IF YOU PATRONIZE The Everyday Bargain Store YOU LEARN TO SAVE MONEY

Value for Both Sides of YOUR DOLLAR!

The art of spending money is greater than the art of making it. Yet far more has been taught, written and lectured on the subject of the making of money than about the spending of it. This doubtless inspired the old adage that "a fool and his money are soon parted." Today the world is too busy to stop and study the best ways of spending it. Price is not the same as value; for price is what you pay for an article, while value is what you receive in merchandise—plus service.

Years ago I began studying to make both sides of my customers' dollars represent value to them when spent with me, and today it is recognized that our merchandising represents value.

Daily all my efforts are toward making a bigger and better organization to back up the policy, and while today I am giving the best I know how, tomorrow I hope to make it better. Try the Everyday Bargain Store.

CENTREVILLE

BUILDING BOOM AT HARTLAND

The following article was written by A. D. Colwell of The Observer staff, and first appeared in the St. John Standard.

A very good index to a community's prosperity is furnished by the number and character of the building operations therein. Hartland this year is experiencing a building boom the like of which has not been seen here since the first cabin was erected on the river bank.

There is a population of over 1,000 and some very nice dwellings and stores.

Last fall a little syndicate started the building ball rolling by opening up a tract known as Hillcrest avenue and selling lots at a nominal figure. Then, as soon as some one took the lead, and started to build there was a general scramble, so that the present time there are no less than thirteen buildings either just finished, under construction or about to be started, the total value of which, with the land connected with them, amounts to \$22,700.

The prices of the lots in the different sections range from \$120 to \$800, so it can be seen that the character of the buildings going up will be above the average expected in a country town and gives an idea of permanency and prosperity that would not otherwise be attributed to what might be termed a building spasm.

The figures given in the matter below includes the cost of the land on which the structures are built, the price of which ranges from \$120 to \$800.

On Hillcrest Avenue H. N. Dickinson is building a fine two-storey dwelling of concrete, finished inside with natural wood and all the modern conveniences. With the barn, which is to be added later, the outlay will be \$2,000.

W. E. Thornton is putting up a fine wooden residence on the avenue with verandah on the front and one side, which when complete will cost about \$1,000.

In the same district George McGoldrick will erect a modest dwelling of wood which will cost in the vicinity of \$500.

On Main street opposite the Lyric theatre Mrs. A. D. Colwell will shortly commence the erection of a two-storey concrete residence with large front porch. This will be of a different style of architecture from any other dwellings in Hartland, and an ornament to the locality. The estimate for this building, exclusive of the land, is \$1,500.

The congregation of the Church of England are preparing for the erection of their new church on a lot opposite the bridge on Main street. This will also be of concrete, and, according to the plans, will be one of the prettiest country churches in the province. It is hoped to complete the structure for \$3,000.

Further down on Main street, opposite the public school, Frank Clarke is now breaking ground for a very pretty bungalow of concrete, with verandah on the front and south side. The roof will be of steel shingles, while the ceilings and walls of all the rooms will be of ornamented steel, instead of plaster. About \$1,500 is the estimated cost of the dwelling.

On Hillcrest avenue Frank Estabrooks has about completed a wooden dwelling house of pretty design and nicely finished inside, the cost of which will be about \$800.

Scott Sipprell has converted the old Free Baptist church building into a fine residence, nicely finished inside, and with the en-

tire lower floor fitted up as a garage with concrete floor and modern fittings, at a cost of about \$1,500.

Just north of the bridge, on Main street, Glass Bros. have erected a wooden garage, which when completed will stand them about \$1,200.

On the site of the old Commercial Hotel, opposite the station, D. E. Morgan and Son are storing material for the erection of a large concrete building, two storeys high, the ground floor, to be used as a general store, while the upper portion will be fitted up as a two tenement dwelling. This building will cost \$3,000 or more.

Guy McGinley has partially completed a small dwelling on the Rockland road, which is modest but comfortable, at a cost of \$500, and has moved into it.

In a commanding position, with a beautiful view of the surrounding country, on the hill back of the village, Arthur Y. Dickinson is now erecting a fine two-storey concrete dwelling which will be nicely finished inside and will cost in the vicinity of \$2,200.

The Cement Block Co. have recently completed a commodious, but plain dwelling-house on Hillcrest avenue, finished inside in natural wood, and very comfortable, at a cost of which will be about \$1,500.

Mr. Geo. O. Britton, manager of the Farmers' Telephone Co., has been obliged to abandon his residence at Windsor on account of the ravages of tuberculosis, will shortly begin the construction of a wooden residence on Hillcrest avenue, the cost of which will be about \$1,000.

This completes the list of buildings so far as known, but the prospects are that three or four more buildings will be started before the summer is over. It is expected that all the buildings enumerated above will be completed before the cold weather sets in this fall, and those engaged in the building trades have no fear of any idle days during the summer.

It is also said Fred Thornton will build a residence on Main Street South.

One of the prettiest dwellings is John Christians' bungalow about half a mile north of the village.

Others who are putting up residences are: Allen Barter and Achbar Hartley.

CONSOLIDATION

The Consolidated School is a reform—just as truly so as the abolition of slavery, as responsible government, as giving every man a vote, as Confederation in Canada. It is an educational reform that is moving over the continent, brushing aside the inefficient and the antiquated. Like all other reforms it meets opposition—opposition from men whose sincerity and honesty are above suspicion.

Confederation is now nearly fifty years old. To us this period is the past. To our fathers it was the future. Many of them opposed Confederation. Some were cautious, some lacked imagination, some were pessimistic or non-progressive, but they were sincere.

But triumph came through those who represented youth, hope, faith in the country, and progress.

Consolidation means intelligence, progress, efficiency, unity. It means a better country to make a living in, a better equipment for the young to make a living. Vote for Consolidation!

BATH NEWS

The prospects in this part of Carleton are for a good crop of hay, and grain is looking well as well as all other crops.

A few potatoes are being offered to the market.

Many attended the funeral services held in the Primitive Baptist church here yesterday afternoon of Schuman Demerchant, Rev. C. H. Greer was the officiating clergyman. The deceased was one of the first settlers in Holmesville Settlement and well and favorably known here.

G. S. Larlee, C. P. R. Station agent here has been laid up from his work for several weeks but is getting around again.

B. H. Calder of the Bank of Nova Scotia staff here having been consigned to the staff at Sussex, N. B. left for that place last week. Mr. Calder made many friends here during his stay, which comprised the last year and one-half, and during that time he was one of the choir members at the United Baptist church. He is succeeded as teller here by Mr. Brittain of Bristol.

John Ryan Provincial Constable made a trip to Woodstock on Monday.

E. F. Smith M. L. A., East Florenceville and party motored up here yesterday and was at the funeral of the late Schuman Demerchant.

Miss Lella Giherson, teacher, daughter of Alfred Giherson, who has been located in the schools of Presque Isle, Me., arrived home on Saturday last to spend the summer holidays.

ASHLAND NOTES

The farmers of this place have their crops nearly all in.

Mrs. Raymond Grey and son Donald of Pembroke are spending a few days with her parents, Mr. and Mrs. G. W. McCollum.

Burwell Graham has purchased a new wagon.

Mr. and Mrs. Harry Belyea, pleasantly entertained a number of their friends at a party on Friday evening. All enjoyed a good time.

An auto party consisting of Mr. and Mrs. Fred Smith, Miss Alberts Belyea and James and Leon Belyea, all of Mars Hill, were guests of Mr. and Mrs. Albright Belyea.

Miss Della Hooge spent a few days with her parents Mr. and Mrs. George Boone this week.

Mrs. Daniel Buchanan, Mitchell, Charles, and Eldon Buchanan are visiting Mrs. Thomas S. Wade of Stanley. Mr. Buchanan spends his time between the mail box and the oven.

A large number of the young people attended church at Rockland Sunday evening.

Mr. and Mrs. Harry Belyea spent Sunday with Mr. and Mrs. Gordon York of Rosedale.

Mrs. William Seeley has returned from Hartland where she was sewing for Miss Edna Shaw.

It is rumored that Jarvis Hayward has purchased a McLaughlin-Buick car.

Miss Kathryn Bell spent the weekend with Miss Josephine Brown.

Mr. and Mrs. Morley Estabrooks and young son spent Sunday at the home of Robert Carney.

Bruce McLean spent the weekend at Knowlesville. He is much improved in health.

Mr. and Mrs. Ernest Seeley of Upper Brighton were visiting at the home of Mr. and Mrs. George Seeley on Sunday.

PILES

Do not suffer another day with itching, bleeding, or protruding piles. No surgical operation required. Dr. Chase's Ointment will relieve you at once and as certainly cure you. See a box at Jones, or Robinson, Bates & Co., Limited, Toronto. Sample box free if you mention this paper and enclose 10 stamps to pay postage.

About the Household

Pie Recipes.

Cream Pie.—One cup sweet milk, one heaping teaspoon cornstarch, three tablespoons sugar. Let boil until thick, then add one tablespoon vanilla. Have a baked crust ready to receive the above mixture. Pour over lightly spread the stiffly beaten white of one egg and two tablespoons of sugar. Set back in oven to brown.

Mock Cherry Pie.—One cup of cranberries, two-thirds cup raisins, two-thirds cup sugar, half cup water, one tablespoon flour, one teaspoon vanilla. Mix well and bake between two crusts.

Chocolate Pie.—One cup sweet milk, half cup sugar, quarter cup butter, two tablespoons grated chocolate, one tablespoon flour and one of vanilla. Put milk and sugar on to boil, beat one egg well, add a little cold milk and the flour; beat to smooth paste, and add to milk, stirring constantly. Add butter and chocolate melted together and boil all a few minutes; beat to smooth paste and fill baked crust. Cover with whipped cream or white of egg.

Lemon Coconut Pie.—To one cup sugar add the grated rind and juice of one lemon, one egg well beaten, a good tablespoon of flour, one cup of water and half a cup of coconut (shredded). Line a pie tin with rich crust, pour in the mixture and bake.

Butter Scotch Pie.—Make a rich crust and bake. Fill with the following: To one cup light brown sugar melted over the fire, add a large tablespoon butter and cook until the sugar is slightly burned, then add one cup milk, and when well blended, the yolks of three eggs, thoroughly beaten. Stir until thick, and pour into the shell. Beat the whites to a stiff froth, add three tablespoons powdered sugar, and spread on top. Brown in a quick oven.

Date Pie.—One cup dates (stoned), one-fourth cup sugar, one egg, one cup of hot milk, half cup water, one teaspoon lemon juice. Add the sugar and water to the dates and cook over a slow fire until half done, remove and add filling and put back to finish baking.

Banana Pie.—When fruit is scarce I make pie by baking an undercrust, and in this case a banana; then cook one large cup of milk, one-third cup of sugar, a pinch of salt, a little butter, and thicken with flour or cornstarch. When done flavor with vanilla, stir in beaten yolk of egg, and pour over bananas, in crust. Beat white of egg, sweeten and spread on top, and brown.

Pieplant and Strawberry Pie.—Line the pie plate with dough, put in good layer of pieplant, cut into cubes, then half a cup of fresh strawberries, or half a cup of canned berries. Mix one cup sugar and one tablespoon flour together, turn over the fruit, cover with upper crust and place in hot oven for 10 minutes, then reduce the temperature and finish baking. Avoid boiling the contents of a pie, as this is the reason that so many boil over or run out at the side.

Custard Pies.—1. Plain Custard.—Beat together until very light the yolks of four eggs and four tablespoons sugar, flavor with nutmeg or vanilla; then add the four beaten whites; a pinch of salt, and lastly a quart of sweet milk. Mix well and pour into this lined with paste. Bake until firm, in a moderate oven.

2. Chocolate Custard Pie.—Put some grated chocolate into a saucepan and place on the back of the stove and let melt (do not add any water to it); beat one egg and some sugar in it; when melted, spread this on top of the above custard pie. Lovers of chocolate will like this.

3. Peach of Custard Pie.—Use either fresh or canned peaches. Chop peaches without juice and add to a plain custard.

4. Fig Custard Pie.—Three figs soaked overnight in water, then boiled until tender, after which they should be chopped until fine. Add chopped figs to plain custard, and bake.

Apricot Pie.—Stew apricots until tender, sweeten to taste and add beaten yolk of one egg. Fill crust and bake. When cool cover with a meringue made of the beaten white of the egg, sweetened with one tablespoon of sugar. Set in oven until browned. Or cover the pie with criss-cross strips of pastry when the pie is first put into the oven.

Hints for the Home.

When steaming potatoes put a cloth over them before putting the lid on. They will take much less time to cook, and be much more neatly than when done in the ordinary way.

A piece of white oilcloth placed at the foot of dark stairs will warn those who are descending that the last stair is reached, and thus save an unpleasant fall or jar to the system.

Before using a new saucepan add a lump of soda and some potato peelings and let it boil for some hours. Then wash out thoroughly, and all danger from poisoning from the tin lining will be gone.

When lemons are hard cover them with boiling water and stand them aside to cool. They will then appear fresh and full of juice. Neither will the juice seem in the least diluted by any water absorbed.

To remove grease stains from wall-paper mix with water to the consistency of cream, spread over the marks, allow to remain for two days, then remove with a stiff brush, and the stains will have disappeared.

The following is a light cheese pudding, much more easily digested than plain toasted cheese, which was at one time a favorite with many. Eaten with oatmeal cake or toasted bread.—Cut up the cheese into small pieces and place in a saucepan. Mix two tablespoons of corn flour in a breakfast cupful of milk and pour into the saucepan. Allow to boil for a few minutes. Take off the pan and add a well-beaten egg.

The frequent variations of temperature during the spring makes it highly dangerous to change children's clothing too hurriedly. It is a mistake, immediately a hot day comes, to pack away the warm "woollen" and take out the lighter summer clothes. Many a serious cough and illness has been the result of this premature change. The alteration from winter clothing should be gradual. Wool should always be worn next to the skin, as this protects the child from sudden chills, and a thick vest is necessary until the weather is quite warm and summerlike.

Didn't Mind Loss of Legs.

A French Deputy who is serving as a captain of artillery, tells in a letter to a friend a story illustrating the bravery of the French soldiers. During a bayonet attack a shell exploded in the advancing line of French and took off the leg of one of the soldiers. When an ambulance attendant ran up to the wounded man the latter shouted to him:

"Hurry up and look for my leg; it is lying over there. Maybe I can have use for it yet."

After the soldier had been brought to the hospital the general commanding, who had heard of the incident, went to see the soldier and complimented him on his courage.

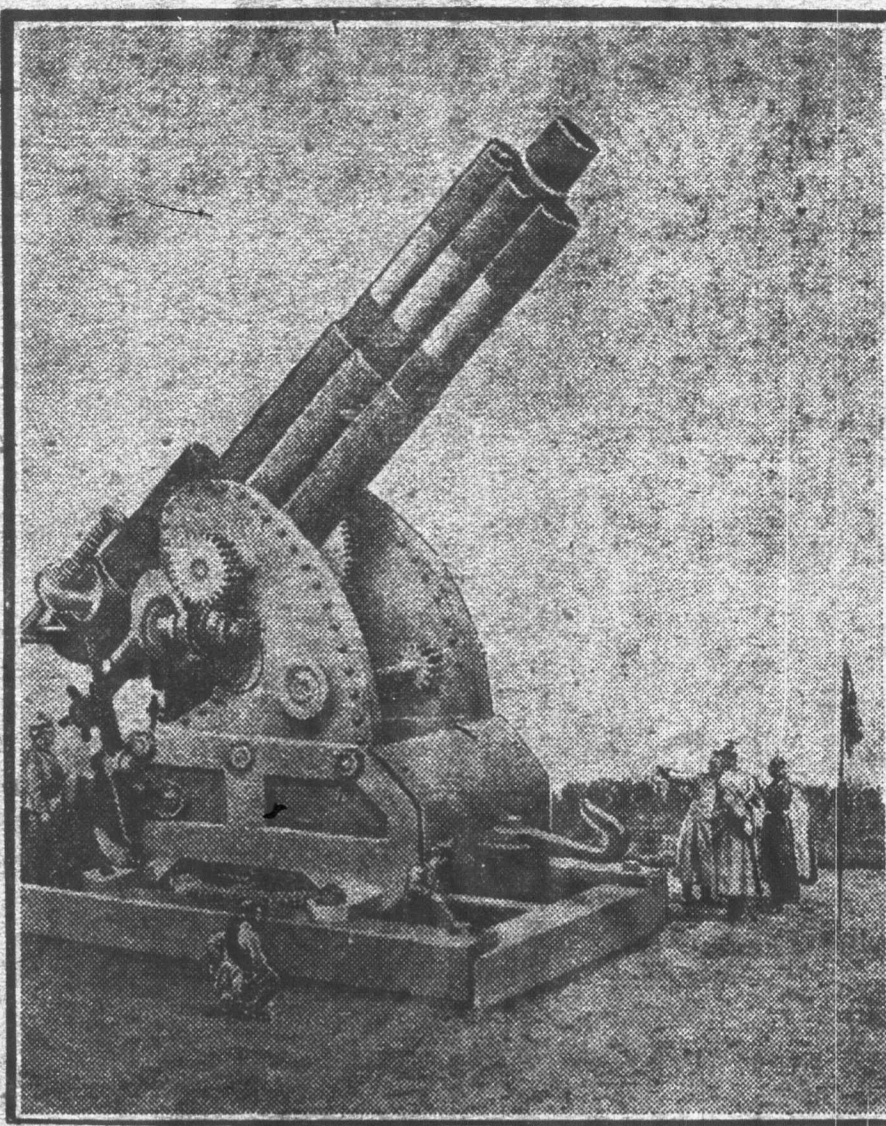

"Thank you, very much, my General," the wounded soldier responded. "I have yet one leg for the service of my country, and I can even afford to lose that, too."

"But, my dear man—"

"Oh, I know what you are going to say," the soldier interrupted, "but really my legs are not so necessary in my profession, because I am a piano instructor and my hands are enough for me to get along with."

Sal—What do you think of Gertrude? Sue—Oh, I think she is a right sweet girl. Sal—I don't like her, either.

"Andles improve by being kept a few months."

Eight Barrels and a Range Exceeding Any Other Weapon.

This is the first photograph of the secret Krupp siege howitzer of which so much has been said. In Germany it is called the Emperor's Eight-Leagued Boots, from the number of its barrels and its kick (technically, of course, its recoil). It weighs on its service mounting, as photographed, 150 tons, 2 cwt., 1 qr., 11 lbs. Its eight clustered barrels (their size may be estimated by comparing the figures of the Kaiser and his staff officers) are specially designed for concentrated or collective "bombardment," for discharging salvoes or "bouquets" of shells (one projectile of which is a fair load for an ordinary railway truck) at a range of thirty-two miles.

RED CROSS SOCIETY.

Toronto, May 1.—The heavy losses suffered by the gallant troops who took part in the glorious battle of Neuve Chapelle shows clearly that even local successes cannot be gained without great loss of life. The greater proportion of these casualties are wounded, and lives can only be saved when these wounded men are attended to promptly and when the doctors and nurses have every medical appliance at their disposal. A large amount of medical supplies have been sent from the Red Cross both to England from Canada and from Canada to the front during the past weeks, and as the war progresses a still larger amount will be needed.

Funds are specially needed for these surgical supplies, as the Red Cross authorities know exactly what kind of instrument is needed at the front and in the hospitals, and they have to be purchased from the proper sources. Nevertheless, anyone can roll bandages, and these are needed by the million, but word has been received from England that bandages not properly rolled should not be sent, and the Canadian Red Cross Society earnestly requests that all who undertake to send in bandages should not do so unless they are prepared to carry out exactly the instructions given them. These bandages are made 2 inch, 3 inch, 4 inch, 5 inch and 6 inch and 5 yards long. A cheap grade of unbleached factory cotton should be used, and they must be torn, not cut, and tightly rolled on bandage rolling machines.

Old linen, cotton and flannel will be always acceptable, and there must be many housewives who have table cloths, towels, sheets, etc., which have been used sufficiently to enable them to be replaced. If every householder were to give one sheet, one towel and one table cloth, what a lot of bandages could be made to bind up the wounds that our brave soldiers have suffered in the cause of freedom.

It is of the greatest importance that all supplies should be packed according to directions and that the contents of each parcel should be fully described on the outside, with the number of articles, size of articles, etc. Full directions as to packing and what is most needed, etc., can be had on application to the Superintendent of Supplies, 77 King Street East, Toronto. A new leaflet has just been issued, in which all information is given for the guidance of all those who are helping in the great cause.

Those who are assisting the work of the Red Cross little realize how their good work is appreciated by the soldiers, both in the trenches and in the hospitals. Here is an answer from a Canadian nursing sister, who was for some time engaged in a hospital on Salisbury Plain:—"Please tell any of the dear people who send Red Cross things that they will never know what a blessing the things they have made are. They cannot make too many handkerchiefs, night shirts and pyjamas. They are valuable, I can tell you."

That is one of the many messages of gratitude that comes across the sea to the splendid band of workers who are doing so much for our Canadian soldiers in their battle for freedom. It should stir us to greater energy and renewed activity under the Red Cross sign.

RED CROSS NOTES.

One of the most interesting gifts

received so far by the Canadian Red Cross Society reached headquarters recently in the form of one scarf and three knitted wristlets, which were worked by Miss J. M. Barnard, of Kohala, Hawaii. Enclosed in the package was a note which said:—"With this old lady's prayers and best wishes, who left England in 1861." Accompanying the message was a photograph of the sender who, though far away in Sunny Hawaii, has not forgotten our brave soldiers.

The Girls' Red Cross Auxiliary, of Aurora, Ontario, have for some time been making a small khaki bag containing iodine, wool pad, piece of gauze and waterproof. Altogether these girls have made 225 of these little bags. Full description and directions are printed in English and French on the outside cover, which also has the maple leaf printed above the directions.

While the appeal of the Society has been met in a generous manner, a large quantity is still needed if the Canadian troops at the front are to be supplied with this luxury. Pipes, tobacco in tin, plug tobacco, and smokes of all kinds will be welcomed at headquarters and also money to buy them. It is not necessary to point out what a great deal of comfort and pleasure a pipe of "baccy" affords our soldiers in the trenches and in hospital.

Another large consignment of Red Cross supplies left this city a few days ago, when 435 cases were sent to Halifax en route to London, where they will be distributed by the Canadian Commissioner. Since September 10 no less than 8,696 cases have left headquarters, and supplies from all parts of the country still continue to arrive every day. Among the articles sent yesterday were 4,861 shirts and 5,805 socks, besides a large assortment of other articles.

It is an interesting fact to note that from August 30 to December 31 last, 3,548 cases were sent from Toronto, and from December 31 to April 15 the number shipped totaled 5,148. Thus 1,600 more cases were shipped during the past three and a half months than during the previous four months. These shipments do not include any article sent other than Red Cross supplies.

That the West is doing its share is shown by the fact that in the past three weeks two shipments of 48 cases each arrived from Calgary. A large consignment was also received from Hamilton and 3,600 socks from the Brandon Chapter of the Daughters of the Empire. These latter articles were for the War Contingent Association.

Colonel Correll, who is in charge of the Duchess of Connaught Hospital at Cliveden, England, in a recent letter to Mr. Noel Marshall, chairman of the Executive Committee of the Canadian Red Cross Society, asked that maple sugar and syrup be sent, as the soldiers specially appreciated this luxury. The Society will be glad to receive any maple products, and the farmers of Ontario and Quebec are specially asked to assist in this worthy appeal. We cannot do too much for our soldiers, and when they express a wish for any particular luxury, they should receive it.

Although there are only twelve ladies in the town of Carleton Place, Ontario, including one Japanese and one Indian, they have been doing a splendid work on behalf of the soldiers, and have sent a parcel of knitted goods to the Canadian Red Cross. These comforts were sent by the Patriotic League of that little town in the far north.

FEEDING THE YOUNG CALF

Kindness and Care are the Secrets of Success—Feed Should Be Scrupulously Clean, Also Surroundings.

Many animals have been stunted in growth by improper feeding when they are young. It is much easier to injure a young animal by careless feeding than it is a full grown one. Thought and care are necessary at all times in feeding animals, but especially so when feeding young animals.

Whole milk is nature's food for the young calf, but unless beef is the sole object it will not pay to feed it. The next best thing is skim milk, but this must be fed with care. The skim milk fed to a calf should not exceed eighteen pounds daily until the calf is five weeks only, and only in rare cases should an amount beyond twenty-four pounds be given. Many calves are destroyed by being overfed with skim milk. Where calves do poorly on skimmed milk the results are due to the abuse of the food. Too large a supply of milk, infrequent and irregular feeding, cold milk, and sour, unclean feeding pails are the causes of nine-tenths of the troubles.

The young calf should be allowed

at a feed while half this would probably be enough for a Jersey. All changes in feed should be made very gradually. When changing from whole milk to skim milk, begin by replacing a pint of the whole milk with a pint of the skim milk. Then gradually increase the amount of skim milk and reduce the amount of whole milk until in about ten days nothing but skim milk is being fed. The change must be made slowly in this way or the digestive system will be upset. All changes in feed should be made slowly to allow the stomach to get accustomed to the new food. This rule applies to feeding stock of any kind. A great deal of the trouble that people have with their stock is caused by too sudden changes of food.

To replace the fat that has been removed from the skim milk it is good practice to add a little flax seed jelly to the ration. This jelly should be used in small quantities at first, and the amount gradually increased. Begin with a dessert spoonful in each portion and gra-

The dairy calf should not be fed as heavily as the beef calf. It should be kept growing and thrifty, but not too fat, or the dairy type will be lost.

to be with its dam for the first one or two days. It should be allowed to have the first milk or colostrum at any rate, as this is necessary for clearing the bowels and starting the digestive functions. All feed given should be at blood heat. Nothing upsets the digestive system of the calf and starts scouring so quickly as cold milk. Another thing that must be kept in mind is to start with light feeds, and very gradually increase the amount given. Good judgment is required to know when the animal gets enough without being overfed. A calf intended for a model dairy cow should not gain over one and one-half pounds per day for the first four months, and less thereafter. A good way to tell if the calf is being fed properly is to notice the condition of the bowels as indicated by the manure. If there is a tendency to looseness, the feed should be reduced at once, and care taken that everything fed is at blood heat.

If a calf gets off its feed it is a good plan to miss a meal or two and then feed somewhat lightly for a time.

Make Changes Gradually.

It is not possible to lay down fixed rules as to how much to feed, as calves differ so in their size and vigor. Holsteins may be started on about six pounds of new milk

dually increase the amount until about a cupful is being fed night and morning to a three-month-old calf. To prepare the jelly, steep the whole flax seed in boiling water and make a thick paste of it.

The calves should be taught to eat meal as soon as possible. This can be done by putting a little in their mouths, immediately after supplying the milk. The calves will begin to pick a little hay at about three weeks old. This should be encouraged, but care must be taken that only the best and cleanest hay is offered.

If the following rules are observed success in calf rearing is ensured:

1. Treat calves kindly and never lose your temper with them, even if they are a little stupid sometimes.
2. Be scrupulously clean as to the feed fed, and also as regards pails and the animal's surroundings.
3. Make all changes in the character of the food very gradually. This applies whether changes be as to temperature, quality of the feed, amount of food, sweetness or acidity with milk fed, time of feeding, or any other thing connected with the food.
4. Feed only wholesome food; feed regularly, and feed in sufficient quantities.

The citizens of Guelph, through the Canadian Red Cross Society, and the people of Wellington County, have presented a motor ambulance to the Society for service at the front.

The Yukon Chapter, No. 1, of the Order of the Eastern Star, of Dawson City, Y.T., has forwarded to the Canadian Red Cross Society the sum of \$304. The people of the Yukon Territory have supported the Red Cross in a generous manner.

A Fish Drive.

The natives of Rarotonga, one of the islands in the South Pacific Ocean, have a singular method of catching fish in which the whole community takes part. On the shore of the island there are many long, narrow lagoons, each lying between a beach and an outer reef of coral, that usually swarm with fish. The natives choose one of these stretches of shallow water for the fish drive, and close all breaks in the reef by laying nets across them or building up rough barriers with pieces of coral.

When they have done that, six or seven hundred men, women and children, wade into one end of the lagoon carrying little, pleated fibre bags filled with utu nut. In most places the water is about three feet deep, and nowhere more than four feet; so the natives march slowly up the lagoon, trailing behind them the bags of utu nut. As this substance is wet it forms a peculiar narcotic, which it diffuses through the water. The process is called "poisoning the lagoon."

Half an hour is allowed for the "poison" to spread, and at the end of that time all the fish are under

the influence of the drug, and are swimming about in a confused and aimless manner. The natives, armed with long, pronged spears, form a line that reaches from side to side of the lagoon, and march along shouting, splashing, and driving the intoxicated fish before them. When the fish are all collected at the farther end of the lagoon, the natives begin to cry, "Eh-hu-hu-u!" and the barred spears fly in all directions. The natives are very dexterous with the spears, and the fish are so sluggish, owing to the effects of the utu nut, that very few of them escape.

Many of the "poisoned" fish seek the shelter of the coral reef and hide in the crevices; and so some of the natives "fish" the reef. They put on glass goggles and sink beneath the water, where they remain submerged for one or two minutes. They feel about among the coral for the listless fish, which they get with a short, thrusting spear. These methodical fishermen usually make the biggest catches; but the merry men in the open water enjoy the best sport. Numerous varieties of fish are obtained, but all have the brilliant and beautiful coloring peculiar to the fish of the tropics.

A Substitute for Glasses.

If you wear glasses, nine times out of ten you will find that you have left them behind when you want them most. Next time this happens do not worry about it. Instead take a good sized piece of paper and perforate it with many pin pricks. The paper should be held close to the eye and the reading matter at some distance. You will find this a good substitute for your missing "speces."

Canada's First Concrete Pavements

While the first concrete pavements ever laid in Canada were, according to the best obtainable information, those laid in Toronto, nevertheless, Windsor, Ont., can probably claim the distinction of being the first place to use this form of construction to any great extent. At the beginning of 1908 Windsor had over 20,000 square yards of concrete pavements, and this quantity has been increased every year since then. In fact, practically no other kind of pavement is being used in that city.

The general method has been to lay the pavement in two courses, that is, with a foundation of concrete and a wearing surface of mortar. The cost has varied from 90 cents to \$1.15 per square yard. The pavements laid in 1912 cost very little more than \$1.00 per square yard. At the same time, the cost of macadam pavements was about \$1.10 per square yard, so that the cost of concrete was practically the same for macadam and a better pavement was obtained and one for which the cost of maintenance is practically nothing.

NOT ENOUGH CHILDREN

ever receive the proper balance of food to sufficiently nourish both body and brain during the growing period when nature's demands are greater than in mature life. This is shown in so many pale faces, lean bodies, frequent colds, and lack of ambition.

For all such children we say with unmistakable earnestness: They need Scott's Emulsion, and need it now. It possesses in concentrated form the very food elements to enrich their blood. It changes weakness to strength; it makes them sturdy and strong and active.

Scott's Emulsion, Toronto, Ont.

With the Fisher Folk

Speckled trout, fried in a Brunswick, is a most toothsome dish.

The Dionne brothers with their wives had a very enjoyable and profitable outing the first of the week, and established the reputation of this family as expert fishermen.

J. W. Niles and A. W. Stevenson were away on a fishing trip this week to the Serpentine and other streams, accompanied by Victor Miller and Murray Howard, the well known guides. One of the most pleasant features of the outing was a visit to Stratheona House, at Seven Mile Pool, where they were hospitably entertained by their genial friend, Mr. Reuben H. Ross. Mr. Ross knows all this region like a book, and his bear stories would put to shame the exploits of many of the heroes in popular works of fiction. The party arrived at Stratheona, and made the rest of the voyage to the Serpentine by canoe. The "speckled beauties" are unusually numerous this year. Messrs. Niles and Stevenson declare that for good fishing and picturesque scenery this region, and particularly in the vicinity of Stratheona House, is the finest country lying out of doors.

The fishing fever is by no means confined to the male sex, and several ladies in Perth and Andover are striving to make a record as anglers. The wife of a merchant across the river, after great preparations, and accompanied by a young lady friend, went some days ago to Wark Brook to fish for trout. Towards evening the husband received an urgent message to come at once to assist in landing the net, as the fish were offering a stout resistance. Accompanied by a friend, a clerk in the bank, he quickly hied to the scene of action, to find a solitary trout still in the net, which the women were evidently afraid to land. After giving the ladies the merry hat, he proceeded to haul the fish ashore, where it was tried and dished up by Mr. Banker in a manner that would excite the envy of a professional chef. But these ladies will require to "go some" if they get a place in the race for championship honors.

KANSANS COMING TO NEW BRUNSWICK

Banner Tourist Year Expected from Greater Radius than Before

(From the St. John Telegraph.)

That fifty per cent. of the enquiries coming to his office regarding Canadian trips and attractions are from citizens of the United States who have German names, was the statement given out at Montreal by John F. Pierce, general passenger agent of the Canada Steamship Lines, Ltd. He added that the tenor of the letters of these people was either neutral or with the Allies; and that they desired to learn if they could travel freely in Canada without fear of trouble on account of their names.

It was pointed out to dubious persons that only the usual formalities would have to be gone through in coming to Canada, and that United States citizens would get every consideration and courtesy.

Indications point to a banner season in travel of tourists to New Brunswick, and an unusually large number of enquiries have already been received in regard to points of interest in St. John and vicinity.

The experience of Montreal in the matter of communications from people

with German names was not repeated in the mail matter opened here, only one name in the slightest degree suggestive of German ancestry being noted.

Of especial interest is the fact that Kansans are seeking information about New Brunswick as a pleasure resort.

Formerly the visitors came from Maine, Massachusetts, New York and Pennsylvania, but this year, on account of a more extensive advertising campaign, letters have been received from a considerable number of residents of Kansas who desire to learn of New Brunswick's attractions to summer visitors.

On the whole, a banner year is expected.

SMITH AND DERRAH HELD FOR MURDER

Woodstock (N. B.) June 28

The intense interest in the preliminary examination of Charles Smith and Stephen Derrah, charged with murder of Fred Green on the night of May 7, was indicated by the crowd that attended to get into the council chamber, where the hearing was to take place today. So great was the rush that Police Magistrate Holyoke arranged to have the proceedings in the county court house. Most of those in attendance were from up river points, and Florenceville, where the alleged murder was committed.

J. C. Hartley, K. C., represented the crown. Hon. W. P. Jones appeared for both Smith and Derrah.

The first witness called was Aaron Green, father of the dead man. He saw his son the last time early in May when he started for Bristol. He was then wearing a navy blue coat, cotton under clothing, black stockings and tan shoes. He made inquiries as to the whereabouts of his son about four weeks after he last saw him. They found a coat and a shoe, which he recognized as belonging to his son. "When I heard a body had been found near Fredericton, I went there and identified the body as my son. There is no doubt about it, and I had no difficulty in making the identification. I returned to Woodstock and laid an information before Police Magistrate Holyoke that Charles Smith and Stephen Derrah murdered Fred Green on May 7, 1915."

Charles R. Green, a brother of Fred Green, went to Fredericton with his father and corroborated the evidence. He had no doubt that the body was that of his brother.

Mrs. Mabel Kinney swore that on the night of May 7, Charles Smith came to her house to borrow a lantern to find his hat, which he said he had lost on the bridge. This was about 11 o'clock. She next saw Smith when he returned with the lantern the same night. He came into the house and in a few minutes Green came in. Smith said: "Don't let him in or I will hit him."

When Green came in his face was swollen and bloody and he said to Smith: "Look at my face." Smith said: "You hit me first and don't contradict me or I will kill you."

Green went out, followed by Smith and she did not see Green again. She saw Smith again and Derrah was with him. They had all been drinking and Derrah had lost his cap and asked for one to wear home. She gave him one. It was a very dark night and raining. It was near 12 o'clock when they were at the house.

George Kinney's evidence was about the same given by his wife.

Mrs. Elizabeth Stiles, Wilbur Smith and Jack Scriber all testified to hearing the men wrangling that night. Alfred Adams gave evidence as to finding a coat and shoe on the morning of May 8, also a broken bottle, while crossing the bridge.

Willard Hopkins said the coat had blood on the front and sleeve. He took the coat and shoe home and the last time he saw it was three weeks ago.

Mr. Jones, for the defence, said unless a post-mortem examination had been held it was almost impossible to determine the cause of death, whether by drowning or otherwise. Mr. Hartley said he had arranged for Dr. Mullin to come and give evidence, if necessary. He assured Mr. Jones that the evidence taken at the inquest would be given him for examination. Mr. Jones said there was no evidence whatever against Derrah. According to the evidence of Wilbur Smith, he was unconscious from drinking. He would ask for his discharge. In regard to Smith there is some evidence that he had been fighting with Green and there would perhaps be reason to hold, but Derrah was simply drunk and should be discharged from custody.

The magistrate decided that as the case was so serious he would have to hold Derrah. Both prisoners were then committed for trial at the supreme court to be held the third Tuesday in October.

Both the accused young men seem confident that they will be freed from the charge against them. Derrah seems alert to the seriousness of the situation and frequently conferred with his counsel.

Some Facts About The Toad

The toads live from ten to forty years, and it can lay over a thousand eggs a year. It has lived two years without food, but cannot live long under water. It never takes dead or motionless food. It captures and devours wasps, yellow-jackets, ants, beetles, worms, spiders, snails, bugs, grass-hoppers, crickets, weevils, caterpillars, moths, etc. In twenty-four hours the toad consumes enough food to fill its stomach four times. A single toad will in three months devour over 10,000 insects. If every ten of these would have done one cent damage the toad has saved ten dollars. Evidently the toad is a valuable friend to the farmer, gardener, and fruit grower, and can be made especially useful in the green-house, garden, and the berry patch.

THIS IS YOUR OPPORTUNITY TO SAVE

OUR SEMI-ANNUAL SALE CATALOGUE is, undoubtedly, the most welcome book you could find these days. It lists a multitude of just such articles as are in daily use, and in many instances the prices are surprisingly low. The quality of goods offered during this sale is of our usual high standard, representing, in many instances, to limit purchases on our part of odd lines at big price concessions. In other ways, also, we have secured as low price reductions on large orders so that workers might be kept busy during the quiet season. All in all, this is a very wonderful Sale opportunity for you, as the prices we quote will fully bear out. But there is also this note of warning—

REMEMBER THAT THIS SALE ENDS AUGUST 14th

This means that you have no time to waste if you desire to make the most of this occasion. If you have not received a copy of our Sale Catalogue (28 pages), see to it that you secure one without further delay. Such bargains as are now possible may not come your way for a long time to come. You'll be more than surprised at the great purchasing power your money has through the means of this Sale Catalogue. Send in your order now, and you'll order regularly. It's not presumptuous to say that the Sale will be only too short for those who make the most of it.

THE EATON GUARANTEE ALWAYS PROTECTS YOU. THE T. EATON & CO. LIMITED TORONTO CANADA THE MORE REGULARLY YOU BUY THE MORE YOU SAVE.

BANISH PIMPLES AND ERUPTIONS

In the Spring Most People Need a Tonic Medicine

One of the surest signs that the blood is out of order is the pimples, unsightly eruptions and eczema that come frequently with the change from winter to spring. These prove that the long indoor life of winter has had its effect upon the blood, and that a tonic medicine is needed to put it right. Indeed there are few people who do not need a tonic at this season. Bad blood does not merely show itself in disgusting eruptions. To this same condition is due attacks of rheumatism and lumbago; the stabbing pains of sciatica and neuralgia; poor appetite and a desire to avoid exertion. You cannot cure these troubles by the use of purgative medicines—you need a tonic, and a tonic only, and among all medicines there is none as equal Dr. Williams' Pink Pills for their tonic, life-giving, nerve-restoring powers. Every dose of this medicine makes new, rich blood which drives out impurities, stimulates every organ and brings a feeling of new health and energy to weak, tired, ailing men, women and children. If you are out of sorts, give this medicine a trial and see how quickly it will restore the appetite, revive drooping spirits, and fill your veins with new, health-giving blood.

You can get these Pills from any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

STOPS TRAIN IN OWN LENGTH

Almost Instantaneous Method Is Adopted.

A brake that will stop a train of twelve steel cars weighing 2,000,000 pounds going at sixty miles an hour within 1,000 feet, practically in its own length, and do it without jolting the passengers, has been adopted by the Pennsylvania Railroad, according to a bulletin issued recently.

One has to know how air brakes work before it is possible to understand how an almost instantaneous stop can be made without a jar. This is well explained in one of the railroad's recent bulletins:

"The air brake apparatus controls a flow of compressed air through the train and to and from the brake cylinders on each car. A system of levers transmits the force exerted by the compressed air to the brake shoes—that part of the brake which comes in contact with the wheels. As the controlling force of the brake is air and the control itself is given from the engine, brakes on the first car apply first, on the second car next, and so on to the rear of the train as the flow of air travels from car to car. About eight seconds elapse from the time the brake application is started by the engineer until full braking force is obtained on the last car of a twelve-car train. This serial action results in surges and shocks throughout the train during brake application, the shocks increasing in severity as the train length is increased.

"The new brake differs from the old mainly in that the control of the compressed air is electric, with the result that the brakes are applied at the same instant on all cars; the full braking power of the train is exerted in two seconds after the engineer turns his lever."

"Thus it is not the sudden stopping of a train that causes the jar, but the slowing down of the cars one after another, those in the rear of the train not feeling any of the brakes until about eight seconds after those near the engine have slowed down."

FIND OUT

The Kind of Food That Will Keep You Well.

The true way is to find out what is best to eat and drink, and then cultivate a taste for those things instead of poisoning ourselves with improper, indigestible food, etc.

A nervous Eastern woman writes: "I have used Grape-Nuts 5 years for the young and for the aged; in sickness and in health; at first following directions carefully, later in a variety of ways as my taste and judgment suggested."

"But its most special, personal benefit has been as a substitute for meat, and served dry with cream when rheumatic troubles made it important for me to change diet."

"Served in this way with the addition of a cup of hot Postum and a little fruit it has been used at my morning meal for six months, during which time my health has much improved, nerves have grown steadier, and a gradual decrease in my excessive weight adds greatly to my comfort."

Name given by Canadian Postum Co., Windsor, Ont., Read, "The Road to Wellville," in pkgs. "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

The Soldier's Safety Muzzle.

Hardly less fatal in effect than the flying fragments from bursting shells charged with high explosives are the fumes that are given off at the moment of explosion. The poisonous gases pervade the immediate locality, and themselves have often even killed men outright. The fumes are, of course, peculiarly noxious in confined spaces, such as in the trenches and in bomb-proofs and dug-outs. To save life, a special respirator—a kind of muzzle—has been adopted, and soldiers are shown above wearing it. Its feature is a small valve in the upper part which opens and shuts automatically as the wearer draws breath or exhales.

His Host Smiled.

A tourist recently stopped for a drink of milk at an Irish cottage. He noticed on a dresser a brick with a faded rose on the top of it. "Why do you keep these?" "Sure, sir," was the reply, "there's memories hangin' about them. Do you see this big dent in my head? Well, it was the brick done it, sir." "But the rose?" asked the tourist. His host smiled quietly. "The rose, sir, is off the grave of the man what threw the brick."

SAVED BABY'S LIFE

Mrs. Jos. Desrosiers, St. Alphonse, Que., writes: "I cannot say too much in favor of Baby's Own Tablets, as they saved my little one's life. Before giving him the Tablets he was greatly troubled with worms and was like a skeleton and cried day and night. The Tablets soon expelled the worms, and now baby is the picture of health." Baby's Own Tablets also break up colds and simple fevers, cure constipation and indigestion and make the teething period painless. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Gallery Comment.

To be in proper keeping with the demands of the times, Miss Phyllis Squall had had a patriotic song especially compiled for her.

In due time the night arrived for her to present the new song. She was just finishing the third and last verse when she decided to call up every possible effort for one final spurt in the last line, which was the title of the song—namely, "I wonder if he'll miss me?"

She rendered this in such a way that it seemed to have a direct appeal to the audience.

"Well, if he does, miss, he ought never to be trusted with a gun again!" shouted a gentleman in the gallery.

How Did You Get a Job?

I hired a man once just because he was conscientious, modest and respected the rights of others. I witnessed several little things that went to prove this while he was awaiting his turn to be received and interviewed, such as offering his seat to a man who was older than he, giving way to the pressure of crowding, thus losing his place in the line rather than to appear ungentlemanly. I knew from his appearance that he needed the job, but that he recognized the fact that the others needed work as well as he, and was willing they should have equal chances with himself. All this the others did not seem to be conscious of, as evinced by their elbowing and selfish crowding. He made the very sort of employee that I wanted—one that was reliable and of a retiring manner. It was the kind I expected to get when I picked him out.

In New Surroundings.

"See here, Rastus," said the new arrival at the hotel, "do you mean to tell me that this egg is fresh?" "It was when hit was laid, suh," replied the waiter. "And when was that, pray?" demanded the guest. "Ah dunno, boss," replied Rastus. "Dis year is mah first season at his vere hotel, suh, and derefoah Ah can't tell."

She Soon Gained Forty Pounds

DAME BOUCHARD FOUND NEW HEALTH IN DODD'S KIDNEY PILLS.

Now She Is Advising All Her Friends Who Suffer From Kidney Disease to Use Dodd's Kidney Pills.

Portneuf, Hamilton Cove, Saguenay Co., Que., May 10th (Special).—Perfectly cured by the use of Dodd's Kidney Pills, Dame Rene Bouchard, well known and highly respected here, is advising all her friends who suffer from kidney disease to use Dodd's Kidney Pills.

"When I commenced to take Dodd's Kidney Pills, I was so run down I only weighed eighty pounds," Dame Bouchard states. "I only took four boxes in all but they brought me back to health and now I weigh one hundred and twenty pounds. You may publish what I say if you wish, for Dodd's Kidney Pills have done wonders for me."

Dodd's Kidney Pills do wonders for run-down people because they cure the kidneys. Cured kidneys strain all the impurities, all the poison, out of the blood and the pure blood carries new nourishment, health and life, to all parts of the body. That's why so many people say, "Dodd's Kidney Pills gave me a new lease of life."

Glass Houses.

Not a few architects are recommending that houses and apartment buildings be made of glass bricks. They want glass instead of brick or stone because it gives more light and is easily kept clean. The blocks should be made of good size.

They should be made of pleasing color tints and be impervious to the weather. They can be worked in between pilasters, domes and friezes. Set under the veranda this glass should have a smooth upper side with prisms on the lower face that would direct plenty of light into the rooms.

Planning a New Projectile.

The French Ministry of Marine has had submitted for consideration a new projectile—a cross between a torpedo and a shell. Gliding across the water like a flat pebble, it is said to have a range of ten miles. It contains a charge sufficient to destroy dreadnoughts or a breakwater, and can be fired either from a torpedo tube or a twelve-inch gun. The method of firing is simple. It can be effected from a conning tower without the use of a telemeter. Its value as an effective agent in war remains to be demonstrated.

Sore Corns Go!

No cutting, no plaster, no pain to press the sore spot. Putnam's Extractor makes the corn go without pain. Takes out the sting overnight. Never falls—leaves no scar. Get a 25c. bottle of Putnam's Corn Extractor today.

A GREAT SAVING.

Economical Methods of Purchasing Supplies.

Nothing in municipal history excited more interest than the recent adoption by the City of New York of the C.P.R. method of purchasing supplies. New York orders for municipal purchases total \$22,000,000 worth of good each year and found that there was much duplication and waste, some of the departments paying retail prices for the same goods as were purchased wholesale by others. Under the C.P.R. system everything is centralized so as to cut out the possibility of duplication either in purchase or payment of goods, while the terms are naturally all the more in favor of the railway. New York City sent a special investigator round the Continent to study methods of purchasing supplies, and he decided that the C.P.R. system was "the best for efficiency and saving." This was naturally the source of much gratification to Sir Thomas Shaughnessy, who was himself at one time purchasing agent for the C.P.R., and established the present system. The New York expert investigator has been busy ever since answering letters from other American municipalities. They pour in at the rate of about a hundred a week, all wanting to know about the C.P.R. and its model purchasing department, with a view to the adopting of similar methods in other cities. It has been calculated that the adoption of C.P.R. methods by American cities has saved Uncle Sam a waste of over a billion dollars.

Following Instructions.

The phone bell tinkled. "Is this the office of the Daily Squawk?" asked the voice. "Yes! Well then I want you to put in my dear husband's death notice 'Gone to rest' in an appropriate place." And next morning it read: "Gone to rest in an appropriate place."

Keep Minard's Liniment in the house. ED. 7.

Don't Spare Words.

Most people are so sparing of the use of languages other than their own that they have little idea that there are more than four thousand languages in the world. There are six languages common in Austria-Hungary, and Emperor Franz Joseph is master of them all. It is said that there are sixty vocabularies in Brazil. In Mexico the Nahuatl is spoken in seven hundred dialects. There are hundreds in Borneo, while in Australia there is no classifying the complexities.

According to the latest statistics, English is at present spoken by 130,000,000, German by 100,000,000, Russian by 70,000,000, French by 40,000,000 and Italian by 30,000,000. Spanish is spoken by 40,000,000 and it is constantly on the increase owing to the increase in commerce in Spain.

His Son's Father.

At a very fashionable and equally expensive tailor shop about town a certain middle-aged, out-of-town customer discovered that he lacked sufficient change to pay for his humble purchase—a pair of gray gloves.

"May I charge them?" he asked. "I find I haven't my checkbook with me."

"What was the name?" demanded the rather displeased tailor in peremptory manner.

He was told the name and address. "Oh, that's all right, sir," exclaimed the tailor, now beaming with exaggerated affability. "Your son trades here."

Pleurisy Pains Vanish! Chest Colds Cured!

NERVILINE HAS NEVER FAILED TO CURE

Don't Suffer! Nerviline is your relief. Nerviline just rubbed on, lots of it, will ease that drawn, tight feeling over your ribs, will destroy the pain, will have you smiling and happy in no time.

"I caught cold last week while mowing," writes P. T. Mallery, from Linden. "My chest was full of congestion, my throat was mighty sore, and I had the fiercest stitch in my side you could imagine. As a boy I was accustomed to have my mother use Nerviline for all our minor ailments, and remembering what confidence she had in Nerviline, I sent out for a bottle at once. Between noon and eight o'clock I had a whole bottle rubbed on, and then got into a perspiration under the blankets. This drove the Nerviline in good and deep, and I woke up next morning fresh as a dollar and absolutely cured. Nerviline is now always part of my traveling kit, and I will never be without it."

The large 50c. family size bottle is the most economical, or you can easily get the 25c. trial size from any dealer.

Not To Be Expected.

Underdog—His argument was mighty weak. Gobang—That's strange, too, when he has such a strong voice.

Ask for Minard's and take no other.

"I see that the police have orders to arrest all suspicious persons," said Gayboy. "What of that?" asked his wife. "Well, you had better look out, that's all."

I cured a horse of the Mange with MINARD'S LINIMENT. CHRISTOPHER SAUNDERS. Dalhousie.

I cured a horse, badly torn by a pitch fork, with MINARD'S LINIMENT. St. Peter's, C. B. EDW. LINLIE. I cured a horse of a bad swelling by MINARD'S LINIMENT. Bathurst, N.B. THOS. W. PAYNE.

Getting On.

"How did you come to buy that second-hand table?" exclaimed Mrs. Clumber's husband. "We don't need it."

"That shows how much you know," replied his wife. "In one of the drawers I found a bunch of the most select visiting cards in the city. They will look lovely in our hall."

Suspicious.

Mrs. Roxley—I'm afraid there's not much energy in that young man who is calling on our daughter. He doesn't seem to have much snap. Mr. Roxley—No, but I think he is after one, though.

MONTREAL, QUE.

ST. JOHN, N. B.

during the sitting of last week's court.

Mr. and Mrs. James Magill of Port Fairfield were guests of Mrs. Mary Wiley Sunday.

Many friends in Andover are very glad to hear that Fred Baird who has been so seriously ill in the hospital at Woodstock, is slightly improved in health. Mr. Baird was taken suddenly and seriously ill last Sunday and Friday he was removed to the hospital in Woodstock, where he underwent an operation for appendicitis. He was accompanied by Dr. Kilburn of Presque Isle, his nurse Miss Curry and his wife and mother. Mrs. G. T. Baird all hope for his complete recovery.

John Graham of Bairdsville was a business caller in Andover last Wednesday.

Mrs. Edgewood of Fredericton was called to Andover Thursday owing to the serious illness of her son-in-law, Fred Baird. She is the guest of Senator and Mrs. Baird.

Pringle Kelly was at Plaster Rock on business during the past week.

Patrick Lynch, Andover's genial mail carrier is having his house raised and painted and other improvements.

Senator Gallagher of Woodstock, during the past week has put a fine monument in Trinity burial ground in memory of the late Mrs. Stanley Waugh.

T. J. Carter, M. P. P. with a party of friends are spending a week fishing on the Restigouche.

D. B. Hopkins and W. H. Demings of Aroostook Junction were business visitors in Andover during the past week.

Mr. and Mrs. Thomas Allen were at Port Fairfield a short time Saturday afternoon.

H. G. Howard of Riley Brook is visiting friends in Andover and Riley Brook.

Miss Gertrude Tibbits and Miss Janet Curry who have been visiting friends in York Co. returned home Saturday afternoon.

Mr. and Mrs. Frank Tinker of St. John are expected in town today, Monday to be the guest of Mr. and Mrs. James Tibbits.

Among those who attended the

Gained 30 Lbs. in Few Weeks Never Felt So Well

Who Pale, Weak and Thin, and Had Nervous Headaches Before Using Dr. Chase's Nerve Food.

It is truly wonderful what Dr. Chase's Nerve Food does for women who are weak, weary and run down in health. New, rich blood is what is needed in nearly all such cases, and because Dr. Chase's Nerve Food forms new blood, it brings cure—not mere relief, but actual cure—in the great majority of such ailments.

With an abundance of rich, red blood coursing through the veins the nerves are strengthened and vigor and vitality are carried to every organ of the human body.

With the nerves properly nourished, headaches and neuritic pains disappear, appetite improves, digestion is good, you sleep and rest well, and gain in strength and weight.

Mrs. H. Latch, Cannington Manor, Sask., writes: "You will remember me writing you last spring. Well, I gave up my doctor and began using Dr. Chase's Nerve Food. This treatment cured me rapidly and I was soon myself again. I was pale, thin and weak, suffered from stomach troubles and liver complaints, and frequently had sick nervous headaches. I was surprised to find that in a few weeks' time I had gained 30 pounds in weight. I never felt so strong and well in all my life. Headaches never bother me any more, and I am grateful for the cure. If people would only give this medicine a fair trial, they would certainly be cured."

Everywhere people are talking about this great food cure, which cures in Nature's way, by supplying the ingredients to form new blood, and so overcome weakness and disease by an abundance of vitality. Dr. Chase's Nerve Food, 50c a box, 2 for \$1.00, all dealers or Edmanson, Bates & Co. Limited, Toronto.

Mr. Turcotte has his saw mill running again.

Vivian Carruthers is expected home this week.

Rev. J. P. Crabtree will preach in the Presbyterian church Sunday. Mr. Farley will be in St. Andrews for that Sunday.

Miss Florence DeWolfe of Portland is spending the summer with her sister, Mrs. J. R. Graham.

Mrs. Brasier and Miss Welch are visiting friends near Blue Bell this week.

Miss Annie Fraser was in Edmundston last Sunday.

W. Frie of "The Minto" is building on the corner of his lot and intends putting in a gasoline tank.

Percy Fraser formerly of this town, now of Edmundston, passed through here Wednesday on his way to Sussex.

Ronald Kirtson was in Quebec last week.

Mrs. C. A. Estey is home from Plaster Rock.

Mrs. Lou Smith returned to her home in Plaster Rock last week after a visit of two weeks with relatives in town.

J. H. Day has been quite sick for a few days.

The many friends here of Geo. Taylor formerly of this town, and recently with the Bank of Montreal, Perth, are pleased to learn of his promotion in being transferred to the Montreal branch of the Bank.

Report says that four of our enterprising people of the town propose buying new autos. The "Overland" seems to be the favorite this season.

The local play entitled "Facing the music" which was very successfully given here a few weeks ago and repeated at Edmundston, may later be presented at Perth.

Many local residences and other buildings have this summer been painted and otherwise renovated, which materially improve the appearance of our town.

The High School entrance examinations took place at the High School during last week. A considerable number, including some pupils from neighboring schools, wrote the papers. The town school closed for the summer vacation on Wednesday.

Roy Kirtson, formerly of this town and at present manager of the Bank of Montreal at Quebec City spent his vacation at his home here and with friends in this vicinity.

M. J. Powers, Jay R. Kirkpatrick and F. W. Hechler were in Perth last week.

J. E. Andrews is again manager of the Royal Bank of Canada here, after an extended vacation. Mr. Stubbs, of St. John, who during Mr. Andrews absence was in charge of the Bank, is now taking a vacation.

June showers bring July flowers. From "An Hilt of the Soft Water Barrel, and Other Poems by the Andover Sage."

A medical sharp writes that smoking before meals "renders the uncut bacon insensitive to alimentary stimulation, and neutralizes the olfactory gustatory reflexes." Now, if this is so, let's all quit.
