"I am very sorry, Fred. I had got to like the girl very much, and she has been very faithful to her duties and a good saleswoman and all that, but I cannot permit this pilfering to go on. I think the best way to save her feelings will be just to tell her at the end of the week that we don't require her services any longer, and in that way get rid of her without any direct accusation. You know we took her solely on her own recommendation, without asking for any references—in fact, I'll do her the justice to admit that she frankly told us she could not furnish any, being a stranger in the place.

And that she not only had considerable to say about it, but said it, was evinced by the modest but delightful little wedding that took place not long after, at which it red and Margery were the principal and Margery were the principal parties interested, and if their faces were any indication the very happies the first day anywhere.—London Tit-Bits. NERVOUS DISEASES. As a cure for every class of Nervous Diseases, no remedy has been able to compare with the Nervine Tonic, which is very pleasant and harmless in all its effects upon the youngest child or the oldest and most delicate individual. Nine-tenths of all the ailments to which the human family is heir are dependent on nervous exhaustion and impaired digestion. When there is an insufficient supply of nerve food in the blood, a general state of debility of the brain, spinal marrow, and nerves is the result. Starved nerves, like starved muscles, become strong when the right kind of food is supplied; and a thousand weaknesses and ailments disappear as the nerves recover. As the nervous system must supply all the power by which the vital forces of the body are carried on, it is the first to suffer for want of perfect nutrition. Ordinary food does not contain a sufficient quantity of the kind of nutriment necessary to repair the wear our present mode of living and labor imposes upon the nerves. For this reason it becomes necessary that a nerve food be supplied. This South American Nervine has been found by analysis to contain the

essential elements out of which nerve tissue is formed. This accounts for its universal adaptability to the cure of all forms of nervous de-Tangement.
