CALIFORNIA.
THE PROSPECTS OF CALIFORNIA.—There is no doubt that the emigration to and from California is very rapidly increasing at the present time. The facts, that the emigration of the last year is small, that the returns for capital invested are comparatively light, that some uncertainty and alarm has pervaded the public mind, and that the general profits to all classes have been lessened, though unpleasant and unfortunate, are not of serious import, when it is remembered that the yield of gold during the present year has been from twenty-five to fifty per cent. more than in the previous one, and that the agricultural and other resources of the country have been developed at least a thousand fold.

The excitement relative to California gold is now over. But California is still where she was, and just as rich in precious metal to-day, as she was prior to the extraction of the three hundred millions which have been taken from her soil. The gold which has been carried away, is as nothing—literally nothing—to that which remains; and the success of her miners, as a general thing, was never so great as on this very day. It is certain that more public attention has been attracted by the richness of the quartz discoveries within the month, than by the prospect in the placer.

We hear occasionally of fortunate strikes among the canons, by parties of explorers in search of new placer deposits, but we hear of, and public interest is more excited by, discoveries of quartz veins in different parts of the State.

The following mining article relates the prospects in the southern parts as accurately and as fully perhaps, as the present state of affairs in that region can be determined from the meagre reports in circulation.

The mines are yielding, at the present time, unexampled returns to industrial labor, and the aggregate yield for the next three months will be greater than in any previous corresponding period.

From Mokelumne Hill we have received the most cheering intelligence. The miners have discovered the ore in spots where they never before dreamed of looking for it, and it would appear from the accounts that there is not an inch of ground in that region where the soil is not strongly impregnated with the precious metal.

The accounts from the bars on the Tombstone and the Mariposa mines are quite gratifying. Business is brisk, and rich metal developments are daily made.

GRAND ROBBERY, MURDER, AND ARRESTS.
Information reached this city, on Saturday, that the Great Pacific Train of the Pacific Mail Steamship Company, which left the city, under guard, about 9 o'clock in the morning, had been attacked and robbed by a gang of robbers. Three of the guard had been shot, during the attack, by the robbers, and were lying by the road side. Two of them were shot in the breast and the third in the legs. The two shot in the breast were dying, and the other badly wounded.

The robbers succeeded in securing one box of gold dust, with which they made off into the woods, but the baggage heavy, and they being closely and hotly pursued, by the reinforced parties coming up to the train, they were obliged to abandon it, and make their escape. In attempting to do this, two of them were captured.

One of the men is a native of Dublin, Ireland, and his real name is Bartholomew Thomas. The name of Thomas Summers he assumed for his own purposes. He is about twenty-one years of age. He begged for his life, and then gave a full disclosure of the plot, giving the names of all the persons engaged in it, and all the particulars relative to the attack.

The other man is an intelligent negro from New York city, named Charles Cromwell. Names of the robber gang:

Bart Thomas, now in prison.
Charles Cromwell, black, from New York city, now in prison.
Dr. Berry, of New Orleans, has a wife in San Francisco.
Luban Manning, of Illinois, carpenter by trade.
Dr. Bert, or Burke, residence unknown.

Origin of the Penny Postage.—A traveller sauntering through the lake districts of England some years ago, arrived at a small public house just as the postman stopped to deliver a letter. A young girl came out to receive it. She took it in her hand, turned it over and over, and asked the charge. It was a large sum—no less than a shilling. Sighing heavily, she observed that it came from her brother, but that she was too poor to take it in, and she returned it to the postman accordingly. The traveller was a man of kindness as well as observation; he offered to pay the postage himself, and in spite of more reluctance on the girl's part than he could well understand, he did pay it, and gave her the letter. No sooner, however, was the postman's back turned, than he confessed that the proceeding had been concerted between her brother and herself; that the letter was empty; that certain signs on the direction conveyed all that she wanted to know, and that, as they could neither of them afford to pay postage, they had devised this method of franking the intelligence desired. The traveller pursued his journey, and as he plodded over the Cumberland Fells he mused upon the badness of a system which drove people to such straits for means of correspondence, and defeated its own object all the time. With most men such musings would have ended before the close of the hour, but this man's name was Rowland Hill, and it was from this incident and these reflections that the whole scheme of penny postage was derived.

THE STANDARD.

The St. John papers state that the Hon. Charles Simonds, speaker of the House of Assembly, and W. J. Ritchie, Esq. have resigned their seats, in consequence of the return of the Hon. R. D. Wilmet; and that Mr. Tilley will also send in his resignation. This course was very natural and proper to be pursued by these gentlemen, the more so, as they in their Address to the Electors in August last, said, "If you approve of the course adopted by them, (Wilmet & Gray) we will cheerfully resign into your hands the trust reposed in us, which, under such circumstances, we could neither hold with honour to ourselves or usefulness to you; and thereby enable you to supply our places with men willing and able to give our colleagues, and the Government to which they now belong, a hearty and efficacious support." A large majority of the people have given the most undeniable proof of their approval of the course adopted by the Hon. Messrs. Wilmet and Gray, and perhaps Messrs. Simonds & Co. may soon have some as strong proofs given them of the people's disapproval of their conduct, should they offer again as candidates for legislative honours.

We have much pleasure in publishing the following remarks on the Cattle Show and Fair of the St. Croix Agricultural Society, from a friend who was present on the occasion.

ST. CROIX AGRICULTURAL SOCIETY.

The first Annual Cattle Show and Fair of this Society, was held at St. Stephen on Thursday the 16th inst., and brought together a large assemblage of farmers and spectators, and also a goodly number of neat cattle and stock of various kinds, and a creditable display of roots, grains, &c. &c. A full report of the proceedings of the Fair will be published ere long for circulation, including a list of the premiums awarded and by whom received. In the mean time we merely notice some of the best articles exhibited, which it will appear compare favorably, and with reference to grains, exceed the best samples produced at the last annual Fair of the C. C. Society. It will be recollected that this is the first annual Meeting of this Society; that it has taken place in a lumbering community; that agriculture is in its infancy in this County generally, and more especially in this section of it, and that farming as a science is but just beginning to break through the clouds that have hitherto enveloped it. There is the testimony, nevertheless, of men from Calais, who are members of the Washington County Society, that its Fair held last week at Perry was inferior to our's in almost every particular; and the declaration of more than one person from St. Andrews, that this exhibition could compare not unfavourably with that of the C. C. Society of last year, though the latter Society is now venerable from its labors of more than 30 years duration to elevate the husbandman, and restore to his occupation its native and original dignity. With the facts before them that they can grow such grains as these: Wheat weighing per bushel, 65 lbs.; Barley, 55 lbs.; Buckwheat, 52 lbs.; Oats, 46 lbs.; Rye, 55 lbs.; and produce potatoes to the quantity of from 300 to 400 bushels to the acre; Turnips from 900 to 1000 bushels per acre, and Carrots to the same extent; the farmers of the upper Parishes may well hesitate before emigrating to Wisconsin or elsewhere to grow Wheat at 2s. 6d. per bushel. The stock of Horses on the ground fully showed that this County has produced as useful working animals as any that have been imported. Superior Sheep were exhibited, some the common breed of the country, and others trans-atlantic in their origin. We would passingly observe, that much improvement is necessary in the stock of Sheep in this country; the best lambs now are led to the butcher's stall. The show of Neat Cattle for a new Society was a fair one; but distinct breeds are much required. Scarcely a farmer in ten can tell to what breed his favorite milch Cow belongs. There were several fine Cows, and the Heifers were more than ordinary. Vegetables and Roots are not so good this year as usual; there were, however, some specimens of Potatoes, Carrots, Turnips and Onions which vouched alike for the care of the producer and the fertility of the soil. We

state with regret that there was but one sample of Cheese, notwithstanding the premiums offered thereon. This department of the dairy seems quite overlooked. In other parts of the Province as fine Cheeses are made as can be imported. Why will not the wives of our farmers resolve to release us from the further thralldom of Maine and Nova-Scotia Cheeses. They only lack the inclination, the ability they possess. A small box of excellent Honey was shown by J. H. Whitlock, Esq. The show of Homespuns Cloth, Sateen, &c., was admitted by every one present to be very good, and a variety of patterns was introduced. Homespuns might easily be made to supersede in a great measure the use of foreign Cloths. There were Gloves and Stockings, manufactured from flax grown in St. James. The Thread was quite smooth and fine, and promises to repay cultivation. Briefly we will mention some of the varieties of home-made articles sent to the Hall by the ladies both in town and country: A Calico Quilt attracted much attention; it was made this year by an old lady upwards of eighty-five years of age. Some girls who think themselves quite old enough for matrimony might learn a lesson from its excellent style. There were home-made Shaw's very creditable to the weaver. Rugs worked with much taste and of a pleasing pattern. Footstools, easy Chairs and Tables of much neatness and beauty, the work of young ladies, and Paintings evincing a degree of artistic skill that a prudent need not blush to avow. 25 was given in premiums to the ornamental and useful articles sent for exhibition by the ladies. The arrangements of the Fair were well made; it was well managed for notices, and passed off with general satisfaction. And, while it is a venture to express the hope that its immediate successor will exceed it in every particular, we cheerfully acknowledge that this Fair has done much credit to the farmers composing the Society.

A CURIOUS CIRCUMSTANCE.—Captain John Smith of the Trinity steamer told us yesterday, that on one of his late trips below, he discovered a body floating at a distance from the steamer, to which he immediately despatched a boat's crew, and found it to be the corpse of a sailor who had apparently been drowned in attempting to escape from his ship. The circumstances in which the body was found, are somewhat singular. It appears on dragging it into the boat, it was found that the individual had adopted the following novel plan for the purpose of buoying himself up in his perilous attempt; a cork fender was fastened to his breast, to sustain him, and a piece of board was lashed transversely across his thighs, on which he supposed he intended to rest himself while in the water. Thus accoutred he had launched forth, and getting overbalanced was helplessly drowned. The body was taken ashore at the Quarantine Station and interred, it being the opinion of the medical authorities there that the man had been a few hours in the water. Captain Smith told us of another body he found this season, floating in an upright position, with a bag of coals tied to the feet, but in a state of decomposition that he was obliged to inter it on a small island in the St. Lawrence, without attempting to examine it. — Gazette.

THE MOB.

The mob is a demon, fierce and ungovernable. It will not listen to reason; it will not be influenced by fear, or pity, or self preservation. It has no sense of justice. Its energy is exerted in frenzied fits; its forbearance is apathy or ignorance. It is a grievous error to suppose that this cruel, this worthless, hydra, has any political feeling. In its triumph it breaks windows, in its anger it creeps heads. Gratiuity and it creates a disturbance; it disappoints it and it grows furious; it attempts to appease it and it grows outrageous; it meets it boldly, and it turns away. It is accessible to no feeling but one of personal suffering; it submits to no argument but that of the strong hand. The point of the bayonet convinces; the edge of the sabre speaks keenly; the noise of the musketry is listened to with respect; the roar of artillery is "unanswerable." How deep, how grievous, how burdensome is the responsibility that lies on him who would rouse this fury from its den! It is astonishing, it is so little known how much individual character is lost in the aggregate character of a multitude. Men may be rational, moderate, peaceful, loyal and sober, as individuals; yet heap them by the thousands, and in the very progress of congregation, loyalty, quietness, moderation and reason evaporate, and a multitude of rational beings is an unreasoning monster, which may be driven, but not led, except to mischief—which has appetite for blood, and a savage joy in destruction, for the mere gratification of destroying.

LOOK OUT GIRLS.—Eliza Emery warns all the girls in the south and west—housewives, buckeyes, and all—to look out for their gay, deceiving, runaway husband David. She says that he has cruelly left her, and told

he folks, when he started, that he was going south-east to preach universal salvation, and marry a hoosier. Elizabeth thinks he may easily be known, and to prove it says, "David has a scar on his nose, where I scratched it."

POETRY.

OH, LISTEN!
Hear and heed the orphan's cry,
Breathe for him soft pity's sigh,
Soothe his woes, and quell his fear,
Whispering that a friend is near!

Ye whose darling dwells above,
Early taken from your love,
Oh, receive the orphan lone,
Bless him; shield him, as your own!

Let him of your bounty share,
For his mind and morals care;
God a rich reward bestows,
When we heal another's woes!

In the far-off future, he
May be strength and joy to thee,
And the orphan's powerful arm
May preserve thee then from harm.

Severed from his mother's breast,
Like the ivy needing rest,
Did him round thy heart entwine—
God will prosper thee and thine!

A PERSIAN AMBASSADOR IN ENGLAND.

Some excitement among the fashionable and political circles in England has just been created by the arrival in that country of an Ambassador from Persia, with a view to promote the arrangement and settlement of commercial relations between the two countries. The name which he rejoices in, is Shetish Khan, and an interesting description of the appearance of this distinguished stranger is thus given in the latest London papers:

"As an accredited ambassador direct from the court of Teheran has never been known in this country, some considerable interest was excited at Southampton by the arrival of his Excellency. He is a fine, handsome man, about forty years of age. He was dressed in the costly and picturesque costume worn by the highest ranks in Persia. The sleeves and collar of his cloak were ornamented with gold embroidery; the clasp of his girdle was studded with diamonds, and a brilliant star was suspended on his breast. He wore the high, conical cap of the Persian country. He was accompanied by a dragoman and a servant. An extensive suite accompanied him from Persia to Turkey, nearly the whole of which he took leave of, at Constantinople. The ambassador reached Constantinople by way of Trebizond and the Black Sea. During his voyage in the Euxine, he sat at the table in the saloon with the other passengers, and was not more particular in his diet than liberal Mussulmen usually are. He drank his tea out of a glass tumbler, making it sweet and hot, without milk or cream. He rigorously abstained from wines and spirituous liquors. He smoked much. His manners on board during the voyage were extremely gentlemanly, and he is evidently a man of education and refinement. He cannot speak English. His secretary, and who acted as dragoman, is a true born Persian, and was educated in India. His Excellency is a Mussulman, belonging to the great Mahomedan sect of Ali. He is remarkably strict in his religious observances. Every evening while on board on the Euxine, he prostrated himself and said prayers for about two hours. He had a number of ornaments in his possession, adorned with jewels and precious stones. One of these ornaments contained an emerald as large as a small plum. Most of these had been presented to him by the Shah of Persia, to mark the favor and esteem of his sovereign."

NEVER IN A CHURCH.—A friend of ours, just returned from the country, relates a ludicrous instance of ignorance on the part of a man, who was born and always lived in a Christian community, but who had never attended church. Last Sunday, while the minister was engaged in prayer, the congregation was startled from their usual decorum by a loud rapping and upon the sexton's proceeding to the door to ascertain the cause, in stalked, to the astonishment of the whole assembly, "Long Jake," as he is familiarly known in those parts. Quite a sensation was created by his novel appearance, and many curious eyes strayed out to the corner where he sat in stupid wonder till the meeting was dismissed, when with becoming gravity, he stepped up to the minister, and made him a present of ninepence.—Boston Journal.

GLASS.—What is called Soluble glass is now beginning to come into use as a covering for wood, and other practical purposes. It is composed of fifteen parts of powdered quartz, ten of potash, and one of charcoal. These are melted together, worked in cold water, and then boiled with five parts of water, in which it is entirely dissolved. It is

Subscribers, who do not give express notice to the contrary, are considered wishing to continue their subscriptions. If subscribers order the discontinuance of their papers, the publisher may continue to send them till all arrearages are paid. If subscribers neglect of refuse to take their papers from the office to which they are directed, they are held responsible till they have settled their bills, and ordered the papers to be discontinued. If subscribers remove to other place without informing the publisher, and the paper is sent to the former direction, they are held responsible.

A gentleman named Alfred Clarke, a resident of Taunton, Eng., for many years a staunch adherent of Roman Catholic Church has publicly renounced that communion and been openly received into the fellowship of the Church of England.

Dead Letters.—Eight hundred and twenty bushels of dead letters were burnt in the open air at Washington, the other day, for want of owners. The postoffice authorities have decided that dead letter letters like dead men, should tell no tales; and so fire was set in the mountain of letter-press. Supposing that each letter of the 820 bushels contained "a peck of love," how many sighs went up in that flame!

A Fatal Jest.—A young lady in one of the seminaries of New York, indulged in the pleasure of frightening a school mate, by appearing before her in the solemn dress of the grave. So perfect was the deception, so terrible the shock, that the frightened young lady fell senseless to the floor, and has not yet recovered her reason. It is feared that she is a maniac for life. The silly and heartless girl who committed the mischief, should be sent to the penitentiary for as long time as her victim is confined by madness, even if it be to the end of her life.—Boston Courier.

TOUGH TURKEY.—We have heard many stories about tough turkeys, but we think the following will cap all that have ever come within our knowledge. Some few weeks ago Mr. Joseph Harvey, Jr., Upper Corner, lost a fine old gobbler, and supposing it had been stolen by a two or four legged animal, he gave it up as lost. A few days ago, however, he accidentally discovered the old bird—pinned in among some lumber under a barn, he could neither go ahead nor back out, and had been in this position three weeks without food or drink; strange to say he is yet alive, and is now doing well.—Carleton Sentinel.

A Discovery in Surgery.—A Prussian named Aran is said to have recently made a discovery in surgery that is exciting considerable interest in the scientific circles of Berlin. It is application of chlorine to relieve pain. Unlike Chloroform it can be used without the least danger to the patient, and is very effectual in its operation. From the account, a small quantity of the fluid (from ten to twenty drops) is dropped on the part affected, or on a lint bandage slightly moistened with water, and then applied, and all bound up in oil silk, and a linen band. A few from two to ten minutes the part becomes insensible, and the pain is no longer felt, whether it be from rheumatism, nervous, or other disorders. After a time, it returns again but usually weaker, and with several applications, it is often entirely relieved. The discoverer has presented a memorial on the subject to the Academy at Paris.

MANURE FOR FRUIT TREES.—What is the best manure for fruit trees, to spade or work in near the roots, of general application? The following has been found, after several years' experience, to constitute one of the best manures for fruit trees generally: A mixture of peat or swamp muck, with one-half to one-quarter of its bulk of stable manure, and about one-twentieth of each of ashes. These ingredients should lie in a heap together for a few weeks, and then be worked over. If for peach trees, the soap-suds from the laundry thrown over the heap will improve it. If for cherry trees, which will not bear high manuring, the proportion of peat or muck should be larger, and with less of yard manure and ashes.

There are some other ingredients, which occasionally may be added to advantage, as ground or dissolved bones, night soil, &c., where a strong manure is needed.

New Plan for a Newspaper.—A printer in Boston is about to start a paper in which one column in each number shall be given to profane and grumbling correspondents. He will allow each correspondent to swear as roundly, and grumble as bitterly as he pleases in the space of four lines. In this way he thinks a "spicy" column would be maintained, and the paper become the most popular one in the country.

"No enjoyment," says Sydney Smith, however inconsiderable, is confined to the present moment. A man is the happier for life from having made once an agreeable tour, or lived any length of time with pleasant people, or enjoyed any considerable interval of innocent pleasure.

Advertising is to business what steam is to navigation—the great propelling power—it puts life and motion into all that comes within its reach.

The first Annual Cattle Show and Fair of this Society, was held at St. Stephen on Thursday the 16th inst., and brought together a large assemblage of farmers and spectators, and also a goodly number of neat cattle and stock of various kinds, and a creditable display of roots, grains, cloths, &c. &c. A full report of the proceedings of the Fair, will be published ere long for circulation, including a list of the premiums awarded and by whom received. In the mean time we merely notice some of the best articles exhibited, which it will appear compare favorably, and with reference to grains exceed the best samples produced at the last annual Fair of the C. C. Society. It will be recollected that this is the first annual Meeting of this Society; that it has taken place, in a lumbering community; that agriculture is in its infancy in this County generally, and more especially in this section of it, and that farming as a science is but just beginning to break through the clouds that have hitherto enveloped it.

There is the testimony, nevertheless, of men from Calais, who are members of the Washington County Society, that its Fair held last week at Perry was inferior to our's in almost every particular; and the declaration of more than one person from St. Andrews, that this exhibition could compare not unfavorably with that of the C. C. Society of last year, though the latter Society is now venerable from its labors of more than 30 years duration to elevate the husbandman, and restore to his occupation its native and original dignity. With the facts before them that they can grow such grains as these: Wheat averaging per bushel, 65 lbs.; Barley, 55 lbs.; Buckwheat, 52 lbs.; Oats, 46 lbs.; Rye, 55 lbs.; and produce potatoes to the quantity of from 300 to 400 bushels to the acre; Turnips from 900 to 1000 bushels per acre; and Carrots to the same extent; the farmers of the upper Parishes may well hesitate before emigrating to Wisconsin or elsewhere to grow Wheat at 2s. 6d. per bushel. The stock of Horses on the ground fully showed that this County has produced as useful working animals as any that have been imported. Superior Sheep were exhibited, some the common breed of the country, and others transatlantic in their origin. We would passingly observe, that much improvement is necessary in the stock of Sheep in this country; the best lambs now are led to the butcher's stall. The show of Neat Cattle for a new Society was a fair one; but distinct breeds are much required. Scarcely one farmer in ten can tell to what breed his favorite milch Cow belongs. There were several fine Cows, and the Heifers were more than ordinary. Vegetables and Roots are not so good this year as usual; there were, however, some specimens of Potatoes, Carrots, Turnips and Onions which evinced alike for the care of the producer and the fertility of the soil. State with regret that there was but one sample of Cheese, notwithstanding the premiums offered thereon. This department of the dairy seems quite overlooked. In other parts of the Province as fine Cheeses are made as can be imported. Why will not the wives of our farmers resolve to release us from the further thralldom of Maine and Nova-Scotia Cheese. They only lack the inclination; the ability they possess. A small box of excellent Honey was shown by J. H. Whitlock, Esq. This honey of Honespun Cloth, Sateen, &c. was admitted by every one present to be very good, and a variety of patterns was introduced. Honespun might easily be made to supersede in a great measure the use of foreign Cloths. There were Gloves and Stockings manufactured from flax grown in St. James. The Thread was quite smooth and fine, and promises to repay cultivation. Briefly we will mention some of the varieties of home-made articles sent to the Hall by the Ladies both in town and country: A Calico Quilt attracted much attention; it was made this year by an old lady upwards of eighty-five years of age. Some girls who think themselves quite old enough for matrimony might learn a lesson from its excellent style. There were home-made Shawls, very creditable to the weaver. Rugs worked with much taste and of a pleasing pattern. Footstools, easy Chairs and Tables of much neatness and beauty, the work of young ladies, and Paintings evincing a degree of artistic skill that a proficient need not blush to avow. A5 was given in premiums to the ornamental and useful articles sent for exhibition by the ladies. The arrangements of the Fair were well made; it was well managed for notices, and passed off with general satisfaction, and while we venture to express the hope that its immediate successor will exceed it in every particular, we cheerfully acknowledge that this Fair has done much credit to the farmers composing the Society.

Quebec Oct. 17.
A CURIOUS CIRCUMSTANCE.—Captain John Smith, of the Trinity steamer Doris, told us yesterday, that on one of his late trips below, he discovered a body floating at a distance from the steamer, to which he immediately despatched a boat's crew, and found it to be the corpse of a sailor who had apparently been drowned in attempting to escape from his ship. The circumstances in which the body was found, are somewhat singular. It appears on dragging it into the boat, it was found that the individual had adopted the following novel plan for the purpose of buoying himself up in his perilous attempt; a cork-leader was fastened to his breast, to sustain him, and a piece of board was lashed transversely across his thighs, on which we suppose he intended to rest himself while in the water. Thus accoutred he had launched forth, and getting overbalanced was helplessly downed. The body was taken ashore at the Quarantine Station and interred, it being the opinion of the medical authorities there that the man had been a few hours in the water. Captain Smith told us of another body he found this season, floating in an upright position, with a bag of coals tied to the feet, but in such a state of decomposition that he was obliged to inter it on a small island in the St. Lawrence, without attempting to examine it.

THE MOB.
The mob is a demon, fierce and ungovernable. It will not listen to reason; it will not be influenced by fear, or pity, or self preservation. It has no sense of justice. Its energy is exerted in frenzied fits; its forbearance is apathy or ignorance. It is a grievous error to suppose that this cruel, this worthless, hydra, has any political feeling. In its triumph it breaks windows, in its anger it cracks heads. Gratiuity and it creates a disturbance; it disappoints it and it grows furious; attempt to appease it and it grows outrageous; meet it boldly, and it turns away. It is accessible to no feeling but one of personal suffering; it submits to no argument but that of the strong hand. The point of the bayonet convinces; the edge of the sabre speaks keenly; the noise of the musketry is listened to with respect; the roar of artillery is unanswerable. How deep, how grievous, how burdensome in the responsibility that lies on him would rouse this fury from its den! It is astonishing, it is so little known how much individual character is lost in the aggregate character of a multitude. Men may be rational, moderate, peaceful, loyal and sober, as individuals; yet heap them by the thousands, and in the very progress of congregation, loyalty, quietness, moderation and reason evaporate, and a multitude of rational beings is an unreasonable and intemperate being—a wild infuriated monster, which may be driven, but not led, except to mischief—which has appetite for blood, and a savage joy in destruction, for the mere gratification of destroying.

Look out Girls.—Eliza Emery warns all the girls in the south and west—housewives, butchers, and all—to look out for her gay, deceiving, runaway husband David. She says that he has cruelly left her, and told

he folks, when he started, that he was going south-east to preach universal salvation and marry a hoosier. Elizabeth thinks he may easily be known, and to prove it says, "David has a scar on his nose, where I scratched it."

POETRY.
OH, LISTEN!
Hear and heed the orphan's cry,
Breathe for him soft pity's sigh,
Soothe his woes, and quell his fear,
Whispering that a friend is near!

Ye whose darling dwells above,
Early taken from your love,
Oh, receive the orphan's love,
Bless him, shield him, as your own!

Let him of your bounty share,
For his mind and morals care;
God a rich reward bestows,
When ye heal another's woes!

In the far-off future, ho!
May be strength and joy to thee,
And the orphan's powerful arm
May preserve thee then from harm.

Severed from his mother's breast,
Like the ivy needing rest,
Bid him round thy heart twine—
God will prosper thee and thine!

A PERSIAN AMBASSADOR IN ENGLAND.—Some excitement among the fashionable and political circles in England has just been created by the arrival in that country of an Ambassador from Persia, with a view to promote the arrangement and settlement of commercial relations between the two countries. The name which he rejoices in, is Shetish Khan, and an interesting description of the appearance of this distinguished stranger is thus given in the latest London papers:

"As an accredited ambassador direct from the court of Teheran has never been known in this country, some considerable interest was excited at Southampton by the arrival of his Excellency. He is a fine, handsome man, about forty years of age. He was dressed in the costly and picturesque costume worn by the highest ranks in Persia. The sleeves and collar of his cloak were ornamented with gold embroidery; the clasp of his girdle was studded with diamonds, and a brilliant star was suspended on his breast. He wore the high, conical cap of the Persian country. He was accompanied by a dragoman and a servant. An extensive suite accompanied him from Persia to Turkey, nearly the whole of which he took leave of at Constantinople. The ambassador reached Constantinople by way of Trebizond and the Black Sea. During his voyage in the Euxine, he sat at the table in the saloon with the other passengers, and was not more particular in his diet than liberal Mussulmen usually are. He drank his tea out of a glass tumbler, making it sweet and hot, without milk or cream. He rigorously abstained from wines and spirituous liquors. He smoked much. His manners on board during the voyage were extremely gentlemanly, and he is evidently a man of education and refinement. He cannot speak English. His secretary, and who acted as dragoman, is a true born Persian, and was educated in India. His Excellency is a Musselman, belonging to the great Mahomedan sect of Ali. He is remarkably strict in his religious observances. Every evening, while on board on the Euxine, he prostrated himself and said prayers for about two hours. He had a number of ornaments in his possession, adorned with jewels and precious stones. One of these ornaments contained an emerald as large as a small plum. Most of these had been presented to him by the Shah of Persia, to mark the favor and esteem of his sovereign."

NEVER IN A CHURCH.—A friend of ours, just returned from the country, relates a ludicrous instance of ignorance on the part of a man, who was born and always lived in a Christian community, but who had never attended church. Last Sunday, while the minister was engaged in prayer, the congregation was startled from their usual decorum by a loud rapping and upon the sexton's proceeding to the door to ascertain the cause, in strolled, to the astonishment of the whole assembly, "Long Jake," as he is familiarly known in those parts. Quite a sensation was created by his novel appearance, and many curious eyes strayed out to the corner where he sat in stupid wonder till the meeting was dismissed, when with becoming gravity, he stepped up to the minister, and made him "present of ninepence."—Boston Globe.

GLASS.—What is called Soluble glass is now beginning to come into use as a covering for wood, and other practical purposes. It is composed of fifteen parts of powdered quartz, ten of potash, and one of charcoal. These are melted together, worked in cold water, and then boiled with five parts of water, in which it is entirely dissolved. It is

then applied to woodwork, or any other required substance. As it cools, it gelatinizes, and dries up into a transparent coldless glass on any surface to which it has been applied. It renders wood nearly incombustible.

A gentleman named Alfred Clarke, a resident of Taunton, Eng., for many years a staunch adherent of Roman Catholic Church has publicly renounced that communion and been openly received into the fellowship of the Church of England.

Dead Letters.—Eight hundred and twenty bushels of dead letters were burnt in the open air at Washington, the other day, for want of owners. The post office authorities have decided that dead letter letters like dead men, should not be taken; and so fire was set to the mountain of epistles. Supposing that each letter of the 820 bushels contained "a peck of love," how many sights went up at that flame!

A Fatal Jest.—A young lady in one of the seminaries of New York, indulged in the pleasantry of frightening a school-mate, by appearing before her in the solemn dress of the grave. So perfect was the deception, so terrible the shock, that the frightened young lady fell senseless to the floor, and has not yet recovered her reason. It is feared that she is a maniac for life. The silly and headstrong girl who committed the mischief, should be sent to the penitentiary for as long time as her victim is confined by madness, even if it be to the end of her life.—Boston Courier.

TOUGH TURKEY.—We have heard many stories about tough turkeys, but we think the following will cap all that have ever come within our knowledge. Some few weeks ago Mr. Joseph Harvey, Jr., Upper Corner, lost a fine old gobbler, and supposing it had been stolen by a two or four legged animal, he gave it up as lost. A few days ago, however, he accidentally discovered the old bird jammed in among some lumber under a barn, he could neither go ahead nor back out, and had been in this position three weeks without food or drink; strange to say he is yet alive and is now doing well.—Carlton Sentinel.

A DISCOVERY IN SURGERY.—A Prussian named Aran is said to have recently made a discovery in surgery that is exciting considerable interest in the scientific circles of Berlin. It is application of chlorine to relieve pain. Unlike Chloroform it can be used without the least danger to the patient, and is very effectual in its operation. From the account, a small quantity of the fluid (from ten to twenty drops) is dropped on the part affected, or on a lint bandage slightly moistened with water, and then applied, and all bound up in oil silk, and a linen band. After from two to ten minutes the part becomes insensible, and the pain is no longer felt, whether it be from rheumatism, nervous, or other disorders. After a time, it returns again but usually weaker, and with several applications, it is often entirely relieved. The discoverer has presented a memorial on the subject to the Academy at Paris.

MANURE FOR FRUIT TREES.—What is the best manure for fruit trees, to spade or work in near the roots, of general application? The following has been found, after several years' experience, to constitute one of the best manures for fruit trees generally: A mixture of peat or swamp muck, with one-half to one-quarter of its bulk of stable manure, and about one twentieth of leached ashes. These ingredients should lie in a heap together for a few weeks, and then be worked over. If for peach trees, the soap-suds from the laundry thrown over the heap will improve it. If for cherry trees, which will not bear high manuring, the proportion of peat or muck should be larger, and with less of yard manure and ashes.

There are some other ingredients, which occasionally may be added to advantage, as ground or dissolved bones, night soil, &c., where a strong manure is needed.

New Plan for a Newspaper.—A printer in Boston is about to start a paper in which one column in each number shall be given to profane and grumbling correspondents. He will allow each correspondent to swear as roundly, and grumble as bitterly as he pleases in the space of four lines. In this way, he thinks a "spicy" column would be maintained and the paper become the most popular one in the country.

"No enjoyment," says Sydney Smith, however inconsiderable, is confined to the present moment. A man is the happier for life from having made once an agreeable tour, or lived any length of time with pleasant people, or enjoyed any considerable interval of innocent pleasure.

Advertising is to business what steam is to navigation—the great propelling power. It puts life and motion into all that comes within its reach.

CANADIAN CABINET.

The Quebec Chronicle says, the new ministerial mixture has been reshaped. The chief ingredients are the same; but there are some additions and some changes, as will be perceived by the following remarks and new list from the Montreal Herald:—

"It will be remembered that our list was only complete in so far as the Upper Canada section of the Cabinet was concerned. We have it now in our power to add to that list the name of our fellow citizen, Mr. J. Young, who has been offered and we understand has accepted the office of Chief Commissioner of Public Works. Aside from all party politics we know of no man in Canada who from his energy, enterprise, and knowledge of the trade and resources of the country, as well as practical experience in aiding to develop its resources, is in every way so competent to perform the duties of the office as Mr. Young."

The full list of the Council, as at present intended, stands thus:

President—Hon. Malcom Cameron;
Attorney General—Hon. L. T. Drummond;

Attorney General West—Hon. W. Richard;
Secretary—Hon. N. A. Morin;
Receiver General—Hon. Mr. Tache;
Inspector General—Hon. F. Hincks;
Postmaster General—Hon. Jas. Morris;
Commissioner Crown Lands—Hon. John Rolph;

Commissioner Public Works—Hon. J. Young;
Solicitor General West—Hon. J. O. Ross;
Solicitor General East—Messrs. Cartier and Chabreuil; talked of, probably no decision yet.

Scarcely had we credibly informed in our last issue an incredulous public, that His Excellency the Governor General would not leave for Quebec until this morning, than it was ascertained that His Excellency had actually left the Queen City of the West for this, the Gibraltar of North America. His Excellency was at that very moment, indeed, shaking hands with the good people of Toronto, the Hon. Francis Hincks, the Inspector General, standing by his side. Speaking of His Excellency, it gives us pleasure to notice a tribute of respect paid him by the Montreal Courier. During his residence in Toronto, says our Montreal contemporary, he has been distinguished for the quiet and unostentatious urbanity of his manners towards all ranks. By the way, we find in the Globe a long account of the turning of the first sod of the Northern Railroad by Lady Elgin, Lord Elgin being present. The celebration appears to have been quite a grand affair. There was a grand procession; a fine address, an excellent speech from the Governor General in reply, and a magnificent ball in the evening.

Lord Elgin in his reply happily remarked that it might seem a singular application of the division of labor, that the lady should dig and the gentleman speak. 20,000 persons it is said were present on the occasion, and we may mention for the information of our City Fathers who are waiting in public spirit to a piteous extent, that the City of Toronto has given a gratuity of \$25,000 towards the construction of the road, and pledged its credit for \$35,000 more for the same object. His Excellency's arrival here may shortly be expected.

Orphan's Asylum Burned.—On the morning of the 15th inst., a fire broke out in the Orphan's Asylum at Cincinnati, which destroyed the building. The building contained one hundred and six boys, many of whom saved themselves by jumping out of the windows. Six, it is feared, perished in the flames. Three bodies have been found in the ruins. Many of those saved were badly burned, or otherwise injured.

LETTER FROM THE MEXICAN FRONTIER.—New Orleans Oct. 21.—The steamship Fanny brings Rio Grande and Brownsville dates to the 15th. Letters from the Rio Grande give formidable accounts of the success of the Revolution. Capt. Ford's Company of Texan Rangers had joined Garavajal, as had also many deserters from Fort Kinross. His forces were being daily augmented. Advice from Galveston to the 17th report that Wild Cat and his followers had joined the Mexican government against the Sierra Madre insurgents. The Indians in Western Texas were committing many depredations.

MELANCHOLY ACCIDENT.—Mr. Jno. McDonald, a young man belonging to Pictou Island, and employed in Mr. Ross's freestone quarry at that place, had both his legs broken in a shocking manner by a large stone falling on him on Wednesday last. He was conveyed to Pictou as soon as possible, where he was waited on by Doctor Johnston; but locked jaw ensued on the following morning, in which state he continued until Friday night, when he expired. On Saturday his remains were taken back to Pictou Island for interment. He was aged about 21 years, and is the fourth son cut off from his bereaved parents within twelve months. (Eastern Chronicle.)

REGIMENTS FOR FOREIGN SERVICE.—The following regiments will take place in the spring of 1852:—Royals, 24th Battalion, Cork to Nova Scotia; 40th Regiment, Cork to Malta; 85th Regiment, Portsmouth to Malta; 57th Regiment, Cork to Gibraltar; 31st Regiment, Cork to Gibraltar; 76th Regiment, Malta to Nova Scotia; 24th Regiment, Gibraltar to Canada; 42 Regiment, Nova Scotia home; 97th Regiment, Nova Scotia home, Rifle Brigade, 2d Battalion, Canada home.

On the 9th inst., a Miss Cushman, said to belong to Boston, commenced the task of walking 500 miles in 500 hours, in St. Louis. She goes in Bloomer costume.

NEW-BRUNSWICK SOCIETY.

For the Encouragement of Agriculture, Home Manufactures and Commerce throughout the Province.

At a Special Meeting of this Society, held on the 15th inst., in the County Court House, pursuant to notice, for the purpose of considering the propriety of taking measures for holding a Grand Exhibition of Agricultural Productions, Natural Resources, Arts and Industry, at the City of Fredericton, in the course of the year 1852, the following Resolutions were moved and passed unanimously, R. Chestnut, Esq. Vice President, in the Chair:—

Moved by Honorable Judge Street, and seconded by D. S. Kerr, Esquire:—

1st. Resolved, That this Society immediately proceed with preparatory and efficient steps for having a General Exhibition of the Industry of the whole Province, under the form of a General Show and Fair, in the year 1852, agreeably to the 8th Article of the Constitution of this Society; and the 5th, 6th and 7th Sections of the Act of Incorporation, 31 Vict cap 62, Resolution of March 1850, and Report 4th April 1851. See Society's Journal, p. 12, 89, 194, and Prov Laws, 1850, p. 103.

Moved by J. A. Beckwith, Esquire, and seconded by W. Carman, Esquire:—

2nd. Resolved, That such Exhibition is intended to embrace all kinds of Agricultural, Mechanical and Domestic Productions, and Works of Art and science, and every product worthy of observation, manufactured and unmanufactured, within the Resources of this Province, together with an account of the quantity available for supply, and the prices thereof, with a view to a sale or ultimate market for such articles.

Moved by Honorable Judge Parker, and seconded by Colonel Hayton:—

3rd. Resolved, That His Excellency Sir Edmund W. Head, the distinguished Patron of this Society, be waited on with a copy of the proceedings of this Meeting, and respectfully solicited to advise and co-operate with this Society in the design of having such Exhibition as complete and extensively beneficial in all parts of the Province as possible.

Moved by W. Watts, and seconded by Honorable Judge Wilmot:—

4th. Resolved, That the General Committee of this Society by its Constitution comprising the Legislative Council and Members of the House of Assembly in the respective Counties which they represent and in their capacity are especially requested to take a leading part and give their individual aid in promoting the objects in their Counties respectively.

Moved by the Attorney General, and seconded by C. Macpherson, Esquire:—

5th. Resolved, That the respective County Agricultural Societies throughout New Brunswick, the Mechanics' Institute, as also the several Mechanics' Institutes in different parts of the Province, Manufacturing Companies, and others who feel an interest in the welfare and advancement of this Province, are hereby invited to join with this Society in promoting the object in view.

Moved by J. Gregory, Esquire, and seconded by D. S. Kerr, Esquire:—

6th. Resolved, That the Corresponding Secretary be requested to prepare a Schedule of Articles suitable for exhibition, on the plan of the Industrial Exhibition of Great Britain, and submit the same to the Annual Meeting of this Society in January next.

Moved by J. Allen, Mayor, and seconded by J. Taylor, Esquire:—

7th. Resolved, That the Corresponding Secretary, John A. Beckwith, Esq., Hon. Judge Wilmot, Hon. W. H. Odell, Colonel MacLaughlin, D. S. Kerr, Esq., James Taylor, Esq. and John Grant, Esq., be a Special Committee to select the necessary Show Grounds, and kind of Building for the Exhibition, and report on the same, with Plans and estimates of the probable expense thereof, at the Annual Meeting in January next.

Moved by Dr. Robb, and seconded by G. Roberts, Esq.:—

8th. Resolved, That in addition to the Officers, Bearers and Committees of this Society, Local Committees be appointed in the different Counties of the Province to attend to the interests of the said Exhibition.

Moved by T. R. Barker, Esquire, and seconded by the Attorney General:—

9th. Resolved, That the Corresponding Secretary forthwith correspond with the Vice President of this Society, County Agricultural Societies, the several Mechanics' Institutes, Local Committees, Manufacturing Establishments, and individuals in different parts of the Province, to obtain their suggestions and active co-operation in respect to the said Exhibition.

Moved by D. S. Kerr, Esquire, and seconded by Honorable Judge Street:—

10th. Resolved, That Subscription Lists be opened by the Local Committees in different parts of the Province to raise a fund for the specified purpose of aiding to transmit articles to the Exhibition where it may be required, and for the general purposes of such Exhibition.

Moved by R. Fulton, Esquire, and seconded by J. A. Beckwith, Esquire:—

11th. Resolved, That the respective Editors of Newspapers in different parts of the Province are hereby respectfully requested to give publicity to the foregoing Resolutions, for the information of the public at large.

R. FULTON, Secretary.

CONSECRATION.—The new Episcopal Church in Lower Cove was consecrated on Wednesday 1st, by the Lord Bishop of the Diocese, assisted by the Rev. Rector of the Parish, the Rev. Mr. Armstrong, (the appointed Minister of the Church), and a number of other Clergy men. Divine service will be held in the Church to-morrow, when a collection will be made in aid of its funds. This beautiful edi-

fice has been finished in a most neat and substantial manner, and will prove quite an ornament to that part of the City.—New Bkr.

THE STANDARD.

ST. ANDREW'S, WEDNESDAY, OCT. 29, 1851

THE MUNICIPAL LAW,—which has been published in full in our paper, has, as far as we can learn, been generally approved of by the people of this County; we understand that the Requisitions to the Sheriff-praying "that a public meeting be called for the purpose of taking into consideration the propriety of incorporating the County," will be sent by the 1st of November. "The attempts of the few, (who are wedded to old-fashioned systems of mismanagement), to balk the introduction of Municipal Law into this County, have signally failed. The principal argument urged by them against the Act is its expense, while the provisions distinctly state, that the first officers—the Councillors—are not to receive any remuneration for their services. But it is said their greatest objections are because they know they will not be elected by the people, and that a number of nice little pickings, which have been enjoyed by them for years, will no longer fall into their pockets; another reason is, that, under the Act, no person can hold more than one County office, nor have any interest in any County works. If we take for example any County where the Municipal Act is in operation, it will be found that it works well; is cheaper, and more to the satisfaction of the people, than the old irresponsible system.

THE WEATHER.—for the last few days has been cold and wet. On Sunday morning rain commenced falling, with a strong S. E. wind, and continued until Monday afternoon, when snow fell until late at night, covering the streets an inch deep. The snow has, however, since disappeared, under the rays of the sun.

Our thanks are due to John Simpson Esq., Queens Printer, for a copy of the "Report of Augustus F. Kynaston, acting Commander of Her Majesty's sloop "Persian" to His Excellency the Lieutenant Governor, on the fisheries of the Bay of Fundy." In our next we will give some extracts from this Report.

MADRAS SCHOOL.—We beg leave to direct attention to the advertisement of Mr. G. W. Serinor, principal of the Madras School. Mr. S. brings with him the best testimonials as to character and success in teaching.

Our columns this week do not contain the usual amount of local and foreign news; we will endeavour to make up for the deficiency. Advertisements coming in at a late hour obliges us to defer articles in type for our present number.

The Charlotte County Agricultural Society held its Annual Cattle Show and Fair, yesterday, at the Poor House Farm. Owing to the late hour of awarding the Premiums, we are unable to publish a list in to-day's paper, but will endeavour to give full particulars in our next number.

The Cows and Sheep of improved breeds, imported from Great Britain, by the Charlotte County Agricultural Society, arrived in the ship Themis at St. John last week. Members of the Society and others who have seen them, state that they are superior animals. The Cows have since arrived here, and are at Mr. Hugh Stevens's.

TRACTARIANS IN THE PROVINCES.—We copy the following paragraph from the St. John Courier of the 25th inst. It will not surprise some to know that Puseyism in disguise stalks abroad amongst us; but the soil we believe of our Province is not rank enough to grow this noxious weed. The Courier says:—

"It is currently reported that at the late meeting of Anglican Bishops in Quebec, it was decided to remonstrate against the decision of H. M. Council and the two Archbishops in the Gorham case, and that a remonstrance was agreed upon and transmitted to England, thus identifying the Bishops with the Exeter tractarian party. The Bishops of Nova Scotia and Prince Rupert's Land declined to attend the meeting."

Reporting and Publishing the Debates.—We understand that the committee have received two tenders for the service—one from Mr. Simpson, naming Mr. Hogg as Legislative Reporter, and Messrs. Grigor & Anglin for the House—Mr. Anglin tenders for the House only, and does not allude to the respective Reporters. We think there can be no question as to which of these two tenders should be accepted. It is well known that Mr. Simpson is better prepared to get up matters of this kind than any other party in the Province, and if his tender is accepted, the public will have a full and faithful report of all that is going on in both branches of the Legislature; his reporters are well selected, and would give general satisfaction. So far

as Mr. Anglin is concerned, he is doubtless a good reporter, but he has not named his associates, and he offers to report for the Assembly alone; we want a report of the doings in the Council as well as in the House. By accepting Mr. Simpson's offer a great difficulty would be avoided, which is, that if the debates of the House only are published by this contract, some one will report and publish the doings of the Legislative Council, and near the close of the session, up will come that vexed question again, "Paying a Reporter."—For these reasons we think Mr. Simpson's tender should be accepted in preference to Mr. Anglin's.—(Carleton Sentinel.)

The Steamship Niagara arrived at New York, on Saturday morning with dates to the 11th inst.

The Steamship Pacific has arrived at New York with dates to the 15th inst.

The Queen had arrived in Liverpool, and in consequence of her visit, little or no business had been transacted.

Cotton had declined one eighth of a penny. Flour has also declined.

Business matters in England were an improving appearance, and the influx of bullion in Bank of England was sensibly felt in the money market. The English Funds and Railway Shares have considerably advanced.

Chap Travelling.—We are informed that, owing to the low rates charged by the stages between Halifax, Windsor, and Annapolis, during the past summer, the number of persons travelling on that route has been unusually large. The fare between Halifax and Windsor is about the same as that charged by the Parliamentary or cheap trains in England, viz. one penny sterling per mile, which is certainly extremely moderate. The travelling public have been much indebted to the Messrs. King, of this Province, for introducing the low rates, and we are gratified to learn that they have been well supported in their endeavours to serve their patrons.—(ib.)

The steamer Asia sailed from New York on Wednesday, for Liverpool, with 60 passengers and \$350,000 in specie.

St. Stephen ACADEMY.

MILLTOWN, N. B.

THIS Institution will be opened about the FIFTEENTH OF NOVEMBER next, under the direction of Mr. ISAIAH DOLE, A. M. Principal, a popular and experienced teacher, who has the reputation of being one of the best classical scholars in New England.

The Principal will be assisted by Miss EMILY C. DENSMORE, a lady who has enjoyed the best opportunities for attainments in the various branches required to be taught, and has also had several years experience in teaching.

It is designed to make this a very desirable school for young Ladies. Instruction will be given in the various English branches, in ancient and modern Languages, and also in Music, Drawing and Painting.

Young Gentlemen preparing for College will here enjoy every facility for pursuing their classical studies.

This Institution will meet the wants of those desirous to become teachers.

The patrons of the school have recently erected a commodious and elegant Academy, situated in the village of Milltown, St. Stephen. It is fitted up in the most approved style, and is sufficiently retired to make it a favorable place for study.—Board may be obtained in the vicinity, on moderate terms, in respectable private families.—Further notice will be given of the day of opening the school, terms of admission, &c.

FRUIT TREES.
 THE NURSERIES and ORCHARDS of the Subscri-
 ber, consisting of nearly Forty Thousand
 Trees, are now offered for the inspection of the
 Public and for sale. Persons planning these Trees
 may be assisted of success, as every possible pre-
 caution has been used in the selection of varieties;
 all that have not proved hardy, have been at once
 discarded, and those which have not yet fruited
 here have been propagated with the advice of the
 most distinguished cultivators of New England and
 Canada.
 The Subscriber flatters himself that his assort-
 ment is unrivalled for this climate, as it contains
 nearly all the varieties of Apples and Plums which
 have proved valuable in cold and extreme climates,
 with many new and splendid sorts lately brought
 from Russia, England, Germany, Canada, and the
 Northern States.
 Price of Grafted Apple Trees, assorted, one shil-
 ling each.—Any person or number of persons or-
 dering 1000 or upwards in one lot may, if desired,
 have a credit of two or three years for half the
 amount, and receive the trees free of freight at any
 place within the Province.

JUDSON'S
CHEMICAL EXTRACT OF
CHERRY AND LUNGWORT,
 FOR THE CURE OF
 Coughs, Colds, Hoarseness, Spitting
 of Blood, Night Sweats, Asthma,
 Liver Complaints, and
CONSUMPTION.
 DO NOT NEGLECT IT.
 CONSUMPTION
 Can be and has been cured in thousands
 of cases by this only certain remedy.
 JUDSON'S CHEMICAL EXTRACT OF
 CHERRY AND LUNGWORT,
 and no remedy has ever before been discov-
 ered that will certainly
 CURE CONSUMPTION.
 The most strongly marked and devel-
 oped cases of Pulmonary Consumption,
 where the lungs have become diseased and
 ulcerated and the case so utterly hopeless,
 as to have been pronounced by Physicians
 and friends, to be past all possibility of re-
 covery, and at times thought to be dying,
 has been cured by this wonderful remedy,
 and now as well and hearty as ever.
 It is a compound of medicaments which are
 peculiarly adapted to and essentially neces-
 sary for the cure of
COUGHS and CONSUMPTION.
 Its operation is mild, yet efficacious; it
 loosens the phlegm which creates so much
 difficulty, relieves the cough and assists
 nature to expel from the system all diseased
 matter by excretion, producing a most de-
 lightful change in the breathing and chest,
 and this, after the prescriptions of the very
 best medical men and the inventions of
 kind-sorrowing friends and Nurses, have
 failed to give the smallest relief to the
 consumptive sufferer.
 THOUSANDS OF CONSUMPTIVE
 persons have been deceived in buying medi-
 cines which were said to be infallible
 cures, but which have proved only pallia-
 tives, but this medicine is not only a pallia-
 tive, but a cure for ulcerated lungs. It con-
 tains no deleterious drugs and one trial will
 prove its astonishing efficacy better than
 any assertions or certificates in curing con-
 sumption and all diseases of the Lungs,
 such as Spitting of Blood, Coughs, pains
 in the side and chest, night sweats, &c. &c.
 About 1000 certificates of almost miracu-
 lous cures, performed by this medicine,
 from some of the first Doctors, Clergymen,
 and Merchants, have been sent us for this
 medicine, but the publication of them looks
 too much like Quackery, [will show them
 to any person calling at our office.] This
 medicine will speak for itself and enough
 in its own favour wherever it is tried.
 *Caution.—This medicine is put up in a
 large bottle and you must find the name of
 Comstock & Brother, Proprietors, New
 York, on the splendid wrapper around the
 bottle: All orders must be addressed to
 Comstock & Brother, No. 9, John St.,
 New York.

NOTICE.
 IS hereby given, that the following Law, passed
 at the last Session of the Legislature will be
 enforced for the County of Charlotte.
 That in every Dam now built, or hereafter to
 be built or placed across the various Streams and
 Rivers in this Province, a proper and suitable
 Fishway shall be made and kept; provided that
 in those already erected, the proprietors thereof
 shall be allowed until the first day of October
 next to make the Fishway required in and by this
 Act.
 That no sluice or edgings, or Mill rubbish, saw-
 dust excepted, shall be allowed or put, directly or
 indirectly, by any person or persons, in any of the
 Rivers or Streams of this Province.
 JOHN ALEXANDER,
 JAMES BROWN,

JUDSON'S
CHEMICAL EXTRACT OF
CHERRY AND LUNGWORT,
 FOR THE CURE OF
 Coughs, Colds, Hoarseness, Spitting
 of Blood, Night Sweats, Asthma,
 Liver Complaints, and
CONSUMPTION.
 DO NOT NEGLECT IT.
 CONSUMPTION
 Can be and has been cured in thousands
 of cases by this only certain remedy.
 JUDSON'S CHEMICAL EXTRACT OF
 CHERRY AND LUNGWORT,
 and no remedy has ever before been discov-
 ered that will certainly
 CURE CONSUMPTION.
 The most strongly marked and devel-
 oped cases of Pulmonary Consumption,
 where the lungs have become diseased and
 ulcerated and the case so utterly hopeless,
 as to have been pronounced by Physicians
 and friends, to be past all possibility of re-
 covery, and at times thought to be dying,
 has been cured by this wonderful remedy,
 and now as well and hearty as ever.
 It is a compound of medicaments which are
 peculiarly adapted to and essentially neces-
 sary for the cure of
COUGHS and CONSUMPTION.
 Its operation is mild, yet efficacious; it
 loosens the phlegm which creates so much
 difficulty, relieves the cough and assists
 nature to expel from the system all diseased
 matter by excretion, producing a most de-
 lightful change in the breathing and chest,
 and this, after the prescriptions of the very
 best medical men and the inventions of
 kind-sorrowing friends and Nurses, have
 failed to give the smallest relief to the
 consumptive sufferer.
 THOUSANDS OF CONSUMPTIVE
 persons have been deceived in buying medi-
 cines which were said to be infallible
 cures, but which have proved only pallia-
 tives, but this medicine is not only a pallia-
 tive, but a cure for ulcerated lungs. It con-
 tains no deleterious drugs and one trial will
 prove its astonishing efficacy better than
 any assertions or certificates in curing con-
 sumption and all diseases of the Lungs,
 such as Spitting of Blood, Coughs, pains
 in the side and chest, night sweats, &c. &c.
 About 1000 certificates of almost miracu-
 lous cures, performed by this medicine,
 from some of the first Doctors, Clergymen,
 and Merchants, have been sent us for this
 medicine, but the publication of them looks
 too much like Quackery, [will show them
 to any person calling at our office.] This
 medicine will speak for itself and enough
 in its own favour wherever it is tried.
 *Caution.—This medicine is put up in a
 large bottle and you must find the name of
 Comstock & Brother, Proprietors, New
 York, on the splendid wrapper around the
 bottle: All orders must be addressed to
 Comstock & Brother, No. 9, John St.,

SHERIFFS SALES

Real Estate of William Porter

To be sold at Public Auction, on Saturday, the 15th FEBRUARY, 1851, at 12 o'clock, at the COURT HOUSE, in St. Andrews.

All the right, title, interest, claim and demand whatsoever, of WILLIAM PORTER, of in and to the following properties, viz:

All that Lot of land situated in the Parish of St. Stephen's, conveyed by John Dunn to the said Wm. Porter, by deed dated 13th Jan. 1827, beginning at Aaron Upton's residence, 13 feet from the corner of the street, making the angle of the road leading from the Public Landing to the country Northwards, and the road leading down the river towards the bridge, thence running the extent of the side line of garden lot No 5, thence across the road to lots No 5 and 6, thence on the side line to said Aaron Upton's lower line, thence on the line between the lot formerly owned by James Nicholson and the said Aaron Upton, to the first named boundary, containing about one acre and a quarter.

All that Lot of land in the same Parish, conveyed by Mary Nicholson to the said William Porter, by deed dated 13th September 1833, bounded South by the main street leading through St. Stephen towards Oak Point, West by lot owned and occupied by Aaron Upton, North by a lot belonging to the estate of the late Peter Christie, and East six feet from the house in which the said Mary Nicholson then resided, by the said lot purchased from John Dunn, containing one quarter of an acre.

All of those two lots of land in the same Parish, known as Lots No. 12 and 13 of the tract formerly belonging to Robert Pagan Esq. and being 160 feet in width on the road, and 177 feet in rear, and 165 feet in length, the said lot No. 12, fronting on a road 3 rods wide, back of lot No. 12, and extending back 165 feet to the line of N. Marks' land.

The Eastern half and part of a lot of land in the same Parish, in front occupied by Jas. A. Bixby.

All of that lot or parcel of land at the bridge, so called, in St. Stephen, formerly owned by the late Joseph Porter, and purchased by him from Michael Young.

All of that lot of land at the bridge, afore said, conveyed by Michael Young to the said Wm. Porter, by deed dated 3d of August, 1833, commencing at a point leading from the main road to Young's Point, and running at right angles with said road 120 feet, thence parallel with said road 160 feet to within 25 feet of Young's wharf so called, thence parallel with said wharf, to low water mark, thence past the end of said wharf by stream, until it meets the Eastern line of lands formerly of Joseph Porter, deceased, thence following said line to the said road, thence along said road to the first mentioned boundary.

All that Lot of Land at the Ledge afore said, conveyed by the said Michael Young to the said William Porter, by deed dated 27th January, 1840, on the south easterly side of a lane on the south easterly side of Lot No. 121, in the 5th Division of the Penobscot Grant, thence by said lane N. 5-20, E. 17 rods and 23 links to the south side of a road 2 rods wide, running S. 75° 30' E. 8 rods to a stake and stones, thence S. 2° W. passing 25 feet from the north east corner of Porter's Wharf, thence westerly by low water mark to the easterly line of said Lot, sold to Porter, and following the several courses of the Lot easterly, northerly and westerly, to the place of beginning, containing 3 acres.

All of that Lot of Land in the Parish of St. Stephen, conveyed by Thomas (last) to Wm. Porter, by deed dated 31st July, 1832, being farm lot No. 20 in the 2nd Division, granted to James Fraser on the grant to Joseph Porter and others, containing 400 acres.

And also all other real estate belonging to the said Wm. Porter, situated in the County of Charlotte, not included in the above list. The same having been seized and taken to satisfy an execution issued out of the Supreme Court, at the Suit of the President, Directors, and Company of the Commercial Bank of New Brunswick, indorsed to levy \$1130, 16s. 8d. besides Sheriff's fees, &c.

THOS. JONES, Sheriff of Charlotte, St. Andrews, July 31, 1850.

The sale of the above mentioned property is postponed until Wednesday the 25th May next, then to take place at 12 o'clock at the Court House.

THOS. JONES, Sheriff of Charlotte, St. Andrews, Feb. 15, 1851.

HEALTH where 'tis SOUGHT!

Holloway's Pills.

CURE OF A DISORDERED LIVER AND STOMACH, WHEN IN A MOST HOPELESS STATE.

Extract of a Letter from Mr. Matthew Harvey, of Chapel Hill, N. Carolina, Scotland, dated the 15th of January, 1850.

"Sir—Your valuable Pills have been the means, with God's blessing, of restoring me to a state of perfect health, and in a time when I thought I was on the brink of the grave. I had consulted several eminent doctors, who after doing what they could for me, stated that they considered my case as hopeless. I was a great sufferer, got a Box of your Pills, which soon gave relief, and by persevering in their use for some weeks, together with rubbing night and morning your Ointment over my chest and stomach, and right ribs, I have by their means, along with constant exercise, headless and debility, and sickness of the stomach, together with a great depression of spirits, I used to think that nothing could benefit me as I had been to many medical officers. Having been told that your Pills were powerful, I used to take them, and in a short time I was enabled to do so, and I am happy to say they effected a perfect cure."

(Signed) WILLIAM SMITH, (formerly called EDWARD.)

CURE OF A CASE OF WEAKNESS AND DEBILITY, OF FOUR YEARS' STANDING.

Extract of a Letter from Mr. Smith of No. 5, St. Thomas Street, Bristol, England, dated the 12th, 1850.

To Professor Holloway. "Sir—I beg to inform you that for nearly five years I have known what it was to have a day's health suffering from extreme weakness and debility, and constant headless and debility, and sickness of the stomach, together with a great depression of spirits, I used to think that nothing could benefit me as I had been to many medical officers. Having been told that your Pills were powerful, I used to take them, and in a short time I was enabled to do so, and I am happy to say they effected a perfect cure."

(Signed) WILLIAM SMITH, (formerly called EDWARD.)

CURE OF ASTHMA, OF TWENTY YEARS' STANDING.

Extract of a Letter from Mr. J. K. Heydon, 78 King Street, Sydney, dated 10th of November 1849.

To Professor Holloway. "Sir—I have the pleasure to inform you that many extraordinary cures of Asthma have been effected here by means of your Pills. One is that of a lady residing in the 'Starboard,' who, after having for nearly twenty years been unable to make the slightest exertion, suffering very severely from shortness of breath, coughing, and spitting, but as now, to use her own expression, 'able to do the work of a man,' and to perform another case is that of Mr. Charles Taylor, from Bristol's Buildings, Clarence Street, who was so gradually but that he was confined to his bed for several months, and, after consulting regularly by his medical man, who pronounced him to be in a dying state, yet he, likewise, to my knowledge, has been restored to perfect health by the use of your Pills, and rubbing your Ointment night and morning into his chest."

(Signed) J. K. HEYDON, ANTONISHING CURE OF THE EARL OF ALBENBOROUGH.

By this Miraculous Medicine! after every other means had failed.

A Copy of a Letter from the Earl of Albemorough dated 11th March, 1849, is published in the 3rd Professor Holloway.

"Sir—Various circumstances prevented the possibility of my thinking you before this time for your medicine in curing me of my Asthma, and I did not take the opportunity of sending you an order for the amount, and at the same time, to add that your Pills have effected a cure of a disorder in my Liver and Stomach, which all the most eminent of the Faculty at home, and all over the Continent had not been able to effect. I wish to have another Box and a Pot of Ointment in case any of my family should ever require either."

Remain, with much respect, Your most obliged and obedient servant.

TIME should not be lost in taking this Remedy for any of the following diseases: Ague, Consumption, Fits, Rheumatism, Tumours, Asthma, Debility, Gout, Retention of Urine, Scrophulous Complaints, Dropsy, Head-aches, Sore Throats, Venereal Affections, Blotches on the skin, Dysentery, Indigestion, Serpigo, or King's Evil, various kinds of Erysipelas, Inflammation of Bowels, Complaints, Female Irregularities, Jaundice, Stone and Gravel, Colic, Liver Complaints, Secondary Symptoms, Weakness from whatever cause, Lumbago, Constipation, Bowels, Fevers of all kinds, Piles, The Doublureux, &c. &c.
