## LOCAL NEWS ITEMS

Brief Notes of Interest to Town and Rural Readers.

### Philipsville

There are hundreds of acres of farm land in this township not cultivated at all owing to the wet weather of the spring.

The recent rain we had on Thursday saved the small-fruits.

Mrs. M. Seed, Toronto, is visiting her parents, Rev. F. R. and Mrs. Chisholm.

Mrs. LaBlonde, Brockville, spent the past week visiting relatives here.

Mrs. Alfred Elliott and Mrs. R. Haskin, who were both taken suddenly ill last week, are recovering.

Mr. and Mrs. J. Baker spent Sunday with Mrs. Saire.

Mrs. Pope, Harlem, is visiting her daughter, Mrs. T. Webster.

Miss K. Davison, Brockville, visited here recently.

Mr. D. Algire spent the week-end here with his sister, Miss A. Algire, who is not in the best of health.

Mrs. Doherty met with a painful accident at her home here on Saturday night last. Upon getting up to answer the call of her small son she unfortunately opened a door leading to the stairway, missed her footing and fell. Besides severe bruises she sustained a bad cut over her right eye, which required several stitches.

A large number attended the special session of the Women's Institute on the 23rd, addressed by Mrs. Patterson, the government representative. The subject, "The Importance and Meaning of Women's Work," was ably handled by the speaker and generally enjoyed by all.

W. J. Halladay motored to Kingston on Friday.

Mr. and Mrs. H. E. Eyre and Miss Eyre, of Harlem, visited at W. B. Phelps' on Sunday.

Mrs. Wilson, Delta, was a visitor in town on Sunday.

### Toledo

Pte. William Millar, originally with the 35th Battalion, who enlisted at Smiths Falls three years ago, saw hard fighting but won through, as now home from overseas, visiting at the home of his sister, Mrs. Herbert Bellamy.

Mr. and Mrs. Michael Rape and Miss Freeman, of Elgin, were visitors on Thursday last at Mr. Rape's old home.

A party of gypsies are encamped in the woods between Toledo and Frankville.

Mort Moran was a Prescott visitor recently.

Fred Gray, of the Redan, was renewing acquaintances in the village last week.

Visitors at Mr. and Mrs. R. Crumney's on Friday were Mr. and Mrs. Ike Montgomery, Mrs. L. Hunter and Mrs. M. A. Johnson, all of Jasper.

Mrs. William Wright, of Jasper, spent Friday the guest of Mrs. W. J. Seymour.

Ralph Wilson spent the week-end visiting friends in Brockville.

Mrs. John Seymour was in Brockville one day recently to see her daughter Mildred, who is still confined to the hospital, though steadily gaining.

Latest reports from W. J. Seymour state that he is slowly gaining.

Miss Pearl Bell and Miss Lewa Drummond have entered upon their duties as nurses-in-training at the Brockville General Hospital.

Councillor Holmes Drummond was a Brockville visitor recently.

Miss Adella Whiting, who was a student at Columbia University, N. Y., for the past few months, has completed her course and is at present making an extended visit to her old home here.

Mr. and Mrs. Thos. Coad and child, of Chantry, were visiting at Mr. Coad's old home on Saturday and Sunday.

### Frankville

Mr. Frank Hewitt and his son are visiting at his father's, Mr. James Hewitt.

This section is beginning to feel the effect of the dry weather, mea-

dows in some instances quite badly. Corn is pushing ahead rapidly.

Edward Looby, Lombardy, is visiting his brother, W. R. Looby.

Mr. and Mrs. W. M. Hanton, spent the week-end visiting Gananoque friends.

David Dowsley, Gananoque, spent a couple of days this week with old friends here.

Miss Kate Jones is visiting friends in Smiths Falls and Carleton Place.

Charles Giffin has sold the Donaldson property to Thomas Code, of Toledo.

Mrs. M. L. Livingstone had the misfortune on Monday to fall and break her wrist. Dr. Bourne reduced the fracture.

Investors here in the Standard Reliance Corporation are a little nervous about their holdings.

Mrs. W. D. Livingstone is receiving treatment at St. Vincent de Paul Hospital, Brockville.

Mrs. Ernie Rowsome, Belleville, is visiting with Mr. and Mrs. R. R. Hanton.

George Haskins and Herb Botham have purchased new Chevrolet cars.

A far greater trade in Canadian farm stuffs is done in our own cities and towns than is done abroad. This fact is mentioned by the Canadian Trade Commission, not to minimize exports, but to show the unrecognized importance of our home markets.

### Charleston

Last week's arrivals at Foster's Hotel included J. Pickel, H. James, Leo. Fentonburg, New York; A. McDonald and wife, Chicago; W. Chown Smiths Falls.

R. Foster is having doors hung on his shed for the purpose of housing cars of his guests.

Kathleen and Hubert Beale were successful in passing their promotion examinations at the Athens High School and are receiving congratulations.

Quite a number from here attended the unveiling of the memorial in St. Dennis Church, Athens, on Friday evening, to the memory of the late Corp. Basil Connery.

The Methodist S.S. of Athens held their annual picnic on the grounds of Cedar Park on Saturday.

Relatives of Pte. John B. Ward, who enlisted at Seaforth, England, in May, with a labor battalion, have recently received a letter from him, dated at St. Pierre, June 2nd, and reads in part as follows: "I left Seaforth two weeks ago. I did not have to come, but wanted to see France before returning to Canada, as I did not have a chance to get over before the armistice was signed. This place is what is called the Arras and Cambrai front, and it looks as though there had been war here, for there is hardly a building standing. It seems too bad to see once beautiful buildings all torn to pieces. The country is all dug up with trenches. A number of the inhabitants have come back since the armistice was signed. They think the Canadian boys are great soldiers. We have just started to work to-day. Our hours are from nine to twelve, with ten minutes every hour to smoke. Our canteens are good and lots of them. We are also furnished with cigarettes and tobacco. We are to have leave before going back to England and I hope to see Paris. There is lots of danger here as the ground is covered with ammunition and the officers keep warning us all the time. There have been five men killed and four wounded since we came here. One fellow brought part of a Mills bomb into the tent and it exploded, blowing off both hands. His fingers were scattered in all directions. I found Gerald Botsford's grave, with a little white wooden cross. I fixed it up and sowed some flower seeds. I enclose a picture of the cemetery. I am looking around for the graves of the other boys I know."

"Placing Canada on the map of trade," is the happy way in which Mr. W. B. Ramsay, Montreal, who represented a group industry in London, and who has brought back heavy orders to Canada, describes the work of the Canadian mission in London.

Miss Edna Hamah, Ogdensburg, N.Y. visiting with her cousin Mrs. M. Sheffield.

Mrs. Isabelle McLaren, Ottawa, visiting at the home of Mr. and Mrs. A. M. Chassels here and at Charleston Lake.

Have your piano tuned by our expert. Satisfaction guaranteed—write C. W. LINDSAY LTD., Brockville

On Thursday, July 3rd, the delegate, Mrs. (Rev.) T. J. Vickery gives her report of the sessions of the recent branch meeting at Cornwall. At the close light refreshments are to be served and a social half-hour spent over the tea-cups.

Withrow and Miss Ruth Read and Miss Mary Bell motored from Sydenham en route to Westboro, near Ottawa, where Rev. T. A. Read has been stationed. These young people are being warmly welcomed by friends who knew them so well during the four years pastorate here of Mr. Read.

Mr. and Mrs. Charles Walker, of Brockville, were week-end guests of the later's father, Henry Hagerman.

The Gordon girls, Brockville, are visiting Athenian relatives.

Mrs. T. Serviss and Miss Margaret, New York, are guests of the former's father, I. Wiltse.

Miss Maria Hamblin, Delta, is a guest at the home of M. Yates.

The Methodist S.S. picnic came off at Charleston on Saturday. The crowds came in cars and carriages, in cabs and cars—any way to get there—and spent the whole summer day in happy care-free fashion.

On Saturday afternoon the monthly meeting of the Women's Institute was held. Plans were made whereby the program for the year will be drafted at once and printed copies distributed among the members.

The local high school and public school closed Friday night for the long vacation. It is said that Messrs. Burchell, Carre and Snowden, Miss Ferris and Mrs. Fisher have been re-engaged for next year.

Miss Carrie Covey, Soper's school, has arrived for the holidays.

Miss Helen McLean, B.A., teacher at Charleston school, has returned to her home west of Brockville.

Mr. and Mrs. A. M. Morrow, Peterboro, are guests at the home of her sister, Mr. and Mrs. W. H. Morris.

Harold Giles, Cedar Park, Charleston Lake, was a week-end guest of Leonard Johnston's.

On the morning of July 1st, in St. Denis Church, Miss Anna Hickey, Mill Street, was united in marriage to Mr. Potvin, Brockville. The newlyweds left on the morning train for Ottawa.

Several married couples motored to Jones' Falls to spend the holiday.

Many from here went to Brockville and took in the celebration on Tuesday.

Mr. French, Isaac Street, is spending a few weeks at Lansdowne, a guest of his daughter, Mrs. W. Legett.

Mrs. A. U. Williams was at Delta a few days last week, a guest of Mrs. S. Seaman.

Misses Georgia and Marian Robinson, Miss Geneva Yates and their cousin, Miss Percival, Syracuse, have been holidaying at Charleston Lake.

Douglas Johnston has been spending a week or so in New York. His sister, Miss Rose, returned with him.

Those in attendance at the L.T.L. social at Elvida on Wednesday night report a good time. Even the shower which came failed to dampen their enthusiasm.

The Robert Wright employees must have been early astir on Wednesday, 25th inst., for before nine o'clock a train of autos arrived with a jolly crowd of pleasure seekers. After making the round of the principal streets the party left for their destination, Devil's Lake.

Harry Percival enjoyed a day's fishing at Delta Lake last week, casting for bass.

Mrs. J. R. Howard Thomson, Vancouver, B.C., arrived in Athens last week to spend the summer with her parents, Mr. and Mrs. E. M. Fair.

Col. R. H. Steacy, C.M.G., of Ottawa, spent the week-end in town, the guest of his sister, Mrs. Fair.

Mrs. W. E. Steacy, Miss Gertrude and Master Robbie Steacy, of New York, are spending a few days in town, the guest of Mrs. F. Pierce, before leaving for their summer home, Manhattan Island, Charleston Lake.

### Women's Missionary Society

The thirty-sixth annual meeting of the Montreal Conference branch of the Women's Missionary Society of the Methodist Church opened in Cornwall on the morning of Tuesday, June 17th, and continued until noon of the Thursday following. Too much cannot be said of the kindness manifested and hospitality extended by the people toward their visitors and the sojourn in that pretty town will ever remain a pleasant memory.

The delegation was unusually large numbering about one hundred and fifty.

The devotional exercises throughout were most helpful and the music so generously furnished was appropriate and well rendered.

Mission Band and Circle work was given a place of prominence, and reports from this department indicate that the young people are alive to the great importance of the missionary enterprise.

Considerable stress was placed on Christian stewardship, the subject being dealt with in such papers as "Our Money Obligations," "How Shall I Tith?" "Results of Tithing," "Is It Worth While?"

Along other lines there were helpful papers and addresses, e.g., "Explanation of Proposed Branch Changes," "Building for the Future," "Wealth of Room 410," "Enlistment of Home Forces," "Recruits for the Piping Line."

Many reports were received from various departments of foreign work, showing satisfactory progress.

The secretary's report showed much reason for thankfulness because of extension of the work, while the treasurer's report showed an advance of twenty-one per cent in funds.

Miss Brooks, for twenty years a missionary to China, is home now on her third furlough. She was warmly welcomed by all present and in her winsome manner gave an interesting account of her years in the Orient. She made a most urgent plea for more workers, as the need is indeed desperate.

The address of the president, Mrs. (Rev.) T. G. Williams, was brief but comprehensive, as she gave a general survey of the work in the various fields.

At the conclusion of her remarks a magnificent bouquet of roses was presented Mrs. Williams by the executive, as she had tendered her resignation after twenty years of faithful service as the head of the organization.

The officers elected for 1919-20 are as follows:—

President—Mrs. W. H. Henderson.

Hon. Vice-Pres.—Mrs. T. G. Williams.

1st Vice-Pres.—Mrs. J. H. Murray.

2nd Vice-Pres.—Mrs. M. M. C. Lavell.

3rd Vice-Pres.—Mrs. I. Hilliard.

Rec. Sec.—Mrs. E. M. Grose.

Cor. Sec.—Mrs. J. A. Gordon.

Treas.—Mrs. R. C. Antliff.

Cor. Sec., Circles and Bands—Mrs. T. G. Raynor.

Treas., Circles and Bands—Miss R. Goodwin.

Supt. Ss. Giving—Mrs. T. S. Kendrick.

### Obituary

**EVELYN DOREEN TABER**

Sorrow and grief unspeakable fill the hearts of the inmates of the home of W. T. Towriss, Glen Buell, where the Angel of Death entered on Tuesday afternoon, July 1st and called home Evelyn Doreen, the elder daughter of Pte. and Mrs. W. B. Taber of Newdale, Manitoba.

Despite the fact that all that medical skill and loving hearts could possibly do, her young life was snuffed out in the spring time of youth.

Doreen lived her short life of fourteen years at Newdale, Man., where many young friends will deeply mourn her death. She was a faithful member of the Methodist Sunday School of that place and a life member of the Mission Band—always manifesting a particular in the latter.

A little more than two weeks ago, Doreen with her mother, brother and sister came east to meet her "Daddy" returning from overseas, where he had spent the last three years and three months serving with the 13th Field Ambulance Corps in France. But the happy little family so lately united, was soon to be broken into again. Doreen contracted a cold, pneumonia developed, and in one short week she was gone.

At her bedside the devoted family and loving friends went with her as far as human spirits could go, then she passed peacefully into that Heavenly Home to be with her Saviour whom she loved.

She was so bright and possessed such a sweet, unselfish disposition, she was called sunbeam of her home.

Although anxious to live, Doreen was resigned to die if God saw best.

Recognizing through all this sorrow that God's ways are best, we feel our own lives will be the sweeter for having known Doreen.

The remains were laid away in the Athens Cemetery to remain until the day-break.

James Morris, Irwin Stevens on probation.

S. L. Snowdon, Principal.

To Sr. III.—Rhea Kavanaugh (hon.), D. Beedal, A. Goodfellow, B. Steacy, M. Goodfellow, K. Gifford, C. Purcell, M. Earle, E. Haig.

Mabel M. Jacob, Teacher.

### Rockspring News

Mr. and Mrs. Jack McFadden and Miss Elcie, Smiths Falls, were week-end guests of R. S. Hinton. The whole party motored to Oak Leaf and Charleston on Sunday.

A large number attended the union school picnic on Friday. Dinner and supper was served and the usual interesting games took place in the afternoon.

Miss Pearl Cannon has returned to her home in Smiths Falls for the long vacation.

Mr. Howard Tackaberry and family enjoyed a pleasant week-end at Charleston Lake.

Miss Jessie Millar, who has been teaching near Toronto, has arrived home for the holidays.

Mr. Andrew Wallace is assisting Mr. Ed. Richards in the cheese factory.

A large number from here attended the strawberry garden party at Addison Friday last.

Mr. Clifford Leacock and bride passed through here on Sunday.

Mr. Lawson, Spencerville, made a business trip on Monday.

Mr. Camel, insurance agent, has returned to Ottawa after a number of successful visits to the young men of this vicinity.

### Public School Promotions

### Newbliss Notes

Mr. and Mrs. Silas Hitchcock and sons John and Itamar, spent Sunday with Mrs. H. Phillips at Frankville.

Mr. Delbert Connell, Mrs. Connell and family, were recent guests of Mr. John Mercier, Smiths Falls.

Miss Pearl Stevens was a week-end visitor of Miss Iva Dunham, Toledo.

Miss Mary Coghlan spent the week end at her home here.

A number of the local members of Lombardy Masonic Lodge attended Masonic service in Smiths Falls on Sunday last.

Mrs. Elgin Lockwood was a recent guest of Mrs. James Wright.

Mr. Leonard Parker has returned home from the hospital, Smiths Falls, and is much improved in health.

### Guideboard Corner's

Early Saturday afternoon we were apprised of the signing of the Peace Treaty by the flying flags run up by our patriotic neighbor, Mr. James Sheldon.

Miss Mabel and Anna Wight spent Thursday afternoon calling on Hard Island friends.

Mrs. Taylor, Mrs. McBratney, Miss Kathleen and her little friend Miss Marjorie Gifford, made a pleasant call at "The Lilacs" Saturday evening.

On Sunday afternoon Mr. and Mrs. Ephraim Robeson spent an hour or two with Mrs. Geo. P. Wight, who is now able to be out in the garden after a short illness.

Miss Dorothea Wight returned home from Brockville Monday afternoon.

Mrs. Morris, in much better health, is again at her home, after a visit with relatives.

SUNDAY SCHOOL LESSON

Lesson I. July 6, 1919. Its Life and Work. Acts 2: 37-47; Thess. 5: 11-15.

Commentary.—1. The church established (Acts 2: 37-41). 37. They.—The multitudes that came together, being attracted by the manifestation of the Holy Spirit as he came in his fullness upon those who were waiting for him at Jerusalem after the ascension of Jesus. Pricked in their heart.—The Holy Spirit had spoken through Peter and his hearers were awakened and deeply convicted. What shall we do.—It was not enough that they felt deeply. There was a call to do something. They felt their guilty and desired relief. 38. Repent.—Turn away utterly from your sins. Be baptized.—In the name of Jesus Christ.—They were directed to declare publicly their faith in him whom they had put to death less than two months previously. For the remission of sins.—Baptism was the external act which signified the internal work of deliverance from sin. Shall receive the gift of the Holy Ghost.—By the gift of the Holy Ghost they became truly one with the sanctified hundred and twenty, and are empowered to do mighty wonders in behalf of Christ, the exalted Lord.—Whedon. 39. The promise.—The promise quoted from the prophet Joel, the promise of the gift of the Holy Ghost. Shall call. God has invited all mankind to come to him. 40. Save yourselves.—Salvation is provided, therefore take the steps necessary to salvation. Untoward—Crooked, perverse. 41. Received his word.—They not only heard the word, but believed and obeyed it.

II. The church maintained (Acts 2: 42-47). 42. Continued steadfastly in the apostles' doctrine.—The thousands who had been converted through the efforts of the church were so thoroughly in sympathy with the gospel that they were glad to continue under the instruction of the apostles. Fellowship.—There is a peculiar fellowship that exists among those who are saved. This is frequently spoken of as the communion of saints. In breaking bread.—There is a difference of opinion among scholars as to what act was indicated by this expression. It is rather commonly believed that it refers to the Lord's supper which was celebrated every day. Some suppose it was the ordinary meals which were partaken of by the multitudes from a common store of food. Others think it was the lovefeast in which the people broke bread with one another in token of their Christian love and fellowship. The first view appears to be the most reasonable of the three. 43. Fear came upon every soul.—The manifestations of the power of God in saving the people astonished those who knew of them, and they ceased to mock and became respectful.

44. All that believed.—All who accepted the gospel message and were converted. Had all things common.—The believers were as one great family. Their joys and sorrows were one, they had common needs, and what they had used according to their several needs. 45. Possessions.—Real estate. Goods.—Personal property. Parted them to all men.—The Holy Spirit was given in his fullness while multitudes were in Jerusalem, many of whom had become converted. It was desirable that the converts should remain long enough to become fully established in grace on instructed in doctrine) that they might carry back to their several communities the gospel message. The spirit of liberality that characterizes true Christians led to the giving out of supplies to all who "had need."

46. Daily.—Religious services were held every day. In the temple.—The temple was the central place of worship and the place to which all hearts naturally turned. The Christians had no opposition to the temple worship, but their experience of salvation enabled them to put new life and power into that worship. Breaking bread at home (R. V.).—The services were not confined to the temple, but in the homes religious services were held, the Lord's supper being celebrated there. Their meat.—"Their food."—R. V. With gladness.—The word has in it the thought of abounding joy. Singleness of heart.—The Christians were of one mind and heart, having the one purpose of spreading the gospel. 47. Praising God.—Praising God is an essential part of the Christian's worship and enjoyment.

III.—The Church's Mission (1 Thess. 5: 11-15). 11. Therefore.—In view of the great fact that salvation has been provided for all who will accept it, and in view of the assurance given of a future life in the presence of God for those who love him, there is true ground for encouragement and hopefulness. edify one another.—"Build each other up."—R. V. 12. beseech.—Earnestly entreat, brethren.—Paul addresses the church in Thessalonians in terms expressive of affection, to know them.—To have a right estimate of their value. This church had been organized by Paul himself, and here is a recognition of such organization. The brethren are exhorted to appreciate those who have the oversight of the church. which labor among you.—The minister of the church was to be helpful to his people as their servant, over you in the Lord.—The pastor has

Wash The Kidneys!

After Bad Colds or Influenza! Look to Kidneys and Bladder!

Owing to bad colds, over-eating, or to the after-effects of influenza—uric acid and toxins are stored up in the body and cause backache, lumbago, rheumatic pains and stiff joints. It is most essential that treatment be directed towards prompt casting out of the poisons from the body which cause these pains and aches. This means that the excretory organs—the bowels, skin and kidneys—should be excited to their best efforts. Every one should clean house—internally—and thus protect one's self from many germ diseases, by taking castor oil or a pleasant laxative such as Dr. Pierce's Pleasant Pellets, which are made of May-apple, aloes and jalap. Take these every other day. This will excite efficient bowel action. If you suffer from backache, irritation of the bladder and the kidneys, shown by the frequent calls to get out of bed at night, considerable sediment in the water, brick-dust deposit, perhaps headache in the morning, you should obtain at the drug store "Anuric" (anturic acid), first put up by Dr. Pierce. To build up the strength and improve the blood, take an iron tonic such as "Ironics," manufactured by Dr. Pierce, to be had in tablets at drug stores, or some good herbal tonic such as Dr. Pierce's Golden Medical Discovery, made from wild roots and barks without alcohol, and put up in tablets or liquid.

a certain amount of authority, given him by the Lord, yet he is not to be officious or arbitrary. admonish you.—He was to instruct, warn and reprove, as occasion might require. 13. esteem them very highly in love.—The overseers of the church were to be given honor, in part because of their work. 14. We exhort you, brethren.—The apostle has just urged the church to be at peace among themselves, but he would not urge peace at the expense of right living. The overseers were to admonish the brethren, but the brethren themselves must co-operate with them in promoting the welfare of the church. warn.—Admonish, unruely.—Disorderly, comfort the feebleminded.—The "feebleminded" here spoken of are not those who are mentally weak, but rather those who are faint-hearted and in need of encouragement, support the weak.—Some might be inclined to discount the weak and thus discourage them, but they are rather to be helped, patient toward all.—There is always need of patience, or long-suffering. 15. none render evil for evil.—The spirit of Christ is to return good for evil.

Questions.—What was the occasion of Peter's address? Give the leading points in the address. What effect did it have? What question did the people ask? What was Peter's reply? How could they save themselves? How many were converted that day? How did they prosper? How did they keep the unity of the Spirit? Who were added to the church?

PRACTICAL SURVEY.

Topic.—The spirit and mission of the Christian church. I. The Christian church. II. Its spirit and mission. I.—The Christian church. The Christian church is the visible organism of the spiritual life. It consists of the body of believers in Christ, associated for Christian worship and work. The term may represent a particular division, holding the same doctrine, practising the same forms of worship and known by a common name, or a local assembly of such a division. In its spiritual sense the church is the invisible and inorganic community of all and only those who by virtue of the mystery of the spiritual birth are Christian in fact as well as name (John 3:5). Christ is its only foundation and object of its faith (1 Cor. 3:11). Its establishment was the purpose of the atonement (Eph. 5: 25-27). The Christian church, communicated, and hence superseded, the "church in the wilderness," to which were committed the "living oracles" which are its solemn trust and priceless inheritance. Its nucleus was the company of Spirit-baptized disciples to whom was fulfilled the Pentecostal promise. The first organization was at Jerusalem where the first gospel triumphs were won. The varied phases of its life and structure are represented in scripture as a growth, a building and an organism. "Ye are God's husbandry" representing the vital energy of truth sincerely received (Matt. 13: 8-23). "Ye are God's building," of which Christ is the "corner stone," the foundation, the unifying force and the depository of treasures (Eph. 2: 20; Col. 2:9). The church is declared also to be the body of Christ is the "head," the crown and source of authority, and true believers are the members of the organism, not organization merely, and "one of another." II.—Its spirit and mission. The spirit of the Master is the spirit of his disciples. Individuals and organizations are Christian only in the measure in which they possess and express the Spirit of Christ (Rom. 8: 9). The vitalizing, animating energy of the "body" is the indwelling Holy Ghost, resident in, and operating through, each member. The spiritual tone of any church is determined by the average experience which obtains among its members. Jesus fixes the permanent standard of both experience and "service." "They are not of the world, even as I am not of the world." "As thou hast sent me, even so have I also sent them." The Christian church is the divinely-ordained custodian of revealed truth. Unto Israel "were committed the oracles of God." It is the solemn responsibility of the church to preserve and disseminate unchanged the sacred truths committed to her trust; and it is her sacred

mission to evangelize the world through their promulgation. The gospel is for everybody and must go everywhere. Vest responsibilities attend the custodians of the general conscience. Departures have always commenced with priestly unfaithfulness (Hos. 4: 6, 8, 9; Mal. 1: 6, 13). The place of the church is in the van of every righteous cause. The less welcome, the more needed. The church is the spiritual dynamo of the world. W. H. C.

The Lucky Horseshoe.

The superstitious use of horseshoes as emblems of good luck originated about the middle of the seventeenth century. They were at first deemed a protection against witches and evil spirits, and were nailed on doors of houses with the curve uppermost. It was the belief that no witch or evil spirit could enter a house thus guarded. The custom of nailing horseshoes to ships and other sailing craft is still in vogue in many English-speaking countries. To find a horseshoe with an odd number of nails attached to it is considered the forerunners of good luck, and the more nails the greater the good fortune that is likely to attend the finder.

What She Was Looking For.

One of the many excellent stories told by Lady Jepson in her "Notes of a Nomad" concerns her godfather. "He came often to our house," writes the authoress, "having an obvious admiration for the pretty young aunt who lived with us. One day he called as usual and I at once climbed on his knees and stared searchingly into his clear, brown eyes. 'What's the matter, child?' said he, 'and what are you looking at?' 'Mamma said to papa,' quote I, 'that you had a wife in your eye and I'm looking to see if I can find her.'

\$5,000 LIMERICK PRIZE

The winning of it can't ease the pain of the corn, but "Putnam's" will ease, cure and prevent corns and warts. Putnam's goes with every bottle of "Putnam's." Use no other, 25c at all dealers.

Points on Choosing a Dairy Sire

What We Look for When Purchasing—How to Increase Milk Production by Judicious Breeding

At the present cost of feeding and caring for cattle, the dairy cow which gives only an average or below average production, is maintained as a distinct loss to her owner. While this is true, it is also a fact that never before in the history of Canada's dairy business did the cow which produced a heavy milk yield return feed and labor high in price it is more than necessary that heavy producing cows are the only class kept. The feed factor is always of great importance. So is the kind of dairying carried on. But possibly no other one thing over which the dairyman has control is quite so important at the present time as is the breed factor, and particularly the influence of the sire. The statement has been made by stockmen that and again, that a good bull is more than half the herd, and a poor one, in the damage he may do, may be nearly all of it. Experimental stations have, by taking common cows and breeding them, generation after generation, to high-class, pure-bred bulls, been able to raise the average milk production of the herd almost more than one would believe.

But we do not have to go to the experimental stations to see results. Dairymen are working out the same thing on their own farms, as the results of the survey carried on by the Farm Management Department of the O.A.C. have shown.

Where the grade sire was used on 140 farms the profit per cow over feed was only \$19. Better results were immediately noticeable where the pure-bred sire had been used, and in those herds where the breeders had been using a pure-bred sire for over 10 years the profit per cow was \$57, or just three times the amount of profit per cow in the herds headed by a grade sire. If the average of the grades was \$19, profit, what would be the results in those herds where real scrubs were used? This is the result under average dairy farm conditions in Oxford County. They are sufficient to condemn the grade or scrub sire as an inexhaustible outlaw in the dairy herd. But the same conditions were found in Eastern Ontario under a similar survey. The Dundas County herds, as will be noted from the table, show double the profit per cow where a pure-bred bull has been used for upwards of ten years as compared with the ordinary grade. In Oxford County the farmer who has been steadily using a pure-bred sire has a total increase over the man who keeps a grade sire of \$45 profit per cow. It is shown in both tables that the feed costs were approximately the same in all cases, and again in Dundas County, the man who has been using the pure-bred sire for some years is getting twice as much profit per cow over feed consumed as is the man who still sticks to grades. Surely this is sufficient evidence to condemn the grade sire to oblivion, and yet one is surprised at the large percentage of grade sires used even in the best dairy districts. All told, 580 dairy farms were visited in the two surveys from which the foregoing tables were compiled, and it will be noted that on 288, or nearly 50 per cent, grade sires are being used. There is room for a vigorous campaign against the grade and scrub sire, cattle, and particularly in the dairy herds. If fifty per cent. of the dairy sires of the country are grades and scrubs,

USE POISON GAS

For Making of Clear Optical Glass.

Eyeglasses and optical lenses of American make are the clearer because the deadly phosgene of the trenches has now been turned into the peaceful pursuit of bleaching the sand used in their manufacture, says an American Chemical society bulletin. The gas offense division of the Chemical Warfare service so greatly reduced the cost of manufacturing phosgene, that it is now available for several industrial purposes to which it could not have been applied before the war. This gas, which is composed of chlorine, oxygen and carbon monoxide, destroys the iron oxide which causes the red and brownish tints of sand. It is so powerful a bleach that it whitened the bricks used in construction work at the Edgewood arsenal, with which it came in contact. In a bulletin issued by the American Chemical society, the details are set forth as embodied in an address made before the Lehigh Valley section of the Geographical laboratory of the Carnegie Institution. The United States has not only a firm grip on the making of phosgene gas with which it was prepared to overwhelm the armies of the Kaiser, but on the manufacture of optical glass as well, which was formerly imported. All the 131 varieties of glass can now be produced in this country with ease. Dr. Day said that up to April, 1917, there was no suggestion of the processes for making the optical glass which the government needed for range finders, gun sights, periscopes and measuring instruments. Fully 2000 pounds a day were required, and Washington was able to turn out only 250 pounds a month of one kind of

glass. Sixteen kinds were required and of these nine were absolutely essential. In the periscope of the submarines 20 different pieces of glass are employed, and all must be highly transparent since the constant splashing of water against the tube reduces visibility. Fully 120,000 pounds per month of American optical glasses are now being made in this country which is more than the instrument makers can grind.

The many difficulties in the lens manufacture, such as avoiding striations, stones and stains have now been overcome as the mixing and dissolving the materials have been perfected. To prevent the glass from crystallizing it has to be rapidly cooled and this often causes strains. Dr. Day said he had seen in Germany a piece of glass as large as a cartwheel which, owing to improper cooling, suddenly exploded and injured workmen in remote parts of the plant. He asserted that in the United States better optical glasses can now be made than was ever manufactured in Europe before the war and that it can be turned out in 24 hours, 12 hours less than overseas. The scientist expresses the fear, however, that despite that remarkable progress, our needs in optical goods would be still supplied from Europe on account of the heavy cost of materials and the high wages on this side of the Atlantic.

How's This?

We offer \$100.00 for any case of catarrh that cannot be cured by HALL'S CATARRH MEDICINE. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System. Sold by druggists for over forty years. Price 75c. Testimonials free. F. J. Cheney & Co., Toledo, Ohio.

An Attractive Sandwich Filling.

Roll the glibets in salted water until tender. Put the glibets and the egg through a meat-grinder. Add seasonings. This filling is very nice on rye bread. Glibets of one chicken. One hard-cooked egg. One tablespoonful cream. One and one-half-teaspoonful salt. Half teaspoonful Worcestershire sauce. One teaspoonful tomato catsup.

Friendship always benefits; love sometimes injures.—Seneca.

WHO IS BLIND?

Will every person who reads this notice, and knows a blind man or woman anywhere in Canada, kindly send the name and address of that blind one to the Canadian National Institute for the Blind, 36 King street east, Toronto. The Institute is conducting work for the blind along the most modern scientific lines and desires that each blind resident of Canada should have the opportunity of availing himself or herself of the benefits represented by this work.

The immense task of registering every case of blindness can only be accomplished successfully by the earnest co-operation of the public generally. That is why we ask you to send the names and addresses of blind people you may know.

The following departments of work are being actively prosecuted by the Institute: Industrial Department for Men; Industrial Department for Women; Department of Home Work; Department of Home Teaching; Department of prevention of Blindness.

Department of After Care. Residence and Vocational Training Centre for Blind Soldiers. To send information or obtain information, address—The General Secretary, Canadian National Institute for the Blind, 36 King St. East, Toronto.

Indian Summer.

Indian summer is the return of genial, but not hot weather after sharp frosts. It is the moment when the floor of the vestibule of winter is left standing ajar for a moment to let the light, and just a little—not too much—of warmth of departing summer stream in. It is a season without a rival—briefer even than the briefest spring tender than the softest summer; is the anodyne of the year's ills—and the promise and pledge of a man's restoration of Eden.—Exchange.

He—Have you ever loved and lost? She—Oh, no; the jury awarded me \$7,000 damages.—Bradley Bugle.

SIR WILLIAM'S WILL

A dull resentment rose against the capricious act of the man who had befriended him. Was befriending him still, a resentment that glowed in Hesketh's pale cheek and flashed in his dark eyes.

THE POLICE FORCE OF THE BODY

DAY and night—without ceasing—a struggle is going on in your body between the germs of disease and the white blood corpuscles—the police force of the human body.

Presently Sir William got up, steadily himself by his chair as he had done in the study, and left the room, returning after a moment or two with the two wills in his hand.

Wash Out Your Pores With Cuticura Soap

And have a clear, sweet, healthy skin with little trouble and trifling expense. Contrast this simple wholesome treatment with those massaging and other fads.

The butler's cries had summoned others besides Hesketh, and a group of servants was crowding round the chair; the men silent, the maids uttering whispering, hysterical moans.

It had been almost a public funeral; his personal friends—Sir William had no relatives besides his son, Wilfred, and his nephew, Hesketh—the tenants, the work-people from the Pit, the tradespeople, made up an immense crowd of mourners.

YOU GET QUALITY, VALUE, AND GOVERNMENT GUARANTEE OF PURITY IN CLARK'S PORK AND BEANS. W. CLARK

sure to suppress all show of the grief which overpowered him. He had over-looked everything, every small detail, and had won the general sympathy.

Wood's Peppermint Cure. The Great English Remedy. Tones and invigorates the whole nervous system, makes new blood in old veins, cures nervous debility, mental and brain worry, depression, nervous prostration, indigestion, loss of memory.

was sitting with bent head and screened face. It was the subtle influence of the battery of eyes that aroused Hesketh.

**CANADIAN NATIONAL RAILWAYS.**

Toronto, June 16, 1919.  
Office of the President

**To All Employees:**

In view of the action of the Federated Trades Schedule Committee ordering a cessation of work by shopmen on the Canadian Railways on Wednesday next, the 18th, it is proper that those identified with railway service should be informed of the circumstances which led up to the present situation.

The Federation of Railway Shopmen in Canada claim to constitute Division No. 4 of the Railway Employees' Dept., American Federation of Labor, Divisions 1, 2 and 3 including the same trades in the United States. It is understood that the membership of the Canadian Division represents about ten per cent of the whole, ninety per cent of the membership being in the United States. The American Divisions applied to the United States Railroad Administration in the latter part of 1918 for certain concessions in respect to rates and working conditions and negotiations have been proceeding since the first of the year, without so far as known, any threat of a cessation of work being made, although a final agreement has not yet been reached.

The Canadian Division presented substantially similar demands about April 1st, and negotiations with the Canadian Railway War Board commenced about the 1st of May. During the ensuing negotiations certain points were tentatively agreed upon, including the establishment of a straight eight-hour day and the Saturday half-holiday for the back shop men. As a result of request for a definite statement on the part of the railways, the War Board on June 9th delivered a letter to the Federated Trades Schedule Committee in which reference was made to the concession of the straight eight-hour day, together with Saturday half-holiday for back-shop men, and other points tentatively agreed upon and suggested that consideration of rates should be deferred until decision was reached in United States, subject to the understanding that rates finally agreed upon would be applicable from May 1st. The Federated Trades Schedule Committee immediately replied rejecting this suggestion, demanding immediate consideration of rates, and threatening cessation of work unless this was done.

In connection with this correspondence, the Board stated its willingness to refer the questions in dispute to either the Canadian Railway Board of Adjustment No. 1, or to a Board of Conciliation under the Lemieux Act, but the committee has declined to accept either of these offers. It is therefore apparent the Committee, for reasons best known to themselves, do not desire to continue negotiations, and has positively closed all efforts towards a peaceful settlement.

In view of the fact that extraordinary large increases were granted to Canadian railway shopmen in 1918, involving the payment of many millions of dollars, the rates established being generally similar to those in the United States, it is obvious that Canadian Railways cannot consistently consider enormous additional increases until the conditions under which competing lines in the United States will operate are known. Your attention is drawn to the fact that practically all other classes of labor on Canadian Railways have accepted the rates established in United States.

The fact that the Railway Companies have offered two different methods of arbitrating the questions in dispute, namely by a Board of Conciliation under the Lemieux Act and the Canadian Railway Board of Adjustment No. 1 (this Board consisting of six labor representatives and six railway representatives) and that both have been refused by the Committee, the Committee also declining to await the decision in the United States notwithstanding the fact that 90 per cent of their members are interested in this award which has been under consideration for some time, seems to establish the Committee's position as being one of refusal to adapt reasonable methods of settlement.

The drastic action contemplated must necessarily injure the interests of all concerned and bring about inconvenience and possible injury to large numbers of innocent persons who have no fears whatever of continuing the situation. The Canadian Railway shopmen, generally, have recognized the principle of collective bargaining for many years, being practically pioneers in this respect, and have an award with Trades Unions, recognizing the right of employees to organize if they so desire. The Canadian Railways have already recognized the 8-hour day for various classes of labor, and at an early date in the present negotiations agreed to extend it to the shopmen. Therefore these two important features, do not constitute a concession, it would appear, but rather a recognition of the fact that the railway companies are willing to meet the demands of the public. In the interests of all classes of railway employees, it is sincerely hoped that a peaceful settlement may prevail.

**ROD AND GUN FOR JUNE.**

The first instalment of "The Bear of Silver Dale," by George Gilbert, the well-known outdoor writer, appears in Rod and Gun for June. This is a thrilling story of adventure along the trap line. Anyone interested in the Timagami Forest Reserve would do well to read the splendid article entitled "A Seven Day Canoe Trip," which tells of the doings of eight red blooded young men in the north country. Robert Page Lincoln, the author of Fishing Notes Department, is the writer of an interesting and instructive article on summer camping. In addition to several other stories and articles the regular departments are included in this splendid number of Canada's premier sportsman's magazine which is now on sale. Rod and Gun is published by W. J. Taylor, Limited, of Woodstock, Ont.

**HAPPY IN POVERTY**

Stern Pride That Is a Part of the Japanese Character.

Educator's Pathetic Story of Mother's Self-Denial and Son's Appreciation—Offer of Aid Most Gracefully Put Aside.

A Japanese educator tells the story of brothers in the agricultural college of Sapporo, in the northern island of Hokkaido. One day one of these boys appeared wearing a woman's yellow and black striped padded coat, with a velvet neckband, showing that the garment was ordinarily worn to support a baby carried Japanese fashion on the back. There was much tittering among the other students at this strange garb and the instructors found their classes somewhat demoralized. At noon the young man was called into the faculty room for an explanation. His father was dead; his mother made a bare subsistence out of a small farm; she had managed to save enough to send her boys to school with clothes for the summer season, and nothing more. When winter came the mother wrote that in vain she had tried to save enough extra money to buy them the necessary winter kimono; that in spite of every economy she had been unable to manage it—such was the story.

"So I am sending you my own kimono and coat," she wrote. "You must have your thin cotton ones washed and mended, though I know they must be nearly worn out by this time. Wear my heavy kimono," the boy went on. "When I can I will send you some money to buy new ones."

"But though I have mended my old kimono," the boy went on, "it is too ragged. There was only one thing to do—wear this one on the outside." He was asked why at least he had not removed the telltale black velvet band.

"Last night," he replied, "I took the scissors and began to rip, but suddenly I remembered how my mother's hands had sewed those stitches, and how she had taken off her warm coat to send me, and how she was always working for us and thinking of us here, lonely for the sight of our faces, and I could not rip out the stitches of my mother's hands. I am sorry, senseless, but I had to wear it as it was."

Those same boys were later invited to live free of expense in a small dormitory donated by an American lady, Gertrude Emerson writes in Asia Magazine. The younger boy came to thank her, but to explain that acceptance would be out of the question.

"My brother is very proud," he said. "Besides, you do not understand. It is true that the paper shutters are torn and that sometimes it is cold, but we like our poor room. It is true that our lamp is small and the light is dim, but we study very well that way. It is for our education that we suffer. We are quite happy."

**Strange Power of Metals.**

The importance of the remarkable surface actions that distinguish metals generally was noted in a lecture by Sir William Tilden at the British scientific products exhibition. The property of platinum of causing the combination of oxygen gas with hydrogen and other combustible substances was discovered by Davy just 100 years ago, but other metals show still stranger powers. One of the most valuable is the power possessed by nickel of causing hydrogen to combine with heated oil, converting it into a fat that is solid when cold. A substance acting by its mere presence in this way is termed a catalyst, and catalytic actions are now turned to account on a large scale in making sulphuric and nitric acids and ammonia, in the surface combustion of gas, in obtaining fats from whale oil and in a variety of manufacturing processes. A great field is open in the study of catalytic effects.

**English-Grown Belladonna.**

Belladonna, which before the war came almost exclusively from Germany, is now being cultivated at Dorking on a scale that will prevent any possibility of dearth in the future, and doctors, who partially discontinued its use, may now prescribe it as freely as they did before the war, says the London Times. The first of the Dorking plantations was started immediately after the war broke out, but the difficulty of obtaining the seed, and more especially the slow growth of the plant, in the initial stages, prevented the drug being produced in large quantities until this year. Next year a still larger quantity will be placed on the market. Practically the whole of the plantations are on waste ground that could not possibly produce food. If the seed is sown in the open it takes four years before sufficient herb can be cut to make a paying crop.

**Value in Skim Milk.**

Skim milk is chiefly casein, and while it is a food rich in protein it was formerly fed to the pigs or thrown away. Chemical research brought out its value in paper making, in making water-soluble paints for interior use and for many other purposes.

Another use for skim milk consists in a patented process of emulsifying coconut oil and skim milk in water and then stabilizing them so that the product has substantially the same food qualities as milk and cream, and it looks and tastes like milk and cream. The skim milk may be shipped dried, and no cow is needed within ten thousand miles.—From "Chemistry in General" by Arthur D. Little.

**First Step of the Divorce Court.**  
"George, dear," began his brand new wife, sweetly. "I thought you prided yourself on keeping your razors in such good condition."  
"I do, angel; why do you mention them?"  
"Well, I tried to open a can of beans and I couldn't do a thing with either one of them."

**Cruel.**

Miss Ainslie—I have a perfect mania for collecting antiques. Just now I am making a collection of pictures of the landmarks of this town.  
Miss Kutting—I noticed you coming from the photographer's this morning.

**Advice.**

"Darling, you must never marry a man for his money."  
"Why not, mother?"  
"Because that sort of a marriage cannot but end unhappily. But I can tell you what to do. You can take care not to fall in love with a man who hasn't money."

**Good Enough for Him.**

"You know, Pat, it is said that a good name is rather to be chosen than great riches."  
"Is that so?"  
"Yes, Pat. Now, which would you prefer to have, a good name or riches?"  
"Well, you can give me the riches. My name's O'Toole, and that's good enough for any man."

**Soothing Sirup.**

They were talking in a foreign but a friendly tongue.  
"Do you know what they are saying?" asked another guest.  
"No," replied the hostess; "I do not understand a word—but is that not the charm of their conversation?"

**EVERYBODY DOES.**

"He's made a failure of everything."  
"That so. Why doesn't he try writing for moving pictures?"

**More Like Bats Than Vines.**  
We call it "weaker sex" no more. To speak of "clinging vines," is folly. Although we see them by the score clinging to car straps in the trolley.

**Rejected.**

Movie Employer (to applicant)—"Ever see a cow?"  
Applicant—"Yes."  
Movie Employer—"I'm afraid you won't do. We want somebody to take the part of a cowboy."—Life.

**Patent Medicine.**

Mary—"She rejected him ten times before she accepted him."  
Emma—"She must have thought he was a medicine and followed directions in shaking well before using."

**Practical Girl.**

He (ecstatically)—"I could die for you."  
She—Goodness! I hope you won't think of such a thing until after we are married and I have the right to inherit.

**Somewhat Scared.**

"I understand that nephew of yours took you for a joy ride."  
"That was no joy ride for me," answered Mr. Chuggins. "That was a fear ride."

**The Exception.**

"He may be grouchy, but he certainly cannot pick flaws in anything which is really well done."  
"Oh, yes, he can. He complains of meat when it is rare."

**So It Seems.**

"A seaman's strike is a very serious one."  
"Naturally, since a vessel cannot start its cruise until its crews start the vessel."

**Exalted Tactics.**

Mrs. Knicker-Henry, I must say—Knicker—My dear, I beg you not to start a discussion until after I have had my first word.

**A First Kiss.**

"I understand you undertook to raise children on your place."  
"They raised themselves. They flew the coop."

**Exceptions.**

"The early bird catches the worm."  
"Not where the enthusiastic angler has been digging for bait."

**BIRD DECEIT.**

**Tactics of Self-Defence They Are Adopt In.**

It has been pointed out that the military tactics which a commander may employ to deceive the enemy are practiced in a limited way by many birds.

There is nothing more interesting in the study of bird life than the efforts to deceive which many species put forth to save their young or nests from the depredator. They flutter just in front of the trespasser to attract his notice, and then they trail off with a "broken" wing dragging on the ground, emitting cries of distress. The bobwhite (commonly called quail) is a most notable tactician in this kind of deception. This bird is physically helpless in the face of danger, possessing no weapons. Its power of swift flight for a short distance is great, but when there are little bobwhites to protect, the mother will not leave them. The nest is always on the ground, and the eggs are thus peculiarly open to the ravages of snakes and other enemies.

There are sometimes a score of eggs, sharply pointed at one end and round at the other, so that space in the nest is economized. The chicks quit their birthplace before they are fairly out of the shell.

They inherit a knowledge of the family vernacular, and each little head about the size of a pea, holds quick perception and resolute will. If danger threatens the brood, the mother bird calls. The young all "go dead" instantly; they drop down wherever they chance to be at the moment. A man or a boy might step

I fell from a building and received what the doctor called a very bad sprained ankle, and told me I must not walk on it for three weeks. I got MINARD'S LINIMENT and in six days I was out to work again. I think it the best Liniment made.

ARCHIE E. LAUNDRY,  
Edmonton.

on them; they are almost invisible among the dry leaves and grass. The mother bird renders herself very conspicuous, fluttering with a "broken wing."

The morning dove is another timid and helpless creature; she also tries the broken wing ruse to divert danger from her nest. The dove acquired the "broken wing habit" of deception while the tribe yet nested on the ground. The habit persists, although rather ludicrous when exercised on the bough of a tree or on the top of a rail fence.

The domestic goose is derived from wild species. The pioneer settlers saw their domestic geese run wild in bushes and almost revert to their primitive state. Now the goose constructs a very pretentious nest on the ground. The eggs are so large and white that they would attract unfriendly notice at a considerable distance. To avoid this dangerous publicity the eggs are carefully covered over when the owners leave them even for a short time.

Minard's Liniment Cures Garget in Cows.

**LURE OF OPIUM**

**And the Way the Cost Piles Up as It Enslaves Its Victim.**

In the American Magazine appears an article entitled "A Modern Opium Eater," written by a former newspaper man, who became a victim of the habit and is now a convict in a penitentiary. The following extract from his articles gives an idea of the amount of money required by an opium eater: "By this time the cost of opium had become a very appreciable and permanent expense. From a few pills at

Where Service is not Sacrificed to Size

THE HOUSE OF PLENTY

**Walker House**

first I increased my allowance day by day until it took thirty or forty fun (a Chinese measure); there are seventy-six fun in an ounce) to give me the mental relief I craved. The physical craving—the body's demand for it—can be satisfied with approximately the same amount each day. The mental craving—the mind's demand—increases daily. What satisfies to-night is too little to-morrow, and so on. To feel even normal I now needed three or four times the half dozen pills which at first had given me such exquisite pleasure. To get the exhilaration, the soothed nerves, the contentment, I craved, I like each of the millions before me, had to use more and more each day.

"Thirty-six fun of opium at retail costs, on an average, \$3. A fifty-cent tip to my 'cook' and a quarter for the privilege of the room in which I smoked made my habit cost me about \$4 a day, which made a ghastly hole in even the good salary I earned. I began to buy my opium by the can, paying \$25 to \$30 for this averaging 460 fun. The elimination of the retailer's profit helped temporarily, but the ever increasing demands of my habit soon overcame the saving."

**BABY'S OWN TABLETS OF GREAT HELP**

Mothers, if your baby or growing child is sickly; if he does not sleep well at night; if he cries a great deal; is constipated and his little bowels and stomach are not working right, give him Baby's Own Tablets—they have proved of great help to thousands of mothers. Concerning the Tablets Mrs. W. H. Decater, Corcoran's Sidings, Ont., says: "I have used Baby's Own Tablets and have found them excellent for the little ones and would not be without them." The Tablets are a mild but thorough laxative and are guaranteed to contain no harmful drug—that is why they always do good and never harm. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**WIT AND HUMOR.**

The Grammar of Experience.—Small Boy—I say, did, what's the future tense of "courting"? Father (sadly)—Caught!—Passing Show.

Speaker (to persistent heckler)—I look upon you as a confounded rascal. Heckler—You may look upon me in any character you choose to assume. As a poet I am not a star, There are others more handsome by far.

But my face—I don't mind it, For I am behind it; The people in front get the jar.

The upholder of Spellmanism was lauding its merits. "Why not take a course in efficiency training?" said he. "I can show you how to earn more money than you are getting. 'I do that now!'" said the Doubting Thomas. "Are you sure you love me?" said a pretty girl to her admirer. "Love you!" echoed the smitten one. "Why, darling, while I was bidding you good-bye on the porch last night your dog bit a piece out of the calf of my leg, and I never noticed it till I got home."

Reggie was practising diligently with his new catapult. Suddenly an old lady touched him on the arm. "Boy," she said, almost tearfully, "that's a thing I could never do—hit a harmless little bird." Reggie sighed. "Blowed if I can either!" he said, sympathetically.

Mother—Just run upstairs, Tommy, and fetch baby's nightgown. Tommy—Don't want to. Oh, well, if you're going to be so unkind to your new little sister, she'll put on her wings and fly back to heaven. Tommy—Then let her put on her wings and fetch her nightgown.

An old man and women were drawing near the twenty-fifth anniversary of their wedding day. "James," said Martha, "it be our silver wedding next Wednesday. We ought to mark the occasion. Shall we kill the pig?" James looked up with surprise. "Kill the pig? What's the good o' murdering a innocent pig for what happened twenty-five years ago?"

**It Works Wonders On Catarrhal Colds**

Simple as A, B, C to Drive Away Colds With "CATARRHOZONE"

When your throat rattles, your lungs and chest are sore, your throat is stuffed with cold—don't fear consumption—use Catarrhozone and get well. It clears the throat, cures hacking, relieves tight chest, and soreness in the bronchial tubes. To clear away Catarrh of the nose nothing could be better. Catarrhozone is nature's own remedy—it heals and soothes—cures every form of throat, lung and bronchial trouble. Prescribed by many specialists and used by thousands every day. Get the dollar outfit; it lasts two months and is guaranteed. Small size, 50c; trial size, 25c; at all dealers.

**OHIVALROUS FEUDS.**

**Queer Features of Vendettas in Two Countries.**

Before one can truly realize the terrible depravity to which human nature can occasionally descend one has to obtain just an inkling into that horror of horrors known by the name "vendetta." The misery the suffering, the fear sometimes engendered by these awful feuds it is impossible to paint in language too denunciatory, observes a writer in London Answers. A gentleman not long returned from South America described the other day the end of a vendetta he once had the misfortune to witness in the Boca (lowest quarter) of Buenos Aires. The antagonists had their knives strapped to their hands so that the weapons could not possibly drop from their fingers, however badly injured

Get a Packet, and Realize what an infusion of Really Pure Fine Tea Tastes like

**"SALADA"**

Black, Green or Mixed Never Sold in Bulk

they became. Before the police had separated them one of the luckless combatants had received no less than 17 wounds. On being examined it was discovered that this individual had a loaded revolver in his belt.

"Whyever did you not use your firearm?" asked the prefect of police. "No; it was a fight with knives," explained the other, with a gasp, and the next moment he sank unconscious to the ground.

In Naples, where warning of a vendetta is most invariably given in private, a member of the Camorra is sometimes called in to settle a dispute, and in this way occasionally what might otherwise have been a brutal feud ends in the chink of glasses at a sumptuous banquet. If a Camorrist meets his death at the hands of a foe it becomes the bounden duty of some other member of the Camorra to avenge it, notice being almost invariably given to the relatives of the deceased that it is absolutely unnecessary for them to take steps in the matter whatever.

In Naples, curiously enough, the sympathy of the people is much more for the murderer in these cases than with the victim, judging that he had had no grievance the former would never have bared his blade; and it is quite surprising how far people are prepared to go in order to protect him from the police.

It is an unwritten law among the hot-blooded races among whom the vendetta still exists that, in an open street fight, no adversary is the refusal on the part of its dying victims to disclose the name of those who have mortally wounded them.

**FIRE IN WATER.**

Fire in the middle of a tank of water instead of under a boiler is a new scheme in making steam for an engine. The idea is to save heat ordinarily wasted, for, with the fire in the middle of the water, every bit of the heat must work to heat the water, as there are no side paths by which it can escape.

Keeping a fire blazing when practically surrounded by water is a problem that has been successfully solved. Gas or oil properly mixed with air feeds the fire. To start the flame tank is first emptied and the vapor fuel forced in through a pipe that ends in a nozzle pointed downward. The vapor is lighted, making a roaring torch flame shooting downward in the tank is partly filled with water until the surface of the water is well above the nozzle, entirely covering the flame. The vapor fuel, of course, must be forced in at some pressure in order to prevent the water from putting the fire out. The water is soon boiling violently, making steam for running the engine. The steam, mixed with gas from the burning fuel, is led into a separate tank, which is a sort of storage bin for the steam.—Saturday Evening Post.

Minard's Liniment Cures Diphtheria.

**ANDREW JACKSON'S FINE.**

How Judge Hall Came to Punish the Doughty General.

When the war of 1812 was over vague rumors of peace drifted into New Orleans, but still Jackson did not feel justified in revoking the martial law, under which he had placed the city. While the city was in this state this peculiar incident started. A man named Louillier was tried, as being a spy and was acquitted. This displeased Jackson, and feeling that in the martial law he had complete command of the city, he, in opposition to the court, retained Louillier in prison and sent Judge Hall out of the city with orders not to return until it was regularly posted that peace had been declared or that the enemy had left the coast.

The following day came the overdue notice officially explaining that peace had been declared and that the treaty had been ratified. Upon hearing this Jackson revoked the martial law and set all his prisoners free. Then preparing to send home the detached militia from Louisiana, Tennessee and Kentucky amid the greetings and de-

monstrations of the populace, Judge Hall returned to the city.

In order to uphold the honor, as it seems of the civil war over the martial government, Judge Hall issued, on March 21st, an order summoning Jackson to court for contempt of a habeas corpus writ and also to state his reason for so doing. The next day Jackson appeared in court in person. He held a written protest against the decision which was to be given.

Hall then imposed a fine of \$1,000, remarking that "the duty was unpleasant, that he could not forget the important service of the defendant to the country, and that in consideration thereof he would not make imprisonment a part of the punishment." The fine was promptly paid amid cheering of the crowd for the popular hero.—Philadelphia Press.

Minard's Liniment Cures Distemper.

**How Savings Grow.**

Ten dollars a month saved and put out at 4 per cent. compound interest will show an accumulation of \$1,475 in ten years; \$750 a month will show \$1,106; \$50 a month will show \$885; \$25 a month will show \$737; \$450 a month will show \$663; \$4 a month will show \$569; \$3 a month will show \$442, and \$250 a month will show \$368.

Any sum saved an invested at 4 per cent. compound interest will more than double itself in 20 years. Save \$10. At the end of the first year you will have \$10.40; in five years you will have \$12.75. At the end of the tenth year your interest will have grown to \$20, and at the end of the twentieth year your interest will be \$10.70, or more than double your original sum. Carried along on the same basis \$100 will become \$207 and \$1,000 will grow to \$2,070.

Save ten cents a day and in ten years your daily savings will be \$365, in addition to \$69.30 compound interest, making a total of \$434.30.

If you save 15 cents a day for ten years with interest compounded at 4 per cent. you will have \$668.18; 20 cents a day will net \$890.95; 50 cents a day will mean \$2,277.73, and \$1 a day will give you a total of \$4,445.74.—Thrift Magazine.

**Cook's Cotton Root Compound.**

A safe, reliable, and purifying medicine. Sold in three degrees of strength—No. 1, \$1; No. 2, 50c; No. 3, 25c per box. Sold by all druggists, or sent prepaid on receipt of price. Free pamphlet. Address: THE COOK MEDICINE CO., TORONTO, ONT. (Formerly Windsor.)

**SUMMER SALADS—CRISP, COOLING.**

There is nothing more delightful—and we state this firmly and with great conviction—for summer weather menus than salad. Of course there are many, many different ways of preparing a salad. Some people prepare it very nicely, others only fair to middlin', while there are a few who prepare it very badly indeed. Crisp lettuce, that's the first essential, a tasty dressing the second; with these two main parts as a foundation one can do wonders as to variety and decoration. Vegetable and fruit salads are particularly popular.

**UNUSUAL FRUIT SALAD.**

A pleasing but different one is made with pineapples, oranges, grapes and red plums. Peel the fruit, chop it fine, sprinkle with sugar. An additional touch is a scattering of blackberries. Serve on lettuce.

Sliced bananas, ice cold, with a sprinkling of maraschino cherries, covered with a syrup of lemon juice, granulated sugar and sherry are good for a salad dish.

**A PEAR TREAT.**

Cooked pears can really be used delightfully. The whole pear is laid stem upward in a dish, then a rich French dressing with no onion is poured over it. A cream cheese, broken up, may be added to this dressing. Also blanched almonds, maraschino cherries, chopped fine, may be scattered around the pear.

**A TOMATO SURPRISE.**

Peel large, firm tomatoes and scoop out centres. Fill with cold corn which has been boiled in the cob, mixed with mayonnaise. Keep on ice until immediately before serving.

**A GARDENER'S DELIGHT.**

For the small gardener, if he has squash and pumpkins, here is a de-

lightful idea: Select small green squashes or pumpkins. Boil quickly in salted water without paring, wipe dry, put on ice to cool. Prepare in the meantime a salad bowl with crisp lettuce leaves, which have been tossed about in oil until thoroughly covered. Add vinegar and salt (one part vinegar to three of oil). Slice squash or pumpkin thinly, place on lettuce leaves and sprinkle with powdered sage.

Specking of salads, it is always well to serve sandwiches, hot crackers or deviled crackers. For the latter cover the tops of crackers with cheese grated, preferably Parmesan, mixed with a teaspoonful of tomato catsup and a little salt and pepper.

Did you ever eat sandwiches made of thinly-cut bread spread with a paste made of tender, crisp celery stalks grated to make two tablespoonfuls and mixed with an equal amount of Neufchatel cheese, one olive chopped fine and a teaspoonful of lemon juice? They certainly are good. As with salads so with sandwiches, a great deal depends upon their appearance. Olives stuffed with cream cheese are an attractive addition to the salad plate. The olives are separated, spirally, from their stones, then small balls of cream cheese are used to fill the cavities.

**NO CURE, NO PAY.**

FREE I want every Man, Woman and Child who is suffering with BRONCHITIS, COUGHS, COLDS, BRONCHIAL ASTHMA, HOARSENESS to test the marvelous HEALING POW-ER OF BUCKLEY'S WHITE BRONCHITIS MIXTURE, by getting a bottle from your Druggist, and use it for five days. If you do not find it the best you have ever used, take it back and get your money. If your Druggist does not sell it, phone Main 34 I'll see you. It takes no substitute, nothing in the world like it, ten times more powerful than any known Cough cure. Backed up by hundreds of testimonials from people right at your door who have been cured, and will only be too pleased to furnish same on application. 50c is the trifling price that stands between your health and happiness. You have everything to gain and nothing to lose. Made only by W. K. Buckley, Chemist, 87 Dundas St. East, Toronto, 15c extra for mailing; 5c bottles mailed free for \$1.75.

**Adhesive Gum Made From Corncobs.**

Corncobs—a great waste product in the world's greatest corn producing nation—have been made to yield adhesive gum and other useful substances in quantities sufficient to convince chemists of the United States Department of Agriculture that the nucleus of a profitable and important industry lies in this direction.

In addition to adhesive gum, experiments have produced cellulose and glucose, both of which have many commercial uses. The glucose so produced crystallizes well, and it is believed can be used in the same ways as crystalline glucose from starch. Manufacture of alcohol by the fermentation of corncob glucose appears practicable if sulphuric acid is obtainable cheaply.

To utilize corncobs commercially, the chemists believe, a large and costly plant would be necessary.

**Books Made by Slaves.**

Some publishers in ancient Rome could turn out books rapidly and cheaply. A publisher of the Augustan era produced 1,000 copies of the second book of Martial in ten hours, and these, sold at about 12 cents apiece, gave him a profit of 100 per cent. This was done by employing slaves carefully trained to write swiftly and legibly. Working in batches of 100, with an overseer directing the book in hand, the task was completed in a very short time. As soon as the copies were written they were revised, corrected, rolled up and bound. Being slaves, the men required only maintenance from their master, and thus he could afford to sell their productions at a very low rate.

**If Your Food Ferments or Disagrees Just Read This!**

Thousands of broken-down despondent dyspeptics have recently been given back their health. These happy people don't proclaim it was a miracle that endowed them with a new lease of life—it was simply their common sense in selecting a tried and proven medicine, one specially adapted to their particular ailment.

All these splendid cures were effected by Dr. Hamilton's Pills which beyond all question have a strange power to restore a weak or ailing stomach.

If your stomach is tired and over-worked try Dr. Hamilton's Pills, and note the prompt improvement. Pain before or after eating will disappear. You'll get a real vigorous appetite and digest what you eat. Lots of well digested food is bound to increase your strength to make you brighter and more ambitious.

In a week you'll feel like a different person, in a month you'll be permanently restored.

For folks who are out of sorts, not feeling just up to the scratch, perhaps bothered with headaches or constipation, to them Dr. Hamilton's Pills will prove a boon.

**FIVE KINDS OF ICE**

And How the Scientists Produce Them.

There are, it appears, no fewer than five distinct kinds of ice. First there is the ordinary ice, which is water frozen at ordinary atmospheric pressure. This is called Ice I. It is from 10 to 13.5 per cent. less dense than water.

If this is placed under a pressure of about 1,000 kilograms the ice melts to water. If the pressure is increased to about 4,400 kilograms the liquid water freezes again to another kind of ice called Ice V., which is about 6 per cent. denser than water. Increasing the pressure to about 6,500 kilograms we get Ice IV., the

**HELP WANTED—FEMALE.**

**GIRLS AND WOMEN AS WEAVERS.** Winders, etc. Apprentices paid while learning, and every assistance given in teaching beginners this work. Only short experience required to develop efficient workers. volumic pressure and the density becoming from 5 to 9 per cent. greater than water.

If we freeze water at atmospheric pressure, but with a temperature of —30 degrees C., ordinary ice (Ice I) is changed into Ice III, which is on the average 3 per cent. denser than water and 20 per cent. denser than Ice I. Further increasing the pressure, Ice III turns into Ice II, which is about 22 per cent. denser than Ice I. On further increasing the pressure Ice II changes to Ice V and then to Ice IV.

Sometimes these changes take place so quickly that a click is heard. The lower the temperature the more slowly is the change effected.

This discovery has a practical application. When water freezes in a closed vessel immense pressure is developed. The bursting of boilers and water pipes is a familiar example of this. The water expands in freezing to Ice II, but if the pressure on the ice during freezing exceeds about 2,000 kilograms, corresponding to 30,000 pounds per square inch, Ice III is formed. This is about 3 per cent. denser than water and has less volume, it shrinks rather than expands.

Minard's Liniment Cures Colds, Etc.

**The Sun and the Weather.**

Neither astronomers nor meteorologists are likely to take seriously the prediction of a French scientist that the recent renewal of sun spot activity will result in a long period of dry weather covering seventeen years. "The direct consequence of our dependence on the sun," he says, "is that seventeen years of dryness are followed by as many wet years." Many attempts have been made to discover any association between sun spot cycles and weather cycles, but as yet without success. There are three fairly well defined sun spot cycles, embracing four, eleven and thirty-three years, but no similar weather periods are known. During the last seventy years the Greenwich records of sun spots and rainfall show no relation, there being no correspondence between the two phenomena.—Westminster Gazette.

Some people never stop to think, and wouldn't think if they did.

HUN IS HUNNISH TO THE VERY END

Characteristic Note in Announcing Submission.

Again Prates of Honor of Germany.

Weimar Cable - The National Assembly this afternoon voted to sign the peace terms unconditionally...

DREAD CONSEQUENCE.

Paris Cable - In announcing its intentions to accept and sign the peace treaty terms, the Government of the German Republic has sent the following note to M. Clemenceau...

"The Minister of Foreign Affairs has instructed me to communicate to Your Excellency the following:

"It appears to the Government of the German Republic in consternation at the last communication of the allied and associated Governments, that these Governments have decided to wrest from Germany by force acceptance of the peace conditions...

"No act of violence can touch the honor of the German people. The German people, after frightful suffering in these last years, have no means of defending themselves by external action.

"Yielding to superior force, and without renouncing in the meantime its own view of the unheard-of injustice of the peace conditions, the Government of the German Republic declares that it is ready to accept and sign the peace conditions imposed.

"Pledge accepted, Mr. President, assurances of my high consideration, (Signed) 'Von Haniel.'

Dust Causes Asthma. Even a little speck too small to see will lead to agonies which no words can describe. The walls of the breathing tubes contract and it seems as if the very life must pass. From this condition Dr. J. D. Keillogg's Asthma Remedy brings the user to perfect rest and health.

WAGE WAR ON PROFITEERS

New Italian Premier Speaks to People

And Threatens Severe Punishment.

Rome Cable - Francesco Nitti, the new Premier, has addressed a circular to all the prefects in the kingdom in which he says that Italy's sacred claims cannot be effaced by set forth by the Governments unless the Government is supported by the united strength of the country.

The Premier threatens severe punishment to whosoever contributes to augment the dearth in the cost of living and promises a speedy abolition of all new restrictions.

The new Cabinet has been chosen to succeed the one headed by Vittorio Orlando, which resigned last week. The new Cabinet consists of the following: Premier and Minister of Interior, Francesco Nitti; Foreign Office, Tommaso Tittoni; Foreign Office, Tommaso Tittoni; Colonies, Luigi Rossi; Justice and Worship, Signor Mortara; War, Lieut.-General Albricci; Finance, Francesco Tedesco; Treasury, Signor Schanzer; Marine and Interim, Rear-Admiral Sochi; Instruction, Alfredo Baccelli; Public Works, Signor Pontano; Transport, Signor Devito; Agriculture, Signor Viscochi; Industry, Commerce, Labor and Food, Carlo Ferrari; Posts, Signor Chizzetti; Military Assistance and Pensions, Signor Dacomo; Liberated Provinces, Signor de Nava.

COSTLY PAINTINGS. Famous Pictures Bring Big Prices at Christie's.

London cable - Three Remonys were sold at Christie's Saturday for 18,800 guineas. The highest price was paid for 'The Warren Family.' The child in the picture, Elizabeth Harriet Warren, afterwards became Viscountess Bury. The canvas, 35 inches by 72 inches, was bought by Albert Amor for 6,000 guineas. Two Remonys by Mrs. L. L. Remondy, painted when that lady was 16, were bought by Knoedler for 6,000 and 1,200 guineas, respectively. Other Remonys, portraits of the Hon. Charles Francis Greville, and Charles, 3rd Duke of Richmond, were bought by Agnew for 1,300 and 800 guineas, respectively. Other prizes were Sponner's portrait of Georgeina, Lady Vernon, 2,600 guineas; Raeburn's portrait of Sir Walter Scott, 1,450; Reynolds's portrait of Dr. Samuel Johnson, 800; Gainsborough's portrait of Dr. Hayland, 600; Sir Peter Daly's portrait of Ann Duchess of York, 85.

An Oil for All Men - The sailor, the carpenter, the fisherman, the lumberman, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Electric Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it has no equal. Therefore, it should have a place in all home medicines and those taken on a journey.

DEFENDS CANUCKS.

Conan Doyle's Views On Recent Outbreaks.

London Cable says - Sir Conan Doyle, writing to the Times on the Epsom outbreak, suggests that the docks strike is the only reason Canadians are disappointed in transport, a call should be made for volunteers from among them to take the places of the dockers. He, however, questions whether some blame does not lie with want of tact or want of hospitality, and says that having had a whole Canadian division encamped for a year close by his home at Crowborough and many officers under his own roof, he can testify that no men could have behaved better.

The Sunday Times also suggests encampment of troops near debarkation ports so that they could see for themselves what barriers detain them. A Canadian soldier's letter to the Times appeals to the people not to take responsibility for the whole Canadian force for the dastardly acts of a few, whose conduct and character are as much condemned among all ranks of Canadians as among the British public.

Miller's Worm Powders act mildly and without injury to the child, and there can be no doubt of their ready effect upon worms. They have been in successful use for a long time and are recognized as a leading preparation for the purpose. They have proved their power in numberless cases and have given relief to thousands of children, who, but for the good offices of this superior compound, would have continued weak and enfeebled.

Best Foods for Children.

What are the best foods for my children?

This question is perplexing more than one family, and to be able to answer it the workers in foods at the New York State College of Agriculture have been giving it much thought.

For children from 4 to 8 years of age it is suggested that four meals are desirable. For breakfast stewed fruit, cereal, with whole milk or thin cream, or bread and milk, and when possible an egg may be served. For a mid-morning meal, milk with a thin slice of bread and butter, is adequate.

The dinner may consist of a lightly-cooked egg, spinach or peas or string beans, mashed baked potatoes or boiled rice and stewed fruit.

A well-cooked cereal with thin cream, milk to drink, and stewed fruit, make an acceptable supper. A lightly-cooked egg, bread and butter, milk to drink and a baked apple are likewise desirable for the evening meal.

Fried eggs are not suitable for children.

WOULD WORK WITH MEN, TOO.

The boss was giving instructions to a new clerk. "Now if you can't wait on a lady immediately, give her something to interest her. 'Eh?'" "Ask her to examine one of our new hand mirrors." - Louisville Courier-Journal.

THE SHREWD TRAVELER.

"Change at Bristol," said the booking clerk to West Country dame who was taking a ticket from a way-side station to London. "None of them tricks, my lad," declared the old lady. "I want my change here, before I gets into that there train!" - London Tit-Bits.

SUMMER CARE OF VEGETABLES

(Experimental Farms Note.)

Root crops, such as beet, carrot and parsnip, should be carefully weeded and thinned while the plants are still small. Parsnips should be thinned to about four inches apart; Swede turnips six to eight inches. Carrots may be thinned to one inch apart and when large enough to use, alternate roots pulled, leaving the remainder about two inches apart. Garden beets may be similarly handled, but the final distance in this case should be about four inches. As beet tops make very delicious early green vegetable, thinning should be done so that these tops may grow to a suitable size. The soil should be kept cultivated and never allowed to bake or harden. This is particularly true with peas and beans if a tender, succulent crop is desired. Beans, however, should not be cultivated with moist with either rain or dew, as the plants if injured under these conditions, are particularly subject to bean rust, the spores of this disease developing in the injured tissues.

Corn that has been sown in hills should be thinned to three or four plants to a hill, if the hills are two to two and a half feet apart. Cabbage and cauliflower plants require eighteen to twenty inches of space to each plant in the row, and the rows should be two and a half feet apart. The soil should be kept well hoed and the moisture and encourage rapid growth. Where space is limited, tomatoes may be grown in rows three feet apart and the plants eighteen inches apart in the rows tied up to stakes. Corn, tomatoes, cucumbers, squash, pumpkins and melons all grow best on a light, warm soil. Five or six cucumber plants may be grown in a hill, the hills spaced about three feet apart; squash and pumpkin three or four plants in a hill and the hills six to eight feet apart. Where the soil is rich and warm, and space limited, hills of cucumber, squash and pumpkin may be planted between alternate rows of corn.

Potatoes should be thoroughly cultivated to conserve all possible moisture; "riding up" also applies to the tubers with loose soil in which to develop. However, in areas where there is a light summer rainfall, level cultivation will conserve the limited soil moisture more satisfactorily. Spraying should not be delayed until there are signs of injury from the well-known potato beetle, or from one or more of the many potato diseases. Paris green and arsenate of lead have been found very satisfactory at the rate of one ounce of Paris green to four gallons of water, adding an ounce of lime to neutralize any free arsenic present. Arsenate of lead adheres better to the foliage than Paris green and may be applied at the rate of one ounce to a gallon of water, if the water form is used or one ounce to two gallons if the powdered form is employed. Bordeaux mixture may be done up in small quantities in the following manner, employing wooden pails for mixing the spray. In each gallon of water dissolve two ounces of copper sulphate (blue stone) slack one pound and a half quick lime (un-slacked lime) in one gallon water, stir thoroughly and then add one pint of the lime water for each gallon containing the two ounces of dissolved blue stone.

LITTLE CHANGE IN CROP OUTLOOK

Haying is Now Well Under Way.

Toronto Report - Little change has occurred in the crop situation throughout the Province during the last few weeks. Haying is well under way, with ideal weather conditions. Fall grains are reported in good shape, but more rain is required to save the spring grains from a yield far below the average. Corn on well drained or light land has made a splendid start, but it is too early to make a definite statement regarding prospects. Roots, potatoes and tomatoes are showing effects of the dry weather in some parts of the Province.

Western Ontario, as a whole, seems more in need of rain than the eastern counties. While some localities reported heavy showers last week, the majority of the farming land was not visited. In Elgin county wheat fields just coming in head are in grave danger unless more rain comes. Spring grains are late and are not making a promising start. Hay and clover is reported as excellent in most sections, though in heavier land fields are patchy.

Early cherries are ripe in some localities. The crop will be a light one. Late varieties will give a fair to a good crop. Peas promise well and have apparently recovered from the injuries reported a year ago.

Strawberries are ripening much too fast to give a good yield. More rain is required. Raspberries look promising. Gooseberries will be a good crop. Peach orchards are reported to be in rather bad shape. Trees are yellowing and sickly-looking.

BELGIUM FIRST

To Get German Indemnity - Wipe Out Her Debt.

Paris Cable - The Council to-day signed a document giving formal approval to priority for Belgium in reparations to be paid by Germany, to the amount of 2,500,000,000 francs. The Council also confirmed the plan to wipe out the Belgian war debt through the subrogation of German bonds for the Belgian obligations, the four great powers to take over the German bonds, subject to the approval of their respective legislative bodies. The bonds the powers propose to take over are of a special issue which the peace terms require Germany to make, to reimburse Belgium for all the sums she was obliged to borrow in consequence of the violation of the treaty of 1839.

A thorn in the flesh is worth two in the stocking.

MILITARISTS STILL BUSY

Prussian Army Chiefs May Cause Trouble.

For Rulers Agreeing to Sign Treaty.

Berlin, Tuesday, Cable - Long accounts, written for the Berlin papers by correspondents at Weimar, telling of events preceding the decision of the German Government to sign the treaty of peace, show that there was a threat by generals and officers of the volunteer troops to quit if the treaty was signed without reservations. Gustav Noeke, Minister of Defense, proffered his resignation, but later succeeded in appeasing the officers. He then withdrew his resignation, under pressure from his party and Cabinet Ministers.

Peeling among military leaders is still running high, notwithstanding the fact that they are admonishing the troops to continue in the service. Major-General Baron von Luettwitz, in a special call, reiterates his opposition to the peace terms, while Major von Gilsa, Herr Noske's adjutant, has announced that Prussian War Minister Reinhardt "will endeavor to defend the menaced honor of the army and its leaders by the adoption of special measures."

He will confer with Herr Noske to-day. Correspondents at Weimar are unanimous in the belief that the prestige of Matthias Erzberger has been damaged because of his mysterious, but emphatic, assurances that the entente would be willing to yield on the honor issue, which failed to materialize. Herr Erzberger's position is a subject of much speculation, and it is believed that as soon as the peace crisis is passed he faces a rather trying period.

Whether the corn be of old or new growth, it must yield to Holloway's Corn Cure, the simplest and best cure offered to the public.

FLOOD RIOTS IN BERLIN.

Berlin, Cable - Police and soldiers, who intervened in food riots in the northern suburbs of Berlin to-day exchanged shots with mobs of men and women but there were no casualties. A number of shops were plundered. Reports from Mannheim say that eleven were killed and thirty-seven wounded in the rioting there Sunday. Two hundred persons were arrested.

INHABITANTS ALL REMOVED.

Ferne, Despatch - After fighting for 24 hours forest fires which threatened to sweep the town, the inhabitants of Natal, B.C., were removed from the town in a special train early Sunday morning, while a volunteer fire corps under Chief MacDonnell extinguished blaze after blaze within the town itself until the fire in the immediate vicinity had spent itself. Forest fires are reported from many districts near here, and some ranching property is threatened.

SLAYER TO DIE.

Bank Robber is Convicted at New York.

New York Wire - Gordon Fawcett Hambly, alias Jay B. Allen, self-confessed slayer of two employees of the East Brooklyn Savings Bank, in a hold-up last December, was convicted of murder in the first degree to-day by a jury in the Brooklyn Supreme Court following a trial lasting but two days.

Death by electrocution is the arbitrary penalty for first degree murder in New York State. The jury was out less than one hour. Immediately after the verdict Hambly was remanded to jail for sentence next Thursday.

Extraordinary precautions have been taken by the jail officials to prevent the convicted man from escaping. On several occasions he has openly declared he would rather be shot by his guards while escaping than suffer the disgrace of being electrocuted.

Hambly during the trial offered no defence in his own behalf. He even went so far as to request his lawyer not to cross-examine witnesses, object to questions or make any summing-up speech and his wishes were obeyed.

Bullet Proof.

Recent accounts have told of tests made of a type of body armor invented by a New Jersey doctor.

The doctor donned his armor and proceeded to let army officers fire a machine gun at him at close range. The proof that the bullets were properly shed lies in the fact that the doctor is alive and unharmed, although the little leaden pellets went straight for the middle of his chest.

The only apparent fault of the armor is that it weighs close to 60 pounds. It was V-shaped, covering the front of the head and body. Pneumatic cushions at points eliminated much of the shock from the impact of the bullets, and the doctor in the tests, though staggered, was able to keep his balance.

Insulted the Horse.

As an illustration of the veneration with which the Argyll family was regarded in Roseneath parish years ago, Principal Storey, then minister of the parish, used to realize that one of his parishioners in detailing to the duke's factor some grievances he had sustained from a neighbor added, "And, man, that, he had the impudence to strike me in the presence of his grace's horse." - Westminster Gazette.

Kiddie Klothes.

Unbleached muslin frocks. Patchwork motifs applied on fabrics. Lace and net aprons imported direct from Paris. Picture an apron of pale blue taffeta with kimono sleeves! Black stitching on pastel colors quite the smartest of juvenile touches.

HUN OFFICERS BRUTES TO END

Shot Down Sailors On Sinking Fleet

Who Tried to Obey British Commands.

Thurso, Scotland Cable - German sailors were shot by their own officers when they attempted to obey the commands of the British officers to return to their ships and shut the seacocks. This statement was made by Lieut. Nuttall, of the steamer Alouette, which has reached here to-day from Scapa Flow, where the German ships were sunk. "I pulled alongside a German destroyer when I saw the ship begin to settle," said Lieut. Nuttall, "and ordered the Germans back to close the seacocks. Four or five of them turned back, whereupon the German officers shot three of them dead."

"We then opened fire on the officers and several of them dropped. "Others among the Germans then returned and closed the seacocks. The Germans were also driven back to four or five other destroyers; they closed the seacocks in time to keep the vessels afloat."

Lieut. Nuttall reports that the Emden has been pumped out and is now afloat. The Baden's crew were forced back to that vessel and compelled to shut the seacocks.

"Directly the first red flag and German ensign were hoisted on the first battleship the German admiral put off in a motor boat post haste to the British air station ashore. He stated that the ships were sinking and requested assistance for the crews. The admiral was arrested. Naval men believe that the trip was a ruse to lead to the belief that the crews were taking charge of the ships. This, however, was not substantiated by what actually happened."

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

NECESSARY TO FIX WHEAT PRICE

Says Expert Before Cost of Living Probe.

Alternative is Gov't. Handling of Crop.

Ottawa Report - During the course of his examination before the cost of living committee this afternoon, Mr. W. A. Black, vice-president of the Ogilvie Milling Company, was asked to express an opinion in regard to the fixing of a price on wheat. In reply Mr. Black referred to the situation in the United States, where farmers will receive a price of \$2.3 per bushel guaranteed by the Government. He was inclined to think that unless something were done there would be a considerable slump in the price of wheat. He expressed the view that the wheat trade and the banks will be afraid to purchase in large quantities, because of the possibility of incurring loss. On the other hand, he said, if a price were fixed in Canada, over at a lower figure than in the United States, wheat could be purchased with confidence.

Mr. Black suggested another method of dealing with the situation. He said the farmer might be paid, say \$1.25 per bushel by the Government, which would handle the crop. At the end of the season the farmer could be given any additional profit which might occur to him as the result of the sale of his wheat.

Silken Tips.

Printed satins good. Polka dotted silks for next spring. Printed charmeuse is coming late fashion. Dresden and Pompadour silks for summer. Radium and chiffon taffetas for present wear. Heavy silks for fall - the kind that 'stand alone.'

Saves Space.

If you have not a kitchen closet to hang cooking utensils in, get a large box, place it in the corner nearest your stove, paper it inside and drive nails in the sides, on which to hang different articles. Have curtains for the front and cover top with oilcloth, which will also give you a handy kitchen table at a very small expense.

They Cleanse While They Cure - The vegetable compounds of which Parmelee's Vegetable Pills are composed, mainly dandelion and mandrake, clear the stomach and intestines of deleterious matter and restore the deranged organs to healthful action. Hence they are the best remedy for indigestion available to-day. A trial of them will establish the truth of this assertion and do more to convince the ailing than anything can be written of these pills.

BLINDED FOR A DAY.

Moncton, N.B. Despatch - During a very heavy electrical and rain storm at Shediac, Saturday afternoon, the size of marbles fell, and some damage was done by lightning. Willie Gagner, a six-year-old boy, while standing in the doorway at his home in Shediac Town, was struck by lightning and the shoes torn from his feet. The lad was rendered unconscious for two hours, and when restored was totally blind. To-day, however, young Gagner recovered his sight. Buildings were struck in different parts of the surrounding country.

Through the Canadian Alps

Between Banff, the popular summer resort in the Canadian Pacific Rockies and Lake Windermere, the head waters of the great Columbia River, lies an Alpine ridge of spectacular beauty, forming part of the Great Divide. This ridge is penetrated by two comparatively easy passes, the Simpson, and the Vermilion which lead into the Valley of the Kootenay River, a region abounding in game on account of its being well south of the main line of the Canadian Pacific Railway. Between the Kootenay River and the Columbia River is a small range of mountains through which the Sinclair Pass and Canyon provide an easy road. When the first surveys were made for an automobile road between Banff and Windermere it was planned to use the Simpson Pass, named after Sir George Simpson, Governor of the Hudson's Bay Company, who made this crossing in 1841. But the route over the Vermilion was found to be easier and at the same time more beautiful, and construction of the Highway of the Great Divide was commenced from opposite Castle Mountain in this direction. At the same time the road from Windermere through the Sinclair Canyon was also commenced and at the time of the outbreak of war a gap of only thirty miles separated the two roads. War put an end to construction, and a great washout destroyed several miles of the western end, so that the project seemed to have been abandoned. Now, however, the Dominion Government has made an arrangement with the British Columbia Government by which the route of the road comes under the jurisdiction of the Dominion Parks, and a substantial appropriation has been allotted to finish the work. In this way there is every prospect of the early completion of what will be the most wonderful automobile road

(1) Hunters Camp, Kootenay River. (2) The Red-Gate Highway of the Great Divide.

## WAR DECLARED On the Potato Bug

Paris Green, Gov't Standard, per lb. 75c  
Arsenate Lead Dry, use 1 lb. to 20 gallons of water — 1-2 lb. cans 35c; 1 lb. cans 60c.  
Arsenate Lead Paste, use 1 lb. to 10 gallons of water — 1 lb. cans 50c; 2 lb. cans 90c.  
Department of Agriculture advise: 1 lb. Paris Green, 1 lb. Dry Arsenate Lead, 40 gallons Bordeaux Mixture.

## Plans for Peace

By JANE OSBORN

(Copyright, 1918, by McClure Newspaper Syndicate.)

Some of the more leisurely or indolent of the boarders at Miss King's always lingered in the wicker chairs of the sun parlor after breakfast, but this morning there were more loiterers than usual, and they were talking in accents that showed keen interest. And that interest had been aroused by headlines in the morning papers that indicated that the end of the world war, if not in sight, was at least something that one dared dream about.

"I suppose Miss King will have to come down on her board," a little weazen-faced old lady, noted for her miserliness, was saying.

"Well, there's no use my saving any more pils, I suppose," sighed another; and a third, "At least, they won't have any excuse for sweetening the cranberry sauce with molasses. I didn't like to object before. It didn't seem loyal, but now I certainly—"

Doris May, who had lingered on her way to her volunteer work at Red Cross, but who nevertheless was turning her time to account with sock knitting, had at this point emitted a little stifled scream that cut short the last remark and focused the eyes of the lingerers on her.

Doris, twenty-four, and sweet of face and the youngest member by far of the King establishment, blushed with embarrassment. She had not expected to attract attention and she did not really want to explain.

"I was just thinking," she explained, however. "It suddenly occurred to me that when the war was over there would be no more socks to knit and no more canteens to work for nor conservation kitchens to help with nor liberty bread to bake—and, well, I was beginning to feel sorry and that made me scream, I guess. It seemed so wicked to have anything but the happiest feelings that it is all over. I truly shall miss the knitting—"

"Well, I am sure I shan't," snapped one of the sour-visaged members of the establishment who had, during the course of the war, managed to knit two whole pairs of socks and a sweater. "I'm quite exhausted, I assure you, and nothing but a winter in Florida will undo the damage all this knitting has done my nerves."

"Anyway, you needn't stop knitting," another one of the company was saying. "Soldiers aren't the only people who wear socks. I had a cook once—an awful creature she was, too—and her husband was a teamster and he wore knit socks. I know, because she used to knit the socks in the kitchen during time that I was paying her to work for me."

"But I don't know any teamsters," laughed Doris. "Really I didn't mean to say I was sorry, because I am not. I am so happy to think that it really is going to end some time, only it will seem stupid going back to the bridge parties and teas and things that we used to spend so much time on before the war."

Doris went about her work at Red Cross that day and at canteen that afternoon with less than usual of her natural cheerfulness. She was vexed with herself to think that she could have any selfish regrets—when she knew that in her heart she felt only the deepest of joy at the news of possible peace.

That evening Capt. Robert Bicknell came in to the boarding house from the encampment five miles away where since his return from France he had been acting as instructor. He was seized by the coterie of those who lingered in the drawing room after dinner.

Somehow it seemed as if his opinion concerning the outcome of peace talk would be of more weight since he had come fresh from a military encampment. As a matter of fact the fact that he had come from the encampment made him especially reticent about discussing it—that is, before the group of Miss King's boarders in the drawing room.

It was to escape this assemblage that he begged Doris to take a stroll down the small town street with him. "But people notice so," protested Doris. "You know how those women babble, and it was only two nights ago that you were here before."

"Yes," agreed the captain, "but perhaps there won't be many more nights, I'm not going to annoy you asking you the old question. I guess you made yourself about as clear to me as any girl could. I know you're not the kind of girl that will accept a man just because he keeps at her, and I'm not the kind of man that would want a woman to marry him just because he did nag her. But I may be leaving camp soon, and I just have to talk things over with you. You told me you would be interested in me always, and I value your advice. I may be taking a leap in the dark, but I have been thinking things over and I know now that I can't go on the way things were before the war."

"Then I was content to be cashier here in the bank. Honestly, do you know, Doris, when I first saw the paper this morning and realized that peace was coming perhaps before I got back to France, of course my first thought was one of the greatest joy—and then I had the selfish feeling of regret."

"I seemed to see myself in the bank again, spending my days in the dull monotony here in this town. I didn't

find it dull then, but since I've been leading the life of a soldier I see things differently."

"Of course I'd be glad to stick around years—ten years, the rest of my life—if I thought in that way I could win you eventually. But I know you have made up your mind. Well, I was making plans; and I was thinking that as soon as war is over I'll sell out what interest I have in property here and make for the West. I spent a little time on a sheep ranch in Wyoming once, and I know a fellow out there that could help me buy in to advantage. So I'm going to make for the wilds as soon as ever peace comes, whether it is next week or next year. I wanted to tell you—and ask if you thought I wasn't right."

"I hope you don't think I was a brute for feeling that spirit of regret," he asked penitently. "I can't understand it exactly, but until I thought of this western scheme I was as blue as indigo. After all, in spite of the hell we have to go through, it appeals to some of us more than we realize. I want to go on fighting—and there is more chance to fight in the life out there than there is here."

Doris had listened intently, and her breathing, fast and irregular, betrayed the intense interest she was taking in her companion's disjointed explanations.

"Would you need—need to wear woolen socks?" she asked.

"Woolen socks? Why, of course. Catch me ever going back to those silk things with thin shoes after I've known what it is to dress like a regular man."

"And out there—I suppose you'd live in a little cabin at first and you'd have to have your baking done right there and a lot of canning and everything and there would be lots of work to do for some one."

"Well, there's that, of course," and the captain's face registered a slight look of unhappiness. "Perhaps I could get some old couple to do the work for me—it wouldn't be like having a home, but perhaps I could get used to it."

"There would be all sorts of work for the—the woman you married, wouldn't there?" faltered Doris.

"Don't worry," and the captain did not conceal the fact of his annoyance at this question. "I have no idea of asking any woman to share that life with me—you are kind to show concern for my possible wife. I assure you, but it isn't at all necessary."

"But Robert—well, you see I was thinking this very morning that, although I was so happy that the war is going to be over, yet I'd be so miserable when I didn't have to make socks and work hard and can fruit and things. I have really been happy doing what I have done—and, if you'd forgive me for changing my mind—and if you really haven't made any other arrangements, well—I know now that I've always really loved you."

## FULL OF FANCIFUL FICTION

Father and Filial Florence Furnish Flourishes in What Might Have Been Ordinary Talk.

"Feasible fears from flaming, furious fires foil Fourth's frolicsome fun," fretted Florence feelingly.

"Faugh!" fumed father ferociously. "Frail, foolish female, forget former folly-filled Fourth's. Future Fourth's free from fuse-formed flames, flocking fires. Fact, fond Florence!"

"Father!" faltered filial Florence. "Fourth free from fire? Fudge! Fore-fathers fought for freedom! Forever freemen float fugacious flags, fire fuses, flail flippant fives, flourish frequent firecrackers."

"Fossil fancies, Florence, flea-bitter fragments from forty fables. Fore-fathers forbade futile fuss."

"Fourth free from fracons!" Florence's fingers fondled flannel frock's front flounce. "Furnish further formula, father."

"Frugal, friendly farmers furnish fattening food for famished fighting French. Freedom's fame forbids foolish firecracker Fourth."

"Fine!" Florence frisked, fraternal feelings fast forming. "Father, furnish funds for fainting, fatigued, feeble French fugitives."

"Freedom first, freedom forever!" faunted father. Finis.—Youth's Companion.

## No Social Barriers in Turkey.

To those unfamiliar with Turkish customs it may seem strange that Talaak Pasha, who has just resigned the highest dignity in the Ottoman empire, should have been earning his living only a few years ago as an obscure telegraph clerk. Yet such big jumps are perhaps easier in Turkey than in any other country. For although the Ottoman Turks often show the utmost contempt for the numerous subject races that help to make up the Turkish empire, they recognize no social barriers among themselves. In the eyes of the sultan all are equal. Thus it may easily happen that, given the necessary ability, even an emancipated Ottoman slave may become grand vizier, and perhaps marry into the sultan's own family.

## Ancient Grievance.

"The German soldier who cursed Columbus for discovering America has a counterpart in a soldier from Alabama."

"How is that?" "I overheard one of our boys giving Julius Caesar 'Hall Columbia' for not finishing the Germans when he had the chance."—Birmingham Age-Herald.

## His Class.

"What would you call a man who swindled people by predicting all kinds of favorable futures for them?" "I'd call him a prophet-eer."

Reporter Advt's. pay, if you don't think so, try one now and prove it for yourself

If YOUR CAR is running smoothly leave it alone

BUT---

when the "machine" goes wrong, there's a right way to fix it---That's what our Garage is for.

Ask our regular customers how they like our work.
