Get a practical lumbermen to the fisherman must take his change look over your island and estimate the commercial quantity. Don't start

> Q. I have heard it said that of the millions of little trees found growing in a forest only a trifling percentage survive. How far is this true? A. Ninety-five per cent. of the juvenile trees in a forest eventually sacrifice themselves in order that five

Q. Has Ontario any scientific plan whereby the present deterioration of her white pine forests can be correct-

A. Only last week the Provincial Forester of Ontario announced the scheme whereby ten thousand acres of barren lands should be planted up with pine seedlings each year and this would eventually supply the province with as much mature pine as is now cut annually. The scheme looks like a good business proposition.

Q. Does our Canadian system of licensing timber differ from that of the United States?

A. Materially so. The people of the United States own less than one quarter of their total forest area whereas the people of Canada own about 90 per cent. of the forest area. In Canada we merely lease timber cutting rights and retain State conlish problem of applying mandatory laws on forest conservation to private property. In Canada we can enforce forestry provisions on our own estate which is much simpler job.

THE BANKS OF NEWFOUNDLAND

United States. Canada and Other Countries

was even entertaining the idea at 91 Juno St., Winnipeg, Man.

rea about 330 miles north and south "I read so much about Tanlac that orty fathems. The only dangers to to recommend it."

area covered by the Grand Bank really includes St. Pierre and Green Banks, which are separated only by narrow channels. The approach to the Grand Bank

vessel. The great shearwater, well known to the fishermen as hag or handler to the fishermen as had or handler to the fishermen as had or handler to the fishermen as had or had only the fishermen as had or had only the fishermen as had only the fisher to the fishermen as had only the fisherme hagden, is seen all across the Atlantic, Mr. Reid Marshall, from Bear River, out on the banks it, as well as divers numerous. The shearwater, by the ly at his uncle's, Mr. V. G. Andrews. way, derives its name from its skimming or shearing the water when

One will observe by studying a

chart of the North Atlantic how close our maritime ports are to the chief fishing banks as compared with Amer-Provinces, excluding possibly supolies destined for consumption in American centres conveniently at hand. Undoubtedly fish may be landed sooner in our ports and if intended for the fresh fish trade will be on the way to interior markets much sooner than when travelling circuitously via Boston. Furthermore, the proximity of the port gives

the fishermen more actual time on the banks. Naturally, when the distance to port is shortened the fishermen can produce more in a stated time and consequently should be able to meet all competition profitably. With the exception of Georges Bank the Americans are at a disadvantage. There seems to be a big opportunity

or profitable investment. The fresh ish demand in Canada is develoring rapidly and fish consumption generlly is on the incline throughout the vell. In addition, our foreign trade has grown tremendously in recert years. We should be able to produce cheaper than anyone else and the emium on the American dollar at he present time handicaps the United States' producer further in competing for foreign trade. Canadians have everything to help them but our neighbors are still doing a large proportion of the business.

The North Atlantic Banks are fished by fleets from the United States, Canada, Newfoundland, France and an occasional ship from Iceland. Large 7:30, by Rev. H. T. Jones, also on Bent's parents, Mr. and Mrs. F. W. French fleets operate with the French the 15th at 7:30 by Rev. R. F. Allen. Inglis. Island of St. Pierre as a base. A A cordial invitation is extended to having a freezing capacity of 200,000 in twenty-four hours and storage apacity of 6,000,000 pounds boxed ready for shipment, has recently been built there by the French Government and especially equipped steamers are provided to carry the supplies to Europe. The Parisian government is lending great assistance to the fishing industry, looking apparently in that direction for material for her navy.

FIVE DIE FROM DRINKING LIQUOR

Hoboken, N.J., Jan, 10-Five men lied to-day from drinking poisonous iquor. The authorities believe the quor had been obtained from sailors n an incoming steamship.

DEMMONS GETS A REAL SURPRISE

Times That I Tried Tanlac," Says Winnipeg Man

"I-never was so surprised at anyter, was disappointed on crossing thirg in my life as I was at the relief Johns is reported dying at Chelsea Atlantic that he could not see I got from my first bottle of Tanlac, Hospital. She is the third victim of Banks, It had been his and five bettles of the medicine have her sister's husband, John Waller, at the fishing banks of the made me perfectly well and strong who yesterday shot and killed Mrs. antic consisted of mounds again," said Joseph Dempians, a Waller, shot Mrs. Johns and then

Children Cry for Fletcher's

Fletcher's Castoria is strictly a remedy for Infants and Children.
Foods are specially prepared for babies. A baby's medicine
is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Cartor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains meither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the rollief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishn ss arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

Intersting Count Of Grades In Ontario And Quebec.

This winter has witnessed an alert evival of interest in hog raising as at Ottawa and the wide publicity given to the keen competition which must be met on the British market, set chiefly by Danish exporters. Signs of this awakened interest can be traced in almost every report of 'armers' gatherings from end to end of the Dominion. A healthy sign is the intelligent way in which the producers are seeking the facts of the new conditions in our markets. If this spirit continues those nearest the industry state that there need be no questioning the ultimate success of the effort to restore our bacon export trade to its proper position.

One fact which, no doubt, will greatly surprise the majority of hog raisers is that only a little over onehalf of the number purchased by meat packers in Ontario and Quebec can be graded into the desired weights
