Why You Should Vote Against Reciprocity

THE REASONS GIVEN BY EIGHTEEN OF TORONTO'S LEADING LIBERALS

Following is the statement issued last February by eighteen of the leading Liberals of Toronto, in which they declared their opposition to reciprocity.

"We oppose ratification of the proposed reciprocity agreement with the United States for the following reasons: 1. Because in the year 1871 the Parliament of Canada repealed the legislation then existing relating to reciprocity...

"2. Because the present unexampled prosperity of Canada is the result of a policy which has been pursued in the development of her trade and her natural resources. Because this has involved the expenditure of hundreds of millions of dollars upon railways, canals, steamships and other means of transportation...

"3. Because it is essential to the continued national unity and development of Canada that no trade relations with any country should be agreed to by Canada on any basis which would check the growth and development of trade between the various parts of Canada with each other, or between Canada and the various parts of the United States...

"4. Because any present benefit to any section of Canada or to any interests or individuals therein which might accrue from the proposed agreement would be more than offset by the loss and injury which would accrue to other sections and interests and individuals, and because the result to Canada as a whole would be greatly injurious.

"5. Because, as a result of the proposed agreement, the freedom of action possessed by Canada with reference to her tariffs and duties of trade would be greatly curtailed, and she would be hampered in developing her own resources in her own way and by her own people.

"6. Because, after some years of reciprocity under the proposed agreement the channels of Canada's trade would have become so changed that a protective tariff against Canada would cause a disturbance of trade to an unparalleled extent, and because the risk of this should not be voluntarily undertaken by Canada.

"7. Because, after some years of reciprocity under the proposed agreement the channels of Canada's trade would have become so changed that a protective tariff against Canada would cause a disturbance of trade to an unparalleled extent...

"8. Because the agreement as proposed would weaken the ties which bind Canada to the Empire, and because the unrestricted reciprocity which would naturally follow would still further weaken those ties and make it more difficult to avert political union with the United States.

"9. Because the disruption of the channels of Canada's trade which was caused by the termination of the reciprocity treaty of 1854 and the subsequent establishment of protective tariffs by the United States, have risen to a decided height in many minds towards annexation with the United States, and this at a time when Canada was mainly peopled by native-born Canadians and other British subjects, to whom the prospect of annexation was most unwelcome...

"10. Believing as we do that Canadian nationality is now threatened with a more serious blow than it has hitherto met with, and that all Canadians who place the interests of Canada before those of any party or section or individuals therein, should at this crisis state their views openly and fearlessly, we who have hitherto supported the Liberal party in Canada, subscribe to this statement."

This was signed by: SIR EDMUND WALKER, president of the Canadian Bank of Commerce.

SIR WILLIAM MORTIMER CLARK, K.C., former lieutenant-governor of Ontario.

JOHN L. BLAIR, president Canadian Land & Investment Co.

W. D. MATTHEWS, grain dealer and director Canadian Pacific Ry.

W. K. GEORGE, manufacturer.

Z. A. LASH, K.C.

W. T. WHITE, managing director National Trust Company.

G. T. SOMERS, president Sterling Bank, and vice-president Board of Trade.

ROBERT S. GOURLAY, piano manufacturer and president Board of Trade.

C. P. R. Man Denies Newspaper Reports About Damage From Black Rust in Manitoba Wheat.

Montreal, Aug. 4.—G. M. Bosworth, vice-president of the Canadian Pacific Railway today wired W. M. Lanigan, assistant freight traffic manager western lines, Winnipeg, as follows: "Any truth in newspaper reports this morning regarding black rust in Manitoba? To which Mr. Lanigan replied as follows: 'No truth in newspaper reports regard black rust in Manitoba.' This shows clearly that the crop in Manitoba is safe."

THE GOVERNMENT AND HUDSON BAY RAILWAY CONTRACT

Hiding The Fact That Mackenzie And Mann Will Probably Build Road—Mr. Borden's Policy in Matter.

Special to The Standard. Ottawa, Aug. 4.—It leaked out tonight that there is some ulterior motive on the government's part in announcing the successful tender for the preliminary construction of the Mackenzie Bay Railway. The lowest tender is said to be Mackenzie and Mann, but Hon. G. P. Graham is holding back the announcement on account of the wave of popular resentment which would follow the official statement to that effect in the west. Mackenzie and Mann are said to have tendered under a nom de plume, but their identity is known and in view of Mr. Borden's policy of government building, ownership and control by independent commission of the road, the government is in a quandary as to what to do. Hence the delay in announcing the successful tender.

Mr. Borden's policy with reference to the Hudson Bay Railway as enunciated on his western tour, was emphatically for the ownership and operation of the road by the federal government.

Speaking on this point he said: "The Liberal-Conservative party has been committed to the construction of the Hudson Bay railway since 1896. That road will be built by the next Liberal-Conservative administration without delay. It will be operated by an independent commission on behalf of and in the interests of the people with full control of the road by the government through an Independent Commission."

Mr. Borden's policy of government ownership and operation was unanimously endorsed by the people of the west.

SHARP FIGHTING IN THE LISBON STREETS

Troops And Rioters Clash With Fatal Effect—4,000 Men Try to Storm Parliament Buildings.

Lisbon, Aug. 4.—(via Badajoz, Spain)—Several clashes between government troops and large crowds occurred in the streets of Lisbon last night and early this morning. Cavalry repeatedly charged the mob and many arrests were made. The cost of food has risen unaccountably since the revolution. The crowd marched toward the parliament building where the national assembly was in session yesterday to contest against the high prices. By the time the parliament buildings were reached, the mob had swollen to 4,000 who tried to break through the line of infantry which had been hastily summoned to protect the chamber. Some revolver shots were fired at soldiers from the crowd, whereupon the troops charged the mob.

The Queens-Sunbury election is not to be won this year on a bag of peanuts and a pint of lemonade.

MONEY FOR CENSUS MEN.

Ottawa, Aug. 4.—Census enumerators' checks were mailed this afternoon. Ten per cent. is held back until it is discovered if the work has been properly done and if the accounts are correct.

New York Reporters Couldn't Worry Famous Jap Admiral.

In Conversation with Mayor Gaynor He Expressed His Approval of Arbitration Treaty—Refused to Discuss International Politics.

New York, Aug. 4.—Admiral Togo, the famous Japanese sailor, arrived here today, and left New York late this afternoon for Washington. Mayor Gaynor asked Admiral Togo about the coronation of King George and the admiral through his interpreter replied that he had been greatly impressed with the splendor and magnificence of the ceremony.

In speaking of the recent Anglo-American treaty Admiral Togo said: "This treaty is a mighty good thing for the peace of the world. I have the reputation of being a fighting man, but I love peace among nations more than anything in the world." But as soon as they had discussed the Anglo-French-American arbitration treaty, the reporters—at least some of them—branched off into questions concerning Japan's attitude toward Russia and the Moroccan affair. Admiral Togo replied briefly that he would not discuss politics, but the reporters persisted and Mr. Hale and Mr. Tanguchi emphatically terminated the interview, but the admiral's face did not change its placid, even grave, expression, or lack of expression.

When Admiral Togo boarded the electric locomotive in the Penna. station he held his side, that in riding under the Hudson river in a fast and powerful motor he hoped to learn much of value for Japan. Before boarding the train he was shown over the new station, followed by a large crowd. He was frequently applauded. "I am intensely interested in your work pre-eminence in electric engineering and railroading," said Mr. Tanguchi, "and I wish to avail myself of this opportunity to closely observe you. Therefore, I will ride with the engineer."

The admiral rode in the cab to the limit of the electric zone, at Harrison, N. J., and there entered his car. He asked many questions of the engineer, concerning the electric equipment. In fact, it was remarked that he displayed more interest in this incident of his visit than in anything previously.

During his stay in the city Admiral Togo had many conflicting experiences. He was met by a group of photographers for whom he graciously consented to pose, roughly shoved his head to one side. "Don't hold your head so stiffly," he even showed no displeasure. Again when three photographers became involved in a quarrel in his presence as to preference for camera position, he looked on without changing his expression, even while Chandler Hale, third assistant secretary of state and official reporter for the government entertaining the admiral, ejected the photographers.

It had been agreed by Commander Tanaguchi and Mr. Hale that the newspaper reporters would be permitted to briefly interview the admiral on his visit here, but not on politics.

FIRST ENGLISH AVIATOR TO FLY AROUND ENGLAND

J. Valentine Completes The Course For Daily Mail Prize—Finishes Circuit of 1,010 Miles.

London, Aug. 4.—J. Valentine landed at 6.47 this evening at the Brooklands Aviation field. He is the first English aviator and the third competitor in the Daily Mail's race for \$50,000 to complete the circuit of a distance of 1,010 miles. The race started July 22 and was won by Beauport, who finished at 2.07 o'clock the afternoon of July 26. J. Valentine was second, landing one hour and ten minutes behind Beauport. Nineteen men started in the race, but the majority of them dropped out in its early stages because of accidents. Captain F. S. Cody is now the only man left in the race.

Laurier's solid Quebec appears to have no more foundation than some of Mr. Pugsley's promises.

ASEPTO PREMIUM PLAN ADVANTAGES

Talk No. 4.

Why a cash discount is not equal to our premium. We do not make any money on premiums.

We give a \$5.00 premium when you have purchased \$25.00 worth of goods from us.

It would be an impossibility for us to give \$5.00 in cash off of \$25.00. Yet the premium you select from our store cannot be bought for less than \$5.00 at any store. We buy that premium direct from the manufacturers and save all the profits of the jobber and retailer, a profit that they are justly entitled to, and by that method give you the greatest discount ever known and in addition acquaint you with our Asepto Soap and Soap Powder and over 100 other articles of our manufacture.

The plan is worth investigating.

Corner Mill and Union Streets - St. John, N. B.

PREMIER TALKS ABOUT HIS TRIP

Continued from Page 1. "While I was in London I spent a good deal of time in the New Brunswick office, which has an excellent location, being only a two minute walk from the Hotel Cecil and directly opposite the Southampton street post office, and I was surprised at the evidence of interest being exhibited in New Brunswick, and its resources. Inquiries for information were coming in from all parts of the kingdom, and many people called personally at the office. In all public addresses I was called upon to make I seized the opportunity of pointing out the advantages possessed by this province about the investor's standpoint and the point of view of people wishing to come to Canada. I also gave interviews to such journals as the Canadian News, the Canadian Mail, and Canada, and I was glad to note that these interviews provoked articles on New Brunswick in many other papers among them the Edinburgh Times, the Nottingham Guardian, the Newcastle Journal, the Yorkshire Herald, Eastern Daily Press, Hull Morning News and the Western Morning News of Plymouth.

"As a result I received many letters asking for further information about the province and quite a number of persons called upon me personally. "Western Boosting Hurts Us. "One thing that works to the disadvantage of this province," added the premier, "is that the Dominion government and the railways carry on all their publicity campaigns in the interests of the west. Because of the advertisement given the west, it is difficult to attract attention to the east, but we have made a good start and in spite of the handicap the results will soon become evident in an increased immigration to this province.

"Another handicap is the fact that the steamship service to St. John in summer is not of the best; I found from talks with Mr. Bowden and booking agents in London that this was quite a drawback in sending settlers here."

"The British Journalists. Mr. Hazen expressed regret that the British journalists who are coming to Canada would spend so little time in New Brunswick. While in London he learned their itinerary and immediately saw Mr. Obed Smith, assistant immigration agent for Canada, and tried to arrange to have the journalists spend more time here. It was impossible to arrange to have the main party stay longer in New Brunswick, but a number of journalists had agreed to detach themselves, and visit Westmorland and Albert counties, and journey up the North Shore. The main body of delegates will arrive in St. John on the 16th inst., and go from there to Gasquetown by motor, then by boat to Fredericton, then on the 18th to Woodstock by motor, from where they will go by train to Montreal.

"The Coronation. Speaking of the Coronation ceremonies, the Premier said the three things that impressed him most were the bearing of the Queen during the service in Westminster Abbey, the night and majesty of the Empire as typified in the great naval review, and the demonstration of the London crowds under the control of the police. "The fact of the police was marvellous," he said, "and if found its response in the courtesy of the crowds."

While in London Mr. Hazen attended a number of banquets tendered to the Overseas premiers and he and his family were the guests at many historic homes. Mr. and Mrs. Hazen were presented to the King and Queen at Buckingham Palace, were guests at a Royal garden party, and attended the entertainment at Covent Garden given by the most distinguished artists in the realm. They were invited to the investiture of the Prince of Wales, but were unable to attend. They were entertained at the county houses of the Prince and Princess Christina, the Duke of Devonshire, the Duke of Sutherland, the Earl of Ellesmere and others prominent in public life.

New Brunswickers in Britain. The premier said he was pleased to find many natives of New Brunswick occupying prominent places in the Mother Land. Among the former residents of this province whom he met during his stay in London were Dr. G. H. Purkin, Admiral Sir Charles Drury, Sir William Max Aitken, Jas. Dunn, of Bathurst, now of Dunn, Fisher and Co., and Wm. Taylor, manager of the Bank of Montreal in London.

While in London Mr. Hazen was much occupied with New Brunswick affairs. He appeared before the Privy Council in the case of the King vs. Leavitt, a case involving the right of the Province to collect succession duties. The case was an appeal by the Province from the judgment of the supreme court of Canada, reversing the judgment of the supreme court of the Province, Ontario and British Columbia have similar cases pending.

Speaking of his arrival home, he said he found the government had got on very well without him, and so far as he had heard everything was in satisfactory shape. He expressed regret to learn of the death of his old friend, Sheriff Ritchie.

ARRAIGNED IN OTTAWA ON CHARGE OF BIGAMY. Ottawa, Aug. 4.—Ethel Baker, said to come of a good family in Ogdensburg, and Fred J. Arnot, a plumber by trade with a wife and two children in the same city, appeared in the police court here today on a charge of bigamy. They were returned to Brockville, where the offence is alleged to have been committed on July 4, and will be tried there.

That Canadian navy should really be allowed to practice in the bath tub before trying a trip on real waves.

HOME BY AIR LINE. London, Aug. 4.—Julius Vedrines, the French aviator, started homeward this morning by air line. He safely crossed the English channel and landed at Dieppe, France. He travelled in the same aeroplane with which he won the second prize in the recent circuit of Great Britain race.

TOO MANY BEARS; WOULD TRADE SOME. Toronto, Aug. 4.—Park Commissioner Wilson thinks Toronto has too many Canadian bears, there being 12, and he wants to trade seven or eight of them for some rare birds not now to be found at the Zoo. He says the bears eat too much. The commissioner has made the suggestion to the board of control, but they have not yet given permission to make the trade.

MR. DAVID LUBIN

Mr. David Lubin, delegate of the United States to the permanent committee of the International Institute of Agriculture, is in Washington for a short stay after his last European tour of the interests of the institute, which aims to give all countries agricultural information on the world's staple supply of the leading agricultural products.

BOGUS SUFFRAGETTE SWINDLED WOMEN BY WORTHLESS CHEQUES

Toronto, Aug. 4.—Dr. Margaret Gordon, of the local suffragette movement was very reticent when spoken to about the case reported from Montreal. She said Stewart, the bogus suffragette, who cashed a forged check. She admitted some women had secured "small sums" from Toronto women, but refused to say who they are or how much they gave up.

Another prominent leader of the suffrage movement here admitted that she had heard of a woman getting into trouble at Montreal. "We saw her for the first time," said this lady. "On the night of the Lydia Pankhurst meeting last fall. She introduced herself to us, and seemed a very nice person. She was about 25 years of age and rather good looking."

"During the winter and spring she gave a number of addresses, telling of the suffrage movement in Great Britain, and of her part in it. She said she was wealthy and received money from her mother. She had left home about some trouble with her relatives, and now she went to Montreal, and while we have just heard that she is in trouble there. The name given in that city, however, is not the same as the Toronto woman used."

THE ISSUE TO BE DECIDED BY THE PEOPLE OF CANADA

If Reciprocity Should Become Effective Boston and Not St. John or Halifax would Become the Commercial Capital of the Maritime Provinces --President Taft's Frank Statement of the Real Significance of the Secret Agreement.

Upon the result of the contest which has been fixed for September 12, depends the economic and political destiny of Canada. Surely the deliberate statement of Mr. Taft that "Canada is at the parting of the ways, and immense significance for the Canadian people. The purpose, frankly stated by the president, is to destroy the commercial alliance between Canada and Great Britain and to overcome the forces which are at work in England and in Canada" to establish a system of preferential tariffs throughout British dominions.

There is something of unconscious insolence in the proposal; an offensive assumption that Canada is a reluctant partner in the confederation of British nations; an amazing confession of an ulterior and far-reaching design behind the immediate agreement with the Canadian government. There is not much to choose between the blunt annexationism of the powerful section of the American leaders of the Democrats, and the more guarded, but still rash declaration of the Republican president, that a separation of Canada from Great Britain is the object of American policy.

Mr. Beveridge, Mr. Foss and other American statesmen, and a numerous powerful section of the American press, avow the same calculated and deliberate purpose, and unquestionably intend that ratification of the trade agreement shall impair the fiscal freedom of Canada. The national destiny of the Dominion and its relation to the Empire, and create forces and influences which will eventually lead to the economic and political unification of the continent.

A Denationalizing Policy. It is not necessary to argue that the Canadian government has entered into a conspiracy with Washington, would be stupid and malicious to suggest that the masses of the Liberal party are less loyal or less patriotic than their political opponents. It is legitimate to consider the certain tendencies of the trade agreement and to appeal against an alliance with the United States which threatens the economic and industrial interests and the political independence of the Dominion. For years we pleaded at Washington for neighborly fiscal treatment. For years we sought better access to the markets of the adjoining country. Our petitions were rejected; our advances repulsed.

As a result we were forced to revolutionize agricultural methods, to find markets over sea, to spend hundreds of millions of money, chiefly borrowed from Great Britain, in deepening canals, treating commercial ports and building railways from east to west in order to drive trade across the country, and effect its commercial and national unification.

But now that we have organized the business of the country at enormous cost and established our commercial independence, industrial interests and the plant, to feed our traffic to American railways, and to divert a vast volume of business from Canadian ports to the rival ports of the United States.

Losses and Dangers. If the trade agreement goes into effect there must be an immense exodus of the population from Hamilton and Toronto to Detroit and Buffalo. The port of Montreal and the great railway and the steamship lines, which have been built through traffic and over sea shipments, Boston, instead of St. John or Halifax, must become the commercial capital of the Maritime Provinces. There must be a material check to the splendid expansion of Winnipeg and Vancouver, and the whole west must be tributary to St. Paul, Duluth, Chicago, Seattle and other great American municipalities.

DEPUTY MINISTER HEARS "This new FREE Hair Remover is Surely a Marvel!"

Local Merchants Discuss West Indian Trade with Deputy O'Hara, of Trade and Commerce Department.

A large and representative meeting of members of the Board of Trade interested in the West Indies trade was held in the Board of Trade rooms for the purpose of laying before the Deputy Minister of Trade and Commerce, F. C. T. O'Hara, their views in regard to the need of a better service in shipping to that port and the West Indies than that provided for under the terms of the recent arrangement entered into by the government and the Pickford and Black Company of Halifax.

The matter was gone into very thoroughly. The local merchants claimed that even under the old arrangement by which the Pickford and Black boats made Halifax their point of departure, St. John was handicapped in its efforts to develop trade with the West Indies as compared with Halifax, because shipments made from St. John took longer to reach their destination than if shipped from Halifax. They also claimed that under the present arrangement St. John would be liable to lose the business which it now did with the West Indies.

Mr. O'Hara said he was much impressed with the arguments presented and the claims of St. John to a better service, and would lay the views of the merchants before the minister; but he was not empowered to promise anything in connection with the service.

Interviewed after the meeting T. H. Estabrooks, president of the Board of Trade, said the views of the local merchants in regard to the need of an eleven days service, with every alternate boat sailing from St. John direct to the West Indies, had been presented to the Deputy Minister and that the whole question had been thoroughly canvassed. He added that he had great hopes that the government would be able to meet their wishes, or at any rate to arrange for a better service than the present one.

REV. DR. GEORGE BRUCE IS VISITING ST. JOHN

Rev. Dr. George Bruce, of Toronto, arrived in the city yesterday and will remain during the month of August. Rev. Dr. Bruce was for sixteen years a resident of St. John, and during his stay took a prominent part in the active life of St. John.

In conversation with The Standard last evening Rev. Dr. Bruce referred to the marked improvement and development in St. John during the twelve years since he removed from here to Toronto. "I find very encouraging development in St. John, and the work which has been done on the West Side of the harbor especially claimed my attention, as well as the work of improvement being carried on in Mill street."

Rev. Dr. Bruce spoke in an interesting manner of the early period of this city's history, when the ship building industry was the pulse of the city, and of the passing of that industry. The possibilities of St. John, are vast, said Dr. Bruce, and the people should be alive to the advantages the city possesses and should keep them well in the limelight.

Rev. Dr. Bruce, though a native of Toronto, is greatly interested in the development of this city, and is most optimistic of a bright future for St. John and the province generally, if the residents fully appreciate the advantages which they possess, and avail themselves of these advantages.

Rev. Dr. Bruce will occupy the pulpit in St. David's church during his stay in this city.

VETO BILL WILL HAVE BUT NARROW MARGIN IN LORDS

London, Aug. 4.—The progress of the veto bill toward the crisis next week is now coming into clearer light. Viscount Morley today published a list of 76 Liberal peers who had written him promising to support the government in the passage of the measure. A meeting of Unionist peers who favor supporting the government was held today. It was presided over by Viscount St. Aldwyn, formerly Sir Michael Hicks Beach. The meeting decided that it would not be advisable to take organized action in the vote on the bill, but leave each peer to act on his own discretion. This may add ten or more votes to the government vote, making the total 86 or 90 in favor of the measure. The only list of names the followers of the Earl of Halsbury have as yet permitted to be published gives 68. Thus the bill, according to present probabilities will be adopted by a narrow majority of between ten and twenty.

SAINT JOHN, SATURDAY MORNING, AUG. 5, 1911.

WELCOME HOME!

The spontaneous and hearty welcome which greeted Hon. J. D. Hazen on his return from England yesterday, was a well merited tribute to the Premier who has worthily upheld the loyalty of the people of New Brunswick as their representative at the Coronation and the attendant festivities.

But, if we mistake not, the welcome to the Premier meant more than that. It is safe to say that no public man in this Province has done so much during a few weeks spent in England to make known and popularize New Brunswick among the people of the Old Country.

At the banquet to be given in his honor on Thursday next week a fitting opportunity will be afforded to the Premier's friends and supporters to show their appreciation of him.

A WORD TO THE FARMER.

By sweeping away all the protection he now enjoys the Reciprocity Agreement with the United States will deprive the Canadian farmer of the monopoly of his home market which today takes 80 per cent. of his produce.

The present Canadian duties, which now protect his agricultural produce from competition, as compared with the provisions of the trade agreement, are as follows:—

Table listing various agricultural products and their duties. Columns include 'Articles', 'Tariff', and 'Free'. Items include Cattle, Horses, Sheep and Lambs, and various types of grain and produce.

Let us take cattle, the first item on the list, and see what benefit will be derived by the Canadian farmer under Reciprocity. The following figures give the comparative prices of cattle at the present time: In Maine (quoting Senate Document 849), dairy cows are worth \$33 and other cattle \$19.50.

Canadian cattle-raiser cannot expect higher prices for his cattle once the barrier that protects him is removed. His cattle will be hammered down by American competition. The same is true of many other products which are higher in Canada today than in the United States.

PRESIDENT SIMON RETIRES.

One of the most delightful of the many charming stories that cluster about Fort au Prince represents a bare-legged black man running down the main street pursued by another black man who took pot shots at him with a big revolver.

This autocart's origin, in a political sense, is not so remote that it demands elaborate explanation. President Nord Alexis having had his share of graft, Simon and other hungry patriots devised a revolution something less than three years ago.

Probably no country in the world has been more grievously mishandled than Hayti. There is often a temptation to be jocular at its expense, to poke fun at its generals who join in a scramble for pennies thrown off with a five-dollar bill.

JUVENILE DELINQUENCY.

Winnipeg has a Superintendent of Neglected Children and a Juvenile Court, being awake to the necessities of a modern city. The third annual report of the Superintendent throws much light on the problem of the delinquent child.

An excellent idea has been worked out in certain other towns, in the "Big Brothers" organizations, where any man with a desire to give what assistance he can in social service takes on a boy under his special charge.

TOO MUCH WASTE.

Fire losses in Canada and the United States for the first six months of 1911 amount to \$129,000,000, showing an increase of \$39,000,000 over the total for the corresponding period of 1910.

The worst feature about this increase of loss is that it imposes a heavy burden not shown by the total of property destroyed. A heavier outlay on the part of the insurance people necessitates a raising of insurance rates; and that cost falls on the public, for every tenant has to pay his share of the landlord's insurance.

PLAIN TRUTHS FOR CANADIANS.

THE RECIPROcity AGREEMENT WILL CHECK THE EAST AND WEST DEVELOPMENT OF CANADA AND MAKE THAT COUNTRY A BUSINESS PART OF THE UNITED STATES, WITH THE LINES OF TRAFFIC RUNNING MORE TO THE NORTH AND SOUTH.

MACKINTOSH'S WEEKLY LETTER

St. John, Aug. 3.—There seems to have been two principal reasons back of the unsettled conditions which have prevailed in the securities markets during the past week.

The Montreal Market was sympathetically affected by the setback in prices in New York, but perhaps the majority of Canadian issues were affected more particularly by the action of a number of Canadian banks in calling their loans.

Steel Common was, perhaps, more adversely affected by the setback than any other stock on the list. The way the stock has been acting in the market recently indicates that its technical market position is rather weak.

Several of the accounts in good shape are finding it advisable to take a loss in this issue and try to make it up in some other stock that appears to have better chances than Steel seems to have at the present time.

The Dominion Parliament had dissolved, and the Liberal government was about to be re-elected.

FERRY MEN GET HIGHER SALARIES

Collectors and Mates Advanced \$10 Month, while Superintendent Gets \$15—Expense Limit Raised on New Boat.

At the monthly meeting of the Ferry Committee yesterday the limit of expenditure on the new ferry steamer was reported to be \$26,325. The expenditure on the old steamer was increased by \$7,500; the salaries of the collectors and mates were raised \$10 a month; the Ferry Superintendent was given the additional amount of \$15 a month, and steam steering gear, costing about \$2,000, was authorized for the new steamer.

JUST THE MEDICINE YOU NEED.

Your color is bad, tongue is furred, eyes are dull, appetite is poor, your stomach needs toning, your liver needs awakening, try Dr. Hamilton's Pills.

Doctor—I had a singularly appropriate case today. Wife—What was it, dear? Doctor—I was called to attend a grass widow with hay fever.

Got Overheated—sat in a Draught—that night I had a chill—and the next day, my back nearly killed me.

"Luckily, I happened to think of my old friends, GIN PILLS, and started right in to take them. In a few hours, the pain was easier—and by suppertime, I was able to sit up. Next day, I was all right again."

You have got to be mighty careful in hot weather, if you don't want to be laid up with Kidney Trouble. You are so apt to be imprudent and do things which you shouldn't, in warm weather. And it is so easy to take cold, even on the hottest days.

When the first symptoms appear, you should take "GIN PILLS." They will cure pain in the back and Kidney Colds quicker than any other medicine known.

GIN PILLS are wonderful in their action on the Kidneys and Bladder. They relieve the congestion—soothe and heal the inflamed membranes—and neutralize the excess of uric acid which accumulates.

You feel the relief at once—and a short treatment with GIN PILLS will promptly cure the trouble.

Sold on a positive guarantee of money back if they fail to give complete satisfaction. At all dealers—50c a box—6 for \$2.50—or direct by mail on receipt of price. Write for free sample to Dept. Y National Drug and Chemical Co. of Canada Limited, - Toronto.

RAGING HEADACHE STOPPED AT ONCE

When He Took "Fruit-a-lives"

Stanly, Ont., Sept. 23rd, 1910. "You certainly have the Greatest Cured me and since then (nearly six years ago) it is only necessary for me to take one occasionally to preserve me in my present good health. I was 65 years old yesterday and have been a general store keeper at the above address for twenty-five years."

"I did so, with what I would call amazing results. They completely cured me and since then (nearly six years ago) it is only necessary for me to take one occasionally to preserve me in my present good health. I was 65 years old yesterday and have been a general store keeper at the above address for twenty-five years."

As Mr. Pitt says "Fruit-a-lives" is the greatest headache cure in the world.

Dealers everywhere have "Fruit-a-lives" at 50c a box, 6 for \$2.50 or trial size, 25c, or sent on receipt of price by Fruit-a-lives Limited, Ottawa.

mended that the request of the collectors for increased pay be granted. The report was received and taken up section by section.

On recommendation of the superintendent, and motion of Ald. Potts, it was decided to ask for authority to fit the boat with steam steering gear.

After some discussion as to the cost of the boat the original report of the Superintendent was produced, showing the estimated cost of \$20,000 purchase price, \$2,000 towage, etc., \$5,000 repairs at St. John and \$5,000 duty—total \$35,000.

Ald. Kierstead moved that the Common Council be asked to authorize additional payments up to \$42,500, including the duty. Carried.

The Comptroller was heard with regard to a bill of \$400 from J. S. Gregory for spruce and birch planking. It had been arranged that the city should pay \$75 for what had been used and Mr. Gregory would take back the balance. This was approved.

Ald. Kierstead moved that the mates be given an increase of \$10 a month. Carried.

Ald. Potts moved that the Superintendent be produced, showing the estimated cost of the new ferry steamer, including the duty. The total cost of the boat to date, including duty of \$5,000, to July 20, was \$36,325. He asked for additional equipment for the boat at a cost of \$2,000. Repairs on the Western Extension had amounted to \$4,846, and the total expenditure of the department to date was reported to be \$25,612.23. He recom-

On motion of Ald. Potts the Council will be requested to furnish the necessary funds for other expenses for the trip.

If Laurier is defeated the Stars and Stripes will fly at half mast.

SAINT JOHN, SATURDAY MORNING, AUG. 5, 1911.
WELCOME HOME!

The spontaneous and hearty welcome which greeted Hon. J. D. Hazen on his return from England yesterday, was a well merited tribute to the Premier who has worthily upheld the loyalty of the people of New Brunswick as their representative at the Coronation and the attendant festivities. It was felt throughout the Province on Mr. Hazen's departure nearly three months ago that the lot could not have fallen to a man better fitted by personality or as a public speaker to represent the people, and he has fully justified that opinion.

But, if we mistake not, the welcome to the Premier meant more than that. It is safe to say that no public man in this Province has done so much during a few weeks spent in England to make known and popularize New Brunswick among the people of the Old Country. The reports which have been published in the press show that Mr. Hazen regarded his visit to England as having a wider purpose than to attend the official ceremonies of the Coronation. He has been engaged in a campaign of publicity for New Brunswick which cannot but have lasting and beneficial results. It was an unique opportunity and from the reports which he brings home his work has been crowned with success in many directions.

At the banquet to be given in his honor on Thursday of next week a fitting opportunity will be afforded to the Premier's friends and supporters to show their appreciation of him. But apart from politics it is as a public man of sterling qualities that Mr. Hazen is held in high esteem by the people of New Brunswick. The Standard feels that it but echoes the voice of the Province when it bids Mr. Hazen "Welcome Home!"

A WORD TO THE FARMER.

By sweeping away all the protection he now enjoys the Reciprocity Agreement with the United States will deprive the Canadian farmer of the monopoly of his home market which today takes 80 per cent. of his produce. Once the Agreement is ratified the Canadian farmer will divide his market with the farmers across the border and will also have to compete with a dozen other nations who will receive the same benefit at his expense.

The present Canadian duties, which now protect his agricultural produce from competition, as compared with the provisions of the trade agreement, are as follows:—

Let us take cattle, the first item on the list, and see what benefit will be derived by the Canadian farmer under Reciprocity. The following figures give the comparative prices of cattle at the present time: In Maine (quoting Senate Document 849), dairy cows are worth \$33 and other cattle \$16.90. In Nova Scotia, dairy cows are worth \$37 and other cattle \$29. In New Brunswick they are worth \$34 and \$28 respectively. In New York dairy cows are worth \$39.50 and other cattle \$18.20. In Ontario dairy cows are quoted at \$48 and other cattle \$34. In Minnesota dairy cows are put at \$33 and other cattle at \$14.20. In Manitoba, they run \$40 and \$23. In North Dakota, they stand \$33.50 and \$20.50. In Saskatchewan, they go \$41 and \$31.

It is obvious from the foregoing figures that the

Canadian cattle-raiser cannot expect higher prices for his cattle once the barrier that protects him is removed. His prices will be hammered down by American competition. The same is true of many other products which are higher in Canada today than in the United States. It should also be remembered that notwithstanding the American market to which the United States farmer has access tens of thousands of farms have been abandoned. The Canadian farmer is told reciprocity would give him markets instead of one. It will have no such satisfactory result. The Agreement will level the tariff wall which now protects him and throw his home market open to the farmers of half the world.

PRESIDENT SIMON RETIRES.

One of the most delightful of the many charming stories that cluster about Port au Prince represents a bare-legged black man running down the main street pursued by another black man who took pot shots at him with a big revolver. An Englishman, who requested a chance stranded in the loathsome town, requested an explanation. "The man is a tailor," he was told; "the man is the Adjutant General to come back and pay for the patch on his breeches." The episode is recalled by the Boston Transcript in commenting upon the recent report of President Simon of Hayti having tactfully retreated to a national "warship." President Simon does not relish the notion of returning and trying to pay for the patch.

This autocrat's origin, in a political sense, is so remote that it demands elaborate explanation. President Nord Alexis having had his share of graft, Simon and other hungry patriots desired a revolution something less than three years ago. Nord Alexis retired in good order and Simon was "regularly elected" president by the Congress in December, 1908. We infer that he has not been good to his supporters. Perhaps he discovered, early in the game, that there were not enough to all the houses to go around. He seems to have clung to the perquisites until other revolutionaries, who thought they could use a few custom houses in their own business, ruthlessly pried him loose. The fraction of the Haytian "navy" that received him is described as a vessel worth \$5,000 which cost the republic half a million. On such a ship a Haytian ex-president should feel very much at home.

Probably no country in the world has been more grievously mishandled than Hayti. There is often a temptation to be jocular at its expense, to poke fun at its generals who join in a scramble for pennies thrown by a jovial tourist, its revolutionists who can be bought off with a five-dollar bill, its customs officials who have no eyes for the stacks of logwood that mysteriously disappear between night and morning, and its presidents who do queer things with the national debt. Such performances prompt to laughter, at first glance, but at the second thought they provoke us to melancholy. One of these days the United States will "take hold" of Hayti. If they are well advised they will put on gloves and wear clothespins on their noses.

JUVENILE DELINQUENCY.

Winnipeg has a Superintendent of Neglected Children and a Juvenile Court, being awake to the necessities of a modern city. The third annual report of the Superintendent throws much light on the problem of the delinquent child by a simple little map of the city, shaded to show from which district the majority of the child offenders come. If it were natural depravity, or original sin, which sends these neglected babies to the Juvenile Court, they should come from all parts of the city, but the fact remains that they do not.

The saying of Socrates to the effect that an ideal state could only be secured by beginning the training of its citizens before the age of ten years is quoted by the report. It might be even more appropriate to call to mind the dictum of another philosopher to the effect that the training of a child should begin with his grandparents, because the Juvenile Court deals nearly as much with parents as with children. Contributing to the delinquency of a child is severely dealt with. Prevention is aimed at. Of course, nothing but the wiping out of the slums in any city could operate as an absolute preventive, but even the knowledge that someone takes an interest in him may do much to keep a neglected or mischievous boy from making trouble.

An excellent idea has been worked out in certain other towns, in the "Big Brothers" organizations, where any man with a desire to give what assistance he can in social service takes one boy under his special charge, gives him advice and what assistance he can, moral rather than material, and generally brothers him. It has worked out very well when tried, for the men as well as the boys. Work among the children is almost the only branch of social service which can be other than merely palliative. Permanent results can be obtained.

TOO MUCH WASTE.

Fire losses in Canada and the United States for the first six months of 1911 amount to \$129,000,000, showing an increase of \$30,000,000 over the total for the corresponding period of 1910. On this continent prodigality in feeding the flames is increasing at an alarming rate, despite the passing of improved building laws and more expensive fire protection.

The worst feature about this increase of loss is that it imposes new burdens not shown by the total of property destroyed. A heavier outlay on the part of the insurance people necessitates a raising of insurance rates; and that coat falls on the public, for every tenant has to pay his share of the landlord's insurance.

Statistics collected in Europe by American consultants, just made public by the state department, show our lag far behind European nations in the important art of combating one of the great destructive forces of nature. In five classes of European cities, arranged according to population, the per capita fire loss in 1907 varied from 65 cents in cities of more than 200,000 population to \$1.67 in cities of from 50,000 to 100,000. But in this country the figures varied from \$2.14 to \$3.28. Our average annual fire loss is more than \$2.50 per capita, while in Austria the average is 29 cents, in Denmark 26, in France 30, in Germany 49, in Switzerland 30 and in Italy 12.

The instinct of invention seems to have largely failed in dealing with this source of economic waste. And it says little for our up-to-dateness that the American continent is willing to burn up each year five to twenty times as much property as is burned up in European countries.

PLAIN TRUTHS FOR CANADIANS.

(New York Correspondent.)
THE RECIPROCAL AGREEMENT WILL CHECK THE EAST AND WEST DEVELOPMENT OF CANADA AND MAKE THAT COUNTRY A BUSINESS PART OF THE UNITED STATES, WITH THE LINES OF TRAFFIC RUNNING MORE TO THE NORTH AND SOUTH. RECIPROCALITY WILL REALLY CUT CANADA INTO TWO COUNTRIES. THE SECTION EAST OF LAKE SUPERIOR WILL MERGE WITH THE NEW ENGLAND STATES, AND THE WEST WILL BECOME PART OF THE WEST OF THE UNITED STATES.

MACKINTOSH'S WEEKLY LETTER

St. John, Aug. 3.—There seems to have been two principal reasons back of the unsettled conditions which have prevailed in the securities markets during the past week. The Wall Street Market was more particularly affected by selling for London account, due to the reported trouble in Morocco as possible between Germany and France. Premier Assolant's statement last Thursday that the situation was fraught with difficulty caused a good deal of general unrest and occasioned a very considerable amount of selling. War scares always have a way of hurting the securities markets very quickly, more particularly because they are followed by a large amount of what is known as "foreign selling," and when such is in process, a rule a very little support is given. On Saturday the new of the conference between the representatives of France and Germany caused a very much better feeling, and advices from principal London banking houses on Monday were to the effect that the further trouble was now unlikely, at least a trouble of magnitude that would involve England taking a part in it.

The Montreal Market was sympathetically affected by the setback in prices in New York, but perhaps the majority of Canadian issues were affected more particularly by the action of a number of Canadian banks in calling their loans rather freely towards the end of last week. Perhaps these loans were curtailed to a somewhat greater extent than usual this time, not so much because the banks were ready as they were strengthening their position as much as possible to get ready for the movement of the Canadian wheat crop. The calling of loans affected the market more than usual, too, because there was very little absorbing power, even at the lower prices, as brokers generally reported that such orders as they were in under the market, had been pretty generally cancelled when the war scare cropped up. Brokers generally were somewhat apprehensive regarding the outlook, and their action in calling for additional margins might have been a cause of precipitating a further amount of stock on the market. On Monday a generally better tone prevailed, both because there was better news over cable, and being the last day of the month, the banks had stopped calling loans.

Dominion Steel Corporation.
Steel Common was, perhaps, more adversely affected by the setback than any other stock on the list. The way the stock has been acting in the market recently indicates that its technical market position is rather weak, and that a great deal too much of the stock has been carried on weekly margined accounts. Besides, the stock has been acting so badly for some protracted time now that even holders who have their accounts in good shape are finding it advisable to take a loss in this stock and try to make it up in some other stock that appears to have better chances than Steel seems to have at the present time. When it is generally known that the Dominion Parliament had dissolved, it was expected in some quarters that the Liberal government would make known their intention of renewing the bounties which expired on the

1st of July last, if for no other reason than that it might be a good campaign argument. News in Nova Scotia, more especially as the elections are now so close. Up to the time of writing, however, no pronouncement of any kind has been made, but it is thought probable that party leaders when campaigning down in Nova Scotia will likely intimate that it is the intention of the government to favorably consider the proposal to extend the bounties, at least for a time. There is no doubt that the Company's of ordinary world welcome such action, because, in a general way, it has taken somewhat longer to get the component parts working together than could be estimated a couple of years ago, and all that the Plummer management wants is a fair chance to get the works on their feet, and they will then be more than able to work out the destiny of the Company without further government assistance.

Pearson Stocks.
The so-called Latin or Pearson stocks like Rio, Sao Paulo, and Mexico, have been attracting more than ordinary attention, because there has been a pretty well confirmed report that in connection with his enterprises Dr. P. S. Pearson is preparing to allow his connection to more than make up any losses they may have sustained in the Rock Island episode. There has been a very active trading market for Rio Common; in which London has been very largely the seller, while Toronto interests have been picking up the stock just as quickly as possible. The situation seems to be that London does not look for a dividend increase in 1910 until next February, while Toronto expects it to come along about October. Mexico Power has recovered about half of the decline it sustained at the time of the trouble in Mexico, and some people are now hoping for an increase from 4 per cent. to 6 per cent. Toronto railway interests have been consistently bullish on Sao Paulo, and claim to have advices from good sources that the dividend will be increased from 10 per cent. to 12 per cent. by the end of the company's present fiscal year.

DEBEC NEWS.
DeBec, Aug. 3.—The heavy gale at this place Friday night was very destructive to fruit and ornamental trees in and about the village. Several parties from this place have visited Sugar Brook and Bear parties in quest of blueberries which are very plentiful. Haying operations are about completed. The hay is much lighter than last year but of a superior quality. The Moral and Social Reform council held their monthly meeting in the Foresters' Hall Monday evening. Rev. Alfred Gould was the speaker of the evening.

The Methodist W. M. S. held its monthly meeting and annual picnic in Mr. Dicklaugh's grove. Mrs. S. Billings, vice-president, presided and a very instructive and interesting time was spent. Picnic tea was served followed by icee. Jas. Sanderson, who has been in the United States for some years, was on a visit to his friends and relatives here. While at DeBec a family picnic was held in his honor, at which a very enjoyable time was spent. A serious fire took place at Benton, about nine miles below DeBec, where the large dwelling house and millinery establishment belonging to Mrs. Wm. Sharp were destroyed. The fire, it is supposed, originated from a defective fuse. Only a few articles of clothing were saved.

The Presbyterian W. M. S. met at the home of Mrs. J. Montgomery, Bedell. Mrs. Johnston, of Woodstock, has been visiting her son, Wm. Johnston, of this place. Mrs. Wm. Laverty is slightly improved in health. Mr. and Mrs. Gordon Neal are spending a few weeks at Nickerson's Lake, Maine. Mrs. W. J. Craig leaves soon for Grand Falls, where she will spend her vacation. Miss Mabel McKinnie, of Benton Ridge, spent a week with her aunt, Mrs. A. McElroy. The many friends of Mrs. W. L. Kennedy are pleased to see her much improved in health since her vacation at St. John.

Mrs. F. R. Blair and young daughter, Miss Winifred, are spending their vacation at St. Andrews. Mrs. Geo. Laverty gave a very instructive and comprehensive report of the S.S. convention held at Florenceville. Mrs. Malloy has returned to DeBec and is the guest of Miss Mary O'Donnell. Mrs. S. Nason spent a few days at McKenney's Corner, the guest of her daughter, Mrs. Ira Carson. Miss Faye Scott is visiting at the home of Rev. Mr. Todd, Richmond. Rev. and Mrs. McDonald are spending their vacation at the present time. Mrs. L. Wright is visiting her parents at St. John.

Mrs. T. Hoyt, of Woodstock, is visiting her sister, Mrs. B. Hoyt, of this place. Rev. A. Lucas Here. The Rev. A. Lucas, a former secretary of the Nova Brunswick Sunday School association, and now an Inter-

national Field Secretary, is to spend tomorrow in this city, preaching in some of the churches and speaking at a mass meeting of Sunday school workers at half past three in the afternoon in Centenary church. His services are given to this association for a month of special work in raising finances and holding some meetings throughout the province. Last summer he spent a similar month with the Nova Scotia Sunday school association. All Sunday school work has received much benefit from this great movement, and it is hoped that citizens will make a hearty response to the appeals now to be made to them in its behalf. A movement which has given so much impetus to the religious education of childhood and youth is as patriotic as it is religious. The principles for which this movement stands will make good citizens for the future.

McGOVERN IS NOW AFTER COULON'S TITLE

PHIL McGOVERN, WHO IS 'TERRY'S' BROTHER, is anxious for a struggle with Johnny Coulon, who claims the main title, and is satisfied that he could make Coulon extend his reign for a moment.

WOODSTOCK AND FREDERICTON WERE YESTERDAY'S WINNERS

St. John Team Could Not Win from Capital Players, but the Game was a Good One—Happy lot's Men Beaten in Woodstock After One-sided Contest.

N. B. AND MAINE LEAGUE. Yesterday's Games. At St. John—Fredericton, 5; St. John's, 1. At Woodstock—Woodstock, 12; Calais, 2. The League Standing. Woodstock 12, Calais 2. Woodstock, N. B., Aug. 4.—Woodstock has a contract to pull down the leaders, Fredericton was defeated by the locals twice on Tuesday, Calais got their good and hard today by a score of 12 to 2, and with Moser on the mound, it is expected that the Marathons will take their medicine tomorrow. Calais did not play a bad game today but it missed the services of Manager Iott, who is out of the game suffering from blood poisoning in his arm and under the doctor's care. The batting of the locals was terrific. Mitchell was knocked out of the box in the second inning after seven hits were made off his delivery. Ryan tried to stem the torrent of blows but he was driven to the bench in the fourth after three hits were made and O'Neill finished the game with four hits against him. At critical times Calais pitchers got poor support. Five scattered hits were made off Urquhart and he had the 'Indian' sign on all, particularly the Indians, Neptune and Mitchell. Black, O'Donnell and Wessinger each had a three bagger to their credit. Urquhart struck out 9, Ryan 3, and O'Neill 1. Moser, the Boston American twirler, is under contract for the remainder of the season, and Perley, who led the batting list until forced to retire by sickness at the early part of the summer, has recovered and will return from Waterville, Maine, to go on duty early next week. There is hardly any doubt but that the locals are the best batting team in the league, but the failure of their pitchers, Peasley and Simpson, to make good, is giving them an up hill fight at present. The box score of today's game follows: Calais. ABRHPOAE. Neptune, ss., . . . 5 0 1 2 1 0. Johnson, cf., . . . 4 1 1 1 1 3. Cobb, 2b., . . . 4 1 0 2 0. Wait, c., . . . 3 0 0 4 0 2. Allen, lf., . . . 4 0 1 2 6 0.

MARATHONS AND WOODSTOCK WILL PLAY THIS AFTERNOON

Carlton County Team Has Beaten Fredericton and Calais and will Now Clash with League Leaders—Should be a Great Game.

It will be some kind of a ball game on the Marathon grounds this afternoon when the Marathons, who now lead the N. B. and Maine League, will clash with Charley Allan's Woodstock aggregation. The Woodstock boys this week have scored victories over Fredericton and Calais, and expect to wallop the Marathons soundly this afternoon. In fact judging from the tone of the Woodstock dispatch printed on this page, there is expected to be nothing to it but the visitors, George Winter's team will, however, take some beating and if the Woodstock team can get away with the quarrel they will have to show far better form than they have yet displayed in any of their engagements here since the reorganization of the Marathon team. Judging from their victory over Calais yesterday they are much stronger than ever before. Much is expected of Mosher, the new Boston American catcher, who will be on the mound today and who is said to be the classiest article in the pitching line in the league. Al Sweet will be the box artist for the Greeks and there is no doubt about his ability to deliver the goods in that job. His one hit game which he pitched the other day against the St. John's is evidence of this fact. The Marathons will present their strongest lineup in the field and expect to win. On the other hand Woodstock is confident that they have just commenced their race for first place. Judging from their performances this week they are going some, and if they can win from the Marathons should come near to first place. This afternoon's game will give an excellent chance to see just what justification there is for the Woodstock idea. The teams will line up as follows, the men being placed in their batting order: Marathons—Winter, short stop; Wilkins, 3rd base; Fryer, 2nd base; Conley, catcher; McGarry, left field; Hill, centre field; Nelson, right field; Lynch, 1st base; Sweet, pitcher. Woodstock—Black, centre field; Wilder, left field; Keane, short stop; O'Donnell, catcher; Allen, 1st base; Paquet, 2nd base; Mayo, right field; Wessinger, 3rd base; Moser, pitcher. The game will be called at 3 o'clock sharp.

THE KAISER'S RESULTS OF THE BIG LEAGUES

YACHT LOST COWES RACE. Cowen, Isle of Wight, Aug. 4.—The Cowes regatta ended today. Viscount Iveagh's schooner Cetonia took the royal yacht squadron's prize of £500 in the big class on time allowance. Emperor William's Meteor, which finished first, had to be contented with second place. Germana, which was third. The new English schooner Waterwitch made a disappointing display, being last. King Alfonso's Hispania, won her first prize of this meeting by defeating the fifteen metre cracks like Paula and Sophie Elizabeth. The Spanish monarch personally steered his craft to victory. They came a single by Ganley and the second run was scored. There were no runs in the fourth inning but in the fifth inning the Frederictons gained three more runs. Three singles and a sacrifice were responsible. There was no more scoring until the eighth inning when the St. John's made a run and saved themselves from a shutout. The Germana, who drew a base on balls and went to third when Pinkerton singled to centre field, Ramsey hit a long fly to centre and Siney scored. Sullivan struck out and the side was retired. This finished the scoring and the Fredericton won the game and went up a notch in the league standing. Dever was taken out of the right garden in the sixth inning and Mulvey was put in his place. Barring the few errors on each side, the game was a good one. The following is the box score and summary: St. John's. ABRHBP OA E. Siney, cf., . . . 3 1 1 2 4 0 0. Pinkerton, ss., . . . 3 0 2 2 3 0 0. Ramsey, 2b., . . . 4 0 0 0 0 1 0. Sullivan, lb., . . . 4 0 0 0 7 0 0. Sabourin, 3b., . . . 4 0 0 0 1 1 0. Dever, rf., . . . 1 0 0 0 0 0 1. Mulvey, lf., . . . 3 0 0 0 1 0 0. Mahoney, if., . . . 3 0 0 0 1 0 2. Callahan, p., . . . 3 0 0 0 1 1 0. Total. . . . 31 1 5 6 27 7 3. Fredericton. ABRHBP OA E. Griffin, 2b., . . . 4 2 0 0 0 2 0. Ganley, cf., . . . 4 0 2 2 3 0 0. Duggan, lf., . . . 4 0 0 0 9 0 0. Hughes, 3b., . . . 4 0 0 0 2 0 0. L. Connolly, if., . . . 4 0 1 1 0 0 1. R. Connolly, 2b., . . . 4 0 0 0 2 0 1. GOOD RACING ON FIRST DAY AT MOOSEPATH

The first events of the two days' racing meet were run at Moosepath Park yesterday and the attendance was large considering that the day was not a holiday. About 500 followers of the races, turned out, the ladies forming no small portion of the attendance. The races were exciting at times, though no records were demolished by the speeders. There were frequent moments of intense enthusiasm, and the fever gripped a good many of the spectators. The first event called was the 230 trot. In this event Rapidity, owned by John E. Sullivan, of Fredericton, carried off first money, winning three straight heats. Second money went to Royal Pandect, a local horse, owned by John Brickley. Our Proteins, Moncton Stables, and Bottom, a Fredericton horse, captured third and fourth prize money. In the 214 trot and 217 pace, Mary Cromwell, F. Boutiller's horse, won first money; Prince Louis, J. W. Smith, St. Stephen, second money; Leonard Wilton, A. E. Trites, Halifax, third prize money; Candy Girl, Moncton Stables, carried off fourth money. In the 250 trot there were six starters and a few warm bruises ensued between start and finish. Rapidity crossing the tape first in 2:32 for the heat, with Our Protein a close second, Royal Pandect, Bottom, Prince Albert and Grace Abbott coming in in rotation. The second heat went to Rapidity in the time being 2:34. Royal Pandect, John Brickley's horse arriving next in order. Rapidity again crossed the line in first position in the third heat, time 2:32. Royal Pandect close second. Again Rapidity got away with a rush, and after a few yards gradually pulled away from the string leading right to the end coming in like a whirlwind with Royal Pandect doggedly following a dangerous second. Our Protein and Bottom finished in third and fourth place. The 214 Trot and 217 Pace was more brisk than the 230 event, and was run off in four heats, Prince Louis taking the first, and Mary Cromwell second, third and final. The first heat was covered by Prince Louis in 2:24 3/4; second, third and fourth places being taken by Queen's Girl, McEwen Bell and Mary Cromwell. In the second heat M. Cromwell completed the circuit in 2:21 3/4, followed by Oswego Boy, the American horse owned by M. V. Drause, Attleboro, Mass., with Prince Louis third. The third heat went to Mary Cromwell (F. Boutiller), in 2:20 1/2. This heat was decidedly a warm one. Mary Cromwell, a short distance from the start, forged to the front, and though hard for the first half of the course, tenaciously clung to first position, and finished up first with but a few feet separating the leader and closest competitor, Leonard Wilton (A. E. Trites). In the final heat the starters were Mary Cromwell, Leonard Wilton, Prince Louis and Candy Girl. It was a neck to neck grueling for the first lap, Mary Cromwell in a spurt drew ahead, crossing the line in 2:23 a few seconds in advance of Leonard Wilton, and carrying off first money for the event. The summary: 230 Trot. Rapidity (John E. Sullivan) . . . 1 1 1. Our Protein (Moncton Stables) . . . 2 6 3. Royal Pandect (John Brickley) . . . 3 2 2. St. John's . . . 4 3 4. Bottom (L. B. Phair, Fton) . . . 5 4 6. Prince Albert (F. R. Rideout, Medford, Mass.) . . . 6 5 5. Grace Abbott (A. E. Trites, Salisbury) . . . 7 6 7. Time—2:32; 2:28 1/2; 2:28 1/2. 214 Trot; 217 Pace. Prince Louis (J. W. Smith, St. Stephen) . . . 1 3 3 3.

five entries, is the programme and with the excellent field of horses all the lovers of harness racing should be more than pleased. The track is in excellent shape for fast heats. Thomas J. Doyle is the starter and he is giving the best of satisfaction in that position. There is a great deal of speculation on the races for this afternoon, and the heats promise to be most exciting from start to finish. The best trot and pace horses on the circuit are entered for this afternoon's events and the famous bay gelding Gallagher, with a mark of 2:02 1/2, will be one of the starters in the free for all. There are four other very fast ones in this class and old Moosepath track will be the scene of some lively stopping. A special train will leave the Union depot at two o'clock sharp for the track and will return after the racing. A large crowd is expected to attend this afternoon.

Order Some! Labatt's Ale and Stout London Lager Comet Beer Premier Beer. When you are jaded—your appetite poor—your system weary—just try a glass of Labatt's. Pleases the palate, refreshes the body, agrees with the weakest stomach. A truly wholesome beverage that really nourishes. For a milder drink try Labatt's. Equal to the finest German brews. Has the true smack of choice hops. Very light, palatable, satisfying. Look for the lavender label. (LAGER STYLE) A temperance brew—tastes and looks like choice lager, but has less than 2 1/2% of proof spirit. Quenches thirst; refreshes; gives appetite. Order some today. (ALE STYLE) The newest non-intoxicant, mild and delicious, with the real flavor and quality of good ale. Complies with local option requirements and may be openly sold anywhere. Order any Labatt product from your dealer, or direct. Ask For Labatt's. Parties in Scott Act Localities supplied for personal use. Write St. John Agency, 20-24 Water Street.

La Maritana The cigar with a reputation. This reputation is, that "La Maritana" is always the same—and that a man can always depend on it for a thoroughly satisfying smoke. What more could be said for a cigar? Also makers of BLUE BELL Limited, Montreal. High grade J. R. C. PIPES. The popular 5c cigar. 75 years' experience.

STELLARTON WON FROM HALIFAX TEAM. Halifax, Aug. 4.—The Stellarton baseball team, champions of the Fictio county league, played rings around the Standards this afternoon, trimming them to the tune of 9 to 4. The locals were miles off color and never played so wretchedly before. Stellarton have a fast team and they have won eleven consecutive games this season. The Socials will tackle them tomorrow. RIFLE MATCH TODAY. St. John's City Rifle Club will hold their regular weekly match this afternoon on the local rifle range at 1:30 sharp. A good attendance is expected.

McGOVERN IS NOW AFTER COULON'S TITLE

Bill McGovern, brother of the once redoubtable Terry, has championship aspirations. He is anxious for a wrangle with Johnny Coulon, who claims the bantam title, and is satisfied that he could make Coulon extend himself to win. McGovern is of the slam-bang style of fighter, who never lets up for a moment.

WOODSTOCK AND FREDERICTON WERE YESTERDAY'S WINNERS

St. John Team Could Not Win from Capital Players, but the Game was a Good One—Happy Iott's Men Beaten in Woodstock After One-sided Contest.

Table with columns: N. B. AND MAINE LEAGUE, Yesterday's Games, Woodstock 12, Calais 2.

Woodstock 12, Calais 2. Woodstock N. B., Aug. 4.—Woodstock has a contract to pull down the leaders. Fredericton was defeated by the locals twice on Tuesday. Calais got their good and hard today by a score of 12 to 2, and with Moser on the mound, it is expected that the Marathons will take their medicine tomorrow.

Calais did not play a bad game today but it missed the services of Manager Iott, who is out of the game suffering from blood poisoning in his arm and under the doctor's care. The batting of the locals was terrific. Mitchell was knocked out of the box in the second inning after seven hits were made off his delivery. Ryan tried to stem the torrent of blows but he was driven to the bench in the fourth after three hits were made and O'Neill finished the game with four hits against him. At critical times Calais pitchers got poor support.

Five scattered hits were made off Urquhart and he had the "Indian" sign on all, particularly the Indians, Neptune and Mitchell. Black, O'Donnell and Wessinger each had a three bagger to their credit. Urquhart struck out 9, Ryan 4 and O'Neill 1. Moser, the Boston American pitcher, is under contract for the remainder of the season, and Perley, who led the batting list until forced to retire by sickness at the early part of the summer, has recovered and will return from Waterville, Maine, to go on duty early next week.

There is hardly any doubt but that the locals are the best batting team in the league, but the failure of their pitchers, Peasley and Stinson, to make good, is giving them an up hill fight at present. The box score of today's game follows:

Table with columns: ABR H PO A E, Neptune, Johnson, Cobb, Watt, Allen.

MARATHONS AND WOODSTOCK WILL PLAY THIS AFTERNOON

Carleton County Team Has Beaten Fredericton and Calais and will Now Clash with League Leaders—Should be a Great Game.

It will be some kind of a ball game on the Marathon grounds this afternoon when the Marathons, who now lead the N. B. and Maine League, will clash with Charley Allan's Woodstock aggregation. The Woodstock boys this week have scored victories over Fredericton and Calais, and are expected to wallop the Marathons soundly this afternoon. In fact judging from the tone of the Woodstock dispatch printed on this page, there is expected to be nothing to it but the visitors. George Winter's braves will, however, take some beating and if the Woodstock team can get away with the quarrel they will have to show far better form than they have yet displayed in any of their engagements here since the reorganization of the Marathon team. Judging from their victory over Calais yesterday they are much stronger than ever before.

THE KAISER'S YACHT LOST OF THE BIG LEAGUES

Cowes, Isle of Wight, Aug. 4.—The Cowes regatta ended today. Viscount Ivesagh's schooner Cetonia took the royal yacht squadron's prize of \$500 in the big class on time allowance. Emperor William's Meteor, which was second place, had to be contented with second place. The Germana was third. The new English schooner Waterwitch made a disappointing display, being last. Al Sweet will be the box artist for the Greeks.

There were no runs in the fourth inning but in the fifth inning the Fredericton gals scored three runs on singles and a sacrifice were responsible. There was no more scoring until the eighth inning when the St. John's made a run and saved themselves from a shutout. With one out, Siney drew a base on balls and went to third when Pinkerton singled to centre field. Ramsey hit a long fly to centre and Siney scored. Sullivan struck out and the side was retired. This finished the scoring and the Fredericton's won the game and went up a notch in the league standing.

Dever was taken out of the right garden in the sixth inning and Mulvey was put in his place. Barring the few errors on each side the game was a good one. The following is the box score and summary:

Table with columns: ABR H TB PO A E, Griffin, Ganley, Duggan, Hughes, L. Connolly, R. Connolly, Mahoney, Murray, Warwick.

Summary—Marathon grounds, Friday afternoon, Aug. 4th, 1911.—Fredericton, 5; St. John's, 1. Two base hit, Griffin, Duggan 2, Hughes 2, R. Connolly 4, Warwick; by Warwick 9, viz: Siney, Ramsey, Sullivan 3, Sabourin, Mulvey 2, Callahan, 10, hit; Siney, Struck out by Callahan, 10, viz: Griffin, Duggan 2, Hughes 2, R. Connolly 4, Warwick; by Warwick 9, viz: Siney, Ramsey, Sullivan 3, Sabourin, Mulvey 2, Callahan, 10, hit; Siney, Struck out by Callahan, 10, viz: Griffin, Duggan 2, Hughes 2, R. Connolly, 4, Warwick; by Warwick 9, viz: Siney, Ramsey, Sullivan 3, Sabourin, Mulvey 2, Callahan, 10, hit. Time of game, 1:45. Attendance, 1250.

STELLARTON WON FROM HALIFAX TEAM

Halifax, Aug. 4.—The Stellarton baseball team, champions of the Pictou county league, played rings around the Standards this afternoon, trifling them to the tune of 9 to 4. The locals were miles off color and never played so wretchedly before. Stellarton have a fast team and they have won eleven consecutive games this season. The Socials will tackle them tomorrow.

RIFLE MATCH TODAY. St. John City Rifle Club will hold their regular weekly range match this afternoon on the local rifle range at 1:30 sharp. A good attendance is expected.

GOOD RACING ON FIRST DAY AT MOOSEPATH

The first events of the two days' racing met were run at Moosepath yesterday and the attendance was large considering that the day was not a holiday. About 600 followers of the races, turned out, the ladies forming no small portion of the attendance.

The races were exciting at times, though no records were demolished by the speedsters. There were frequent moments of intense enthusiasm, and the fever gripped a good many of the spectators. The first event called was the 2:30 trot. In this event Rapidly, owned by John E. Sullivan, of Fredericton, carried off first money, winning three straight heats. Second money went to Royal Pandect, a local horse, owned by John Brickley. Our Protein, Moncton Stables, and Bottom, a Fredericton horse, captured third and fourth prize money.

The second heat went to Rapidly the time being 2:28 1/2. Royal Pandect, John Brickley's horse arriving next in order. Rapidly again crossed the line in first position in the third heat; time 2:28 1/4. Royal Pandect close second. Again Rapidly got away with a rush, following a dangerous second. Our Protein and Bottom finished in third and fourth place.

The 2:14 trot and 2:17 Pace was more brisk than the 2:30 event, and was run off in four heats. Prince Louise taking the first, and Mary Cromwell the second, third and final. Prince Louise in 2:24 3/4; second, third and fourth places being taken by Candy Girl, McEwen Bell and Mary Cromwell.

In the second heat M. Cromwell completed the circuit in 2:21 3/4, followed by Owego Boy, the American horse owned by M. V. Drause, Attleboro, Mass., with Prince Louise third. The third heat went to Mary Cromwell (F. Boutlier), in 2:20 1/2. This heat was decided by a warm one. Mary Cromwell, a short distance from the start, forced to the front, and though pressed hard for the first half of the course, tenaciously clinging to first position, and finished up first with but a few feet separating the leader and closest competitor, Leonard Wilton (A. E. Trites).

RESULTS OF THE BIG LEAGUES

One hundred hours out from New York, from which port she started on Saturday on the 533 mile reciprocity motor boat race to Halifax, the little motor boat Snapshot III, crossed the finish line almost 50 hours behind the leaders and with a tale of heavy seas and cranky engines to account for her delay.

Richard Crowe, fleet captain of the Colonial Yacht Club, of New York, one of the crew of the boat, said after he came ashore tonight, that part of their troubles came from an extra

THE TONIC OF VICTORY.

Army Surgeons Say it Acts Almost As An Anesthetic.

Bonnette, a French army surgeon attached to the Thirty-ninth Artillery writes in the Presse Medicale of the extraordinary indifference to the pain of operation manifested by the soldiers of Napoleon while the great conqueror was sweeping victoriously over Europe.

Victory is the most powerful of restoratives and the deepest anaesthetic. Legless members of the Old Guard, crowded into an ambulance, would at sight of the Emperor rise on their stumps to salute him.

TWO EXPLORERS ON WAY TO FAR NORTH WILL STUDY TRIBES IN ARCTIC CIRCLE

Christian Leden and Harald Thaulow, members of the Norwegian Ethnological Arctic-Canadian Expedition, are now bound for the far north and expect to push their way across the frozen polar sea.

SPORTING DOINGS ABROAD

London, Aug. 1.—On Saturday next, at Celtic Park, Belfast, Jack Johnson to meet Petty Curran, who is the successor of Jim Roche, as the champion of Ireland, for the championship of the world.

All England laughs at the match, but over in Ireland they are taking the matter in a more serious way, and Tom Flanagan, who has been the champion since he entered into the ring, is hard at work making arrangements for the "greatest battle ever placed before the sporting public of Ireland."

The following is taken from a New York paper giving an account of the final day's racing at Saratoga on the 29th of July:— Canada completed her rowing triumph by making the final day of the N.A.A.O. regatta, the sturdy Argonauts from Toronto won three of the six races on the card.

"In grave peril" is said to be the purport of the message from the commander of Laurier's tin pot cruiser to the authorities at Ottawa. Mr. Pugsley might have replied "Me Too!"

As all round political contortionists, Mr. Pugsley and the Canterbury street editors beat all records. Once he saved us from the wicked Grits, once from the wicked Tories, and once from both.

Canadian Oarsmen Gain More Laurels in Second Day's Races for National Amateur Championships

DETROIT BOAT CLUB WINNING INTERMEDIATE FOUR GAINED SWHELL'S, ARUNDEL R.C. (BALTIMORE) SECONDED

FRED WESSELE (HARLEM R.C.) SECONDED IN SENIOR QUARTER MILE

The following is taken from a New York paper giving an account of the final day's racing at Saratoga on the 29th of July:— Canada completed her rowing triumph by making the final day of the N.A.A.O. regatta, the sturdy Argonauts from Toronto won three of the six races on the card.

With fish, the important fishery of the Lake of Galilee, the supplies from the Mediterranean to the fish market at Jerusalem and the necessity to discriminate between kind and kind and to reject all that were without apparent scales or fins would have made the names of several kinds to be expected. As Mr. Hart says in his "Scripture Natural History," the Greeks have left us upward of 400 names for fishes, but the Hebrews not one.

BIRDS IN THE BIBLE

The habits of birds as compared with those of wild beasts cause the former to be more noticed in Scripture than the latter, but this rule seems not to obtain among the writers of Scripture. Mammals as used in sacrifice or for food bear far more largely in their eyes than all other kind of creatures put together.

ADMIRAL KINGSMILL SAYS CONDITION OF NIOBE NOT SERIOUS

THE NIOBE OF THE CANADIAN NAVY

Fish are only mentioned once, in the summary of the plagues of Egypt, in Psalm cv. 35: "He carried their rivers into blood and slew their fish." The absence of Scriptural allusions to any definite kind of fish is remarkable since the memory of the Nile and the lakes and canals of Egypt, which form the mainstay of the Egyptian Empire, is so prominent in the consciousness of England and a purse and stakes of \$2,000. If Barry is successful Dick Armit will have his word and some here early next year to row Barry for the world's championship, for which Armit beat the Englishman last year.

What Women are Doing

Mrs. Matthew Scott, president-general of the Daughters of the American Revolution, has been elected president of a coal mining company at Bloomington, Ill., to succeed former Vice-President Adah E. Stevenson.

The Mayor of Jackson, Miss., recently appointed twelve women as park commissioners.

Miss Beatrice Harraden has been elected to the council of the English Society of Women Journalists. Mrs. Bedford Fenwick was elected president of the society. Mrs. Fenwick is the editor of the British Journal of Nursing and the founder of the International Council of Nurses.

The Woman's Club of Constantinople is said to be the most cosmopolitan in the world. Its membership comprises English, American, French, German, Bulgarian, Russian, Armenian, Greek and Turkish women. Meetings are held monthly and talks are given on literature, travel, music and art.

Major Belle Reynolds is said to be the only woman in the United States holding a military officer's commission. She now lives at Santa Barbara, Cal., and she received her commission in Illinois from Gov. Yates for her heroism at the battle of Shiloh. She recently attended the fiftieth anniversary of her regiment, the Seventeenth Illinois.

Queen Mary's automobile is equipped with a tea basket. The car is of English make, painted green, picked out with fine lines of lighter green, and the mouldings are black. The

MRS. SHONTS AND HER DAUGHTERS RETURN; GREETED BY HUSBAND, AND ALL ARE HAPPY

Mrs. Theodore P. Shonts, wife of the well known New York railroad president, with her daughters, the Duchess de Chaulnes and Miss Marguerite Shonts, and her little grandson have just returned from Europe. Mrs. Shonts greeted the party on their arrival, and was apparently happy to see her little grandson, the Duke de Chaulnes. There had been rumors of separation between Mrs. Shonts and her wife, but neither would discuss the case. The whole party seems to be a very happy one.

A 540 POUND FAMILY OF TWO.

Mr. Rupp of Kansas Thinks He and His Wife Hold a Record. Hays City, Kan., Aug. 3.—The combined weight of my family is 540 pounds; it consists of myself and wife. I am forty pounds heavier than Mrs. Rupp; how much does each of us weigh?

This is a little problem Joseph Rupp of Hills County has submitted to the ten-year-olds who are getting their first insight into the mystery of mathematics. Many have figured it out, while others are begging the grown-ups to help them.

DODD'S KIDNEY PILLS
A convenient and easy way to keep your kidneys cool is by applying the principle of cooling by evaporation, as used in the wet bulb of the wet and dry bulb hygrometer. The butter is placed in a closed receptacle (butter dish with lid) and after this has been placed in a soap plate containing water a wet cloth is put over the dish and distributed in the water. Evaporation goes on at the surface of the cloth and more water is supplied to the cloth below. This keeps the cloth and the butter at a few degrees below the atmospheric temperature and by this means butter can be kept firm in the hottest days.

DARING WOMAN AVIATOR

MISS OLIVE CONGER, a well known aviator, recently made application for an aviator's license, and if she succeeds she will be the first woman in this country to get one. Miss Conger is a daring performer and has made several successful flights.

Mrs. Carrie Chapman Catt was complimented by the International Woman Suffrage Alliance on July 4, when a banquet was given in her honor in London. Mrs. Catt had only for a short visit to London after presiding at the suffrage congress in Stockholm. The committee in charge of the banquet consisted of the Duchess of Marlborough, the Countess of Shelburne, Lady Robert Cecil, Lady Frances Balfour, Lady Bettie Balfour, Lady Blount, Lady Brackenbury, Lady Kingsley, Lady Fawley, Lady Beatrice Kemp, Ellen Terry, Mrs. Garrett Anderson, M. D. and Lady McLaren.

One thousand women of Mexico have presented a petition asking that a divorce law be drawn up by President de la Barra and presented to Congress.

PICKEREL PECULIARITIES.

Bait They Will Take and Bait They Won't, and What's the Reason. "You will find pickerel full of whims and vagaries wherever they are. This remark of a positive fisherman no one present ventured to gainsay.

"Some pickerel are green and some are yellow, but that wouldn't be anything to cause particular surprise. Yellow pickerel didn't have the oddity of changing to green one when placed in water where only green pickerel abide. "But physical idiosyncrasy isn't one of the vagaries of pickerel I was referring to. The pickerel in one pond will take one bait habitually, while those in a pond maybe not a mile away won't notice that sort of bait.

"I know a pond up in Connecticut that has pickerel in it that are so uniformly of one weight that it surprises even the natives. Three pounds is what anyone who catches a pickerel in that pond expects it to weigh.

"There isn't a live minnow or small fish in that pond, but so other bait will attract its pickerel. There used to be live minnows in that pond, though, and those queer pickerel of that pond when there were minnows in the pond and the pickerel would take artificial bait as soon as any other fish. It is only since the minnows disappeared that the pickerel drew the line at counterfeit baits.

"This strange whim of those pickerel reminds me that the pond they are in has an odd characteristic or two that I suppose I don't recall. The pond is a lake, and it is a pretty good size one and once on a time had lake trout in it; big ones too, affording fine sport. That was many years ago, when there were minnows in the lake. They don't know who it was that did it, nobody seems to know, but a few years ago the minnows had been made rare, and as they couldn't have got in there any other way some one must have put them in. They have increased and multiplied, but have one characteristic of the pickerel, they are caught all of about one size, a foot to a foot and a half, and they are all of the same age. It was the same thing with the minnows, it is supposed, and now they are eating up all of their own offspring as they come on, it is likewise supposed.

"It is the same supposition that the pickerel have been disposing of their own young and underized and that together with the bass they have made away with the family of lake trout that once lived and sported there. Anyway the fact is that if you want to catch pickerel in that pond you are landing a five bait with you. At the same time the big mouth bass will take your artificial lures of whatever kind almost as fast as you can throw them.

"In a little pond a couple of miles from that one are pickerel of normal life. They are of all sizes, showing that they do not object to having families and letting them grow up if they can. There are plenty of minnows in that little pond, but to catch a pickerel there with minnow for bait is regarded as something so rare as to be talked about. They will take the artificial minnow, though, readily, and that is the lure used in fishing them. That is they will take the artificial minnow if there is no red on it. When that bait first began to be used in that pond it was thought that one with bright colors would be the one to kill best with.

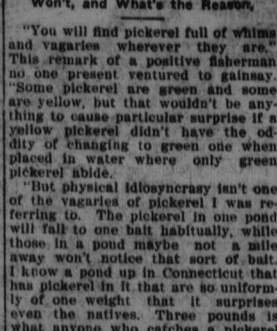

principal seat is for two persons with a rather long folding seat in front hinged to the back of the driver's seat. The interior is lined with green morocco to match the paint and the fittings are of mother of pearl and the mountings of brass. The Queen's crown and cipher are emblazoned on the door, in the back panels and on the dash.

Miss Olive Conger has been admitted to practice in the supreme court of the district of Columbia. She has been employed in the customs division in the treasury department and was graduated last May from the Washington law college. While at the law school she took first honors for work in the most court and second honors in point of scholarship. She is a cousin of the former minister to China and of ex-Senator Conger, of Michigan. Before going to Washington she was a clerk in the Iowa state legislature. She will practice law at Los Angeles, Cal.

VIEW OF A MODERN CANADIAN BREAD PLANT.

Their establishment in the different cities will make the bread industry one of the most important in the country.

proper consistency it is put into troughs and wheeled into what is known as the "dough room." This is done under which each batch of bread passes from the unbleached to the bleached stage. In such the warmer as experiments are carried out in a chemical laboratory. Thus, in the case of improvement in the quality of the product, can be ascertained the conditions to which this was due. Only by following a scientific method such as this can mistakes be eliminated.

Modern Ovens Give Great Results. The modern oven is vastly different to the ovens heretofore employed. The type of oven now used is particularly beneficial to the bread, as it is absolutely impossible for any smoke, cinders or gases to get into the bread from the fire.

Uniform Results From Machine. After the flour has been thoroughly sifted and brushed it is weighed out automatically and dumped into the

MARKABLE EVOLUTION OF MODERN BREAD MANUFACTURING

The Introduction of Up-to-date Plants Results in Lower Cost of Manufacturing, Higher Grade of Product and More Systematic Plan of Distribution. Canada Bread Company, Limited, with Output of 1,000,000 Loaves per Week, Will be in a Unique Position

THE VISITOR to the ancient city of Pompeii, as he wanders round the deserted streets, comes at last to an opening in the ruins where are to be seen several contrivances in such the significance of which is to him a mystery. Looking up his guide-book, however, he finds that they were used by the ancients for grinding their corn. Nearly all the old ovens, pasty repaired. While examining them, it all at once dawned upon him that the business of baking bread is carried on to-day—has been carried on until recent times—in almost the same way as it was carried on by the ancients. Only in the grinding of the flour can the casual and unimproved method of the ancients be seen in the process of producing bread. The ovens are much the same as those of olden times, but after they had become partly ruined. Within the lifetime of thousands of years the ancients' bread-making has been bread baked in just such ovens.

The business of baking bread is no longer being modernized and systematized, much as has been the grinding of flour and the carrying on of the various processes of bread-making with which we are in daily touch. The days of research are drawing to a close in the matter of baking as in the matter of everything else in all the civilized countries of Canada and the United States, as well as of Europe, are now carried on by scientific methods and recognized by the fundamental principles of cooking are being applied to the bread-making process. The importance of this latest science cannot well be over-estimated. Bakers are instructed to act in a scientific manner; gumwork must be eliminated. The materials are weighed and measured out; the heat at which the baking shall be carried on, and the length of the duration of the baking are all accurately determined, and the student is expected to turn out batches of consistent quality, to be made up of the same ingredients, and to make a failure is evidence that he or she is not fully understanding what was being done.

Success of Modern Methods.

Domestic ovens, however, would never have reached the stage of being taught in the colleges had it not been that its importance was recognized in the business field. Visit an up-to-date bake-shop to-day and you will find all the processes being carried on in a systematic manner. Nothing is done haphazard. The process naturally begins with the purchase of the flour which is manufactured from wheat in the provinces of the Dominion. After the flour enters the establishment, the progressive baker varies in size and completeness of equipment according to the size of the establishment, and its financial strength; but it does not vary in importance. The successful baker will never attempt to produce good loaves from poor flour. The proportion of gluten, he will vary, and the requirements of the laboratory is to insure that no flour is accepted which does not contain the proper percentage of gluten and other chemical constituents.

The modern baker, therefore, goes wrong at the very first stage of the game. It comes very early in the process of ascertaining whether the material of which the loaves are to be produced is of the quality for producing the type of bread which would be a credit to the establishment.

In the modern establishment, after it has been ascertained that the flour is of the quality for producing the type of bread which would be a credit to the establishment, the flour is sifted and brushed, and is weighed out automatically and dumped into the

maneuver. Along with it is dumped the requisite weight of water, which was previously brought to the proper temperature. The yeast also enters the mixer at this point and the process of making the dough is begun.

It is hardly necessary to make any attempt to describe the mechanism of this mixer. Suffice it to say that it is kept in a state of scrupulous cleanliness. No dirt, sweat, or anything else is allowed to come in contact with the dough. Nothing is employed save the clean iron and wood. When the dough reaches the

maneuver. No hands, either clean or dirty, come into contact with the dough. An attempt is made to maintain the various ingredients and the dough, as well as the atmosphere, at an even temperature. The windows are screened so as to exclude direct sunlight. The baker no longer is employed as a fireman but carries on only the process of baking. The work is systematic throughout, each man having his particular part to perform. Every care is taken to isolate the product from anything of an unsanitary character, and also to insure its evenness.

Much Capital Required.

Modern processes such as this cannot be instituted without the expenditure of money. The Canada Bread Company will, from the start, be in a position to install machinery of the very latest type and to erect bake-shops of a sanitary character. In talking over its constituent companies, it came into possession of several modern establishments as well as some which it will be its first effort to replace with more modern processes. It is the intention of the company to erect buildings specially planned for the installation of the latest type of machinery and to open it to the inspection of the public. The street windows of the buildings will be fitted up with plate glass in order that the public may watch as much of the processes of blending, dividing, molding, etc., as possible, and thus assure themselves of the sanitary condition of the bake-shops. By visiting any of the smaller bakeries the public will then be able to make comparisons for themselves.

Not only will modern methods be adopted in connection with the actual manufacturing of the bread, but in connection with its delivery. The present wasteful system will be entirely abolished. As matters now stand the various rival bakeries of the different cities constantly duplicate the service of delivery, wagons

from each of a score of bake-shops will be seen delivering bread along the same street. Then the work is multiplied many times over. The public naturally has to pay for this extravagance. The Canada Bread Company will begin by mapping out the work of the delivery wagons in such a manner that each wagon will have its own particular route. It may be of interest to learn that the average number of loaves of bread delivered by each wagon in the employ of one of the most systematic bake-shops in

Canada Bread Company, Limited.

VIEW OF A MODERN CANADIAN BREAD PLANT.

Their establishment in the different cities will make the bread industry one of the most important in the country.

Canada is 4,000. The efficiency of the Canada Bread Company expert to deliver 4,000. This compares with 1,000 to 1,500 loaves per wagon, per week, delivered by an unsystematic establishment. The expense of delivering is one of the principal items in the cost of bread, and it is safe to say that under a systematic management, such as will be adopted by the Canada Bread Company, the expense of delivering can be reduced to 40 or 50 per cent. of the cost of the average small bake-shop.

New Company in Strong Position.

The larger the centre of population the greater, naturally, the advantages to be derived by the modern bread manufacturer. The Canada Bread Company, Limited, in this respect will be in an exceptional position, its plants being located in the three largest cities, Montreal, Toronto and Winnipeg. It is also the intention to erect new plants and to forthwith increase the output of 1,000,000 loaves, its financial position is being made especially strong by the \$1,000,000 of cash being placed in its treasury. Thus, in addition to permitting the erection of proposed plants, will give the company ample working capital.

Included in the new company are Mr. Cassin Munn, of Toronto, and, through him, a strong group of Toronto financial interests, while the heads of four of the finest companies included in the Canada Bread Company will be on the first Board of Directors of the new company. These are Mr. Mark Gredin, head of the Bredin Bread Company, of Toronto, who will be general manager; Mr. Geo. Weston, of Geo. Weston, Limited, Toronto, known as the "Model Bakery"; Mr. H. C. Tomlin, of the Toronto Bakery Company, and Mr. W. J. Boyd, of Boyd's Bakery, Winnipeg.

OBITUARY.

Wm. Patrick Tighe. The death of William Patrick Tighe, youngest son of Mr. and Mrs. P. J. Tighe, took place yesterday morning at his home, 23 Douglas avenue. Mr. Tighe was only 23 years of age and was a well known and popular young man. Heart disease was the cause of his death. He is survived by his father, mother, two brothers, John F. and James E., and three sisters, Katie A., Annie and Margaret. His funeral will take place tomorrow afternoon at 2:30 o'clock.

Mrs. Barbara Lee. At 10 o'clock yesterday morning, Mrs. Barbara Lee, wife of Robert Lee, passed away at her home on Protection street, West side. Mrs. Lee had been in failing health for some time and her death was not unexpected. She was in the 70th year of her age, and is survived by six sons, John, William, Richard, George, Allen and Duncan, and two daughters, Annie and Barbara. Mrs. Lee had a wide circle of friends, who will regret to hear of her death.

Mrs. Catherine Stackhouse. The death of Mrs. Catherine Stackhouse, for many years a resident of Carleton, took place on Thursday at the residence of William Sauls, 14 High street. Mrs. Stackhouse was a case of death. Deceased was 71 years of age and was the widow of William Stackhouse. The funeral will be held with every bottle of Putnam's Corn Extract. Use Putnam's and you get extra. Beware of substitutes.

CORNS CURED FOR 24 CENTS. A guarantee of painless cure goes with every bottle of Putnam's Corn Extract. Use Putnam's and you get extra. Beware of substitutes.

Notice of Sale of Real Estate

PUBLIC NOTICE is hereby given that the parcels of Real Estate hereinafter mentioned, and more particularly described in my office on the first day of August, 1911, will be sold by me at City Hall, in the City of Saint John, on Friday, the first day of September, 1911, at 10:30 o'clock in the forenoon upon a claim by the City of Saint John for Taxes and Assessments due as detailed in such schedule.

Lot No.	Address	Assessed or Taxed Thereon.	Nature of Claim.
1	Guys	4.96	City and County Taxes, 1909.
2	Prince	49.50	City and County Taxes, 1909.
7	Stanley	1.93	City and County Taxes, 1909.
8	Landowne	4.95	City and County Taxes, 1909.
9	Brooks	.49	City and County Taxes, 1909.
11	Stanley	3.96	City and County Taxes, 1909.
12	Brooks	1.00	Water Rates, 1909.
13	Dufferin	5.94	City and County Taxes, 1909.
14	Dufferin	23.76	City and County Taxes, 1909.
15	Dufferin	10.50	Balance Water Rates, 1909.

TERMS OF SALE.—The purchaser shall be required to deposit with the Receiver of Taxes, at time of sale, the sum of money equal to the amount of the Taxes and Water Rates for which the said Real Estate is advertised to be sold, together with the cost and expense of the sale and in conveying of the Real Estate so sold to the purchaser. But in case the amount of such bid is insufficient to cover the said amount, the amount to be deposited shall only be the amount of the bid. The foregoing properties will be offered and sold as numbered.

J. L. POYER, Auctioneer. DUNCAN G. LINGLEY, Receiver of Taxes.

"Let The U.S. Farmers Get It"

These Articles Show That Under Reciprocity He Will Get It

THE UNITED STATES WANTS OUR FORESTS

Awakened Too Late to Its Own Needs; Hence is After Canadian Timber Now

The United States has awakened to the importance of forest preservation at too late an hour, and now Canada is looked to as a source of ultimate relief, when famine shall have rendered the pulp and paper mills of our neighbors devoid of supplies.

is indebted to the forest for a product of \$13,000,000 in value, keeps within the modest sum of \$25,000 to pay for the protection against fire and the support of a commission.

LIVERPOOL CONTROLS AMERICAN WHEAT

So Said President Tatt, in Comforting the Farmers at Indianapolis on July 4th

President Tatt spoke at Indianapolis on the Fourth of July on the subject of reciprocity. On this occasion, as on nearly every other occasion when he has spoken since he took office, he gave arguments why Canada should have a free trade arrangement with the United States.

BALANCE OF POWER IS WITH CANADA

The Dominion With Its Vast Natural Resources May Easily Act as Dictator

In Canada the strongest protectionists perhaps are to be found among our manufacturers. In Germany the leading protectionists hold their ground in the interest of agriculture.

important that we should create, maintain and retain capable agriculture. Mr. Percy Ashley, in his book on modern tariff history, says that several countries throughout the world are in the agricultural stage of development.

A BOUSED INDUSTRY

The importance of the farming industry to the people of Canada is abundantly demonstrated by the fact that there is not a province in the Dominion which has not established a department of Government to promote and safeguard the interests of agriculture.

From Atlantic to Pacific a veritable army of experts is engaged in assisting the farmers of the country in their efforts to grow bigger and better crops, to produce finer fruit, to raise better live stock and to make more excellent butter and cheese.

1905-1910 was \$41,478.30. The largest item, \$12,967.13, was made up of grants to various agricultural societies; \$4,782.12 went towards introducing improved methods of stock raising; \$4,172.65 was spent on extending markets; \$659.71 was paid out to sons of farmers to enable them to attend agricultural colleges.

Farmers Who Have Protection

European Countries Believe in Aiding Home Industries—What Has Been Done

While matters other than the tariff have governed the degree of agricultural prosperity in various countries, a study of economic history shows that the farmer owes much to protective tariffs.

not until 1882 that all thoroughly protective duties were restored. The Austrian and Hungarian Governments do in their power to promote native industry.

Germany There is little disposition in Germany to abandon agriculture and to open German ports to the free admission of the farm products of other countries.

Belgium In 1844 Belgium adopted protection for the first time, and Holland followed the next year.

Italy Upon the union of the Italian states the old customs barriers were removed to the frontier and maintained for the purpose of revenue purposes.

United States Under a vigorous policy of protection, one which the United States is willing to abandon in respect to Canada in order to obtain her markets, the value of farm and farm property in the neighborhood increased, as the following table shows:

Russia Russia has long been a type of extreme protection. The old mercantilist point of view was closely allied with protectionism, as shown in the Act of 1823.

Holland Holland adopted protection in 1845. The tariff was revised in 1862 to practically a revenue basis.

France "Since 1848," said Muhlhal in 1888, "no less than 5,000,000 acres of waste land have been reclaimed in France. The protection and encouragement given to the French farmers not only directly benefited the peasantry but greatly added to the wealth of the nation.

Holland adopted protection in 1845. The tariff was revised in 1862 to practically a revenue basis.

Austria-Hungary Proceeding and following the war of 1866, duties were considerably lowered in Austria-Hungary, and it was

A movement is under way to establish a "Little Italy" in the suburbs of Montreal. There are 15,000 Italians in that city

FACTS ABOUT OUR MARKETS

No Need to Turn Elsewhere for Trade in Farm Products—The Home Market Can Absorb It All

The official Government returns of the crops of Canada in 1909, the latest year given in the Canada Year Book, were as follows:

WHAT THE HOME MARKET CONSUMES

The Lesson of the Figures of Three Big Grain Crops and Also the Root Products

Canada's home market has been termed a "sponge" because of its capacity to absorb surplus crops.

PROTECT OUR BUTTER

Under Reciprocity Canada Would Be Deluged with Butter from Foreign Countries

When thinking of reciprocity in butter with the United States, it is well to consider that at present the export demand from Great Britain is the controlling factor in the Canadian butter market, and it is interesting to note that the average prices realized in Great Britain during the year 1909 for butter imported from Russia, Australia, New Zealand, United States and Argentine Republic were lower than those obtained for Canadian butter.

Quantity	Value
Wheat	\$14,744,000
Rye	\$1,244,000
Barley	\$5,328,000
Oats	\$1,244,000
Flax	\$1,244,000
Timothy	\$1,244,000
Hay	\$1,244,000
Alfalfa	\$1,244,000
Other	\$1,244,000
Total	\$28,000,000

Quantity	Value
Butter	\$1,244,000
Cheese	\$1,244,000
Other	\$1,244,000
Total	\$3,732,000

Let us remember that there are at least 12 million farmers in the United States and there are in Canada, and so, while one Canadian farmer will get entrance into the markets of the United States, twelve American farmers will get entrance into our home markets.

What about live stock? The official returns show that Canada had in 1909, 3,875,789 head of cattle, 1,244,000 head of horses and mules, and 1,244,000 head of sheep and goats.

With reciprocity in farm products the twelve American farmers will crowd the one Canadian farmer pretty closely in his own home market.

Statistics of certain industries of Canada were taken officially in 1906. The figures are instructive.

CRITICIZES WOMEN'S FASHIONS In the course of a sermon to young women at the United Brethren Church, Rev. E. Swartz took occasion to score extensively on women's fashions and hats.

AT OUR EXPENSE According to the press of the Western States, free trade in natural products with Canada will mean a fine market for the farmers of Minnesota and North Dakota.

Country	Value
Denmark	\$61,421,668
France	\$1,244,000
Germany	\$1,244,000
Sweden	\$1,244,000
Netherlands	\$1,244,000
Argentina Republic	\$1,244,000
Canada	\$1,244,000
Total	\$68,421,668

The above is sufficient to show that Canada will be deluged with butter from foreign countries, whose production and exportation of that product is far in excess of the demand.

WHEAT PRICES AND THE DUTY American Paper Does Not Think That the Canadian Farmer Would Get Higher Rates for Wheat

THE PIONEER PRESS, OF ST. PAUL, MINN., DOES NOT THINK THAT THE CANADIAN FARMER WOULD GET HIGHER RATES FOR WHEAT.

FAVORED NATIONS

A Glance at Competition Canada Would Have Under Reciprocity

The proposed Reciprocity Agreement will give a free ticket to Canada's markets to twelve favored nations and all the British possessions as well as to the United States.

DE NOT COURT INVASION

Further, what effect will reciprocity in natural products have on this phase of the question? Can the farmer or the people as a whole afford to have the country spend its millions to improve agricultural conditions, and then find its markets invaded by foreign producers, and all its educational work made of no avail? This is a possibility which should not be overlooked.

Further, what effect will reciprocity in natural products have on this phase of the question? Can the farmer or the people as a whole afford to have the country spend its millions to improve agricultural conditions, and then find its markets invaded by foreign producers, and all its educational work made of no avail? This is a possibility which should not be overlooked.

Farming Down by the Sea The stater province of Quebec spent, during the fiscal year 1909-10, the sum of \$294,850.01 under similar headings. It also provided, through its Department of Agriculture, \$60,000 for the improvement of rural roads. It gave \$146,700.00 to various agricultural societies, farmers' clubs, associations, etc. It handed \$30,000 to butter and cheese syndicates, expended \$17,000 for the encouragement of the dairy industry and \$5,000 for the benefit of the fruit industry.

Do Not Court Invasion Further, what effect will reciprocity in natural products have on this phase of the question? Can the farmer or the people as a whole afford to have the country spend its millions to improve agricultural conditions, and then find its markets invaded by foreign producers, and all its educational work made of no avail? This is a possibility which should not be overlooked.

For the INDUSTRIOUS NEEDLEWOMAN

By ADELAIDE BYRD

Delays Bureau Set

The scarf and the little cushion are here in a delay design. They are such pretty things in white on the bureau that I feel glad to be able to offer you the set for your bureau. How pretty this would be in your dainty guestroom! With its delay curtains and wallpaper.

One-half of pincushion

and its bunch of flowers on the little table, the bureau set would form a very attractive addition to the flower idea.

By a quick glance you will see that there is comparatively little work on the set. Let us take up the scarf end first. It should be of good, medium-

weight linen if you prefer white, and the cotton should be of the soft, mercerized variety, medium thickness. If you wish to carry out a color scheme, the flowers can be worked solid in color and the leaves and stems a pale green. Even a colored material worked in white will be lovely if a certain shade be your idea of decoration.

The scarf in sheer lawn or barred muslin over a yellow or green underlip is cool and dainty. Indeed, there are endless ways that can be followed to the decorative result. You will like one of them.

Now thread your needle and pad the petals with soft darning cotton. Then work solid with the mercerized cotton and fill in the center of each flower with French knots.

Use outline stitches for the stems, making them quite large and retracing your steps by whipping over the outline, catching at the lapped stitches.

The leaves can be outlined and filled in with seed stitches, that are merely back stitches. Solid stitches or long-and-short slanting stitches along the edges will also work up well.

Pad the scallops, using another row to prevent fraying.

This pretty design is to be placed on both ends of a bureau scarf and you will make it as long as you wish, the long edge being nothing but a succession of a long and a short scallop. A length of one and one-fourth yards is convenient for the ordinary length bureau or chiffonier. This is not too long and allows some of the pattern to show on top.

And now for the pincushion. The bottom is exactly the same in shape, only plain. When tracing the design allow for two of these circular pieces that can be strung together through the eyelet slots. The working is the same as that on the scarf. You will find that it is quickly and easily worked and completes one of the daintiest sets that you will find in a long search.

If you use a colored underlip for the scarf, make the cover of the pincushion of the same material and use the same shade in ribbon.

And now I shall leave you until next week.

For Rainy Days

At the ends of a yard of half-inch-wide elastic sew a large hook and eye; clasp this around the body below the hips, and draw the string to any desired height under a raincoat. This is useful, especially when one must wear an evening dress in the street on a rainy night.

It leaves the hands free; and certainly it is better than tearing the fabric with safety pins.

THE MIDSUMMER HAT

IF YOU are thinking of making a hat for midsummer, let me advise the large-brimmed shaped model. No matter how much you may love the sunshine, there are plenty of times when the shade hat is a true blessing.

These protecting hats are not hard to make at home, and can be fashioned of many cool, beautiful materials. There is the lingerie hat of fine lace or embroidery is, of course, the most dainty and can be worn to the most fashionable functions; to church, the theater or any entertainment to which a woman would wear her best clothes.

Many of the models seen in the shops are elaborate and beautiful beyond description; but the most simple styles are quite as good form and for many faces much more becoming.

To make one of these hats at home you must first buy a wire frame. Select one that fits your head comfortably, or you will have constant trouble. There is nothing quite so annoying as a hat made on a wire frame that has a center wire which persists in pressing on the forehead, causing a constant headache.

Cover the wire frame with inexpensive tulle or a fine cape net. This is done by laying the brim flat on the material and cutting it around the shape of the hat, allowing one-half inch to turn in. The upper covering of the brim is cut in the same manner, except that it has the center cut away, allowing the crown to pass through.

Fit the upper and lower brim coverings on smoothly and pin securely in place; then with an over-and-over or a long backstitch sew firmly around the edge and at the crown line.

Slash that portion of the underbrim covering over the crown opening in several places, so that it will fit smoothly up into the crown.

The crown itself is covered by simply cutting a large circular piece of material, laying it on smoothly and gathering it into the edge with a long backstitch. Some milliners tie a piece of thread around the base of the crown first to hold the material in place before sewing.

Now you have the frame ready for its final decorating.

If you have chosen eyelet embroidery, which, by the way, is very fashionable this year, the frame should be covered plainly in exactly the same manner as the first covering is put on.

Bind the edge of the brim with a two-inch band of satin matching the color you use in trimming the hat—pink, if you intend to trim the hat with that color, or blue, or lavender, as your fancy dictates.

Cut this binding five inches wide on the bias. This will allow two inches on

either side of the brim and a half inch to turn in at each edge.

Baste the binding first and then slipstitch it, carefully concealing all stitches.

The hat is now ready for the trimming.

A soft crown band of bias satin, folded several times and draped on gracefully, which is held in place at the front, or a little to the left of the front, with a butterfly bow, an Alsatian bow or a rosette, makes an attractive trimming. The bows can be made of satin matching the binding; or if ribbon is chosen, it should exactly match the binding.

In any case, wire the bows by placing in the center of each loop a piece of white ribbon hat wire the length of the loop and catching it fast with a very long basting stitch.

The larger shops will have a bow made for you if you purchase the ribbon or satin there, and this is advisable for a trained toymaker will, in a very few minutes, make any kind of a bow for you, when perhaps you would struggle with it for half an hour and then not get just the right thing, besides crumpling the ribbon hopelessly.

A wreath of flowers, with a cluster at the side, makes a charming garniture for a lingerie hat. In fact, flowers are being worn on all the midsummer hats in the greatest profusion. There is nothing daintier or more refreshing than to see a pretty face shaded by a flower-bedecked hat on a summer day.

Lace-covered hats can be made plain or ruffled. The ruffled ones are unquestionably the more attractive, for lace lends itself so beautifully to fullness.

A very lovely hat can be made by covering the frame with frills of narrow val lace. Begin at the outer edge of the brim with a slightly ruffled piece of lace and work around and around toward the crown line, sewing the lace on in rows that meet each other's edge but do not lap. Repeat the process on the upper brim. To cover the crown, begin at the lower edge and sew as before, working to the center of the top. Here finish off the lace in a close, flat rosette.

Such a hat needs very little trimming. A wreath of tiny, delicately colored buds around the crown and forming a circle upon the brim is sufficient. A single bow of ribbon or a single large rose makes a suitable adornment.

If wide lace is selected for the hat, it is gathered about the crown line, both on the under and upper brim, and caught to the brim's outer edge with a fine white thread. The crown is covered in like manner, allowing the lace to fall from the center of the top to

the brim. If the lace is wide enough, allow the edge to lie flat on the brim and trim with a single blossom, catching the lace up on the side. Choose for this a flower that has a long stem and a few leaves, so that you can arrange them gracefully as an added trimming.

These lingerie hats can be made of almost any sheer material. Flowered organdie, embroidered batiste, embroidered linen, French cretonne showing a design of flowers, net or mull make the most charming models. Any one of these materials can be used for the top of the hat, with a plain satin or velvet facing in a contrasting color or black.

Among the newest Paris fads are the hats with crown and upper brim covered with turkish toweling. These have appeared in various shapes of medium size and have brims faced with black velvet.

Hats of this kind are, for the most part, very simply trimmed; and, while not bad to look at, the material is rather extreme and possesses no advantage over the daintier and more suitable fabrics that are in use.

Eyelet Embroidery

WITH the fad for eyelet embroidery so strongly in vogue, almost every woman will find she has small pieces of this dainty material left from the making of the gump or the blouse or the trimming of a gown.

These bits are usually consigned to the scrapbag, because they are too small to be of any use. But there you are wrong, for they can be used in many pretty ways.

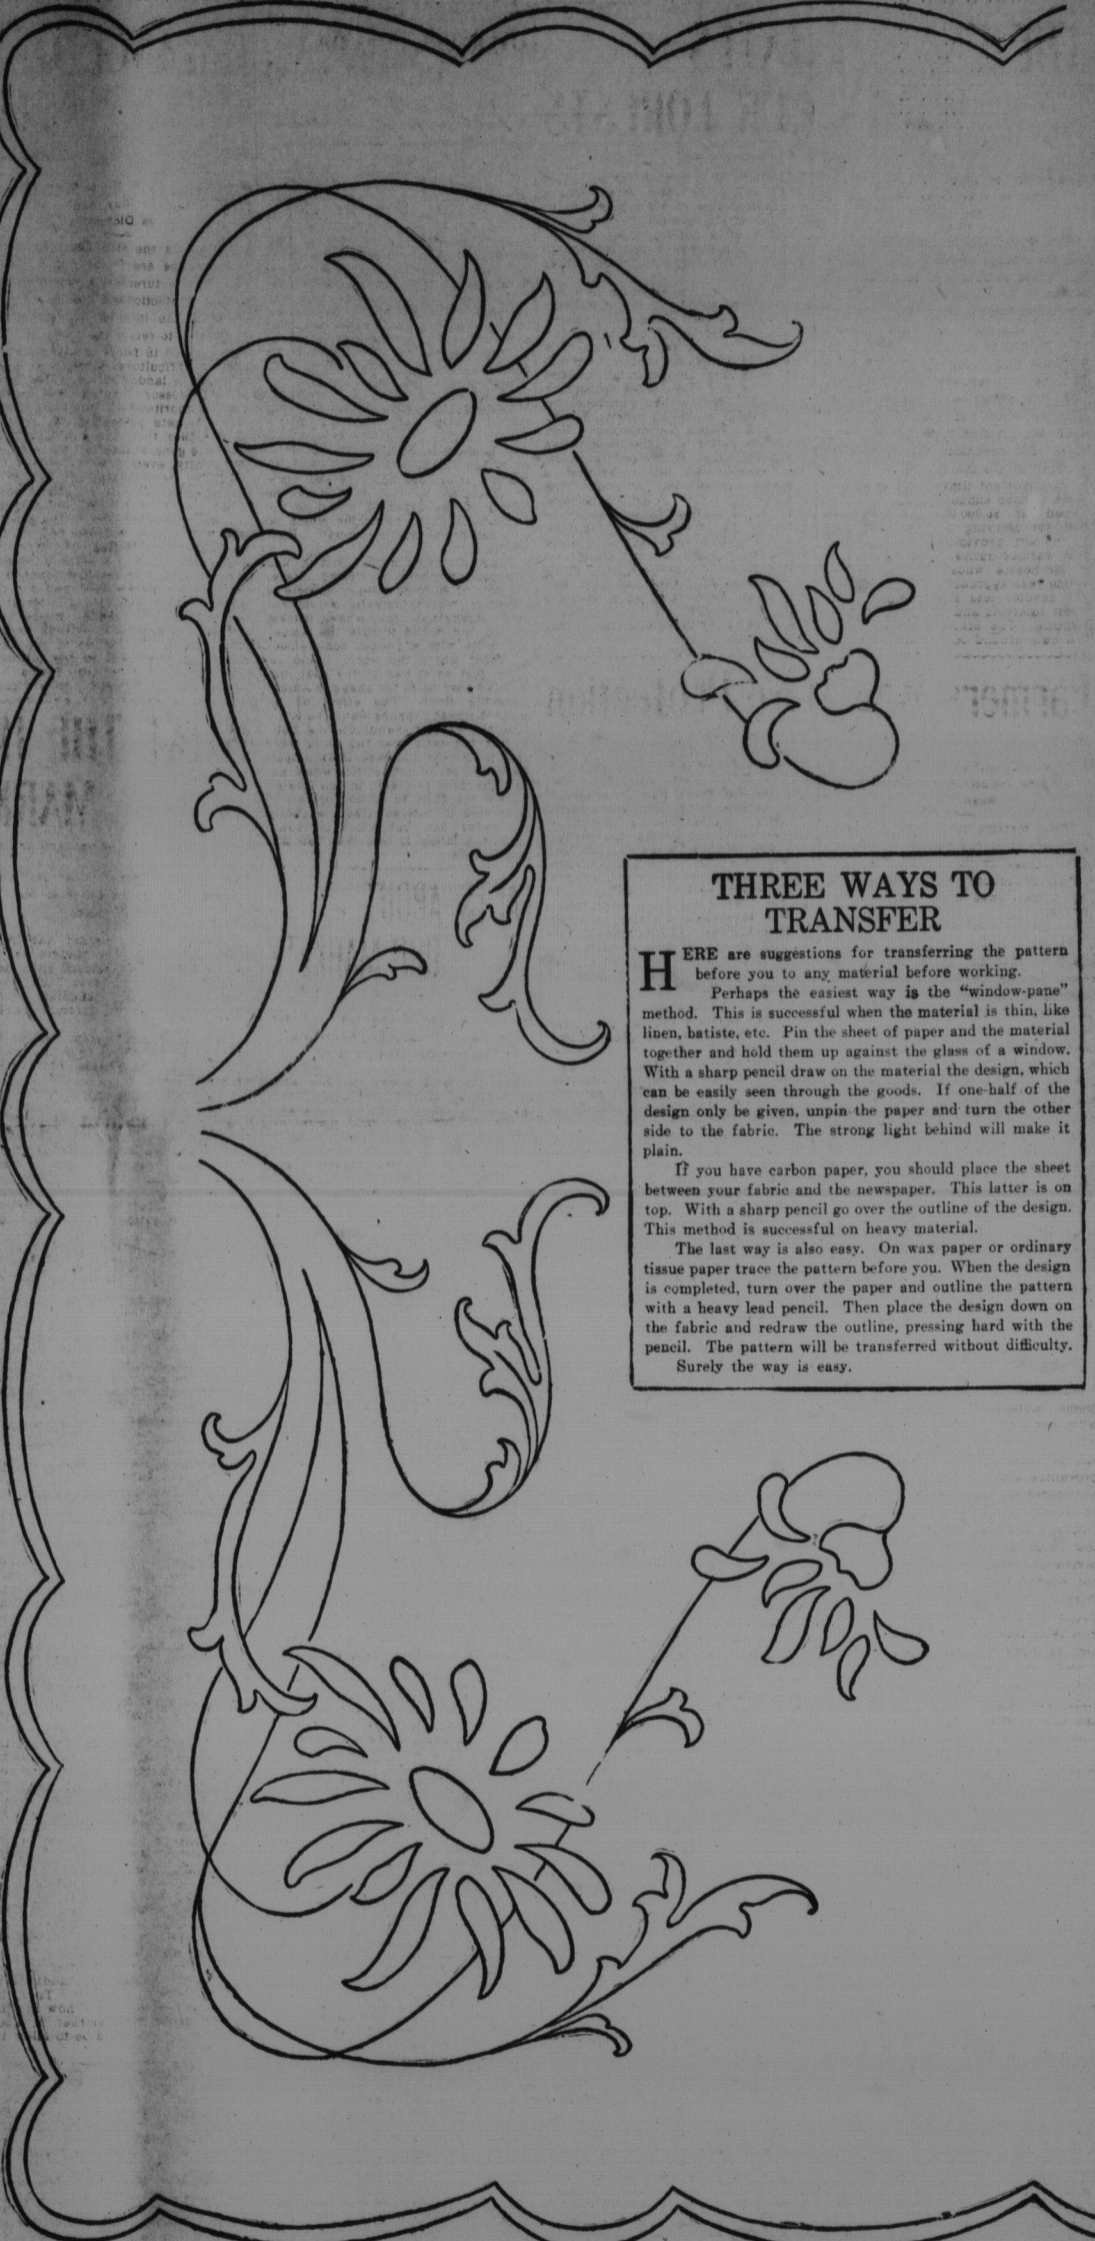

Even the smallest bits can be cut oval or round, bound with a bit of gayly colored bias satin or silk and fastened together in the center with an oblong loop of satin and worn as a finish to the Dutch collar.

You can simulate a butterfly by having four small pieces of embroidery cut egg-shape, two of them being slightly smaller than the other two. Bind them with narrow bias satin or finish the edges with the buttonhole stitch done in bright-colored floss, and join them with a bit of satin, covering a small roll of cotton two inches long, using the smaller wings over the larger as a butterfly would be with the wings flat.

With black floss, make eyes and little straight marks on the body to give it the appearance of a real butterfly.

A little practice will suggest all sorts of styles and shapes to fashion these attractive bows.

Smaller pieces of the embroidery can be utilized in almost the same way by lace insertion, then made into a very pretty Dutch collar, having an edge of the lace.

THREE WAYS TO TRANSFER

HERE are suggestions for transferring the pattern before you to any material before working. Perhaps the easiest way is the "window-pane" method. This is successful when the material is thin, like linen, batiste, etc. Pin the sheet of paper and the material together and hold them up against the glass of a window. With a sharp pencil draw on the material the design, which can be easily seen through the goods. If one-half of the design only be given, unpin the paper and turn the other side to the fabric. The strong light behind will make it plain.

If you have carbon paper, you should place the sheet between your fabric and the newspaper. This latter is on top. With a sharp pencil go over the outline of the design. This method is successful on heavy material.

The last way is also easy. On wax paper or ordinary tissue paper trace the pattern before you. When the design is completed, turn over the paper and outline the pattern with a heavy lead pencil. Then place the design down on the fabric and redraw the outline, pressing hard with the pencil. The pattern will be transferred without difficulty. Surely the way is easy.

For the scarf end
Pincushion tops are dainty when made of eyelet embroidery. Run narrow ribbon through the back of the embroidery the shape of the cushion's top and sew beading around it, then a slightly gathered lace edge. These are only a few suggestions of the many ways embroidery can be made up into useful and fancy articles. The clever woman will see her own need and use her ingenuity to supply it.

THE WEATHER.

MARITIME — Moderate, variable winds, fair and warm. Toronto, Aug. 4.—Warm weather has prevailed today in Ontario and Quebec, while in the western provinces it has been comparatively cool. Showers have occurred in many parts of the west and also locally in Ontario.

CONSERVATIVE HEADQUARTERS.

The Conservatives have opened their headquarters at Rooms 9 and 11, Ritchie's Building, second floor, 50 Prince street.

AROUND THE CITY

Alteration to Market Building. A meeting of the Market Committee was held yesterday afternoon and the question of altering the market building according to plans of the architect was again discussed.

Police Called In. There was considerable disturbance in the household of Mrs. Bucharra at 173 Erin street yesterday afternoon and Police-men Shortleiff and Gosline were called in to the place, and as a result Leo Smith was ejected from the premises.

Life in The Klondike. There was a large attendance in the vestry of the Fairville Methodist church last night, and all listened with rapt attention to a lecture given by Rev. W. H. Barradough, B. A., of Sarnia, Ont. His subject was "The Edge of the Arctic Circle, or Life in The Klondike."

E. L. Jewett Injured. Yesterday afternoon E. L. Jewett of Queen Square was quite severely injured by falling down a few steps of the stairs at the rear of his residence. Mr. Jewett had been joking with some members of the household and as he turned quickly he slipped and fell down the stairs. The fall rendered him unconscious and he received a couple of cuts on the head. He was carried into the house and Dr. Bentley was summoned and the injured man was quickly revived. Mr. Jewett is suffering mostly from the shock and no bones were broken. He is expected to be about in a couple of days and his many friends will be pleased to learn that his injuries are not of a serious nature.

Officers Installed. There was a large gathering in the rooms of Thorne lodge I. O. G. T., Haymarket square, last evening when a fraternal visit was paid by No. 199 surrender lodge No. 199 of Fairville. The following officers of Thorne lodge were installed by E. M. Stockford, D. C. T.: Harry Blair, C. T.; Miss M. Adams, W. T.; Miss B. Campbell, S. J. T.; H. McCachron, secy; Miss I. M. White, asst secy; Thos. Mullett, D. M.; Edgar Campbell, chaplain; R. McCachron, F. C. T.; James Clayton, guard; M. A. Thorne, lodge deputy; Miss N. Bullock, fin. secy; George A. Chamberlain, treasurer. After the installation refreshments were served and there was a musical and literary entertainment that was most pleasing. Thorne lodge will pay a visit to No. 199 surrender in the near future.

THE GREEN GOODS MEN NEARLY FOOLED FARMERS

Some Farmers Using City Market at First Inclined to Favor Reciprocity, but Now Know it is Goldbrick.

That the farmers who sell their produce in the city market are dead opposed to the reciprocity pact was the statement made to a Standard reporter by a man who does business with nearly all the farmers who dispose of their products there.

"At first," he added, "many of the farmers who come to the city market were inclined to be in favor of reciprocity, but now I find in talking over the question with them that they are practically all strongly opposed to it. And those who are now most decided in their expressions of opposition to the pact are those who were at first inclined to think it would be a good thing for them."

"No doubt they have been studying the question and figuring out the effect reciprocity would have upon them, and have come to the conclusion that it is not going to be any benefit to them and may very well hurt them."

"Of late I have not run across a single farmer who is not strongly outspoken in his opposition to reciprocity and I suspect the Liberal candidates are going to find themselves up against it pretty hard in the farming districts, especially where the farmers make a specialty of market gardening."

"The dealers are generally favorable to the idea of reciprocity, be-

PREMIER HAZEN RECEIVES HEARTY WELCOME HOME

Large Crowd of Fellow Citizens Met Him at the Station -- Escorted to His Home by the Carleton Cornet Band -- Premier Responds to Compliments.

A large crowd assembled at the Union depot last evening to welcome Premier Hazen home from England. As he swung off the train, accompanied by Mrs. Hazen and his two daughters, he was greeted with ringing cheers and his friends besieged him and his family in a furor of enthusiasm. The Premier was looking well and evidently in excellent spirits, and was more than delighted at the warmth of his greeting. As he shook hands with the crowd around him the Carleton Cornet band, without the station, played an appropriate selection and presently he and his family were conducted to the carriage in waiting, decorated with patriotic flags and with the band in the lead they drove to their residence, followed by the crowds. In a second carriage were W. H. Thorne and Hon. Robt. Maxwell, M. P., John E. Wilson, M. P., and W. Frank Hatheway, M. P. Upon arriving at Hazen Castle, the Premier made a brief speech to the crowd that followed him inside the

DIED FROM INJURIES RECEIVED IN A FALL

Charles McCrackin Fell From His Team, on Red Head Road, Yesterday Afternoon -- Died in Hospital.

Charles McCrackin a man about 50 years of age, received injuries on the Red Head road yesterday afternoon which, a couple of hours afterwards resulted in his death.

McCrackin was driving along the road on a load of firewood and in some manner fell to the road alighting on his head. He was found unconscious by a man named Stephenson, who summoned the ambulance and the injured man was hastened to the general public hospital.

The deceased is a widower and is well known in the North End of the city. He had for a long time been employed in hauling wood from the mills. A few years ago it is said that the deceased's brother met death in a similar fashion. He was employed as a teamster of a dump cart and the catch on the front of the cart being unfastened, the box of the cart tipped up and he was thrown to the ground striking on his head, and he died shortly after as the result of the injuries received.

cause it would no doubt be to their advantage to buy produce across the border, but the farmers will prefer to keep their own markets. At the present time about one hundred cart-loads of meat from Ontario are being imported into St. John every week, and there is also some garden truck brought in from Quebec. That competition is enough for the New Brunswick farmers, and they won't want their markets opened to the Americans, more particularly the beef market which could be flooded by the American beef trust."

CHURCH NOTICES.

Exmouth Street Methodist church—Class meetings Sunday morning at 9.45; preaching service at 11 a. m. Rev. G. A. Ross; Sunday school and Pastor's Bible class at 2.30 p. m.; preaching service at 7 p. m. Pastor Rev. W. W. Brewer; open air service at 8.50 p. m. at the Haymarket square.

BOARD OF WORKS AND MILL STREET CHANGES

Widening of Mill Street Considered at Private Meeting of Board of Works, Held Yesterday Afternoon.

A private meeting of the board of works was held yesterday, at which the question of widening Mill street was discussed. It is understood the board is to be made to the C. P. R., but a committee was appointed to discuss the matter with Mr. Downie and see what arrangements could be made.

The C. P. R. intends to leave a strip 25 or 30 feet in width along the Mill street face of their property for the use of their teams, and the city authorities hope to acquire public rights in this strip.

The engineer reported that the car of oil recently ordered had arrived, and a sub-committee was appointed to confer with him in regard to the streets upon which the oil should be used.

PERSONAL.

Miss Gladys Townsend of Cambridge, Mass., is visiting Mrs. Walter Cooper of Fairville. The Misses Golding of Lowell, Mass., are visiting Mrs. William Miller of Randolph. T. R. Tye, mayor of West Chicago, Mrs. Lye, and his niece, Miss Mary Ahearne, are visiting Mrs. P. O'Keefe, 132 Waterloo street.

You should Do your shopping at the People's Dry Goods Store, 14 Charlotte St.

Lord Strathcona's Gift. R. Morton Smith, in writing from London to the St. John Globe, announced that Lord Strathcona has donated the sum of \$1,900 towards the liquidation of the mortgage on the Seaman's Mission. The Hon. J. D. Hazen, with evident interest and with his usual prompt courtesy, the secretary states, brought about the interview which arranged the happy result.

Painless Dentistry. Teeth filled or extracted free of pain by the celebrated "HALE METHOD." All branches of dental work done in the most skillful manner. BOSTON DENTAL PARLORS, 427 Main Street, Tel. 653. DR. J. D. MAHER, Proprietor.
