DISTRICT AND GENERAL

Work on London's new \$1,000,000 hotel is to be commenced within a few weeks.

The latest figures of the cost of living in Britain show an increase of 164 per cent.

An open winter, similar to that of two years ago, is predicted by Indians of the north country.

Saskatchewan farmers have bought 2,000 new tractors this year at an average cost of \$3,000 each.

Peter McIntyre, a well known farmer of Lobo township, dropped dead while on his way to the barn.

Bathing was quite common in the lake at Port Stanley last week, a record for that resort for lateness.

Mrs. Currie, relict of the late Alex. Currie, North Aldborough, died a few days ago at the age of 91 years.

Ice closed in the Yukon river last week, the earliest on record. The temperature at Dawson was 10 below zero.

The total receipts at Strathroy fair amounted to \$5,295 and after paying all expenses the association will have about \$1,200 to the good.

The presidential election in the United States will be held on Tuesday, Nov. 2nd. Ex-President Taft predicts a Republican landslide.

The peach crop is a queer thing. It gets killed several times in the early spring and when harvest time comes it is so large that it cannot be disposed of.

Through agents in Great Britain the Ontario Government is attempting to secure 50,000 farmers and farm hands for the province within the next year or so.

Mrs. G. A. Marcus of Bothwell has a wonderful thimble berry patch, from which she is still picking fruit. She picked four quarts on Oct. 11 and expects the bushes to bear till November.

Officials of the Department of Education state that Saskatchewan is short more than 500 school teachers, and that this shortage might be increased to 1,000 before the end of the year.

A St. Thomas man who recently left for a visit to England writes back that he could sell any amount of the apples that are wasting in Elgin county orchards for an amount equivalent to 25 cents a pound.

On Wednesday, October 6th, at the home of the bride's parents, the marriage took place of Elva, the younger daughter of Mr. and Mrs. Malcolm McIntyre of Napier, to Stanley Graham of Brockton.

At Strathroy Freda Congdon, aged about seven, daughter of John Congdon, lost the sight of one eye while playing with her brother, who threw a stick with a nail in it, the nail pierced the child's eye.

On and after January 1, 1921, newspapers and periodicals posted in Canada by newsdealers and addressed to subscribers or to other newsdealers, will be liable to postage at the rate of two cents per pound.

A. Shortt, a Brooke township farmer, is missing. He was last seen going towards the river, and as he had never fully recovered from an attack of influenza last winter it is feared he may have been drowned. The river is being dragged, but so far without results.

At Strathroy Thomas Petch, aged 75 years, was knocked down near his home by a steer which was being brought to town in a drove for shipment and sustained injuries from which he died a few days later. Deceased formerly resided in Adelaide township.

Licence Inspector Spracklin "caught a tartar" when he stopped a hearse owned in Windsor and searched it for liquor. The inspector in a dark corner located a jar, when shaken gave forth a suspicious sound. When the cork was removed and the usual test applied the "liquor" was found to be embalming fluid.

David McNeil, who narrowly escaped lynching by a mob at Thorold some weeks ago, had his trial at Welland last week for the murder of four-year-old Margaret Boucock and was acquitted by the jury after three hours' deliberation. He was immediately re-arrested and deported to the United States where he is wanted on a charge of robbery.

Uncle Sam is losing war tax money in cities along the Canadian border, railroad men assert. Many Americans are buying railroad tickets in Windsor and other border towns for points in the United States, instead of patronizing the ticket offices in Detroit, because they can effect a considerable saving. The American war tax on railroad fares is eight per cent., while Canada assesses only one per cent.

Charles Manchee of Toronto, Canadian superintendent of the Henry Pope Manufacturing Company of London, England, was instantly killed at Buffalo when the automobile in which he was riding was crushed between two street cars in a dense fog. Mrs. Jenny Quillman was driving the automobile, in which were also Miss Theresa Quillman and Mr. Manchee's two boys aged four and six, all of whom were more or less injured.

A quiet wedding was solemnized in Aylmer on Tuesday, Oct. 19th, when Kathleen, youngest daughter of Mrs. Duncan Graham of Middlemies, became the bride of Ralph Perkins of Aylmer. Rev. W. K. Hager officiating. The happy couple will reside in Aylmer.

SUGAR BEET PRICES

The Executive of the Ontario Sugar Beet Growers' Association met the officials of the Dominion Sugar Company on October 21st at Chatham to discuss the prices for beets for the 1921 crop. The growers are asking for those delivering beets at the factory \$10 per ton for 12 per cent. beets and a raise of 60c per ton for each per cent. beets test over 12 per cent. For those selling on a flat basis, \$10 per ton minimum when sugar is selling at \$8 per cwt., with a raise of \$1.50 per ton for each one dollar sugar raises above \$8 per cwt.

This does not necessarily mean that growers will receive no more for their beets next year than they received this year. It all depends on the average selling price of sugar for the months of September, October, November and December on which the basis of the computation is fixed.

Considering the price of land, the increased cost of producing beets and the risk involved, the growers feel that they require a guarantee of at least \$10 per ton before they can engage in the production of sugar beets. It may be of interest to the public to know that five sugar companies in the United States—the Utah-Idaho Sugar Company, the People's Sugar Company, the Amalgamated Sugar Company, the Layton Sugar Company and the West Cache Sugar Company—have agreed to pay a minimum price of \$12 per ton for the 1920 crop with a raise of one dollar per ton for every dollar sugar sells over \$11 per cwt. during the months of October, November, December and January.

The Ontario growers are receiving nine dollars per ton for their beets with a raise of one dollar per ton according to how sugar sells above eight dollars per cwt. during the months of October, November, December and January.

MANY CHANGES FAVORED

St. Catharines, Oct. 22.—The Ontario Public Service Commission held a session in this city yesterday. Those examined were favorable to the extension of the and Titles Act, the combination of the offices of Sheriff and High Constable, the issuing of marriage licenses by the clerk of the municipality, and the provincial control of police instead of the present system of county constables. The witnesses also favored the idea of Police Magistrates being paid a salary and devoting all their time to this work. County Judge Campbell suggested that Grand Jurors be called by the judge, but was not supported in this by other witnesses, who favored the retention of the jury. Crown Attorney Cowper of Welland looked upon the Grand Jury as an education to those who served. Considerable important evidence was given in the afternoon on the Land Titles Act of Yorkshire, England, by H. L. Cummings, Chairman of the Commission. Gregory intimated that certain portions of the English Act might well be used in Canada.

BURNS WRECK A LANDMARK

The barns burned last week on the John Fleming farm, five miles west of Wardsville, were an old landmark in the "Fleming Settlement." The family were settlers in the old stage road, from the Longwoods road, from Hamilton to Windsor. A large sign with their name on it was still on the barn, though the descendants of the family are widely scattered. The ravine which crosses the road and ran by the barn was at one time dotted with oil derricks, and was a busy scene in the sixties. John Read is now owner of the farm.

POWER FROM THE ATMOSPHERE

Rome, Oct. 17.—The amazing discovery of Gustave Leontier, Italian inventor, that the static electricity of the atmosphere can be transformed into regular dynamic currents, promises to revolutionize the use of electricity the world over.

With Signor Leontier's apparatus, electricity is drawn out of the atmosphere, the process doing away with costly power plants, water power, etc. The apparatus is very simple, consisting apparently in a 12-yard high post, on which is a collector of aluminum with radio active substances. The collector is connected with a transformer by means of a special wire. The electricity in the soil and that of the atmosphere are reciprocally attracted by induction, while the radio active substances cause a reaction, not yet explained, which changes the nature of the current.

ROAD PLANE DOES GOOD WORK

The Forest Free Press says:—A Forest resident, who came from Windsor one day last week via Longwoods road, found the Rawlings road plane at work between Wardsville and Strathroy. He was informed that the best piece of road between London and Windsor was that on which the road plane had been in operation.

SUGAR PRICES REDUCED

Montreal, Oct. 26.—A reduction in the wholesale price of sugar from \$19.50 to \$17 was decided on by a meeting of the refiners here Monday. New York, Oct. 26.—Refined sugar was quoted at 11 cents to 12 cents per pound here Monday. The retail price showed a wide variation from 13 cents to 17 cents.

Buy your Templeton's Capsules at H. I. Johnston's drug store. T. R. C.'s for Rheumatism, etc.; RAZ-MAH for Asthma. Relief guaranteed.

RAILWAY CROSSING FATALITY

Miss Doughtie of Brooke Killed and Two Children Injured

Driving into a Grand Trunk train, where the line crosses the seventh concession of Brooke township, Miss Laura Doughtie, aged about 18, was instantly killed on Tuesday evening. Miss Doughtie, who was the daughter of John Doughtie of Brooke, was motoring home from Alvinston and had picked up Oliver and Anna Wallace, school children, also returning from Alvinston. Both were injured, but not seriously. The girl is cut about the head and limbs.

The crossing is only a couple of miles from town and the train had not yet slackened speed. The auto was overturned and wrecked.
Dr. J. B. Martyn, coroner, of Alvinston, was called and has ordered an inquest.

CALL EXTENDED

At a meeting of the Glencoe Presbyterian congregation on Monday afternoon a unanimous call was extended to Rev. James Barber, M. A., of Niagara Falls, who occupied the pulpit here on Sunday last. If Mr. Barber accepts the call arrangements for his induction here will be made at an early meeting of Presbytery.

MISSING FARMER FOUND

Abner Shortt, Brooke township farmer, who was reported missing from his home since early on Friday morning, was Monday discovered working for a farmer in the Shetland district, Ephremia township, not a great distance from his own home. He was committed to the Hospital for the Insane at London.

W. M. S.

The missionary societies of Glencoe Presbyterian church are doing good work. Recently they sent clothing and quilts to an Indian reserve, and children's yearly outfits to a school, valued at \$203.

On Oct. 20th the Auxiliary held a thank offering which realized over \$163 and many have not yet contributed. Rev. W. G. Rose of Delaware gave an excellent address on thankfulness. He also urged on all the duty of world evangelization. He said many women during the war refrained from missionary work because they were too busy rolling bandages. If they still persist in their indifference to missions they will have more bandages yet to roll. Mrs. Rose added much to the meeting by singing most impressively the solo "Hail where You want me to go, dear Lord." The entire meeting was a great treat to those who find greatest joy in serving others.

"THE UNPARDONABLE SIN"

Major Rupert Hughes' astounding story, "The Unpardonable Sin," a picture long to be remembered, is coming to the opera house at Glencoe, Wednesday night, Nov. 3, at 8.15. Mr. Cunningham, who is putting on high-class moving pictures in the opera house Wednesday and Saturday nights of each week, is giving the people of Glencoe and vicinity something unusual when he is showing such a high-priced picture as "The Unpardonable Sin" at regular prices. Come early and try to secure a seat. Adults, 27c; children, 16c.

CANADA GOING DRY

The people of British Columbia have given a very substantial majority in favor of government control of the liquor traffic, and four other provinces—Nova Scotia, Manitoba, Saskatchewan and Alberta—have gone dry by large majorities.

TOMLINSON-DURFEE

Newbury, Oct. 27.—One of the season's prettiest weddings was celebrated on Wednesday, Oct. 26, at "Breeze Faray" the home of Mr. and Mrs. Thos. Durfee, when at 3 o'clock their youngest daughter, Phoebe Ruth, and Morton J. Tomlinson spoke the marriage vows. Rev. Mr. Murphy officiating.

The bride was prettily dressed in a gown of rock blue taffeta and carried a shower bouquet of white roses and pink chrysanthemums. She wore the groom's gift, a pearl pendant. The day was ideal. The sun shone brightly and gloriously, as if to penetrate the depth of the future and light the way for the young couple who were starting life anew together. The guests caught the spirit of gladness and the occasion was one of mirth.

Immediately following the ceremony a sumptuous dinner was served, after which Mr. and Mrs. Tomlinson left via C. P. R. for points east. After November 1st Mr. and Mrs. Tomlinson will be at home at 115 Pasadena avenue, Detroit, where Mr. Tomlinson will resume his duties with the Maxwell Motor Co.

The bride received some beautiful gifts, together with a number of substantial cheques. Among those who attended the marriage were guests from Toronto, Albion, Saginaw and Detroit.

And now when one sees a woman clipping something from a newspaper he can't tell whether it is a recipe or a political speech.

A diplomat is a man with an ax to grind who gets another man to turn the grindstone and makes him believe that he is being entertained.

Try a little advertising!

Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto

Storing Seed Corn.

As soon as the corn ripens, go through the field with seed-picking bags and husk the ears from the stalks that have produced the best corn without having had special advantages such as space, moisture, or fertility.

Avoid large ears on stalks standing singly, with an unusual amount of space around them. Late-maturing plants with ears which are heavy because of an excessive amount of sap should be ignored.

All other things being equal, choose ears from short, thick stalks. These are not so easily blown down, permit thicker planting and, in general, are more productive than slender ones. Other things being equal, seed should be taken from stalks that have no suckers.

Immediately after the seed-corn is gathered, the husked ears should be put in a dry place where there is free circulation of air. Do not let ears touch each other. Good seed is repeatedly ruined, because it is thought to be dry enough when gathered. The vitality of seed is often reduced by leaving it in a sack or in a pile for even a day after gathering. During warm weather, if there is any moisture in the cobs and kernels, the ears heat or mildew in a remarkably short time.

The best possible treatment immediately after gathering is to string the ears and hang them in an open shed or loft. Wire racks are more convenient and, in the end, cheaper than binder twine. Such racks may be made from electrically welded lawn fencing. The cutting of the fencing into seed-corn racks is done without any waste. Only during unusually damp weather at seed-gathering time will fire be necessary to dry the seed.

After hanging in the shed or lying on the racks for two months, the seed-ears should be dry. They can remain where they dried or be stored in mouse-proof barrels, boxes, or crates during the winter. But in either case they must not be exposed to a damp atmosphere, for they will absorb moisture and be injured.

To keep weevils and grain moths from injuring stored grain, the thoroughly dried seed-ears should be stored in very tight mouse-proof receptacles with one pound of moth balls or naphthalene inclosed for each bushel of corn.

Transferring of Bees.

Transferring of bees from one hive to another should be done any time from the beginning of fruit bloom to the end of the clover honey flow. It is not advisable to attempt to transfer bees during the late summer or fall. There are several methods of transferring, each of which I will very briefly describe.

By the direct method the combs are cut out from the box hive or gum and the bees brushed from these combs into a modern hive which is placed in the exact location of the old hive. After the bees have all been transferred a queen excluding zinc should be placed over the entrance so that the queen cannot get out. This precaution will often prevent colonies from leaving the new hive. It is supposed that all of the frames in the new hive are fitted with full sheets of comb foundation. It is sometimes advisable to fill one of the frames with brood and honey taken from the old hive. This will provide food for a day or so and will usually prevent the colonies from leaving. This comb should later be removed. If the colony which is being transferred has any disease, then none of the comb should be taken to the new hive. Care must be used in this method, to see that at no time after the transferring the colony runs out of food.

The slow method is very popular with many beekeepers because of its simplicity. First remove a portion

Poultry

Market poultry requiring fattening must be fattened in coops or pens where they will receive little exercise. Green food is not of value in a fattening ration. In fact, it will only take up room in their crops which is needed for fat-producing foods. Fowls will increase in weight on a diet of corn meal and sour milk mash. The meal is better than whole corn. The high-producing hen has a full, bright, waxy comb and wattles. The face is thin and the beak, eye rings, ear lobes and face are pale. The good hen has a full ear lobe and a bright round eye. The hen that should be culled out of the flock will have small hard dried comb and wattles. The face will be fat and the beak, eye rings, ear lobes and face will be yellow. The ear lobes will be wrinkled and the eyes dull and snaky.

Clean, spray and sun the nests. Then fill them with plenty of clean

KLINE FANNING MILL

The improved Fanning Mill of today, separates wild oats, smut, and chaff—no grain too dirty for the Kline. Capacity 100 bushels per hour. Write for particulars. KLINE FANNING MILL CO., 480 Crawford St., Toronto.

Will They Say It of You?

A good farm is only the lengthening shadow of a good man. Do you own a good farm? Do folks say of your place, as they pass by, "There is the finest farm in this township"? Then you no doubt are proud, and have a right to be.

But stop a minute and ask this question: "How is it that my farm is such a good one?" I have not lived on it very long myself. The work I have done would not in itself have placed me where I am in the estimation of my neighbors. I found the farm quite as it is now. It pleased me and I bought it. Yes, some one else sowed, you reaped the harvest.

There was a day when a man with brawny arms and an axe over his shoulder came tramping through the woods just where your farm now lies. He brought his wife and little ones with him. His first work was to build them a tent of brush, with only a couple of hemlock for a roof. It was wet inside that simple home when it rained. More than one night the man sat at the door of his tent, gun in hand, keeping watch and ward over his dear ones, while wolves or fiercer foes woke the night echoes with their howling.

That man felled the trees, then logged them up and burned them to make room for a better home, and he did it with a song and a great hope in his heart. With the eye of a prophet and the heart of a viking he looked down the years and saw the farm that was to be. That was his life work. An humble work, done with patience, and the greater because it was done out of love, for the sake of those who

came after he had laid down his axe for the last time.

That man's shadow, lengthening down the years, falls on the farm that is now yours. If he had gone round the hard places and left the trying things undone, it would have changed the entire drift of your life.

Now, this is your starting point. The pioneer of a hundred years ago did not do all that was to be done. He could not do more than he did. The hands with which he toiled were well-nigh bare of tools. An axe, a simple plow, a handsaw—these were his crude farm implements. His oxen helped him to roll up his logs to be burned. A stone with a hollow place chiseled out in the top was the mill in which his flinty pestle ground out the corn his Johnny-cake was made of. But he did his best and left the rest for you. How are you carrying on the work he began? Are you keeping pace with the march of present-day farm progress? Will the farm be better when the sunset hour comes to you? Which way will your shadow lie? East or west?

More than one man has tired before the day has come to its meridian. Faint of heart, he has sat down, folded his hands and said: "I am not going to do any more. Let somebody else go on with my work." Shadow lying toward the westward? Don't let it be so. Keep a brave, true heart! So the time will come when your shadow will lie far to the eastward, and men shall say of you, "He made his farm home one of earth's beauty spots. The world is the better for his having lived in it!"

Marketing Windfallen Apples

We always had more or less trouble getting rid of windfall apples. Quite often neighbors who had no fruit came along and we gave them many of these apples, and still do, but there is bound to be a surplus in bountiful years overcrowning our generosity.

We have at times turned the pigs into the orchard for a few hours each week, after gathering the best fruit, and let them clean up the surplus. It was a wasteful method, to our thinking, when people were hungry for apples.

It remained for a millhand from the city to solve the problem two years ago. He came out in an automobile to get some canning apples, and asked us what we did with our windfalls. We told him, and he said he would give us three cents a bushel for some of them, for he knew where a neighbor near him had a hand-press, and he would make them into cider for vinegar, which cost him sixty cents a gallon. We soon bargained, and to our surprise, when he came back the next day he brought four other millhands with him, and they took away in burlap bags all they could haul. They came back several times, and brought other workmen from the factory, and kept our orchard cleaned all fall of the objectionable windfalls, which we had not time to take care of in our labor in getting the good fruit cared for and marketed. This season we shall again depend upon these men, for we know they must be getting out of vinegar by this time.

Ventilators for Corn Crib.
An expert makes the following suggestions in regard to ventilators for corn cribs:
"Build an A-shaped frame through the entire centre of the crib, making it from fifteen to eighteen inches wide at the bottom, six inches wide at the top, and from five to eight feet high, depending on the height of the crib. About every four feet through the length of the crib build an A-shaped opening into this A-shaped tunnel at the bottom and running to the top of the crib. These shafts should be open at the corners, so as to allow plenty of opportunity for circulation of air through the corn."

Another type of ventilator which is just as effective, though more expensive but much more easily built, is made as follows:

Build a double wall, with the boards two inches apart, through the middle of the crib from end to end and from bottom to top. This can be made by using 2x4's for studding and rough 1x4's or 1x6's spaced two inches apart for walls. The 2x4 studding should be in pairs held apart by blocks, so that there will be a three or four-inch space between the studding. This will really divide each crib into two narrow cribs, three and one-half feet wide.

Compost for Garden.
Make a compost heap near or in your garden by piling a layer of soil on top of a layer of manure; then a layer of leaves or any organic matter; another layer of soil and some more organic matter, such as straw, stable manure, leaves, grass clippings, plant and meat wastes, ground bones, tree and shrubby clippings, all piled and mixed and allowed to decompose during winter. This heap should be turned over twice during the winter months and applied to the garden in the early spring. Compost is one of the best lawn fertilizers, and helps vegetable growth when scattered over the ground around young plants.

Swat the rats. Trap 'em, gas 'em—any way.
Get breeding ewes in thrifty condition.

The Welfare of the Home

How is Your Health? Are You Treating it Right?

By JESSIE LEITCH.

The girl who is so fortunate as to live on a farm has at her command all the conditions necessary for good health. Her work and her play are amid quiet, beautiful surroundings conducive to the mental poise and self-control so necessary to good health. Fresh air, good food, pure water, opportunity for sufficient rest and sleep, all are hers.

Her work with her chickens or flowers may sometimes be hard but how different it is from the dust and grime and turmoil of the city street or factory. During the crisp days of early fall her muscles are strengthened and her circulation improved by taking up the leaves in the yard, caring for the bulbs, covering the tender plants that they may survive the cold of winter and half a hundred out-of-door activities.

After the day's work is done, how invigorating is a brisk car ride on a moonlight autumn night! Horseback riding is again becoming popular and later there will be skating, coasting and sleigh rides.

City girls have little opportunity to study Nature, but the girl in the country can study Nature first-hand. She knows the fall flowers, how the little wood friends prepare for winter, and at night hears the calls of the birds overhead as they fly southward. The really fine country girl does not forget to give attention to personal hygiene. She cares for her teeth and nails, keeps her hair well brushed and is clean and neat at all times. Her sleeping room and the rooms in which she works are well ventilated and her habits are regular. The country girl's work and play when rightly carried on develop her mind and her spirit. Such development is the ideal of education.

Bandages are used to keep applications in place, to make compression, to control circulation and to reduce swelling and give support.

There are many kinds of bandages, but the only one that really concerns the nurse in the home are cotton and flannel bandages. These directions are for those who did not have the opportunity of learning how to bandage in Red Cross classes. Bandages vary in width. One inch wide for a finger, two or two and a half for the head and extremities is the average width in use. These are at least three yards long. Bandages must be rolled tightly before they can be used. Always remove ravelings from ends of a bandage.

Tear or cut bandage material in the desired widths and lengths. Then roll the bandages into a neat roll and pin securely. Always keep them on hand in your medicine cupboard, covered, to keep them clean.

In adjusting a bandage, put it on firmly but not so tightly as to impede circulation. Pin it with a safety pin, turning the ends in neatly. Flannel bandages are used more often for rheumatic cases. After applying a liniment and friction to the skin, a flannel bandage insures a uniform warmth of the affected part and is more comfortable than a cotton bandage would be.

Bandages should be rendered sterile. To render sterile is to destroy germs by boiling, by live steam, by steam under pressure, or by hot air. Thus we group the methods of destroying bacteria (germs) into two classes—physical and chemical.

The physical agents at our command for destroying the germs are light and heat.

Direct sunlight destroys bacteria

but the process of exposure is necessarily so long as to render sunlight impractical, particularly in the home.

Through the medium of heat, we have sterilization by (a) boiling; (b) live steam; (c) steam under pressure; (d) hot air or dry sterilization.

A doctor, when preparing instruments for use in a home, invariably boils them for a time. It is improbable that the mother will have occasion to sterilize by boiling; the better manner to sterilize towels, bandages or surgical dressings: such as one might need to prepare in the home is by the use of steam and dry heat. After preparing articles for sterilization wrap them in a thick cotton covering and pin them into bundles.

An ordinary colander is a good thing in which to sterilize. Steam for two hours then remove bundles. Spread them out on a clean pan and put in the oven until thoroughly dry. Put away in a clean pillow slip for future use.

An article subjected to a little dry heat without previous steaming is not sterilized. Steam is so much more penetrating than air that it accomplishes more in twenty minutes than dry heat can in an hour.

It will not be possible to use steam under pressure in a home, as this is done in hospitals by specially constructed sterilizers.

Alcohol and carbolic acid are probably the best disinfectants one can use in the household. If you spill carbolic acid upon your hands or skin, alcohol should be applied immediately. Alcohol neutralizes the hurtful action of carbolic acid. It is a good idea to keep alcohol and carbolic acid bottles side by side in the medicine cupboard. Carbolic acid is a dangerous poison. Act accordingly.

One teaspoonful of carbolic acid dissolved in one pint of boiling water makes a solution strong enough for ordinary purposes of disinfecting. This may be used for washing over bedsteads and floors in a sick room, or for disinfecting the hands.

It may seem unnecessary sometimes to sterilize or disinfect. Undoubtedly it causes extra work. But it is impossible to take too many precautions in avoiding infection.

Plant bulbs for outdoor spring blooming.

In these long autumn evenings read some good book on your job—farming or housekeeping. Or, if you have a hobby, get a book on that. Learn all there is to know about poultry, for instance, or violet raising, or rug-making, or textiles.

Classes for every feeder, whether big or small.

Show will be held at UNION STOCK YARDS

December 9th & 10th.

1920

Write Secretary, Box 635, West Toronto, for all particulars.

OUT OF SETTING

"What is that square frame leaning against the wall there?" asked one of two boys as they walked down the street.

"That's a window," answered the other. "I saw Mr. George tearing down his workshop the other day. That must be one of the windows that he has brought home for some purpose. Let's go across the street and see."

So across the street the two boys went to examine the object of their conversation.

"Well, it is a window, as I thought."

"A window!" exclaimed the other. "It is a funny looking window, I think. You cannot see anything through it. I thought a window was to look out of. It does not keep out the cold. It does not let in the light. I thought that was one of the main things windows were for. It does not give us any security. It is not a part of a house at all. It just stands there all by itself. I do not see how you could have a window without a house."

A window cannot be a window standing all by itself. Maybe it was a window once, and it may be a window again; if Mr. George builds his garage in the back yard and puts this frame in one of the walls; but I do not see how you can call it a window now."

So the lad went on in his fun-making, and his companion could find no very satisfactory answers. That night when they were at their study, he remembered the conversation of the afternoon and, looking in his dictionary, found the definition of a window to be an opening in the wall of a building. Turning to his friend, he said, "I guess you were right this afternoon about the window. It seems that it was not a real window that we saw, but it was something that could be made to be a window with some work. It will be a window when Mr. George gets it built into his garage."

The question of the old window frame was settled. But, if the boys had only known it, they did more than settle the question of the window frame. They laid down a principle that will have an unmeasured influence in the lives of all human beings who will study and apply it.

There is a place and a great need for true men, and there is One who is able to construct true manhood; but it is not possible to be a true man outside of Jesus Christ. God has made every one. He has made us, not to stand by ourselves, but to live in Christ Jesus. That was the purpose, the plan, of God. He is constructing a building, fully framed together, and He has a place in that building for every one of us. We can be what He meant us to be only by filling the place that He means for us to fill. Standing alone, before it has been built into a house, but like the window frame, every one of us, by the wisdom and work of the Master, may have his life built into the house of God. So we shall be not just the frame of a man but a true man in Christ Jesus, complete in Him and He complete in us.

Are you satisfied, then, to go through life alone, the frame of a man but not a man, because you have not yet found your place in the plan and purpose of God? You cannot grow into a man outside of Christ any more than a window frame will become a window while leaning against the wall, but you will surely and truly become a man by finding your place in Him.

Save Your Cancelled Cheques

A number of years ago I had a settlement with a merchant with whom I had kept a running account for several years. Sometimes I paid the merchant by cheque; at other times I directed that my purchases be charged. Finally there came the time when I decided to close the account and start anew on a cash basis. The merchant gave me an itemized statement. This I compared with my cancelled cheques.

I found every item correct but one—a charge of \$10 that had clearly been paid by cheque. I showed the item to the merchant. He located the purchase easily and called my attention to the fact that it had been marked "Charged." However, my cheque bearing his indorsement was indisputable evidence that he had received the money. He credited me with an additional \$10.

I have found it a wise precaution to retain my cancelled cheques for several years. Nobody can tell in advance just when a cheque may be required as evidence. It is the safest means of guarding against paying an account the second time. My wife is as careful as I am in keeping her cheques. Recently she escaped the second paying of an interest charge because she had the cancelled cheque to show.

Always date your cheques accurately. Without the date the cheque as a receipt is only half good. It is a good plan to note somewhere upon the cheque the purpose for which it was given.

"Stands Strenuous Wear"

RECONSTRUCTION PLANS FOR POLAND

ARMED FORCES BEING DEMILITARIZED.

Decision Regarding the Disputed Districts Unpopular With the People.

Poland is preparing to turn the energies of war to peaceful missions as soon as possible, and plans already are under way for demobilization of the army, which has been in the field fighting the Russian Soviet forces nearly two years, says a Warsaw despatch.

Throughout the country the press optimistically predicts a quick transformation of the country from a warring nation to a land of freedom and prosperity. Premier Vincent Witos, who rose to leadership of the Polish party from a poor Galician wood-chopper, is most hopeful regarding the future of Poland.

"Poland needs peaceful development to heal the wounds of war and pave the way for reconstruction of the country," the Premier declares. In a recent speech, "Therefore, the government will direct itself entirely toward improving economic and social conditions."

Economic Situation Not Desperate. "I have just returned from a trip through the state. The present economic situation is difficult, but not desperate."

Premier Witos said he expected signature of the final peace treaty within a few weeks unless the Soviets make some difficulties, but declared he did not look for such action. The peace preliminaries, M. Witos continued, were not entirely satisfactory to Polish aspirations, as a great number of Poles were left outside the Polish frontiers, yet they satisfy Poland's spirit of moderation and her desire to end the war, while giving Poland free breathing space in the East. The League of Nations Commission of Control, which has been in Vilna, where a provisional government was established after its recent seizure by troops under command of the insurgent General Zelickowski, has arrived in Warsaw.

The Commission went to Vilna to obtain statements from the provisional government there of its side of the case. Its visit to Warsaw is for the purpose of conferring with President Pilsudski, Premier Witos, Foreign Minister Sapieha and others, in an attempt to reach a solution of the problem caused by the seizure of the city from the Lithuanians.

The commission also is continuing consideration of the Polish-Lithuanian territorial dispute. At Vilna, the league emissaries heard the supporters of the new state, listening to General Zelickowski and others. While the conference was in progress there was a demonstration outside the building that caused alarm until it was learned the crowd wished to display its friendliness both to General Zelickowski and the members of the commission.

Press Assails League.

Some of the newspaper criticisms of the League of Nations have been more severe than usual. The league's decisions concerning disputed districts have been unpopular on one side or the other, but the commission members have been shown courtesy by governments and individuals everywhere.

The Poles are extending their lines toward the boundary set by the armistice, which is shortly to become effective, and have reached the town of Krynitz (probably Krynitz, on the old Galician boundary southeast of Lemberg). In the advance, Russian regimental commanders have been taken prisoner by the Polish forces.

Ten Commandments of Selling.

1. The nerves from the eyes to the brain are many times larger than those from the brain to the eyes. Therefore, when possible to use a picture instead of words, use one and make the words mere connectives for the picture.
2. Confine the attention to the exact subject by drawing outlines and putting in the divisions; then we make certain that we are all talking about the same thing.
3. Aim for dramatic effects either in speaking or writing—study them out beforehand. This holds the attention.
4. Red is the best color to attract and hold attention, therefore use plenty of it.
5. Few words—short sentences—small words—big ideas.
6. Tell why as well as how.
7. Do not be afraid of big type and do not put too much on a page.
8. Do not crowd ideas in speaking or writing. No advertisement is big enough for two ideas.
9. Before you try to convince anyone else, make sure that you are convinced, and if you cannot convince yourself, drop the subject. Do not try to "put over" anything.
10. Tell the truth.

The object for which we strive tells the story of our lives. Some one has defined happiness as "the constant pursuit of an agreeable object with a sense of continual progress."

RELIEVES PAIN

Aerial Foes.

A Swiss aviator has recently been in combat with another bird of passage—a large and powerful eagle. The bird evidently resented pretty strongly the aviator's entry into his domain, for he gave chase, and annoyed him for some considerable time. Eventually the aviator was forced to descend, owing to the bird's persistence.

Before landing, however, he took every possible means to rid himself of his tormentor. He looped the loop, nose-dived, righted the machine again, completed a series of circles, but all to no avail. The eagle had him every time. This incident occurred some 5,000 feet above St. Moritz, and created quite a stir.

That birds and insects take more than a passing interest in the strident man has made in the flying world is described by a French naturalist and aviator. During the war he was in charge of a captive balloon, and says that the numbers of birds and insects attracted to his aerial craft were enormous. They not only came to look, but to stay, and he was thus able to secure many rare specimens.

We believe MINARD'S LINIMENT is the best:

New Installation Method Makes Lights Movable.

Despite the fact that its existence has never occurred to 99 of 100 users of electricity, the present method of installing electric lighting fixtures involves one serious disadvantage. The fixtures are fastened permanently, that is, to walls and ceilings. In the home, for example, interior decorations must often be planned around the illuminating units, when it would be much better to arrange the furnishings, and subsequently place the chandeliers and bracket lights, like so many old-fashioned kerosene lamps, wherever they may be most fittingly installed.

And this very flexibility has now been made possible by the invention of a new method of connecting wires and fixtures. Flush with the surface of walls and ceilings, are placed little receptacles which resemble the ordinary push-button sockets. From the base of each bracket fixture project two curved arms, like the claws of a hammer. To attach the fixture to any of the numerous wall receptacles, the claws are simply inserted into the slots, and the fixture is brought to horizontal.

Use of Bulky Dictionaries Made Easy by New Holder.

A book holder, or support, of recent invention, interests unfailingly those who have experienced the awkwardness of handling, on a small table, a ponderous Bible, dictionary or similar bulky volume. It consists of a horizontal roller bar, on either side of which is a spring-mounted surface. On these are laid the covers of the book. Whether the book is opened at front, middle, or back, the right and left-hand pages will always be level, and at the same height above the table top.

The high desire that others may be blessed, savors of heaven.

Your Town.

Real towns are not made by men afraid. Least someone else gets ahead; When everyone works and nobody shirks. You can raise a town from the dead. And if while you make your personal stake.

Your neighbor makes one, too. Your town will be what you want it to be— It isn't your town, is it you? If you want to live in the kind of a town.

Like the kind of a town you like. You needn't slip your clothes in a grip And start on a long, long hike. You will only find what you left behind.

For, there's nothing that's really new: It's a knock at yourself when you knock your town. It isn't your town, it's you!

THE FALL WEATHER HARD ON LITTLE ONES

Canadian fall weather is extremely hard on little ones. One day is warm and bright and the next wet and cold. These sudden changes bring on colds, cramps and colic, and unless baby's little stomach is kept right the result may be serious. There is nothing to equal Baby's Own Tablets in keeping the little ones well. They sweeten the stomach, regulate the bowels, break up colds and make baby thrive. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Authors' Slips.

Attention has frequently been called to slips in fact made by great novelists. Those who are wisest in the great things of life may need to put in a detail involving some technical point on which they are ignorant. Some of them, like Thackeray, whose method of work seems not to have been minutely careful, went astray on points of fact, which it is an innocent amusement to track down. In Rachael Esmond Warrington's preface to "Henry Esmond," which Thackeray makes her date 1778, she speaks of the coming of Rochambeau to this continent. Rochambeau did not come until 1780.

Thackeray speaks in "Pendennis" of Mohammed's soldiers cutting off the heads of all prisoners who would not acknowledge that there was but one prophet of God. The truth is, Mohammedans believe in all the prophets of the Bible—Noah, Abraham, Moses, Jesus—only they believe that Mohammed is the greatest.

Thackeray should have remembered this, for he had read Gibbon. In the "Virginians" Chaplain Sampson is unlawfully arrested for debt during divine service. Under the English law this could not be. An old offender like Sampson would probably have known this much of the law, and would hardly have accepted the situation with the resigned question, "At whose suit, Simon?" Clive, in "The Newcomers," asks, "Why have we no picture of the sovereign and her august consort?" The letter in which the question is asked is dated 182. There was no prince consort until 1840.

Some persons think they have caught Defoe napping when he makes Robinson Crusoe fill his pockets with biscuits before he swims to the wreck. But Defoe was a master of fact. Probably Crusoe kept on his short breeches.

Sir Walter Besant, in "The Children of Gibbon," makes a new moon rise in the east at two in the morning. It is the old moon that rises in the morning. The new moon appears in the western sky and sets soon after the sun.

Sir Rider Haggard describes in "King Solomon's Mines" an eclipse of the new moon, an astronomical impossibility.

No man ever got nervous prostration pushing his business; you get it only when the business pushes you.

Salesmen make paths in the forests of prejudice which afterwards become the streets of a metropolis.

The power of a clean record as a success factor cannot be overestimated.

New Horse Harness Has No Collar.

The feature of a patented horse harness developed on the veldts of South Africa, and now being tried out in several American cities, is the absence of any collar or breastband. This is the result of the inventor's belief that the larger part of the animal's tractive effort should be exerted, not at the base of the neck, but at the junction of barrel and shoulders. Accordingly he places only a very light strap around the neck, but a heavy one just back of the forelegs. The two are joined by small straps, paralleling the withers, and a heavier strap between the legs.

DRAWING ON YOUR RESERVE STRENGTH

This is What Thousands of People Throughout the Country Are Doing.

Thousands of Canadian housewives are working from day to day on their nerve. They are daily drawing more and more on their reserve strength, knowing full well that they are using up that vital force which often means life or death in the crisis of disease. They are the victims of a feeling of hopeless exhaustion after the performance of even the small tasks which were once the simplest and easiest parts of the day's work. They find the appetite failing, sleep is disturbed and unrefreshing; they lose weight and always feel tired and depressed. In this condition a blood-building tonic is needed to restore health and activity, and for this purpose Dr. Williams' Pink Pills are unsurpassed. Often the trouble will have progressed to a point which makes full recovery slow, but the treatment should be persisted in and renewed health and activity will be the result.

The case of Mrs. W. Schooley, R.R. No. 2, Tilsonburg, Ont., well illustrates the value of Dr. Williams' Pink Pills in cases of health breakdown, through weak, watery blood. Mrs. Schooley says: "For upwards of five years I felt my strength declining, until at last I could not do light chores around the place. Then a doctor was called in, and after doctoring about a month he said that only an operation would help me. I did not feel like going through this, and decided that in any event I would wait a while. I had no appetite, often had headaches accompanied by dizzy spells; several times I had fainting spells, and my legs would swell, and I could not even sweep a floor without resting several times. Again a doctor was called in and he said the trouble was general debility and nervous breakdown. The treatment, however, did not help me, and then one evening as my husband was reading the paper, he came across a case in many respects similar to mine, cured through the use of Dr. Williams' Pink Pills. The next day he got me a supply of the Pills, and have known the continued use for several months. I owe my present splendid health. I may say that soon after beginning the use of the pills I felt a gradual improvement in my condition, as it was generally believed I had become a chronic invalid. I always take a delight in telling them that Dr. Williams' Pink Pills are responsible for my present good health, and as they have been a real blessing to me I shall always continue to praise them."

If you are suffering from any condition due to poor, watery blood, or weak nerves, begin taking Dr. Williams' Pink Pills now, and note how your strength and health will improve. You can get these pills through any dealer in medicine, or they will be sent by mail, post paid, at 60 cents a box or six boxes for \$2.50 by The Dr. Williams' Medicine Co., Brockville, Ont.

Rough on Nelson.

It was his first trip to London, although he was no longer young. But he thoroughly enjoyed the sights and sounds of the busy London streets. In fact, since he came from the other side of the border, he enjoyed these more than the cinemas and theatres, where you have to pay to go in. One afternoon he lingered to listen to a small but hard-working band of alleged musicians who were performing in a small side street.

When the "selection" was ended the visitor to London approached the leader of the orchestra and asked bluntly: "What's the name 'o that tune ye've jus' played?"

"The Death of Nelson," sir," replied the musician promptly, with visions of large tips and requests for encores.

"Well, mon," replied the other, as he shook his head and moved off, "I can say is, ye gave him an awful death."

Canada's spring wheat crop this year is estimated to be greater than that of the United States. In total wheat output—winter and spring—the Dominion with about a thirteenth of the population of the United States grows over a fourth of the United States production.

Reading good books is to the brain what eating good food is to the stomach.

AUTO SPARE PARTS

For most makes and models of cars. Your old, broken or worn-out parts replaced. Write or wire us describing what you want. We carry the largest and most complete stock in Canada of slightly used or new parts and automobile equipment. We ship C.O.D. anywhere in Canada. Satisfaction or refund in full our motto. Shaw's Auto Salvage Part Supply, 124-126 Dundas St. E., Toronto, Ont.

Ill-Omened.

It is said that the ex-Kaiser attributes the loss of his throne to the fact that an ill-omened diamond, stated by tradition to have been given by King Solomon to the Queen of Sheba, was incorporated in the Prussian Royal Regalia. This calls to mind other superstitions in connection with precious stones.

The Royal family of Spain was at one time possessed of an opal which they considered brought them such bad luck that they eventually got rid of it. The story goes that King Alfonso XII. presented an opal ring to the Queen, Mercedes, on their wedding day, and she died shortly afterwards. He then gave it to his sister-in-law, the Infanta Christina, who also died very soon after her acceptance of the gift. The King then wore it himself, and he, too, was in his grave within a brief period.

After the King's death, nobody seemed very anxious to wear the opal ring, so the Queen Regent hung it round the neck of the Virgin of the Almudena, at Madrid.

The onyx was at one time credited with malignant powers, the superstitious folk of the Middle Ages believing that anyone wearing an onyx would be visited by evil spirits at night, and have troubled dreams.

The Hindus have a great affection for the cat's-eye, which, they say, greatly strengthens the financial position of the wearer. Among the Brahmins the ruby is a very favorite jewel, as they imagine it acts as a charm against fire.

The turquoise has been credited with many powers. It is supposed to cheer the spirits of its wearer, and it is also said that, if he sustains a fall, the stone will itself crack, and by its magical influence ward off any injury or fracture to his bones.

Live Stock Show.

It is said that the proof of the pudding is in the eating, and this very aptly applies and is proven in the price received for the best finished live stock at the Toronto Fat Stock Show. In the 1919 show as high as 75c. per lb. live weight, was paid by auction for cattle, 50c. per lb. for hogs, and 45c. per lb. for lambs. Quality always brings a premium. The attention of the readers is directed to the Eleventh Annual Toronto Fat Stock Show, to be held at the Union Stock Yards, December 8th and 10th, 1920.

Submarine Films.

Annette Kellermann, the aquatic star, will present in her next film play scenes under water, in one of which, as the heroine, she engages in a thrilling struggle with the villain.

The subaqueous pictures are taken with the help of a steel chamber, containing camera and camera man, which is lowered into the water. A porthole covered with thick glass, in front of which the action takes place, serves the photographic purpose.

Preserving Boots and Shoes.

Now that boots are so expensive, I find that it is well to use the bottle of olive oil for something besides salad making. I keep a small bottle of the oil in my bedroom closet and every week I dip a small piece of flannel in the oil and rub my black boots thoroughly with it. Keeps leather from breaking.

Minard's Liniment For Dandruff. If a man empties his purse into his head no man can take it from him. An investment in knowledge always pays the best interest.—Franklin.

Life is made up, not of great sacrifices or duties, but of little things in which smiles and kindness and small obligations, given habitually, are what win and preserve the heart and secure comfort.—Humphry Davy.

CASCARETS

"They Work while you Sleep"

Stop growling around like a cross bull pup. You are constipated, bilious, and what you need is Cascarets tonight sure for your liver and bowels. Then you will wake up wondering what became of your nervousness, dizziness, sick headache, bad cold, or upset, gassy stomach. No griping—no inconvenience. Children love Cascarets too. 10, 25, 50 cents.

BITS OF HUMOR

FROM HERE & THERE

Every-Day Clothes.

"One finds it difficult in these times to dress as one ought."

"Oh I don't know. I have a suit of clothes for every day in the week."

"Really?"

"Yes, this is it."

Unnatural Flavor.

A city girl was visiting a country friend who is trying to run a model chicken farm. The girl was much interested in all that was shown her, particularly a line of incubators, in front of which she made this observation: "So you have incubators? Very nice, indeed; but I am afraid that artificial chickens can never taste like natural ones."

Slaves.

"Well, how would you like to live in the city?" Farmer Hargrave was asked as he returned from an urban visit.

"Not at all," was his emphatic response. "There ain't no liberty in the city. Why, city people can't cross a street until a policeman blows a whistle."

Not Quite Lost.

The little chap howled sorrowfully until quite a crowd had collected.

"What is the matter, little fellow?" one asked kindly.

"I'm lost," was the reply. "Won't all of you take me home to Moses Einstein's, the well-known cut-rate merchant on Broad Street, who has just received a new lot of finest overcoats, suits and gents' furnishings, which he is selling actually at less than cost?"

MONEY ORDERS.

Remit by Dominion Express Money Order. If lost or stolen you get your money back.

A soldier presented himself at the commonwealth treasury in Melbourne, Australia, and said: "I am a £20 note and want to be cashed." He said that he had swallowed the note at Fleurbaix when he expected to be captured. He remembered the number, and the note in question turned out to be the only one missing from a particular issue which had been recalled. The man received a new note.

"DANDERINE"

Stops Hair Coming Out: Doubles Its Beauty.

A few cents buys "Danderine." After an application of "Danderine" you can not find a fallen hair or any dandruff, besides every hair shows new life, vigor, brightness, more color and thickness.

The human race is divided into two classes—those who go ahead and do something, and those who sit and inquire, "Why wasn't it done the other way?"—O. W. Holmes.

Minard's Liniment Relieves Distemper

True friendship in marriage is an exchange of soul qualities.

MOTHER!

"California Syrup of Figs" Child's Best Laxative

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach, liver and bowels. Children love its fruity taste. Full directions on each bottle. You must say "California."

CUTICURA HEALED ITCHING ECZEMA

On Little Boy's Face. In Blisters. Lost Sleep.

"My little boy had eczema on his face, and it caused itching and loss of sleep. The trouble began when he was six months old, and his face got red, almost like raw beef, and then it broke out in blisters. The blisters broke and caused his face to become sore."

"Then I used Cuticura Soap and Ointment. In a short time all traces of the eczema were gone." (Signed) Mrs. Z. Alexander, Box 35, Trout Creek, Mont., January 21, 1919.

Make Cuticura Soap, Ointment and Talcum your daily toilet preparations. Soap 25c, Ointment 25c and 50c. Sold everywhere. Canadian Agents: The Canadian Drug Company, Limited, St. Paul St., Montreal. Cuticura Soap shaves without rasps.

USE SLOAN'S TO WARD OFF PAIN

You can just tell by its healthy, stimulating odor, that it is going to do you good.

"If I only had some Sloan's Liniment!" How often you've said that! And then when the rheumatic twinge subsides—after hours of suffering—you forget it. Don't do it again—get a bottle today and keep it handy for possible use tonight! A sudden attack may come—sciatica, lumbago, sore muscles, backache, stiff joints, neuralgia, the pains and aches resulting from exposure. You'll soon find warmth and relief in Sloan's, the liniment that penetrates without rubbing. Clean, economical. Three sizes—35c, 70c, \$1.40.

Sloan's Liniment Pain enemy

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" on Aspirin is like Sterling on silver. It positively identifies the only genuine Aspirin—the Aspirin prescribed by physicians for over nineteen years and now made in Canada.

Always buy an unbroken package. There is only one Aspirin—"Bayer"—You must say "Bayer" Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Mono-aceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitation, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

All Merchants stand to Lose on a dropping market

The public demands a quick return to normal conditions. Our policy is to divide part of the losses this year, not leave it all on 1921 sales. Reduced prices in effect, starting today:

DRESS GOODS AND SILKS

36-in. Fine Swiss Duchess, reg. value \$3.75, reduced price \$2.85.
36-in. Messaline Silk, reg. value \$3.25, reduced price \$2.25.

Bellflower—Wm. Gould, Walter Hallstone.

(Continued on page 8)

Miller's Worm Powders will clear the stomach and bowels of worms, so that the child will no more be troubled by their ravages. The powders are sweet to the taste and no child will object to taking them. They are non-injurious in their composition, and while in some cases they may cause vomiting, that must not be taken as a sign that they are nauseating, but as an indication of their effective work.

Always the same rich, full-flavored tea. Sold only in the sealed air-tight Red Rose Carton.

"Household Effects \$500.00"

A True Story
By R. L. Wood

RECENTLY a farmer died, leaving an estate valued at \$25,000. Of that sum, \$500 represented "household effects."

Before his death he frequently deplored the fact that his grown-up children had left home and gone to the city. His disappointment was not that he had lost money by their desertion, which had compelled him to leave part of his farm unworked for want of help. He was an affectionate father, who liked to have his children near him. He could not understand why they should want to drift away one by one.

Strangers may have wondered also until they read that item in the inventory of the estate—"Household effects, \$500."

Waiting for Better Days

For a generation that family had lived in a house with an irreducible minimum of furniture. When a young fellow of the farmer had taken his blushing bride home, he did not have a great deal of home, he did not have a great deal of home, he did not have a great deal of home, he did not have a great deal of home.

One of the Best in Several Counties

In time the farm came to be one of the best equipped in several counties. The machinery was of the very latest and best description. The

live stock were glad and content to stay on the farm. But the young folks were not content to stay.

There were four sons and two daughters. A piece of furniture had been added to the house from time to time, generally the second-hand furniture store managed with just as little and as cheap furniture as could be made serve their purpose. The stable and barn were comfortable, but inside the old farmhouse there was neither comfort nor beauty.

\$6,000 at 6 Per Cent

An item in the inventory showed \$6,000 invested in securities paying 6 per cent. Part of that money invested in comfortable, artistic furniture would have transformed the farmhouse into a real home and would have paid the farmer indefinitely better, both in cash and moral dividends.

The house furnished with suitable and moderately priced furniture, instead of its scattering of cheap odds and ends, would have attracted the children, would have attracted the children, would have attracted the children, would have attracted the children.

A Hard Chest Against the Wall

Bare walls and scantily covered floors, a hard chest against the wall in lieu of a couch, offer feeble counter-attractions to the lure of the luxurious city.

The children who deserted the farm probably did not blame the lack of home comforts for their desertion. They were not jealous of the cows and horses because of their more comfortable quarters. They carried away with them many happy memories of the old homestead.

But they went, and

PERSONAL AND SOCIAL

—Miss Jessie McMurchy is home from Detroit for a week.

—Mrs. Wm. Kerr is visiting in Cleveland and Madison, Ohio.

—Mrs. D. C. McKenzie and children are spending a week in Sarnia.

—Mrs. Garbutt and daughter Louise spent last week with friends at Lucknow.

—J. C. Elliott, ex-M. P. P., returned on Saturday after spending several weeks in the West.

—H. J. Jamieson was in Toronto for a few days this week attending a convention of insurance agents.

—Mr. and Mrs. Albert Bourbonnais and little niece of Thornton, Michigan, spent Sunday with Mr. and Mrs. Roy Siddall.

—Mr. and Mrs. Wm. McKee and family and Mrs. McKee's parents motored to Windsor and spent a few days last week.

—Misses May O'Connor, Alice Thomson, Jessie McLarty and Olive McLean motored from Stratthroy and spent Sunday with Miss Alma Burke.

—Mr. and Mrs. Field and children of Northwood and Mr. and Mrs. Ross Allison and Mrs. Merritt of Kent Bridge spent Sunday at Colin Leitch's.

—Mr. and Mrs. H. P. Jeffery and Miss Ainslie of Leamington motored to Glencoe and spent Sunday with Mr. and Mrs. Mitchell Innes, returning on Thursday.

It is reported that Thomas A. Edison has invented a telephone for communication with the dead. No longer will "dead men tell no tales."

Hallowe'en falls on Sunday this year, and the mischievous small boys will probably be kept busy studying his Sunday School lesson. It might be well, however, for the town authorities to detail a few good, reliable special policemen for duty, or prepare the town hall for damages such as has hitherto been done to the property of citizens.

The prolonged warm, dry spell of weather was broken on Tuesday by frequent heavy showers, which will enable the farmers to get on with their fall plowing and has replenished the wells which were going dry. As yet there has been practically no frost this fall, but the probabilities are now for cold weather. It has been a grand season for outdoor work.

SPECIAL NOTICES

Raincoats away down in price at Lamont's.

Calf for sale. One week old. Apply to A. H. Copeland.

Wright, McKee street, Glencoe, afterwards:—Camp bed, walnut settee, small walnut table, small oak table, oak parlor chair, oak rocker, walnut whatnot, clothes mangle, 6 framed pictures, microscope, second-hand lawn mower, mantel clock, second-hand cutter, fancy parlor lamp, Rayo table lamp, verandah furniture, quantity of linoleum, lady's fur-lined coat (muskrat).

SUFFERED DAY AND NIGHT

The Tortures of Dyspepsia Relieved By "Fruit-a-tives"

LITTLE BRAS D'ON, C. B.

"I was a terrible sufferer from Dyspepsia and Constipation for years. I had pain after eating, belching gas, constant headaches and did not sleep well at night. Finally, a friend told me to try 'Fruit-a-tives'." In a week, the Constipation was corrected and soon I was free of pain, headaches and that miserable feeling that accompanies Dyspepsia. I continued to take this splendid fruit medicine and now I am well, strong and vigorous". ROBERT NEWTON.

50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

THREE MONTHS OF "CRIME" IN MIDDLESEX

(From the Stratthroy Dispatch)

During the three months ending August 31, 1920, there were 1391 convictions for crime in the county of Middlesex. Has the national policy—the O. T. A.—lessened crime? This is by far the largest list of convictions for the same period of time ever presented in the county.

A glance over the quarterly return of convictions for the past three months suggests that some county constables do nothing else but look after autoists who fracture the motor vehicle act. And they do pretty well, thank you: one constable's fees for the period above mentioned amounted to the sum of \$1,794.35. Profit-making? What do you know about that?

Out of 376 cases tried by Justice of the Peace Chittick for the three months ending August 31, only 11 were more than breaches of the motor vehicle act. The auto ought to be suppressed.

Justice of the Peace Hawkshaw ran Squire Chittick a close race in the auto cases, having 123 convictions for that crime out of 256 cases brought before him.

The fines for breaches of the motor act are supposed to accrue to the credit of the municipality where the fracture occurred. Do they? Let's see: Out of 652 cases recently tried, the municipalities interested drew about \$2 per, or \$1,304. The magistrates got about \$2,184, and the constables averaged around \$3,997. In other words, the municipality, to protect which the law was framed, is merely a means to an end. There is no suggestion of wrong-doing in the short end of the stick as though the magistrates and constables should put up a good share for repairing the roads instead of leaving it all to the poor municipalities.

Our local P. M. had only 15 cases before him during the period mentioned, but you know some of our citizens still persist in "doing their trading" in London.

THE FARMER IN BUSINESS

(From the London Free Press)

A Blenheim dispatch reports the efforts of the Cooperative Company's store there. Until a statement is made, the item says, it will not be known what loss has been suffered by shareholders or those who sold produce through the concern. Whatever the details, the incident lends additional significance to a contention advanced some time ago by The Free Press that farmers are ill-advised in competing with the legitimate business of the merchant in their market town or rural center. The Paris Review, quoting specific results of such a policy in the village of St. George, says:

"The U. F. O. local store idea, under which the farmers (so-called) go into handling their own provisioning for themselves, has not yet had time enough to show up many of the faults of the system. The tough time is really now at hand, when on a falling market—say with great quantities of high-priced sugar and flour on their hands—seasoned business experience, that has been tried in business gales of the past, would be welcomed at the helm. How many farmers who have invested in a U. F. O. store, do you suppose, were sleeping better at night right now, and have a lot more readily liquid assets to their credit, if they had just stayed by their own, known and fully understood business of farming. We wonder if the young fellows—farm lads of good standing at the near-by village of St. George—really even thought for a moment of the far-reaching effect that their U. F. O. local store would have in driving out two of their very best local citizens, who were formerly rendering faithful service to the community and surely were not making too much money."

BOGUS RAT TAILS

Paris is being flooded by false rat tails, a type of bait which was offered by the city government for every dead rat or its tail brought to the proper authorities.

A piece of string wrapped in gold-leaf—skinned like a rat's tail, and when the most convincing rat tail, and when the sordid lodgings of M. Guestrès were raided the other day several thousand artificial rat's tails were discovered, ready to be sold. M. Guestrès had been making about fifteen dollars a day by selling the bogus appendages.

Price of stove coal at the mines is only \$7 a ton. It must travel to Canada in Pullman cars.—Toronto Star.

A luminous cable capable of guiding ships across the Channel from England to France in foggy weather is to be laid soon.

Pots are no doubt born, but there are several million unsentimental persons in the world who still cannot understand why.

AUCTION SALES

Clearing sale, Thursday, October 28, lot 11, broken front, Aldborough. Horses, cattle, pigs, hay, corn and implements. Albert Winger, proprietor; L. L. McTaggart, auctioneer.

On lot 22, second range north of Longwoods Road, Mossa, on Tuesday, November 2nd, at one o'clock—1 black mare, about 1200 lbs.; 1 cream mare, about 1300 lbs.; 1 bay horse, about 1200 lbs.; 1 bay horse about 1200 lbs.; 1 Jersey cow, milking; 1 Holstein cow, calf by side; 1 cow due Oct. 19; 1 cow due Nov. 18; 1 cow due Nov. 25; 1 two-year-old heifer, calf by side; 4 months old; 4 two-year-old heifers; 5 yearling cattle; 1 brood sow, Tam; 8 pigs, about 50 lbs. each; 1 Massey-Harris binder; 1 Massey-Harris fertilizer drill; 1 three-horse Deering cultivator; 1 two-horse Cocksbutt corn cultivator; 1 Frost & Wood roller; 1 Deering hay rake; 1 Deering mower; 1 two-furrow Cocksbutt riding plow; 1 disc harrow; 1 set iron harrows; 1 walking plow; 1 gasoline engine, 5 h. p.; 1 sawing outfit; 1 cutting box; 1 stock rack; 1 wagon; 1 democat wagon; 1 buggy, nearly new; 1 fanning mill; 1 Delaval cream separator; 1 iron kettle; 1 fertilizer hand corn planter; about 10 tons of hay; 273 shocks of corn in field; about 400 bushels of oats; about 70 bushels of wheat, and other articles too numerous to mention.—D. A. Bohier, proprietor; H. D. McNaughton, auctioneer.

On lot 24, second range north of L. W. R. Ekfrid, on Tuesday, Nov. 2, at 1 o'clock sharp—Reg. Clydesdale mare by Nobility (imp.), good worker; reg. Clydesdale mare 3 years old by Bornholm Prince (imp.); reg. Clydesdale mare 1 year old by Royal Arthur; heavy horse, colt, 2 years old, by Bornholm Prince (imp.); mare 10 years old, good black and good worker, by Scott's Baron; 1 gelding, general purpose, 3 years old, by Golden Glow; 1 reg. Shorthorn cow 5 years old, with bull calf by her side; 1 good cow, Short-horn, grade, milking; 1 good cow, Jersey, grade, milking, bred again; 1 good cow, grade, milking, supposed to calve Jan. 20; 1 good cow, grade, milking, supposed to calve Jan. 15; 1 good cow, grade, Holstein, 6 years, supposed to calve Nov. 20; 2 good cows, grade, Shorthorn, 7 years, supposed to calve Nov. 15; 1 good heifer, 3 years old, Shorthorn, supposed to calve by date of sale; 3 yearling heifers; 6 yearling steers; 1 heifer calf; 3 hogs, almost ready to ship (to be cash); about 750 bushels of oats; between 40 and 50 tons of alfalfa and mixed hay; Massey-Harris binder, nearly new; Massey-Harris mower, 6 ft., nearly new; 1 new tongue for No. 21 M. H. mower; 1 M. H. dump rake; Frost & Wood drill; disc harrow; lance-tooth harrow; two-horse corn cultivator; scuffer; walking plow; fanning mill with bagger; wheelbarrow in good repair; neekyoke; 4 sets of whiffletrees; hay rack; buggy; cutter; gravel box; 2 sets of heavy harness; 4 horse collars; 1 set light harness; string of bells; 1 set of slung ropes; log bunks for wagon; 1 plank for making bunks; 4 large telephone posts; 1 ladder, 24 ft. long; 1 ladder, 16 ft. long; 2 hand corn planters; 1 post auger; 1 iron mower; 1 Copleys incubator, 120 eggs size, nearly new; 1 single oak bedstead; 1 single iron bedstead; 1 range, McClary rocker, with warming closet; 2 oak models; 2 hanging lamps; 1 parlor lamp; oak magazine stand; oak parlor table; a number of 2-qt. fruit canisters; numerous other articles usually found on a farm.—John M. Beckton, proprietor; L. L. McTaggart, auctioneer.

On north half lot 21, con. 1, Ekfrid, on Thursday, Nov. 4, at 1.30 sharp—6 cows due to freshen early in January; 2 yearling steers, extra choice; 3 steer calves; 1 heifer calf; 1 brood-tire wagon, good as new; stock and hay rack combined.—John B. McKee, proprietor; L. L. McTaggart, auctioneer.

Live Stock Notes.

Cattle relish a change of pasture. If the mares are working hard, a little grain fed the colts will keep them in good heart for wintering over.

Brood sows may be inexpensively wintered over in colony if a good supply of bedding is available. Warmer quarters should be provided for the stock board. Exercise for both means better litter.

Many good horses are ruined by care not being taken to slacken the ration when the heavy work closes up.

Condition lost by cattle being left out on cold and wet nights will need to be made up later by expensive grain feeding.

Stabling and yarding should now be the rule on most farms. The young things and dry cows may find some pasture in the fields, but as a rule the "top" on clovers and grasses is needed for winter protection and is better on the plants than inside the stock.

Stables should be put in shape for the winter. Do not forget to whitewash the walls and wash the windows to let in plenty of winter sunlight. This job is preferably done after threshing, as the dust from threshing tends to settle in stables, especially of the "bank-barn" style, which are all too common on Canadian dairy farms. Under a barn, and especially when housed with other animals, is not an ideal place for milch cows.

Select the Breeding Poultry Stock. In selecting the male always look for a vigorous, active bird, whose head is broad with a comb of bright red color. The sides of the shanks or legs should show considerable red color. Be sure that such a bird has a well-muscled breast that is straight. If possible secure one bred from a laying hen.

All that has been said of the male applies to the female. Most laying hens do not develop much internal fat on what is commonly called a crop behind. Those of the yellow-legged broods lose much of this color, and those broods having white ear lobes show very little, if any, cream color in them if the bird is a good layer.

PERFECTION OIL HEATERS

Mean Cosy Comfort and Health

Light, easily carried from place to place; they give ten hours or more of cheery warmth on a gallon of coal oil. Get our price on these while they last.

Coal Hods, Fire Shovels, Ash Sifters; Stovepipes, 6-in. and 7-in.; Stovepipe Enamel.

Electric Appliances

Hot Point Irons, Toasters, Grills, Electric Washing Machines, Apex Vacuum Cleaners. Use the Condor Electric Bulbs.

WRIGHT'S HARDWARE

"Cream the butter
with the sugar"

—the Cook-Book says

"OH, come on, Mabel, I want to go shopping. It needn't take all afternoon to make a cake! Here, let me cream the butter and sugar. Watch how quick I can do it! If you'd ever used Lantic before you'd realize how quickly a fine sugar creams."

Lantic is a quick-acting sweetener, because it is fine. It distributes the pure cane sweetness speedily, thoroughly and economically. It saves time in the preparation of cakes, puddings and sauces, in the cooking of preserves, in the making of candy, in the sweetening of beverages, hot or cold. Not whiter are the snowy doilies and serviettes on the mahogany table than the tiny crystals of Lantic that gleam and glisten in the sugar bowl. Not finer is the silver with hall-mark. Yet, in homes where every penny counts, Lantic goodness helps in the saving. It does go farther!

The Making of 'Val' Pierce

By CONRAD RICHTER.

VI.

One morning Davey did not appear at the log-bittered swamp until after the others.

"I guess you can get along without me all right," he said to Val with averted eyes when he came.

"I don't understand, Davey," said Val.

"Me! and me are going to Rockville to try to get jobs," he stammered.

"Why, you've got a job here on your own timber!" reproached Val.

The boy tried to answer, faltered, broke down, and confessed wretchedly that he and Mol were leaving only to keep up their mother's table.

"We haven't eaten up your mother's money, Davey!" protested Val, aghast.

"There wasn't much—only—"

"Not your school money, Davey!" And at the boy's hasty disavowal of consequence: "Lord! I never figured how much three hungry woodchoppers could eat. Wait till I talk to Barney. You and Mol can't go to Rockville, that's certain." He hurriedly sought out his partner, who whistled blankly when informed of the disaster.

"Barney," said Val doggedly, "we've got to sell what timber we have over the mountain. And you're the one who's got to do it."

"Me!" exclaimed Barney. "Why me?"

"I don't have the gift of gab, Barney," faltered Val. "Besides, be a sport and go, Barney! Don't ask why!"

With evident reluctance and misgivings, Barney took the seven dollars and went over Sunset mountain. He came back the fourth day with a dollar and fifteen cents, and no success except that at the hotel in Millerville he had found a party of trout fishermen from the city, one of whom was a lumber buyer. He and another were coming over to fish Beaver creek the next day, and would try to find time to look at the timber.

Early the following morning Val, Barney and Davey started for Beaver valley. They crossed the mountain in true backwoods silence. Val's spirits fell when he saw the timber. It lay sprawled here and there where it had been felled. Bushes hid it and leaves covered it, and the sawed ends of the logs here a yellowed appearance, as if aged.

About 11 o'clock two figures in tan coats and dripping waders appeared from the stream. One was short and slight and bobbed along in nervous, uncertain fashion. The other was built on bulky lines, walked ponderously. Val's breath failed when his eyes fell on the pair. From where he stood he would have sworn one to be Angus, the head of his father's purchasing and supply department, and the other his father himself. In quick panic he begged Barney and Davey to say nothing about him, then fled to a clump of young hemlocks shading the old bunk-house spring.

KEEN'S OXFORD BLUE

THE woman who wants WHITE clothes uses Keen's Oxford Blue, just as her mother and grandmother and great grandmother did before her.

Times have changed and methods too. Rain water and mangles are forgotten. All kinds of patented devices and labor saving soaps have come. But wherever clothes are washed today, Keen's Oxford Blue is still the standard of excellence.

Woman's Interests

Women and Household Machinery.

It has happened somewhat frequently that men who have provided their wives with one of the new inventions in household machinery have observed that after the "labor saver" has been used a few times it found its way to the shed or the attic, there to languish out its dusty days. Such incidents have led to the assertion that "women do not take to machinery." Women are natural conservers of old ways, but the fact that they are not unalterably averse to machinery is proved by the willingness of every woman who sews to use a sewing machine. Nevertheless, it is true that many of the women who most need the labor-saving contrivances—the women on the farms, in the villages, the women everywhere who have mountains of housework to do, and who are busy from sunup to sundown—are the very ones who appear most loath to adopt the new time savers and strength savers. They are perhaps more reasons than one for their disinclination.

First, although machinery unquestionably does the work more quickly, more thoroughly and more cheaply than human labor, it often calls for an excessive output of energy in a short time, and women are not used to that; nor are all women constituted for it. The washing machine, the cake mixers and the bread-kneading machines will do the work in one-sixth of the time that is required by the old methods, but a delicate woman may not be able to keep up the pace for even that short period. She finds it easier to rub clothes on a board for two hours than to turn the handle of a patent washer for twenty minutes. Where power from electricity, gasoline or any other source is available the problem is solved, of course; but, lacking that, a woman should plan to work the machine from one to three minutes at a time, and do something else between the periods of work. In that way she will save time and get more work done with less fatigue.

In the second place, not all machines suit every woman, for different tastes often tax different sets of muscles. For example, there is a little vacuum washer on the market, small and inexpensive, that will do the work of one of the big, costly contrivances. A woman with strong abdominal muscles could not choose a better machine; but, one who has not that advantage should select a machine that exercises different muscles.

It is the same with the heated laundry mangle that quickly presses all flat pieces with a beautiful finish, but that requires strength in arm and shoulder. There are so many different makes of nearly all the labor-saving machines that women should be able to make an intelligent investigation and select those that they can use with the most comfort.

In general, it may be said that the machine calls for the downward push rather than the upward pull, or for the motion that throws the weight away from the worker rather than draws it toward her, the machine that can be set at such a height that the operator can use it without bending her back, the one that does not require raising the upper arm to turn a wheel or pull a lever, will be the easiest to run.

Third, many women are blinded to the advantage of some contrivance by considering not so much what the machine will do as what it will not do. The vacuum cleaner will not pick up threads or ravelings, but it will clean carpets and rugs better than the most vigorous hand sweeping, and if used every week will do away with the need in spring and fall of tearing up floor coverings and of beating rugs, pillows and draperies free from the dust of months. It is one of the most sanitary as well as one of the most efficient machines.

Then there are the family dishwashers that require a great deal more hot water than would be needed in a dish pan. But the dishes are washed in one quarter of the time, or

less, and the cost of the hot water can easily be balanced by using a fireless cooker, and so saving more fuel than the dishwasher requires.

There is also an ice-cream freezer that does not need to be turned. The ice cream is not quite so smooth and creamy as the kind made in the old-fashioned freezer, but time and strength are saved, and the ability to enjoy a cool, refreshing dessert every summer day should more than compensate for a slight lack of fineness in texture.

Besides the larger appliances there are dozens of small and handy aids to housework that no woman should be without, but that should be chosen with intelligent regard to individual needs. A good food chopper can be used for all sorts of foods. It is likely to be in frequent use, for it saves time and labor and is easily cleaned. A mayonnaise mixer, on the other hand, may be needed only occasionally, and can be used only to make mayonnaise; and it takes time to clean it. In buying any of the household conveniences it is well to consider: (1) whether the article is likely to be in everyday use; (2) whether it has a wide range of usefulness; (3) whether it is easy to clean and care for.

Apple Butter.

One peck tart apples, two quarts cider, three pounds granulated sugar or less, one and one-half teaspoonfuls each of ground allspice and cinnamon, one-half teaspoonful ground cloves.

Wash, slice and cut apples, place in preserving kettle with cider and cook until very tender, then press through strainer to remove skins, cores and seeds. Return pulp to fire and boil quickly for a half hour, add sugar and spices and cook until thick, stirring frequently. Can be stored in sterilized jars or crocks.

Training Little Children.

The mother of small children who does not live within reach of a kindergarten need not feel compelled to deprive her little ones of the pleasures and benefits of systematic training. It is true that the stimulus of co-operative work and play, so vital a feature of the kindergarten, is not so apt to be found in the smaller group at home and is entirely lacking in the case of the only child. Nevertheless, many of the activities provided in kindergarten can be carried on not only by the small group but by the lonely child as well.

"Come let us live with our children!" is the old familiar Froebelian slogan. We might paraphrase it by saying, "Come, let us sing with our children!"

Why shouldn't children sing morning greetings to father and mother as well as to teacher? Even 2-year-olds that I know can sing with delight in doing so. The good morning songs to various members of the family, to the new dawns, to sun or clouds, sung while dressing, do much to create a sunny morning atmosphere. There are songs to accompany many of the home duties that a child can sing with delight in doing so. At bedtime the devotional spirit of the evening prayer may be enhanced by the singing of a child's hymn. Songs such as these can be found in "Games and Music of Froebel's Mother Play" and in other kindergartens books. Any good library would have some of these, or it would be possible to buy copies through a bookstore.

A kindergarten calendar may easily be made at home. For this purpose a sheet of white cardboard is ruled off squares for the days of the month. The children mark the calendar each day with a suitable emblem. Yellow circles should be provided for sunny days and gray-for cloudy. Tiny umbrellas denote rain; a gray circle spotted with white indicates snow. Advertisements furnish pictures for special occasions—a little church, a birthday cake, a Christmas tree, etc. The particular emblem is less important to the children than the pleasure they take in attending to the calendar regularly, and the fact that they are being helped to a realization of divisions of time. The card should be large enough to allow for a suitable picture for the month to be mounted outside of the ruled portion. Land-seer's "Squirrel and Pair of Nut-crackers" may be used for the October sheet. Correggio's "Holy Night" for December. Queen Victoria's portrait for May.

Games train the senses at the same time that they afford keen pleasure. A mother can play many games with her child without interrupting her work. Dramatization is a wonderful stimulus to the imagination, and numberless stories lend themselves to this form of reproduction.

The kindergarten, aiming as it does, to relate the limited world of the small person to the larger world about him, to quicken his appreciation of parents and all world-workers, to

Best thing could have happened him."

"But I didn't do that," explained the sandy-haired man. "He worked into it himself—after he saw you under that pitch pine on Black Mountain. All I did was plant myself on the job, saw that he didn't hurt himself or get away, and mail you your reports."

"Doesn't matter," waved the big man testily. "I gave that young Lou Baron an extra check for pulling off his stunt, and his moving-picture friend another for dying so darn real from a blank cartridge. You had a longer siege than any of them. Now I got more work for you. The boy says I've got to give you a decent job. And send those Millie kids to college, or be will. I'm not objecting particularly, providing you never give this thing away to the boy. But his mother isn't exactly anxious to see him get tangled up with that girl."

"Nothing doing, Mr. Pierce," said the sandy-haired man abruptly, getting to his feet. "I'm through."

"No offence, Barney," assured the big man placidly, proffering a dark cigar. "I just wanted to tell Mrs. Pierce that I tried my damndest, and fell down. Fact is, between you and me, Barney, I'd like to see him marry the girl."

(The End.)

Cleaners & Dyers
791 Yonge St., Toronto

deepen his wonder and reverence for natural phenomena, is much more than a mere place of amusement. The home can be made more than this also.

The Right Time.

The new chaplain very much wanted to amuse as well as instruct his men, and, accordingly, on one occasion, arranged for an illustrated lecture on Bible scenes and incidents.

One seaman who possessed a phonograph was detailed to discourse appropriate music between pictures. The first of these represented Adam and Eve in the Garden of Eden. The sailor cuddled his brains and ran through his list, but he could think of no music exactly appropriate to the picture.

"Please play up!" whispered the chaplain.

Then an inspiration came to the seaman, and to the consternation of the chaplain and the delight of the audience, the phonograph ground out, "There's only one girl in this world for me!"

A Tea College.

A business college, a college of law or medicine, even a college of agriculture, yes—but did you ever hear of a tea college? They are going to have one in China. This is because Ceylon and India have taken away nearly all China's foreign commerce in tea, and the intelligent men of the wise country have decided to form a college to study how to get this commerce back again, and also how to produce a better product.

BUY "DIAMOND DYES" DON'T RISK MATERIAL

Each package of "Diamond Dyes" contains directions so simple that any woman can dye any material without streaking, fading or running. Druggists has color card—Take no other dye!

Confidence is the very basis of all achievement. There is a tremendous power in the conviction that we can do a thing.

Minard's Liniment Relieves Colds, Etc.

Among the many new kinds of money that have come as a result of the war, light, clean, inexpensive porcelain coins, if experiments in making them are so successful as to warrant a large issue, will be perhaps the most convenient. A porcelain factory in Dresden, at the suggestion of the Ministry of Finance, is investigating methods of making large quantities of two-mark and five-mark "chinas."

Turning Seaweed to Useful Purposes.

An establishment for harvesting the vegetable products of the sea and converting them into valuable scientific and culinary commodities has just been opened at Glendale, near Los Angeles. The plant will first turn its attention to the manufacture of agar by mechanical process.

Agar, formerly coming mainly from Japan, where it is made by a hand process, is a product of seaweed having extraordinary food and medicinal value and varied scientific uses. As a preservative and solidifier in fruits and jellies, it is said to be unexcelled, and eaten with meats and cereals, is an efficient aid to digestion. Candy manufacturers use it extensively for the even, consistent body and the appearance of superior richness it gives to the highest grade confections. It is considered indispensable in the modern chemical laboratory, being utilized chiefly as a medium for the culture of bacteria because of its unsusceptibility to changes of temperature.

The harvesting of the seaweed is a slow, tedious task. The plants resemble delicate moss and are ordinarily mistaken for such. They vary from a few inches to two feet in height. The leaves are threadlike and often interwoven like finest lace. An experienced workman can gather about 200 lb. dried, in a day. Diving bells are used where the fields are below a depth of 20 feet.

The raw weed can be converted into finished product in about 2 hours, and the establishment is already turning out nearly a half ton per day, with a three-ton production as its ultimate goal.

Scarcely any handwork is used in the new process, mechanical carriers conveying the material from one machine to another. As exemplifying the improved methods, four mortars, each having a circumference of approximately 65 in. and a depth of 14 in., are sunk in a solid block of concrete. Into these the raw weeds are thrown. Four long vertical rods or pestles, 3 in. in diameter, and driven by motor power, fit into each mortar, stirring and beating the material into a pulp. From the mortars the pulp is transferred to a washing tank and thence to a bleaching vat, after which it is sent through a powerful mechanical wringer and out upon the drying tables in the sunlight. After drying it is boiled for several hours, submitted to a filtering process, and subsequently deposited in metal trays, where it solidifies in sheets resembling transparent wax.

Spread the Contagion.

Charles Lamb said, "A laugh is worth a hundred groans any minute." Addison said, "Cheerfulness is the best promoter of health." Reginald and armatures of the heart give imperceptible strokes to those delicate fibres of which the vital parts are composed, and wear out the machine. Cheerfulness is as friendly to the mind as to the body.

Rienzi says: "I live in a constant endeavor to fence against the influences of ill health, and other evils of life, by mirth; being firmly persuaded that every time a man smiles, but much more when he laughs, he adds something to his fragment of life."

Halliburton says: "Cheerfulness is health; melancholy is disease." Many persons are ushered into this life tinctured with an inherited melancholy strain. It is difficult for such persons to overcome their innate tendency to gloom and the blues; but when it is understood that all such emotions are directly traceable to a feeble acting liver, that a gradual transformation can be effected by strengthening this organ, the blighted melancholic and disgruntled or sad souls will really develop hope.

In physiognomy, hope is the outward and visible sign of the liver. Laughter produces mechanical massage of this organ and promotes its activity. The late William James suggested, "The sovereign voluntary path to cheerfulness, if our spontaneous cheerfulness be lost, is to sit up cheerfully, look around cheerfully, and to act and speak as if cheerfulness were already there. If such conduct does not make you soon feel cheerful, nothing else on that occasion can. So, to feel brave, we must act as if we were brave, use all our will to that end, and a courage-fit will very likely replace the fit of fear."

Wayne Whipple, in his life of Abraham Lincoln, wrote, "This saving sense of humor was like daily dew to the drooping spirits of the careworn President, and its sustaining freshness must have had an inestimable influence in the final preservation of the union."

Fun, mirth, laughter and good cheer are potent miracle workers—they cost nothing but the will to cultivate them.

In planning for the future it is not always necessary to rake up the past. Some men are really important. Thousands merely act that way.

A government college of fisheries, like those maintained by Great Britain, Norway, Japan, and Germany, is now proposed for the city of Halifax, N.S. The school would provide instruction in seamanship, navigation, and the care of motor engines, in addition to work with improved methods of catching and curing fish and of utilizing the by-products.

Bob Long Says: "My overalls and shirts are money and comfortable, and made especially for farmers. I designed them with the idea that you might want to stretch your arms and legs occasionally."

BOB LONG GLOVES

will outwear any other make of Glove on the market, because they are made by skilled workmen from the strongest glove leather obtainable.

Insist on getting Bob Long Brands from your dealer—they will save you money

SETTLEMENT OF BRITISH COAL STRIKE BELIEVED IN SIGHT

Miners' Leaders Again Confer With Government and New Offer is Discussed—Unemployment Reduced by Every Possible Means.

London, Oct. 24.—Fresh proposals to end the coal strike were discussed for two hours between Premier Lloyd George, Bonar Law and other members of the British Cabinet, and a delegation of the coal miners, headed by Robert Smillie, at Downing Street, this morning.

The miners' delegates reported the result of the conference to the miners' federation and the executive heads of the unions this afternoon. It is understood that the Premier has adhered to his refusal to increase the wages of the miners unless they guaranteed an increased coal output. But a settlement has been rendered much more likely because at the same time he yielded to the miners in the view that they alone cannot send more coal to the surface unless the mine owners are prevented from restricting work. This difficulty seems easy of settlement as long as the Government guarantees the shareholders fixed profits.

The settlement is likely to be on the basis that the output of coal from the mines will be supervised by committees formed of representatives of the Government, of the owners and the miners. These committees will ensure efficient pit equipment, working conditions and production.

It seems certain now that Smillie is ready for peace. In fact the parleys with the Government will be resumed to-morrow. This is accepted as an omen that the general strike will be avoided and peace in the coal strike is possible within a week.

By rationing and apportioning out the work at the plants, the manufacturers have been keeping down the volume of unemployment, though hundreds of thousands of men are working on short time. The total number of those without work during the first week of the strike and as a result of the strike was a quarter of a million.

During the coming week, all the railroads will run greatly curtailed services. The streets are already darkened, coal consumption has been limited, and preparations have been made for closing schools.

Questions Arising Out of Miners' Strike

A despatch from London says:—Two grave questions are exercising the political and industrial world:

First, to what extent the Labor leaders are losing control of the workers;

Second, whether a political crisis and an appeal to the country will develop out of the miners' dispute.

It is stated that James Henry Thomas, General Secretary of the National Union of Railwaymen, has exerted the greatest efforts to get the action taken by the railwaymen to aid the miners postponed for a few days, but that his influence was overborne.

Herbert Hoover Still Helps Troubled Europe
Former Director-General of Relief in Europe for the Allies after the Armistice, who is visiting Canada on behalf of the British Empire War Relief Fund. He spoke at the Canadian Red Cross dinner at Toronto recently.

British Columbia Selling \$1,000,000 Worth of Bonds

A despatch from Victoria, B.C., says:—To provide funds for loans to returned soldiers and industries under the Industrial Act, Hon. John Hart, Minister of Finance, is calling for tenders for \$1,000,000 for British Columbia six per cent. bonds. The bonds will run for three years and are identical with the \$1,000,000 of Pacific Great Eastern bonds put out three weeks ago, for which bond houses all over the United States and Canada scrambled and the price of which they bid up above par in their anxiety to get them.

"WET VOTE" IN BRITISH COLUMBIA A BLOW TO "BONE-DRY" WASHINGTON

Importers Take Steps to Prevent Rum-Running—Fifty Auto Roads From Wet British Columbia Regarded as Menace by State of Washington.

A despatch from Montreal says:—At a meeting held between the wholesale liquor importers, of whom there are ten in the Province, and D. R. Murphy, K.C., General Administrator of the Quebec Prohibition Law, an arrangement was made whereby the wholesalers agree to ship outside the Province only by steamer, railway, express, or through a transportation company.

This means the end of shipments by automobile, one of the most serious means of abuse of the liquor law, and of rum-running either to other provinces or to the United States.

A despatch from Seattle, Wash., says:—Action of British Columbia

GREEK KING VICTIM OF POLITICAL PLOT

Hydrophobia Virus Injected Into Pet Monkey That Bit Him.

Milan, Italy, Oct. 24.—Dr. Georges Fernand Vidal, the French specialist, who passed through Rome to-day on the way home from Athens, where he was called in consultation in the illness of King Alexander of Greece, told Italian journalists that the Greek King had been the victim of a plot to assassinate him.

Asserting that his investigations while in Athens had proved to his satisfaction that the real truth of the poisoning of the King had not been told, Dr. Vidal said that political enemies of the monarch, knowing that Tatos, the monkey, whose bite poisoned the king, was Alexander's favorite pet, had inoculated the animal with germs of hydrophobia, in the diabolical hope that it would go mad while the king was playing with it and bite him—as it actually did.

The monkey had grown so tame and domesticated that it had been allowed to wander at will about the park at the palace. Gradually the animal showed signs of ill-humor, and several weeks ago it bit the king's foot viciously after trying to bite the monarch's favorite dog.

Alexander at first had no idea of the seriousness of the bite, Dr. Vidal said. It was only after the first symptoms of rabies began to be apparent that the physicians attending him began to suspect the real cause. Then it was that the plot against the king's life was revealed.

When the symptoms of hydrophobia began to be more pronounced, then only were energetic anti-rabies antidotes applied. The treatment came almost too late. The king's life was despaired of. But, as the work of the crisis in his condition seems to have passed two days ago, Dr. Vidal said some hope was being entertained that his life would be saved.

TWO MORE IRISH POLICE MURDERED

Attacked From Ambush With Four Others.

A despatch from Dublin says:—Two policemen were killed on Friday when, with four of their colleagues, they were attacked from ambush by fifty disguised men at Feakle, County Clare.

A group of nineteen policemen were ambushed at Parkwood, King's County. The driver of one of the police cars was shot dead and one constable was wounded. A member of the attacking party was seen to fall during the exchange of shots.

Three military lorries were subjected to a twenty-five-minute attack at West Mullingar. Several policemen are believed to have been wounded.

A NEW UNPOPULAR GUY!

A Red Cross Bridge.

The development of the dairy industry of Canada during the past two decades has been surprisingly rapid. Quick to realize the profits to be derived from milk production and the great value of dairying in conserving the fertility of the soil, the Canadian farmer has not hesitated to increase his investments in dairy cattle. The industry expanded during the five years of world war. Canada, being distant from the theatres of war, although handicapped by the enlistment into military service of half a million of her most vigorous manhood, was able to continue the development of many of her important industries, particularly agriculture.

It was not so in Europe. There the fiery blast of war, which left profits in some parts of the world, almost extinguished not only industry but national life itself in others. The drain upon manhood was so great that now in hundreds of thousands of families no adult males remain. Europe, moreover, is filled with orphan children whose prospect of life is marred by the lack of all that is necessary to bodily and mental growth. In most cases the earning power and consequently the purchasing power of their families is utterly destroyed.

Turning again to Canada we find there a surplus production of the commodities that are so badly needed in Europe. Condensed milk, for instance, is a commodity that is a prime necessity for the children of the poor communities of Europe, but the nations to which they belong have no means of purchasing it for them. The Canadian Red Cross is going to endeavor to supply part of their needs by means of a general appeal for contributions to be made during Armistice Week on behalf of the British Empire Fund, which is to be used in the humane task of relieving the sufferings of millions who are stricken by famine and disease. Part of the fund will be used for purchasing in Canada suitable supplies, and the Red Cross will furnish the bridge across which some of our surplus milk will reach the needy children in war-stricken areas. Those who assist will not only have the satisfaction of having contributed to relieve the sufferings of others less fortunate but by helping others will thereby indirectly help themselves.

CORK MAYOR NOW TAKING FOOD

Physicians Hope to Pull Him Through.

London, Oct. 24.—According to the doctors at Brixton Prison, Terence MacSwiney, Lord Mayor of Cork, was resting easily to-day, the seventy-third of his hunger-strike. He was said to be in a semi-conscious state and to be suffering no pain. Nausea had ceased, and the food that was still being administered was being assimilated.

While nothing definite was given out regarding MacSwiney's chances for life, the physicians expressed themselves as hopeful that it was not too late to "pull him around."

Out-of-Work Britishers May Come to Canada

A despatch from London says:—A big increase in immigration to Canada may be one result of the strike of British coal miners. Reports received from Morristown, near Swansea, Wales, state that many of the steel workers there who have been made idle by the strike have decided to emigrate to Canada at an early date.

DECLINE OF RED POWER IS IN SIGHT

Bolshevism Near End of Tether, Says U.S. Secretary of State.

A despatch from Washington says:—Bolshevism in Russia is on its last legs, according to Bainbridge Colby, Secretary of State, or, to use the more elegant expression of Mr. Colby, it is in its latest stages. It was in a state of growing weakness and there was every indication of a breakdown.

The Secretary of State made these assertions orally to newspapermen on Thursday. Peasants generally were abandoning Bolshevik rule and forming local communities independent of the Moscow Soviet Government and of themselves. Mr. Colby's statement, he said, was based on advice from Russia.

Just what will succeed Bolshevism, he stated, is the question giving most concern now. The propensities of the Russians for a local communistic mode of self-government, in his opinion, will result in the assumption of authority for the maintenance of local bodies. From this qualified equilibrium, he thought, a scheme could be evolved out of which would come a national governing entity.

Asked if there was a just comparison between the Soviet regime in Russia and the French Revolution, Mr. Colby replied that the French Revolution was directed by and with reason; it searched out the intellectuals and placed them in power, while in Russia the Bolsheviks are seeking to destroy the intellectuals.

He declared he took an optimistic view of the possibilities in Russia, which was that a democratic Government would rise from the local governing units that are expected to take over political authority upon the downfall of the Soviets. At the present time, he stated, a most rigorous control is exercised over the Press in Russia.

SUICIDES AT NIAGARA FALLS

Man Ends Life in Presence of Score of People.

A despatch from Niagara Falls, N.Y., says:—Before the eyes of a score of sightseers at Prospect Point, late this afternoon, a man climbed over the railing, waded out into the river, and was carried over the American Falls. Too astounded to act, the spectators stood by while the man drifted to the brink, waving his hand and shouting: "Here's where I leave you; good-bye."

In a black derby found near the place where the man climbed the railing was found a piece of paper on which was written: "This hat belongs to Carl A. Ellis, of Hamburg, N.Y." The description of the suicide corresponds to that of Ellis, who could not be located in Hamburg.

The owner of a souvenir stand near the Falls told the police that the man approached him and laughingly said, "Well, I can't vote for Harding, so I may as well go over the Falls." The souvenir seller thought the man was joking, and paid no more attention to the incident until a short time later when he saw the fatal leap.

Canada Sends Full Contingent to League

A despatch from London says:—Canada alone among the Dominions is providing a full contingent of three delegates to the Assembly of the League of Nations at Geneva in November. Australia is sending one and New Zealand one.

ALL THREE MEMBERS OF BOARD OF COMMERCE RESIGN OFFICE

Government Will Not Appoint Successors Until Privy Council Renders Judgment as to the Extent of Federal Authority.

A despatch from Ottawa says:—For a period at least, the Board of Commerce of Canada as a court has ceased to exist. In consequence of the reversal of its judgment regulating sugar prices and the trade in that commodity, Capt. W. J. White, F. A. Ackland and Gerald Dillon, the commissioners composing the board, have resigned. The Government, moreover, has accepted their resignations and has decided not to take steps to reconstitute the tribunal until the Judicial Committee of the Privy Council in England has given a decision in the stated case now before it and so defined the extent of the board's power to control profits.

Announcement of the retirement of Commissioners White Ackland and Dillon was made by Premier Meighen on Thursday night before his departure for Western Canada. "No appointments to the vacant positions will now be made," said the official statement. "The jurisdiction of the board will shortly come before the Judicial

Committee of the Privy Council for final determination. The Dominion Government has been pressing to have this case heard with the least possible delay, but as the Provinces have a right to be heard, it has not yet been possible to have the exact date of the hearing decided on.

"When a decision is given as to the extent of the Federal authority in relation to the Board of Commerce Act, it will be for the Government to consider what should then be done."

The reasons which impelled the three commissioners to present their resignations and which are understood to have been set forth in a letter to the Government have not been disclosed. Messrs. White, Ackland and Dillon were appointed to fill vacancies caused by the retirement first of Judge Robson, of Winnipeg, the original chairman; then of Commissioner James Murdoch, and finally of W. F. O'Connor, K.C. The appointment of Messrs. White, Ackland and Dillon was temporary in its character.

AUSTRIA NEARING END AS A NATION

Starvation and Its Corollaries Driving Country Out of Existence.

New York, Oct. 24.—The president of Austria has salary and emoluments amounting to 100,000 crowns a year. A suit of clothes costs him 20,000 crowns, his total income for ten weeks. If he and his family consume as much as one kilogram (two pounds) of butter a week, the yearly bill would be 11,000 crowns—more than a month's salary. He has to work ten days to earn a pair of shoes of the better grade.

Back of this comparison of the salary of the president with the things it will purchase is the story of a vanishing nation. For Austria, heir to all of the economic ills of the war, is slowly tending toward the vanishing point under the pressure of starvation and its corollaries—disease and an increased death rate, a drop in the productive energies of the people and a decreasing birth rate.

Food is scarce. There is an absolute shortage. Money will purchase so little that the Government resort to bread, flour and beans has become the staff of life of all but the very wealthy.

The total population of children in Austria up to the age of fifteen is 1,182,000. Of this number 932,000 are underfed. Three hundred thousand of these, the worst off, receive one meal a day.

Miners' Strike Cause of Much Unemployment

A despatch from London says:—Complete figures for the whole country are not yet available, but it is estimated that at least 100,000 people have been discharged as the direct result of the miners' strike.

B.C. VOTES 75,964 FOR MODERATION

Western Province Wants Government Control of Liquor.

A despatch from Vancouver says:—Approximate totals show that 125,189 votes were polled in British Columbia yesterday—easily a record. The latest returns show 75,964 for moderation and 49,225 for prohibition, giving a net moderation majority of 26,739. Although there are many districts yet to be heard from, the vote in the cities and towns is conclusive and decisive so far as the fate of the Prohibition Act is concerned. Penticton and Nelson alone among the cities gave meagre majorities for prohibition. All the others went for Government control by substantial majorities, in many cases there being two votes to one in favor.

The city of Vancouver, which at the former referendum was strongly in favor of prohibition, gave a majority of 10,000 against the present act.

Both sides at the outset expressed their fullest confidence, the prohibitionists relying very heavily on the vote of the newly-enfranchised women.

The poll all over the province was a heavy one.

Shipwrecked Crew 22 Days Foodless

A despatch from Manila says:—Thirty-four shipwrecked Dutch sailors were brought here from the Desert Island of the Philippine Visayan group after being 22 days without food. They are all skin and bones, the effect of their privation. They are being treated in a local hospital. They are part of the crew of a sailing vessel blown ashore in a typhoon. They finally were discovered by the Philippine Constabulary. The Dutch Consul now is in charge.

If you have done something that is good, forget it—and do something better!

Weekly Market Report

Wholesale Grain.
Toronto, Oct. 26.—Manitoba oats—No. 2 CW, 73c; No. 3 CW, 67½c; extra No. 2 feed, 67c; No. 1 feed, 66c; No. 2 feed, 62c, in store Fort William.
Man. barley—No. 3 CW, \$1.16¼; No. 4 CW, \$1.13¼; rejected, 85c; feed, 85c, in store Fort William.

WANTS SEAT IN HOUSE OF LORDS

Viscountess Rhondda Raises Momentous Constitutional Question.

London, Oct. 24.—One of the most interesting as well as one of the most tremendous constitutional questions in the history of the Government of Great Britain, is the point raised by the appeal of Viscountess Rhondda, the world's most famous business woman, that she be allowed to take her seat in the House of Lords as a "peeress of the realm."

Following the election of Lady Astor to Parliament, and the passage of the Sex Disqualification Act, Viscountess Rhondda, who is one of the 35 peeresses in their own right in Great Britain, is seeking to establish the momentous precedent which will allow her equal participation in the functions of the House of Lords, entitling her to hold any office available to peers, including the Lord Chancellorship and membership in the King's Privy Council.

Physician Thinks King Alexander Will Recover

A despatch from Rome says:—Prof. Vidal, who has been attending King Alexander of Greece, passed through Rome enroute to Paris on Friday, and told the correspondent that the King was "slightly better." Prof. Vidal was obliged to leave the King's bedside for an important conference at Sorbonne on Saturday. "I cannot help the King by stopping at his bedside," he said. "I have prescribed treatment, and his magnificent constitution must do the rest and the illness take its course. He is being nursed by his wife, Madame Manos, most wonderfully. I never saw such abnegation. She has not been in bed for ten days. The King is quite conscious, and he placed a Greek decoration about my neck with his own hands. Personally, I believe he will recover, despite grave conditions."

Red Gunboats in the Black Sea

A despatch from Constantinople says:—Three Bolshevik gunboats, the Elena, Zikit and Kozorna, are operating in the Black Sea, with their base at Novorossisk. They are conveying small coasters to territory beyond the latter area. It is also known that two Red submarines are in the vicinity of Nicolaiv. British destroyers are on the lookout for all these craft.

Breathing Pure Oxygen Cure for Gassed Soldiers

A despatch from London says:—An attempt is being made to cure men who have been gassed in the war by pure oxygen breathing. At Guys Hospital an airtight chamber of glass 20 feet square and 7½ feet high has been made.

Men who have been gassed and suffer difficulty of breathing will be put in the chamber for five days or more and will breathe oxygen continuously. The treatment was devised by Professor Joseph Barcroft, of Cambridge University, and Dr. G. H. Hunt, of Guys Hospital.

Vote to Bond Their Land For Irrigation Project

A despatch from Lethbridge, Alta., says:—Farmers of the Lethbridge Northern Irrigation district, by the overwhelming vote of 258 to 15 on Thursday voted in favor of bonding their land for \$50 per acre, a total of \$5,400,000 for the purpose of constructing an irrigation project to water annually 108,000 acres.

Melbourne Supports Government

A despatch from Melbourne, Australia, states that the elections give Labor slight gains, but resulted in Government victory. Early city returns from Victoria on the local option poll, indicate that the vote will go for a continuance of local option.

Doctor Charges \$60,000 to Attend Greek King

A despatch from Athens says:—Prof. Vidal, the French authority brought here for consultation on the illness of King Alexander, left after being decorated and thanked by the King, who is ignorant of the seriousness of his condition. The Government paid Vidal \$60,000.

Muslim Women Defend Sacred City

A despatch from Madrid says:—Many women participated in the defence of Sheshuan, the sacred Mohammedan city of Morocco, and some were wounded. A bull was sacrificed as a sign of submission when General Berenguer entered.

Indiarubber used for erasing pencil marks was known in England as early as 1770. A cube of it half an inch square cost a shilling.

Why Pay More

for your dress materials than they cost in this store? We have the finest All Wool Materials in our stock or the more reasonable priced Dress Goods. These we are selling much under ordinary prices for this week. Your money is your own; why not save from 10 to 33 1-3 per cent. when investing in Dress goods?

Colored Flannelette

36 inches wide, value 50c. This week at 29c.

Remnants! Remnants!

Early buyers will find real values in our Remnant Piles Saturday morning. Lengths ranging from 1 to 6 yards in Serges, Plaids, Dress Goods, Shirtings, Cottons, etc., all at one-third off their usual value.

Women's Hosiery and Underwear.

Save bargains.

Vests, Drawers and Combinations.

Again our Shoe Department comes to the front with prices cut in half.

For boys, girls, women and men.

The variety is so good, the quality so excellent, and the price is so sensational

on this sale of

Women's Fall Coats

that they will undoubtedly go out in a hurry this week.

E. A. MAYHEW & CO., Glencoe.

The Transcript.

THURSDAY, OCTOBER 28, 1920

NEWBURY

Miss Olive Regis returned on Monday after spending a few days in Detroit.

Dr. H. A. Wilson and wife of Toronto visited his sister, Mrs. Matt Armstrong, last week.

Mrs. Duncan McEae returned home to Windsor Saturday evening after visiting here and in London.

G. L. Murdock of Embro called on friends here Saturday.

Miss Ella Milner of Walkerville visited her aunt, Mrs. A. Holman, last week.

The A. Y. P. A. held their first meeting at the home of the Misses Pennell on Friday evening. There was a good attendance and much interest shown. Mrs. R. J. Murphy, president, had charge of the devotional part, after which music, games and the serving of refreshments filled in a very pleasant evening. The next meeting will be held at the home of Frank Robinson.

Joe and Cassie Black and Mrs. John Black of Brooke, accompanied by Margaret McArthur and Ellen McCallum, motored to Okadale on Sunday and visited at A. R. Summers.

Miss Ora McDonald of London called on friends in town on Tuesday.

J. J. Whittaker and wife and grandchildren of Windsor visited Miss Gay last week.

Dr. A. P. Owens has returned home and resumed practice.

Knox church Young People's Society held a very interesting debate on Friday evening on the subject "Resolved that the automobile is a benefit to humanity." The affirmative was taken by Ward Leitch and Allan McLean, while Adair Payne and Harold Pennell upheld the negative. Both sides of the question were well supported but the decision of the judges was made by a few points in favor of the affirmative. The young people have invited the congregation to spend a social time with them next Friday evening and will serve lunch.

MELBOURNE

Rev. C. P. Wells, B. A., B. D., of London preached in the Methodist church here last Sunday in the interests of missionary work. The choir gave music suitable to the occasion.

Communion was dispensed in the Presbyterian church here on Sunday morning. The evening service was withdrawn and an evening service was held at Riverside.

Miss Harriet Harvey of Hamilton is the guest of her aunt, Mrs. Fred Hill.

The directors of the Melbourne public library were very pleased to receive a gift of books, nine volumes of J. Fenimore Cooper's works, from Mr. and Mrs. B. G. Roach of Stratford. This gift is very encouraging to the library workers, as very few people consider the small library when making a gift, but usually consider the large library which is generally in a financial condition to purchase what is required. Our library at the present time is in a flourishing condition; only one thing is required to make it second to none for a small village and that is a suitable building or room for the books.

Mrs. Nafzaker (nee Ada Cooper) of Adrian is the guest of Miss Lizzie Cornell.

Ed Griffith of Stratford is the guest of his cousin, Mrs. Archie Carruthers.

Dr. R. D. Dewar has returned home after attending the medical convention in Montreal.

Dr. A. T. Brown and Mrs. Brown left Friday morning to attend the funeral of the former's father, Francis Brown, who passed away on Thursday morning at his home in Sarnia, aged 85 years.

A pleasant medicine for children is

Mother Graves' Worm Expeller, and it is excellent for driving worms from the system.

CAIRO

Mrs. L. Courier of Detroit is visiting at the home of her uncle, J. W. Switzer.

Ed. Arnold, courier for R. R. No. 1, Cairo, is under medical care at present.

Fred Sullivan, who has conducted the general store here for a few months, has recently disposed of the same to Geo. Sinclair of Florence, who takes possession Feb. 1st next.

C. P. Smith of Detroit visited with friends here during the week.

ALVINSTON

Messrs. Rundle and Chambers have purchased the residence recently occupied by Miss Annie McPhail.

Mac, Secord, formerly of Detroit, has taken the position as manager of the local power plant.

The fine weather is bringing in for shipment great quantities of sugar beets. Owing to the dry weather the beets come out very free from earth. The yield is averaging from ten to fourteen tons per acre. The heat has also brought in some second crop raspberries and strawberries.

Mrs. Colin Munroe of Walkers has purchased the residence recently occupied by Miss Annie McPhail.

Word has been received from Ottawa that Alvinston's promised war trophies have been shipped. They consist of two German machine guns and a German trench mortar. No location has yet been decided on for them.

WALKERS

Walkers, Oct. 21.—Mrs. Wm. Gimblett left on Friday, Oct. 15, to make an extended visit with her mother in England.

Miss E. D. Brown attended the teachers' convention at Stratford on Oct. 14.

Miss Jo McCallum spent Thanksgiving with her parents there.

George Giles left on Tuesday for Vermont, Maryland, on a business trip.

Mrs. John Pedden of Adelaide is visiting her daughter, Mrs. Dan Galbraith.

Fresh Supplies in Demand.—Wherever Dr. Thomas' Electric Oil has been introduced, increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found, its potency is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

WOODGREEN

The gospel meetings being conducted by Chas. W. Petch at Woodgreen have been increasing in interest and attendance. The meetings will continue until Sunday night, Oct. 31.

WARDSVILLE

The Women's Missionary Society of Cashmere church will hold their anniversary services next Sunday at 2.30 in the afternoon and 7.30 in the evening. Mrs. (Rev.) Snell of Dutton, superintendent of Ridgeway district, will conduct both services. There will be a ladies' choir at both services.

APPIN

The Appin Women's Institute will meet at the home of Mrs. Jas. Allan on Thursday, Nov. 4. Good program. Everybody welcome.

Rev. and Mrs. Bristol called on friends here this week.

Sorry to hear that John Macfie is ill.

The anniversary services of the Appin Methodist church which were held last Sunday proved a great success. The church was filled to capacity with large and appreciative audiences. Rev. Judson Kelly of Colborne street church, London, preached two very fine sermons in the afternoon and evening. Special music by the choir was greatly appreciated. The church was beautifully decorated with flowers. The collections amounted to over \$200.

The Newbury CASH STORE

Sweet Potatoes 10c

Cranberries 25c

Oranges and Bananas

Smoked Roll, Bacon, Salt

Meat, etc., at reasonable prices

W. H. PARNALL

NEWBURY

DAVISVILLE

Mr. and Mrs. Ralph Longley of

Cairo spent Sunday with his mother,

Mrs. R. B. Smith.

Mr. and Mrs. Lawrence Babcock

have returned from their visit to

Detroit.

The threshing around Davisville is

getting pretty well to an end now.

CASHMERE

Mr. and Mrs. Wed. Dark and small

son (Charlie) spent Sunday with the

formers' parents, Mr. and Mrs. Thos.

Dark, Bothwell.

Mr. and Mrs. B. F. Jeffery of New-

bury spent Sunday with their daughter,

Mrs. Calvin Sitter.

Mr. and Mrs. Ross Willick and children

spent the week-end at Stratford

visiting the latter's parents, Mr. and

Mrs. Reile.

Mr. and Mrs. Abe Bergey of Clachan

spent Sunday with Mr. and Mrs.

Wilkie Taylor.

Hugh Taylor is home from St. Joseph's

Hospital where he underwent

operations for appendicitis some time

ago. A trained nurse is still in attendance.

Mrs. Dan Taylor of Chatham is visiting

relatives in this vicinity.

Rev. Mr. Kerr of Bothwell took the

service here on Sunday last instead

of Rev. Dr. Husser, who exchanged to

take the anniversary services at Armstrong.

Mrs. (Rev.) J. A. Snell of Dutton

will preach on Sunday next, Oct. 31st,

in this church. It is the W. M. S. anniversary.

There will be services at 2.30 p. m. and 7.30 p. m. The collections

will be donated to missionary work. The ladies will have charge of

the choir and the rest of the work.

The Best Liver Pill.—The action of

the liver is easily disarranged. A

sudden chill, undue exposure to the

elements, over-indulgence in some favorite

food, excess in drinking, are a few of the causes. But whatever may

be the cause, Parmelee's Vegetable

Pills can be relied upon as being as good

a corrective as can be taken.

After six neighbors testified they

attended the funeral of a Los Angeles

man and had seen him buried, the man

appeared in court and refuted their

stories.

Corns cause much suffering, but

Holloway's Corn Remover offers a

speedy, sure and satisfactory relief.

A RED CROSS BRIDGE.

Food Plentiful in Canada, Scarce in Europe—Needs of the Children.

The development of the dairy industry of Canada during the past two decades has been surprisingly rapid. Quick to realize the profits to be derived from milk production and the great value of dairying in conserving the fertility of the soil, the Canadian farmer has not hesitated to increase his investments in dairy cattle. The industry expanded during the few years of world war, Canada, being distant from the theatres of war, although handicapped by the drafting into military service of half a million of her most vigorous manhood, was able to continue the development of many of her important industries, particularly agriculture.

It was not so in Europe. There the very blast of war, which left prints in some parts of the world, almost extinguished not only industry but national life itself in other. The drain upon manhood was so great that now in hundreds of thousands of families no adult males remain. Europe moreover is filled with orphan children whose prospect of life is marred by the lack of all that is necessary to bodily and mental growth. In most cases the earning power and consequently the purchasing power of their families is utterly destroyed.

Turning again to Canada we find there a surplus production of the commodities that are so badly needed in Europe. Condensed milk for instance is a commodity that is a prime necessity for the children of the poor communities of Europe but the nations to which they belong have no means of purchasing it for them. The Canadian Red Cross is going to endeavor to supply part of their needs by means of a general appeal for contributions to be made during Armistice week on behalf of the British Empire Fund, which is to be used in the humane task of relieving the sufferings of millions who are stricken by famine and disease. Part of the fund will be used for purchasing in Canada suitable supplies and thus the Red Cross will furnish the bridge across which some of our surplus milk will reach the enfeebled children in war-stricken areas. Those who assist will not only have the satisfaction of having contributed to relieve the sufferings of others less fortunate but by helping others will thereby indirectly help themselves.

FROM GENEVA.

Organizer for League of Red Cross Societies Tells of Need of Europe's Orphans.

"While we at home are intent on industrial expansion and a place in the sun, Europe, which has been in condition is fighting for its very existence," said Donald W. Brown, director of the department of organization in the League of Red Cross Societies of the World, which has its headquarters at Geneva, Switzerland. He visited Toronto to learn the peace program of the Canadian Red Cross Society and to establish closer contact between it and the League.

Millions of War Orphans.

Having just arrived from Europe, Mr. Brown was able to give the Canadian Red Cross some first hand information concerning the people of Europe. He called attention particularly to the condition of the orphans, so many of whom are now orphans. While the exact number who have lost one or both parents during the war cannot be determined, the most conservative estimates place the number at over ten millions. This number seems quite consistent with the heavy war casualties among so many nations.

Dependent Upon Charity.

The condition of these children is in most cases very pitiable. Many of them have no homes and they are dependent upon whoever may be charitable and kind enough to help them. But there are few who are able to give such help. The masses of the people of Russia, Poland, parts of Roumania, Czechoslovakia and other countries are so poor that they have not necessities for themselves. Consequently in the great area between the Baltic, the Black and the Adriatic Seas, there are millions of children who face the next few years, and particularly the coming winter, without hope of proper care unless outside assistance is given to them.

Disease Prevalent.

In addition to the unhappy condition of the children the adult populations are in the direst of misery on account of disease. Suffering has been accentuated by lack of food and clothing, nursing and medical attention, and tuberculosis, smallpox, typhus and dysentery are continuing unchecked.

Typhus which has so often proved a scourge and menace to the human race is again prevalent, and unless checked will most likely extend its ravages to an alarming degree.

British Empire Appeal.

For these urgent reasons, Mr. Brown, the League of Red Cross Societies has made an earnest appeal to the people of the British Empire and he was glad to hear that the cause of the suffering children was being taken up in Canada. He had learned that an appeal on behalf of the British Empire Fund would be made in Canada by the Canadian Red Cross during Armistice week and wished for it every success.

Typhus in Canada.

In its earlier days Canada suffered from the ravages of a disease then known as "spotted fever" but now known generally by the name of typhus. It is a disease that spreads rapidly and is very destructive of human life. In the years 1846-47 it was brought to Canada by immigrants and caused great loss of life. It is only by taking urgent measures to stamp it out in the earliest where it is now raging that it can be prevented from extending.

PRIZE LIST, GLENCOE FAIR

(Continued from page 4)

Mann—Walter Hallstone, Joseph Tait.

Ribson Sweet—Wm. Gould.

Talmon Sweet—Wm. Gould, Joseph Tait.

Wealthy—John Gould, Joseph Tait.

Fall pears—T. C. Reycraft, Joseph Tait.

Winter pears—James M. Walker, McKellar Bros.

Crawford peaches—Wm. Gould.

Peaches any other kind—Wm. Gould.

Green Gage plums—Wm. McCutcheon.

Lombard plums—Wm. Gould, D. A. Campbell.

Plums any other kind—Wm. Gould.

Crab apples—John Gould, Walter Hallstone.

Concord grapes—John Gould, Walter Hallstone.

Special for most prizes on fruit—Wm. Gould.

Apples any other kind—J. H. Walker, Joseph Walker.

Geraniums, single—Edway Hurdle.

Asters, one variety and color—Jas. Walker.

Dahlias, collection—James Walker.

Hyacinths, collection—R. B. McKellar.

Zinnias, collection—D. A. Campbell.

Table bouquet or basket—Edway Hurdle.

Hand bouquet, loose design—Joseph Walker, R. B. McKellar.

Floral design, flat—Edway Hurdle.

Dairy and Other Products.

Crock dairy butter, 10 lbs.—A. M. Leitch, D. A. Campbell.

Dairy butter, 1-lb. prints—A. M. Leitch, James Walker, D. A. Campbell.

Dairy butter, individual pats—D. A. Campbell.

Home-rendered lard—D. A. Campbell, James Walker.

Hens' eggs, brown—Edway Hurdle.

Sarah Munroe.

Hens' eggs, white—D. A. Campbell, Edway Hurdle.

Special for 5 lbs. butter in prints—A. M. Leitch.

Special for best 4 one-pound prints butter—James Walker.

Special for most prizes in dairy—Mrs. McCutcheon.

Special for most prizes in butter—D. A. Campbell.

Special for best 10-lb. crock of butter—D. A. Campbell (two prizes).

Special for best 3-lb. crock of butter—James Walker.

Domestic Science.

Bread, white, yeast rising—A. M. Leitch, John Gould, Sarah Munroe.

Bread, salt rising—A. M. Leitch.

Bread, fruit—D. A. Campbell, R. B. McKellar.

Raised buns or rolls—D. A. Campbell, A. M. Leitch, R. B. McKellar.

Tea biscuits—A. M. Leitch & Sons.

Cakes and sugar cookies—R. B. McKellar.

Oatmeal cookies—D. A. Campbell.

Dark layer cake—D. A. Campbell, Sarah Munroe, A. M. Leitch.

Regulus cake—Hazel McCracken, D. A. Campbell.

Apple pie—R. B. McKellar, D. J. Mitchell.

Small fruits canned—Mrs. W. A. McCutcheon, A. M. Leitch.

Large fruits canned—Mrs. Wm. McCutcheon.

Small fruits preserved—Mrs. Wm. McCutcheon.

Large fruits preserved—Mrs. Wm. McCutcheon.

Native fruit jellies—Mrs. Wm. McCutcheon.

Marmalade—Mrs. Wm. McCutcheon.

Sour pickles—Mrs. Wm. McCutcheon.

Sweet pickles—A. M. Leitch & Sons.

Canned vegetables—Mrs. Wm. McCutcheon.

Canned chicken—Mrs. Wm. McCutcheon.

Special for best display of fancy baking—James Walker.

Special for best biscuits made by girl under 12 years—D. J. Mitchell.

Special for best collection of pickles—A. M. Leitch & Son.

Special for best bread, hop yeast—A. M. Leitch.

Special for hop rising bread made with Diamond flour—A. M. Leitch.

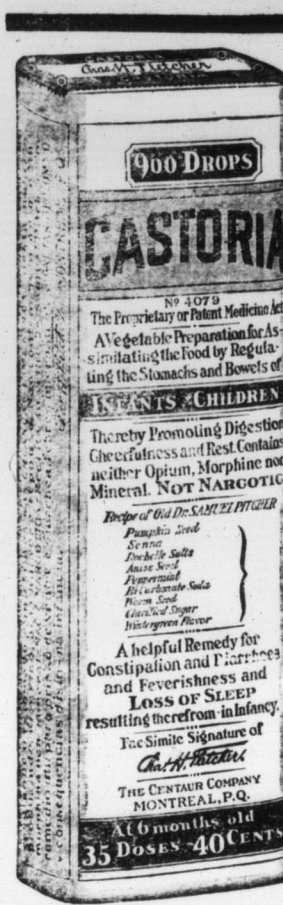

Special for buns made with Diamond flour—A. M. Leitch.

Special for bread made from Rainbow flour—A. M. Leitch.

Special for biscuits made from Rainbow flour—A. M. Leitch.

Special for buns made from Rainbow flour—A. M. Leitch.

Special for collection of canned fruit—Mrs. Wm. McCutcheon.
