To *His Excellency the Right Honorable Sir JOHN DOUGLAS SUTHERLAND CAMPBELL*  
*Marquis of LORNE, K.T., G.C.M.G., P.C., Governor General of Canada, &c., &c., &c.*

MAY IT PLEASE YOUR EXCELLENCY :

The undersigned has the honor to present to Your Excellency the Tables of TRADE and NAVIGATION of the Dominion of Canada, for the Fiscal Year ending 30th June, 1880, as prepared from Official Returns, and laid before him by the Commissioner of Customs.

All of which is respectfully submitted.

MACKENZIE BOWELL,

*Minister of Customs.*

OTTAWA, 17th January, 1881.

CUSTOMS DEPARTMENT,  
OTTAWA, 31st December, 1880.

To the Honorable MACKENZIE BOWELL,  
Minister of Customs.

SIR,—I have the honor to lay before you the Annual Report and Returns of the Trade and Navigation of Canada for the fiscal year ended 30th June, last.

You will observe that an entire change has been made in the form of compilation of the principal statements herein. The plan of printing separate tables for each Province has been abandoned, as it was found inconvenient and cumbersome, and instead thereof the imports and exports for each Province and for the Dominion are shewn in detail in one general statement for each. Thus, selecting any given item in the classification, the person needing the information will find the name of the article, the country whence imported, or to which exported, and in the imports, the quantity, value and duty, or the value and duty, applicable thereto; and in sub-divisions the proportion imported from each country into each Province of the Dominion, with the total from all countries into each Province. The same information respecting exports will be found in General Statement No. 4, commencing on page 508.

Following General Statement No. 1 of Imports, commencing on page 461, will be found several abstracts giving condensed information, first, as to the total value of goods, dutiable and free, entered for Home Consumption in each Province from each country, with a summary of the same from all countries into each Province. In the second abstract, commencing on page 466, the same information is contained, but in another form; the countries being grouped so as to show at one view the value, &c., of goods from each country entered for consumption in each Province, with the total value, &c., from all countries.

On page 470, an abstract is given of the value of goods entered for consumption, from each country, in the Dominion, without reference to the separate Provinces, showing the total revenue from Customs Import duties for the year to be \$14,129,953.39.

Summary Statement No. 2, commencing on page 471, is the usual table in which the articles comprised in the total imports and those entered for consumption, are given in detail without reference to the countries whence imported or the respective Provinces, with the addition of the rates of duty chargeable on each article named; and while the table is convenient for reference in many cases, it is questionable whether it might not now be dispensed with, as the same information is given in nearly as simple a form in the General Statement No. 1, and its omission would save considerable labor and expense in compiling and printing.

With the foregoing exceptions the Returns now submitted will be found substantially the same as in former years, and the great object kept in view in their compilation has been to combine the greatest possible simplicity with efficiency, and I trust it will be admitted that the object has been attained in good measure.

I have had under consideration for some time past the desirableness of effecting a change in the statistics respecting shipping, especially in the tables shewing the number and tonnage of vessels entered inwards and cleared outwards, but the subject is surrounded with difficulties. It must be confessed that the tables, especially those relating to the inland lakes and rivers, are calculated to give an exaggerated idea of the extent of the shipping interests, owing to the necessity of recording each voyage in each port into which a vessel enters. Thus a steamer may clear from a foreign port with cargo for several Canadian ports, and at each of the latter the vessel is entered and her tonnage recorded, as if each was the sole port at which she called. I am endeavoring to devise a system by which it may be possible to distinguish between the first and all subsequent reports of vessels on each voyage, without impairing the credit which each port should receive for all the shipping visiting and transacting business therein, and although the matter is difficult of attainment without greatly augmenting the labor required, I hope to succeed before very long.

I reproduce a number of Supplementary Tables explanatory of the progress and nature of Canadian trade, adding the figures for the last fiscal year.

Table No. 1, shows that the value of the exports from the Dominion exceeded in value those of any other year since 1874, and that value was only exceeded in two years, viz., 1873 and 1874, since the date of Confederation. It also shows a result never shown before in the Dominion statistics, viz.: an excess of exports over imports, the amount of such excess being, over total imports, \$1,421,711, and over value of goods entered for consumption, \$16,129,109. The amount of Import and Export Customs duties collected, \$14,138,849.22, was exceeded in 1874 by \$283,033.45, and in 1875 by \$1,222,532.90, but in no other year since 1867.

Table No. 3, aggregate trade of the Dominion, exhibits an increase in the trade with Great Britain, over that of 1879, of \$13,018,438, and a decrease in that with the United States of \$8,207,863. The trade with the British and foreign West Indies and South America during the last year amounted to \$7,562,678, and in 1879 to \$5,498,929, showing an increase in favor of last year of \$2,063,749. The trade with China and Japan shows an increase in the last year over 1879 of \$425,944, and a still larger amount over the two preceding years.

Table No. 7, showing the relative bearing of the Tariff upon the commerce of the Dominion, being based upon the value of *total imports*, is open to objection as giving a somewhat incorrect view of the matter, and to remedy this I have had prepared and now submit Table No. 8, in which the percentage of Customs duties is based upon the

---

value of goods *entered for consumption*. The two tables give a fair and perfect view of the matter.

Referring to Table No. 9, "Rates of Customs Duties per Head of Population," it is likewise defective inasmuch as it is based mainly upon the population, as per the Census of 1871, while, to be correct, it should have included the increase of each succeeding year. As this could only be an approximate estimate, however, it was considered better to continue the same plan during the decade. The exceptions to the above rule are in the case of Manitoba in which the population is calculated upon the estimated number of 30,000, and in British Columbia of 50,000. There has also been added to the Dominion population the estimated number of 33,500 for the North-West Territories. As the result of the Census of 1881 will be known before the issue of the next Annual Report, it will be in order to commence a new table on the basis of the population as then ascertained.

In the Comparative Statement, No. 11, of imports and exports, there is included in the total imports the sum of \$1,881,807 for "Coin and Bullion," and in the total exports, the sum of \$1,771,755, showing \$110,052 more Coin and Bullion imported than exported. The important consideration in this matter is that it shows that the balance between imports and exports would not be materially affected if the Coin and Bullion had not been taken into account.
