by druggists generally.

**FORTIFY THE BLOOD.**

With corrupt, disordered or vitiated Blood, you must die  
all over. It may burst in pleuris or lungs, or come into active  
disease, or it may merely keep you listless, depressed and  
feeble, and render you incapable of doing your duty. The  
is important. Ayer's Remedy purges out these impurities and  
stimulates the organs of life into vigorous action, restoring  
the health and expelling disease.

Hence it rapidly cures a variety of diseases, and especially  
those of the chest when symptoms of acute fever and convulsions  
are present, and when the heart is weak.

The Ointment protects through the skin into the glands, spleen  
and liver, and thus cures the disease.

Holloway's Ointment is the safety  
value of both diseases. Holloway's Pill is also given to  
the patient to reduce the irritation of the throat, and to  
relieve the fever, to reduce the irritation of the throat, and to  
relieve the cough, which are most distressing to all suffering from  
these complaints.

**TO DYSPEPSIA.**

All who suffer the tortures which this disease inflicts in one  
form or another of its many phases, can be permanently and  
speedily cured by

**THE OXYGENATED BITTERS.**

The "Weekly Novelist" of Sept. 10, says:

"Dyspepsia is one of the prevalent diseases of our country. This is owing both to climate and the most unnatural habits of life. Under such circumstances, dyspepsia is a common disease, and especially so in persons of middle age. But in spite of these adverse circumstances, this disease, even when it has become chronic, disappears rapidly by the use of the Oxygenated Bitters, which have been found to prove infallible in every remedy."

From Mr. JOHN D. NASH,

Well known throughout the British Provinces as an extensive  
Antiseptic.

BALFORD, N. S., June 16, 1860.

Mr. SETH W. FOWLE & CO., Boston, Mass.:—  
Gentlemen.—I enclose a very high estimate of the value of  
the Oxygenated Bitters, and the cost of the delivery of  
the digested organ, I take pleasure in giving you a statement  
of their cost in my own case. Several years since I was  
severely afflicted with a most aggravated case of Dyspepsia,  
and I had no relief until I took the Oxygenated Bitters. I  
then recovered with such rapidity, that I now consider  
them a safe remedy for all cases of dyspepsia.

I have now a full bottle of the Oxygenated Bitters, and I can say with the utmost confidence that this  
remedy easily eradicated every symptom of which I was  
suffering, by the continued use of eight bottles, although the first  
bottle provided a sufficient quantity for the bather. I consider  
that the use of intestinal valves, when necessary, has not  
become damaged by the use of intestinal liquors or by high  
living. I now wear them by me, and find their use to be a  
great promoter of good health.

Yours respectfully,

John D. Nash,  
Proposed by SETH W. FOWLE & CO., Boston, and for  
sale by W. R. WATSON, General Agent:
