Cove at 12 o'clock on each of those days. to produce the same effect in the daylight, out of the direct rays of the sun. Numerous similar instances of the chemical effects of the sun's light might be adduced from which it is fairly to be inferred that it acts by decomposing or otherwise changing the nature of the substances it acts upon. As the sun-light then acts upon the darkcoloured and vegetable substances diffused through unbleached linen, and causes it to disappear from the goods in the same way it acts on the dock excrementitious matter (Quarterly Journal of Agriculture, iv. 664) turned up to the surface in the process of summer fallowing, decomposes it, and renders the soil lighter in colour and more wholesome in quality for the succeeding crop. This effect of the sun upon the colour of a dug up soil, may have been remarked by almost every reader, though the inference probably has now been made for the first time, that this paling of the colour of the soil is in fact caused by the light decomposing the dark excrementitious matter thrown into the soil by previous crops, which could not otherwise, than by fallowing, be easily got rid of, as no other decomposing agent could be brought to bear so extensively on a ploughed surface, as the sun's light. The agency of the air appears next to light to be the most important in clearing the soil of excrementitious matter; for, even when decomposed, this matter might remain and prove injurious, were it not raised into the air by evaporation, and carried away by the wind. Professor Daniell tells us, that the same surface which, in a calm state of the air, would give off 100 pints of moisture, would yield 125 in a moderate breeze, and 150 in a high wind; but what is of more importance to be remarked here with regard to fallowing, is that, according to the experiments of Curwen, there is only a very small evaporation from an unploughed or under surface, while from an acre well ploughed and harrowed, no less than 950 pints of moisture (containing of course, a pertion of excrementitious matter) were carried off into the air in the space of one hour. Indeed it does not appear that it is in all cases requisite for the excrementitious matter to be decomposed by the sun's light, inmost care, and has a comfortable Cabin for | asmuch as the watery portions thereof may passengers; All Packages and letters will be evaporated without being separated into be carefully attended to, but no accounts can the gases that compose them; but decompoportions of the excrementitious matter can be cleared away from the soil. In the latter case, namely, were solid excrementitious matter must be decomposed in order that it may be expelled, water or moisture will be indispensible in the pro- of evaporation. excrementitious matter. Some may here object that a dark colour | with which they are charged.

SOIL ADAPTED OR NOR ADAPTED FOR FAL-LOWING .- From these principles, then, the Indian village has been discovered to Nacoculture can be practised, fallows are unne- number, built of lobs, ferm six to ten inches cessary; and that on strong lands, under a in diameter, and from ten to tacke leet in est advocates do not recommend it on tur- was found covered, at its first settlen nip soils, or on any friable loams incumbent the whites, with a heavy growth of the on a porous subsoil; nor is it in any case necessary every third year, according to the practice of some districts. On the best cultivated lands it seldom returns oftener than once in six or eight years." This doctrine agrees with the Agricultural Report of Mid-Lothian, where it is said, that on light dry soils it is seldom found necessary to fallow; but heavy or wet lands are not so pliable under green crops, and although it is possible to labour them also without fallowing, yet it is found to be more will be made, when the land is worked for profitable to have recourse from time to time to this process, and its operation is generally more effective and lasting on such ons which preclude the possibility of t.... soils, so that it is seldom necessary to be repeated more than once in seven years. In the Reporte of Staffordshire and Kent, we are told that fallowing for wheat on cold, wet, or strong lands, and all such as are unfit for tunips, is absolutely necessary; and and immediately beneath a large oak trie, whoever may attempt to manage such lands, without fallowing, will have occasion to repent his mistake. In mixed soils, indeed, it is added, too moist for turnips, summer be termed table land. The stratum of fallowing becomes absolutely necessary, and every attempt to crop without it for any length of time on such land, has terminated decomposed eblorite slate. It is not diffiin the injury of the land, and the loss of the farmer. According to the Rev. Mr. Headrick, in the communications to the board of Agriculture, strong clays require a more frequent repetition of fallow than those soils that are dry and friable, from containing a greater proportion of sand. In those districts where excessive rains abound during summer, it is seldom convenient for the farmer to be incumbered with too great a portion of fallow, as it is often impossible to get it properly wrought, before the land be turned into mire, if the finest parts of the soil be not washed away. Among practical men, therefore, it appears, that there are scarcely two opinions about the sorts of soil requiring to be fallowed, and it will be found to agree precisely with the explanation of the effects of the process, that in light friable soils the excrementitious matter will readily escape by evaporation, or where the under soil is porous, may be carried down into it by the descendsition will be indispensible before the solid ing moisture; while, in stiff and heavy soils, the excrementitious matter is lodged and imprisoned in every clod turned up by the plough, and will require to be broken by the roller and the harrow, to set it free and expose it to the sun's light, and the process

A CURIOUS DISCOVERY .- A subterrancea denoting the great antiquity of those built ings, and a powerful cause which subme them. Cane baskets and fragments of a a thenware were found in the joonis. The account is contained in a letter from which the following further particulars are extracted :-- " The houses are situated from fin to a hundred yards from the principal channel of the creek; and as no further excave. has been made, it is more than probabl that new and more interesting developed gold. A great number of curious specimen of workmanship have been found in situati having been moved for more than a th sand years. During my mining operation. last year, I found at one time, about one half of a crucible, of the capacity of neady a gallon. It was ten feet below the surface, which measured five feet in diameter, and must have been four or five hundred years old. The deposit was diluvial, or what may quartz gravel, in which the vessel was imbedded, is two feet in thickness, resting upon cult to account for the deposit of these substances in alluvial soil, for the hills are generally very high and precipitous, and, from the immense quantity of rain which falls, the streams are swollen to a great height, sweeping every thing with them, and, frequently forming a deposit of several feet in thickness in a season; but some individual land is from ten to fifty feet above the present level of the streams. These deposits exhibit appearances of as great attrition as those necently formed. There was a vessel, or rather double mortar, found in Duke's Creek about five inches in diameter, and the excavation on each side was nearly an inch in depth, basin like, and perfectly polished. It was made of quartz, which had been semitransparent, but had become stained with the iron which abounds in quantity in all the country. In the bottom of each basin was a small depression half an inch in depth, about the same in diameter. What its use could have been is difficult to conjecture .-Some suppose it was used for grinding paint &c., or in some of their games and plays .-The high finish and its exact dimensions induce me to believe it the production of a more civilized people than the present race of Inians. At certain periods Cooke, the actor was as mad as any inmate of Bedlam or St Luke's. cess, for as the grass-bleacher must keep his From this it will also be obvious, that it In one of his quarrels a common soldier delinen wetted or moist, to insure the full ef- is summer fallowing which is the efficient clined fighting with him, because he (C) was fects of the sun's light in whitening his cloth process-not winter following when the sun's rich and the persons present would be affirmso must the fallowing farmer have his light has little power, when evaporation goes ed favour him. THE ST. PATBICK.

EDMOND PHELAN, begs most respectfully to acquaint the Public, that he has purchased a new and commodious Boat, which, at a considerable expence, he has fitted out, to ply between CARBONEAR and PORTUGAL COVE, as a PACKET-BOAT; having two Cabins, (part of the after one adapted for Ladies, with two sleepingberths separated from the rest). The forecabin is conveniently fitted up for Gentlemen, with sleeping-berths, which will he trusts, give every satisfaction. He now begs to solicit the patronage of this respectable community; and he assures them it shall be his utmost endeavour to give them every gratification possible.

The ST. PATRICK will leave CARBONEAR for the Cove, Tuesdays, Thursdays, and Saturdays, at 9 o'Clock in the Morning and the Cove at 12 o'Clock, on Mondays Wednesdays, and Fridays, the Packet Man leaving ST. JOHN'S at 8 o'Clock on those Mornings. TERMS

After Cabin Passengers, 10s. each. 55. Fore ditto ditto, Letters, Single or Double, 1s.

Parcels in proportion to their size or weight.

The owner will not be accountable for any Specie.

N.B.-Letters for St. John's, &c., will be received at his House, in Carbonear, and in St. John's, for Carbonear, &c. at Mr Patrick Kielty's (Newfoundland Tavern) and at Mr John Crute's.

Carbonear, June 4, 1834.

St. John's and Harbor Grace PACKET

THE fine fast-sailing Cutter the EXPRESS, leaves Harbor Grace, precisely at Nine o'clock every Monday, Wednesday, and Friday morning for Portugal Cove, and returns at 12 o'clock the following day .this vessel has been fitted up with the utbe kept for passages or postages, nor will the proprietors be responsible for any Specie or other monies sent by this conveyance.

Ordinary Fares 7s. 6d.; Servants and Children 5s each. Single Letters 6d., double ditto 1s., and Parcels in proportion to their weight.

PERCHARD & BOAG, Agents, ST. JOHN'S. ANDREW DRYSDALE, Agent, HARBOR GRACE. April 30.

received with every attention in the palace of of freedom and toleration. We consider the Nicolini, the grand Duke's ambassador, but was recommended to keep within doors .-And when taken to the most holy office for | magogue has acquired a fearful ascendency the purpose of examination, he was not consigned to a dungeon, but lodged in the apart- trymen; he has bound to him nearly one ments of one of its officers. The secrets of half of the representatives of the people, the examination have never transpired ; who are the creatures of his breath, and the though hists have been thrown out of, at mere tools of his designs; the Ministers of least, the threat of torture having been used. | the Crown whom he has cajoled and laugh-The result, however, was achieved of extracting from the prisoner the admission of by truckling to his will and making all their standing the violent attacks inflicted upon diseases. Fifteen men and two officers were being the author of the Dialogues, and a free and unbiassed declaration of willingness to submit and recant.

After a time he was brought up to receive his sentence, and make his abjuration (June 21. 1633). The tribunal solemnly delivered its condemnation of his works and his opinions; extending to him, nowever, its merciful pardon, upon his abjuring his impious and heretical errors, and submitting himself, generally, to the authority of the church, and, in particular, to the salutary penance of imprisonment and certain penitential exercises.

Thus wholly in the power of the Inquisition; he of course uttered the compulsary abjuration, extorted from him with the same degree of free choice as the purse of the traveller by the pistol of the highwayman. He swore that the motion of the earth is heretical, and that he abjured all heresy .--Moreover, as he rose from his knees he is said to have whispered in the ear of a friend, "E pur si muove."

It has been asked by some writers, in discussing the narretive of this disgraceful and revolting transaction, what result the church) could expect from an extorted oath, and a compulsory abjuration, which might not be felt binding; and from a confession under fear of torture, which could be worth nothing. This, however, is to mistake the nature and object of the tribunal and the offence. The Inquisition was not a court of justice to try heresy as a drime; but rather a sort of spiritual board of health, whose office was to one, to stop the contagion of error, and, if but submission : not truth, but profession : this being once obtained, by whatever means, the sole end was accomplishment. thinking, no doubt, they were administering a complete antidote to the Copernican hesuspicientes."

THE STAR, WEDNESDAY, NOVEMBER 19.

GALILEO.-Galileo, invited to Rome, was who have been the most forward advocates present situation of Ireland most perilous.-A cunning, desperate and indefatigable deover the minds of some of his reckless couned at, are hourly increasing this ascendency measures for Ireland subservient to his ap- it by the German papers. The cause should left in the hospitals at Jamaica; we regret probation and revision; and the question of it be inquired is no other than a wish of to learn, also, that the fleet at Jamaica was would warn them against this dangerous connexion. If they wish to still effectually and keep down with a strong hand as they did before, the man and his faction by whom it is kept up. Not only the tolerant and liberal of one persuasion, but the enlightened and independent of the other acknowledge this. Lord Oxmantown long the unhanging Protestant friend of civil and religious freedom has declared that the country is reduced to such a state that it is "safer to break tates to the rest, and calls himself the peo- fleets to act vigorously."

In this state of things, Mr Bish comes forward with his proposal to hold Parliaments occasionally in Ireland, which certainly would have the many advantages he enumerates. It would by taking away the excuse and temptation of residing in England. create a motive for remaining at home, and remove the bane of the country and that great handle and cause of disaffection, absenteeism,-an evil whose momentous consequences will be appreciated, if Mr Sadler's statement in the House of Commons be true apply a salutary remedy, possibly a painful that ninetcen-twentieths of the landed property in Ireland belong at present to absenpossible, to restore the heretic to the pale of tees. Among the evils of minor consequence est degree. On the 6th October it will stand salvation. The object was not conviction, which it would remedy is "the system of nearest the earth-only three and a half coarse invective and personal abuse which millions of miles distant. has recently sprung up, and which is practised with unsparing vio ence The inquisitors took unusual pains to pub- on all public occasions." The eflish Galileo's recantation all over Europe, fects of this foul and brutal vulgarity which is an innovation lately introduced among an assembly of educated gentlemen was hitherresy. And a frier denounced his opinions to restrained by that responsibility which from the pulpit, with a miserable pun upon every man owed to the wounded feelings of the text, "Viri Galilcei, quid statis in coelum others; but its author repudiates all such responsibility, and is equally callous to the reputation of want of courage as of want of courtesy. If parliaments were to be holden occasionally in Dublin, the justice as well as the coarsness of the charge made against English members could be fairly appreciated "They would be brought together in the same arena, and the people would see and judge between them. It would no longer Parliament, returned home like martyrs to an injured people in whose cause they had fruitlessly struggled against superior power.' This we think would be an important point gained. The present deceptive practice on the credulity of some of onr sister's children is much facilitated by the distance Mr Bish sums up the whole advantages of -stimulate trade and industry-induce inarmy and police establishments-establish which they themselves were parties and that they are rendered unfit to be trusted | ble," yet we do concur with him in think-

Under this abominable system, a feather would torn the whole negro population to revolt, and mine are becoming infected, although I gave them the half of Friday if they chose, or to take their time in any way more agreeable to themselves."-This report from an authentic source, is a proof that some of the negroes labour under false impressions, and are not satisfied with the best treatment or most liberal interpretation of the law. The Executive should take prompt measures to quell at once this dawning spirit of ingratitude and insubordination, or the force of bad example may prevail, and spread anarchy and desolation throughout the Island! Assistant Magistrates ought speedily to be appointed, and the laws enforced at the point of the In the beginning of the year 1836 it will bayonet; for if peace and good order be not emerge from the sunbeams, and again be- maintained at the present moment, the Bricome visible, at the distance of forty milli- tish Government will be held responsible for the ruin of the best and richest colony It will for the second time approach the | in the British West Indies, and the philanearth and on the 1st of March 1836 will thropists will have to bewail the miseries instand twenty five millions of miles distant. | stead of vaunting the blessings they have Thence it will recede from the earth and entailed on their fellow subjects! In short, seem to wander seventy-six years; and in | if kindness prove ineffectual, coercion must be promptly exerted, to quicken industry, and repress at once a spirit which will arrest. all possibility of improvement, and darken for ever the prospects of this fine and fertile Island ! The Lieutenant Everard alluded to in the foregoing, was of the Royal Navy, and one of the Stipendiary Magistrates. He, it is stated fell a sacrifice to over-exertion in the discharge of his arduous and excessive duties : and became so disheartened and disjusted with the office-net being properly supported in his authority, and meeting with much contumely from the refractory negroes. -that he resigned his commission the day previous to his death, and at the same time avowed that no gentleman, much less an officer of the British Navy, could submit to the unparalleled insolence of these people.-Lieutenant Everard was evidently beloved by the Magistrates and the other gentlemen of the district in which he officiated, for every mark of respect was shewn to the remains of this "gallant and much lamented officer.' The Marquis of Sligo has issued a Proclamation calling the House of Assembly to meet and proceed to business on the 7th October. A Mr. Brackenridge, book-keeper on an estate near Kingston, has been taken up for the murder of a negro boy, whom he shot, and at the same time, and with the same discharge, wounded two women.-Little doubt appears to be entertained, but that he will suffer death for this act. Those who have perused the Jamaica Papers for the early part of the month of August, will no doubt be pleased to learn that much of the scandalous proceeding attributed to the noble Earl, late Governor of that Island, is without foundation; and that no cause has occurred to interrupt the continuance of that confidence which renders the matrimonial state a blessing and a happiness.

A plea for Ireland : the Outline of a Proposition for holding the Court and Parliament at occasional Intervals in Dublin. By Thomas Bish, Esq., M.P.

A great portion of the population of Ireland, and by far the most influential and respectable portion, had entertained an opini- be said that the English legislators passed on that the Legislative Union with England | laws in ignorance, or that the Irish represenwould be the greatest calamity that could | tatives after being defeated in the British afflict their country; they have, now however lived long enoguhto know that there is a still that is, the repeal of it. This change of opinion does not arise from any very important benefits conferred by the measure. An obliteration of dissension-an amalgamation of parties-an increasing sense of security-an | and the representatives they send return amelioration of the condition of the lower, home with all the advantages of practising and an augmentation of the wealth of the on their ignorance, having all their falseupper classes,-these and similar promised | hoods believed, and the very vulgarity of improvements have not taken place, at least | their invectives applauded, as proofs of a to the extent which the advocates of the mea- just and necessary indignation. sure had anticipated, and the change of opinion in their opponents is not founded on the measure in eight propositions-viz., rethe conviction of the benefits it has confer- | call the absentees-banish the middle men red; but they now see that for themselves, and for the established order of things in vestment of English capital-retrench the Ireland, there is but one mean of security; and that is the present legislative connexion | among the Irish the calumniated character with England. ons of miles from us.

the year 1912 will again visit our regions.

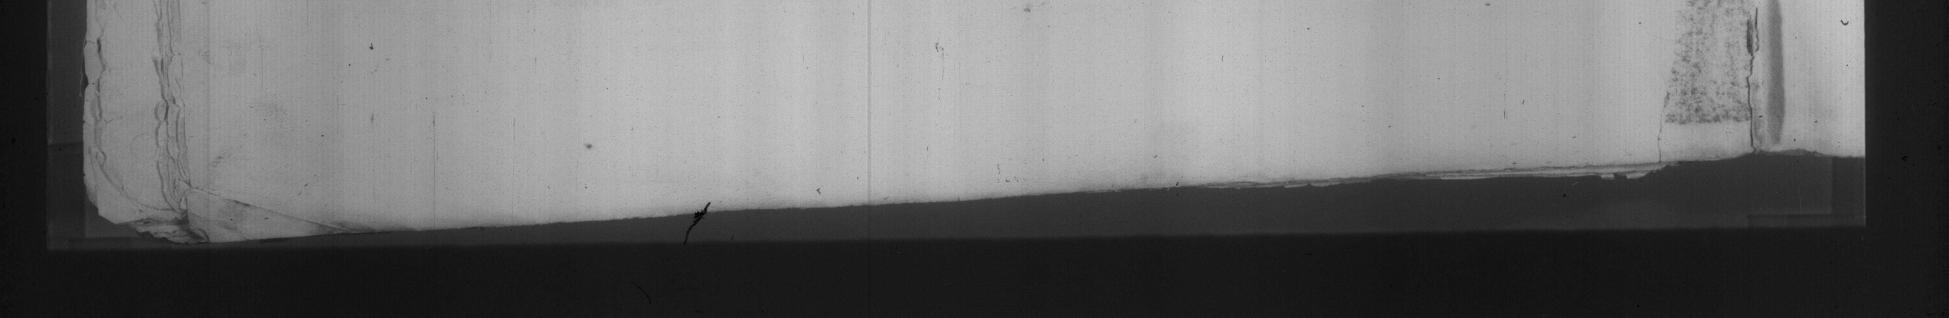

A Church in Wall Street, New-York knowu as the first Presbyterian Church, was accidentally destroyed by fire on the evening of the 13th Sept. it was valued at 47,-000, dollars, and insured for 20,000.

INTELLIGENCE FROM CAPTAIN BACK -- The Montreal Gazette states that Mr Duncan Finlavson partner of the Hudson Bay company arrived at Lachine on the 6th Sept in a bark canoe, navigated by ten voyagers of that concern. He left Port Vancouver on Columbia River North West coast of America on the 20th of March last passed over land to York factory, the company's principal depot in Hudson Bay which depot he departed from on the 25th July. Two other canoes manned by sixteen additional voyagers' are daily expected at Lachine and the remaining voyagers and passengers from the interior this season will be down in the course of next month, (October) Apart from the company's usual despatches and letters from their servants in the interior together with those from red river colony, Mr. Finlayson has brought a packet from Captain Back addressed to the Colonial Office, London. We are happy to state that letters have been received from that gentleman dated Fort Reliance, east end of Great Slave Lake, up to the 4th May last, when he was preparing to be off to prosecute the ulterior objects of the expedition. The packet from London intimating Captain Ross and his party's safe return, which was forwarded from Montreal last November, reached Captain Back on the 25th April.

EXTRAORDINARY PHENOMENA.—Yesterday evening Mr. John Parker, Mr. John Rogers, Mr. Archibald Scott, and several other persons, being at the Three Mile House, observed something in the air, which they at first took to be mist or fog; but as the evening was very clear, they were induced to take the more notice of it, and by holding the hands above the eyes, so as to exclude the rays of the Sun, they could distinctly see bodies of insects, apparently of a red or crimson colour. They were in sheets with long trains after them, resembling that of a comet: each sheet of these insects appeared by itself, and they were moving in a directi-

The little village of Guelph, in Upper Canada, to which we before alluded, as having been nearly depopulated, has lost three fifths of its inhabitants, and application was made to the Governor to have it destroyed by fire —Quebec Paper.

We are much pleased to perceive that it on from West to East, about 25 or 30 feet has at length been determined, to do away from the earth, and at least 20 yards in width, with the 10 gun brigs used as Packets .following each other in flocks like pigeons; | Tenders for building under a roof in the rithey observed the passage of those insects ver Thames, six vessels of 358 tons each, to for more than twenty minutes, the Sun at be ready in three months, to re place as the time being more than one hour high .- | many of the gnu-brigs in that service, were to be received on the 14th August.

the 15th began to subside. On the 27th, 28th, anh 29th new graters opened, and produced ravages awful to contemplate. Thousands of families were seen flying from their native land, old and young dragging through heavy masses of heated cinders. The writer of this account passed twenty-two hours in the midst of piercing shrieks. Fifteen hundred houses palaces and other buildings and 2,500 acres of cultivated land have been destroyed by the fire. The eruption which had been previously expected from the drying up of the fountains, surpassed everything which history had transmitted to us. The first explosion destroyed the great cone situated on the top of the mountain. The abundance of inflamed matter produced flashes which darted through the mountains flanks. A new crater burst open at the top of the great cone, and inundated the plain with torrents of lava.) The King and the Ministers hastened to the seat of the catastrophe, to console ; the unfortunate victims. The village of St Felix where they first took repose. Lad already Leen abandoned. . The lave soon poi red down up on this place, and in the course of an hour, houses churches and palaces were all destroyed. Four villages, some detached houses, country villas, vines, beautiful groves and gardens, which a few instants Metere presented a magnificent spectacle, now resembled a sea of fire. On the 3d Sept, at the time of forwarding this account, nothing but stones and cinders were ejacted, and every prospect, existed of the eruption being soon at a close. The palace of the Prince of Attavauno and 500 agres of his land are utterly destroyed. The cinders fell during an entire night over Naples and if the lava had taken that direction there would have been an end to that city. Just before the explosion of lava took place which consumed the palace of Prince Attayeuno, an English lady was taking a sketch of the incipient eruption. Had she remained an hour longer, she would have been en-

THE STAR, WEDNESDAY, NOVEMBER 19.

MOUNT VESUVIUS .- In August last an of whom may have been very good men, in | eruption took place, which on the evening of the private relations of life in their own ber, per CATHERINE, to St John's state that Country, but they did not in general after | the House of Lords and House of Commons coming amongst us, indicate any love for the country or any sympathy for its inhabitants.

> They thought, that the necessity that called for their coming from their own country to fill public offices in this, naturally indicated a want of talent and respectability in the people of the country, that incapacitated them from filling such offices, and indeed indicated that they were beings quite of an inferior order to those, who coming from a country of intelligence and wealth, should be looked upon by the simple natives as personifications of those very desirable acquisitions.

But a very little experience dissipated the illusion. The common sense of the simple natives soon proved to them, that these wonderful strangers were in all things like many men to be found amongst themselves. except that the strangers enjoyed the luxury and ease of wealth, without much labour which was the constant and common lot of the poor natives; they thereby saw and felt the injustice, of the distinction, and knew not why they deserved the degradation conferred upon them by that distinction.

If the patronage of the Newfoundland School Society had been exercised, as it may have been, in this country, the interests of that Society would not have suffered by it; indeed we think that they would have been benefited.

But with all the high and noble supporters of that institution, there was not so much information on the local state of the people here as could be found with many clever and respectable men who were residgulfed. The little village San Giovanni, ing here, and who would have been more consisting of about eighty houses, has ceas- efficient teachers of the Soci etys' schools ed to exist. In Caposecco and Torcino, 100 than many of those who were sent here .-houses were destroyed by the consuming la Some of the men sent out by the Society to enlighten the natives, were men with a simple education, but more simple in their knowledge of the world: They thought that they were coming to a land, of savages The Vice Roy of Goa proclaimed Donna and would have to reside in a but on the borders of some interminable forest, they were furnished with wifes, because such a thing as a wife for educated civilized man dies, in behalf of Don Miguel, and declared amongst the natives would destroy all caste. One of them was actually furnished with axes by the Society for the purpose of clearguished of the other individuals accused of ing the forest around his future dwelling; participation in the late conspiracy have all of them we believe were furnished with been allowed to visit their friends and it is | medicines for the purpose of administering to the body as well as to the minds of their new subjects. One of them to our own knowledge expressed surprise that the people here wore shoes and stockings like the people in England, and thought after he landed, that he had been brought to the wrong country. His It is now said to be certain that the present | medicine chest gave him a taste for the sci-Ministers insulted Earl Grev by the offer of ence of medicine, he abandoned the certain salary of the Society for the uncertainty of public opinion; set up for a Doctor of Medicine, involved himself in extensive pecuniary difficulties, and had to leave this courtry for another of the Colonies a short time since, with a very large family, and in very depressed circumstances. He is a very amiable, but a very simple minded man, he was not fit to contend with the crooked con. DREADFUL SHIPWRECK .- Extract of a let- tortions of society, and had to contend with ter from Picton, dated 11th Sept. "We the influence of the scriptural assertion that Margaret, Mortimer, Liverpool, tea, coal, have just received accounts of the loss of . a Prophet hath no honour in his own country." The people knew that he came from the land of patro se as a Schoolmaster, and could not conceive how he could become a *Physician* without going back to nothing be done to erect a Light House on the land of wonder for a Diploma. But he was fitter for a Physician than he was for a Schoolmaster, and we are happy to find that he has been very successful in the former profession since he left this country. If the patronage of this country is vested in his Excellency, Governor Prescott, he will have a direct control over all the government departments; he will see that the duties of the different government offices are executed in the best possible manner, for the vested with authority to exercise all the least possible remuneration. He will find Government patronage extending to this that there is no necessity in this country for Colony. If such a report be true, the peo- filling government offices with inefficient ple of this country have to be grateful to men with excessive remunerations. He will His Majesty, and His Majesty's advisers for | find men of probity and talent on the soil another boon, the conferring of which would who will not expect to be remunerated for more than their actual services to the state. By their appointment he will save the large additional sums of public money that have foundland was abandoned on the 20th ult. Up to the present time the patronage of been given to strangers as an equivalent for in lat. 44.30, long. 37., being leaky and distheir voluntary exile to this wild Island, and masted; crew and passengers arrived in in the sending of men from England for their condescending kindness in favoring Cork .- Liv. Chronicle, Oct. 11 .-- ['The EA-

Accounts from England to the 25th Octohad been accidentally destroyed by fire.

Mr. TUCKER, the immediate predecessor of the Hon. H. BOULTON, in the Chief Justiceship of NEWFOUNDLAND, has arrived in this country with his family, and has taken up his residence in KINGSTON. It is stated as being probable, that he will commence practising as Barrister in UPPER CANADA Court. -Canada Paper.

DIED.-At London on the 8th October last, at her father's residence, after a few days illness, Marcella, third daughter of Arthur Holdsworth Brooking, Esq, late Collector of His Majesty's Customs in this Island.

At St. John's, on the 7th inst., Mrs. Sarah Harris, relict of the late Mr. John Harris, and daughter of Nicholas Gill, Esq., formerly Chief Magistrate of this Island, in the 76th year of her age.

At Harbour Grace, on Friday last, Mrs. Newell, aged 55 years.

POETBY.

A WOMAN'S HEART.

My sweetest joys have faued, My brightest hopes have fled; And friends that might have aided, Are mouldering with the dead ; And now the treasure only That could a bliss impart To me so forn and lonely, Would be-a woman's heart.

O! I have dreamt of glory, That never might decay-That I might live in story, When silent in the clay, But all these charms are gone away, That fancy could impart, And I but wish to own now-A lovely woman's heart.

And I have dreamt of treasure, That might recall my joy-Might bring the parted pleasure That blessed me while a boy; But now the pomp and splendour That riches can impart, I would to fate surrender, To claim-a woman's heart.

O ! in some lonely dwelling, Within a mountain glen, Where on the breeze is swelling No treach'rous voice of men; Where dews and sunshine nourish The wild flowers far apart, How sweet it were to cherish--A lovely woman's heart.

"WHAT IS PRAYER?"

Prayer is the soul's sincere desire, Unutter'd or unexpress'd---The motion of a hidden fire, That trembles in the breast.

Prayer is the burden of a sigh, The falling of a tear---The upward glancing of an eye, When none but God is near,

Prayer is the simplest form of speech That any lipscan try ; Prayer the sublimest strains that reach to their own parish Exquisite-A dandy taken at his own va- thus:-

luation. Eye-glass-A toy which enables a coxcomb not to see.

Esquire-A title much in use among the lower orders.

Faction-Any party out of power.

Fan-A plaything from whose motion a flirt derives her name and which serves to hide her face when she ought to blush and cannot.

Fee Doctor's-An attempt to purchase health from one who cannot serve his own. See Fee simple,

Felicity--The horizon of the heart which is always receding as we advance towards

Finance-Legerdemain performed by figures.

Finger-An appendage worn in a ring and of great use in taking snuff.

Flattery-Throwing dust in people's eyes generally for the purpose of picking their pockets.

Fool-What a fop sees in a looking-glass. Forty-The Ne plus ultra of a lady's

Fox hunting-Tossing up for lives with a fox.

Frown-Writing the confession of a bad passion with an eyebrow

Funding system-Saddling posterity that when the present age is a beggar it may get on horseback and ride to the devil.

Gallipot-An Apothecary's bank. Gallows-The remedy which society has provided for roguery; a cure without being

a prevention. Gaming-See beggar and suicide. Gastronomy-The religion of those who

make a god of their bellies. Goosequill-A little tube which in the

hands of modern dramatists seem to have the power of reproducing its parental hises.

Grandmother's Review-See the British.

Grape-Nature's bottle, which the per-

ed to compose the charter-song. It began

When St Patrick our order created, And called us the Monks of the Screw, Good rules he reveal'd to our Abbot, To guide us in what we should do,

But first he replenish'd his fountain With liquor the best in the sky, And he swore by the sword of his Saintship, The fountain should never go dry.

My children be chaste till you're tempted ;--While sober be wise and discreet :---And humble your bodies with fasting, Whenever you have nothing to eat.

Then be not a glass in the convent, Except on a festival found,

And this rule to enforce I ordain it A festival---all the year round,

St Patrick the tutelar idokof the country was their patron saint: and a statue of him mitred and crosiered after having for years consecrated their Monkish revels was transferred to Curran's convivial sideboard at the Priory. Of the hours passed in this society, Curran ever afterwards spoke with enthusiasm. "Those hours" said he addressing Lord Avonmore on one occasion, as a Judge and wringing tears from his aged eyes at the recollection, "which we can remember with no other regret than that they can keys. return no more :---

"We spent them not in toys, or lust, or wine, Butsearch of deep philosophy, Wit, eloquence and poesy ; Arts which I lov'd, and they my friend were thine.'

ANECDOTES OF SAILOR MONKEYS .- It is, related of a monkey on board a frigate that it was distinguished like the rest of his tribe love. Their attachment had lasted several by a propensity to gratuitous mischief, and years; pecuniary causes had delayed their one of his principal amusements in fine wea- union, but the following day they were to ther was to possess himself of a plate cup or be married. For a long time the lover prosaucer, which he would break to pieces in tecting his mistress keeping her behind bim the chains, and throw overboard, watching | covering her with his own person, sustaining the fragments descending through the water | ed her strength and courage. But the tuwith infinite gratification. "This," (the mult, the cries, the terror, and peril, ever-*Grape*—Nature's bottle, which the per-verse ingenuity of man not unfrequently might do;" but another of his exploits can said, "my strength fails—I can go no farhardly I think be paralleled by any fact in ther." "There is yet a way," cried the monkeyish history. ing a large store of apples in a locker in the hope of saving her whom he loves redoubles ward-room; but his theivish tricks were so his ardour and strength. He resists the well known that he was excluded from all most violent concussions; he with difficullegitimate access to it. Under these circum- ty forces his way through the crowd; at stances he provided himself with a piece of length he clears it. Arrived at one of the wadding, and with this implement in one extremities of the place having set down his hand and swinging himself from the stern precious burden, faltering, exhausted, fatigugallery with the other he broke a pane in the ed to death, but intoxicated with joy, he ward-room window with his wadding and turns round; it was a different person! having carefully picked out the broken glass | Another more active had taken advantage of introduced himself into the forbidden terri- his recommendation; his beloved was no torv. Here like the animal in the fable, he more ! gorged himself so fully that he was unable to retreat. Being taken in the fact he received the discipline of the rope's end, but derived little benefit from his chastisement. It was at this period that a trifling mistake in wording an order inundated all England with monkeys. E-W-, distinguished by his passion for a conservatory meant to write to his correspondent in the Brazils, to collect and send him the two hundred varieties of the monkey-plant: but unfortunately omitted the word plant.¹ In consequence of this order, arrived a letter from his correspondent, informing him that he had sent him one hundred and seventy-three varieties of the monkey, which were all that were known in Rio de Janeiro and its neighbourhood; but he had no doubt that the order could be completed by his agents in the interior. Before the unhappy botanist could provide for the disposal of this wilderness of monkeys came another detter out of which dropped an ominous paper, " half printed and half written," when it is a bill of lading in the usual form—" - Stati by the grace of God sound and in good condition on board the good ship Friendly Endeavour, one hundred and seventy three monkeys &c. &c. &c., and so God send the good ship Friendly Endeavour with her cargo to a safe port." E-W-, having a little recovered from his consternation proceeded to read the letter from which this fearful annunciation had dropped. This was from the captain of the good ship Friendly Endeavour, informing him "that he was arrived in the river with one hundred and sixty nine out of all belonging to one individuel, M. le Baone hundred and seventy-three monkeys consigned to him four having died upon the passage; and begging him to have them landed as soon as possible, for they began to be very mischeevous."

Etymology-Sending vagrant words back | stalled grand prior of the order, and deput- | soon grew indifferent; and indifference was soon succeeded by disgust. This was manifested by angry looks, chatter, and even blows upon the female persevering in her attentions.

> All were much disappointed and scandalized at the evil success of so promising a union.

At length however an apparent change took place in the husband's conduct, and was hailed by correspondent joy by the ship's company. Their pleasure however was of short duration, for the traitor having one fine day decoyed his wife out to the end of the fore top gallant yard, as if to show her something at sea, slipped his paw under her sitting part and tumbled her overboard.

An odd defence against fire-arms was used by a monkey belonging to captain M----, of the navy. Captain M-had two monkeys an old and a young one, the first of which was often very troublesome, and the captain could only drive him out of his cabin by blazing-at him with a pistol loaded with powder and currant jelly; a discharge which produced a painful effect. The old monkey was at first astounded at the sight of the weapon which stung him so sore, but he at last learned a mode of defence, and snatching up the little monkey who was a favourite used to interpose . him as a shield between the pistol and his body -Anecdotes of Mon

DISAPPOINTED LOVE.-The fatal accident and loss of lives which occurred in the Place Lobis Quinse, at the marriage of the Dauphin are well known. On that occasion, amidst the distracted multitude pressed on every side trampled under the horses' feet, precipitated into the ditches of the Rue Royale and the square was a young man, with a beautiful girl with whom he was in lover, "get on my shoulders." He feels This monkey was well aware of there be- that his advice has been followed, and the HOME.-At home it is, and only a homethat we show the natural man, the real temper of the beast; perverse or sociable, overbearing, stern, or affectionate ; cross or cruel'; gentle or severe; our infirmities whatever they are; the kinder pulsations of the heart, the wickeder emotions of the mind. If there be any bad blood in a fellow, he will show it-whenever he dares, whenever he can; but where can he show it more safely than at home, where his wife and children cannot help themselves; and his people are paid so much a week to bear it. See him at home therefore, whoever he may be: whatever he may be; good or bad; great or little; if you would know his true value.-Is it a pyramid ? go near to it, if you would know its real strength ;- it may have been built of pebbles. Is it a ruin ; go near to it-nearer-it may have been richly sculptured ; it may be a treasury of ornament .--A man may be a hypocrite all his life time before the public; but no man ever was before his own family. A MAN OF LARGE PROPERTY.-A Learned Frenchman travelling through England in the stage-coach with a view of publishing his travels was very inquisitive, and asked the names of meadow, arable land, trees, houses, cottages, &c, all which he carefully noted down instanter : on crossing Salisbury Plain he asked what it was-Barren heath was the reply. He repeated his question at various distances, and always received the same answer. On arranging his notes for the press he took occasion to exclaim against. the evils of large farms and cited, in support of his assertion, a district of several miles. ran Heath, which was absolutely lying waste for want of cultivation which would not be the case if M. le Baron would divide it into small alotments; but this his aristocracy, and the law of primogeniture would not permit.

THE STAR, WEDNESDAY, NOVEMBER 19.

The Majesty on high.

Prayer is the Christian's vital breath, The Christian's native air, His watchward at the gates of death, He enters heaven with prayer.

Prayer is the contrite sinner's voice, Returning from his ways, While Angels in their songs rejoice,

And say behold he prays. The saints in prayer appear as one, In word and deed and mind, When with the Father and the Son Their fellowship they find.

Nor prayer is made on earth alone The Holy Spirit pleads, And hears on the eternal throne, For sinners intercedes.

Oh Thou by whom we come to God, The life, the truth the way, The path of prayer Thyself hast trod, - Lord teach us how to pray.

SPECIMENS OF A PATENT POCKET DICTIONARY.

Dandy-A fool who is vain of being the lay-finger of some fashionable tailor and thinks the wealth of his wardrobe will conceal the poverty of his ideas; though like his long-eared brother in the lion's skin, he is betrayed as soon as he cpen: mouth.

Dangler-An androgynaus insect that flutters about ladies' toilettes, and buzzes impertinently in their years.

Debates-An useless wagging of tongues where the noses have been already counted. , Delay-See Chancery court.

Disguise-That which we all of us wear on our hearts and many of us on our faces.

Doctor-According to Voltaire one whose business it is to pour drugs of which he knows little, into a body of which he knows less.

Ditch-A place iu which those who have taken too much wine are apt to' take a little water.

Doze-A short nap enjoyed by many people after dinner on a week-day and after

the text on sunday. Drama modern—Every thing except comedy and tragedy; such as melodrama hippodrama, &c.

Dress-External gentility frequently used to disguise internal vulgarity.

Ecentricity of appearance-The pleasure of being personally known to those who do not know you by name ..

Edition third or fourth-See Title pages of the first.

Education dangers of-See Humbug. Egotism-Suffering the private I to be too much in the public eye.

Elopement-Beginning in disobedience that which commonly ends in misery.

Ephemeral-The whole of modern litera-

ture.

AYOUTHFUL ATHEIST .- On Thursday Alfred Pegg was charged with obtaining shoes on false pretences from the shop of Mr Tanner. The principal witness was a boy named John Arthur aged seventeen. On being called up he refused to be sworn.

Mr Minshull-Why do you object to being sworn.

Arthur-Because I do not think there is any obligation in an oath.

Mr Minshull-I am shocked to hear you say so. And how is it that you do not think an oath binding? Consider boy before you answer.

Arthur-Because I don't believe in any religion.

Mr Minshull-You can read and write I suppose? Arthur-Yes I can as well as most peo-

ple. Mr Minshull-Do you ever read the scrip-

tures? Arthur-Not lately; but whether I do or

not it does not much signify, for I don't believe in anything they contain.

Mr Minshull--Is it possible then that you do not believe in the existence of a God? Arthur- I don't indeed I don't believe

in any religion. Mr Minshull-Have you read any books of another sort; I mean that are written

against the Scriptures? Arthur-O yes plenty.

Mr Minshull—Is it from reading them that you disbelieve the Scriptures?

Arthur—I suppose it is. The long and short of the matter is that I won't take an oath. If my word is not to be taken, my oath can't be worth a farthing.

Mr Minshull-You are a poor wretched boy, and are laboring under a delusion, which I hope will soon be dispelled. I shall remand the prisoner until Saturday. Meanwhile I entreat you to reflect on the subject. This however I will tell you, that if on Saturday you refuse to be sworn, I shall commit you till the sessions to give evidence and if you there refuse to be sworn we shall see what the Court will do with you.

The prisoner was removed and the boy Arthur walked sullenly out of the office.

THE MONKS OF THE SCREW.-When Lord Avonmore was a young man better known on the turf than at the bar he founded a club near Newmarket called the Monks of he Screw; the rules of which he drew up n a very quaint and comic Latin Monkish verse. It was on this model that a still more celebrated club of the same name was afterwards established under his lordship's auspices in Dublin. It met 'on every Sunday during the law terms, in a large house in Kevin's street the property of the late Lord Tracton, and now converted into a Seneschal's court. The reader may have some idea of the delightful intercourse this | rite. society must have afforded, when he learns that Flood, Grattan, Curran, Lord Charle- ded pair appeared to be complete; and the py his thoughts and restrain him within the

They were landed as soon as possible, were disposed of with equal speed, and in consequence an unprecedented fall took place in the money market. Exports were now made to the remotest parts of England, and among these was a female despatched to Portsmouth who was bought a bargain by the possessor of the maritime monkey and given by him in marriage to his favou-

CHINESE CUSTOM .- At the coronation of the Emperors of China it was customary topresent them with several sorts of marbles. of different colours, by the hands of a mason, who was then to address the new Emperor as follows :--

" Choose mighty sir under which of those stones, Your pleasure is that we should lay your bones." They brought him patterns for his grave-
