The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

PREFACE.

A long experience in Public School work has convinced the author of the necessity of something to supplement our text books on Elementary Arithmetic. To supply a varied collection of graded exercises in a suitable form for Third and Fourth Classes, in an inexpensive form, is the object of this work.

The generally acknowledged evil of the unrestrained use of answers in these classes has induced me to issue only a part of the answers.

Hoping this little work may aid both teachers and pupils.

I am, yours very truly,

R. K. R.

Entered according to Act of Parliament of the Dominion of Canada, in the year One Thousand Eight Hundred and Eighty-three, by R. K. Row, in the office of the Minister of Agriculture.

Messrs. J. J. Anderson & Co:

GENTLEMEN,—I have known Mr. R. K. Row as a successful teacher of Arithmetic for several years. In his regular class work he exhibited admirable skill in presenting a problem from many different points of view. Mr. Row possesses special fitness to compile a book of arithmetical questions, and consequently I would expect an excellent series of Graded Exercises in Arithmetic from his hand. The examination, which I have had the privilege to make, of the accompanying proof-sheets fulfils my expectations. The problems are well varied, eminently practical, and carefully graded. I venture to predict that for the Third and Fourth Classes of the Public Schools Mr. Row's "Graded Exercises" will be welcomed by the teachers as a most valuable aid to their work.

Yours, etc.,

J. DEARNESS,

Public School Inspector.
