Whole No. 2615

FARM FOR SALE

Fifty acres of first-class clay loam, near Glencoe, with fair buildings. A good field of wheat, and the plowing all done ready for crop.—Wm. McCallum.

TO RENT

Fifty acres of pasture land, being composed of the east half of the south half of lot number ten in the second concession of Mosa. Apply to Elliott & Moss, Solicitors, Glencoe, or John A. Campbell, 3261 Fifth St., Detroit.

TO RENT

Pasture farm, 100 acres; lot 27, con. 7, township of Brooke. Apply Blanche I. Munroe, Newbury, care of Neil McVicar.

NORTH NEWBURY WAREHOUSE

The C. E. Nourse Company have taken over the warehouse and flour and feed business at North Newbury and are prepared to give satisfactory service to the wants of the community in all kinds of flour and feed. The business will be conducted on a strictly cash basis. They are also prepared to buy all kinds of grain, paying the best market prices.

JACK MORAN, Manager.

FARM TO RENT

100-acre grass farm; lot 6, con. 10, Mosa; good water supply. Apply Mrs. Mary Carswell, Route 6, Alvinston.

FARM FOR SALE

Lots 17 and 18, concession A, township of Aldborough, county of Elgin, 120 acres, on the Thames river, three miles from Wardsville. A splendid pasture farm. Good dwelling and barn. Formerly owned by Mr. Sam Haining. Must be sold to wind up an estate. Apply Fred H. Brisco, 161 King St., Chatham, Ont.; phone 397 (Office open evenings.)

BUSINESS BLOCK FOR SALE

Village of Highgate; at present occupied by Abrey Bros. as garage; formerly owned by Mr. Sam Haining. This property must be sold at once to close up the estate. For further particulars apply Fred H. Brisco, Trustee, Chatham.

FOR SALE

Registered oats, O.A.C. 72, first in field crop competition, 1921; O.A.C. 23 seed barley, and building 16 x 25, nearly new.—A. B. McDonald, Glencoe.

FLOUR AND FEED

The C. E. Nourse Company wish to announce that they have purchased the flour and feed and other business connected therewith from Bruce McAlpine, and are prepared to give their best attention to the wants of the community in their line. The business will be conducted on a strictly cash basis. They are also prepared to buy all kinds of grain, paying the best market prices.

J. D. McKELLAR, Manager.

PEARLIE J. GEORGE

GLENCOE Plumber

CENTRAL GARAGE Attention!

THE QUESTION OF DEPRECIATION

YOU cannot afford to overlook the question of depreciation when buying a car, because the time will come when you will either sell the car you have bought or turn it on a new car. The loss you will have to take will depend on your choice now.

Ask the owner of any car purchased within the last 15 months, at a price varying from \$2,000 to \$4,000, what loss he would have to take on a resale. The amount will surprise you!

The more expensive the car the more the owner stands to lose. Excessive cost of upkeep kills the demand for a used car of this class. Buy a Ford. It costs so little to run, and repairs and replacements for worn parts can be so easily obtained at low cost that the demand for used Ford cars reduces depreciation to the minimum.

McPHERSON & CLARKE

Planing Mill Lumber Yard Glencoe, Ont.

"Bless you, son, for calling me up!"

"I did something to-day that, I'm ashamed to say, I have never done before," said a well-known business man—"I called my Mother on Long Distance. By Jove, she was glad to hear my voice."

"What with business, worry and responsibilities I've been neglecting her for years, and it took a load off my shoulders just to hear her happy, tremulous voice say 'God bless you, son, for calling me up!'"

But what about you and the mother who sits in the far away silence, perhaps hungering for a word from the son she loves?

Call her by Long Distance to-night and bring gladness to her lonesome heart. Let her listen again to the voice she knows so well, and it will repay you a thousand-fold to hear her say "God bless you, son, for calling me up!"

DISTRICT AND GENERAL

The debenture debt of Watford is \$93,276.34.

Bootleg liquor was responsible for 19 deaths in Detroit during February.

On a wager of a dollar, a 16-year-old Coatesville, Pa., boy swallowed a live goldfish three inches long.

Reports from the Niagara Peninsula, while a little early, indicate that the fruit crop promises to be a bumper one.

A fine of \$100 for falsely advertising that a tonic would regrow hair was imposed at New York upon the Jules Ferend Co.

The death occurred suddenly in London on Tuesday morning of David G. Kerr, a former well-known resident of North Danforth.

Arden Sutherland of Mount Brydges has purchased the drying business until lately conducted by S. J. Lethbridge at Strathroy.

Sarnia is figuring on building a new \$75,000 arena next year with a seating capacity of 3,500 and standing room for an additional thousand.

It is announced that the rate of wages on county and provincial roads this season is to be 20 cents an hour for men and 40 cents an hour for teams.

J. H. Ross Gillespie, a former Alvinston boy, died a few days ago at Vancouver, B.C. His father, Malcolm Gillespie, was proprietor of a planing mill at Alvinston a number of years ago.

Twenty-five young people of churches within the bounds of the London Presbytery have signified their willingness to train for life service in the church either as missionaries or ministers.

James Ferkey, a St. Thomas teamster who moved from Alvinston four years ago, died in the Amasa Wood Hospital, and the remains were taken to Alvinston on Monday for burial. He was 62 years of age.

Fire Marshall Heaton of Ontario claims his records show that throwing away lighted cigars and cigarettes caused fires in one year that were responsible for a loss of \$1,259,549. In Toronto alone 252 fires are charged against careless smokers.

At a funeral service in a Syracuse, N.Y., church a woman's hat caught fire from a candle and a panic was prevented only by a man seizing the burning hat and stamping out the flames. The woman's hair caught fire and she was burned about the face.

Announcement was made at Brantford that at the last meeting of the Brant Farmers Co-operative Company, impairment of \$22,000 of the \$25,845 paid-up capital of the company had been reported, with total loss of \$24,000 during the past three months.

The dates for the departmental examinations have been announced. The junior public school graduation and the lower school examination begin on June 13, the upper school on June 15, the middle school on June 19 and the high school entrance on June 23.

A quiet marriage was solemnized at Cherry Hill Farm, Wardsville, the residence of J. F. McGregor, Monday, March 13, when his sister, Florence Edna, youngest daughter of the late John and Mrs. McGregor, became the wife of John H. Cady of Toledo, formerly of Wardsville and Rodney.

The winter of 1921-22, according to the records of the department of agriculture, has been a very mild one. Only once did the temperature fall below zero, namely on January 24th, when 2 below was recorded. In February the maximum temperature was 35, while the total snowfall was 7 inches, all in February.

NEIL GALBRAITH PASSES

The death occurred at his home, 1245 Henry street, Detroit, on Monday, Feb. 27, of Neil C. Galbraith, in his 78th year, after only a few days' illness with pneumonia. Mr. Galbraith was well known in Glencoe, having conducted a lively stable here for upwards of 30 years until 13 years ago when he moved to Detroit. He is survived by his wife and two daughters—Mrs. Marvin Graham and Mrs. J. R. Chalmers of Detroit. He also leaves one sister, Mrs. Christy Black. Interment was made at Woodmere cemetery, Detroit.

THE FARMERS' PAPER EVERY OTHER DAY

The Farmers' Sun, which has been enlarged and improved, is now published EVERY OTHER DAY. This forward step was taken at the earnest request of Sun readers who wished a farm newspaper which would give a summary of world news, more frequent markets (for which the Sun is noted), together with a paper which is sympathetic to the farmer's viewpoint. All these are found in The Sun. No other farm paper equals The Farmers' Sun in the service it renders to its readers. When you subscribe for a farm paper, subscribe for The Farmers' Sun, owned by the farmers, and published in their interests. The subscription price of the tri-weekly Sun is only \$2.00 per year, or three years for \$5.00. Why spend \$5.00 for a city daily when you get all you require through The Farmers' Sun for \$2.00 per year. Address all letters to The Farmers' Sun, Toronto.

Build up your system and feel fine all the time by taking Tanlac.—P. E. Lumley.

CONSOLIDATION OPPOSED

At a meeting of ratepayers of the township of Caradoc, held at Mount Brydges on Thursday, the following resolutions were presented and unanimously passed:—We are opposed to the pressure that is being brought to bear by the Ontario Trustees and Ratepayers' Association for the general consolidation of the rural school, as we consider the above organization is not representative of the rural viewpoint.

Furthermore, we are opposed to the generous grants that are given to encourage consolidation; also to the centralization of control and the abolition of the present democratic system of the three trustees to a section, as we believe there can be no one more interested in the welfare of the children other than their parents.

POLICE MAGISTRATE

A petition signed by 118 residents of Glencoe and vicinity was recently sent to the Department of Justice, Toronto, recommending the appointment of P. J. Morrison for police magistrate. The matter is now under consideration by the department with a view to a better system for the administration of justice for the county.

NOW BANK OF MONTREAL

Permission having been granted by the government for an amalgamation, the Merchants Bank of Canada ceased to exist on Tuesday when instructions were dispatched to future branches to transact business in future under the name of the Bank of Montreal.

HORTICULTURAL SOCIETY

The second annual meeting of the Glencoe Horticultural Society was held in the town hall March 18th. The following officers were elected for one year:—Honorary presidents, clergymen and reverend; president, Dr. Munford; 1st vice-president, Mrs. W. A. Currie; 2nd vice-president, James McGregor; secretary, Mrs. J. E. Roome; treasurer, R. M. McPherson; directors—B. F. Clarke, W. A. Currie, Jr., Mrs. R. Stuart, L. Suttler, C. G. Yorke, Mrs. J. E. Roome, R. M. McPherson, J. N. Currie, Mrs. A. E. Sutherland, Mrs. M. J. McAlpine, Miss Blackburn, auditors—G. Dickson and C. G. Yorke.

It was moved and carried that a house to house canvass be made for members, also premiums this year to the value of 75c, and subscribers to order what they wish.

ANNUAL OPEN LITERARY

The literary society of the local high school is holding its open meeting on Wednesday, April 12, in the town hall. An excellent program of addresses, readings, songs and other musical numbers is being prepared. If you have never attended a G. H. S. literary come and hear the best entertainment of the season. If you have heard G. H. S. literatures, come and hear a better one. The main feature of the program will be an oratorical contest. Six speakers will take part, and the winner will be presented with a gold medal by H. I. Johnston. A preliminary contest will be held at the school to pick out the six speakers. The following is a list of the contestants, with their subjects:—Catherine Lawrence, "Music in the Home"; Harry McLachlan, "Does Glencoe Need a Carnegie Library?"; Helen Cameron, "An Ideal Town"; Alex. Munroe and J. D. Gillespie, "The Greatest Man in Canadian History"; Lillian Campbell and Jean Hull, "Canada's Vacant Farms, or How to Keep the Boys on the Farm"; Marion Campbell and Gladys Bechill, "Canadian Immigration"; Ella McLean, Jessie Currie and Anna B. McRae, "Canada's Place in the World."

FUNERAL OF WILLIAM HODGE

The funeral of the late Wm. Hodge, who died in the hospital at London, took place from his residence near Bothwell on Friday afternoon. Mr. Hodge, who was 78 years old, was a former Grand Trunk railway section-man at Glencoe. He leaves his wife, one son, John Hodge, Windsor, and one daughter, Mrs. Ernest Crate of Smith's Falls. The funeral was conducted under Masonic auspices.

"OUR MUTUAL FRIEND"

"Our Mutual Friend," as is doubtless recalled, is a story of mysteries and misers; of intrigue, plotting; of greed and goodness. It is, at times, frankly melodrama and at all times is a deeply sentimental love story for lovers of all ages. The chief feminine personality in an irreproachable cast is a little blonde beauty, Rosemary Marlin, with a personality all her own, yet reminiscent of Blanche Sweet a few years back in the unforgettable "Judith." Silas Wegg, the "literary man with a wooden leg," Mr. Venus, the frowsy maker of skeletons; Mr. and Mrs. Boffin, Pa and Ma Wilfer; Rogue Riderhood, most villainous of villains, are characters that always keep their places in one's memory. In "Our Mutual Friend" they step into actual existence. You'll never forget them. Those who have seen the picture proclaim it the first "perfect movie" ever made from a "classic." At Glencoe opera house Saturday night, March 25th.

For your painting, see Lee Clements, Glencoe. Wedding cake boxes at The Transcript office.

ARE JOBS FOR ALL

With the approach of spring an unusually active demand is reported for experienced farm help. An interesting feature of the situation is the wages now being offered compared with those that formerly prevailed. The majority of farmers are offering from \$20 to \$25 a month, and board," said a London, Ont., official. "In a few cases, where the farm hand is unusually desirable, as high as \$30 is being paid. This is considerably below the wage schedules of former years. We are being able to meet the demands for skilled farm help fairly well. Any man who has had real farming experience and wants to go on a farm need not be out of a job a minute. One difficulty is that men who claim they have farming experience have had it in the West and all they know is about handling horses and general work. They know nothing about dairying, and that is essential in this district."

DEATH OF WM. H. BROCK

Strathroy, March 18.—The death occurred Wednesday evening at the family residence, lot 1, concession 7, Caradoc, of William Henry Brock, in his 44th year. Mr. Brock was a well-known farmer, having resided in the vicinity about 31 years, formerly living in Adelaide, where he was born. He was the son of the late Arthur and Mrs. Esther Brock. Besides his widow, Annie Laura Howe, he is survived by four children, Edward, Robert, Margaret and Annie; his mother, who resides on North street; two sisters, Mrs. A. Ingham of this town and Mrs. Wm. Brent of Adelaide, and one brother, Arthur, of London.

TIME FOR A CHANGE

The Legislature can confer on every town and village in the province a great and lasting benefit by enacting legislation that will provide for the holding of municipal elections at some time other than during the Christmas season. Business men in the towns and villages cannot give the same attention to municipal affairs during the busy holiday season that they could, and would, at other times. For this reason the towns and villages have not had the benefits of having their most interested citizens taking part in municipal affairs. Now that the women are to take more part than heretofore in municipal elections, the need of a change is greater than before, because during the holiday season the time of the women is almost entirely devoted to children's entertainments and other festivities. The month of November is objected to because a large number of voters in lake ports would not be home at that time. The first week in February would be a suitable time, both in town and country, the holiday rush being over and spring activities not yet started. If our representatives in the legislature will give this important matter due consideration the necessary legislation will be passed this session.—Forest Free Press.

PERSONAL AND SOCIAL

—Miss Annie George was home from London over the week-end.
—Ross Archer of Toronto visited his sister, Mrs. Heal, on Tuesday.
—Miss Jessie Humphries of Toronto spent a few days at her home here.
—Miss Christena Sutherland left on Friday to spend some time in Toronto.
—Miss Louise Moore of London is a guest this week of Mr. and Mrs. H. I. Johnston.
—Wm. Kerr attended the funeral on Thursday of his brother, David Kerr, in London.
—Mrs. Chas. Davidson is in Chatham visiting her mother, who is ill with pneumonia.
—Mrs. John Hayter attended the funeral on Monday of the late Mrs. Eastman at London.
—Mr. and Mrs. Thomas Stinson attended the funeral at Bothwell on Friday of the late Wm. Hodge.
—Mrs. Arch. Fletcher of Iderton spent the latter part of the week with her father, Alex. McAlpine, sr.
—Mrs. Thos. Henderson and Mrs. Wm. McCallum spent a day last week with their father, J. H. Booth, Thamesville.
—Mrs. David Reeves spent Monday with her sister, Mrs. P. Lum, London, and also attended the funeral of the late Mrs. Eastman.
—Mr. and Mrs. A. D. Brown of Melbourne announce the engagement of their third daughter, Eva Deborah, to David Robert Marlow of Walkers, the marriage to take place the middle of April.

If you suffer from biliousness, constipation, headache, nervousness, salivary complexion, loss of appetite, bad taste in mouth, Tanlac and Tanlac Vegetable Pills will certainly straighten you out.—P. E. Lumley.

Dread of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are ward off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

Try a little advertising!

Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto.

Green Feed for Every Farm.

Perhaps no other plot on the farm will give such large returns for the amount of time and labor expended as a small area of feed grown for soil purposes. Green feed is relished during the summer months by cattle, hogs, and poultry (if they are in inclosed yards), but without doubt proves the most profitable when fed to milk cows. Soiling crops are found to assist very materially in maintaining the milk flow during the hot summer months when pastures are short and dry.

Corn, oats, peas and vetches; oats, rape, and sunflowers in the order named, are all valuable for this work.

Corn is one of the best crops for this purpose, and gives a large yield of succulent feed, much relished by both cattle and hogs. Planted before June 10th, it should be ready for cutting about August 10-15, and has reached a height of from 5 to 8 feet, with an average yield of 10 tons per acre. "Longfellow" has been used with some degree of success over a period of years. Unless pastures are extremely bare, one-half acre with fair crop should be sufficient for ten or twelve cows.

Oats, peas and vetches mixed, oats five parts, peas four parts, vetches one part by weight, and sown at the rate of three to three and one-half bushels per acre, will give large amounts of excellent feed. This should be cut and fed while the oats are in the milk or soft dough stage. This will necessitate two or three seedings, if soiling crop is to be fed over any great length of time. Two seedings, or at the most three, ten days apart, should be sufficient, and one acre should supply plenty of feed for fifteen cows.

Oats sown thickly also provide good succulent feed, and should amount to equal oats, peas and vetches in yield per acre.

Rape is generally used as a pasture crop. It is particularly desirable for hogs, and when used for such must be seeded in several plots with about ten days intervening between each seeding. If allowed to make good growth before stock is turned in on it, and then pastured, say, for an hour per day, plants will throw up new shoots, and continue to grow even after being partly eaten. Rape may be sown at the rate of three to six pounds per acre, in drills, or on the flat. It has been grown with fair success when seeded broadcast, but this plan is not recommended, as it is generally found necessary to hoe this crop in order to allow it to make its best growth. With successive seedings and careful handling, an acre should supply sufficient feed for at least fifteen cattle.

The Experimental Station at Charlottetown, Prince Edward Island, reports that sunflowers were used as a soiling crop during the latter part of the season of 1921, and were eaten with apparent relish by beef steers. They were refused by hogs, and eaten but sparingly by dairy cows. These sunflowers (Mammoth Russian) were sown on the flat in rows thirty inches apart, and gave a yield of about twenty tons per acre.

A seeding of oats, or oats, peas and vetches, for early cutting, during corn for use as a soiling crop during the latter season is to be recommended. A small area of rape used as pasture during late autumn will be found very valuable.

Leaf Curl and Mosaic of the Cultivated Red Raspberry.

These two separate and distinct infectious diseases of the red raspberry

have been studied the past two years at the Dominion Laboratory of Plant Pathology, St. Catharines, Ontario. Previously these diseases have been considered as a single disease known as yellowing. Although yellowing has been recognized as the most serious disease of red raspberries, and occurs throughout the small fruit areas of North America, no serious study has been given to it previously. There was no clue to the cause and nature of the disease and no control measures were known. The separation of yellows into two distinct diseases was accomplished by a careful study of the symptoms and the development of marked diseased plants.

The two diseases may be recognized by the following symptoms: In leaf curl, the leaves are very dark green and the midrib and the main lateral veins arch downwards, causing a curling of the margin of the leaf. The tissue between the veins arches upward and results in a puckering along the veins. The laterals on the fruiting canes are short and stand upright. The fruit is small and seedy. In mosaic, the leaflets on the new sucker growth in the spring show large bright green blisters, with yellowish green tissue between them. In summer and autumn the new leaves are finely speckled with yellow dots. Fruiting canes from diseased roots are dwarfed and the leaves reach only about half size. It lacks the flavor and is very often dry and seedy. The variety Cuthbert suffers severely from both leaf curl and mosaic. The variety Herbert seems to escape with only slight damage from both diseases, while the Mariboro is extremely susceptible to the mosaic.

A survey of the fruit growing district on the shore of Lake Ontario from the Niagara River to Toronto, showed in 1921 that leaf curl was present on the average to the extent of about five per cent. of the stand. Mosaic is more prevalent and destructive, and on the average twenty per cent. of the stand is diseased. The serious feature about this condition is that once a bush is affected by either of these diseases, all the growth coming from the roots, year after year, is diseased. Such roots are a direct loss to the grower because the fruit is largely worthless or of very poor quality. Also they serve as sources of infection for the nearby healthy bushes, and the amount of each disease becomes greater year after year.

Both diseases are transmitted to healthy bushes by the very small plant louse, *Aphis rubophila*. They suck their food from the veins of the leaves and when they move from a diseased plant to feed on a healthy one they incidentally inoculate it by injecting the contagious principle. The cause of these diseases has not been determined but is probably in both cases a filterable virus or ultra microscopic organism.

A systematic and thorough eradication of all bushes and roots affected by leaf curl as early in the season as they can be recognized will control the disease. This early eradication removes from the plantation the sources of infection, the diseased canes, with the plant lice which have overwintered on them before they have begun to move away to healthy plants. Mosaic probably will be controlled by a similar eradication of the diseased bushes in July and August, thus removing the centres of infection on which aphids eggs will overwinter and from which they would spread the contagion in the spring. In both cases the bushes must be immediately removed, roots and all, to a distance from the plantation, to prevent the aphids leaving them and crawling to healthy bushes.

A good ration for breeding ducks consists of equal parts of bran, corn meal and green food to which is added about five per cent. grit or coarse sand and five per cent. beef scrap. This can be given three times a day as a moist crumbly mash.

The drinking dishes for ducks should be deep enough so they can dip their bills down deep and also wash their heads and eyes in the water.

Fifty Years Too Soon.
The scythe is rusting in the tree,
The cradle in the shed;
O would I were a boy again!
O Youth, where hast thou fled?

The hoary maple still uprears
Its crown of glory there,
Where oft I felt like crying out,
"O farmer, grindstone spare!"

O kinks that gathered in my back,
O aches that came apace,
When scythe and cradle pressed upon
That creaking grindstone's face!

But now what music greets my ears!
The reaper's pleasant sound,
And mower's song—its cheery song,
Pours melody around.

The boy now rides where once I walked,
Nor weary ere the noon—
I wonder if I were not born
Some fifty years too soon?

Thinkers, not tinkers, get the most
from their machinery.
Reading makes better farmers—
hence the need for more and larger
rural libraries.

Horse Sense

I keep eight brood mares—purebred Belgians—and, after more than thirty years' experience, I find that as much stress should be placed on their feed as on the general care of those animals. One makes a mistake by pampering them either by feeding or stabling. I allow my animals free access to a large, dry yard with free access to warm box stalls. This insures proper exercise without overtaxing their strength. Feed should be largely given to sustain strength, and assist in building up the unborn colt. I give the mares plenty of bright, clean, shredded corn-stover, and once a day I feed each animal about ten pounds of alfalfa hay, being careful to shake it out well to get rid of the dust. Three times a day I give each mare a quart of ground corn and oats, and once a day I throw in a small handful of flaxseed-meal. Once a week I give each a generous feed of raw carrots, cut fine. The principal feed, however, is the shredded corn-stover. By this feeding I insure bone and muscle feed for both the mother and colt, and at the same time avoid constipation.

I avoid pampering the mares, as such treatment renders them more liable to be too weak to meet the ordeal of foaling and raising the foal. I can not lay too much emphasis on the free feeding of carrots. Carrots, in conjunction with the oilmeal, furnish the best of nourishment and absolutely preclude constipation, the bane of pregnant mares.

Those are some of the questions I have used as levers to pry out the facts. I put those questions to Harve. Knowing him to be a studious farmer, and a careful keeper of farm records, I expected to get from him considerable illumination on the subject. But I didn't.

"I don't know. What's more, I don't give a whoop," he said.

"But," I persisted, "you certainly believe that your tractor is making its way as a cash proposition, don't you?" "I don't know whether it is or not. I always managed to get on first rate with horses alone."

"Why do you keep a tractor then, if you are not sure it is making you money?"

"Nice August afternoon this, isn't it?" he smiled, cocking his feet up on the railing of the vine-shaded porch, and looking at his watch. "And it is nearly two o'clock. There are thirty acres in that field out there."

While I reflected upon the irrelevancy of Harve's change of subject, he was having a great time with his youngest son, a five-year-old, until the sturdy youngster ran away in delighted merriment.

"Finished plowing that thirty acres of oats stubble out there yesterday," he continued. "Professor Green, of the experiment station says that early plowing for wheat may mean three or four bushels extra an acre."

"What I am getting at is this. If I didn't have a tractor, I wouldn't be taking things easy up here in the shade this afternoon visiting with you. I'd be out there on a plow, 'bout a third done, likely, helping the horses fight flies and so on."

"Know what we're going to do tomorrow? The Mrs. and the two children and I are going to drive to Lake James for a week's outing. Neighbors over here will look after the stock. We'll do the same for them the following week."

"When I depended on horses for all my power, I was busy, it seemed, from one end of the year to the next. Never had time to go anywhere. Didn't have time to play with the youngsters."

"I don't know exactly how well the tractor has paid in money. I do know that it has paid big in fun. We work like the dickens when the ground is right and things can be rushed. With the tractor we have power enough to rush things right. Then we can ease up and live. The tractor means a real vacation, maybe two of them, every year for all of us. Not being on a strain so much, we really keep in better humor with each other. I have studied up more on farming and read more other good books in the last two years than in all the time before on this farm. I actually believe the children think more of me now, because I have more time for them."

"That may or may not be 'economic efficiency' as you call it, but you couldn't dig up enough figures in seventeen counties to convince me that my tractor out there isn't paying its way."

Mending a Rubber Boot.

A rubber boot that has had a hole punched in it by a stub is as good as spoiled; at least I always supposed so until recently. Any boy can mend a rubber boot if he will go at it in the right way. Procure at the drug-store an ounce or two of pure rubber gum. Cut this into small pieces and cork it tightly in a bottle with three times its bulk of benzine. For patches, use pieces cut from useless rubber boots. Stet the place to be mended with benzine, and scrape it well, repeating several times. Treat the other side of the patch in a similar manner. Then apply a good coating of the dissolved rubber to both boot and patch, and let them dry until they do not feel sticky. Next apply the rubber again to both, and press them together by the use of weights or clamps for several hours before using the boot. Numerous articles can be mended in this way at small cost.

The Tractor—Pleasure Vehicle.

Harve Gemmill is a hard-headed farmer. I would say "level-headed" instead of "hard-headed," perhaps, if Harve Gemmill were his real name.

I've been trying to get a line on the economic efficiency of the average farm tractor. "How much has the tractor added to your earnings?" "How do you know your tractor pays?" "At what work does your tractor yield highest returns?"

Those are some of the questions I have used as levers to pry out the facts. I put those questions to Harve. Knowing him to be a studious farmer, and a careful keeper of farm records, I expected to get from him considerable illumination on the subject. But I didn't.

"I don't know. What's more, I don't give a whoop," he said.

"But," I persisted, "you certainly believe that your tractor is making its way as a cash proposition, don't you?" "I don't know whether it is or not. I always managed to get on first rate with horses alone."

"Why do you keep a tractor then, if you are not sure it is making you money?"

"Nice August afternoon this, isn't it?" he smiled, cocking his feet up on the railing of the vine-shaded porch, and looking at his watch. "And it is nearly two o'clock. There are thirty acres in that field out there."

While I reflected upon the irrelevancy of Harve's change of subject, he was having a great time with his youngest son, a five-year-old, until the sturdy youngster ran away in delighted merriment.

"Finished plowing that thirty acres of oats stubble out there yesterday," he continued. "Professor Green, of the experiment station says that early plowing for wheat may mean three or four bushels extra an acre."

"What I am getting at is this. If I didn't have a tractor, I wouldn't be taking things easy up here in the shade this afternoon visiting with you. I'd be out there on a plow, 'bout a third done, likely, helping the horses fight flies and so on."

"Know what we're going to do tomorrow? The Mrs. and the two children and I are going to drive to Lake James for a week's outing. Neighbors over here will look after the stock. We'll do the same for them the following week."

"When I depended on horses for all my power, I was busy, it seemed, from one end of the year to the next. Never had time to go anywhere. Didn't have time to play with the youngsters."

"I don't know exactly how well the tractor has paid in money. I do know that it has paid big in fun. We work like the dickens when the ground is right and things can be rushed. Parents as Educators

The Wind—By Alice Wingate Frary.

The wind's activities hold the small child's attention—the clouds, the flying flag, windmills and pinwheels, clothes swaying on the line, the blowing of children's hair and the tails of the fowls, the swaying trees and grass, while the weathervane,

"Turning, pointing, ever showing
How the merry wind is blowing."

asks repeatedly, "Where? How?"

There are a number of verses easily memorized which will make the wind seem a friendly element; "The Weathervane" by Laura E. Richards, "I Saw You Toss the Kites on High" by Stevenson, and Christina Rossetti's

"Who hath seen the wind?
Neither you nor I,
But when the trees bow down their heads
The wind is passing by."

As the child makes these verses his own, listens to stories such as "Jan" (in Mother Stories by Maud Lindsay) and "Aeolus and the Bag of Winds," and learns what the different winds bring, he is being awakened to a finer appreciation of a force that can be so gentle and yet so mighty.

Was there ever a child that did not ask, "Where does the wind come from?" It is part of the high office of parenthood to deepen the child's inherent sense of reverence before the elements, to prevent if possible its deterioration into empty wonder or morbid fear. It is well to cultivate the feeling of awe, teaching the careless child that the piling up of thunder clouds and the bowing of wind-swept trees are to be appreciated, by this

same appreciation leading the timid one out of his fear.

The wind signifies the spirit. No mother who desires a well-rounded development for her child will fail to recognize his need of inner strength, his misconceptions that need straightening. While the kingdom of heaven is the inheritance of child-like hearts, children have need of guidance, and they guide us too, when we are clear-sighted enough to respond, but our emphasis upon values which are unseen helps to raise our children's standards. Froebel's Mother Play of the Weathervane brings to the child its tale of the wind's work and play; to the mother it brings a reminder of the inner forces that must be strengthened, the inner light that may illumine puzzling situations. Two books which are helpful in this respect are "The Notebook of an Adopted Mother" by Eleanor Davies, and "The Spiritual Care of a Child" by Anna Robertson Lindsay, the latter with its vigorous reassurance of a truth all too easily ignored.

"Only God can bring up a child. Nothing will bridge the abyss of the actual and the ideal except faith, hope, love, work, and the immediate help of Divinity."

The Weathervane—Songs and Music of Froebel's Mother Play by Susan E. Blow.

The Wind—A Child's Garden of Verses by Robert Louis Stevenson.
Jan—Mother Stories by Maud Lindsay.

blood-thirsty chiefs, instead of looking for a white man to scalp, would climb the great mountains where even one false step would dash him into eternity.

Here Minnehaha lived with her father Pocono, one of the young chiefs of the Metes, and her mother. One day while Minnehaha was bringing wood into the wigwam her attention was drawn toward men whom she knew were not Indians. Pocono went over to them and much was his concern when he found that they had been sent by the Government to survey the land. Then more white men came. These white men killed the buffalo, which named the plains and which were one of the most important of the Indians' means of living. Deputations were sent far off to Ottawa, but the Indian representatives had no influence. Then they began quietly to prepare for a struggle for their lands. The so-called rebellion began in 1885 when the chiefs Big Bear and Poundmaker. Louis Riel returned from that land, the United States, which was so mysterious to these Indians of the North country. He led his braves valiantly and well. Of the engagements, we only need speak of the one in which Pocono was killed, that at Frog Lake, where there was a terrible massacre. No more did Minnehaha make portages to the Rockies with her father, but she still has vivid memories of one of the noblest Indians who fought in the Rebellion.—Margaret Luke.

The pig is the most economical producer of flesh where suitable feeds are cheaply grown.

THE READING HABIT

The hope of the future of Canadian agriculture lies, in a very large measure, in the fact that our farmers as a class are readers of articles, bulletins and reports dealing with matters pertaining to the science and practice of farming. Furthermore, we venture to say they are for the most part readers with open minds, anxious to learn and, as far as circumstances permit, to put into practice that which appeals to them as sound teaching. These statements may appear to some as decidedly optimistic but that they are not extravagant nor wide of the mark is the opinion of one who for more than thirty years has had an excellent opportunity of learning at first hand, the thought and aspirations of the Canadian farmer.

If statistics could be obtained, it would most probably be found that as regards the volume of its agricultural literature in active circulation, Canada, considering her farming population, stands ahead of all countries. And there would not be this large output if there were not a demand for it. If such be the case we may conclude that apart from economic considerations, our prospect for progress, for more efficient and more profitable farming are good.

The purpose of these few paragraphs is to stimulate and encourage the reading habit and particularly the reading by the young men and young women on the farm of matters pertaining to the chemistry of agriculture. The facts that chemistry reveal bear directly on foundation problems, such as the maintenance and increase of soil fertility, the economic production of larger yields of farm crops, the nutritive value of forage plants and feeding stuffs, the nature and use of manures and fertilizers, etc., etc. There is scarcely a question in connection with soils, crops and stocks that chemistry does not throw some light upon. The more one reads the more one is impressed with the fact that chemistry offers most valuable information on practically every phase of farming and that this information may be made use of in a very direct way by the man on the land to his profit and advantage.

Our plan, therefore, is for more reading—careful, thoughtful reading. Acquire the habit of devoting fifteen minutes a day to the bulletins and reports of our agricultural institutions and the more educational articles and papers in the agricultural press. This material, in which this Dominion abounds, can be readily understood by any intelligent person; it does not call for a scientific education to unravel its meaning. Much of it can be obtained for the asking. Its perusal will make farm work more interesting and, if put into practice, more lucrative. Acquire the habit and you will never regret it.

Maple Sugar.

The maple sugar season is upon us and now is the time for producers to consider and study how to get the best results from their trees. This can be done advantageously and quickly by sending to the Publications Branch of the Dominion Department of Agriculture at Ottawa for Pamphlet No. 8 which describes the best methods to follow, not only for producing but for marketing, and for making the best use of the by-products. Maple syrup and sugar has become year by year more valuable and more popularly appreciated. Yet its production in recent years has not increased but on the contrary has decreased, as is proven by the fact that while the yield from 1881 to 1891 averaged yearly 22,500,000 pounds, from 1891 to 1901 the yearly average of production fell to 21,200,000 pounds, and in later years has fallen to 20,000,000 lbs.

As in every other form of industry, progress has been made in the methods of tapping the trees and in the conversion of the maple sap into sugar and syrup. In former days an axe was used to notch the tree, and the sap was caught in wooden troughs and conveyed in buckets to a central point to be boiled, which was done in large iron kettles suspended from poles. Now an ax is used for tapping; copered buckets have taken the place of the birch bark "cans" or hewn sap troughs, and the kettle has given way to the evaporating pan with corrugated bottom and separate compartments. Not alone, says the pamphlet referred to, for the conservation of the life of the tree, but also for cleanliness in sugar making, the wooden spout has almost entirely disappeared, the tendency now being towards the use of metal in every article of equipment with which the sap, syrup or sugar comes in contact. Nor is that all—the ingenious inventor has provided facilities for taking advantage of the law of gravitation in handling the fluid, which in a well-equipped plant flows of its own accord from the collecting tank to the storage vat, thence to the evaporator and, when boiled to a proper consistency, to the receiving cask.

"To business that we love we rise betime,
And go to't with delight."
—Shakespeare.

Canadian News.
The total value of pulp and paper production by provinces in Canada in 1920 was as follows: Quebec, \$131,822,000; Ontario, \$113,415,000; New Brunswick, \$11,000,000; British Columbia, \$27,221,000. Quebec produced about 1,000,000 tons of the total woodpulp production, Ontario coming next with 654,000, while British Columbia's production was 218,000. During the same year, however, Ontario produced the most newsprint, or 351,000 tons, as compared with Quebec's 358,000, and British Columbia's 126,000. Since then Quebec's capacity for newsprint production has surpassed that of Ontario and is being still further increased through the opening of the new International Paper Company's mill at Three Rivers.

The salmon industry in British Columbia represents a capital investment of \$16,000,000, and payments to the producers of the raw material runs close to \$4,000,000. Cannery employees are paid over \$2,000,000 annually, and the number of persons employed in the industry exceeds 17,000. Over \$300,000 is paid each year to local merchants for supplies such as groceries, and the cans used for packing salmon cost \$2,000,000.

Vancouver Island's population is 116,730, which is 299 per cent. greater than the population of the Island in 1911, according to figures compiled on the basis of the census figures announced by the Dominion Bureau of Statistics recently. The population of Greater Victoria, including the three adjacent municipalities and surrounding districts, is approximately 60,000, although details are yet lacking for the district municipalities.

Over 19,870 cwt. of fish were caught by commercial fishermen in Northern Manitoba during 1921, giving an aggregate value of \$125,490. Of this quantity 15,260 cwt., valued at \$96,244, were caught during the winter; 607 cwt., worth \$9,255, during the summer, and the remainder secured under seller's permits. In the winter 132 men were engaged in fishing, using 1,200 gill nets. Among the fish caught were whitefish, pickerel, pike, trout, mullet, suckers, ling sturgeon and turbot.

Farmers of Saskatchewan invested approximately \$6,000,000 in new tractors in 1920, no less than 2,000 tractors being sold to purchasers during the year at a cost averaging \$3,000 each.

The total value of all sea fish caught in Canadian waters during 1921 was \$18,867,062. British Columbia accounted for \$8,359,026 of this; Nova Scotia \$6,738,309; New Brunswick \$2,073,615; Quebec \$1,244,704; and Prince Edward Island \$451,408.

The latest figures of the Agricultural Institute at Rome confirm Canada's assumption to second place among the countries of the world as a wheat producer, with a yield of 329, 835,000 bushels from the 1921 crop. Canada was exceeded in wheat production last year by the United States alone, which had a yield of 794,893,000 bushels.

The total net debt of Canada on January 31st was \$2,372,572,884, as compared with \$2,366,861,252 at the end of December, 1921, an increase of \$5,711,732. The total amount paid in interest on the public debt during the present fiscal year is \$114,579,577, as compared with \$120,042,240 during the ten months of 1920-21.

Of the 616,000 horse-power actually used by the pulp and paper mills of Canada in 1920, no less than 455,000 horse-power was developed either by hydraulic turbines, or by electric motors, leaving only 160,000 horse-power developed by steam, gas or gasoline engines.

A party of over three hundred Canadian school teachers will tour Europe during the coming summer, according to Major Fred Ney, founder and honorary organizer of the Overseas Educational League. A similar but smaller expedition was made last summer. The party will sail from Montreal for Harve, France, on July 1, where they will be joined by teachers from New Zealand and Australia, returning on August 25.

Famous Last Words.

"I've used kerosene to hurry up the kitchen fire for nearly twenty years."
"I'll keep chopping till the tree begins to fall."
"This is all foolishness about having to use a staff to lead a bull. Why, I've always used a rope."
"I just can't do any more repairing on this car till I light my pipe."
"Oh, I'll get across the track long before the train gets here. My car never stalls."
"I'll stop here under this big tree till the thunder-storm passes."
"I don't very often get in front of the cutter-bar when the mower is in gear, but this team is gentle."
"What in the world did they put a danger sign on this bridge for? Why, I crossed it with my tractor less than a week ago."

Lifeboats Equipped With Heated Cabins.

New Brighton, near Liverpool, is to have the first of a new type of 60-foot motor lifeboats designed by the British Lifeboat Institution. The boats will be capable of carrying 150 passengers, fifty of whom can find refuge in a heated cabin. New Brighton always has had the biggest and best lifeboats in the service on account of the dangerous sand banks running fully ten miles out to sea. The new boats are designed, above all, to combat rough seas. Their speed is ten knots in moderately bad weather.

There are now machines which record emotions, and can show if the person under examination is telling the truth or not.

TRYING TO RUB OUT YOUR RHEUMATISM

It Can't be Done—The Trouble Must be Treated Through the Blood.

The pain of rheumatism is something you cannot rub out. Every sufferer from rheumatism has been advised to rub this liniment or that on the affected part, but after all the rubbing the pain remained. Rubbing did not cure it and can't cure it.

Thin blood and rheumatism come together and if they are properly treated they will go together. Rheumatism is in the blood—in poor watery blood. Sometimes cold, damp weather starts the aches and pains, but it is the condition of the blood that is at fault, and only by correcting this, and making the blood rich and red can the rheumatic poison be driven out. This is what is done in the treatment of rheumatism with Dr. Williams' Pink Pills. Acute and muscular rheumatism show improvement as the thin blood is built up, and when the blood has been restored to its normal condition the trouble vanishes. This is proved by the experience of Mr. John A. O'Neill, Port Hood, N.S., who says, "I was a periodical sufferer from rheumatism for years. I tried many remedies, but with indifferent results, and I had about concluded that the trouble was too firmly rooted in my system to be got rid of. While I was suffering from an attack a friend advised me to give Dr. Williams' Pink Pills a trial. I first got three boxes and by the time I had taken them I felt much better. Then I got three more boxes, and when I had taken them not only was the rheumatism gone, but I was feeling better in every way. If you suffer from rheumatism I strongly advise a trial of Dr. Williams' Pink Pills.

These Pills are sold by all medicine dealers or will be sent by mail, post paid, at 60¢ a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

BITS OF HUMOR FROM HERE & THERE

Natural Mistake.
"William," said a teacher to one of her pupils, "I am surprised that you do not know the date of Columbus' discovery of America. It's actually printed at the head of the chapter."
"I am sorry, miss," said William, "but I thought it was his telephone number."

One on the Prisoner.
The prisoner was being cross-examined for the prosecution, when the judge interrupted.
"You say that you dined at the Hotel Metro. What did you partake of?"
The prisoner turned to reply.
"Beef steak, my lord," he said.
The judge looked stern.
"On your oath?" he said.
"No, my lord," he said, "on a plate."

In a Difficulty.
Mike had saved up a little money, and when Pat came over a few years later the two brothers went into the coal business.

One day Mike bought a roll-top desk, and when it arrived he said to Pat:
"The one desk will do for the two of us. And here are two keys, one for you, Pat, and one for me."
Pat accepted the key, but seemed to be studying the desk.
"That's all right, Mike," he said, "but where is my keyhole?"

Wisps of Wisdom.
To go forward is important. To go straight is more important.
Don't sit down and take what comes. Go after what you want.
All you've got to do is to want a thing, want it hard, and it's as good as yours.

Health is the foundation both of judgment and industry, and therefore of success.
The man who knows enough to keep

Surnames and Their Origin

CAPPER
Variations—Capman, Kapman, Chapler.
Racial Origin—English.
Source—An occupation.

From this listing of variations, racial origin and source you can form a pretty good guess as to how these family names originated. The first bearers of these surnames, you say, must have been makers of caps or, at least, dealers in them, and their surnames were at first descriptive of their occupations, later losing their meaning as descriptive of the bearer's trade and becoming identifications of the individuals themselves.

But, you ask in sudden doubt, did the medieval English speak of caps as we do. They were head coverings, of course. But did they call them caps? Didn't they rather call them hats?

The answer is that the medieval English, and Normans also, did have caps, but they were not the sort of head covering that we designate by that name. They were more like hoods. They came to be known as "raps," but the more usual designation was the Norman-French "chapel," and sometimes "chapelet" (the diminutive form). And it is interesting to note that our modern word "chapel" meant originally a little building that reminded men of the shape of the hood. The word is derived, of course, from the Latin "caput" (head), through the Norman speech.

Following are original forms in which these descriptive surnames are found: "Le Chapelier," "Le Capierre,"

Le Capier" and without the "the" as "Capman" and "Kapman."

GORDON
Racial Origin—Anglo-Norman.
Source—A locality.

The name of Gordon is irrevocably linked with Scotland, for it is the name of one of the Highland clans. But though the majority of the blood in the Clan Gordon may be Gaelic, neither the name itself nor the family which founded and organized the clan were Gaelic.

The name is derived from that of a place in Berwickshire. The founder of the clan was a Norman knight, Adam de Gordon, who settled in the south of Scotland in the twelfth century.

A later chief of the same name was one of the first of the northern barons to join the forces of King Louis IX. of France in his crusade of 1270.

A genius for organization seems to have been one of the chief traits of the medieval Normans, for it was their superior discipline and co-operation that was responsible for their victories over the Anglo-Saxons. The Normans who founded clans in the Highlands appear to have been no exception. In a few generations the Gordons rose from the position of settlers and overlords of land to leaders of one of the most powerful clans in the Highlands, which was recruited with the native inhabitants of their newly acquired lands as the nucleus.

The Gaelic name of the Clan Gordon is "Na Gordanach."

his mouth shut generally draws healthful breath as well as a good salary.

Business is Business.
A train in the Western States of America was held up by bandits, who ordered the passengers to give up all their money.

One of the passengers was a Jew from New York, and when his train came, he reluctantly drew three hundred dollars from his pocket, and, taking six, put them in his pocket.

"What do you mean by that?" asked the bandit.

"Surely," answered the Jew, "you don't mind me taking a 2 per cent. discount on a cash transaction?"

The Belle of the Family.
"Yes," said the old man to his visitor. "I am proud of my girl and would like to see them comfortably married, and as I have made a little money they will not go penniless to their husbands."
"There is Mary, twenty-five years old, and a really good girl. I shall give her \$1,000 when she marries. Then comes Bet, who won't see thirty-five again. I shall give her \$3,000, and the man who takes Eliza, who is forty, will have \$5,000 with her."

The young man reflected a moment and then asked, "You haven't one about fifty, have you?"

CHILDHOOD CONSTIPATION

Constipation—that disordered state of the digestive tract which is nearly always caused by improper feeding—can be readily regulated by the use of Baby's Own Tablets. These Tablets are a mild but thorough laxative. They are easy to take and are absolutely free from injurious drugs. Concerning them Mrs. Joseph Dion, Ste. Perpetue, Que., writes: "I have nothing but praise for Baby's Own Tablets. When my baby was three months old he was terribly constipated, but the Tablets soon set him right and now at the age of fifteen months he is a big healthy boy and this good health I attribute entirely to the use of the Tablets." They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Home and Love.
Because I like to sit at home
And hear the robins call and sing,
Or breathe the sweet the breezes bring
I've grown to pity those who roam
And have no spot however prest,
Where he can whisper, "Here I rest."

Because I like to hear the tone
That says I love you, needs no phrase
No spoken word, to cheer and praise
I pity those with none their own
Their very own to understand
The language of the eye and hand.

Because life has so much unrest,
Because for each the strife and stress,
God sends the humble home to bless,
And loving hearts, His best bequest
Not gold nor pleasure, pomp nor gain,
But Love that makes Life not in vain.

"Yes, I've got a comfortable, well-painted set of buildings," said the old citizen complacently, "and the best part of it is that there ain't an hour's work in the whole job; just spare minutes."

The word "honeymoon" originated from Germany, where it was the custom to drink mead—a sweet liquid made from honey—for thirty days after the wedding, "moon," of course, meaning "month."

LIKE NEW PERSON FROM HEAD TO FOOT

MISS ST. JEAN WISHES EVERY SICK PERSON KNEW THE WONDERS OF TANLAC

Suffered So After Every Meal She Thought She Had Heart Trouble.

"I just can't begin to express the gratitude and joy I feel over my restoration to health and I just wish every sick person in this world knew what I know about Tanlac," said Miss Irene St. Jean, 298 Maisson Neuve, Montreal, Que.

"For one whole year I didn't know what it was to eat anything without suffering the greatest distress afterwards. At times my heart palpitated so that I would go almost distracted. I thought I had heart trouble, but I know now that indigestion and nothing else was responsible."

"It is simply wonderful the way this grand Tanlac overcame all my troubles. I just feel like a new person in every way. I have a splendid appetite, my digestion is perfect. I have a calm and restful sleep at night and wake up in the morning feeling bright and cheerful."

Tanlac is sold by all good druggists.

Spanish Flu Minard's Liniment

Claims Many Victims in Canada and should be Guarded Against.
Is a Great Preventative, being one of the oldest remedies used. Minard's Liniment has relieved thousands of cases of Grippe, Bronchitis, Sore Throat, Asthma and similar diseases. It is an Eucalyptus. Thousands of bottles being used every day. For sale by all druggists and general dealers.

Mother! Open Child's Bowels With California Fig Syrup

Your little one will love the "fruity" taste of "California Fig Syrup" even if constipated, bilious, irritable, feverish, or full of cold. A teaspoonful never fails to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the sour bile, and undigested food out of the bowels and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful to-day saves a sick child to-morrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

Installation Plan.
He (time 11:45 p.m.)—"I hope your father doesn't object to my paying you visits?"
She—"No; but I think he would prefer having you pay them in instalments."

MONEY ORDERS.
The safe way to send money by mail is by Dominion Express Money Order.

Colors That Stimulate.
Color schemes for factory workers, with a view to increased production, are among the bright ideas of modern decoration specialists. In one case, at least, the idea has been adopted with the best results.

"We were asked to decorate a factory so that it would produce better workers," explained a member of a firm of expert house decorators.

"The walls were done in daffodil yellow; the corners and the capitals of the pillars being picked out with deep blue. The stimulating atmosphere created by that scheme was remarkable."

Do the colors and designs of our wall coverings really make their "victims" sad, mad, or sublimely happy? Several decorative artists think they may, especially as regards emotional, highly sensitive natures.

Thus, the psycho-craze has penetrated not only the wall-paper and colored wall industry, but also has crept into furnishing and furniture.

To dignity, beauty, and comfort in house decorating modernists have added the mental and moral aspects of complete schemes.

For instance, soft, gentle yellows must be the background of a room in which sufferers from neurasthenia are to find calm.

It would be unwise for a wife to enter into a contentious domestic discussion within red walls. Large patches of red in the home are admitted to be an irritant.

Welsh school children during the summer holidays have, in many parts of the Principality, helped to compile records of the districts in which they live.

Whenever you hear a man sticking to his own opinions with obstinacy and urging them with vehemence you may safely set him down as stupid.

Minard's Liniment prevents Spanish Flu

THIN, FLAT HAIR GROWS LONG, THICK AND ABUNDANT

"Danderine" costs only 35 cents a bottle. One application ends all itching dandruff, stops itching and falling hair, and in a few moments, you have doubled the beauty of your hair. It will appear a mass, so soft, lustrous, and easy to do up. But what will please you most will be after a few weeks use, when you see new hair—fine and downy at first—yes—but really new hair growing all over the scalp. "Danderine" is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. This delightful, stimulating tonic helps thin, lifeless, faded hair to grow long, thick, heavy and luxuriant.

RHEUMATIC ACHES QUICKLY RELIEVED

THE racking, agonizing rheumatic ache is quickly relieved by an application of Sloan's Liniment. For forty years, folks all over the world have found Sloan's to be the natural enemy of pains and aches.

You can just tell by its healthy, stimulating odor that it is going to do you good.

Keep Sloan's handy for neuralgia, sciatica, lame back, stiff joints, sore muscles, strains and sprains.

At all druggists—35c, 70c, \$1.40. Made in Canada.

Sloan's Liniment

SCALE AND RASH ON CHILD'S HEAD
Scalp Sore and Inflamed. Cross and Fretful. Lost Sleep. Cuticura Heals.

"From early infancy my little girl had a scale and rash on her head and her scalp was sore and inflamed. She was cross and fretful and suffered loss of sleep. Her hair would not grow, and her head was disfigured."

"This trouble lasted for several months and I finally sent for a free sample of Cuticura Soap and Ointment. Then I purchased a cake of Cuticura Soap and a box of Cuticura Ointment and now she is healed."

(Signed) Mrs. Lydia E. Kling, 760 Ashland Ave., Ocean Park, Calif. Use Cuticura for all toilet purposes.

Sample Each Free by Mail. Address: "Cuticura," Dept. 5, P.O. Box 100, Portland, Me. Sold every-where. Cuticura Soap shaves without mug.

Colors That Stimulate.

Mother Seigel's Syrup is now sold in 50c. and \$1.00 bottles at drug stores.

OF INTEREST TO WOMEN

Nurse Recommended Use of Lydia E. Pinkham's Vegetable Compound

Bothwell, Ontario—"I was weak and run down, had no appetite and was nervous. The nurse who took care of me told me to try Lydia E. Pinkham's Vegetable Compound, and now I am getting strong. I recommend your medicine to my friends, and you may use my testimonial."

(Signed) Mrs. D. Maxwell, R. R. No. 2, Bothwell, Ontario.

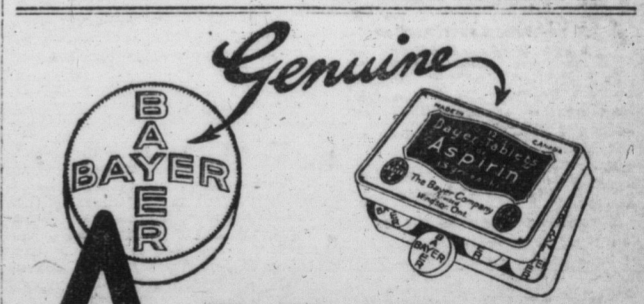

The reason why Lydia E. Pinkham's Vegetable Compound is so successful in overcoming woman's ills is because it contains the tonic, strengthening properties of good old-fashioned roots and herbs, which act on the female organism. Women from all parts of the country are continually testifying to its strengthening, beneficial influence, and as it contains no narcotics nor harmful drugs it is a safe medicine for women.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Mass.

CASCARETS 10¢

For Constipated Bowels—Bilious Liver

The nicest cathartic-laxative to physic your bowels when you have Headache, Biliousness, Colds, Indigestion, Dizziness, Sour Stomach, is candy-like Cascarets. One or two to-night will empty your bowels completely by morning and you will feel splendid. "They work" while you sleep. Cascarets never silt you up or gripe like salts, Pills, Calomel, or Oil, and they cost only ten cents a box. Children love Cascarets too.

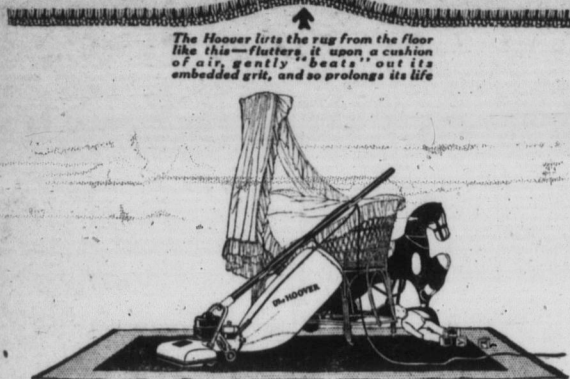

ASPIRIN

WARNING! Say "Bayer" when you buy Aspirin. Unless you see the name "Bayer" on tablets, you are not getting Aspirin at all. Why take chances?

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds, Toothache, Earache, Headache, Neuralgia, Lumbago, Rheumatism, Neuritis, Pain, Pain.

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark (registered) of Bayer Manufacture of Mono-acetic acid ester of Salicylic acid. Write to "Bayer" for more information. The Tablets of Bayer Company will be stamped with their central trade mark, the "Bayer Cross."

7 Sutherland 7 Sisters' Shampoo

7 Sutherland Sisters' Hair & Scalp Cleaner

A clean and delightful shampoo is Seven Sutherland Sisters' Scalp Cleaner.

If you are troubled with dandruff or with defective scalp circulation, you are on the path to baldness. You should begin at once—TODAY—to cleanse your hair and scalp with this scientific preparation. Delay means increasing danger of permanent injury to the delicate hair follicles.

Thousands of women all over America whose hair has been saved and beautified by the use of this preparation, testify to its merits.

Used with Hair Grower
"I find the Seven Sutherland Sisters' Hair and Scalp Cleaner the most delightful of all shampoos," writes a woman whose abundant, lustrous hair is the envy of her friends. "I have used it for many years in conjunction with the Sutherland Hair Grower. An occasional treatment with the shampoo keeps my hair in perfect condition, soft and clean."

The Sunday School auditorium of the Methodist church was gaily decorated in green and white on Saturday afternoon for the successful bazaar under the auspices of the Polyantha Mission Circle. Three long tables were arranged—one with fancy-work of all kinds, one with homemade baking and another with candy. In the centre of the room little tables were arranged at which lunch was served by the Circle girls. The proceeds amounted to \$96.20.

One of the most effective vermifuges on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

Studebaker

The New LIGHT-SIX

\$1495

f. o. b. Walkerville, Ont.

Studebaker is the world's largest builder of six-cylinder motor cars!

1921 was the TEST YEAR for motor car values. It was a year of discriminating buying. People did not buy cars, last year, as the result of a whim or fancy. They bought on the basis of intrinsic values.

And in such a year Studebaker built more six-cylinder cars than any other manufacturer in the world.

Look for these Features in the New Light-Six:

A car of 112-inch wheelbase, built complete in Studebaker plants, seating five adults in perfect comfort. Genuine leather upholstery. 40-H.P. 3½ x 4½ detachable head motor of exclusive Studebaker design. Intermediate transmission. Valves inclined at 20-degree angle for purposes of greater economy and smoother performance.

Patented internal hot-spot, which means greater efficiency. Completely machined crank-shaft and connecting rods. Cowl ventilator controlled from dash. Cowl parking lights. Thermostatic-controlled cooling system. Windshield wiper. Large plate glass window in rear of top. 32 x 4-inch cord tires.

Born
WATSON.—On Sunday, March 19, 1922, to Mr. and Mrs. Jas. W. Watson, a daughter.

In Memoriam
In loving memory of a dear wife and mother, Mrs. Marshall Moore, who departed this life two years ago today:

Dearest mother, thou hast left us, And thy loss we deeply feel; But 'tis God Who hath bereft us; He can all our sorrows heal.

—Husband and Family.
March 19, 1922.

Card of Thanks
Mr. and Mrs. Gordon Waterworth wish to thank their friends and neighbors for kindness shown them in their recent illness.

Changeable weather causes much Asthma, Bronchitis, Rheumatism and Neuralgia. RAZ-MAH for Asthma and T.R.C.s for Rheumatism are guaranteed. Ask H. I. Johnston.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

TOWN AND VICINITY

The early bird no doubt caught the worm, and the snow storm caught the bird.

Spring officially began on Tuesday, when the day and night were of equal length.

Miss Molly Tait is in Victoria Hospital, and is improving after a surgical operation.

There is probably nothing quite so sad as the actions of a man who tries to be funny.

John Strachan and Ed. Tomlinson are on the jury at the London spring assizes this week.

His many friends will regret to learn of the serious illness of Hugh McCutcheon of Mossa.

Several horses were shipped from Glencoe and Thameville to the Montreal market last week.

Miss Anna Reyecraft is home from Chatham and is confined to her bed with an attack of the flu.

Lee Clements has moved to Glencoe from London and has taken a house on O'Mara street. He is in the painting and paperhanging business.

It may be too early to plant potatoes or onions, but spring advertisements should go in at once.

County Crown Attorney J. B. McKillop, K.C., of London, is ill with pneumonia and is not expected to recover.

Clifford Ewing is now ledger keeper at the Royal Bank here, having been transferred from the branch at Appin.

John H. Woods will work the Thos. Dykes farm in Aldborough on shares and moved into the spare house on the farm last week.

Whatever the rest of this winter has in store, there is general agreement that the worst is over, and even the worst was not bad.

The town snow plow was out for the second time this season on Tuesday morning, following the worst snow storm of the winter.

Robert J. Young of Montreal, a former Glencoe boy, has been appointed assistant general manager for Canada of the United Hotels Company.

Seed catalogues are making their appearance. A little later, when many amateur gardeners see what comes up, they won't say it with flowers.

Nathaniel Urquhart of Ekfrid had the misfortune to get his left thumb cut off and the back of the hand lacerated in a buzz saw on Saturday afternoon.

"Most of the worrying about prohibition failing to prohibit seems to be done by people who admit that they don't want prohibition," says the St. Marys Argus.

Bought a box of Puffed Wheat yesterday. You know the price we paid. And when you consider what the farmer gets, Puffed Wheat seems to be about the right name for it.

S. Irwin was at Scranton, Pa., last week attending the funeral of his sister, Mrs. M. W. Nettleton. Rev. J. Y. Irwin of Wilmington, Del., a brother, was also at the funeral.

Times ain't what they used to be. In the old days the men put powder in their guns and went out to hunt the deer, but nowadays the deer put powder on and go out and hunt the men.

County Clerk John Stewart has received word that his brother, Alex. Stewart, K.C., of Edmonton, is much improved. Mr. Stewart was recently in a very critical condition following an operation.

Mrs. James Lethbridge was called to Toronto last week owing to a serious illness there of her sister, Mrs. George C. McFarlane. The condition of Mrs. McFarlane was reported on Tuesday to be quite low.

At a recent meeting of London presbytery it was decided that the recommendation of the presbytery be given W. E. McDonald of Glencoe, a student desirous of engaging in missionary work throughout the summer.

Two to three months of cold, backward weather is not a cheerful prospect—yet this is what some weather prophets of local repute claim to have read in the bizarre conditions which ushered in the first day of spring.

It cannot be said that Hon. F. C. Biggs was boosting the hydro-radial enterprises when he predicted that within ten years almost all merchandise, especially milk, within a 60-mile radius of Toronto, would be moved by auto trucks.

County Engineer Charles Talbot is preparing plans for county roads improvements this year that will approximate \$300,000. The bulk of this amount will be for maintenance. About \$25,000 will be expended on new bridges and culverts.

Gordon Burchiel returned to his home in the Peace River district last week. He is the youngest son of Mr. and Mrs. Wm. Burchiel, Victoria street, south. His many friends in Glencoe and vicinity are always pleased with a visit from Gordon and we understand he is making good in the West.

The death occurred at Mount Clemens, Mich., on Friday, March 17th, of Catharine, widow of the late J. E. Eastman of London, who died in October, 1920. Mr. and Mrs. Eastman were well known and very much esteemed in Glencoe where they resided for a number of years. The funeral took place at London on Monday.

The social committee of the Presbyterian Guild, Misses Gaudy McAlpine and Margaret McLean, presented a most interesting program to the large number present at its meeting on Monday evening. Selections by the M. S. W. L. orchestra were much appreciated. Concerts were indulged in, including "a trip to the coast" which caused great excitement. Refreshments were served.

A farmer last fall said, when his brother farmers were complaining of low prices for hogs and high prices for feed and stated that they were going out of them, he decided it was a good time to go into them. Now when hogs are becoming fewer and prices much higher he has a fine bunch coming along. Today farmers are going back to hog raising and young pigs are bringing a high price.

Rev. T. J. Charlton, rector of St. John's church, had the misfortune to get the small finger of his right hand crushed on Tuesday evening. Mr. Charlton was on his way to Wardville to conduct a service for Rev. Mr. Murphy, and in getting off the train at Newbury the door of the car closed suddenly on his finger. Dr. Owens of Newbury attended to the injury, which required several stitches.

An action for damages which will probably come up at the sessions of the supreme court which opened at London on Monday is that of Wm. McRae of Glencoe against Leslie D. Thompson, a London contractor. Mr. McRae, the plaintiff, claims that, on July 1st, 1921, defendant gave him into custody at Port Stanley upon a false charge of picking his pocket, and caused him to be imprisoned in the lock-up until the following morning.

If one be troubled with corns, he will find a Holman's Corn Remover an application that will entirely relieve suffering.

UNABLE TO WALK FOR A YEAR

Paralysis Entirely Relieved by "Fruit-a-lives"

The Wonderful Fruit Medicine

Paralysis is a break-down of the Nervous System and affects the victim in various ways. Sometimes, nervousness makes itself known by hysteria, insomnia, constant headaches, or it may be so bad that one is partially or completely helpless in some part of the body, just as Mrs. Heacock was.

SAULT STE MARIE, Ont.

"When I was twenty-eight years of age, my doctor advised me to have an operation, which I did and it proved very serious, leaving me weak and unable to walk for a year. Seeing your 'Fruit-a-lives' advertised in the papers, I decided to try them. I continued to use them regularly, and today I am able to go about my home duties and care for my family."

MRS. J. W. HEACOCK.

Any form of Nervousness is often caused by, and is always aggravated by, Constipation, which poisons the blood, irritates the kidneys and inflames the nerves. "Fruit-a-lives" stimulates the action of liver and bowels, kidneys and skin—tones and sweetens the stomach—keeps the blood pure, and builds up the entire nervous system.

In a word, "Fruit-a-lives" has proved that it is the most scientific and effective remedy in the world for Nervousness or a disordered condition of the nervous system.

—50c a box, 6 for \$2.50, trial size, 25c. At dealers or sent postpaid by Fruit-a-lives Limited, Ottawa, Ont.

Spring Style Showing

BEAUTIFUL SHOES

All of us are not gifted with the "sixth sense" for smartness and fashion. Those who are appreciate "Russo's Fashionable Footwear," being always assured that each design is an original distinctive creation. Superiority of material, exclusiveness of style, is always evident in our footwear—never in the prices.

Glencoe's Exclusive Shoe Store

The Y. P. S. of Knox church, Newbury, will present the play, "Don't Marry for Money," in the town hall, Glencoe, Friday evening, March 31st, under the auspices of the Presbyterian Guild.

New Roofing Service.—We are prepared to furnish any kind of roofing material, labor, nails, etc. All work done by experienced mechanics. Price by the square laid on your roof. See it at Wright's Hardware.

McPherson & Clarke, Glencoe, Ont.

The test of time.—Frost fence, with its No. 9 wire in both laterals and uprights, its rust-proof extra heavy galvanizing and its famous permanent lock, outlives every other fence. See it at Wright's Hardware.

Why worry about that roofing job? We have cedar shingles, Brantford slates, roof roofing, galvanized iron, etc., and will give you a price per square laid on your roof, everything furnished.—McPherson & Clarke, Glencoe, Ont.

Peabody's, Walker's, Snagproof and all heaviest standard overalls and smocks, \$1.98; heavy work shirts, 95c; serviceable union socks, 25c and 35c; heavy wearing shoes for men, \$2.98 and \$3.75, at J. N. Currie & Co's.

Wm. June of North Newbury expects a carload of fence wire on or before April 1. It will pay farmers to get in touch with him and get their wire at greatly reduced prices.

Last year he handled three carloads, guaranteed best galvanized fence in the market. This year every rod is guaranteed to be perfect, as Peerless fence tells for itself.

Special for Saturday afternoon, March 25th—40 bags hard wheat flour at \$4.25 per cwt.; 20 bags feed flour at \$2 per cwt. A prize of 25 lbs. of flour will be given for the best loaf of bread baked from our flour; also 1 bus. of potatoes for best dozen buns. Bread and buns to be sold and proceeds to go to the Sick Children's Hospital fund. Judging at 4 p.m. and sale of bread immediately after.—The Co-operative Store.

Why can you afford Frost fence this year—EIGHT VITAL REASONS. Economies that will help pay for Frost fence:—(1) Improve appearance, value and salability of your farm; (2) add about 2 acres to crop production for every 500 rods of Frost fence replacing old fences; (3) remove breeding ground for weeds; (4) lessen work of fighting weeds; (5) you can sell wood from old fence; (6) better crop protection, strongest fence made; (7) easiest and cheapest to put up and maintain; (8) Frost fence costs no more.—Get Frost fence at Wright's Hardware.

Old papers for sale at The Transcript office.

Wright's Hardware Store

ANNOUNCEMENT

Present trade conditions make it absolutely necessary to make some changes in existing methods of doing business. Manufacturers and wholesale dealers have realized this, and in consequence have so shortened credit terms that in order to purchase goods in the right markets and at right prices settlements must now be made on a cash basis.

Then, again, the higher prices of goods now prevailing means a much larger investment of capital, and in an effort to keep prices within bounds the percentage of profit now is materially reduced when compared with profits obtained under normal conditions before the war, and in face of this reduction in profits the overhead expenses of doing business have increased.

During the past five years I can honestly say that no excessive profits have been taken in my business, and I am firmly convinced that the same can be said of the other retail merchants in our town.

After a most careful study of the situation, and with a firm conviction that the necessity for credit no longer exists, I wish to announce that after April 1st my business will be conducted on a CASH basis. Monthly account terms will, as usual, be given to corporations, factories, contractors, schools, churches, drillers, and customers building or painting houses. Goods ordered by phone or letter will be due at end of the month in which ordered, settlement of monthly accounts to be made by 10th of the month following purchase.

I trust that my customers and the public in general will appreciate the fact that I am taking this step in an endeavor to give them better prices and better service than would be possible under other conditions, and would solicit a continuance of the splendid patronage accorded me in past years.

THE MYSTERY OF THE GREEN RAY

By William Le Queux

CHAPTER XIV.—(Cont'd.)

After the meal we adjourned to the hut above the falls. Hilderman certainly had some right to be proud of his view. It was magnificent. We stood outside the door and gazed out to sea, north, south and west, for some minutes.

"You have the same uninterrupted view from inside," said Hilderman, as we mounted the three steps to the door. He held the door open, and I stepped in first, followed by Dennis and Fuller. The window extended the whole length of the room, and folded inwards and upwards, in the same way as some greenhouse windows do. Suddenly I laughed aloud.

"What's the joke?" asked Hilderman.

"This," I said, pointing to a large carbon transparency of a mountain under snow, which hung in the window on the north side. "You've no idea how this has been annoying us over at Invermullach."

"How?" asked Dennis.

"It swings about in the breeze," I replied, "and it reflects the light and catches everybody's eye. It's a very beautiful photograph, Mr. Hilderman, but, like many human beings, it's exceedingly unpopular owing to the position it holds."

"A thousand apologies, Mr. Ewart," said the American. "It shall be removed at once."

"Oh, not at all!" I protested. "Surely you are entitled to hang a positive of a photograph in your window without receiving a protest from neighbors who live nearly three miles away."

"That's Invermullach Lodge, then, across the water," Dennis asked.

"Yes," I replied, and we forgot about the transparency, which remained in undisputed possession of a pitch to which it was certainly entitled. We sat and smoked, and looked out at the mountains of Skye and the wonderful panorama of sea and loch, with an occasional glance at the gurgling waterfall at our feet, and presently I picked up a copy of an illustrated paper which was lying at my hand.

I turned the pages idly, and threw a cursory glance at the photographs of the week's brides, and the latest efforts of the theatrical press agents, and I noticed without thinking anything of the fact, that one page had been roughly torn out. It was about to remark that probably the most interesting or amusing picture in the whole paper had been accidentally destroyed, when Fuller leaned across Dennis, and took the paper out of my hand.

"Don't insult Mr. Hilderman's precious view by reading the paper in his smoking-room, Mr. Ewart," he said, with a loud laugh. "As a Highlander you should have more tact than that."

Hilderman turned round, and looked from one to other of us.

"What paper is he reading?" I didn't know there was one here.

I explained what paper it was, adding, "I quite admit that it was a waste of time when I ought to be admiring your unrivaled view, Mr. Hilderman. I offer you my sincere apologies."

Hilderman threw a quick glance at Mr. Fuller.

"Better give it him back, Fuller," he said. "There is nothing more annoying than to have a paper snatched away from you when you're half-way through it."

Shortly after that Fuller declared that he must be leaving, and asked Hilderman rather pointedly whether he felt like a trip to Loch Duich. I determined to step in with an idea of my own.

"I was going to make a suggestion myself, Mr. Hilderman," I began, "but it doesn't matter if you are engaged."

"Well, I don't know that I'm particularly keen to come with you this afternoon, Fuller," he remarked. "What was your suggestion, Mr. Ewart?"

"I was wondering whether you would come over to Invermullach with Burnham and me—and—er—have a look round with us?"

"Well, if Fuller doesn't think it exceedingly rude of me, I should like to," the American replied, "especially as Mr. Burnham will be leaving you tomorrow, or the day after at latest."

"Incidentally, I don't know how we

shall get back without you," I pointed out. "You see, we sent the motor-boat on."

"By Jove, so you did!" Hilderman exclaimed. "Well, that settles it."

"I could take them on the Fiona and put them ashore," his companion persisted. Hilderman gave Fuller a look which seemed to clinch the matter, however, for the little man beamed at me through his spectacles, and explained that if he took us in his yacht it would be killing two birds with one stone.

"Still, of course, my dear fellow," he concluded, "you must please yourselves entirely."

"So we saw him safely on board the Fiona, and then started for Invermullach in Hilderman's magnificent Wolseley launch.

"Fuller knows me," he explained, by way of apology. "I go up with him sometimes as often as three times a week, but I gathered that you asked me with a view to discussing the mystery of the green flash, or whatever you call it."

"You're quite right; I did," I replied. "I simply want to come and have a look at the river, and see what you can make of it."

"Anything I can do, you know, Mr. Ewart," he assured me. "I shall be delighted to do. If you think it will be of any assistance to you if I explore the river with you—well, I'm ready now."

From that we proceeded to give him, at his request, minute details of Garne's conclusions on the matter, and I am afraid I departed from the truth with a ready abandon and a certain relish of which I ought to have been most heartily ashamed.

When we stepped ashore at Invermullach Hilderman looked back across the water.

"If I waited for Fuller," he laughed, "I should have been stuck there yet. He's let the water go off the boil or something."

We went up to the house and had tea on the verandah, for the General had taken Myra up Loch Hourin in the motor-boat. After tea we got to business.

"Now that I've had a very refreshing cup of tea," the American remarked, "I feel rather like the mouse who said 'Now bring out your cat' when he had consumed half a teaspoonful of beer! Now show me the river."

"I don't want to sound at all panicky," I said, "but I think I ought to tell you that our experiences at the particular spot we are going to have—well, shall we say they have provided a striking contrast from the routine of our daily life?"

"I'm not at all afraid of the river, Mr. Ewart," he replied lightly. "I should be the last person to doubt the statements of yourself and Miss McLeod and the General, but I am inclined to think the river has no active part in the proceedings."

"You hold the view that it was the merest coincidence that Miss McLeod and the General both had terrible and strange experiences at the same spot?" asked Dennis.

"It seems to be the only sensible view to take," Hilderman declared emphatically. "I must say I think Miss McLeod's blindness might have happened in her own room or anywhere else, and the General's strange experience seems to me to be the delusion of overwrought nerves. I confess there is only one thing I don't understand, and that is the disappearance of the dog. That's got me beaten, unless it was that crofter."

"We intended to go to the Saddle tomorrow and make a few investigations. I was going by myself," I added cautiously, "but I think I can persuade Burnham to stay and go with me."

"I certainly should stay for that, Mr. Burnham," Hilderman advised. "One more day can't make much difference."

"I'll think it over," said Dennis, careful not to commit himself rashly.

We came to the Dead Man's Pool, and crossed over the river, and began to walk up the other side.

"This is about the right time for a manifestation of the mystery," I remarked lightly, though I was far from laughing about the whole thing.

"Well," said Hilderman, "if we are to see the green flash in operation I hope it will be in a gentle mood, and not pull our teeth out one by one or anything of that sort." Evidently he had little sympathy with our fear of the green ray and the awe with which we approached the neighborhood of the river.

"Are we going to the right place?" Dennis asked. "I mean the identical spot?"

"That lozenge-shaped thing up there is the Chemist's Rock," I replied, "and the other important place is Dead Man's Pool, which we have just left."

"Miss McLeod went blind on the Chemist's Rock, didn't she?" Dennis inquired.

"Yes," I replied, with a shudder. "She was fishing from it."

"Then suppose we go back to the pool," he suggested. We agreed readily enough, for I had no desire to hang about the fateful rock, and Hilderman for his part seemed to have no faith in the idea at all. I fancy he thought it would make no difference to us in what part of the river we might be, only provided we didn't fall in. So Dennis led the way back, and he was the first to pick his way to the middle of the stream. Hilderman and I were some distance behind. Suddenly we stopped. Suddenly we looked at each other. He had begun to cough and splutter, and he seemed rooted to the small stone he was standing on in the middle of the stream. In a flash I understood. I had with me a very small bottle of oil, and I had just poured it into the water. I had begun to cough and splutter, and he seemed rooted to the small stone he was standing on in the middle of the stream. In a flash I understood. I had with me a very small bottle of oil, and I had just poured it into the water. I had begun to cough and splutter, and he seemed rooted to the small stone he was standing on in the middle of the stream. In a flash I understood. I had with me a very small bottle of oil, and I had just poured it into the water.

"To undress the baby, take the clothes off over his feet. If held on the lap, a large bath towel should be used to prevent his tender skin from coming in contact with the rough or worsted dress and to receive him when lifted out of the tub. More conveniently he may be undressed on a table."

Before putting the baby into the tub, wrap him in a small blanket or large towel, and wash his face, head, and ears, being careful not to get soap into his eyes and mouth. Very little soap is needed. It is most important that the skin should be rinsed thoroughly. Pat the skin dry with a soft towel, taking care to dry well back of the ears and in the soft folds of his neck. The eyes should be cleansed with absorbent cotton dipped in boric acid solution. Squeeze a drop into each eye, being careful to use a fresh piece of cotton for each eye. The mouth and nose then should be cleaned with an applicator dipped in boric acid solution. An applicator is made by twisting a small tuft of absorbent cotton upon the end of a wooden tooth pick in such a way as to make a rounded pad. If made correctly, the cotton will not slip off readily. Be careful not to injure the ears. It is better to ask your physician or the nurse to show just how to cleanse them correctly.

It is well to lay a bath towel in the bottom of the tub and put in only a small amount of water at first. If baby is plunged immediately into a tub of water, he will be startled and may never enjoy a tub bath; but if the water is added gradually, while baby's attention is diverted to something else, he soon learns to enjoy the morning dip.

First soap the baby's entire body thoroughly; then place him in the bath, holding him with the left forearm under the neck and shoulders, the left hand under his arm, and lifting his feet and legs with the right hand. Support him while in the tub with the left hand and arm. Sponge the entire body with the right hand; then lift him out and wrap him in a bath towel. Dry carefully with the soft towel, patting the skin gently. Never rub the baby's tender skin with anything less smooth than the palm of the hand. A little pure talcum may be used in the creases and folds of the skin, under the arms, and around the buttocks; but it should not be used so freely as to clog the pores of the skin, and never should be used until the skin has been dried as thoroughly as possible with the towel. A highly perfumed powder should not be used.

The bath should be given as nearly as possible at the same hour each day, at least an hour after feeding, and at first should last only about three minutes. Later it may last five minutes. As the baby grows older and stronger he may be allowed to play in the water for about 15 minutes, for the skin absorbs some water, which is beneficial to the system, re-

freshes the muscles and aids in overcoming many wrong conditions.

Salads furnish variety and vitamins. Here are a few suggestions for simple salads that the family will greatly enjoy:

Sliced oranges and sliced Spanish onions served with French dressing. Cauliflower cut up in small pieces and served with peanuts or any other kind of nuts and thousand island dressing.

Cabbage chopped fine and served with nuts and mayonnaise dressing makes an inexpensive and tasty salad. Raw carrots ground through a meat grinder and served with either nuts, peas, or tuna fish, and mayonnaise dressing make a delicious and a pretty salad.

Spinach cooked and served with cheese and French dressing is another possible combination.

French Tax Burdens.

The French taxpayers know that they will have to pay twenty-two billion and a few hundred million francs this year.

In 1870 the last budget of the empire rose to 1,600,000,000; then came the war, and in 1872 the normal budget reappeared, increased by 1,000,000,000.

From these 2,600,000,000 it progressively increased until 1914 to 5,000,000,000, the greatest part of which was devoted to the expenses necessitated by the war for national defense.

To-day the budget is more than 22,000,000,000.

Rupture Kills 7,000 Annually

Seven thousand persons each year are laid away—the burial certificate being marked "Rupture." Why? Because the unfortunate ones had neglected themselves or had been merely taking care of the sign (swelling) of the affliction and paying no attention to the cause. What are you doing? Are you neglecting yourself by wearing a truss, appliance, or whatever name you choose to call it? At best, the truss is only a make-shift—a false prop against a collapsing wall—and cannot be expected to act as more than a mere mechanical support. The binding pressure retards blood circulation, thus robbing the weakened muscles of that which they need most—nourishment.

But science has found a way, and every truss sufferer in the land is invited to make a test right in the privacy of their own home. The PLAPAO method is unquestionably the most scientific, logical and successful self-treatment for rupture the world has ever known.

The PLAPAO PAD when adhering closely to the body cannot possibly slip or shift out of place, therefore cannot chafe or pinch. Soft as velvet—easy to apply—inexpensive. To be used whilst you work and whilst you sleep. No straps, buckles or springs attached.

Learn how to close the hernial opening as nature intended to the rupture CAN'T come down. Send your name and ten cents, coin or stamps, to-day, to PLAPAO CO., 745 Stuart Bldg., St. Louis, Mo., for FREE trial Plapao and the information necessary.

A great occasion is worth to a man exactly what his training has enabled him to make of it.

Woman's Interests

Bathing the Baby.

Baby should be bathed at least once a day. During hot weather one or two extra sponge baths may be given; but as a rule the daily bath should be a tub bath. It can be done more quickly and thoroughly, and the baby is not so liable to take cold.

The room should be warm; an open fire is desirable in cool weather. The water should be comfortably warm but not hot, about 90 to 95 deg. F. It may be tested with the bare elbow, never the hand. However, a bath thermometer is best.

Everything needed should be in readiness before baby is undressed. In a small wicker basket, painted white, should be kept a cake of pure white castile soap, a small bottle of olive oil, pure talcum powder, boric acid, four dozen safety pins of assorted sizes, and a roll of absorbent cotton. A clean wash cloth, clean towels, and a full set of clean clothing should also be in readiness.

To undress the baby, take the clothes off over his feet. If held on the lap, a large bath towel should be used to prevent his tender skin from coming in contact with the rough or worsted dress and to receive him when lifted out of the tub. More conveniently he may be undressed on a table.

Before putting the baby into the tub, wrap him in a small blanket or large towel, and wash his face, head, and ears, being careful not to get soap into his eyes and mouth. Very little soap is needed. It is most important that the skin should be rinsed thoroughly. Pat the skin dry with a soft towel, taking care to dry well back of the ears and in the soft folds of his neck. The eyes should be cleansed with absorbent cotton dipped in boric acid solution. Squeeze a drop into each eye, being careful to use a fresh piece of cotton for each eye. The mouth and nose then should be cleaned with an applicator dipped in boric acid solution. An applicator is made by twisting a small tuft of absorbent cotton upon the end of a wooden tooth pick in such a way as to make a rounded pad. If made correctly, the cotton will not slip off readily. Be careful not to injure the ears. It is better to ask your physician or the nurse to show just how to cleanse them correctly.

It is well to lay a bath towel in the bottom of the tub and put in only a small amount of water at first. If baby is plunged immediately into a tub of water, he will be startled and may never enjoy a tub bath; but if the water is added gradually, while baby's attention is diverted to something else, he soon learns to enjoy the morning dip.

First soap the baby's entire body thoroughly; then place him in the bath, holding him with the left forearm under the neck and shoulders, the left hand under his arm, and lifting his feet and legs with the right hand. Support him while in the tub with the left hand and arm. Sponge the entire body with the right hand; then lift him out and wrap him in a bath towel. Dry carefully with the soft towel, patting the skin gently. Never rub the baby's tender skin with anything less smooth than the palm of the hand. A little pure talcum may be used in the creases and folds of the skin, under the arms, and around the buttocks; but it should not be used so freely as to clog the pores of the skin, and never should be used until the skin has been dried as thoroughly as possible with the towel. A highly perfumed powder should not be used.

The bath should be given as nearly as possible at the same hour each day, at least an hour after feeding, and at first should last only about three minutes. Later it may last five minutes. As the baby grows older and stronger he may be allowed to play in the water for about 15 minutes, for the skin absorbs some water, which is beneficial to the system, re-

freshes the muscles and aids in overcoming many wrong conditions.

Salads furnish variety and vitamins. Here are a few suggestions for simple salads that the family will greatly enjoy:

Sliced oranges and sliced Spanish onions served with French dressing. Cauliflower cut up in small pieces and served with peanuts or any other kind of nuts and thousand island dressing.

Cabbage chopped fine and served with nuts and mayonnaise dressing makes an inexpensive and tasty salad. Raw carrots ground through a meat grinder and served with either nuts, peas, or tuna fish, and mayonnaise dressing make a delicious and a pretty salad.

Spinach cooked and served with cheese and French dressing is another possible combination.

French Tax Burdens.

The French taxpayers know that they will have to pay twenty-two billion and a few hundred million francs this year.

In 1870 the last budget of the empire rose to 1,600,000,000; then came the war, and in 1872 the normal budget reappeared, increased by 1,000,000,000.

From these 2,600,000,000 it progressively increased until 1914 to 5,000,000,000, the greatest part of which was devoted to the expenses necessitated by the war for national defense.

To-day the budget is more than 22,000,000,000.

Rupture Kills 7,000 Annually

Seven thousand persons each year are laid away—the burial certificate being marked "Rupture." Why? Because the unfortunate ones had neglected themselves or had been merely taking care of the sign (swelling) of the affliction and paying no attention to the cause. What are you doing? Are you neglecting yourself by wearing a truss, appliance, or whatever name you choose to call it? At best, the truss is only a make-shift—a false prop against a collapsing wall—and cannot be expected to act as more than a mere mechanical support. The binding pressure retards blood circulation, thus robbing the weakened muscles of that which they need most—nourishment.

But science has found a way, and every truss sufferer in the land is invited to make a test right in the privacy of their own home. The PLAPAO method is unquestionably the most scientific, logical and successful self-treatment for rupture the world has ever known.

The PLAPAO PAD when adhering closely to the body cannot possibly slip or shift out of place, therefore cannot chafe or pinch. Soft as velvet—easy to apply—inexpensive. To be used whilst you work and whilst you sleep. No straps, buckles or springs attached.

Learn how to close the hernial opening as nature intended to the rupture CAN'T come down. Send your name and ten cents, coin or stamps, to-day, to PLAPAO CO., 745 Stuart Bldg., St. Louis, Mo., for FREE trial Plapao and the information necessary.

A great occasion is worth to a man exactly what his training has enabled him to make of it.

WALNUT PRODUCTION IN B.C.

TREES THRIVE WELL ON ROUGH LAND.

Canada Imports Over Million Pounds of Nuts Which Might be Grown at Home.

It is only as Canadian life progresses and experimenters and investigators of all kinds give their experiences to the world that the wide latitude of the possibilities the Dominion offers in all lines is revealed. The already wide extent of agricultural production is constantly being added to ever since it was first dogmatically stated that wheat would never be grown successfully in the Canadian North-West, and experience is making ceaseless revelations of new lines of production to which Canadian soil and climate prove admirably adapted.

Alderman Tisdall of Vancouver, as an after-dinner treat to visitors at his ranch in the Fraser Valley, serves walnuts grown on the ranch, the excellence of which invariably causes comment and a certain amount of astonishment at this fruit being grown so successfully within forty miles of the Pacific metropolis. These walnuts are indeed equal in appearance, quality and flavor to the California variety as attested by the California Walnut Growers' Association, to whom samples were submitted for examination. The trees were grown on the ranch from seed, and the alderman is an enthusiastic advocate of the permanent establishment of a walnut growing industry in the Pacific coast province.

A valuable feature in walnut production is that the trees thrive admirably and produce abundantly on rough land. Trees are usually planted about fifty feet apart, so that a substantial orchard can be established on a small acreage. The Franquette and Mayette varieties have been found the most suitable for British Columbia growth, and that it is more satisfactory to grow the American black walnut and graft the chosen variety upon it. Hard-shelled walnuts have disappeared from commerce and what is known as the soft-shelled English walnut dominates the market today. It has been proved that these grow admirably on the Canadian Pacific coast.

Possibilities of the Industry. Squirrels do not bother the growing crop in settled communities, neither is it the object of attack from caterpillars. The blue-jay in British Columbia is responsible for a certain amount of depreciation, managing to crack the nuts in some mysterious manner, but this menace is remediable with a small rifle.

There is a double advantage in growing walnut trees in as much as they also make excellent shade trees, being considered in this regard the equal of soft maples. As such it is advocated that they be planted on smaller areas—in back yards and about houses. In ten years, in addition to their sheltering and beautifying effect, they will be producing a healthy crop annually whilst the commercial value of walnut wood is consistently high.

In marketing walnuts the high grade is selected for dessert purposes, the remainder being divided into lesser grades for cooking, candy-making, etc. Two hundred pounds per tree is not a large yield, which, sold at the lowest estimate of 25 cents per pound returns \$50 per tree. An orchard of one hundred trees at this rate would give annually the very comfortable income of \$5,000. This estimate is low, as, at the time of writing, walnuts are selling in Vancouver at 50 cents per pound.

The possibilities of this industry, points out Alderman Tisdall, to British Columbia, standardized and with scientific methods introduced, are excellent. Walnuts have taken their place as a staple everyday food, used by the housewife, on account of the nutritious qualities, the year round. Canada imports every year from the United States, the United Kingdom, France and China, a million and a half pounds of these nuts which she might be producing herself.

According to California growers, they can be stored for a year or more awaiting disposal without loss from depreciation. With encouragement this promising industry should secure firm footing in British Columbia.

The Defender of the Faith.

A great scholar of the Middle Ages wrote many books, and his learning and piety were praised everywhere. He held also many arguments with heretics, and prided himself on his skill in controversy. One night an angel came to him, and said:—

"The greatest defender of the faith in the city is the widow who lives opposite."

ULSTER POLICE AND IRISH FREE STATE FORCES LINE UP AT BORDER

Bridges Leading Across Frontier Blown Up and Roads Made Impassable—Collision Near Clones Prevented by Presence of Women and Children.

Dublin, March 19.—A serious position has developed on the Free State and Ulster border during the last few days. Warlike activities are now the order of the day, and raids over the frontier are expected. Large forces of the I.R.A. and Ulster special constabulary have been concentrated in the Aughmacloy and Caledon districts along the boundary dividing Monaghan and Tyrone. Five hundred men of the Free State army were rushed to the scene in motor cars, and took up positions along the frontier. A flax mill and a number of farm houses were commandeered for the accommodation of the men, the inhabitants being forced to look for shelter elsewhere. Nearly all of the bridges leading across the border have been blown up, and the roads in the vicinity rendered impassable, so that intercourse is possible only over the fields and by lane ways.

At several strategic points fortifications have been set up. Desultory firing was kept up over a wide area of the Free State boundary throughout the greater part of Saturday. Several Protestant families, it is stated, have been forced to leave their homes in the Glasslough district of County Monaghan, and cross over to sympathizers in the Caledon district of Tyrone. Residents were threatened, and several Roman Catholics in Caledon and neighborhood were warned to leave by Saturday night.

Colonel McClintock, county commandant of the Tyrone special constabulary, visited the district in the evening and prevented reprisals being carried out. Afterward, he and others visited a bridge which was recently destroyed near the border, midway between Aughmacloy and Caledon, and while reviewing the demolished structure they were surprised by a number of shots fired at them from across the border. They withdrew to safer ground. An additional force of police was sent immediately to the district.

It has been decided to ask the authorities at Belfast for more adequate protection along the border. The Northern forces blew up a large stone bridge which separated the Northern and Southern territory, one and a half miles from Clones. Hearing the loud explosion, a strong patrol of the Free State army left the barracks at Clones and marched to the spot. A collision between the rival forces was averted by a crowd of women and children who came to view the demolished bridge and walked into the line of fire.

INDIAN CRISIS EXPECTED AFTER DEPARTURE OF PRINCE OF WALES

Royal Guest En Route to Japan After Four Months' Tour—Correspondent Sums Up Situation in Eastern Empire.

A despatch from London says:—The Prince of Wales left Karachi on Friday for Ceylon en route to Japan, after a four months' tour of India.

The results of the tour were disclosed in a long cable despatch received on Friday by the Daily Express from Sir Percival Phillips, its correspondent in India. The chief feature of the despatch was its amazing frankness.

Sir Percival, who accompanied the Prince during every stage of his tour, says, regarding it:

"In my own opinion, the Prince's tour has not influenced the political situation one way or another.

"It would be idle to assert that the influence of the Prince's personality has been felt by a majority of the people of India, for he has not come in contact with them there as he did in Canada and Australia.

"The Prince has had a general view of the greater part of India, but few and scanty glimpses of the life of the natives."

Sir Percival Phillips, like the other British correspondents, pays a glowing tribute to the tact and determination of the Prince in facing a difficult situation.

Reviewing the general situation in India, the correspondent declares a crisis is inevitable. He says:

"I hear on all sides, 'We are in for an explosion when the Prince leaves. Let us get it over. It will clear the air and end the uncertainty which has been paralyzing all official and commercial India. Let the Indians be given every reasonable concession in self-government, and, above all, re-establish the prestige of Great Britain, which has been steadily diminishing.'"

A despatch from London says:—The close of the tour of the Prince of Wales in India leads several of the principal newspapers here to express the opinion that, on the whole, the journey of His Royal Highness was eminently successful. The Times holds the opinion that in any case India would have passed through a troublesome period in the past few months, if there had been no Royal visitor there, and that while the approach of the Prince made a pretext in some cities for subversive movements by agitators, which sometimes had unhappy results, the Prince's winning personality conquered in the end.

SULTAN AHMED FUAD PASHA PROCLAIMED KING OF EGYPT

Field Marshal Viscount Allenby Made Formal Call on New Sovereign—British Government Reserves Certain Matters to its Own Discretion.

A despatch from Cairo says:—The proclamation of the Sultan Ahmed Fuad Pasha, as King of Egypt on Thursday, was accompanied by the firing of salvos of 101 guns in Cairo, Alexandria and Port Said, and of 21 guns in all the other provincial capitals.

Field Marshal Viscount Allenby, hitherto the British High Commissioner, accompanied by members of his staff, called at the Royal Palace and congratulated King Fuad, whom he addressed as "Your Majesty."

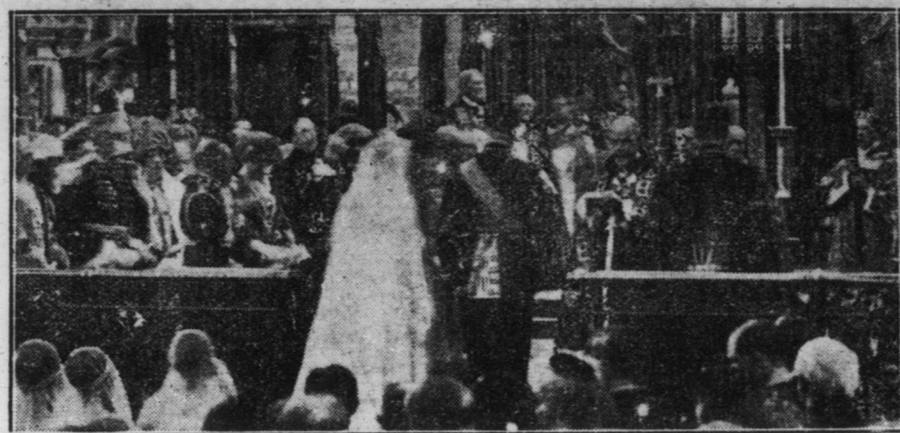

The British Government has specifically and exclusively reserved to its own discretion the following matters: (1) Security of British Imperial communication in Egypt; (2) defence of Egypt against all foreign aggression or interference, direct or indirect; (3) protection of foreign interests and foreign communities in Egypt.

An incidental point is that Germany was deprived of her pre-occupation with Egypt by the Treaty of Versailles. German and other ex-enemy citizens in Egypt do not possess extraterritorial privileges enjoyed by other nationals.

Sir Herbert Samuel, High Commissioner for Palestine, has recovered from a severe illness.

Premier T. C. Norris has tendered the resignation of the Provincial Government of Manitoba to the Lieutenant-Governor, Sir James Aikins.

Viscount Peel has been appointed Secretary of State for India, succeeding Right Hon. E. S. Montagu. Lord Peel is a Conservative, a grandson of the famous Sir Robert Peel, and a son of the former Speaker of the House of Commons.

THE ROYAL WEDDING
Princess Mary and Lord Lascelles at the altar in Westminster Abbey. The officiating clergy and some of the bridesmaids are shown in the photograph. The King stands at the left of the bride.

MANITOBA OF THE PRESENT

A New Map Provides Latest Information on Land Conditions.

In peace as in war one of the first essentials is a good map. On the opening of hostilities map-making establishments were called upon to provide maps of the war zones to the maximum of their capacity; as every feature of the country had to be known to officers responsible for military movements.

In peace times accurate maps are in every sense fully as important. All land transfers, mining claims, forestry permits, or registrations of possession are established by geographical or astronomical position. To provide this information, which is especially important where new settlement is proceeding, the Natural Resources Intelligence Branch of the Department of the Interior has recently issued a revised edition of the Homestead Map of the Prairie Provinces.

The latest map of this series is that of Manitoba. When the first Homestead Map of Manitoba was issued in 1905 that province had approximately 350,000 population. An influx of immigration was taking place and homestead entries were numerous. The northern extension to Hudson's Bay and the 60th parallel had not been transferred to the province, and in consequence only the smaller area was included in the map. With the issuance of the seventeenth edition, however, the map is assuring a tremendous importance in western affairs. Serving the original purpose of designating the location of land available for homesteading, lands alienated but unoccupied and which are for sale, and lands homesteaded but on which patents are not yet issued, there have been added the location of Indian reserves, forest reserves, timber berths, grazing leases, national parks, land districts and land agencies, railway lines, topographical features, new surveys and descriptive notes of the character of the country beyond the surveyed areas. This map also shows the trend of settlement, which is an important feature in the formulation of a policy of road construction and the extension of electric transmission and railway lines.

Manitoba, according to the 1921 census, has increased her population to 613,008 which is largely centred in the area included within the original boundaries of the province although settlement is pushing farther north with increasing momentum. Covering a total area of 251,832 square miles, Manitoba has a considerable water area, this latter representing 19,906 square miles. Including the area surveyed in 1921 there is now available for entry 5,348,300 acres, 120,800 acres of this having been covered by the survey parties of the Federal Topographical Survey during the past year. Unpatented homesteads, or land on which the entry duties have not yet been completed, include 1,296,000 acres, while lands alienated but unoccupied account for approximately 2,384,840 acres.

Looking to the future of the province, when development of a pulp and paper industry will undoubtedly take place, the Dominion Forest Branch has established or proposes to establish a considerable number of forest reserves aggregating a total of 2,385,700 acres. These are situated in the various portions of the province, on land not at present required, or suitable for agriculture. The Grazing Lands Branch has also issued leases on a considerable area of land for grazing purposes.

This map is of great value to those contemplating taking up land in Manitoba, and, in conjunction with the published lists of unoccupied lands, and a new pamphlet shortly to be issued on "Farm Loans," enables the prospective settler or those contemplating extending their land holdings to secure useful information regarding land settlement. Copies of the map and of the two pamphlets referred to may be had on application to the Natural Resources Intelligence Branch of the Department of the Interior.

The University's Public Service.

The last issue for this academic year of "The Varsity," the undergraduate newspaper of the University of Toronto, contains a list of the outside activities of the provincial university. From this report it appears that Ontario's university is doing a large amount of special work for the general public and without remuneration of any kind. Though admittedly handicapped by lack of funds, the University of Toronto seems to be making a successful effort to serve its constituency in an adequate way. The list referred to includes a large number of interesting lectures that were open to the public free of all cost; in this list also are several important conferences to which the public were invited and also a number of short courses for which only a nominal fee was charged. From the report on University Extension it also appears that the same service is being rendered in the rural districts and that the people of Ontario, in country as well as in city, are anxious to take advantage of the resources of their own provincial university. At a time when public interest in education shows signs of such a marked revival,

it is gratifying to know that the University of Toronto is satisfactorily meeting this quickened interest.

Noted Nova Scotian Passes Away

A despatch from Halifax, N.S., says:—After several months' illness, Hon. James Wilberforce Longley, Justice of the Supreme Court of Nova Scotia, since 1905, died at a private hospital here on Thursday afternoon.

While a member of the Nova Scotia Legislature, Mr. Longley was the author of many important acts, including the act to abolish imprisonment for debt. As a scholar, writer of historical works, orator and after-dinner speaker, he enjoyed considerable distinction outside his native province.

Britain, France and Belgium Fix Summer Season

A despatch from London says:—A "summit" in Great Britain will begin March 26 and end October 8. An order to this effect has been given to secure uniformity in time with France and Belgium.

GHANDI GIVEN SIX-YEAR PRISON TERM

Remarkable Scenes Occur During Trial of Indian Leader Charged With Sedition.

London, March 19.—Remarkable scenes attended the trial of Mahatma Gandhi at Ahmedabad, say dispatches reaching London to-day. The court was crowded with his followers and when Gandhi was brought into court for sentence they all stood up.

When the sentence of six years' imprisonment was pronounced they fell at his feet sobbing.

Gandhi pleaded guilty to the charges made against him and declared to the court that he had no desire to conceal the fact that he had been preaching disaffection against the Government, that it was almost a passion with him.

He said that he could not dissociate himself and his utterances from the diabolical crimes committed at Chauri Chauri, at Bombay and elsewhere—he knew that such consequences must follow his agitation. But he declared that if he was set free he would continue to follow his course as in the past and that otherwise he would consider himself failing in his duty.

Gandhi announced that while he was formerly a loyalist, he is convinced that the present system of Government has done more harm in India than any other and that the reforms are only a further method of draining India of her wealth and prolonging servitude.

In sentencing him the judge said that the fact that Gandhi expressed no regret made it impossible to allow him to remain at liberty.

The extremists in all organizations have issued warnings to the people not to make any disturbances.

He said that he could not dissociate himself and his utterances from the diabolical crimes committed at Chauri Chauri, at Bombay and elsewhere—he knew that such consequences must follow his agitation. But he declared that if he was set free he would continue to follow his course as in the past and that otherwise he would consider himself failing in his duty.

Gandhi announced that while he was formerly a loyalist, he is convinced that the present system of Government has done more harm in India than any other and that the reforms are only a further method of draining India of her wealth and prolonging servitude.

In sentencing him the judge said that the fact that Gandhi expressed no regret made it impossible to allow him to remain at liberty.

Deputy Ruler of World Metropolis is a Woman

A despatch from London says:—The position of Deputy Ruler of London has been conferred upon a young Jewish woman, when Miss Adler, daughter of the late Chief Rabbi, Herman Adler, was appointed Deputy Chairman of the London County Council.

It is the first time a woman has ever held this post.

Last Survivor of the "Light Brigade"

Liverpool, March 19.—George Richardson, who blew the charge when the "Light Brigade" rode up to the guns at Balaclava, died here Saturday. It is believed that he is the last of the "Gallant Six Hundred." He possessed 16 medals given for valor.

Weekly Market Report

Toronto.

Cured meats—Long clear bacon, \$1.70 to \$1.90; clear bellies, \$1.70 to \$2.00; mess pork, \$3.40; short cut backs, \$3.60; light-weight rolls, \$3.80; heavy-weight rolls, \$4.30.

Lard—Pure tierces, 17 to 17 1/2; 17 1/2 to 18 1/2; prints, 17 to 17 1/2; tierces, 18 to 19c. Shortening, tierces, 16 to 16 1/2; tubs, 15 1/2 to 15 3/4; prints, 16 to 16 1/2; prints, 17 to 17 1/2.

Choice heavy steers \$7.75 to \$8.25; do, good, \$7 to \$7.50; butcher steers, choice, \$6.75 to \$7.50; do, good, \$6 to \$6.50; do, med., \$5 to \$5.50; do, com., \$4 to \$5; butcher heifers, choice, \$6.50 to \$7; do, med., \$5 to \$6; do, com., \$4 to \$4.25; butcher cows, choice, \$5.50 to \$6.25; do, med., \$3.50 to \$4; canners and cutters, \$1.50 to \$2.50; butcher bulls, good, \$4.50 to \$5.50; do, com., \$3 to \$4; feeders, good, \$6 to \$6.75; do, fair, \$5.50 to \$6; stockers, good, \$4 to \$5; do, fair, \$3 to \$4; milkers, \$60 to \$80; canners and cutters, \$1 to \$2.50; springers, \$70 to \$90; calves, choice, \$12.50 to \$14; do, med., \$10 to \$11; do, com., \$5 to \$7; lambs, choice, \$12 to \$14; do, com., \$6 to \$7; sheep, choice, \$7 to \$8.50; do, good, \$6 to \$7; do, com., \$1.50 to \$3.50; hogs, fed and watered, \$12.75 to \$13; do, f.o.b., \$12 to \$12.25; do, country points, \$11.75 to \$12.

Montreal.

Oats—Can. West, No. 2, 65 1/2 to 66c; No. 3, 62 1/2 to 63c. Flour—Man. spring wheat pat., firsts, \$8.50. Rolled oats—Bagn, 90 lbs., \$3. Bran, \$32.50. Shorts, \$33. Hay—No. 2, per ton, car lots, \$28 to \$29.

Cheese—Finest westerns, 17 to 17 1/2c. Butter—Choice creamery, 30 to 34c. Potatoes—Per bag, car lots, 90c to \$1.

Good calves, \$7; inferior, \$6; hogs, select, \$13.25 to \$13.50; sows, \$3 to \$4 less than selects.

DELHI APPRECIATES THE PRINCE'S VISIT

Agrarian Situation in United Provinces in India is More Satisfactory.

A despatch from Delhi says:—The Legislative Assembly, including non-official members of every race and province, passed by acclamation a resolution expressing appreciation of the visit of the Prince of Wales and regretting that his visit was at a close.

The debate on the budget was resumed. The Democrats indignantly protested that they were not allowed to discuss the administration's general policy under the budget, declaring that this rendered the Assembly powerless and reforms a farce. They moved as a protest the reduction of expenses of the Executive Council. This motion was adopted 48 to 47.

A despatch from London says:—The Agrarian situation in the agricultural districts of the United Provinces in India, where rioting was reported last week, is now well in hand, says a communique issued by the India Office. The number of armed police has been greatly increased and means of transportation much improved. The civil police also have been strengthened, and troops are being marched through the disturbed area, where the symptoms of further trouble are being closely watched.

The India Office's statement was based upon a report from the Governor of the United Provinces.

Start Anew.

Life is a series of chances to begin afresh. We accept or we refuse. Perhaps we are discouraged over a broken resolve. But it does not require a resolution to lay hold on life again. We may renew the struggle even without formulating a determination against the evil whose hold on us is so strong or the discouragement that unnerves. The important thing is never the promise to ourselves that we will do as we should; what matters is the actual performance. And we may proceed to that performance with no binding pledge of any kind.

It is easy to let ourselves drift into a state so dispirited that we do not care what becomes of us. At such a moment a word from another or a thought toward another may make all the difference. We must be faithful, because some one else, though elsewhere, expects it. We must rise to the level of that trust in us. It would not mean so much to disappoint ourselves; but we cannot ask a friend to take less than the best we have to give. We cannot always be in the sight of those that we would satisfy.

The duty, present or absent, is the same. And the duty is, never to give up; never, after we were flung, to remain prostrate in the mire.

It is not the low whisper of an impersonal ideal for which we are likely to rise and go on. The first and the surest incentive is the wish of one person that we shall keep on trying. The only real misfortune in life is to have none who cares what we make of ourselves. The true friend would help us, not with a gift of things, that anybody can give, but with the stimulus of that personal inspiration which none else supplies.

It is easy to say that we have no vote on the question of our own entrance into the world. Here we are, and must remain, and are bound to make the best of it. We must carry the load, and our consent is unasked; if we drop the burden, human society finds its own way, in its own time, to punish us, no matter what penalty inexorable Nature imposes. Our peril is in the refusal to do our part, to accept responsibility, to stick to the business in hand, however inconvenient and uncomfortable. There is no time to spend, no energy to waste, in grief over failures and demerits; we must stop scolding ourselves or bewailing our faults; though the day is dark or the scene is bleak, we must go on.

Must Deepen Elbe for Monster Liner

A despatch from Berlin says:—The world's biggest ship, the 66,000-toner Bismarck, which is scheduled to enter the trans-Atlantic service under the British flag and be named the Majestic this spring, as soon as it is finished in Hamburg, will be delayed in reaching the ocean by the discovery that she is too big to navigate the River Elbe between Hamburg and the sea.

The remodeling of this big sister of the Emperor and Viceroy will be completed by the end of March, but extensive dredging of the lower Elbe to a depth of thirty-five feet will be necessary before she can start toward the ocean.

Spain Safeguards Works of Art from Exportation

A despatch from London says:—Spain has taken drastic action to prevent raids upon ancient Spanish masterpieces.

An ad valorem tax of 100 per cent. has been levied upon all Spanish works of art of a date earlier than 1850 which are exported from the country.

Twelve cherries, the first of the season, raised in a hot house near Paris, sold in the Central Markets for 150 francs, or \$1.10 a piece. Last year the first cherries brought \$1.25 a piece.

NEWBURY

Rev. J. N. Abhyankar, a converted Brahmin priest, who is taking a post-graduate course at Huron College, London, preached a very fine sermon at the morning service in Christ church on Sunday. After the service he exhibited a collection of idols and curios from his native land.

Miss Primrose Williams has returned from an extended visit in Toronto.

Rev. Mr. Farquharson preached in Knox church on Sunday afternoon, taking as his subject "Holding Fast to the Faith in the Lord Jesus." This was Mr. Farquharson's first sermon in several weeks and everyone was glad that he has recovered from his throat trouble.

Mrs. J. D. Armstrong and George Harcourt, with their sister, Mrs. Metcalfe of Petrolia, were at Port Credit last week attending the funeral of their sister, Bertha (Mrs. Holtby). Sympathy is extended to the family.

Mrs. McRae, wife of Rev. Dr. McRae of London, spoke at the "Women's Day of Prayer for Missions," a service held in Knox church Thursday afternoon, giving a most interesting address. Refreshments were served at the close.

Miss Carrie Fletcher and her cousins, Allan and Wilson McLean, were in London Saturday.

Mrs. Lorne Heathcington of Windsor is visiting her sister, Mrs. Wm. J. Armstrong, while Mr. Armstrong is in London serving on the jury.

Mrs. Duncan Fletcher is visiting her daughter, Mrs. A. J. Walker, in London.

John A. Robinson was in Toronto last week.

George W. Smith of Port Huron was in town last week.

Miss Jessie Gray was home from Detroit for the week-end.

Miss Elsie M. Prangley spent the week-end in London attending with her sister Myrtle the "at home" at the Normal school Friday evening.

Dr. H. C. Bayne was in Sarnia and Toronto for the week-end.

Mrs. Cecil T. Dobbyn and sons are visiting her mother at Aberfeldy.

A Prime Dressing for Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

WARDSVILLE

Monday evening, March 13th, Florence Edna McGregor and John H. Cady were united in marriage by Dr. James Husser of the Methodist church. The wedding took place at Cherry Hill Farm, the residence of J. F. McGregor. The bride was gowning in her travelling suit of tulle, being alone, and carried a sheaf of La France roses. Little Jessie O'Neill of Toronto, a niece of the bride, made a charming flower girl with her basket of sweet peas. The dining-room, where dinner was served after the ceremony, was very pretty in its white and pink decorations. Mrs. Cady will be very much missed, especially on account of her musical talent. Mrs. Fred Avery of Strathroy and Mrs. O'Neill and Jessie

of Toronto attended the wedding.

The usual meeting of the A.Y.P.A. was held on Wednesday evening in the church basement. Plans were made for a box social to be held on March 31st in the music hall. A good program by local talent will be presented. Everyone is welcome.

Dancing seems to be very popular in Wardsville this winter. As a result, another dance was given by the men on Thursday evening. A very pleasant evening was spent.

Rev. R. J. Bowen of London gave an interesting illustrated lecture on "Canada" in the music hall Friday evening to a large audience. Some very fine views of Canada and the Yukon were shown.

We are very glad to report that Mrs. J. McRae, who underwent an operation at St. Joseph's Hospital, London, is doing very nicely.

A union Young People's meeting was held in the Methodist church on Thursday evening. A goodly number were present and a pleasant time was spent.

Miss Jean Morrison is on the sick-list.

Mrs. D. L. Purcell has returned home after a two weeks' visit in Windsor.

Jack Douglas has returned home after a month at Camp Borden.

Mr. and Mrs. Ross Martindale of Caledonia visited Mr. and Mrs. Dennis Ellwood.

Mrs. Morrison is on the sick-list.

Miss Verna Husser of Detroit is visiting her parents here.

Rev. Mr. Abhyankar, a high caste Brahmin of India, who became a convert to Christianity in 1914 and is now a student of Huron College, London, spoke in the music hall here on Sunday, both afternoon and evening, to large audiences. He told of his conversion and a great many interesting facts concerning the life of his people. He showed the idols which he himself worshipped at one time.

PARKDALE

Mrs. Ed. Haggitt is in London with her daughter, Mrs. Tretheway, whose husband is quite ill with pneumonia.

Mrs. Fred Dawson and Mrs. W. Buchanan and Marjorie of Wheatley spent last weekend with the former's parents here.

Mrs. Wm. Thompson was called to her home in Lobo to be with her mother, Mrs. D. Campbell, who was seriously ill and has since passed away. Mr. Thompson and Edyth attended the funeral on Wednesday last.

Wm. Hansen is holidaying in London.

CASHMERE

Will Smith of Kent Bridge spent a few days with his brother Cyrus recently.

Miss Mildred Taylor of Chatham spent the week-end with her parents here.

Mrs. Will Saylor is on the sick-list. Mrs. Calvin Sittler and son Franklin spent Thursday and Friday with her parents, Mr. and Mrs. B. F. Jeffery, Newbury.

David Smith of Bothwell visited his daughter, Mrs. Will Saylor, for a few days.

Mr. and Mrs. Wilkie Taylor spent Saturday in Chatham.

The buzz-saw is busy these days in this vicinity.

Mrs. Gord Smith and small son have returned to their home in Walkerville after a month's visit with her parents, Mr. and Mrs. Angus Taylor.

Mr. and Mrs. James Dent and children of Bothwell spent Sunday with her brother, Wed. Dark.

Rheumatism?

Or Neuralgia, Sciatica, Lumbago?
The remedy is simple, inexpensive, easily taken and harmless.

Templeton's Rheumatic Capsules

Your druggist will supply you. Write for free trial to Templeton's, 56 Colborne St., Toronto.

Sold by H. I. Johnston

YOU USE COLD CREAM

For appearance's sake, why not Colomar?

DRUGGIST GLENCOE

Dora Sutherland, 193 Spadina Ave., Toronto

WOODGREEN

Several from here attended the ball given in Wardsville on Thursday evening and the lecture on "Canada" by Rev. Mr. Bowen on Friday evening.

A number of people here are ill with the flu and severe colds.

Miss Winnie Goff is seriously ill with pleuro-pneumonia.

Misses Mary Watterworth and Ethel Harvey visited Miss Madeline Watterworth on Friday evening.

A number here had wood bees last week.

Several from here attended the lecture in Wardsville town hall Sunday afternoon and evening.

Mr. and Mrs. Ross Martindale of Caledonia visited Mr. and Mrs. Dennis Ellwood.

MIDDLEMISS

Harry Lucas is home this week.

The low bridge across the river south of the town is a complete wreck from the ravages of the heavy ice.

The county road leading to the river bridge on the towline is almost impassable from the continual thawing of ice on the flats.

Elvin Lilley's house was broken into a few nights ago, and although there was not much booty to take away, liberty was taken with the vacant house, and a general smashing made of chairs, pictures, etc., and even parts of the piano were broken.

It is too bad that such ugly, animal-natured people should be at large.

Mrs. Allan Wrightman has gone to Detroit to see her son Colin, who is laid up with pneumonia.

The estate of the late Wm. Fallick is offered for sale by tender by the executors.

The old gripe has made its appearance again in this vicinity. No serious cases are reported.

The first maple syrup of the season appeared in town Saturday. The sap run has been very small.

Old residents say they have never seen so much ice piled on the river flats as this year.

The L.O.L. here have now fourteen members.

Miss Mary McDonald will finish her course in shorthand and type-writing this month.

On account of the rain and bad roads the Lawrence Epworth League did not take charge of the Methodist church service last Sunday. We will look for them at a later date.

DAVISVILLE

S. S. No. 7 school has reopened after being closed for a week.

A number of young men of Davisville attended a dance given in Shetland on Friday evening at the home of Mr. and Mrs. Fred Jeffery.

Mrs. Jane Armstrong of Newbury is spending a few days with her daughter, Mrs. Dan McNaughton.

Buzzing wood is the order around Davisville this week.

Dan McNaughton is spending a few days in London this week.

SHETLAND

The Misses Badgley entertained the Bible Class on Friday night.

Bessie Jeffery returned home from Newbury on Friday.

Miss Regina Ralph has returned from the West.

Henry Johnston, who has been seriously ill, is improving nicely.

Mrs. H. Clements and daughter Jean spent a day with Shetland friends.

A number here are sick with colds.

Muscular Rheumatism Subdued.—When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until a glow is secured. There is more virtue in a bottle of it than can be fully estimated.

MOSA

Miss Florence Hick spent the week-end in Windsor where she attended the wedding of her sister.

Elliott and Flossie Douglas were called home to the bedside of their mother, who is seriously ill.

Mr. and Mrs. A. B. McLachlin and Mrs. Stuart Nisbet visited at Hugh R. McAlpine's last week.

D. McLachlin and Captain Dan McIsald visited at A. B. McLachlin's recently.

Rose Douglas visited friends in Windsor and Detroit last week.

Mr. and Mrs. W. Williams of the West visited friends in this locality this week.

George Secord of Brandon, Man., is visiting his many friends in Mosia.

ONEIDA

Fire completely destroyed the home of Washington Dostater on the Oneida Indian Reserve on Thursday afternoon.

It is reported that the river road through the Oneida Reserve is to be graded and gravelled immediately.

This is good news, for this is one of the main roads from the Longwoods Road through Muncey to St. Thomas.

Nothing has yet been done towards putting a new floor in the bridge over the River Thames. This is needed without delay.

KILMARTIN

Alex. Dewar and Archie L. Munroe are on the jury at London this week.

The contract for caring for the Kilmartin cemetery has been let again this year to Gordon McLachlin.

Mr. and Mrs. Dan McAlpine of Dutton called on friends here recently.

APPIN

The regular meeting of the Women's Institute will be held Thursday, March 30, at the home of Mrs. John Jones, at the usual hour.

A paper will be given by Mrs. D. A. Campbell, followed by discussion on laws pertaining to women and children. A full attendance is requested.

NORTH-NEWBURY

Peter Welsh has gone to work for eight months for John Graham, at North Glencoe.

Steve Kelly has already 20 lambs added to his flock of sheep.

Mrs. Stuart is in poor health.

The family of John Bird are confined to bed with the flu.

Daniel Steele is moving to his new home known as the Mitchell farm, lot 15, concession 5.
