequent thirst, scanty, thick, cloudy or highly colored urine, burning sensation when urinating, frequent urination, puffing under the eyes, swelling of the feet and ankles, floating specks before the eyes, etc.

These symptoms if not taken in time and cured at once, will cause years of terrible kidney suffering. All these symptoms, and in fact, these diseases may be cured by the use of

DOAN'S KIDNEY PILLS

They act directly on the kidneys, and make them strong and healthy.

Mrs. Mary Kelley, Auburn, N.S., writes: "For over four months I was troubled with a lame back and was unable to turn in bed without help. I was induced by a friend to try Doan's Kidney Pills. After using two-thirds of a box my back was as well as ever."

CONSTRUCTION OF SEA WALL CONTROLLERS TALK ON IT

Decide on Recommendation—Numerous Other Matters.

Several important matters were brought up before the board of control yesterday. The construction of the lake front driveway received considerable attention. It was decided to recommend that the construction commence between Spencer-avenue and the old fort, and also that the sea wall be laid far enough to admit of a roadway, boulevard, bridge path and bicycle path. This would take about 150 feet more from the shore, and the cost would be in the neighborhood of \$70,000. The engineer was instructed to prepare a report to be presented at the next meeting of the board, after consultation with Park Commissioners.

The petition of the residents of Chicomine-avenue for the erection of a boarding stable was turned down. "It is the very spot for a stable," said Controller Hubbard emphatically. A letter from H. H. Dewart informed the board that the Yonge-street bridge bill will be up next Tuesday. The board knew that the bill will be defeated, and that the more a prolonged discussion will take place certain amendments that will permit of the bill being thru.

The Gerrard-street extension is nearly completed, and according to Controller Jones will pay the city ten times the cost in the increased value of the property on both sides of the street from Jones-avenue to the city limits, which belongs to the city.

Controller Jones will present a resolution asking that the city purchase more flush cars for cleaning the pavements. A report showing the present number and the mileage covered will be submitted at the next meeting. That the purchase of Dundas-street sewer from Toronto Junction and the purchase price be credited to the account standing against the Junction for water supplied by the city was recommended by Engineer Rust. The matter will be considered for at the present time the Junction is in arrears for the water.

Land Sales. The following land sales of tax land were approved by the board: 59,125 sq. ft. Hartcourt-avenue, south side, assessed at \$5 per foot, taxes amount to sixty cents per foot, to Robert W. Smith, 330 College-street, for \$4 per foot. 23,150, College-street, south side, near Gladstone-avenue, assessed at \$10 per foot, taxes amount to \$1.60 per foot, to Edward J. Farworth, 8 Dundas-avenue, for \$28 per foot.

30,121, on Givens-street, east side, north of College-street, assessed at \$12 per foot, taxes amount to \$10.32 per foot, to Mrs. Lydia Mundy, 38 Hayden-street, for \$18 per foot. Hugh Cameron & Co., the agents of the Waterous Engine Co., will supply the new hook and ladder truck at a cost of \$1850. The price is \$100 in excess of the reserve fund of the same truck a couple of years ago.

The application of the James Bay Railway for the Dalton lot on the north-west corner of the Esplanade was referred to the assessment commissioner.

Mrs. A. F. Hines, 11 Cowan-avenue, applied for assistance in receiving a refund of money paid as taxes on a house which she claims was paid twice, and that the city treasurer admitted having received the two amounts. Controller Jones thought that if the treasurer's report showed both amounts the money should be immediately returned to the Coady will report at the next meeting.

Building Inspection. A letter was read from the Federation of Building Trades protesting against the "evident laxity on the part of the building and scaffolding inspectors, in not seeing that their orders are carried out, as a result of which serious accidents are liable to occur, as evidenced by the late accident at the old church on Denison-avenue, as a result of which one man lost his life, and another was seriously injured."

The matter was referred to the city architect. The application of the Toronto Bill Posting Company for a reduction in their assessment of 1904 brought forth a strong protest from Controller Jones against the practice of remitting taxes already passed by the court of revision. The city solicitor will report on the power of the board to deal with "rebating assessments."

City Engineer Rust told the board that he had been informed that the Junction was prepared to supply water to manufacturers at the same rate paid the city, viz., 3 cents per 1000 gallons. He pointed out that this would be a net saving of 9000 gallons that the city charged manufacturers, and recommended that the board make arrangements with the Junction whereby the Junction could sell water cheaper than the city. He also reported that William Mackenzie had graded Edmund-street, which was contrary to the board's order. The city solicitor was wanting to issue a writ on instructions from the board.

Deer Park's application for annexation will be heard next Tuesday at 11 a.m. by the board of control.

If you tried every Automobile that's made

If you compared, by personal scrutiny and actual test, every automobile that is known to the motoring world, your choice at last would simmer down to a selection from these very twelve makes that comprise our offering to the Canadian buyer of an automobile

You would spend many months and many dollars making an examination so complete, a comparison so inclusive, and you would finally be no further towards certainty than you can be right now if you deal with us for the automobile you think of buying. How do we know that? On what grounds do we make an assertion so positive and so unqualified? We make it upon these grounds: As the chief automobile concern of Canada it is our special business to know—not to guess or hazard, but to KNOW—which of all the world's motor cars are the absolute standard of value, each of its kind and for its price, and which best meet Canada's peculiar road conditions and the specific and distinctive requirements of the Canadian motorist, whose needs differ essentially from those of his cousin over the border. This too we must KNOW, and know how to provide for those needs. Before we can know that, we must have made the very comparison we have outlined here—we must have examined and contrasted the merits of ALL the good cars, and we must have considered the respective claims of each maker in

their relation to the special demands of the Canadian motorist. That much we must do, big as the task looks—and is. We must have done it, because we could in no wise afford to put our reputation back of any maker's cars unless we KNEW absolutely that no other maker could outvie him in merit, or outsell him in value. That's mere business logic, you see. For we can afford to sell only the supremely best—why should we sell any automobile less good than that?—since it is true that we could make no greater profit from the dubious car than from the car we KNOW is good. So we scrutinize the auto market—with the judgment of experts, sharpened by the necessity of business. And, therefore, the fact that we have just twelve makes on our list instead of forty, as we easily could have with our purchasing power and our selling power, is of itself proof that we have chosen capably from the market as a whole, and that these twelve makes represent no dictate of commercial necessity, but merit—supreme, examined, compared merit, judged against all the automobiles there are,

SPECIAL FAIRLY GOOD INVESTMENT STOCK EDITION

GRAIN MARKETS FIRMER.

Grain prices continue to hold very firm in the face of a growing crop, sufficient to imbue many with the idea that higher prices will be warranted later on. At Chicago the corn grains have displayed more firmness than wheat, particularly on the ground that unfavorable weather has already worked irreparable damage to this season's crop. A shortage in winter wheat in the United States as compared with a year ago is now a foregone conclusion. The June government report suggested a crop of 47,000,000 bushels, with a maintenance of current conditions unless harvest. This estimate was below that of the April report by 68,000,000 bushels. Since the first of the month, however, serious damage thru drought in Nebraska and floods in Texas has indicated that the reduction in the final crop must be increased. Last year the loss from June to harvest was 4,000,000 bushels, but this was accomplished by almost perfect weather for these months. The spring wheat crop which will be reported upon next month is expected to remedy the shortage in the winter wheat, but this, of course, is highly problematical. The visible supply of wheat in North America is larger than that of a year ago but these supplies are not easily forced on the market at prevailing cash prices. The world's supplies on June 1 were given as 151,119,000 bushels, or 15,000,000 bushels above a year ago. Current prospects abroad are not such as to indicate that the yield will be larger than last year. Russia is uncertain and made more so by recent reports of damage. Australia will have 38,000,000 bushels for export, or 8,000,000 bushels more than in 1905. India can ship about 28,000,000 bushels and Argentina will have to export. Canadian reports favor at least an average crop and reports from the Northwest contain no disturbing feature. The strength in the United States markets has influenced Canadian grain prices and both wheat and other grains are held firmer at a higher range of quotations.

CARING FOR THE HAY CROP.

The haymaking season is near at hand and farmers all over the country will soon be busy with the "new mown" hay. While much of this hay will be made properly and make good feed for live stock, there is a great deal that will be ruined in the making. Improper methods of making hay are responsible for much of the loss one hears about. The first thing to consider is, when is the proper time to cut grass hay?

It is conceded by all chemists that the most nutriment is in the plant after the time of blossoming and before the seeds ripen. While blossoming the nutriment is in the stalk and leaves of the plant, but as the seed develops and ripens they are drawn out and stored in the seed, and consequently leave the stalks more or less woody. So the time to cut is just after the plant has blossomed. Of course, where there is to be a second crop, as in the case of clover, where the seed crop follows, it is necessary to cut the first crop a little early in order to give the second crop a better chance. The practice of having clover and timothy mixed makes it necessary to cut the crop before the timothy is fully ripe, as the clover ripens first and its value will be lost if allowed to stand until the timothy ripens. A good rule to go by and one generally followed by those who have the best success in making clover hay is to cut the crop when the heads just begin to brown. Some mow in the early morning, when the dew is on, and then turn until it is dry enough to take in the afternoon, but this takes good weather. It is when the rainy spells come during the haymaking season that the farmer must use good judgment to get in his crop without loss.

Another way to cut clover is to cut it in the morning, leave it lie on the mow until noon, and then cock it in the afternoon when it is perfectly cured. If the crop is put into the barn before it is cured it will heat, and this causes it to become dusty, and in some cases the heat is so great that there is spontaneous combustion. It all depends upon the amount of mow room damp the hay crop can be before it is put in. If it can be spread out in the mow, and have plenty of ventilation it can be put in damper than otherwise.

LIVE STOCK REVIEW.

On the Toronto market all choice to prime quality live stock in all the different classes is in excellent demand and selling at good prices. Prime quality shipping cattle are in demand at nearly every market. Prices for such range from \$5.15 to \$5.30, while medium sell at \$4.80 to \$5 per cwt. Export bulls are worth from \$3.75 to \$4.25 per cwt. There is, and has been, a steadily increasing demand for prime quality beef, and the demand for this class of cattle was never greater than now. Prime steers and heifers sell readily (but there are few of them) at \$4.85 to \$5.00 per cwt; loads of good, \$4.60 to \$4.80; and mediums at \$4.20 to \$4.50. The best stall fed cows sell at \$3.75 to \$4.25, but grass cows are slow at \$3 to \$3.50 per cwt. Business in stockers and feeders is slow. Only a few farmers have been coming on the market lately, and they looked

TORONTO HORSE MARKET.

NOTICEABLE DAILY OFFERINGS LIGHTER THAN EARLIER IN THE YEAR, BUT CLEARANCES ARE THORO AT GOOD PRICES.

There has been quite a rally in the horse market during the past week, and while the sales have not been on an extensive scale, several supplementary orders from contractors and from other sources have been received, that have given quite an air of briskness to the principal markets. Prices also have been firmer. Altogether it can safely be said that the current affairs are, in most respects, satisfactory, and for the season of the year exceptionally good. Carriage horses continue scarce, but saddle horses and did appear to be more plentiful. While no private sales of importance have taken place, several shipments have occurred of carriage horses from Toronto to distant parts of Canada and to the States. One chestnut mare of quality was sold to a gentleman in Montreal for \$2000. Another mare of similar quality was put on an especially handsome high-stepping dapple-grey mare, undoubtedly one of the best in the country. The price was \$1000. The first winner of the Oaks was Bridget, the property of Lord Derby, after whose estates, near Epsom, the race was named. The same Lord Derby won the race a second time several years after, and then, at an interval of nearly half a century, Lord Stanley, afterwards Earl of Derby, was victorious with Iris. The present Lord Derby did not begin racing until 1890, and he had the satisfaction of winning the Oaks in 1896 with Canterbury Pilgrim, which he had purchased as a yearling from the late Dowager, Duchess of Montrose. Esting the King's Thoroughbred, who had previously won the One Thousand Guineas. At an interval of ten years he has again been successful in the "ladies' race," this time with a filly of his own breeding, the being Key-stone II, who is by Perimeter from Look and Key, by Jersey, and who had only once appeared in public previous to her victory at Epsom. She won so easily that she will be favorite for the Spiceland and Epsom, first and second in the Derby, are not engaged.

B. H. BULL & SON'S

Important Importations for Brampton Jersey Herd.

Messrs. B. H. Bull & Son, have just made some very valuable additions to their famous Brampton herd of Jersey cows, and those interested in pedigreed stock generally through Canada, and especially those interested in family and dairy cattle, will be pleased to note that the Brampton herd, which is the largest registered herd in Canada, and which is pursuing the policy of importing new and high-class animals from time to time.

During the past five years the Brampton Jerseys have taken many honors at the leading Canadian exhibitions at Winnipeg, London, Ottawa, Toronto, and at all of their competitors combined, and Mr. Bull assured the World yesterday that this year their exhibit here would be stronger than ever.

The highest-priced and best animal sold at the recent sale at Mount Airy, a recent valuable addition to the Brampton herd, and the only Jersey cow owned in Canada to-day who records as a butter-producer is testified by a special certificate of merit issued on the Island of Jersey, is owned by Messrs. Bull & Son, and will be exhibited by them at the Toronto Exhibition hereafter.

Poultry Pickings.

Every poultry keeper should have traps nets, as they will help him pick up the birds that are scattered about. To prevent colds and roup put eight or ten drops of tincture of acetic acid to each gallon of drinking water twice a week.

A good feed for chickens is made by mixing cornmeal and bran, equal parts into a mush with milk. They eat much more than chicks.

One of the reasons and probably the main reason hens steal their nests out is because the nests in the poultry house are not kept clean and comfortable.

Before placing eggs in the nest it is a good thing to sprinkle insect powder, sulphur or tobacco dust in it, as this will keep away the lice and the young chicks will be free to start on.

Corn is a very superior to oats as poultry feed. Experiments show that when corn is fed there is an increase in body weight and when oats are fed there is a tendency in the opposite direction.

The best types of poultry for market purposes are those which have a plump body, light-colored plumage, prefer dry white, yellow skin and legs, neat head points, such as small comb and wattles; medium size, and those which grow rapidly.

Hens that lay soft-shelled eggs do not get enough lime in their feed. They should be fed a different diet with more fruit and vegetables. When they drop these soft-shelled eggs in the runways and on the floor it is likely to encourage the other hens to eat them.

If the dog eats the eggs, punch small holes in each end of an egg, and blow out the contents. After allowing the egg to dry fill it with strong cayenne pepper and stuff small wads of cotton into the holes to prevent the pepper from dusting out. Place it where the dog can get it and he will seldom want another.

CHICAGO ADVICE.

A fair summer trade featured the current market, interspersed with few sensational features. Demand concentrated principally on the heavy business classes, the offerings of which included excellent quality of high-class consignment presents. The regular commercial class draughts moved the early part of the week, but later sales were slow and prices were lower. The week's business was the most satisfactory, as many large orders were included in the week's early transactions and closing trade lacked the support of the week's early purchases. Eastern and local interests were largely represented in the week's business, and the week's sales were slow at unevenly \$5 to \$10 lower prices for nearly all classes, shippers showing a disposition to make more liberal terms than they had in their consignments.

THE FARMER COMING TO THEIR OWN.

It is something of a revelation to buyers to find that farmers have come to where they can sell or hold their products like other people. Why not? A farmer knows what his own land and what price would give him a reasonable profit, just as merchants and traders know the value of their goods. When such a condition becomes universal, then the country has arrived at its greatest period of prosperity, for the prosperity of each industrial class means the prosperity of all, just as the impoverishment of any great industry is seriously felt by all.

SETTING WAGON TIRES.

It is altogether possible for the farmer to do a good job in setting wagon tires, if he only knows how. A writer in an agricultural exchange gives the following explicit directions: "Collect a nice lot of heavy brush, light sticks of wood or even cobs. Now remove the wheel from the wagon and place it on a block under the axle, just before putting the wheel on axle. Now while piling on brush to heat the tire, someone must take an old wooden barrel full of water and pour it over the tire, and the water will run around the outside of the felloes. Now the tire is white hot; handle with long or sticks and drive on the wheel with a bar of black iron, which has been placed on the axle and turn in the tire cool. Treat each one needing it the same.

ADJOURN TILL OCTOBER.

London, June 19.—Prime Minister Sir Henry Campbell-Bannerman, announcing that the house would adjourn at the end of July, resuming its session in October.

ACCIDENTAL DEATH.

At the inquest held yesterday to enquire into the death of Max Ziedel, who was killed at Reid & Brocks's Foundry, it was found that his death was accidental.

QUACK GRASS ERADICATED.

The following method has been found effective in ridding land of quack grass: "Plow the ground very early in the spring. Then harrow until precisely level. Let lie until about the 25th of May, when the quack grass and other weeds will have reached a large growth. Take three good horses and a sixteen-inch walking plow, turn the ground over, plow as deep as possible, using a heavy log chain attached to the plow and whiffletree, to drag the growth of vegetation in the furrow so that the quack grass will be covered by the plow and harrow lightly with slanting tooth harrow. Harrow around the furrow in the same direction in which it was plowed, so as not to uncover any of the vegetation that has been turned under or bring any of the quack grass roots to the surface. If this treatment of ground that is infested with quack grass is carried out as above stated, little or none will be left and the crop of buckwheat will more than pay for the treatment.

HOG NOTES.

The cleaner the feed and feeding places, the better the quality of the pork in all.

A sow with a mean, cross temperance, and disposition often causes loss of the litters.

A ground floor is the best for the sleeping quarters for the reason that the soil retains the heat, and is much warmer than plank in winter and cooler in summer.

The boar will thrive better if given good range and exercise, will have more vigor, will sire pigs with stronger vitality, and the litters will be larger in number.

The vigor and health of the pig are to some extent involved in the strength and texture of his bones. In fact, the treatment of his exercise, and his food, are so completely interwoven that there is far more profit in having the pigs come early enough to make good pork in the fall than there is in keeping a lot of shoats thru the winter, as too much food then goes to keep up animal heat.

If the swine are in the fattening stage, they should have all they will eat up clean, but growing animals should have just enough to keep them in a thrifty growing condition.

Hogs should not be permitted to sleep in the dust, it causes mange and lung trouble. If possible, supply bedding or some other kind of material that can be readily changed when needed.

RISE DUE IN CATTLE TRADE.

Chicago Drivers' Journal: Optimistic views regarding the future of steer trade are heard in nearly all quarters these days. Belief is expressed that the cloud of depression which has hung over the beef market for the past few weeks will have been lifted within the near future, and prices for beef are beginning to show a decided advance. Under normal conditions this month and last a good market, should have been enjoyed. Strong prices were in trade, according to all signs in the trade, but they were put one side by the great wave of sensational uncertainty regarding the packing industry which swept from one end of the country to the other, and also reached into foreign markets.

TO STOP TONGUE LOLLING.

A disagreeable habit that some horses have is lolling out their tongues. J. S. Carter gives his plan for stopping this practice as follows: "Take a strip of good stiff material, such as tin or sheet iron, six or seven inches long and three and a half inches wide. At one end of this cut out a strip in the middle about three inches long and a half-inch wide, or just wide enough to slip down over the bit. I have used this and it worked like a charm. One or two small holes are punched in the solid end of the strip to hold it to the cheek piece of the bridle. This end may be covered.

TREATMENT OF LOUSY LIVE STOCK.

Farm stock that become badly infested with lice during the winter months do not thrive as they should, and in the spring may show marked unthriftiness. This is especially true when stock are not well cared for and in young animals.

The sucking lice are more harmful than the biting varieties, as the former have mouth parts adapted to penetrating the skin and sucking the blood of the host. However, the symptoms may be as marked in sheep and other animals, that are badly infested with sucking lice, and sucking the blood of the animal, matted and detached, and the skin irritated and inflamed as a result of the animals rubbing, biting and scratching the parts.

Good care during the winter will prevent the lice from doing a great deal of harm, and the sulphur ointment rubbed back of the horns or on the head and neck, and in the case of the pig, on the face and neck, will help in destroying them. A thorough treatment of the herd with dips or washes cannot be practised during the winter months, unless the treated animals are prevented from catching cold. A favorable time to use this line of treatment is in the spring. A one or two per cent. water solution of a disinfectant should be used. Especially, and the addition of four ounces to every gallon of the disinfectant solution used greatly increases the effectiveness of the remedy.

Standard TURNIPS Swede..

GROWN FROM SELECTED ROOTS.

The following are the most popular standard English varieties, having for years given the greatest satisfaction to our numerous customers, being procured from the most reliable growers.

To the price of Turnip Seed WHEN WANTED BY MAIL ADD 5c PER POUND FOR POSTAGE.

Elephant, Monarch or Jumbo Swede Turnip

The reports received during past years from all sections of Canada pronounce this Turnip to be unequalled in size, quality and uniformly handsome appearance. The yield compared with other well known roots, has been from 2 to 6 tons more per acre. In shape it is very distinct, being somewhat oval in shape, slightly oblong and remains sound and good till the lower half deep yellow; the flesh is very solid and nutritious, and there is an almost total absence of fibrous or faney roots. During the past season this variety has proven most satisfactory, so much so that we have every confidence in recommending Elephant or Monarch Swede to the farmers of the Dominion. Per 1/4 lb. 10 cents; per pound, 25 cents; 4 pounds or over, 20 cents per pound.

Simmers' Champion Purple Top Swede Turnip

This magnificent Swede, of the most nutritious purple top variety in cultivation. It is large, yellow slightly oblong, with single tap-root; free from coarseness of neck, and for uniformity of crop and keeping qualities is superior to all other Swedes. It produces a very heavy weight per acre, keeps sound and good until late in spring; flesh always rich and sweet in flavor. Per 1/4 lb. 10 cents; lb. 25c; 4 lbs. and over, 20c per lb.

Simmers' Defiance Swede Turnip

This magnificent variety is unquestionably the most profitable of all bronze top Swedes, as well as the hardest winter best shap'd and by far the most productive, a yield of 1000 bushels per acre and, over, under careful cultivation, being of frequent occurrence. Bulbs are somewhat oval in shape, slightly oblong and remain sound and good indefinitely. Flesh is of a beautiful yellow color, always sweet, tender, juicy and nutritious, a variety that should be sown in preference to all others. Per one quart, pound, 10 cents; pound, 25 cents; 4 pounds or over, 22 cents per pound.

Kangaroo Swede Turnip

A very hardy Swede, similar in size and growth to Elephant, but of a bronze green. This Swede is particularly adapted to soil and districts that are cold and backward.

This splendid hardy Swede possesses the heavy cropping qualities of the famous Elephant or Monarch, with the grand condition and keeping qualities, particularly in those districts where the land lies exposed and is consequently cold and backward. It has been largely grown in the Province of Ontario, and has produced the heaviest crops ever known in that section of the country.

Price, per 1/4 pound, 10 cents; per pound, 25 cents; four pounds or over, 20 cents per pound.

IS DANGER OF MAKING IT TOO STRONG AND IRRITATING THE SKIN.

After treating the herd, the stables, sheds or sleeping quarters should be sprayed with about a two per cent. water solution of the disinfectant, or whitewash may be used instead. This is necessary in order to prevent re-infesting the herd from the surroundings. If there is much "litter" around the yards and it cannot be gotten rid of it is advisable to move the herd to other yards. Tar disinfectants in one or two per cent. solution do not destroy the eggs or nits, hence it is necessary to treat the animals again in ten days or two weeks.

Stockmen sometimes ask if the feeding of sulphur to lousy animals will not drive away or destroy the lice. The feeding of small doses of sulphur will do no harm, neither will it help in getting rid of the lice, and it cannot be considered a remedy for this class of disorders when used in this way. Sulphur is effective, however, when used in the form of a spray, and it is necessary to use four ounces to every gallon of the tar disinfectant solution used greatly increases the effectiveness of the remedy.

68 CARS AT CITY YARDS

Trade Was Good for Prime Quality Cattle—Medium Cattle Slow of Sale.

Receipts of live stock since last Friday, as reported by the railways, were 68 car loads, composed of 1150 cattle, 300 hogs, 800 sheep and lambs and 200 calves.

Prime butchers' picked lots sold from \$4.50 to \$5.00 per cwt., but there were few of this class; leads of good quality, \$4.00 to \$4.75 per cwt.; medium at \$3.50 to \$4.00; common at \$3.00 to \$3.50; stall-fed cows at \$3.50 to \$4.00; grass cows, \$2.75 to \$3.25 per cwt.

Sheep and lambs—Receipts, 600 head; slow and steady; ewes, \$5 to \$5.25; lambs, \$6 to \$6.25.

Chicago Live Stock. Chicago, June 19.—Cattle—Receipts, 3500 head; steady; common to prime, \$3.75 to \$4.75; cows, \$3 to \$4.50; heifers, \$2.75 to \$3.25; bulls, \$2.75 to \$4.25; calves, \$5.75 to \$6.25; stockers and feeders, \$2.75 to \$4.75.

British Cattle Market. London, June 19.—Cattle are quoted at 10 1/2c to 11 1/2c per lb.; refrigerator beef, \$12 to \$13 1/2 per lb.; sheep, dressed, 14c to 15c per lb.

AIM FOR DOLLAR WHEAT. Farmers of the Middle West Cooperate to Help Prices.

Farmers from all parts of the middle west in session in Chicago recently arranged their plans for a campaign to advance prices for farm products.

Hen-Hatched Chicks. Few people take the chicks from the incubator as soon as hatched, knowing that it is for the good of the chicks to remain quietly in the warm incubator for the first forty-eight hours.

Water for Cows. An exchange urges very properly that, inasmuch as it has been proved by actual experiment that the average cow will drink 1000 pounds of water a month, great care should be exercised to provide her with water.

Building the Silo. Silage is an important part of the ration of several classes of farm animals and its importance is increasing.

HAS THREE WIVES.

Robert Leverton Will Be Tried by Jury.

Geo. Leverton will be tried before a jury for bigamy. He is alleged to have married Mary Robinson at Wortley, England, Jan. 19, 1889; Lizzie McGraw, at Limestone, N.Y., June 11, 1896; and Elizabeth Perth, at Broadway Tabernacle, Toronto, Sept. 14, 1904.

The first wife appeared against him in the police court yesterday. She said she left him in 1894. She wrote to him afterwards but got no answer, and later heard he was dead. Last February, after living in Toronto four years, she found him alive, but he denied that he knew her. She has also married again.

NEW YORK STOCKS RALLY TORONTO MARKET IS DULL

Flotations of Penna. Loan Used as Factor on Wall Street for Firmer Prices.

World Office. Tuesday Evening, June 19. The Toronto stock market showed an increasing sign of activity to-day, and, as on yesterday, it failed to respond to New York weakness, so to-day it refused to be moved up by a firm turn in the outside market. Money for accommodation on stock collateral is loaning freely.

HINTS FOR TOURISTS.

Some Things to Avoid and How to See London.

"A Mere Englishman" writes the following hints for American tourists in Europe:

The American tourist season has begun, and soon Regent-street and the Rue de la Paix will be filled with clean-shaven gentlemen with their hair parted in the middle and falling gracefully over their ears, and with strong-minded ladies with butterfly nets plumed on their hats.

"East is east and west is west," and it may be useful to print a few suggestions for our visitors:

1. Of course, American men, and still more, American women, are infinitely superior to all Europeans. You may tell us this in England as loudly and as often as possible. We, the English, can think as badly of England as the English. At heart we are the most modest people in the world.
2. Be more careful in Paris and Berlin. The Parisian, if he understands you, will laugh like anything, but in Berlin you will probably be arrested for "lese majeste."
3. Never be civil to a policeman. London is not New York. Put any old question on him as shrewdly as possible, and if he does not answer correctly and at once, ask him what kind of a "hoodlum" he is anyway. He likes it, and besides, we pay him for this, but.
4. Behave discreetly with omnibus drivers, conductors and cabmen. The first class are famous for facetious but unreliable information. And more than one respectable citizen of Providence has learned that the statue outside St. Paul's represents Miss Marie Lloyd, a lady of the name of London, the Hippodrome, the British Museum, the National Gallery and Mme. Tussaud's, as well as to guide the shoulders of the residences of the Duchess of Marlborough, the Duchess of Manchester, and other American personages.
5. Be as patient as you can with us when we fall to understand your language. We admit that you have an improved English, but it was ours first, anyhow.
6. Complain bitterly of the absence of ice-water in restaurants. You will be doing a national service.
7. If you happen to see any of the nobility driving through the streets do not fall down on your face. England is not a republic.
8. Your time is probably limited, but you must be careful to see everything that must be seen. By rising early and keeping hard at it, you will be able to see the Queen of Scotland, the Hippodrome, the British Museum, the National Gallery and Mme. Tussaud's, as well as to guide the shoulders of the residences of the Duchess of Marlborough, the Duchess of Manchester, and other American personages.
9. Then in the evening you start for Stratford-on-Avon, to see Shakespeare's birthplace.
10. The language difficulty is not so great as there is no greater delusion than that the Londoner and the New Yorker speak the same tongue.
11. For example, you call the beefsteak at the Tower "bully," he will misunderstand you, and be hurt, and angry.
12. I append, therefore, a glossary of common English terms, with the translation of each into American:

English:	American:
Good gracious!	Gee whiz!
Blouse	Coat waist
Situation	Location
Circulars	Literature
Shop	Store
Nice	Elegant
Charming, attractive	Bully
Most important person	Sidewalk
Servant	Janitor
Caretaker	Graft
Illegal commissions	Parlor
Drawing-room	Dining room
Goloshes	Bunch
Crowd	Gullible
Stagging	Suit
Coat and skirt	Prince Albert suit
Frock-coat	Jem dandy
Heavy swell	Depot
Railway station	Depot

There are many others, but these you will doubtless find useful.

BRITISH BATTLESHIP DAMAGED

Ramifies Has to Be Assisted into Sheerness.

London, June 19.—The British battleship Ramifies was assisted back to Sheerness, having been in collision in the Channel with the battleship Resolution. The Resolution was not damaged, but the Ramifies must be docked. As far as known the Ramifies is the only big ship crippled by collision in the week's naval manoeuvres.

Two or three torpedo craft have been in collision or aground, and some machinery defects have developed, but these are few, compared with those in former manoeuvres.

China Awakened.

A competent authority in things Chinese states that during the last two years China has made more real advancement than in the previous millennium—a judgment with which Dr. Joseph Franklin Gilchrist, medical missionary at Peking for the Presbyterian Board of Foreign Missions, is heartily in sympathy. He calls the changes now in progress in China "a miracle of national resurrection," and has prepared an authoritative account of these changes which will appear in "The July Century" under title of "China Awakened."

Another Firm Signed.

The Electrical Workers were addressed last night at the Labor Temple by J. J. Reid of Erie, Pa., vice-president of the International Union. He leaves the city this morning. The executive committee reported that the firm of Smith & Frame had signed the new agreement yesterday and taken back five men.

A Charmed Life.

Charles Greenhill was charged at the West London police court with attempting to commit suicide. He tried to hang himself, but the rope broke, and then he jumped from a window thirty feet above the ground and sprained his ankle. He was discharged.

YORK COUNTY AND SUBURBS
BANK FOR NORTH TORONTO

Ontario Bank Makes Proposition to Council and is Circulating a Petition.

Toronto Junction, June 19.—There will be two games of lacrosse to-morrow on the Annetts-street grounds. The merchants of the north side of the town play the merchants of the south side at 2.30, and at 4 o'clock the Shamrocks will play Bradford on the championship of the Junior C.L.A.

The line-up will be as follows:

North Side: C. Irvine, goal; H. Scott, point; W. J. Dalton, cover; P. Goldthorpe, first defence; H. empt, second defence; H. West, third defence; N. Winters, centre; E. B. Wright, third home; C. F. Wright, second home; W. Sampson, first home; F. C. Wagoner, outside home; J. Howell, inside home; South Side: H. N. Morrison, goal; H. Y. Arnold, point; Thomas Sheppard, cover; W. R. Sheppard, first defence; C. Shore, second defence; W. Glover, third defence; W. Scott, centre; W. J. Sheppard, third home; W. Agin, second home; T. Eades, first home; G. Tremble, outside home; J. MacEachren, inside home.

J. LeGraw of the senior Shamrocks will be referee.

The Shamrocks will line up as follows:

Goal, R. Kinsman; point, R. Gilbert; coverpoint, J. Johnston; first defence, B. Smith; second defence, R. Scott; third defence, H. Wallace; centre, Savage; third home, R. Smith; second home, J. Irvine; first home, C. Davis; outside home, E. Greig; inside home, R. King; field captain, D. McClure.

Referee, F. C. Wagoner.

At the police court this morning A. McVey of 141 Isabella-street, Toronto, was fined \$5 and costs for running his motor car at a higher rate of speed than allowed by law on High Park-avenue on Sunday, June 10. The police have been instructed to summons everybody caught infringing on the law.

EMPIRE HOTEL.

336 Yonge-street, most modern and up-to-date hotel in Toronto. Rates \$1.50 to \$2 per day. J. Newton, proprietor. Phone Main 2255.

North Toronto.

Choice brands of cigars and tobacco at Fenwick's shaving parlors, Eglinton. Angus Curry, driver for T. E. Leeder, cartage agent, met with a fatal accident yesterday morning. He was hauling a load of shingles into Councilor Anderson's barn and did not stoop down far enough while entering. The beam caught him by the shoulders, giving him quite a squeeze. He was conveyed home and medical aid summoned.

Still more petitions for sidewalks are coming before the council. Ratepayers on Hawthorne-avenue are asking for a four-foot wide sidewalk. Ratepayers on Daville-avenue, south side, and Balliol-street, north side, want a four-foot plank sidewalk.

That North Toronto will have a branch of a chartered bank in the near future is now an established fact. Douglas MacLennan, manager of a branch at Aurora of the Bank of Ontario, circulated a petition among the business men of the town yesterday, soliciting the patronage and support with gratifying success. The promise is made that the bank will locate as near the town hall as possible, and, if necessary, will establish a branch at Daville.

"The more hurry the less speed," said Councilor James Peers yesterday morning when, shortly after 7 o'clock, the boiler in his brickyard sprang a leak. Mr. Peers is hardly able to fill his orders and the accident caused a couple of days of shut-down. The boiler was insured.

The congregation of St. John's Church, York Mills, will hold a picnic at Whitford on Saturday.

The Epworth League of the Daville-ville Methodist Church held an ice cream social on Monday evening. A good musical and literary program was rendered, and all enjoyed themselves.

Next Saturday the Sunday school will hold a picnic at High Park. The intention of the engineer at the Eglinton Public School, has tendered her resignation, to come in force with the summer holidays.

Yesterday Mayor Fisher received a rather unique parcel from T. F. Sinclair, Vancouver, B.C., consisting of a little flask filled with outflow water of the septic tank, constructed twenty months ago at Vancouver, B.C., and which outflow empties into the city sewer. Mayor said to be the finest bathing place in British Columbia. The water looks as clear and pure as Toronto's tap water.

Stouffville.

Stouffville, June 19.—(Special.)—The 38th annual conference of the Whiting and Lindsay Baptist Association of the regular churches began here this morning with a large attendance of delegates and clergy, fully 50 of the former being present. At to-morrow's session the number will be increased to from 100 to 150. Rev. J. C. McEwen of Uxbridge was chosen chairman.

Following the introduction of new pastors was the moderator's address, which was replete with information. The report of the publication board was presented by R. D. Warren of the Canadian Baptist, after which Rev. A. R. Parker gave an address on "Church edifices and the relation of the strong to the weak." The local pastor, Rev. T. Booker extended a cordial welcome to the visiting brethren. Rev. B. Tighe presented the report of the western missions, which was of a most encouraging nature. "Foreign Missions" was presented by Jas. Craig, and home-missions, by the moderator, Rev. J. R. McEwen.

Investors wishing to secure stock in the Trembley Silver Cobalt Mine, Limited, should make immediate application, as the shares are rapidly being called for. This has been pronounced by an expert mining engineer to be the best mining proposition offered in Canada. For prospectus apply to S. W. Plack & Co., 25 Toronto-street, head office of the company.

Reverable Homes.

Several villas, which can be termed "reverable" by hand to face in an direction desired, have recently been built at Munich.

Underwear and Half Hose—

We're as careful to sell you quality and style in the "unseen things" in your wearing apparel as we are those that show most.

Specially nice lines in summer-weight underwear and half hose—

Fine French balbrigan underwear—50c.

Fine mercerized lisle underwear—1.00 and 1.50.

Plain and fancy summer-weight half hose—25c and 50c.

84-86 YONGE ST.

Highway-avenue and on both sides of Hawthorne-avenue.

Councillor Bond was anxious to have the streets graded in Toronto. Rates \$1.50 to \$2 per day. J. Newton, proprietor. Phone Main 2255.
