Victoria University.

VICTORIA UNIVERSITY was founded by resolution of the Conference of the Methodist Church in Canada, held in Kingston in August, 1830. The institution was opened for students on the 18th of June, 1836, with the Rev. Matthew Ritchie, M.A., as Principal. On the 12th of October, 1836, letters patent were issued by His Majesty King William IV., incorporating the institution as a seminary of learning for the Province of Upper Canada, under the name of "Upper Canada Academy."

In 1841, the Parliament of the United Provinces of Upper and Lower Canada, being now first constituted by Act of the Imperial Parliament, with authority to grant such a charter, at its first session, held in the city of Kingston, passed an Act to incorporate the Upper Canada Academy under the name and style of "Victoria College, with power and authority to confer degrees of Bachelor, Master and Doctor of the various arts and faculties," which Act was assented to by the Governor-General on the 27th of August, 1841.

On the 21st of October, 1841, the Rev. Egerton Ryerson, having been appointed Principal, opened the first college session under the enlarged charter.

In the year 1844, the Rev. A. McNab, D.D., succeeded the Rev. Dr. Ryerson as Principal, and occupied the office until 1849. At the close of his term the number of students in the college was 140.

In 1850, the Rev. S. S. Nelles, M.A., was appointed Principal, and addressed himself to the task of organizing and enlarging the college to the status and work of a University. In the year 1854-55, the Faculty of Medicine was added and established in Toronto. In 1860, the Faculty of Law was added, and in 1871, the Faculty of Theology.

In the year 1883-84, a commission, appointed by the General Conference of the Methodist Church, arranged for the consolidation of Albert College, Belleville, with Victoria College, Cobourg, and legal

effect was given to this consolidation by Act of the Legislature of Ontario, 47 Vic., chap 93.

The corporate name was by this Act changed to "Victoria University." The government of the University was vested in a Board of Regents, Chancellor, Vice-Chancellor and Senate. To these bodies was given power to affiliate outlying colleges, and full university powers in all faculties were continued. The Rev. S. S. Nelles, D.D., LL.D., as President, was *ex officio* first Chancellor, and William Kerr, Q.C., LL.D., was elected Vice-Chancellor.

In 1887, the Rev. S. S. Nelles, D.D., LL.D., died, and the Rev. N. Burwash, S.T.D., was appointed President and Chancellor.

Under the provisions of the present charter, the following colleges are affiliated in Arts with Victoria University: Albert College, Belleville; the Wesleyan Ladies' College, Hamilton; the Ontario Ladies' College, Whitby; Alma College, St. Thomas; Columbian Methodist College, New Westminster, B.C.

On the 12th of November, 1890, under the provisions of the Revised Statutes of Ontario, chap. 230, and the Acts amending the same, Victoria University was, by proclamation of the Lieutenant-Governor, federated with the University of Toronto.

By the provisions of the Federation Act, the President of Victoria University, a representative of the Senate of Victoria University, and five representatives of the graduates in Arts become members of the Senate of the University of Toronto.

Six hundred and eight graduates of Victoria University have been admitted to the standing and privileges of the degree of B.A. in the University of Toronto; two hundred and thirty-two to those of M.A.; nine hundred and sixty-three to those of M.D.; one hundred and twenty-five to those of LL.B., and forty to those of LL.D.

On the 1st of October, 1892, the Faculty of Victoria University occupied their new buildings in the Queen's Park, Toronto, and the federation of the Universities was practically consummated. The curriculum in Arts for all students of Victoria University is that prescribed by the Senate of the University of Toronto. The Faculty of Arts in Victoria University provide instruction in all subjects assigned by the Federation Act to University College. In other subjects the students of Victoria University attend the lectures and laboratory practice of the University of Toronto.

Regulations and Curriculum
in Arts.

GENERAL REGULATIONS AND INFORMATION.

Admission.

Students are admitted to registration in the Faculty of Arts on having passed the Matriculation examination prescribed by the University of Toronto, or on giving the Faculty satisfactory evidence of their ability to pursue the courses of study proposed. They are required to observe the general regulations of the University of Toronto and of Victoria University, in regard to attendance on lectures and examinations.

Examinations.

All students of Victoria University desiring to take the examinations in Arts will present themselves at the annual examinations of the University of Toronto.

The standing thus obtained gives the students of Victoria undergraduate rank in the University of Toronto as well as in Victoria University, and entitles them to compete for all University honors.

No student may present himself for any university examination subsequent to matriculation without producing a certificate of having complied with all the requirements of his college affecting his admission to such examination.

Scholarships, Medals and Prizes.

All scholarships and prizes of the University of Toronto are open to students of Victoria University on the general terms prescribed by the Senate. Whenever the winner of a scholarship is entitled to exemption from college fees, such exemption will be accorded in Victoria as in University College.

Various scholarships, prizes and medals are open only to students enrolled in Victoria University. For details see section on Scholarships.

Instruction.

Instruction is given in the various subjects of the Arts Course by the Arts Faculty of the University of Toronto, and the Arts Faculty of Victoria University. In the division of the work of instruction between these faculties the subjects are assigned as follows:—To the Faculty of the University of Toronto: Mathematics, Physics, Mineralogy and Geology, Biology, Chemistry, History of Philosophy, Logic, Comparative Philology, Italian and Spanish, History, Political Economy and Constitutional History, Constitutional and International Law, Roman Law, General Jurisprudence and History of English Law; and to the Faculty of Victoria University: Latin, Greek, Ancient History, English, French, German, Oriental Literature, Ethics. Instruction in the theological options is given by the Theological Faculty of Victoria University.

Libraries, Museums, Etc.

The students of Victoria University have all the advantages of the following libraries, laboratories, etc.:

UNIVERSITY OF TORONTO LIBRARY, containing upwards of 50,000 volumes, is supplied with a reading room, a periodical room, several seminary rooms, etc., and is provided with the standard and current literature of all subjects taught in the University.

VICTORIA UNIVERSITY LIBRARY consists of a working collection of some 10,000 volumes in the English, French and German languages and Literatures, History, Philosophy, and the various departments of Theology. The Library is one of reference, and includes the loan of the Literary Society collection. For the list of Donors for the present year see Appendix.

THE LABORATORIES in the various departments of Science are well supplied with apparatus for work in the departments, and are situated in the buildings devoted to the subjects.

THE MUSEUMS contain collections of specimens in Biology, Mineralogy and Ethnology arranged for purposes of instruction.

In addition to the collections of the Museums of the University of Toronto, there is in Victoria University a museum that is of particular value in the department of Mineralogy.

Student Societies.

Various societies and associations, both of young men and of young women, have been organized for the promotion of Christian effort, social intercourse, literary and scientific activity.

The UNION LITERARY SOCIETY, a reorganization of two older societies, meets each week in literary session, organizes public entertainments, and keeps furnished a well-provided Students' Reading Room. The Society publishes *Acta Victoriana*, a paper devoted to literature and college affairs, each month during the collegiate year. The members of the Society, assisted by graduates and friends, have furnished Alumni Hall, where their meetings are held.

The WOMAN'S LITERARY SOCIETY, which meets every two weeks, has kindred aims.

The MISSIONARY SOCIETY has before it the object of supporting a missionary in Japan, assisted by the graduates of the University.

The Young Men's Christian Association is an active force in the college life, and meets twice a week in Jackson Hall.

Religious Services.

All students are expected to attend the public worship of God on the Lord's Day, at such churches as their parents or guardians may prefer. Morning prayers will also be held daily in the Chapel, at which all students are expected to be present.

Other religious services will be held at suitable times, to which all students are cordially invited.

Residence.

Students are required to board in such houses as are licensed by the Faculty, except students residing with their parents or with friends designated by their parents or guardians. A carefully selected list of boarding-houses, where board and rooms may be obtained at prices varying from \$3.00 to \$5.00 a week, is prepared each year by the Young Men's Christian Association. Students will be expected to observe proper hours, and to maintain the conduct of Christian ladies and gentlemen.

Regulations Relating to Students, Terms, and Examinations.

Students.

The regular students include undergraduates of the University and matriculants; *i.e.*, students who, though they have not passed the prescribed matriculation examinations, are taking the full undergraduate course.

Matriculated students are required to attend the lectures and examinations on all subjects necessary for students of their respective standings. Certificates of attendance, during one or more academic years, will be given to those matriculated students who have been regular in their attendance on the required lectures, and who have passed the prescribed examinations.

Matriculated students are required to reside, during the period of their attendance on lectures, in houses selected by their parents or guardians, or approved by the President.

All interference with the personal liberty of any student, by arresting him, or summoning him to appear before any tribunal of students, or otherwise subjecting him to any indignity or personal violence, is forbidden by the Faculty. Any student convicted of participation in such proceedings will forfeit the certificate required for admission to the University examinations, and will render himself liable to expulsion from the University.

Occasional students may be admitted to lectures on application to the President.

Certificates of attendance on lectures in any department during an academic year, may be given to occasional students who have been regular in their attendance, and who have also passed the examinations in such department.

Terms.

The Academic Year consists of two terms; the first (*Michaelmas*) extending from October 1st to December 18th; and the second (*Easter*) from January 4th to May 31st.

The term will not be allowed to students who have been reported to the President by any of the Professors as neglecting to

attend the required lectures, or have not conformed to the statutes and regulations of the College, or have been reported to the Faculty for bad conduct.

Examinations.

Matriculated students are required to attend all examinations prescribed by the Professors and Lecturers in their special departments.

Prizes and honors are awarded on the recommendation of the Professors and Lecturers, in accordance with the requirements prescribed by them in their several departments.

Occasional students are not required to attend the examinations, unless they are candidates for prizes or honors, or desire to obtain certificates of attendance.

Laboratory Fees.

"A course in laboratory work" means the continuous course of instruction in laboratory or practical work offered to the student in any one year of the undermentioned subjects, namely, Physics, Chemistry, Mineralogy and Geology, Psychology, Biology (including Physiology, Zoology, Botany, and Histology), and any other separate subject in which laboratory work is or may be prescribed.

"A partial course of laboratory work" means a special course, or any sub-division, complete in itself, of a course of laboratory work as above defined.

"A matriculated student in Arts" means a student who is matriculated in the University of Toronto, and enrolled in University College or a federated University, and whose name is entered with the Registrar of the University of Toronto.

"An occasional student" includes every student in whose case the Senate of the University of Toronto is by law authorized to determine fees for courses of lectures in the University of Toronto.

Laboratory fees shall be divided into (a) Fees for practical instruction in the laboratory ; (b) Charges for supplies.

Practical Instruction Fees.

The annual practical instruction fee for an occasional student attending a course, or partial course, of laboratory work shall be based on the lecture fee prescribed for occasional students by the Senate statute, namely :

REGULATIONS AND CURRICULUM IN ARTS.

Degree of Bachelor of Arts.

There are two ordinary modes of proceeding to the Degree of Bachelor of Arts, viz : (1) by taking the General course ; or, (2) by taking an Honor course.

Entrance.

1. Candidates may enter this Faculty by passing the Junior Matriculation examination or the Senior Matriculation examination (First year).

2. Candidates for Junior Matriculation must have completed the sixteenth year of their age.

3. Candidates for entrance must produce satisfactory certificates of age and of good conduct.

4. All candidates for Junior Matriculation shall take the following subjects :— Latin, English, History, Mathematics, French or German, and either (1) Greek or (2) the second Modern Language with Physical Science (Physics and Chemistry).

5. The examination may be taken at once or may be divided into the following two parts, of which (I.) shall be taken before (II.) and in a different year :—(I.) Arithmetic and Mensuration, English Grammar and Rhetoric, Physics, and the History of Great Britain and Canada ; (II.) Greek, Latin, French, German, English Composition, English Literature, Ancient History, Algebra, Geometry and Chemistry.

6. The percentage required to pass the examination shall be thirty-three and one-third per cent. on each paper taken by the candidate.

7. The marks for sight-work on each of the " Authors " papers shall constitute at least thirty-three and one-third per cent. of the whole of the marks for the paper.

8. Junior Leaving certificates will be accepted *pro tanto* at both Part I. and Part II. of the Junior Matriculation examination, but candidates who desire to compete for scholarships or relative standing will not be granted this exemption in the case of Part II.

9. Candidates for Honors and for Scholarships will be examined only on the Honor papers in a department, always provided that such candidates may receive pass standing on these papers.

10. Candidates who have already passed both Parts I. and II. of the present Matriculation, or who have passed Junior Matriculation prior to 1896, shall, if they again present themselves for examination at Matriculation, be regarded as having passed Part I. only, provided that Physics be taken by those candidates who have not taken Greek.

11. All candidates for Senior Matriculation shall take the following subjects:—English; Latin; any two of the following languages, viz., Greek, French, German, Hebrew; Ancient History; Mathematics; Physics or Biology.

12. Candidates for Senior Matriculation may present themselves either in May at the University of Toronto, or in June at such schools as comply with the statute of Senate relating to this examination (for new regulations see statute below).

13. The ordinary annual examinations for Junior Matriculation will commence in July, and applications therefor must be sent to the Education Department, through the Public School Inspector or the Registrar of the University, not later than 24th May, except in the case of candidates for scholarships, whose application and fee must be sent to the Registrar of the University by the above-mentioned date.

14. Candidates failing in one or more subjects of Part I. or of Part II. must repeat the whole examination in which such failure occurred.

15. Supplemental examinations for Junior and Senior Matriculation will be held in the University about the middle of September, at which those who are rejected at previous examinations, as well as new candidates, may present themselves; but no honors or scholarships will be awarded at such examinations. Applications therefor must be sent to the Registrar of the University not later than 1st September.

16. The fee for the Junior Matriculation examination is seven dollars, that is, two dollars for Part I. and five dollars for Part II. The fee for Senior Matriculation examination, and for Supplemental Matriculation is ten dollars, and must in every case be paid at the time of application.

17. Until the Senate by resolution otherwise determines, the standing of candidates who have passed, or who may hereafter pass, the examination of the Department of Education for Senior or Junior Leaving Certificates, is accepted *pro tanto* at any Junior Matriculation examination.

18. Senior Leaving certificates, or certificates of having passed portions of the examination for such certificates, may be accepted *pro tanto* at the Senior Matriculation and First year examinations. The standing of candidates for the whole or part of the examination for a higher grade of certificate than Senior Leaving shall be determined in each case by the Senate.

19. Candidates presenting Senior Leaving certificates covering the complete work of the First year, or such work wanting one or two subjects, may be admitted to standing of the Second year, or to such standing, conditioned on such subjects.

20. Candidates presenting *pro tanto* certificates must complete the entire examination at one time.

21. The examinations of the School of Practical Science in Mathematics, Physics, Chemistry, Mineralogy and Geology, are accepted *pro tanto*.

22. Candidates who desire to compete at the First year examinations for scholarships or relative standing are not permitted to exercise the privilege referred to in the preceding paragraph.

23. An undergraduate in the Faculty of Arts in another University may be admitted *ad eundem statum* on such conditions as the Senate may prescribe.

24. If such applicant be admitted to a lower standing in this University than he held in his own University, he may not compete for scholarships at the next ensuing examination; but if he obtain honors, he shall, at the next succeeding examination, enjoy the same rights and privileges with respect to obligatory subjects as an original undergraduate of this University who has passed an examination of the same merit.

25. The fee for admission *ad eundem statum* is eight dollars, and must be paid at the time of application.

REVISED SENIOR MATRICULATION REGULATIONS.

The following Statute respecting the Senior Matriculation Examination was passed in May, 1896:—

1. (a) The number and the standard of the examination papers and the regulations respecting the subjects of examination for pass shall be the same in each department as for the first year examination, and the percentage for pass shall be one-third of the maximum of marks assigned to each paper.

(b) The number and the standard of the examination papers, and the regulations respecting the subjects of examination and the percentage required for honors, shall be the same in each department as for the first year examination.

2. The examinations shall be held in May, June and September, at the University of Toronto, and the June examination at such local centres also as may be determined by the standing committee on examinations.

3. Applications for a local examination shall be made to the Registrar of the University by the authorities of a School or College, not later than the first day of May in each year.

4. The presiding examiner or examiners at each local centre shall be appointed by the standing committee on examinations, and of these examiners, as many as may be found necessary, shall be appointed to read the dictation papers in French and German.

5. The remuneration of the presiding examiner at a local centre and such other extra expense as may be incurred in connection with the local examination shall be paid by the authorities of the School or College on whose application the examination is held, and the amount due shall be paid to the Registrar at the close of the examination.

7. Candidates who have not previously passed the examination on Arithmetic and Mensuration, and English Grammar of Part I. of the Junior Matriculation Examination will be required to take papers on each of these subjects at Senior Matriculation.

8. The Board of Examiners for the June examination shall be as, far as practicable, that appointed for the Junior Matriculation Supplemental examination in Arts.

9. The fee for Senior Matriculation shall be fifteen dollars.

10. This Statute shall come into effect on January 1st, 1897.

Regulations Relating to all Undergraduates.

1. Undergraduates proceeding to the Degree of Bachelor of Arts must be enrolled either in University College or in Victoria University. They must also attend lectures on all the subjects of their course of study for the year, unless for sufficient reasons the Senate, on recommendation of the College in which they are enrolled, grants them a dispensation from lectures in whole or in part. The fee for such dispensation shall be five dollars. All applications for such dispensation must be lodged with the Registrar before October 1st, and for Easter Term before January 1st.

2. In case a student who has won a scholarship at matriculation applies for dispensation from attendance for one or more of the years during which he is entitled to exemption from tuition fees, he shall be exempt from the usual fee for dispensation in lieu of tuition fees.

3. Every undergraduate must, before being admitted to any examination subsequent to that by which he enters the University, produce a certificate from the head of the College in which he is enrolled, to the effect that he has complied with all the requirements of that College affecting his admission to such examination, and no candidate shall be admitted to standing at any examination who has been reported from his College Council to have violated their regulations.

4. Notice of the time of commencement of the undergraduate examinations will be given annually in January.

5. Candidates in all the years are required to send to the Registrar of the University, at least six weeks before the commencement of each examination, an application for examination according to a printed form to be obtained from the Registrar. The fee for examination and, in the case of candidate for degrees, that for the degree, must be paid not later than April 15th.

Regulations Relating to the General Course.

1. An undergraduate is entitled to the degree of Bachelor of Arts if in each year of his course he passes the examinations in the prescribed work of the General course.

2. Candidates in the General course in Arts must obtain at the annual examinations a minimum average of sixty-six per cent. in order to be placed in the first class in General Proficiency, and a minimum average of fifty per cent. in order to be placed in the second class. The candidates in these two classes shall be ranked in order of merit. All candidates failing to obtain fifty per cent. in each subject but obtaining not less than thirty-three per cent., shall be ranked as Pass candidates. The names of candidates in the General course in Arts who avail themselves of the theological options shall be placed in a list, separate from those who have not availed themselves of this privilege.

3. Candidates in the General course in Arts shall be arranged alphabetically in each subject in the annual class lists in three grades, A, B, and C; the minimum for Grade A shall be sixty-six per cent. of the marks, and for Grade B, fifty per cent.; all who pass with less than fifty per cent., but not less than thirty-three per cent., shall be placed in Grade C.

4. The name of a Pass candidate in Arts may be allowed to appear in the class-lists of his year, provided there are not more than two subjects in which he has failed. These subjects may be among the obligatory subjects of the year, or they may be subjects attempted at a previous examination or examinations. Honor and General Proficiency candidates in Arts may be starred in one, but not more than one subject of the General course on like conditions.

5. Honor candidates who have failed in one subject under the above regulation, and who in consequence have been starred in that subject, may repeat in May the whole examination at which they were starred, and similarly General Proficiency or Pass candidates who have been starred in one or two subjects, may repeat the whole examination either in September or in May, but such candidates shall not be eligible for scholarships. All candidates who do not exercise this option may present themselves for examination in the subjects in which they have been starred, either in September or in May, but on so presenting themselves, they shall be entitled to examination in those subjects only in which they have been starred.

6. Candidates of the Fourth year who have been starred in one or two subjects, but who have not succeeded in writing off these subjects at some previous examination, may be allowed to take this work at the May examination. Candidates taking advantage of this provision shall pay an additional fee of ten dollars. But in the case of English of the Third and Fourth year, a candidate shall not be considered to have written off his star, unless the Third year examination which he passes covers a different prescription of texts from that covered by his Fourth year examination.

7. When a candidate at an examination is starred in a subject which is one of two or more subjects between which an option exists at the said

examination, the candidate at his supplemental examination may present himself in any one of such alternative subjects.

8. At the beginning of the Second, Third, or Fourth year a candidate may be transferred from the General course to an Honor course or *vice versa*, or from one Honor course to another Honor course, by passing an examination on such subjects, and by obtaining therein such a percentage as may be required by the Senate in view of the nature of the transfer granted. A student in the General course who wishes to take honors in a department may be allowed to repeat his year, taking the work of the Honor department only if he so desires, and on passing with honors he shall be allowed to proceed in that department.

9. Undergraduates of any year, who have been rejected, or who have by sickness, domestic affliction, or other causes beyond their control been prevented from attending the Annual examinations in May, may present themselves for examination in September; but candidates who have failed to attend at the May examinations, must prove to the satisfaction of the Vice-Chancellor, before presenting themselves in September, the existence and sufficiency of the alleged cause of absence, and all such cases shall be subsequently reported to the Senate.

10. Undergraduates in the General course in the Third and Fourth years may, in lieu of one or more of the subjects prescribed for each of these years, take certain of the following subjects, namely, Biblical Greek, Biblical Literature, Apologetics, Church History, and Christian Ethics, according to the following schedule:—

THIRD YEAR....Biblical Greek for Classical Greek; Church History or Biblical Literature for Modern History; Apologetics for Physics.

FOURTH YEAR....Biblical Greek for Classical Greek; Biblical Literature for Modern History; Christian Ethics or Apologetics or Church History for History of Philosophy.

NOTE.—Candidates are allowed two of the three options in the Third, and three in the Fourth year.

11. Undergraduates who exercise the theological options must present certificates of having attended lectures (unless granted dispensation by the University) and of having passed examinations in the subjects so selected at an affiliated or federated College or University other than University College. These examinations must be taken in the same year as the corresponding University examinations, and be subject to the same regulations as to standard.

Term Work in the General Course.

12. Reports of attendance at pass lectures in the First and Second years shall be made in all departments except those of Chemistry, Natural Science, and Physics, and marks for such attendance shall be assigned in connection with the May examination as follows:—

For attendance at four-fifths and over.....	20	marks.
“ “ “ two-thirds and over.....	13	“
“ “ “ one-half and over.....	7	“

13. No student attending less than one-half the lectures shall receive any marks for attendance.

14. Reports on term pass work in the First and Second years shall be made in all departments except those of Chemistry, Natural Science, and Physics. In the department of English four essays at least shall be required during the session from each student; and the reports on term work in that department shall be based on the essays. In other departments the report on term work shall be based on those parts of the work which the professor or lecturer may deem most appropriate as tests of proficiency. The maximum number of marks to be assigned for term work in connection with the May examination shall be thirty, except in the case of English, in which the term work shall count as eighty marks.

15. Students to whom the foregoing regulations apply must obtain on the May examination at least thirty-three per cent. of the examination marks; and must also obtain at least thirty-three per cent. of the aggregate number of marks assigned according to the following schedule:—

May examination	100
*Term work	30
Attendance	20
Total	150

16. The Senate may, upon the report of the University or College Council concerned, based on the recommendation of a Professor or Lecturer, excuse registered students from term work and from attendance at lectures in any one or more subjects. Such exemption must be obtained at the beginning of each term, and no exemption from term work shall be allowed in the case of English.

Regulations Relating to the Honor Course.

1. In this course there are eleven Honor departments, viz.: I. Classics; II. Modern Languages; III. English and History; IV. Oriental Languages; V. History; VI. Political Science; VII. Philosophy; VIII. Mathematics and Physics; IX. Natural Science; X. Chemistry and Mineralogy; XI. Physics and Chemistry.

2. Candidates shall not have the right to claim examination in more than two Honor courses after the first year.

3. An undergraduate is entitled to the degree of Bachelor of Arts, if in each year of his course he passes the examinations in the prescribed work of one of these departments, and also the subjects of the General course prescribed in

4. In the annual class-lists, the names of candidates who obtain honors in any department or subject shall be arranged in order of merit in three classes, those obtaining seventy-five per cent. and over of the total number of marks being placed in the first class, those obtaining sixty-six per cent., and less than seventy-five per cent. being placed in the second class, and those obtaining fifty per cent. and less than sixty-six per cent. being placed in the third class.

5. A candidate pursuing a course in an Honor department who falls below the third class in his department, shall not be allowed standing of the following year. But in the departments of Modern Languages, English and History, History, Political Science, Philosophy, Chemistry and Mineralogy, Physics and Chemistry, and Natural Science, candidates whose average is not less than third class, but who have fallen below third class in any one subject, may, on the recommendation of the examiners, be allowed to proceed as Honor candidates in the following year.

6. A candidate who competes for honors at the examination for Bachelor of Arts, and fails to obtain the requisite number of marks to entitle him to be classed in honors, may, on the recommendation of the examiners, be awarded a degree without honors; it being at the option of the candidate to accept the award of such a degree, or to wait until a subsequent examination, and again compete for a degree in honors.

7. An undergraduate who has obtained honors in any department may with the consent of the Senaté be transferred to any other department, and proceed therein, but as a prerequisite to obtaining the Degree of Bachelor of Arts, he must during his course have passed the examinations in the subjects of the General course required in the Honor department to which he is transferred. Undergraduates who are pursuing an Honor course, and who at Junior Matriculation obtained honors in a subject, shall be exempt from examination and attendance at lectures in this subject, provided it is one of the pass subjects attached to their Honor department in the First year, and is prescribed for the First year only.

8. Candidates in the honor subjects of Physics, Chemistry, Biology, Mineralogy and Geology, and Psychology will be ranked in the class lists on practical work done in the laboratories of the respective departments during the session; and no candidate will be allowed to proceed to examination in any of these honor subjects unless he presents to the Registrar a certificate from the Professor that he has attained honor standing in the practical work of that subject.

9. In the Departments of Mathematics and Physics, Chemistry and Mineralogy, and Natural Science, each candidate for honors must attend all examinations in the practical work of the year in which he presents himself for the University examination.

10. Undergraduates in the Honor department of Philosophy may, in the Third year, substitute any two of the three following subjects, viz.: Church History, Apologetics, Biblical Literature, for Modern History and Economics. Under-

graduates in the Honor department of Oriental Languages may, in the Third and Fourth years, substitute Biblical Greek for Classical Greek. Candidates exercising these options must present certificates of having attended lectures and passed examinations in the subjects so selected at an affiliated or federated College or University other than University College. These examinations must be taken in the same year as the corresponding University examinations, and be subject to the same regulations as to standard. These examinations do not count for honors.

Degree of Master of Arts.

Candidates for the Degree of Master of Arts must have been admitted to the Degree of Bachelor of Arts, must be of the standing of one year from admission to the Degree of Bachelor of Arts, and must have sent in an approved thesis upon some subject in one of the departments in the Faculty of Arts. The thesis must be sent to the Registrar not later than 1st May.

Admission ad "Eundem Gradum."

A graduate in the Faculty of Arts in any University in Great Britain or Ireland (if his degree be not an honorary one) may be admitted to the same degree in the University of Toronto.

JUNIOR MATRICULATION.

GENERAL COURSE.

PART I.

English Grammar and Rhetoric.

The main facts in the development of the language. Etymology and Syntax, including the inflection, classification and elementary analysis of words, and the logical structure of the sentence. Rhetorical structure of the sentence and paragraph. As far as possible the questions shall be based on passages from authors not prescribed.

Arithmetic and Mensuration.

ARITHMETIC: Proofs of Elementary Rules; Fractions (Theory and Proofs); Commercial Arithmetic.

MENSURATION: Rectilinear figures, right parallelepiped, prisms, and pyramids; the circle, sphere, cylinder, and cone.

History of Great Britain and Canada.

Great Britain and Canada from 1763 to 1871, with the outlines of the preceding periods of British History.

The Geography relating to the History prescribed.

Physics.

An experimental course defined as follows:—

Metric system of weights and measures. Use of the balance. Phenomena of gravitation. Matter attracts matter. Laws of attraction. Cavendish experiment. Attraction independent of condition. Illustration of weight of gases, liquids, and solids. Specific gravity.

Meaning of the term "a form of matter." All matter may be subjected to transmutation; "Chemistry;" application of measurement by weight (mass) to such transmutation leads to the theory of elements. Matter indestructible.

Meaning of "Force." Various manifestations of force, with illustrations from the phenomena of electricity, magnetism, and heat. Force measured in gravitation units; consequent double meaning of the terms expressing units of weight as mass, and units of weight as force.

Meaning of "Work." Measurement of work in gravitation units. Meaning of "Energy."

Effects of force continuously applied to matter. Laws of matter in motion. Velocity. Acceleration. Statement of Newton's Laws of Motion. Definition of "Mass." Meaning, value, and application of "g." Mass a measure of matter.

Conservation of Energy. Energy, like matter, indestructible and transmutable.

Study of the three states of matter. Properties and laws of gases, liquids, and solids. Laws of diffusion.

Elementary laws of heat. Mechanical equivalent. Latent heat. Specific heat. Caloric.

PART II.

Greek.

Translation into English of passages from prescribed texts.

Translation at sight (with the aid of vocabularies) of easy Attic prose, to which special importance will be attached. Candidates will be expected to have supplemented the reading of the prescribed texts by additional practice in the translation of Greek.

Grammatical questions on the passages from prescribed texts shall be set, and such other questions as arise naturally from the context.

Translation from English into Greek of sentences and of easy narrative passages based upon the prescribed prose texts.

The following are the prescribed texts:—

1897: Selections from XENOPHON, Anabasis I, in White's Beginner's Greek Book (pp. 304-428) with the exercises thereon; HOMER, Iliad I.

1898: Selections from XENOPHON, Anabasis I, in White's Beginner's Greek Book (pp. 304-428) with the exercises thereon; HOMER, Iliad VI.

Latin.

Translation into English of passages from prescribed texts.

Translation at sight (with the aid of vocabularies) of passages from some easy prose author, to which special importance will be attached. Candidates will be expected to have supplemented the reading of the prescribed texts by additional practice in the translation of Latin.

Grammatical questions on the passages from prescribed texts will be set and such other questions as arise naturally from the context.

Translation from English into Latin of sentences and of easy narrative passages based upon the prescribed prose texts.

The following are the prescribed texts:—

1897: VIRGIL, *Aeneid* III; CAESAR, *Bellum Gallicum* II, III, IV.

1898: VIRGIL, *Aeneid* I; CAESAR, *Bellum Gallicum* II, III, IV.

N. B.—The Roman method of pronouncing Latin is recommended:—*ā* as in *far*, *ā* the same sound, but shorter; *ē* like *a* in *fate*, *ē* as in *set*; *ī* as in *machine*; *ī* as in *fit*; *ō* as in *note*; *ō* as in *obey*; *ū* as in *rude*; *ū* as in *full*;

Mathematics.

ALGEBRA: Elementary Rules; Highest Common Measure; Lowest Common Multiple; Fractions; Square Root; Simple Equations of one, two and three unknown Quantities; Indices; Surds; Quadratics of one and two unknown Quantities.

GEOMETRY: Euclid, Books I, II, and III; Deductions.

French.

The candidate's knowledge of Grammar will be tested mainly by questions based upon prose extracts.

The examination in Composition will consist of (*a*) translation into French of short English sentences as a test of the candidate's knowledge of grammatical forms and structure, (*b*) formation in French of sentences of similar character, and (*c*) translation of passages from English into French.

Translation at sight of modern French, to which special importance will be attached. Candidates will be expected to have supplemented the reading of the following texts by additional practice in the translation of French:—

1897: DE MAISTRE, Voyage autour de ma Chambre; LABICHE, la Grammaire.

1898: ÉNAULT, le Chien du Capitaine; FEUILLET, la Fée.

German.

The candidate's knowledge of Grammar will be tested mainly by questions based upon prose extracts.

The examination in Composition will consist of (*a*) translation into German of short English sentences as a test of the candidate's knowledge of grammatical forms and structure, (*b*) formation in German of sentences of similar character, and (*c*) translation of passages from English into German.

Translation at sight of modern German, to which special importance will be attached. Candidates will be expected to have supplemented the reading of the following texts by additional practice in the translation of German:—

1897: LEANDER, Träumereien (selected by Van Daell).

1898: HAUFF, das Kalte Herz, Kalif Storch.

English.

COMPOSITION: An essay, to which special importance will be attached, on one of several themes set by the examiners. In order to pass in this subject, legible writing, correct spelling and punctuation, and proper construction of sentences are indispensable. The candidate should also give attention to the structure of the whole essay, the effective ordering of the thought, and the accurate employment of a good English vocabulary. About three pages of foolscap is suggested as the proper length for the essay; but quality, not quantity, will be mainly regarded.

LITERATURE : Such questions only shall be set as may serve to test the candidate's familiarity with, and intelligent and appreciative comprehension of, the prescribed texts. The candidate will be expected to have memorized some of the finest passages, and to have read carefully both prose and poetry outside of the specified work. In addition to the questions on the following selections, others shall be set on a "sight passage" to test the candidate's ability to interpret literature for himself :—

1897.

GOLDSMITH : The Traveller, The Deserted Village.

BYRON : Fourth Canto of Childe Harold.

The following selections from Palgrave's Golden Treasury :—

WORDSWORTH : "She was a Phantom of Delight," The Green Linnet, To the Cuckoo, and the following Sonnets : England and Switzerland, Upon Westminster Bridge, The Inner Vision.

KEATS : Ode to Autumn, Ode to a Nightingale, and the following Sonnets : On Chapman's Homer, The Terror of Death, The Human Seasons.

SHELLY : Ozymandias, To a Skylark, The Recollection.

SCOTT : The Outlaw, Jock o' Hazeldean, The Rover, Rosabelle.

1898.

TENNYSON : Morte D'Arthur, Elaine, Recollections of the Arabian Nights, To Virgil, Early Spring, Ulysses, "You Ask Me Why," "Of Old Sat Freedom," "Love Thou Thy Land," Freedom, Genone, The Lotus Eaters, Crossing the Bar, Lady of Shalott, St. Agnes Eve, Sir Galahad, the six interlude songs in the Princess, and "Tears, Idle Tears."

The following selections from Palgrave's Golden Treasury :—

GRAY : Ode on Vicissitude, Ode on the Spring, Elegy written in a Country Churchyard, Ode on Eton College.

COWPER : Sonnet to Mary Unwin, To the Same, The Castaway, The Poplar Field, The Shrubbery.

Ancient History.

Outlines of Roman History to the death of Augustus, and of Greek History to the battle of Chaeronea.

The Geography relating to the History prescribed.

Chemistry.

An experimental course defined as follows :—

Properties of Hydrogen, Chlorine, Oxygen, Sulphur, Nitrogen, Carbon, and their more important compounds. Nomenclature. Laws of combination of the elements. The Atomic Theory and Molecular Theory.

Grammatical questions on the passages from prescribed texts will be set, and such other questions as arise naturally from the context.

Translation into Latin of ordinary narrative passages of English.

The following are the prescribed texts:—

1897: CÆSAR, *Bellum Gallicum* II, III, IV; VIRGIL, *Æneid* III; HORACE, *Odes* I, II; LIVY, XXII.

1898: CÆSAR, *Bellum Gallicum* II, III, IV; VIRGIL, *Æneid* I; HORACE, *Odes* I, II; CICERO, *In Catilinam* I, II, III, IV, and *Pro Archia*.

Mathematics.

ALGEBRA: Elementary Rules; Highest Common Measure; Lowest Common Multiple; Fractions; Square Root; Simple Equations of one, two and three unknown quantities; Indices; Surds; Quadratics of one and two unknown quantities; Theory of Divisors; Ratio, Proportion, and Variation; Progressions; Notation; Permutations and Combinations; Binomial Theorem; Interest Forms; Annuities.

GEOMETRY: Euclid, Books I, II, III, IV, and VI; Definitions of Book V; Deductions.

TRIGONOMETRY: Trigonometrical ratios with their relations to each other; Sines, etc., of the sum and difference of angles with deduced formulas; Use of Logarithms; Solution of Triangles; Expressions for the area of Triangles; Radii of circumscribed, inscribed, and escribed circles.

French.

The prescription of work in Grammar, Composition and Sight Translation is the same for Honors as for the General course, but the examination will be of a more advanced character.

The following are the prescribed texts:—

1897: DE MAISTRE, Voyage autour de ma Chambre; LABICHE, la Grammaire; ERCKMANN-CHATRIAN, Madame Thérèse; LABICHE, la Poudre aux Yeux.

1898: ÉNAULT, le Chien du Capitaine; FEUILLET, la Fée, le Roman d'un jeune Homme pauvre; LABICHE, Voyage de M. Perrichon.

German.

The prescription of work in Grammar, Composition and Sight Translation is the same for Honors as for the General course, but the examination will be of a more advanced character.

The following are the prescribed texts:—

1897: LEANDER, Träumereien (selected by Van Daell); FREYTAG, die Journalisten; GERSTÄCKER, Germelshausen.

1898: HAUFF, das Kalte Herz, Kalif Storch; EICHENDORFF, Aus dem Leben eines Taugenichts; WILHELM, Einer muss heiraten; BENEFIX, Eigensinn.

English.

COMPOSITION: An essay, to which special importance will be attached, on one of several themes set by the examiner.

LITERATURE: The candidate will be expected to have memorized some of the finest passages, and to have read carefully both prose and poetry outside of the specified work. Besides questions to test the candidate's familiarity with, and comprehension of, the following selections, questions may also be set to determine within reasonable limits his power of appreciating literary art:

1897.

GOLDSMITH: The Traveller, The Deserted Village.

BYRON: Fourth Canto of Childe Harold.

MILTON: Comus.

SHAKESPEARE: Macbeth, As You Like It.

The following selections from Palgrave's Golden Treasury:—

WORDSWORTH: "She was a Phantom of Delight," The Green Linnet, To the Cuckoo, and the following Sonnets: England and Switzerland, Upon Westminster Bridge, The Inner Vision.

KEATS: Ode to Autumn, Ode to a Nightingale, and the following Sonnets: On Chapman's Homer, The Terror of Death, The Human Seasons.

SHELLEY: Ozymandias, To a Skylark, The Recollection.

History.

English History from the discovery of America to 1763.

Outlines of Roman History to the death of Augustus, and of Greek History to the battle of Chaeronea.

The Geography relating to the History prescribed.

Physics.

An experimental course defined as follows :—

MECHANICS : Uniformly accelerated rectilinear motion, particularly under gravity ; composition and resolution of forces ; triangle and parallelogram of forces ; friction ; polygon of forces ; with easy examples.

HYDROSTATICS : Fluid pressure at a point ; pressure on a horizontal plane ; pressure on an inclined plane ; resultant vertical pressure, and resultant horizontal pressure, when fluid is under air pressure and when not ; transmission of pressure ; Bramah's press ; equilibrium of liquids of unequal density in a bent tube ; the barometer ; air-pump ; water-pump, common and force ; siphon.

ELECTRICITY : Voltaic cells, common kinds ; chemical action in the cell ; magnetic effects of the current ; chemical effects of the current ; voltmeter ; astatic and tangent galvanometers ; simple notions of potential ; Ohm's law, with units ; best arrangement of cells ; electric light, arc and incandescent ; magnetism ; inclination and declination of compass ; current induction ; induction coil ; dynamo and motor ; electric bell ; telegraph ; telephone ; electroplating.

SOUND : Caused by vibrations ; illustration of vibrations, pendulums, rods, strings, membranes, plates, columns of air ; propagated by waves ; its velocity ; determination of velocity ; pitch ; standard forks, accoustical, $C = 512$, musical, $A = 870$; intervals ; harmonic scale ; diatonic scale ; equally tempered scale ; vibration of air in open and closed tubes, with wave-lengths ; resonators ; notes and loops ; vibration of strings and wires ; reflection of sound ; manometric flames.

LIGHT : Rectilinear propagation ; image through a pin-hole ; beam, pencil ; photometry ; shadow and grease-spot photometers ; reflexion and scattering of light ; laws of reflection ; images in plane mirrors ; multiple images in in-

clined mirrors; concave and convex mirrors; drawing images; refraction; laws and index of refraction; total reflexion; path through a prism; lenses; drawing image produced by a lens; simple microscope; dispersion and color spectrum; recombination of white light.

Chemistry.

Chemical Theory. The practical study of the following elements, with their most characteristic compounds, in illustration of Mendelejeff's Classification of the Elements: Hydrogen; Sodium, Potassium; Magnesium, Zinc; Calcium, Strontium, Barium; Boron, Aluminium; Carbon, Silicon, Tin, Lead; Nitrogen, Phosphorus, Arsenic, Antimony, Bismuth; Oxygen, Sulphur; Fluorine, Chlorine, Bromine, Iodine; Manganese, Iron. Elementary Qualitative Analysis.

Biology.

1. ELEMENTS OF ZOOLOGY: Thorough examination of the external form, the gills, and the viscera of some common fish. Study of the prepared skeleton of the same. Demonstration of the arrangement of the muscular and nervous systems and the sense-organs, as far as these can be studied without the aid of the microscope.

Comparison of the structure of the frog with that of the fish. The skeleton of the pectoral and pelvic girdles, and of the appendages of the frog, should be studied and the chief facts in the development of its spawn observed, till the adult form is attained.

Examination of the external form of a turtle and a snake.

Examination of the structure of a pigeon or a fowl.

Study of the skeleton, and also of the teeth and viscera of a cat or dog.

Study of the crayfish as a type of the Arthropods.

Comparison of the crayfish with an insect (grasshopper, cricket or cockroach); also with a millipede and a spider.

Examination of an earthworm and a leech.

Study of a fresh-water mussel and a pond-snail.

The principles of zoological nomenclature as illustrated by some of the common fresh-water fish, such as the sucker and herring, bass and perch.

Study of an amoeba, or paramoecium as a type of a unicellular animal.

The modifications of the form of the body in vertebrates in connection with different methods of locomotion.

2. ELEMENTS OF BOTANY: The examination will test whether the candidate has practically studied representatives of the flowering plants of the locality in which the preparatory school is situated, and representatives of the chief subdivisions of cryptogams, such as a fern, a lycopod, a horsetail, a liverwort, a moss, a lichen, a mushroom and a chara.

An elementary knowledge of the microscopic structure of the Bean and the Maize. Attention will be given in the examination to drawing and description of parts of plants supplied, and to the classification of these. Comparison of different organs, morphology of root, stem, leaves and hair, parts of the flower, reproduction of flowering plants, pollination, fertilization, and the nature of fruit and seeds.

1898: CICERO, In Catilinam, I, II, III, IV, and Pro Archia, and HORACE Odes, Bks. I, II.

Questions will be added to the author papers on Grammar and Prosody and on the subject-matter of the books.

Latin Grammar; Latin Composition; Latin sight translation (prose authors).

Greek.

1897: HOMER, *Odyssey*, Bks. XI, XII; DEMOSTHENES, *Pro Phormione*, *Contra Cononem*.

1898: HOMER, *Odyssey*, Bks. XIII, XIV; DEMOSTHENES, *Pro Phormione*, *Contra Cononem*.

Greek Grammar; translation at sight of easy passages of Greek; translation from English into Greek, involving a knowledge of Fletcher and Nicholson's *Greek Prose Exercises*.

French.

Grammar; dictation; translation from English into French; translation at sight from easy modern French prose.

German.

Grammar; dictation; translation from English into German; translation at sight from easy modern German prose.

Hebrew.

Essentials of Hebrew grammar; translation from English into Hebrew; outlines of ancient Semitic history and geography.

Translation into English of Genesis I-VI, XXXVII, XXXIX, XL, with grammatical analysis, parsing and vocabulary.

Ancient History.

General History of Greece to B.C. 336. (Oman's *History of Greece*).
General History of Rome to A.D. 476. (Pelham's *Outlines of Roman History*).

Mathematics.

ALGEBRA: Simple equations of one, two and three unknown quantities; quadratic equations of one and two unknown quantities; elementary treatment of variation, proportion, and progressions; interest forms and annuities.

EUCLID: Bks. IV, VI, and definitions of Bk. V; deductions.

PLANE TRIGONOMETRY: Trigonometrical ratios with their relations to each other; sines, etc., of the sum and difference of angles with deduced formulas; solution of triangles, expressions for the area of triangles; radii of circumscribed, inscribed and escribed circles.

Physics.

Elementary Physics (Mechanics, Hydrostatics and Heat).

Biology.

Elementary Biology.

Historical and Stratigraphical Geology, with excursions and Laboratory
 work ; Palaeontology of the Vertebrata ; Petrography, including Laboratory
 work with the microscope ; Advanced Mineralogy with Laboratory work ;
 Crystallography with practical work.

Students in the department are required to submit a Mineralogical, Petro-
 graphical and Palaeontological collection made during the previous holidays.

Courses of Instruction in Arts.

The courses of instruction in the University of Toronto and Victoria University are based upon the Curriculum, as above (pp. 30-80). The following statements regarding the scope and aim of the courses are added in cases in which such additional information is considered desirable:—

Classics.

The division of the examination papers given below has been recommended to the Senate by the Professors in Classics for insertion in the instructions to examiners.

The examination papers in the First year will be distributed as follows: 1. Greek and Latin Grammar. 2. Greek and Latin Sight Translation. 3. Greek Prose. 4. Latin Prose. 5. Greek and Roman History. 6. Homer and Plato (or Demosthenes). 7. Herodotus. 8. Virgil and Cicero (second Philippic). 9. Cicero (Cluentius Muraena and Sestius).

The examination papers in the Second year will be distributed as follows: 1. Greek and Latin Grammar. 2. Greek and Latin Sight Translation. 3. Greek Prose. 4. Latin Prose. 5. Greek and Roman History. 6. Euripides and Plato. 7. Sophocles, Aristophanes and Thucydides. 8. Livy. 9. Virgil and Horace.

The examination papers in the Third year will be distributed as follows: 1. Greek and Latin Grammar and Philology. 2. Greek and Latin Sight Translation. 3. Greek Prose. 4. Latin Prose. 5. Greek and Roman History. 6. Plato (with questions on Greek Philosophy up to and including Aristotle). 7. Aristotle (with questions on Greek Post-Aristotelian Philosophy. 8. Thucydides, Pindar and Sophocles. 9. Aristophanes and Demosthenes. 10. Roman Satire. 11. Virgil and Cicero. 12. Livy and Tacitus.

NOTE.—To prepare themselves for the papers on Philosophy, classical students are expected to attend the lectures on the History of Ancient Philosophy forming part of the Third year General course.

NOTE.—(10), (11), and (12) will include questions on the contents, style and literary history of the books. For (10) Martha's *Les Moralistes Romains* (Perse, Epictète, Juvenal) is recommended for reference.

The examination papers in the Fourth year will be distributed as follows: 1. Greek Sight Translation. 2. Latin Sight Translation. 3. Greek Prose. 4. Latin Prose. 5. Greek and Roman History. 6. Plato and Aristotle. 7. Thucydides (two-thirds of the paper) and Herodotus. 8. Æschylus, Homer and Theocritus. 9. Aristotle, Poetics, and Quintilian, Bk. X with the other books prescribed therewith (translation and questions). 10. Aristotle, Politics, IV, VIII, with the books prescribed therewith (*vide* paper (9) in the Greek course p. 56) or Descriptive and Comparative Syntax (*vide* paper (9) in the Latin course p. 56). 11. Lucretius and Virgil. 12. Sallust, Cicero's Letters, Tacitus, and the Monumentum Ancyranum. 13. Cicero (De Finibus and Academica). 14. Greek Philosophy up to and including Aristotle. 15. Post-Aristotelian Philosophy (Cicero's De Finibus and Academica; Zeller's Stoics, etc.).

NOTE.—In connection with (5) candidates are recommended to refer to Boissier's *L'Opposition sous les Césars*, and his *La Religion romaine*, Vol. I.

N.B.—The Roman method of pronouncing Latin is recommended:—*ā* as in *far*, *ā* the same sound but shorter; *ē* like *a* in *fate*, *ē* as in *set*; *ī* as in *machine*; *ī* as in *fit*; *ō* as in *note*; *ō* as in *obey*; *ū* as in *rude*; *ū* as in *full*; *j* (i.e., *i* consonant) like *y* in *year*; *v* = *w*; *c* and *g* always hard as in *can*, *go*; *s* always as in *this*, never as in *his*; *t* always as *t*, never as *sh*; *ai* as *ai* in *aisle*; *ae* either as *ai* in *aisle*, or as *ay* in *bay*; *au* as *ou* in *our*; *ei* as in *feint*; *eu* = *eh-oo*; *oe* as *oi* in *oil*; *ui* almost as *we*.

English.

A. General Course:—

FIRST AND SECOND YEARS.—An attempt is made to develop the understanding and appreciation of literature through the study of two plays of Shakespeare in the First year, and select poems of Milton in the Second year. Students are expected, in the case of Shakespeare, to master for themselves the explanatory notes of some good edition such as Rolfe's; the lectures are mainly devoted to exhibiting the truth and art of the poet's work.

Composition is taught in connection with the study of prose literature. The methods of the various forms of composition are investigated in selections from good writers. An original essay on a subject set by the instructor is required of each student on or before each of the following dates: October 31st, December 15th, February 1st, and March 15th. If any articles or books are read in preparation for such essays, the titles of these and the parts specially made

use of must be definitely specified in each essay. The marks assigned for these four essays count as term work at the final examination (80 marks out of 200).

THIRD AND FOURTH YEARS.—In these years the literature of a period is studied, and an attempt is made to enable the student not only to appreciate and understand the individual works selected, but also to grasp their relation to one another, and the way in which they give expression to the personality of the writer and the tendencies of the time.

B. Honor Course :—

The work prescribed in the General course is also incumbent upon Honor students, but a fuller and more advanced knowledge is expected than in the case of General students. The marks assigned for compositions during the term will count as one paper at the annual examinations.

The special Honor work is intended to broaden the knowledge and deepen the insight which the student may acquire in the General work. With this view standard prose essays are prescribed in both the First and Second years. In the First Year an additional play of Shakespeare is read; in the Second, select works of Chaucer, and the student is made acquainted with the general principles of English versification. In the Third Year, besides additional work in the period prescribed in the General course, the study of Old English is begun. In the Fourth year this last-mentioned work is continued, and a course on Historical Grammar is given. In literature the development of the English drama is the subject for Honor work. The student is expected to make a minute study of certain typical works, and to extend his acquaintance with the literature of the time by a careful reading of other prescribed books. The class work is devoted partly to a special examination of the prescribed selections, partly to an exemplification by lectures of the general characteristics of the various periods.

Books recommended: Rolfe's or the Clarendon Press Editions of Shakespeare's plays; Representative Essays (Putnam's, N.Y.) contain the essays prescribed in the First year; Macmillan's Globe Library contains good one volume editions of the poetical works of Spenser, Shakespeare, Milton, Dryden, \$1.75 each. Very cheap texts of Bacon's Advancement and Milton's Areopagitica in Cassell's National Library (6d. apiece), of Addison's Cato in Evingham and Maynard's English Classics (12 cents), of Marlowe's Tamburlaine in Englische Sprach- und Literatur Denkmale (Henninger, Heilbronn). Annotated editions of the poems of Milton, prescribed for Second year, by Rolfe (Houghton & Mifflin, 75 cents); of Bacon's Advancement, Bk. I, in Macmillan's English Classics, 40 cents; of Faerie Queen, Bk. I in Clar. Press Series, 60 cents, or Macmillan's English Classics, 50 cents; of A'salom and Achitophel in Dryden's Select Poems (Clar. Press, 90 cents), or in Macmillan's English Classics, 40 cents; Friar Bacon, and Friar Bungay, and Edward II, in Clar. Press Series; Every Man in His Humour, in Longman's English Classics, 75 cents. Dowden's Shakespeare Primer, 30 cents; Genung's Barris, or Hart's Rhetoric.

French.*A. General Course:—*

In all the years special stress will be laid on grammar, pronunciation and translation into French, commencing in the First year with simple exercises in each of these subjects, and continuing with those of a more difficult character to the end of the Fourth year. In the First and Second years, particular attention will also be paid to careful translation from French into English; a short text in modern French will be read in class in each of these years. In the Third year the prose texts, and in the Fourth year the poetical and dramatic texts, belonging to various periods, which have been prescribed by the University, will be read and will be illustrated by such critical and historical lectures as may be necessary for their proper understanding and appreciation.

B. Honor Course:—

As in the General course, special stress will be laid, in all the years, on grammar, pronunciation and translation into French. In addition to these subjects there will, in the Honor course, be regular and continuous exercises in conversation and composition in French during the Second, Third and Fourth years. The study of literature will begin in the Second year, the period for this year being the Seventeenth century; the Eighteenth century will be studied in the Third year, and the Nineteenth century in the Fourth year. In each year appropriate critical and historical lectures will be given for the purpose of aiding students to thoroughly understand and appreciate the works, belonging to each period, which are prescribed by the University. During the Third and Fourth years, students will be expected to read systematically some good grammar of the French language. In these two years, also, lectures will be given on the History of the French language, the lectures to be illustrated in the Third year by a selection from the Chanson de Roland. Students of the Fourth year will be encouraged to undertake the independent study of topics in connection with the history of the language and literature.

German.

The courses in this subject comprise (1) the study of the literary language of classical authors of the 18th and 19th centuries; (2) practice in writing and speaking German as illustrative of and a means to the above-mentioned end; (3) the history of German literature; and (4) for the Honor courses the elements of the history of the language.

A. General Course:—

Practice in dictation will be regularly given, and also exercises in translation at sight.

Practice in translation into German will be based on Horning's Book of Exercises.

(b) Students of the Third and Fourth years will read carefully the texts prescribed, and will have more advanced work in grammar, composition and sight translation. An outline of the literature prescribed will be given in lectures.

B. Honor Course:—

(a) Exercises in grammar and sight translation will be regularly given, and exercises in translation into German based on Horning's Book of Exercises and Harris' German Composition.

(b) Similar exercises of rather more advanced character will be given in the Second year. Students will also read carefully the texts prescribed.

In both the First and Second years an outline of literature as prescribed will be given in lectures.

(c) Honor students of the Third and Fourth years are expected to be familiar with the works of the modern authors prescribed, and lectures on the literature of the respective periods will be given, with illustrative references to the authors read.

In both Third and Fourth years exercises in sight translation, dictation, grammar and translation into German will receive much attention. Original essays in German will be required from time to time. Practice will also be given in conversation. Students will provide themselves with the following book for translation into German: *Humour, Wit and Wisdom* (Routledge's Pocket Library).

(d) In the Fourth year an outline of the history of the language will be given, according to a syllabus to be agreed upon by the instructors. The elements of Middle High German grammar and literature will be studied with special reference to the works prescribed.

Italian and Spanish.

The courses in these subjects extend over four years, and are arranged with the object of giving the student, (1) a knowledge of the language of the present time; (2) an appreciation of some of the more important masterpieces of the literature proportionate to his knowledge of the language; (3) a knowledge of the historical development of the literature; and (4) an elementary acquaintance with the historical phonology.

FIRST YEAR ITALIAN.—Simple narratives are used as a basis for instruction in grammar, and for the acquisition of vocabulary and idiom. The understanding of Italian when read or spoken, and the expression of thought directly in Italian are regarded as fundamental, and hence oral practice forms a large part of the work throughout the year. Phonetic transcription is employed as a means of giving definiteness to the knowledge of pronunciation

and orthography. Grandgent's Italian Grammar, (Heath & Co.) is used as a book of reference.

FIRST YEAR SPANISH.—The course in Spanish is parallel in scope, object and method with that in Italian. H. Butler Clarke's First Spanish Reader and Writer (London, Swan Sonnenschein & Co.) is used as a basis for practice in the language, and for instruction in grammar, vocabulary and idiom. Manning's Practical Spanish Grammar (Holt & Co.) is used as a book of reference.

SECOND YEAR ITALIAN.—The study of a modern story, Salvatore Farina's *Il Signor Io*, is undertaken, as a basis for oral practice in the comprehension of Italian and for exercise in the reproduction of the substance of the text in Italian form. Constant practice is also given in phonetic transcription and dictation, and in the understanding of unseen passages when read. Composition in Italian on familiar topics is required. Grandgent's Italian Composition (Heath & Co.) is used for additional work in composition and for more systematic instruction in the rules of construction. In the work of the Second year the use of a dictionary entirely in Italian is strongly recommended. Petrocchi's *Novo Dizionario Scolastico* (Milano, Fratelli Treves, price 7 francs) is the most suitable for this purpose.

SECOND YEAR SPANISH.—The course in Spanish is parallel in scope, object and method with that of Second year Italian. Nombela's *La Riqueza del Pobre* is used as a reading book. Exercises in phonetic transcription, dictation, composition and sight translation similar to those in Italian are required. The use of a dictionary entirely in Spanish is strongly recommended. The *Nuevo diccionario portatil de la Lengua castellana* (Garnier, Paris, price 7 francs) is the most suitable for this purpose.

THIRD YEAR ITALIAN.—Attention is given principally to the systematic study of the history of literature from the origins up to the beginnings of the Romantic Epic, and to the comprehension and interpretation of illustrative specimens of literature. Lectures on the subject are given, and ten cantos of Dante's *Divina Commedia* are read, together with copious extracts from Petrarca and Boccaccio, and shorter extracts from a number of writers of subordinate importance. The work in literature is largely oral, the objective point being the appreciation of the literature as far as possible without the intermediary aid of English translation. Students are required to provide themselves with Dante's *Divina Commedia* (ed. Fraticelli, Firenze, Barbèra, recommended), and with Torraca's *Manuale della Letteratura Italiana* (3rd ed. Firenze, Sansoni, 1895). In the work of the Third year the use of a dictionary entirely in Italian is strongly recommended. Petrocchi's *Novo Dizionario Scolastico* (Milano, Fratelli Treves, price 7 francs) is the most suitable for this purpose.

THIRD YEAR SPANISH.—This course will not be given in the Session of 1896-97. Students of the Third year will take the work prescribed above for the Second year, and the course of instruction also will be the same.

FOURTH YEAR ITALIAN.—The course is practically a continuation of that of the Third year, and similar methods are employed. Lectures are given on the history of literature from Ariosto, inclusive, to the present time. Considerable

portions of Ariosto and Tasso are read, together with numerous illustrative extracts from writers of subordinate importance. The elements of historical phonology are briefly presented, and further instruction in this subject is given incidentally in connection with the readings in literature. Students are required to provide themselves with Vols. II and III of Torraca's *Manuale della Letteratura Italiana* (3rd edition, Firenze, Sansoni, 1895). The use of a dictionary entirely in Italian is strongly recommended. Petrocchi's *Novo Dizionario Scolastico* (Milano, Fratelli Treves, price 7 francs) is the most suitable for this purpose.

FOURTH YEAR SPANISH.—The course in Spanish is parallel in scope, object and method with that in Italian of Fourth year. The period of literary history covered is that extending from the beginning of the 17th century to the present time, with the addition of the history of the drama from its origin. Calderon's *Principe Constante* is read, together with numerous illustrative extracts from writers of subordinate importance. The elements of historical phonology are briefly presented, and further instruction in this subject is given incidentally in connection with the readings in literature. Students are required to provide themselves with a copy of *El Principe Constante* (Vol. I of Krenkel's *Klassische Bühnendichtungen der Spanier*, Leipzig, Barth, recommended), with the *Curso de Literatura de Garcia Al-Deguer y Giner de los Rios* (Madrid, Administration de la Biblioteca Andaluza, 1889), and with Keller's *Altspanisches Lesebuch* (Leipzig, Brockhaus). The use of a dictionary entirely in Spanish is strongly recommended. The *Nuevo Diccionario portatil de la Lengua castellana* (Paris, Garnier, price 7 francs) is the most suitable for this purpose.

Oriental Literature.

The Oriental course has the main object of affording an introduction to the study of the Semitic languages and literature and of Semitic history. On account of the paramount importance of the literature of ancient Israel, the Hebrew language and the Old Testament in the original are made very prominent throughout the course, being taught in all the years and occupying almost as much time as all the other languages taken together. The aim of the course, more definitely, is a twofold one: to give those interested in the Bible a competent acquaintance with the Hebrew text, and to furnish all who desire a liberal education an opportunity of becoming acquainted with the literature and history of the Semites, who divide with the Indo-European race the controlling moral and intellectual influence of mankind. These ends are kept in view in the General as well as in the Honor lectures.

For purely linguistic study the General course is confined to Hebrew, and is so arranged that, with an average of two or three lectures a week throughout the four years, the student may gain some familiarity with the different kinds of literature in the Old Testament: narrative, historical, prophetic and poeti-

cal. The Honor course secures in its Hebrew department an intimate familiarity with the language and literary features of the Old Testament in all its divisions, and at the same time introduces the learner to the other important languages of the Semitic family. In the Second year of the curriculum, which begins the Honor course, the Aramaic is taken up in its two dialects, East and West Aramaic; in the Third year Arabic is the subject of study; and in the Fourth year the student is made acquainted with the Assyrian in the original cuneiform texts. In all the years care is taken not only to impart an exact knowledge of linguistic forms, but also to convey an accurate idea of the genius of the Semitic race and of the several peoples among them who in succession helped materially in the education of the world.

Thus while Philology is duly studied for its own sake and as an indispensable instrument of research, the whole tendency of the discipline is to make it subservient to the higher ends of literary and historical culture. The Oriental Seminary Room is well provided with maps and other illustrative material; and the library, although so lately founded, has already one of the best selections of Semitic literature, including inscriptional works, to be found in America.

History.

In the lectures the more important historical movements will be discussed, and attention will be directed to the causes of social and political changes rather than to events. Special emphasis will be laid upon the history of England, the United States and Canada. Honor students in the departments of History and of English and History will be required to write the essays required by the curriculum of the Third and Fourth years. With Honor students in History in the Departments of Political Science and Modern Languages this work is optional.

A. General Course:—

The General course covers the history of Ancient Greece and Rome in outline in the First year, the history of Medieval Europe in outline in the Second year, and modern European and American history in outline in the Third year. In the Fourth year European and American history since 1763 is studied over again in greater detail, and the course closes with an inquiry into the possibilities of a Philosophy of History. The following list of books has been made as brief as possible, and represents a minimum standard of reading:—

FIRST YEAR: Oman, History of Greece; Pelham, Outlines of Roman History.

SECOND YEAR: Duruy, Middle Ages; Green or Gardiner on England.

THIRD YEAR : Lodge, *Modern Europe*; Fiske, *Discovery of America*, chapters II, III, IV, V, XII; Goldwin Smith, *United States*; Green or Gardiner on *England*; Greswell, *Canada*.

FOURTH YEAR : In the General course of the Fourth year the work is the same as that of the Honor course in Modern History, omitting the period selected for special study. Fuller information than in previous years will be expected. The books by the following authors set forth fully in the Fourth year Honor course should be read:—On *Modern History*: de Tocqueville, Morse Stephens, Fyfe, Mueller, Hart, Woodrow Wilson, Green or Gardiner, Bourinot, Greswell. On the *Philosophy of History*: Morris's Hegel. The *Philosophy of History* is so closely associated with anthropological and ethnological questions that students are recommended to take also the course of study prescribed in *Ethnology*.

B. Honor Course:—

Honor work in History is done in five of the Honor departments of the curriculum. In the Department of History the whole course of study on the curriculum in ancient, mediæval, and modern history is required during the four years, and this study is combined with that of political economy and constitutional law.* In the Department of English and History the study of mediæval and modern history is combined with that of literature, both English and classical; in the Department of Political Science, history is combined with economic and legal study, and in the Department of Classics with Greek and Latin literature. In the Department of Modern Languages History is allowed as an option for Italian or Spanish in the Third year, and for Old English or Italian or Spanish in the Fourth year. Candidates desiring to qualify in the Education Department as specialists in English and History are required to take the History option. In the Honor Departments of History and of English and History, an essay is required in both the Third and Fourth years. These essays must be based upon the study of some of the original authorities for a selected short period, and in judging them regard will be had to both their literary and historical merits.

The following list of works has been made as brief as possible, and represents a minimum standard of reading for the periods covered. The list applies in its entirety only to students in the Department of History. Students taking Honor History in connection with other departments can determine by reference to the curriculum what portions of the list apply to their work. For Constitutional History a list will be found in the Department of Political Science.

FIRST YEAR : Oman, *History of Greece*; Pelham, *Outlines of Roman History*.

SECOND YEAR : (a) *Ancient History*: Oman's *History of Greece*; the portions of Grote, Mommsen and Livy prescribed in the curriculum; Fustel de Coulanges, *La Cité Antique* (English translation, "The Ancient City").

(b) *Mediæval History*: Hodgkin, *The Dynasty of Theodosius*; Bryce, *Holy Roman Empire* (to the Fall of the Hohenstaufen); Duruy, *Middle Ages*; Green or Gardiner on *England*.

THIRD YEAR: (a) *Ancient History*: Oman, History of Greece; the portions of Grote, Mommsen and Livy prescribed in the curriculum.

(b) *Modern History*: Bryce, Holy Roman Empire (from the Fall of the Hohenstaufen); Lodge, Modern Europe; Symonds, Short History of the Renaissance in Italy; Hassall, Louis XIV.; Seeley, Expansion of England; Fiske, Discovery of America, chapters II, III, IV, V, XII; Thwaites, The Colonies, 1492-1750 (Epochs of American History); Parkman, The Old Régime in Canada; Greswell, Canada; Green or Gardiner on England.

FOURTH YEAR: (a) *Ancient History*: The portions of Thucydides, Herodotus, Grote, Cicero, Mommsen and Merivale prescribed in the curriculum; Boissier, l'Opposition sous les Césars; do., La Religion Romaine; Bryce, Holy Roman Empire.

(b) *Modern History*: De Tocqueville, France Before the Revolution; Morse Stephens, European History, 1789-1815; Fyffe, Modern Europe, Vols. II and III; Mueller, Political History of Recent Times with special reference to Germany; Hart, Formation of the Union, 1750-1829; Woodrow Wilson, Division and Reunion, 1829-1889 (Epochs of American History); Green or Gardiner on England; Bourinot, Canadian Constitutional History; Greswell, Canada; Morris, Exposition of Hegel's Philosophy of History (Griggs' Philosophical Classics).

(c) *Ethnology*: Darwin, Descent of Man, Part I; Huxley, Man's Place in Nature; Tylor, Anthropology; Fiske, Discovery of America, chapters I, VIII, IX; Latham, Ethnology of Europe. The lectures will be illustrated by maps, skulls, primitive implements, etc., and will cover later enquiries than those included in the above list of books.

Political Science.

A. General Course:—

Lectures will be given as follows to those students who require to take Political Science in the General course.

THIRD YEAR.—*Constitutional History*. The elements of English Constitutional History. Book for reference: Fielden's Constitutional History; Henderson's Historical Documents of the Middle Ages; Taswell-Langmead, Constitutional History of England; Bagehot, The English Constitution; Dicey, the Law of the Constitution.

FOURTH YEAR.—*The Elements of Political Economy*. The lectures, textbooks and examinations are the same as those prescribed for students taking the Second year Honor course. See below.

Canadian Constitutional History. See synopsis of this subject in Honor course below.

B. Honor Course:—

The Honor course in Political Science and the related instruction in languages, mathematics, natural science, history and philosophy are intended to afford a means of preparation for those who desire to enter the professions of law, the ministry, journalism or teaching. The special subjects of study are economic history and theory, constitutional history, international and constitutional law, jurisprudence, history and philosophy with special reference to the growth of political ideas. The Honor course begins in the Second year in Arts and continues for three years.

Prior to entrance into the Honor course in Political Science, candidates must have passed the Honor examination of the First year in one or other of the following subjects: Latin; Greek; any two of the three languages, English, French, German.

SECOND YEAR.—*Economics.* The lectures give a general introduction to the study of modern political economy. The chief text-book is Marshall's Principles of the Economics of Industry, Vol. I. The following works will also be found useful: Gide's Political Economy; Andrew's Institutes of Economics; Smart's Introduction to the Theory of Value; Devay's Political Economy; Ely's Introduction to Political Economy; Mavor's Economic History, Tables and Diagrams.

English Constitutional History to Magna Charta. The chief topics are the Hundred and County Courts, the Witenagemot, the Feudal System. The principal constitutional documents are required to be studied. A list of these documents is furnished to students. For reference, selected portions of Stubbs' Constitutional History, to be designated by the lecturer; Fielden's Constitutional History; Henderson's Historical Documents of the Middle Ages; Introduction to Stubbs' Select Charters; Freeman's Growth of the English Constitution; Bagehot's English Constitution; Wakeman & Hassall's Constitutional Essays (excepting Essay 1); Taswell-Langnead's English Constitutional History.

Roman History to 266 B. C. Mommsen, Bks. I and II, and Fustel de Coulanges' La Cité Antique. See Department of Classics.

Medieval History to 1250. See Department of History.

Mathematics. Special class in the elements of the Infinitesimal Calculus with Elements of Analytical Geometry.

THIRD YEAR.—*History and Criticism of Economic Theory.* The course of lectures will present a systematic account of the development of the history of economic history and a criticism of current economic theories of value, interest, rent, wages and international trade. The chief text-book for the work of the Michaelmas Term is Ingram's History of Political Economy, and for the work of the Easter Term, Marshall's Principles of Economics, Vol. I. Students are also expected to study Böhm-Bawerk's Capital and Interest, and The Positive Theory of Capital (transl. Smart); Wieser's Natural Value; Smart's

Introduction to the Theory of Value. The following books will also be useful: Cossa's Introduction to the Study of Political Economy; Bonar's Philosophy and Political Economy; Nicholson's Principles of Economics; Keynes' Scope and Method of Political Economy, chaps. 1-3, 7, 9. Bastable's Theory of International Trade, and The Commerce of Nations; Adam Smith's Glasgow Lectures, ed. Cannan; Adam Smith's Wealth of Nations, ed. Nicholson; Ricardo's Works, ed. Gonner.

Modern History, from 1250 to 1763. See Department of History.

English Constitutional History from Magna Charta. The lectures are in continuation of those of the Second year. They deal with the Growth of Parliament, and of Responsible Government. The books recommended are the same as those in the Second year.

English Constitutional Law. The lectures on this subject comprise a discussion of the Royal Prerogatives; the constitution and functions of the two Houses of Parliament, the constitution of the Executive Government; the rise of the Cabinet and its relation to the Crown and the two Houses of Parliament; the military forces of the Crown, the constitution of the judicial department of government and its relation to the Crown and to Parliament, and the rights and obligations of the subject, the leading cases, the constitutional statutes, and the conventions of the constitution are discussed. For reference: Dicey's Law of the Constitution; Hearn's Government of England; Traill's Central Government; Boutmy's Studies in Constitutional Law, Part I; Broom's Constitutional Law; Anson's Law and Custom of the Constitution.

History of English Law. The history of the English law from the Roman Conquest until the Norman Conquest; the Roman occupation; the Saxon invasions; the laws of the Confeffor; the change effected in the law, especially of real property, by the Conqueror and his successors,—the introduction or extension of the feudal system; the difference between that system on the continent and in England; the creation of new tenures; the Great Charter and its frequent renewals, as showing the condition of the people, and the evils to be remedied; the great changes effected by the legislation of Edward I and Edward III; the creation of entailed estates; the struggle to obtain power to alienate them; legislation to restrict alienations in mortmain; the evasion of the law; the law giving power to devise lands, and the legislation of Elizabeth to prevent frauds upon creditors and purchasers; the abolition of feudal tenures by Charles II. The efforts in the reign of George III to ameliorate the criminal law, and the English Statutes after 1792 that have their counterpart in our Colonial legislation are discussed and explained. For reference: Reeve's History of English Law; Pollock and Maitland's History of English Law; Hale's History of English Law; Blackstone's Commentaries; a collection of English Statutes, and the Revised Statutes of Canada, and of Ontario.

History of Roman Law. The lectures on Roman Private Law comprise a sketch of the history of the law from the time of the decemviri to the death of Justinian, giving an account of the growth of the unwritten law, of judicial legislation to the suppression of the formulary system by Diocletian,

and from that time to the death of Justinian, and treating of the statutory legislation during the Republic and under the Empire, and of the several attempts to form a code, finally terminated by the work of Justinian. The larger number of lectures is devoted to the substance of Roman Law during the reign of Justinian. The law of testamentary succession, the various kinds of wills, the duties of the heir, the gift of legacies, and the history of trust gifts and codicils are explained. The remedial processes for the protection and enforcement of rights are traced from the *legis actiones*, the changes effected by the formulary system, the summary jurisdiction of the prætor, the abolition of the formulary system, terminating in the *extraordinaria cognitio*. The series is closed by a discussion of the law as to specific performance of contracts; of the law as to frauds upon creditors; and an examination of the influence of Christianity upon Roman legislation. For reference: Muirhead's Historical Introduction to the Private Law of Rome; Sanders' Justinian; Institutes of Gaius, translated by Muirhead. The Digest, the Code, and the Novels should be consulted.

Honor Ethics. See Department of Philosophy, Third year.

FOURTH YEAR.—*Economic History.* The lectures will trace economic history from the early middle ages down to modern times, with special reference to England. Books recommended: Ashley's Economic History, Parts I, II; Toynbee's The Industrial Revolution; Seebohm's English Village Community; Vinogradoff's Villenage in England; Gomme, The Village Community; Gross' Guild Merchant, chaps. 1-4; Rogers' Six Centuries of Work and Wages, chaps. 1-6, 8-10; Cunningham's Growth of English Industry and Commerce (ed. 1890); Marshall's Principles, Bk. I, chaps. 2, 3; Jevons' State in Relation to Labour, chaps. 3, 4, 6, 7; Fowle's Poor Law, chaps. 1, 3, 4; D. A. Wells' Recent Economic Changes; Ely's Labour Movement in America, chaps. 3, 4; Webb's History of Trade Unionism.

Public Finance. The lectures will deal with National and Local Finance, and with important questions of modern economic policy. They will discuss, among other topics: the History of Public Finance and of Financial Science; the Currency and Banking Systems of Great Britain, Canada and the United States; Public Debts and the Policy of National and Local Governments in relation to them; Methods of Extinction and Conversion of Debt; Sinking Funds; Public Domain—Lands, Forests, Minerals; Railroad Policy, its history in Europe and America; Principles of Taxation; Incidence of Taxation; Tariff Policy—outline of its history in Great Britain, Canada and the United States; Local Taxation in Canada and the United States. Books recommended: Bastable's Public Finance; Bastable's The Theory of International Trade; Seligman's The Incidence of Taxation; Seligman's Essays in Finance; Elliott's The Tariff Controversy in the United States; Cossa's Taxation; Dunbar's Theory and History of Banking; Walker's Money, Trade and Industry; Adams' Public Debts; Ely's Taxation; Hadley's Railroad Transportation; Mavor's English Railway Rates; Bagshot's Lombard Street; Jevons' Money; Leroy-Beaulieu's Science des Finances, Livre II, chaps. 4,

5, 9, 10; Giffen's Essays in Finance, 1st series, IX; Taussig's Tariff History of United States.

Modern History from 1763 to 1873. See Department of History.

Political Philosophy. History and Criticism of Political Theories. The following are recommended for study: Sidgwick's Elements of Politics; Pollock's History of the Science of Politics; Bonar's Philosophy and Political Economy; Ritchie's Principles of State Interference; Seeley's Introduction to Political Science; Mackenzie's Introduction to Social Philosophy.

General Jurisprudence. In lecturing on this subject, the attention of the student is directed to the definition and analysis of *law* and of *rights*, to the sources of law, to the classification of rights, to the consideration of antecedent rights *in rem* and *in personam*, to remedial rights, to adjective private law, to the nature of public law and its various divisions, to international law, and to the application of law. For reference: Holland's Elements of Jurisprudence; Austin's Elements of Jurisprudence (Campbell's Students' edition); Maine's Ancient Law, and Early History of Institutions (Lectures XII, XIII).

Public International Law. Besides the elementary principles of International Law, the lectures comprise a discussion of the growth of International Law, its sources, and the characteristics which distinguish it from international morality. Also a discussion of the doctrine of non-intervention, of the Monroe Doctrine, and of the various treaties and conventions relating to Canada. Controversies raised by the Civil War in the United States. The Geneva Arbitration and the rights of neutrals. For reference: Wheaton's International Law (ed. Boyd); Hall's International Law, or Kent's International Law (ed. Abdy).

General Jurisprudence and Public International Law together are alternative to the Honor History of Philosophy of the Fourth year, for which see Department of Philosophy.

Colonial Constitutional Law. The lectures on this subject trace the sources of Colonial Constitutional law; the prerogatives of the Crown in the constitution of colonial governments; different forms of government; colonies by occupancy; colonies by cession and conquest; powers of Parliament in respect to the colonies; conventional limitations arising from local self-government. For reference: Creasy's Constitutions of the British Empire; Forsyth's Cases and Opinions on Constitutional Law; Todd's Parliamentary Government in the Colonies, as far as page 318; Tarring's Law in Relation to the Colonies.

Federal Constitutional Law. The lectures deal with the origin of the United States Constitution and the relation of the federal government to the States; the federal institutions, legislative and executive and judicial, and the leading decisions of the Courts in reference to the same. The Constitution in Canada; rules of interpretation applied by the Supreme Court of the United States; rules of interpretation applied by the Judicial Committee in construing the Constitution in Canada. For reference: Houston's Constitutional Documents of Canada; Todd's Parliamentary Government in the Colonies, page 318 to the end of the volume; Clement's Constitution of Canada or Munro's Consti-

Canadian Constitutional History. Character of French Settlement; Nature of European Claims to Territory; Government by Trading Companies; Growth of Rule by Colonial Policy as distinguished from Trading Company Policy; Establishment of Provincial Organization in 1663; the Sovereign Council; Growth of the Superior Council; Local Government; Land Tenures; Church and State; the Conquest; Treaty of Paris; English Colonial Policy; Struggle for Responsible Government; Growth of Parties in Upper and Lower Canada; Lord Durham's Report; Union Act; Quebec Conference; Confederation; Relation of Dominion to Great Britain; Relation of Provinces to Dominion; Comparison of B. N. A. Act with Constitutions of United States and of England; Growth of Local Government in Ontario; A list of the principal constitutional documents which are required to be studied will be furnished to students. For reference: Bourinot's Constitutional History of Canada; Ashley's Earlier Constitutional History of Canada; Parkman's Old Régime; Munro's Constitution of Canada; Story's Introduction to Constitution of the United States; Houston's Canadian Constitutional Documents; Christie's History of Lower Canada; Kingsford's History of Canada; McEvoy's The Ontario Township (University of Toronto Studies in Political Science, 1st series, No. 1).

Term Work in Honors:—The following term work is required in subjects to be prescribed by the Professor of Political Economy and Constitutional History.

SECOND YEAR: Two essays in each term, in all four essays; and also a Term examination to be held before or shortly after Christmas vacation.

THIRD YEAR: Two essays in each term, in all four essays; and also a Term examination to be held before or shortly after Christmas vacation.

FOURTH YEAR: Two essays in each term, in all four essays; and also a Term examination to be held before or shortly after Christmas vacation.

In each year such term work and examination count for Honors in the annual examination.

The Departmental Library in Economics is open under certain conditions to all Honor students in the Department of Political Science. Tutorial classes in Economics and in Constitutional History are held several times each week during the Michaelmas and Easter terms. Facilities for research are afforded to senior students and also to graduates who desire to prosecute the study of the subject.

Philosophy.

The work of this Department is pursued during the Second, Third and Fourth undergraduate years. The course which embraces Logic, Psychology, Metaphysics, Ethics and History of Philosophy, affords a training to those who intend entering the professions of the Ministry, Teaching or Law. In every case the work in Philosophy of the General course is to be taken by Honor students, and will be counted along with the Honor work in determining their standing.

Logic.

A. General Course:—

SECOND YEAR.—A course of lectures is given dealing with the scope and method of Logic; the nature of Deductive and Inductive Reasoning, and their relation to each other; the Definition of Terms; the Laws of Thought; the Forms of the Judgment and their mutual relation; the Syllogism; the Canons and Methods of Inductive inquiry; the detection and rectification of ambiguities in reasoning and logical fallacies. Exercises in logical problems are given from time to time and corrected. Books recommended: Jevons, *Elementary Lessons in Logic*; Fowler, *Inductive Logic*; Noah K. Davis, *Theory of Thought*.

B. Honor Course:—

SECOND YEAR.—A course is given in the study and criticism of Mill's System of Logic, the exposition of scientific methods, and the discussion of the philosophical presuppositions underlying theories of Induction. The ground covered in the lectures of the General course will not be taken up here, but will be presupposed. Books recommended: Mill, *System of Logic*; Bradley, *Principles of Logic*; Venn, *Empirical Logic*; Hyslop, *The Elements of Logic*; Jevons, *Principles of Science*; Jevons, *Studies in Logic*.

Psychology.

A. General Course:—

SECOND YEAR.—The lectures deal, in a general way, with the phenomena of consciousness, their description, correlation and classification; covering, in outline, the whole field of psychic phenomena. The course is designed to introduce the subject, to familiarize the student with fundamental principles, and lead him to observe his own mental states. Term work is required. Books recommended: Wundt, *Grundriss der Psychologie* (English translation); Ladd,

Primer of Psychology; Höffding, Outlines of Psychology; Baldwin, Elements of Psychology.

B. Honor Course:—

SECOND YEAR.—An introductory course on experimental Psychology is given, dealing with the psychological methods and their application, and with the Psychology of the lower senses (taste, smell, the dermal and kinæsthetic senses). Books recommended: Certain chapters of Ladd's Elements of Psychology, and Wundt's Human and Animal Psychology (English translation).

THIRD YEAR.—(a) General: A course of lectures is given, dealing more carefully and critically than is possible in the General course, with some of the special problems of Psychology, such as Space Perception, Nativism and Empiricism, Theories of Emotion, Attention, Relation of Motive to Volition, Liberty and Necessity, Relation of Psychology to Ethics and Metaphysics, Hypnotism. No text-books are prescribed or followed, but portions of the following works may be selected for special study in the class: Bain, The Senses and the Intellect, Emotions and Will; Baldwin, Handbook of Psychology, Mental Development in the Child and the Race; James, Psychology; Ladd, Psychology, Descriptive and Explanatory; Sully, The Human Mind; Tracy, The Psychology of Childhood; Wundt, Human and Animal Psychology.

(b) Experimental: The lectures on experimental Psychology (three hours per week) deal with the chief problems of contemporary Psychology, in so far as they are accessible to exact experiment, special attention being devoted to the Psychology of the higher senses (Psychological Optics and Acoustics) and to the time-relations of Mental Phenomena. The practical work (one to two hours per week) in the laboratory is designed to afford the student an opportunity to become familiar with experimental methods. There is no text-book for this course; but as recommended books may be mentioned: Wundt, Physiologische Psychologie (4th ed.); Ladd, Elements of Psychology; Wundt, Human and Animal Psychology (English Translation by Titchener and Creighton); Külpe, Grundriss der Psychologie; Ribot, German Psychology of To-day; Sanford, Laboratory Course.

FOURTH YEAR.—The Fourth Year consists partly of a supplementary series of lectures on metaphysical problems in their relations to Psychology, and partly of experimental work in the laboratory. The lectures are devoted to the criticism of Materialism and to a presentation of the philosophical views of Wundt in outline. In the Laboratory, the students work in groups under the guidance of the Director of the Laboratory, or his Assistant, upon special experimental investigations. The subjects of these investigations, which are at the same time intended to lead to useful results and to make the students familiar with the nature and difficulties of exact research, are arranged at the beginning of the term. The students are required to acquaint themselves with the literature relating to their special subject, to keep a record of their investigations, and to hand in at the end of the Easter term a detailed statement of results obtained, and of their significance.

Graduates have full opportunity for independent investigations in the Laboratory.

Metaphysics.*Honor Course :—*

SECOND YEAR: Theory of Knowledge—Honor students are required to read Locke's *Essay on the Human Understanding*; Berkeley's *Principles of Knowledge*; and Hume's *Treatise on Human Nature*, Book I. They are expected to write expository summaries of these works, and to discuss and criticize them in the class. It is the aim of the lectures to assist the student in making the transition from observation and analysis of mental phenomena to the reflective consideration of the underlying philosophical principles. Books recommended: Fraser, Locke and Berkeley (Blackwood's Series); Green, *Introduction to Hume*, *Prolegomena to Ethics* Bk. I; Aikins, *The Philosophy of Hume*; Ward, *Psychology* in *Encyclopædia Britannica*, 9th ed.; Dewey, *Psychology*.

FOURTH YEAR.—Theories of Knowledge and Being: Several courses are given. Honor student's are required to read Kant's *Prolegomena*; Lotze's *Metaphysic*; Des Cartes, *Meditations and Method*; Spinoza, *Ethic*; Spencer, *First Principles*. Of these the first two are carefully studied in the class; the others are made the basis of special exposition in lectures; the principles and methods of philosophical speculation; the correlation of different disciplines; and the interrelation of Logic, Psychology, Metaphysics and Ethics, are carefully considered. A seminary is held for the study of advanced Metaphysical problems.

In the seminaries papers are read and discussed by the members. Everything is done to encourage independent thinking on the part of the students. Graduates may become members of any of the seminaries in the Department of Philosophy by arrangement with the professor in charge.

Ethics.*A. General Course :—*

THIRD YEAR.—(a) Theory of Obligation: Lectures on the scope and methods of Ethics, the relation of Moral Philosophy to Natural Science, The Moral Ideal, Personality, Instinct, Desire, Motive, Volition, Freedom of the Will, Conscience, Duty, Responsibility, Sensational Theories, Intuitional Theories, Transcendental Theories, Relation of Ethics to Theoretical Philosophy, Political Economy, and Religion. Essays will be written by members of the class, and examinations held during the term. Books recommended: Hyslop, Seth, Muirhead, Calderwood, Pt. I., Chaps. I-IV; Green, *Prolegomena to Ethics*, Book II. (b) History of Ethics: The lectures cover the ground from Hobbes to the present time. Attention is given to fundamental standpoints rather than to details of doctrine. The interrelation of the various historical phases of Ethical thought are considered, the development of cardinal doctrines followed, and the chief representatives of the leading schools expounded. Books recommended: Sidgwick, *History of Ethics*; Bain, *Moral Science*; Watson, *Hedonistic Theories*.

B. Honor Course:—

THIRD YEAR.—(a) *Theory of Ethics*: The students in this course will make, under the guidance of the professor in charge, a special and careful study of Green's Prolegomena to Ethics. Lectures will be given to assist in the exposition, explanation, and estimation, of Green's position. (b) *History of Ethics*: This course is supplemental to, and given in connection with, the General course on the History of Ethics. The aim of the lectures is to set in a clear light the real significance of the problems occupying the attention of moralists, and to estimate the solutions that have been offered for these problems. Students are required to read Martineau, *Types of Ethical Theory*. The following are also recommended: Butler's Sermons; Mill, *Utilitarianism*; Spencer, *Principles of Morality*; Janet, *Theory of Morals*; Sidgwick, *Methods of Ethics*; Jodl, *Geschichte der Ethik*; Bowne, *Principles of Ethics*; D'Arcy, *Short Study of Ethics*. (c) *Applied Ethics*: The class will meet once a week for the reading and discussion of papers written by members of the class. In these essays an attempt will be made to apply ethical principles to the investigation of social problems, such as Temperance, Charity, Socialism, etc. Books recommended: Spencer, *Man vs. State*; Ritchie, *Principles of State Interference*; T. H. Green, *Lectures on Political Obligation*, A. M. N., in Vol. II.; J. G. Hume, *Value of a Study of Ethics, Political Economy and Ethics, Socialism*.

FOURTH YEAR.—In this year the Honor students will be expected to make a thorough study of representative Ethical writers of ancient and modern times, and also to undertake independent investigations into social problems of the present time, requiring for their solution the application of Ethical principles: Aristotle, *Nicomachean Ethics*; Kant, *Grundlegung zur Metaphysik der Sitten*; *Kritik der praktischen Vernunft*; Sidgwick, *The Methods of Ethics*. Essays: Application of Ethical principles in the examination of Problems in Political Economy, Sociology and Criminology.

History of Philosophy.*A. General Course:—*

FOURTH YEAR.—A course is given, intended as an introduction to the critical study of Philosophy. The student is led to trace the development of philosophical speculation from the beginning of Modern Philosophy up to the time of Kant; to discover the relation of the various thinkers to one another; to estimate the contribution made by each; and to note how inadequacies and errors were subsequently met and corrected. Books recommended: Windelband, Falckenberg, Schwegler.

B. Honor Course:—

THIRD YEAR.—(a) *Selected readings*: Cicero, *De Finibus Bonorum et Malorum* (I-II), in the original (to be read in connection with the Department of Classics). (b) *Lectures are given on the History of Ancient and Medieval Philosophy*. The chief centre of interest is the Platonic Philosophy; but the Pre-Socratic and Post-Aristotelian periods are dealt with as fully as time permits;

the former, as the essential prelude to the study of the Platonic Philosophy; the latter, as showing the various directions in which its influence was felt in later times. The influence of Christianity on philosophic thought; the main features of Scholasticism; and the preparation of the thinking world for Modern Philosophy, are considered. Special attention is given to connecting links, and the relation of the thinkers to one another. An extra hour a week will be devoted to a more special study of some of the more important Platonic Dialogues. Books recommended: Zeller; Ueberweg; Butler; Erdmann; Windelband; Ferrier; Schwegler; Benn; Tennemann; Burt; Mayor; Scott; Jowett's Plato; Grote's History of Greece (chapter on the Sophists); Aristotle's works.

FOURTH YEAR.—(a) Pre-Kantian Period: Honor students will attend the lectures on this period given to the students of the General course (see above), and the class rendering selections in *Metaphysics* (see below). Books recommended: Erdmann; Ueberweg. (b) Kant: The development of the Kantian Philosophy, through the Critiques and Prolegomena, is followed. The *Kritik der reinen Vernunft* and the *Kritik der Urtheilskraft* are carefully studied in the class essays by the students, are read and discussed, and lectures are given on Kant's relation to previous philosophers, the significance of his new method, the various links in his system and the positive and negative elements in his philosophy. Books recommended: Caird; Watson; Morris; Stirling; Mahaffy and Bernard; Vaihinger; Erdmann; Riehl. (c) Post-Kantian Period: Lectures will trace the development of Idealism after Kant, sympathetic and antagonistic. Special attention is given to Fichte, Schelling, Hegel, Schopenhauer, Von Hartmann, Herbert, Spencer and Wundt.

A seminary in the History of Philosophy is conducted for the reading and discussion of papers written by the students. Books recommended: (a) General Histories: Kuno Fischer; Windelband; Falckenberg; Ravaisson; Lewes; Morell. (b) Special: On Hobbes, Croom Robertson; on Des Cartes, Kuno Fischer; on Spinoza, Pollock, Caird; on Locke, Berkeley and Hume, Green, Frazer, Selby-Bigge; on Leibnitz, Dewey; on Scottish Philosophy, Seth, Murray, Bowen, McCosh; on Kant (see above); on Fichte, Everett, Adamson; on Schelling, Watson; on Hegel, Wallace, Caird, Harris, Royce, Sterrett; on Spencer, Watson, Collins; on Schopenhauer and Von Hartmann, Bowen.

Mathematics.

Supplemental to the General course of the First year, embracing Euclid, Elementary Algebra and Trigonometry, a course is offered in Permutations, Combinations and Binomial Theorem, and also in Elementary Analytical Geometry of two dimensions, suitable for such as, in the Second year, wish to enter upon the study of Elementary Infinitesimal Calculus. The course in Elementary Analytical Geometry is valuable also for its own sake, as it establishes the more important properties of the Conic Sections.

In the Honor work of the First year the following text-books are recommended: Hall and Knight's Higher Algebra, C. Smith's Treatise on Algebra, Todhunter and Hogg's Trigonometry, Hobson's Trigonometry, Todhunter's Spherical Trigonometry, C. Smith's Conic Sections, Salmon's Conic Sections.

In the Second year the elementary course in Differential and Integral Calculus is designed to afford such knowledge of the character, methods and place in science of this important subject as educated men should possess, and also to enable students in Chemistry, Engineering, etc., to understand those of their text-books in which the Calculus is introduced.

A further course of lectures is given in the elements of Analytical Geometry and of the Infinitesimal Calculus, intended specially for students in Economics, who it is hoped will thus be in a position to follow recent developments in this science.

In the Honor work of the Second year the following text-books are recommended:—Williamson's Differential Calculus, Williamson's Integral Calculus, C. Smith's Solid Geometry, Evans' Main's Principia, Frost's Principia. For the remainder of the work in the Second year, see Department of Physics.

Mathematical students in the Third year take Theory of Equations, including Determinants continued from the First year; text-book—Burnside and Panton. For the remainder of the work in the Third year, see Department of Physics.

In the Honor work of the Fourth year the following text-books are recommended: Newcomb and Holden's Astronomy, Godfray's Astronomy, Chauvenet's Astronomy, Salmon's Higher Plane Curves, Ferrer's Trilinear Co-ordinates, Salmon's Higher Algebra, Johnson's Differential Equations, Forsyth's Differential Equations, Kelland and Tait's Quaternions, Tait's Quaternions. By courtesy of the authorities of the Observatory, students have access to and use of the astronomical instruments.

The Department is furnished with the admirable thread and plaster models of Brill for illustrating the teaching of Geometry of three dimensions.

Physics.

The work of instruction in Physics consists of courses of lectures and of practical work in the laboratories. The lectures include, (1) an introductory course for Medical students, (2) an elementary course illustrated by experiments in Mechanics, Hydrostatics, and Heat, as required by students of the First year in Arts, (3) a similar course in Optics, Electricity and Magnetism for students of the Second year in Arts, (4) a similar course on Acoustics and Physical Optics for students of the Third year in Arts, and (5) advanced courses on Mathematical Physics for Honor students in the Second, Third and Fourth years in Arts.

The elementary courses for students of the First, Second and Third years in Arts are also attended by students in Engineering, Architecture and other departments.

In the practical work of the Laboratory there are at present eleven courses, six elementary and five advanced, which have been arranged to meet the requirements of Arts students, Engineers, Architects, and candidates for specialists' certificates at the Education Department.

Text-books: General Physics: Ganot's Physics. Elementary Mechanics: Lock, Mechanics for Beginners; Glazebrook, Statics and Dynamics. Elementary Hydrostatics: Glazebrook, Hydrostatics. Elementary Heat: Glazebrook, Heat; R. W. Stewart, Text-book of Heat. Elementary Light: Glazebrook, Light. Elementary Electricity and Magnetism: Poyser, Advanced Magnetism and Electricity; Silvanus Thompson, Elementary Lessons. Advanced Mechanics: Minchin, Statics; Routh, Statics; Tait and Steele, Dynamics of a Particle. Geometrical Optics: Jamin, Optique Géométrique. Hydrostatics: Besant. Rigid Dynamics: Loudon. Acoustics: Donkin. Physical Optics: Preston, Theory of Light. Thermodynamics: Clausius, Mechanical Theory of Heat. Electricity: J. J. Thomson, Elements of Electricity and Magnetism. Least Squares: Merriman. Practical Physics: Loudon and McLennan.

Works of Reference: General Physics: Deschanel's Natural Philosophy (by Everett); Jamin's Cours de Physique; Violle's Cours de Physique; Daniell; Gallatly; Nichols and Franklin; Jones's Examples in Physics; Thomson and Tait's Natural Philosophy; Macfarlane's Tables; Chambers's Tables. Elementary Mechanics: Briggs and Bryan, Statics, Dynamics; Magnus; Loney, Dynamics; Garnett, Dynamics; Clifford; Greaves; Hicks. Elementary Hydrostatics: Loney, Mechanics and Hydrostatics; Briggs and Bryan. Elementary Heat: Jones, Heat and Light; Garnett; Tyndall; Balfour Stewart; Tait. Elementary Light: Jones, Heat and Light; R. W. Stewart; Tyndall; Tait; Wright, Light, Optical Projection. Elementary Electricity and Magnetism: Cumming; Larden; R. W. Stewart; Day, Exercises in Electricity and Magnetism. Elementary

Sound: Catchpool; Tyndall; Zahn; Taylor. *Sound and Music*: Blaserna; Stone; Mayer. *Advanced Mechanics*: Minchin, Statics; Routh, Statics; Ziwet; Todhunter, Statics; Besant, Dynamics; Williamson and Tarleton, Dynamics; Price, Infinitesimal Calculus; Resal; Appell, *Traité de Mécanique rationnelle*. *Geometrical Optics*: Aldis; Heath; Parkinson. *Hydrostatics*: Besant; Minchin; Greenhill. *Rigid Dynamics*: Routh; Pirie; Worthington, Dynamics of Rotation; Aldis. *Acoustics*: Rayleigh, Theory of Sound; Helmholtz, Sensations of Tone; Airy, Sound; Koenig, *Quelques Expériences*; Chladni; Radau. *Physical Optics*: Jamin; Verdet; Preston (Light); Bassett; Glazebrook. *Elasticity*: Lamé; Ibbetson; Love; Todhunter, History. *Hydrodynamics*: Lamb; Bassett. *Heat*: Preston; Maxwell; Tait. *Electricity*: Emtage; Maxwell; Mascart and Joubert; Gerard; Gray; Heaviside; Watson and Burbury. *Least Squares*: Merriman; Wright, Adjustment of Observations; Airy, Theory of Errors; Holman; Johnson; Comstock; Gauss. *Practical Physics*: Stewart and Gee; Glazebrook and Shaw; Kohlrusch, Physical Measurements; Witz; Ayrton, Practical Electricity; Kempe; Nichols.

Biology.

The lectures and practical instruction in this subject are given in the University Biological Building.

The following arrangements will be in force for 1896-97 :—

1. A course of elementary lectures on Biology will be given three days a week to prepare candidates for the University examination of the First year. For reference: Jeffrey Parker, *Biology*; High School Zoology; Vines' Text-book of Botany.

2. A course of lessons involving 100 hours' instruction is given in connection with the above course of lectures for students entering the Honor department of Natural Sciences. Each member of the class will be required to provide himself with a case of instruments and an engraver's lens, both of approved pattern.

3. Candidates for the Second year Honor examinations will attend special courses on the Zoology of the Vertebrata and the Anatomy and Classification of the Phanerogams during the Michaelmas Term. A series of lectures and demonstrations on selected topics in Physiology will be delivered during the Easter Term.

4. The practical course for Honor students of the Second year will be arranged so as to form a complement to the lectures on Animal and Vegetal Morphology. There will also be opportunities in the Museum for the study of the Canadian Vertebrate fauna (Text-book, Jordan's *American Vertebrates*),

but the student is expected to have familiarized himself with the Canadian flora during the preceding long vacation. For reference: Spotton's Canadian Flora, or Gray's Manual; Vines' Text-book of Botany, 2 vols; Van Tieghem's *Traité de Botanique*, 2nd ed., revised.

5. Honor students of the Third year will study the Zoology of the Invertebrata three days a week during the Michaelmas and part of the Easter Terms, and, during the remainder of the Easter Term, Cryptogamic Botany and Vegetable Physiology. Books of reference: McMurrich, *Invertebrate Morphology*; Lang, *Vergleichende Anatomie*; Vines' Text-book of Botany; A. B. Frank, *Lehrbuch der Botanik*; Van Tieghem, *Traité de Botanique*, 2nd ed., revised.

6. The practical course for Third year students will be devoted to the study of typical forms of Cryptogamic plants and Invertebrate animals.

7. Wiedersheim-Parker's *Elements of Comparative Anatomy of the Vertebrata*, Bunge's *Physiologische Chemie*, and Foster's *Physiology*, last English edition, are recommended for Honour students of the Fourth year, and the following works will be required in the practical course: Stöhr's *Handbuch der Histologie*; Parker's *Zootomy*; Foster and Balfour's *Embryology*.

Works of reference on Bacteriology and the other subjects specified in the University curriculum will be found in the laboratory.

8. Honor students of all years are required to pay laboratory supply fees in advance to the Bursar.

Chemistry.

The following courses of lectures on Chemistry will be delivered in the Chemical Laboratory:—

INORGANIC CHEMISTRY: 1. *Elementary.* An introductory course on descriptive Chemistry, and on the Atomic and Molecular theories, for First year Chemistry and Mineralogy, First year Physics and Chemistry, First year Natural Science, First year Mathematics and Physics, First year Medicine, and Second year Pass. 2. *Special.* A special course on Inorganic Chemistry for First year Chemistry and Mineralogy, and Physics and Chemistry. 3. *Advanced.* A course on the relations between Chemical and other forms of Energy, for Second year Chemistry and Mineralogy, Second year Natural Science, and Second year Mathematics and Physics.

ORGANIC CHEMISTRY: 1. *Introductory.* The fatty and the aromatic compounds, based on a study of their constitutional formulæ for the Second year Natural Science. 2. *Elementary.* (In the small lecture room.) A more elementary course on the fatty compounds, with a few lectures explanatory of the Benzene theory, for the Second year Medicine and Second year Chemistry and Mineralogy. 3. *Advanced.* A course on Synthetic methods, and on Stereochemistry for Third year Chemistry and Mineralogy.

PHYSICAL CHEMISTRY : 1. *Introductory*. Stoichiometry, Theory of Solutions, Introduction to Electrochemistry, etc., with elementary applications of the calculus to physico-chemical problems, for Second year Chemistry and Mineralogy, and Second year Physics and Chemistry. 2. *Theory of Affinity*. Velocity of reactions, the mass law, Electrochemistry, and elementary applications of thermodynamics to chemical problems, for Third year Chemistry and Mineralogy. 3. *Chemical Thermodynamics*. A general course on Energetics, with special application to chemical problems, for the Fourth year Chemistry and Mineralogy.

HISTORY OF CHEMICAL THEORY: *History of Chemistry*. For Fourth year Chemistry and Mineralogy.

Special instruction will in addition be given to the students of the Departments of Chemistry and Mineralogy, and Physics and Chemistry, as occasion requires.

Each student proposing to attend lectures or practical work in the Chemical Laboratory must apply to the Demonstrator of Chemistry for a ticket which will have marked on it the number of his seat in the lecture room, of his hat rack, of his working place in the laboratory and his locker. This ticket will be given only to students presenting their registration tickets, and no working place in the laboratory will be allotted until a deposit of three dollars has been made. Each student will be held responsible for the seat, etc., allotted him, and no change may be made without the consent of the professor. At the close of the Easter term this ticket must be presented for certificate of attendance.

Each student is required to provide himself with a suitable note-book in which to keep an account of the work done by him during the year. These books will be examined from time to time, and marks will be assigned, which will be reckoned together with those given for the practical examinations in computing the student's standing in Practical Chemistry for the May Examinations.

At the beginning of the term the following apparatus will be provided:—
For Qualitative Analysis: A key; a test tube stand; twelve test tubes; a test tube cleaner; one mortar and pestle; one evaporating dish; two watch glasses; one crucible and cover; a pair of crucible tongs; a package of filter paper; two funnels; a Bunsen burner with rubber tubing; a sandbath and tripod; a blowpipe; a wash bottle; H_2S generator; a duster. *For Quantitative Analysis*: A key; five beakers; mortar and pestle; evaporating dish; two crucibles and covers; a pair of crucible tongs; a pair of weighing glasses; package of filter paper; two funnels; a Bunsen burner with tubing; an Argand burner with tubing; an exsiccator; a stand and ring; a wash bottle; a duster.

An account will be kept with each student; all apparatus broken or destroyed and all fines will be charged against his deposit, which must be renewed when exhausted.

The apparatus provided is intended for use in the laboratory only, and may not be removed from the building. At the close of the term's work it must be returned clean and dry to the Demonstrator.

Mineralogy and Geology.

An elementary course in Geology is given in the Second year, and arrangements are made for the study of rocks and fossils. Lectures and laboratory work in mineralogy are provided for Honor students.

In the Third year, lectures are given in Dynamical and Structural Geology, Economic Geology, Elementary Crystallography, Paleontology of the Invertebrates and Paleobotany. Practical work will be conducted in Geology, Mineralogy and Paleontology.

In the Fourth year, lectures are given in Historical and Stratigraphical Geology and Physiography, Paleontology of the Vertebrates, Lithology, Mineralogy and Advanced Crystallography. The practical work of the year comprises Excursions and other Geological work, Microscopic Lithology, Practical Crystallography and Determinative Mineralogy. It is expected that students in the Department will make a collection of minerals, rocks or fossils during the previous vacation.

Text-books and works of reference: Chapman's Minerals and Geology of Ontario and Quebec; Dana, Manual of Geology; Geikie, Text-book of Geology; Le Conte, Elements of Geology; Prestwich, Geology; Phillips, On Deposits; Kemp, on Deposits of the United States; Nicholson, Paleontology; Zittel, Handbuch der Paleontologie; Steinmann Döderlein, Elemente der Paleontologie; Dana, Mineralogy; Naumann, Mineralogie; Tschermack, Mineralogie; Chapman, Mineral Indicator and Blowpipe Practice; Rosenbusch, Microscopical Physiography and (Iddings) Massige Gesteine; Zirkel, Lehrbuch der Petrographie; Reports of the Geological Survey of Canada.

Honor students of all years are required to pay laboratory supply fees in advance to the Bursar.

SCHOLARSHIPS, PRIZES AND MEDALS.

I. University.

A. Matriculation Scholarships.

The scholarships hereinafter mentioned, with the exception of the Prince of Wales Scholarship and the Mary Mulock Scholarships, are provided from the endowment fund presented by the Honorable Edward Blake, Chancellor of the University, and are known as the Edward Blake Matriculation Scholarships.

I.

There are, including the Prince of Wales Scholarship, nine Junior Matriculation scholarships for general proficiency in the four departments of Classics, Mathematics, Modern Languages and Science, and the sub-department of History.

These scholarships are of the following values:—

SOURCE OF MONEY.		FREE TUITION.		TOTAL VALUE.

Candidates for these scholarships must obtain first-class honors in their department.

GENERAL REGULATIONS.

The marks for all classes of Scholarships shall be assigned in the following proportions :—

CLASSICS	{ Latin	600	1200
	{ Greek	600	
MATHEMATICS			1200
MODERN LANGUAGES	{ English	400	1200
	{ French	400	
	{ German	400	
SCIENCE	{ Chemistry	400	1200
	{ Physics	400	
	{ Biology (Botany, Zoology) ..	400	
HISTORY			200

The marks obtained at the examination for Part I. shall not be taken into account in awarding any of the scholarships. The marks assigned to each of the subjects in the General course shall be as follows :—Latin, 200; Greek, 200; Mathematics, 400; English, 250; French, 125; German, 125; Chemistry, 75; History, 75.

All candidates for scholarships in one or more departments shall at the same examination pass in the other subjects prescribed for Part II., of the Junior Matriculation. The subjects of Part I., in which they are also required to pass, may be taken at the same or a previous examination.

Saving the exception as to the Prince of Wales Scholarship, no one shall be entitled to hold more than one scholarship; but anyone who would, but for this provision, have been entitled to a second scholarship shall be published in the lists and receive a certificate of honor.

No scholarship shall be awarded save on condition that the candidate becomes a matriculated student in actual attendance in the University of Toronto.

Free tuition awarded shall be available on the following conditions :—For the first year on the award of the scholarship; for any year after the first on proof that the claimant has passed his examination for the preceding year with first-class honors in at least one department.

In the case of candidates who obtained scholarships prior to 1896, free tuition shall be accorded on a second-class standing.

In case in any year any scholarship be not taken, it shall be allowable to award such scholarship, or some part thereof, to a candidate who has shown special excellence in the examination in some other group, and has taken scholarship rank therein, but has failed to win a scholarship therein.

In case in any year any scholarship be not awarded, the money undisposed of shall be divided among the scholarships for the succeeding year.

The Board of Arts Studies may from time to time make and amend any regulations requisite to carry out the plan: such regulations shall be laid before

RESOLUTION PASSED BY THE JOINT BOARD, DECEMBER 28, 1895.

That examinations for University Scholarships be held at any centre where there is an examination for Matriculation, provided any additional necessary expenditure be met by the locality; and that the appointment of presiding examiners receives the approval of the Joint Board.

B. Undergraduate Scholarships.

The following scholarships have been founded and endowed in the University, and are open for competition to all undergraduates in Arts, who are candidates for Honors in the departments and years to which they are assigned:—

POLITICAL SCIENCE.

THE BANKERS' Scholarship, of the value of \$70, the gift of the Bank of Toronto, the Canadian Bank of Commerce, the Dominion, Imperial, Standard, and Traders' Banks, and the Union Bank of Lower Canada. Only such candidates are eligible as are of one year's standing and have passed the examination of the First year. A special examination on some special text-book of history or finance will be held at the time of the Supplemental examinations in September. This scholarship is not tenable with any other.

THE ALEXANDER MACKENZIE Scholarships, two of the value of \$75 each, and two of the value of \$50 each, the gift of friends of the late Hon. Alexander Mackenzie.

PHILOSOPHY.

THE JOHN MACDONALD Scholarship, of the value of \$50, the gift of the late Hon. John Macdonald.

MATHEMATICS AND PHYSICS.

THE WILLIAM MULOCK Scholarship, of the value of \$60, the gift of William Mulock, M.A., LL.D.

THE FULTON Scholarship, of the value of \$60, the gift of the late A. T. Fulton.

A scholarship of the value of \$75, the gift of the Local Committee for the Toronto meeting of the American Association for the Advancement of Science. In awarding this scholarship, the theoretical and practical work in the department will be estimated in the proportion of three to one.

NATURAL SCIENCE.

THE EDWARD BLAKE Scholarship, of the value of \$60, the gift of the Hon. Edward Blake.

THE FULTON Scholarship, of the value of \$60, the gift of the late A. T. Fulton.

THE DANIEL WILSON Scholarship, of the value of \$60, the gift of a friend.

No scholarship will be awarded to any candidate who has been placed lower than the First Class in the department, or in any of the departments or sub-departments to which the scholarship is attached.

C. Prizes in Books.

The CHEMISTRY Prize, the gift of Professor Pike, of the annual value of \$15, is open for competition among students of the Fourth year in the Department of Chemistry and Mineralogy.

The MINERALOGY and GEOLOGY Prizes, the gifts of Professor Chapman, are open for competition among students of these subjects in the Second and Third years. The value of the Second year prize is \$5, and of the Third year prize is \$10.

D. Medals.

THE GOVERNOR GENERAL'S Medals, the gift of His Excellency the Earl of Aberdeen, are awarded under the following conditions:—

1. The Gold Medal shall be awarded to that candidate in the final examination for the B.A. degree who, taking not less than 66 per cent. in English (as defined below), and not less than 75 per cent. in some one of the following Honor departments:—(a) Classics, (b) Philosophy, (c) (d) Mathematics or Physics, (e) (f) Natural Science (either division), shall also take the best aggregate mark in the two subjects.

2. English shall be understood to mean only the papers (at present four in number) on later English Literature (from the end of the 15th century).

3. In order to obviate any unfairness arising from a different system of marking in different departments, the principle shall be always adopted of raising the marks of the best candidate in the first class of each department to the maximum, and those of the others in proportion, unless the examiners of any department report that the marks of the best candidate in their department are not of sufficient merit to be so raised.

4. The Registrar shall publish not only the name of the successful candidate, but also the names of all candidates who, by satisfying the above conditions, are eligible for the award.

5. The Silver Medal shall be awarded to that candidate in the Second year of the General course who, taking not less than 75 per cent. in this examination takes also the highest aggregate of marks, when the result of the First and Second year examinations in this course are added together, such examinations having been taken in two consecutive calendar years.

6. The discretion of the examiners (paragraph three above), as in the examination for the Gold Medal, shall apply also to this examination.

NATURAL SCIENCE.

The McMurrich Medal (Silver), the gift of W. B. McMurrich, M.A., awarded on the recommendation of the Natural Science Association.

The Cawthorne Medal, the gift of F. T. Shutt, M.A., awarded on the recommendation of the Natural Science Association.

E. Graduate Scholarships.

THE RAMSAY Scholarship in Political Economy, of the value of \$60, the gift of Mr. William Ramsay. This Scholarship is open for competition to all graduates or undergraduates who have been placed in the First Class in one of the Economic subjects of the Fourth year in the Honor department of Political Science (Third year in the Faculty of Law); but not more than two years must have elapsed since the competitor passed the examination above specified. The award is made upon an essay, the subject of which must be some question in Economics or Finance of interest to the commercial community in Canada, to be announced in May of each year, and the competition closes on the 15th of September thereafter, by which date the essays must be sent to the Registrar.

THE 1851 EXHIBITION SCIENCE Scholarship, of the value of £150 sterling, given by the Commissioners for the International Exhibition of 1851, is awarded once in two years by the University Council for research in some branch of Physics or Chemistry. Subject to a satisfactory report as to progress in study, it is ordinarily tenable for two years at home or abroad.

THE GEORGE PAXTON YOUNG Memorial Scholarship in Philosophy, of the value of \$400, will be awarded for the first time in June, 1897. The holder must be a Bachelor of Arts of not more than two years' standing, who has taken an Honor course in Philosophy. This Scholarship is tenable for one year, and the holder must devote his whole time to the study of some topic falling under the general term "Philosophy." He may pursue his studies either in the University of Toronto, or in some other University approved by the University Council; but in either case he shall furnish to the University Council such evidence as may from time to time be required, that he is faithfully observing the conditions under which the scholarship was awarded. Applications must be in the hands of the Registrar on or before June 15th, 1897. Further particulars may be obtained from the Registrar.

F. Graduate Fellowships.

THE ALEXANDER MACKENZIE Fellowships, two of the value of \$375 each, the gift of friends of the late Hon. Alexander Mackenzie. These fellowships, which are tenable for one year, will be awarded by the University Council to graduates of the University of Toronto.

II. Victoria University.

Scholarships, Prizes and Medals.

All scholarships and prizes of the University of Toronto are open to students of Victoria University on the general terms prescribed on pages 109-113, etc. This includes exemption from fees in Victoria as in University College.

The following scholarships are awarded in Victoria University, subject to the conditions which govern University scholarships:—

THE BELL SCHOLARSHIP (of the value of \$60.00), the gift of A. J. Bell, Ph.D., to the first of the First-Class Honor men of the Third Year in Classics.

THE AMES SCHOLARSHIP (of the value of \$60.00), the gift of A. E. Ames, Esq., to the first of the First-Class Honor men of the First Year in Moderns.

THE NELLES SCHOLARSHIP (of the value of \$60.00), the gift of L. E. Horn, Ph.D., and others, to the first of the First-Class Honor men of the Third Year in Moderns.

THE CHOWN SCHOLARSHIP (of the value of \$50.00), the gift of the Rev. E. A. Chown, B.A., B.D., to the first in the Honor Ethics of the Third Year.

The following prizes are offered for competition to students of Victoria University:

THE WEBSTER PRIZE, the gift of J. G. Hodgins, Esq., LL.D., to the student taking the highest place in the pass English of the Second and Third Years.

THE HODGINS PRIZE, the gift of Dr. Hodgins, to the student taking the second place in the pass English of the Second and Third Years.

THE WALLBRIDGE PRIZE, the gift of A. F. Wallbridge, Esq., to the student taking the first place in the Biblical Greek of the Third and Fourth Years.

THE CARMEN GOULD PRIZE, founded by the bequest of the late Dr. Carmen Gould, of Colborne, to the student taking the first place in Hebrew at the examination of the Second Year.

THE RYERSON PRIZE, the gift of J. G. Hodgins, Esq., LL.D., to the student taking the first rank in New Testament History.

THE PUNSHON PRIZE AND VALEDICTORY, founded by W. Kerr, Esq., LL.D., Q.C., for the best valedictory oration; subject for 1897, "The Anglo-Saxons."

THE MASSEY BURSARIES (see page 124), are open for competition to Arts students of the Third Year.

The following medals will be awarded to students of Victoria University at graduation in Arts. (NOTE.—All competitors for these medals must obtain first-class honors in their final University examinations.)

THE PRINCE OF WALES GOLD MEDAL, to the student standing first in general proficiency at the examination of the Fourth Year.

THE PRINCE OF WALES SILVER MEDAL, to the student standing second in the same examination.

THE ABERDEEN GOLD MEDAL, the gift of His Excellency the Earl of Aberdeen, to the student who obtains the highest standing in any honor department of the final examination for B.A.

THE EDWARD WILSON GOLD MEDAL IN CLASSICS, to the student standing highest in the final examination for honors in Classics.

THE S. H. JANES SILVER MEDAL IN CLASSICS, to the student standing second in this examination.

THE W. E. SANFORD GOLD MEDAL IN MATHEMATICS, to the student standing highest at a final examination for honors in Mathematics.

THE S. H. JANES SILVER MEDAL IN MATHEMATICS, to the student standing second in this examination.

THE J. J. MACLAREN GOLD MEDAL IN MODERNS, to the student standing highest at the final examination for honors in Moderns.

THE S. H. JANES SILVER MEDAL IN MODERNS, to the student standing second in this examination.

THE E. J. SANFORD GOLD MEDAL IN PHILOSOPHY, to the student standing highest at the final examination for honors in Philosophy.

THE S. H. JANES SILVER MEDAL IN PHILOSOPHY, to the student standing second in this examination.

THE G. A. COX GOLD MEDAL IN NATURAL SCIENCES, to the student standing highest at the final examination for honors in any department of the Sciences.

THE S. H. JANES SILVER MEDAL IN NATURAL SCIENCES, to the student standing second in this examination.

FELLOWSHIPS.

University of Toronto.

Fellowships in the subjects named below, of the annual value of \$500 each, are awarded annually. The selection is made immediately after the publication of the results of the University Examinations in May, from among graduates of the University.

Each Fellow is appointed annually; but he may be re-appointed for a period not exceeding, in all, three years.

Each Fellow is required to assist in the teaching and practical work of the department, to pursue some special line of study therein, and to devote his entire time during the Session to the work of the department, under the direction of the Professor or Lecturer. The Fellows are selected with a special view to their aptitude for teaching, and their attainments in the department in which the appointment is to be made. Every Fellow on accepting his appointment comes under an obligation to fulfil the duties of his Fellowship during the Academic Year in which he is appointed, unless specially exempted.

Candidates must send in their applications annually to the Registrar, not later than the 1st day of June.

The Fellowships in the following departments are assigned to the Faculty of the University: Physics, Mathematics, Chemistry, Biology, Mineralogy and Geology, Italian and Spanish, Political Economy.

From the Students: D. B. Neeley, Miss M. Rowell, C. M. Marshall, A. S. Hurst.

Monthly Meetings are held on the last Wednesday of each month, from five to six o'clock, at which various phases of the missionary question are discussed.

A Missionary Library in connection with the Society is accessible to all.

The Society has in the past directed its efforts toward Japan as a mission field. Several graduates have been sent out to work there, and liberal subscriptions have also been forwarded for the purpose of educating native theological students. The Society has decided to support a native Japanese theological student in Victoria University for the next three years. The subscriptions necessary for the first two years have already been raised. Prof. Wallace is permanent treasurer of the funds for this purpose.

There is in the College, independent of the Missionary Society, a large "Students' Volunteer Band."
