Economy

Ford car economy in first cost, in fuel cost, in maintenance cost, makes it the car for the owner of today. The secret of Ford car economy is the Ford engine, simple and powerful, using a minimum of gas and oil for a maximum of mileage. Ford car sturdiness of construction throughout gives it the endurance which assures economy of maintenance as well as of operation.

FORD PRICES:

Touring Car, \$675	Runabout, \$610
Coupe, \$1,100	Sedan, \$1,200
Chassis, \$550	Truck Chassis, \$750

\$100 extra for starter, except on Coupe and Sedan, which are equipped with starter. These prices are f.o.b. at Ford, Ont.

on the evening of

Friday, Mar. 11

at eight o'clock.

Reeve McPherson will occupy the chair.

ADMINISTRATOR'S SALE OF REAL AND PERSONAL PROPERTY

The undersigned administratrix of the estate of Douglas Alexander McAlpine, late of the township of Metcalfe, in the county of Middlesex, farmer, deceased, will offer for sale by public auction on the undermentioned premises on Thursday, March 24, at 1.30 p. m., the following real and personal property, namely:

Real Estate.—The westerly 60 acres of the south half of lot No. 23 in the 13th concession of the township of Metcalfe.

This farm is well situated. Soil, clay loam of first-class quality in good state of cultivation. A splendid grain and sugar beet farm. Good barns and good frame house, all in good repair. Thirty acres fall plowed; six acres fall wheat.

Terms of Sale of Real Estate.—One-tenth of the purchase price to be paid at the time of sale and the balance within one month thereafter.

There will also be offered at the said time and place the following personal property:—1 heavy horse, Percheron, rising 5 years old; 1 work mare, Percheron, 9 years old; 1 general purpose mare rising 3 years old; 1 light colt 2 years old; 1 four-year-old cow, milking; 1 calf 5 months old; 1 sow due April 1st; 1 shoat, about 100 lbs.; 30 laying hens; 1 wagon, nearly new; 1 McCormick disc fertilizer drill, nearly new; 1 disc, new last summer; 1 Fleury plow, new last fall; 1 beet cultivator; 1 hay rack; 1 beet rack; 1 set hook-tooth harrows; 1 set straight-tooth harrows; 1 set double harness; 1 set single harness; a quantity of 2-inch plank and lumber; forks, shovels, saws and other farm utensils; kitchen range and heating stove; beds, bedding, and all other household goods and utensils belonging to the estate of deceased.

Terms of Sale of Personal Property.—Sums of \$10 or under, cash. Over that amount, 4 months' credit on furnishing approved joint notes. A discount of 6 per cent. per annum will be allowed for cash on purchases entitled to credit.

For further particulars apply to Clara McAlpine, Administratrix, or to ELLIOTT & MOSS, Glencoe, her Solicitors. L. L. McTaggart, Auctioneer.

GRANULATED SUGAR

We have just received our second car of sugar.

Granulated Redpath, \$11.25.

DISTRICT AND GENERAL

The Wallaceburg Sugar Factory turned out 28,000,000 pounds of beet sugar this season.

Canadian railroads will probably operate on daylight saving time from May 1st to October 2nd this year.

At a blacksmiths convention in Nebraska it developed that there is only one apprentice to the trade in the entire State.

Many horses in different parts of North Dorchester township have been stricken with influenza of a very serious type.

Last year the clerks of four municipalities in Bruce County were fined because the Voters' Lists were not out in time.

According to a theologian, there is no literal hell of brimstone and sulphur. But we dare say there is something just as good.

A Huron County farmer had to pay \$47.02 express charges on six one-bushel boxes of apples sent to a friend in Glasgow, Scotland.

The bailiff at Windsor has possession of \$40,000 worth of motor cars, forfeited by the purchasers through failure to pay for them.

The Dominion bureau of statistics estimates the average value of occupied farm land in Canada at \$48 an acre, compared with \$35 in 1915.

London's municipal year book issued by the city clerk shows that the city has an assessment of \$54,210,000, a population of 59,281, and an annual budget of \$2,062,000.

Injured in a fight 20 years ago, a negro startled physicians at a Baltimore hospital by declaring he had a bullet in his head that rattled when he moved. A hole was cut in the skull and the bullet found inside.

A boy bandit in New York is accused of stealing \$446,000 in Liberty bonds. Once upon a time boys thought they were doing pretty well when they got away with a watermelon from old Mr. Perkins' garden.

The time table for the departmental examinations has been issued. The lower school examination will begin on June 7, the upper school on June 10, the middle school on June 20 and high school entrance on June 28.

In a Utah mining camp a workman attempted to extinguish a fire caused through a short circuit by throwing a bucket of water upon a spluttering electric wire. The electricity "played back" over the stream to the bucket in the man's hands, killing him.

Dr. G. C. Creelman, formerly president of the Ontario Agricultural College, and now Agent-General for Ontario in Great Britain, has been selected by the proposed Niagara Peninsula Growers, Limited, as their general manager, at a salary of \$12,000 per year.

An Oriental legend holds the grasshopper to be a compound of seven animals—the head of a horse, the neck of an ox, the wings of a dragon, the horns of a stag, the tail of a serpent, the feet of a camel and the body of a scorpion. No wonder Saskatchewan trembles at the thought of a predicted "hopper" invasion.

APPIN

The oyster supper and concert put on by L. O. L. 881 on Thursday was a very enjoyable affair. About 110 members with their wives and friends sat down to a sumptuous repast in the Orange Hall after which all repaired to the town hall where the following excellent program was given:—Violin selections by Wilfrid Laughton, solos by Miss Kincaid, Alf. Bardwell and Angus McMaster, addresses by Rev. Mr. Charlton and Rev. Mr. McCulloch, readings by Miss Marion Campbell, recitation by little Margaret McIntyre, and duets by Olive Black and Earl Edwards. Arthur Ash very ably filled the chair, and Miss Mary Galbraith accompanied the soloists in her usual able style. Altogether the evening was a very enjoyable one to all present.

Miss C. McIntosh is visiting at Hugh Eddie's, and Mrs. Eddie is renewing acquaintances in East Williams.

Glad to hear Mr. Allan is improving in health.

The sacrament of the Lord's Supper will be observed in the Presbyterian church next Sunday. Preparatory service Friday at 8 p. m.

J. D. and Minnie McDonald have returned from visiting friends in Windsor.

Rectory barn and lot for sale. Apply at the rectory, Glencoe.

SCHOOL TRUSTEE ASSOCIATION

Public meetings in the interests of the local branches of the School Trustee Association of Mosa and Ekfrid will be held as follows:—Newbury town hall, March 14th, at 2.30 p. m.; No. 12 school house, Mosa, March 15th, at 8 p. m.; Glencoe town hall, March 16th, at 2.30 p. m.; Appin town hall, March 17th, at 2.30 p. m., and Melbourne town hall, March 18th, at 2.30 p. m. Mr. Bell of the Department of Education will be present at each meeting and give an address in the interests of schools and education. Prominent local men will also speak. An invitation to attend these meetings is given to all trustees and the public generally. Opportunity will be given to discuss any subject in the interests of education.

LISTS FOR THE REFERENDUM

County judges in Ontario have instructions to commence preparations for the revising of the voters' lists for the vote to be taken on April 18. The voters' lists of the last provincial election will be used in the revising. Revising officers are to be appointed. Voters will have to communicate with the revising officers in order to see if their names are on the lists.

SUDDEN DEATH OF MRS. TAYLOR

On February 24th last death came suddenly to Mrs. Mary Jane Taylor of Newburg, Mich., aged 61 years, widow of the late John Taylor. Mrs. Taylor had not enjoyed good health for several years, and since the death of her husband in June last had gradually failed, and the end came on the above date in the home of a neighbor on whom she was calling. Both Mr. and Mrs. Taylor were former residents of Glencoe, Mrs. Taylor being the eldest daughter of the late Ralph Middlemiss. She leaves to mourn her loss two sons, T. E. and G. E. Taylor, of Newburg; and three grandchildren, two sons, two brothers and two sisters, E. A. Middlemiss, Mrs. T. E. Walter and Mrs. J. J. Betner, of Detroit and G. B. Middlemiss of Bridgewater, Mich.

EKFRID COUNCIL

The municipal council of the township of Ekfrid met in the town hall, Appin, on Friday, con. 18. All members present. The minutes of last meeting were read, approved and signed by the reeve.

The report of J. M. McGregor, C.E., on the drainage work performed by W. R. McDonald was read and the assessed owners heard in the matter. Several of the petitioners withdrew their names from the petition and at the close of the meeting there was not a majority of the assessed owners upon the petition, therefore the council took no further steps in the matter.

Ray O. Borden, owner of west half north half lot 4, con. 11, and other owners presented a petition praying for steps to be taken for the drainage of certain lands in said petition set forth under the Municipal Drainage Act, and J. M. McGregor, C. E., was appointed to make an examination of the area of land described in said petition and prepare a report, plans, specifications and estimate of the work he may propose and assessments of the lands and roads liable to contribute to the cost of the work, under said act.

The reeve and clerk were instructed to sign a petition to the Lieutenant-Governor-in-council praying for aid in the construction of the Morrow and Black branch drains under "The Provincial Aid to Drainage Act," and the clerk was further instructed to forward the same to the proper authorities.

Plans and specifications for a concrete bridge on sideroad 16 south, and also for a concrete bridge on sideroad 4, range 1, south, were approved.

An application for graveling road opposite lots 17 and 18, gone, was approved, provided the cost does not exceed \$100.

A number of checks were paid. Council adjourned to March 15th at 10 a. m.

A. P. McDougald, Clerk.

GREAT RUSH OF FREIGHT

The G.T.R.-Wabash Railway is reporting a great rush of business at the present time. There is an average of more than a thousand carloads of freight passing through daily, and orders have been received to prepare for still greater increases in business.

PIERSON-DEWAR

Kilmartin, March 7.—The marriage of Edith, youngest daughter of Mr. and Mrs. Alex. Dewar, and Sam B. Pierson took place in Detroit on Tuesday, Feb. 22. The bride wore a smart travelling dress of navy blue tulle with a grey hat with grey suede shoes to match. Her flowers were a colonial bouquet of blue violets and rosebuds. The young couple spent a week with the bride's parents here, after which they left for Chicago. They will reside at Pierson, Ill.

On the eve of the marriage the young friends of the bride met at the home of her sister, Mrs. R. Tyrrell, and presented her with a linen shower.

It is a matter of great convenience to Glencoe people that Templeton's Rheumatic Capsules and RAZ-MAH for Asthma can now be secured at H. I. Johnston's.

SCHOOL FAIRS AS USUAL

R. A. Finn, agricultural representative for Middlesex, announces that school fairs will be conducted this year much the same as in previous years. He is sending out seeds of various kinds to be grown at home, and with the seeds will be sent directions for planting and laying out the plot.

The crop will be oats, barley, potatoes, manuels, beets, turnips, field corn, sweet corn, carrots, onions, asparagus and sweet peas.

No pupil will be allowed more than one crop, but five girls in each school may have flowers if they also have a plot or a setting of eggs.

The school fairs will be held in the last part of September or the first part of October, and suitable prizes will be awarded in each class.

GOOD ROADS MEETING

A mass meeting in the interest of good roads will be held in the town hall, Glencoe, on Friday evening, March 11th, at 8 o'clock. Hon. C. F. Biggs, Minister of Public Works; Leslie Oaks, M.P.P. for East Lambton; R. W. Roberts, Road Engineer, and J. G. Lethbridge, M.P.P. for West Middlesex, will address the meeting.

DEATH OF HUGH B. McNEIL

Kilmartin, March 8.—The death occurred at his home in Detroit on Friday, March 4, of Hugh B. McNeil, at the age of 84 years. The funeral services were conducted in Burns' church, Mosa, on Monday afternoon, March 7. Mr. McNeil was born in Mosa and was a resident of Mosa and Glencoe for many years, moving some time ago to Detroit. He leaves to mourn him two daughters and one son, Mrs. George Huff and Archie McNeil of the Canadian West and Miss Margaret McNeil at home; also two sisters, Mrs. M. C. Munroe and Mrs. Janet McIntyre of this place, and a brother, Archie McNeil of Santa Maria, Cal. The floral tributes were beautiful. John McVicar, Robert McKellar, Donald McGregor, Malcolm McIntyre, John McPhail and William Munroe acted as pallbearers. Those who accompanied the remains from Detroit were Archie McNeil, Miss McKellar, Mrs. Williams, Mrs. Colington, Miss Leitch, Mr. Anderson, Neil McLarty and Mac McNeil. Mrs. Johnston of Bothwell also attended the funeral.

HYDRO POWER FOR FARMERS

Toronto, March 4.—The farmers of Ontario are to have cheaper power. The bill has been drafted and will be laid before the Legislature within the next few days, providing for a subsidy equal to thirty-three and a third per cent. on rural primary transmission lines. This is as far as the Hydro-Electric Commission was prepared to go, although at the conference last week between Sir Adam Beck and Legislative members, Hon. F. C. Biggs saw no reason why there should not be a bonus of fifty per cent. of the lines. The bill to be introduced will limit the annual expenditure in the district named to a quarter of a million dollars.

A MINISTER "SPEAKS OUT"

To the Editor of The Transcript:

Dear Sir,—I am not enamored of appearing in print, but as I consider I have been personally challenged by Mr. W. M. Leonard in a communication re the local town hall and picture show, in which he writes "The village will wait your expression of opinion, without consulting my brother ministers I will now fearlessly 'speak out' on the two points found fault with by Mr. Leonard."

First—"The danger to human life in the local town hall should there be an alarm of fire, etc." If I am correct the reeve and town council have had the said hall inspected and passed for use as a picture show, therefore I consider it would be most presumptuous for me as a "bird of passage" to condemn our council and the government and to "knock" our village.

Second—"Re the picture show my correspondent says to me 'It is up to you to denounce the scenic pollution or your silence will give consent to these things.' My reply to this is simply that I have been five times at the show and will go whenever I feel so disposed, and I have not seen any picture that I could describe as "unfit." On two occasions I saw in the night series one or two very swiftly put through scenes that I considered might be construed as "unfit" by anyone looking to find fault, but here again it appears to me very unfair to the village, the council and the picture exhibitor when it is the government authorities (who have passed all these pictures) that we ought to "call down."

I have now spoken out and if we are to condemn a whole entertainment for one or two flaws it amounts to the same logic as some of the Rationalists use when they say "Don't allow the Bible into the hands of young people because there are shady things in it." We must remember the prayer of the Master for His disciples: "I pray not, O Father, that thou shouldst take them out of the world but that thou shouldst keep them from evil." "Honi soit qui mal y pense."

Yours faithfully,

T. J. CHARLTON.

THE TEST

"Rescue, school!"
The cry rang down the narrow street, and a lad of about sixteen, with his college cap on the back of his head, stopped suddenly; then, catching a glimpse of a school cap in a crowd of fighting town boys, he dashed down the street, shouting: "School to the rescue!"

Two boys went down before him, and the rest, losing heart at the unexpected interference, fled down the road.

Harold James, his collar torn and dirty, and a bruise slowly blackening one eye, turned to his rescuer.
"Thanks, old man!" he said simply. "You just arrived in time."

"So it seems," smilingly replied the other, as he surveyed Harold's condition.

The two lads belonged to the college outside the town, and had, with a number of others broken bounds to see a circus which had stopped for a day in a large field on the outskirts of the town.

Harold, on his way back, had run into some half-dozen town boys, and the latter, ever ready on account of a long-standing feud between the college boys and the town boys to attack a Colleague if he was alone, seized the opportunity.

"Let's go to Mother Medford's on the way back, and get something for your eye," suggested Jack Lincoln; and, on the other assenting, the two lads linked arms and set off towards the school tuck-shop.

"I'll do it!" By George, I will! Unless Jack—"
The speaker broke off with a frown, and, springing up from the rustic seat he occupied by himself, he walked quickly across the lawn towards the house.

It was Harold James who spoke, now a lieutenant in the Army, for ten years had elapsed since the schoolboy fight had cemented a friendship between the two lads. They both held commissions in an infantry regiment, and the dance now being held in Colonel James' fine old house was a farewell one to them, for they sailed with their regiment for India very shortly.

Harold was in love with his father's ward, Vera Stanhope, and he hoped to be engaged to her before he left England.

On entering the house he was about to seek out Vera, when he perceived Jack talking to a group of friends. Directly Jack saw him he came towards him, and drew him into an alcove hidden from the rest of the guests.

"I say, old man," he began quietly, "I have something to tell you." He paused. Harold had gone suddenly white. "Vera has promised to marry me on my first leave."

Harold, his face white and drawn, stared for a moment at his friend, then the blood rushed into his face. He seemed about to speak, but suddenly changing his mind, turned about and walked away.

So it had come at last. He had somehow expected it, by the way Jack and Vera had acted towards each other, but this did not deaden the shock, for he had, as everybody does in like circumstances, hoped his surmises were wrong, though in his inner heart he knew it was a vain hope.

He sat in a corner hidden by the palms, brooding over this trouble.

Grandfather smiles while Baby tells him how nice his beard feels and how sweet it smells.

The secret is the morning wash with Baby's Own Soap—the soap Mother uses for herself and for the children.

Roses of France and other natural perfumes give their aroma to

BABY'S OWN SOAP

Best for Baby Best for You

A thrilling new serial will begin in our next issue. Look out for chapter one of this tale of surprising mystery and exciting adventure. The additional interest of a charming love theme makes "The Secret of the Old Chateau" an exceptionally good serial. It comes from the clever pen of David Whitelaw, the famous story writer.

round the waist, he gently laid him over his shoulder.

The Afghans shouted angrily when they saw what he did, and a number of them set off to overtake the daring Englishman. As Harold staggered off towards the British position, shots rang out, and a sudden stab of pain in his side told him he was hit. Still he went on, at the same time raising his friend's body in front of him to protect it from the bullets now whistling past him and striking the rocks around him.

The shots suddenly ceased, and a huge tribesman sprang forward drawing his sharp, curved sword. The British could now see what was happening, and they watched breathlessly as the Afghan slowly drew near Harold. Then, as if on impulse, a number of them sprang over the barrier and rushed towards him, the foremost attempting to intercept the fanatic.

A few seconds of running showed they would be too late, so they stopped and opened fire, but apparently in their excitement they aimed badly, for the Afghan reached Harold, who dropped his burden and turned to face him, drawing his revolver as he did so.

Before he could use it, however, he fell pierced by his opponent's sword. With a triumphant shout the marauder turned to kill Jack, but by now the British aim had improved, and he suddenly fell dead across Jack's body.

An hour later Jack lay by his friend's side, and, bending over him, he heard him murmur: "Good-bye, Jack! Look after Vera!"

Another soul had set out on its journey to the Great Beyond.

"Look, Jack dear!" said Vera softly, touching her husband's arm, as she passed to Jack Lincoln, now on his way to England, a copy of the morning paper.

The paragraph she pointed out read: "The Victoria Cross has been posthumously awarded to the late Lieut. Harold James, who was killed while gallantly rescuing a wounded brother officer under fire in the late Afghan rising."

Teaching a calf to drink from a pail requires all the religion a man can have.

And He Still Lives.
They told Wycliffe they would destroy his teaching of Christian liberty by burning him at the stake.

"Very well," he replied, "Burn my body at the stake, and scatter my ashes on you river of Severn, and its waters will carry my faith and principles to the uttermost parts of the earth."

My task is but to smile each day
When things go wrong;
To cheer my friends along the way
With humble song.

And if my neighbor feel the blast
Give him my coat,
Or if my friend fall from the mast
Let down the boat.

My task is but to do each day
Some kindly deed,
To help some friend in humble way
In time of need.

—Mary A. Johnson.

Women! Use "Diamond Dyes."
Dye Old Skirts, Dresses, Waists, Coats, Stockings, Draperies, Everything.

Each package of "Diamond Dyes" contains easy directions for dyeing any article of wool, silk, cotton, linen, or mixed goods. Beware! Poor dye, streaks, spots, fades, and ruins material by giving it a "dye-look." Buy "Diamond Dyes" only. Druggist has Color Card.

When the lining is ready, slip it on the form, noting the points where the form does not fit it out. Pad out the form where it fails to fit the lining, making it fit snugly. Cotton batting may be used satisfactorily for padding, and when this is completed, baste or carefully pin the lining in the back, and the form is ready for use.

One complete sleeve may be made, fitted and then stuffed with the cotton, and enclosed at top and bottom with a circle of the muslin. When it is desired to fit a sleeve, this arm may be pinned into place on the form, after which it can be removed and out of the way when not in use. This sleeve form is especially useful in fitting a coat sleeve.

If there are two or more women in the family, lining may be made for each, and providing there is not too great a difference in size, the form may be used for all, though the padding will probably have to be changed.

The woman who has had many discouraging hours trying to make her dresses look well, once she has used a form, will never try to sew again without one.

Kindness.

TORONTO SALT WORKS
C. J. CLIFF TORONTO

WHY LOOK OLD?
When one application of Milton's Hair Restorative every 2 months keeps the hair natural. No oil, no dirt, no wash, when desired. Try it. Black or Brown. Price, \$2.00. Sent prepaid in any address in Canada. —Milton, Powell Ave., Ottawa

Send for Book of Recipes, FREE!
In 2, 5, and 10-lb. tins

Makes every dish—even bread pudding—more popular with children and grown folks. Rich, pure, wholesome, economical.

To be had at all Grocers.
THE CANADA STARCH CO., LIMITED, MONTREAL

Crown Brand Syrup
"The Great Sweetener"

Have Your Cleaning Done by Experts
Clothing, household draperies, linen and delicate fabrics can be cleaned and made to look as fresh and bright as when first bought.

Cleaning and Dyeing
Is Properly Done at Parker's

It makes no difference where you live; parcels can be sent in by mail or express. The same care and attention is given the work as though you lived in town.

We will be pleased to advise you on any question regarding Cleaning or Dyeing. WRITE US.

Parker's Dye Works Limited
Cleaners & Dyers
791 Yonge St. Toronto

Est Delivers Electric Shock.
The electric eel found in Brazil and Guiana can administer quite a severe electric shock, sometimes strong enough to overcome a horse.

Prompt Taxpayer Gets Reward.
In Japan when a man pays his taxes promptly he is rewarded by the government with a slip of paper entitling him to a certain number of chances in the municipal lottery.

Another scheme which has been proposed and considered is the conveyance of the oil by pipeline from the Mackenzie River basin to Behring Sea, whence it might be shipped by tankers to the world's markets, and a Bill to sanction this scheme is at present under consideration by the legislature. The proposed line would be laid via the Yukon River systems to salt water. Dr. Alfred Thompson, member of the legislature for Yukon Territory, and one time gold commissioner for the territory, predicted as far back as 1887, when already many believed in the oil possibilities of the river basin, that this method of getting the product to the market, would some day be adopted.

From the viewpoint of the conservation of Canada's industrial resources for the benefit of the Empire, this proposed routing of the oil is not regarded favorably. It would mean direct shipment of all oil production from the new Canadian field to foreign countries and the loss of all subsequent benefit arising from its commercial utilization.

With the brains of the best engineers devoted to scheming out the most feasible and economic project, there is no doubt that when the advent of the spring again opens up the country to active operations, a successful scheme will have been evolved for putting the product of the Fort Norman Field on the world's markets.

The successful strike would seem to have proved the potentiality of the field; the ensuing problem is the inevitable one of the pioneer.

The development of the country will undoubtedly be followed by the penetration of the railroad and the adding of a new area to industrial Canada.

TRANSPORT OF FORT NORMAN OIL

A PROBLEM FOR CANADIAN ENGINEERS.

Development of Peace River Country Will Add a New Era to Industrial Canada.

The strike of oil by the Imperial Oil Company at Fort Norman, north of the Peace River country, has aroused widespread interest in the potentialities of this field. Hundreds of prospectors are ready to jump off from the end of the steel with the advent of spring to make their way to this region, whilst others still more enterprising have chartered aeroplanes to steal a march on the mushers and trawlers in the anticipated rush. Negotiations are said to be under way for the establishment of an aerial service from Fort Norman to Edmonton, a distance as the crow flies of about 900 miles, which calls for landing stages at intervals en route and the situation, before flying is commenced, of deposits of gasoline, accessories and other requisites for successful flying.

But stupendous as is the interest the strike has awakened in all prospectors, oil men, and investors, it is scarcely more so than that of devising the most practicable and economic method of transporting the product of the well and others which may be struck in the Mackenzie River basin, over the half-explored region which lies between it and the nearest shipping point by rail. Over this, many able minds are working. The Fort Norman field in the Mackenzie basin is situated about 1,500 miles north of Edmonton, the Alberta capital, and 1,000 miles from Fort McMurray, the most northerly point of railway contact. The country between consists of a vast stretch of rolling, lightly-timbered, well-watered country, hardly yet explored, rich agriculturally but possessing no roads of any kind whatsoever or other means of transportation. To get the oil from the well already struck (which, in itself, it is considered hardly justifies the building of a railroad) is the problem confronting engineers.

Tank Barges or Pipe Line.
One method considered to be practicable and economical is the transport of the oil product from Fort Norman to Fort McMurray by steel tank barges. The oil well is situated near the Mackenzie River, up which these reservoirs might be floated for 500 miles to Great Slave Lake. They would emerge from the lake by Slave River, where rapids occur for five or six miles, necessitating the introduction of a pipe line for this distance, and arrive at Fort McMurray by way of the Athabasca River. An alternate method would be to take the oil north by the Mackenzie River to the sea coast of Mackenzie Bay, a trip of 400 miles, presenting no difficult problems but only feasible in the summer time. To transport the oil to the Pacific coast of British Columbia at the nearest point would necessitate the construction of a railroad 550 miles in length.

Another scheme which has been proposed and considered is the conveyance of the oil by pipeline from the Mackenzie River basin to Behring Sea, whence it might be shipped by tankers to the world's markets, and a Bill to sanction this scheme is at present under consideration by the legislature. The proposed line would be laid via the Yukon River systems to salt water. Dr. Alfred Thompson, member of the legislature for Yukon Territory, and one time gold commissioner for the territory, predicted as far back as 1887, when already many believed in the oil possibilities of the river basin, that this method of getting the product to the market, would some day be adopted.

From the viewpoint of the conservation of Canada's industrial resources for the benefit of the Empire, this proposed routing of the oil is not regarded favorably. It would mean direct shipment of all oil production from the new Canadian field to foreign countries and the loss of all subsequent benefit arising from its commercial utilization.

With the brains of the best engineers devoted to scheming out the most feasible and economic project, there is no doubt that when the advent of the spring again opens up the country to active operations, a successful scheme will have been evolved for putting the product of the Fort Norman Field on the world's markets.

The successful strike would seem to have proved the potentiality of the field; the ensuing problem is the inevitable one of the pioneer.

The development of the country will undoubtedly be followed by the penetration of the railroad and the adding of a new area to industrial Canada.

French Mother-in-Law is a Diplomat

Why, asks a writer in The London Daily Mail, is the mother-in-law a failure in England and a success in France?

"The English attitude toward her," she writes, "is aptly expressed in the hideous appellation 'mother-in-law!' Who could love a mother with the legal reminder tacked on? How much more gracious is the courtly French designation 'Belle Mere!'"

"Of course, they have the mother-in-law joke in France, but it is without malice, and in most cases without meaning, for Belle Mere is, far more often than not, an unmitigated success and a most welcome addition to the household. In France it is rare for the wife's mother to keep a separate establishment. Think of the expense—and how much better to share in the same and motor car. Thus the young man can afford a larger house and indulge in luxuries that might otherwise be beyond his grasp."

"But Belle Mere's benevolences do not stop here. The housekeeping passes into her experienced hands and she sees to it that during the first critical months of married life the young wife shall be free to go out with her husband and join in his pleasures and amusements."

"Later, too, when babies arrive, Belle Mere establishes herself as nurse in chief. It is she who accompanies the children to the park or plays with them untiringly throughout a rainy day."

"What would you say," she asks, "My daughter must occupy herself with her husband. Otherwise . . ."

"Yet there is nothing in all this that

English mother-in-laws would not gladly do. Why, then, must English mothers and married daughters live rightly apart? Even a visit from mother-in-law to a young ménage is too apt to result in tears.

"The reason is not far to seek. It lies in tact and tactics."

"From the moment her child is married the French mother disciplines herself to what she considers a sacred duty. It is to idolize her son or daughter-in-law."

"The wife's mother and husband speedily become fast friends. He consults her in all his difficulties. She even advises him in his business affairs."

"Similarly if it is the husband's mother who shares the house, she sets a halo upon the wife. True, Belle Mere does the housekeeping, sees to the cooking, helps with the sewing. But the glory of it all she ascribes to the young wife."

"How different is the method of the British mother-in-law!"

"My darling," she whispers, as soon as she enters her son-in-law's house, tell me, are you happy? Is he all you thought him to be kind to you?"

"Ask Belle Mere?"

"My little," she exclaims, "that young man is adorable and he worships you. But what have you got for him dinner?"

"In the quarrels of everyday life Belle Mere invariably supports her son-in-law. But, strange to say, both mother and husband are frequently on over to the daughter's viewpoint. Oh, how wise and how truly kind is Belle Mere!"

When the King Opens Parliament

There are a pair of gates in London that are kept permanently shut to conveyances every day of the year except one. These gates lead out of Dean's Yard, Westminster, into a lane that runs straight down to the House of Lords. They are only opened on the day on which His Majesty the King opens Parliament in person.

On that day His Majesty proceeds from Buckingham Palace in a wonderful old coach, drawn by jet-black horses. Whilst the King is on his way Yeomen of the Guard still search the vaults under the Houses of Parliament, to ensure the safety of the monarch and his Ministers.

When the Sovereign reaches the House of Lords gates are fired in St. James' Park. The moment of arrival is signalled by hand. Flag-signallers stand on the towers of the Houses of Parliament, and send their messages to other signallers on Government offices overlooking the park. From thence it is conveyed to the troops below.

Ministers await the arrival of the King outside the House, and then take up their position in the procession to the Lords. Usually a large number of peers attend as well.

Everybody stands, and it is "hats off" for the Black Rod when he passes down the central corridor on his way to summons the Commons, who enter a few minutes later at a rapid march—the King's pace is always quick—to hear the King's speech.

The King's speech is prepared by the Cabinet, and deals with the international situation, and reviews the legislation it is intended to introduce during the next Parliamentary year.

Sunday School Founder Got Idea from Shepherd

Robert Raikes, of Gloucester, is acknowledged as the founder of the Sunday School, says the London Daily News, but nothing is heard of Emmanuel Twynning, the shepherd of Magpie Bottom, Sheepcombe, Gloucestershire, from whom Raikes got his idea.

"Magpie Bottom is a beautiful eyrie at the edge of Sheepcombe, where the lane departs down the valley, at last reaching Gloucester, eight miles away," the writer says. "I don't know where marjoram grows so well as along the dry banks of the lane by Magpie Bottom; and the common-lane field just over the wall is in summer almost one mass of thyme."

"From Gloucester to Sheepcombe is a good deal more than the Sabbath journey that was no doubt deemed correct in the time of Robert Raikes; and the young man must have been up here to take a service. At any rate, as he went by Magpie Bottom there was shepherd Emmanuel Twynning in that thyme-scented little paradise, with a ring of children round him, explaining perhaps the pastoral parables of the New Testament."

"Master Bob Raikes stopped, perhaps joined in a hymn and talked to the shepherd, asking him how he went on when the weather was not so favorable. He was told that on wet days some handy cottage sheltered the class, and that, come wet or fine, there was a class every Sunday."

"During the walk back to Gloucester the thought took root and, without the thyme and the marjoram and the inconspicuous chirruping of grasshoppers, Robert took up his shepherding in the dark streets of the cathedral city."

"There were still plenty of Twynnings in Gloucestershire, though at Sheepcombe there are at present none."

There were 426 Canadian chaplains on active service during the war; 108 gained awards, 21 were wounded, and 6 died.

Dangers of Dry Air in Homes

The air of our houses in the winter time is drier than that of any desert. This is not good for folk, one disadvantage of it being that the mucous membrane which lines the nose passages and throat is kept too dry, and liability to colds is increased.

To remedy the trouble resort is had to various expedients, such as keeping a supply of water in receptacles attached to the furnace, in order that it may moisten the air by its evaporation. This helps, though inadequate for the purpose.

There is no such thing as absolutely dry air in nature. Always it contains more or less water, though a quantity of it may be rendered entirely water-free in the laboratory.

The percentage of water that air can hold in suspension depends upon the temperature of the latter. In air at 70 degrees Fahrenheit there may be as much as eight grains of water to the cubic foot, but no more. It is then "saturated." This means that sixty cubic feet of air would be required to hold one pound of water.

But air at 10 degrees will hold in suspension a little more than twenty-six grains of water.

On the other hand, air at a temperature 20 degrees below zero can hold less than one-fifth of a grain of water.

A glass of ice water in a warm room rapidly accumulates moisture on its outside. This is because the air immediately surrounding the glass is cooled and thereby rendered unable to hold its water, which condenses upon the surface of the glass.

The clouds in the sky are composed of tiny globules of water. Formerly it was supposed they were hollow like soap bubbles; else, it was argued, how could they float?

The "Phrenology" Humbug.

There has recently been a marked revival of the "phrenology" humbug, and charlatans are coming money by examining people's "bumps" and drawing therefrom analytical conclusions in regard to their talents and traits of character.

The clever fakers in this line specialize in the alleged study of physiognomy as an indicative of psychic traits, etc. This sort of thing "goes" wonderfully well, inasmuch as the average person is most interested in his own face and in what it may be supposed to express.

Physical anthropologists, however, are firm in asserting that there is nothing whatever in the idea. There is no essential relation between the features of a human individual and his character—beyond, of course, the fact that disposition and temperament may and commonly do so modify the muscular structure, especially about the mouth, as to render the expression indicative. Thus, for example, a sour temper or a crafty habit of mind will show itself in a person's face more and more as he grows older.

A prominent chin does not necessarily signify firmness of character; nor, when exaggerated, does it mean brutality. Story-writers nowadays teach us that eyes set "too close together" indicate slyness and meanness. There is no more truth in that idea than in the notion that a big nose suggests generosity.

Where beauty of feature is concerned one might say that it depends fundamentally upon the shape of the skull mask. A woman's skull is more light-conspicuous than that of a man, and even the texture of its bones is more delicate.

A "duck of a man" often makes a goose of a husband.

When a sewing machine will not work, stand it near a fire so that the oil may melt, and then remove and clean with pure paraffin, putting it into every oil hole. Work the machine well, and then wipe every part with a clean cloth.

THE GREAT FAMINE IN NORTH CHINA

THE RESULT OF FLOOD AND OF DROUGHT.

Five Provinces, Chihli, Shantung, Honan, Shensi and Shansi, Swept by Scourge.

In China ten persons are dying every minute from starvation. This means that six hundred people pass away each hour and fifteen thousand perish between sunrise and sunset. Forty-five millions are directly affected and one-third of this number are actually starving and will succumb before spring. Such is the appalling situation today in the land of the yellow man in what is rapidly becoming the most stupendous misfortune of all history.

The world's ear has long been attuned to the piteous plea for help. Until the great Chinese famine developed, most of the appeals for aid have come from the innocent victims of war. The tragedy there was man-made. The Far Eastern calamity which now implores the assistance of western civilization is the result of flood and drought. Man had no part in sowing this whirlwind of death and suffering. The elements are solely responsible.

Eighty-five Millions Affected.

Clearly to understand the dreadful Chinese dilemma you must know first of all that in the northeastern corner of the oriental republic are the provinces of Chihli, Shantung, Honan, Shensi and Shansi, five of the most populous districts of a much-populated country. Under normal conditions eighty-five million people live here, and they comprise more than one-fourth of the entire human race in China. Ninety per cent are farmers, whose principal crops have been wheat, millet, corn and beans. So densely settled is this region that the crops, large as they are in ordinary times, are barely sufficient to feed the inhabitants. And decrease in production, therefore, automatically works a hardship because in this particular section of China transportation facilities are hopelessly inadequate.

The people of these five provinces are simple, frugal and thrifty folk. They usually harvest two crops a year. In 1916 the output was only fair and there began the series of circumstances which has now engulfed them in sorrow and suffering. Before the autumn harvest was well under way, the land was inundated by a flood which wiped out entire towns and villages, ravaged the countryside and caused a loss of \$100,000,000.

The Chinesman is by temperament a stoic, and the farmers began to rebuild their shattered fortunes. Ill-luck dogged them, because the crops of 1917 and 1918 were reduced. Still they persisted and again sowed the fields in 1919. Both crops that year, as well as the following year, were complete failures. The net result is that the advent of the present winter found eighty-five millions of people virtually stripped of sustenance and without resource of any kind. What little grain had been husbanded was soon wiped out. When hundreds of thousands sought to escape to other provinces and take up the burden of life anew, they were met by cordons of police at the frontiers and forbidden to enter. Forced back to their own desolate firesides they had to make the most out of nothing.

Greatest Calamity in History.

Other calamities pale before this colossal visitation. The world war cost approximately 17,500,000 lives. The black death in England in 1348 and 1349 caused 2,000,000 deaths. The Irish famine of 1846 killed 1,000,000, and the Indian famine of 1866 took toll of 1,450,000. The Chinese famine of 1878 with its 9,500,000 victims does not equal the present peril, which, as I have already intimated, will depopulate China to the extent of 15,000,000 before it has run its dread course. It is, therefore, the supreme affliction yet imposed upon mankind.

The whole pale-ridden narrative of human suffering contains no more poignant revelations than are disclosed in China today. Here are some specimen chapters of tragedy called from the larger story of a nation in distress:

A missionary encountered a woman weeping on the banks of a river. When he asked her the cause of her grief she replied:

"I have thrown my baby into the waters rather than have him die of starvation in my arms as two of my other little ones did."

"Along the highways in the devastated area it is no uncommon sight to behold girls tied to trees by their parents and left to starve. This shows that the pangs of hunger have driven many thousands of men and women insane. With this maddening hunger has been born a desperation that forces parents to every terrible extreme.

To visit the famine field is to touch grief and encounter sacrifice. Life is literally eeked out. In Honan a representative of the Associated Press found a family lying exhausted by the roadside. When he asked them how they had subsisted they told him that they ate chaff and that three-fourths of a pound of this had to suffice for six persons for a day. In a village nearby a population of 2,000 people had dwindled to 200.

A family of five plodded northward

—and the worst is yet to come

The First Tag Day.

Montem, a curious custom long ago allowed to lapse, used to be an institution at the great public school of Eton, in England. In his reminiscences, Mr. Montagu Williams gives us a description of it.

Montem took place once every three years. It was originally founded for the benefit of any college student who in his last year attained the highest place in the school, but who, by reason of no vacancy occurring in time, had not the luck to be sent up to King's College, Cambridge. All the money that was taken, under the peculiar name of the "salt," passed into his pockets on the day that he left, and was supposed to go a long way toward paying his expenses at either Oxford or Cambridge. The amount collected was sometimes one thousand or even twelve hundred pounds.

There was a certain number of sixth-form, or upper division, boys, who wore fancy dresses and acted as salt bearers. They carried large sliken bags into which they put the money collected from the various passers-by. The donors received in return for their contributions little pieces of blue paper on which was inscribed the motto for the mount of that particular year. The motto for the last montem was pro more et monie.

Royalty itself was not free from the tax. Two salt bearers were stationed at Windsor Bridge, and when the queen drove down the hill—and she never missed a montem—the elder of the two stepped forward, stopped the carriage and, taking off his hat with the words, "Salt, Your Majesty, salt," placed under contribution the highest and noblest lady of the land.

The First Tag Day.

It is hard to see how we managed to get along without the X-ray. Nowadays it finds so many employments, most of them very necessary. Surgeons use the X-ray to examine fractures of bones; dentists, to discover hidden abscesses at the roots of teeth, etc.

The newest use for the mysterious ray, however, is to detect dodgers of smugglers. Packages are examined for contraband without disturbing the wrappings; cakes of soap in which diamonds may be concealed are similarly inspected, and the customs officers do not hesitate to go so far as to radiograph the shoes a woman has on her feet. She is not even obliged to take them off. There may be a ring hidden in the heel of a neat boot, or in the sole.

During the war the X-ray was used to detect contraband in bales of cotton of other material shipped to Europe. It did the work so well that many manufacturers and shippers make a business of "shadowgraphing" articles in search of flaws.

One of the most remarkable new uses for the X-ray is to detect the presence of valuable pearls in mussels and pearl oysters. This is already done commercially in Ceylon. Oysters which are thereby proved not to contain pearls are restored to the beds, thus avoiding their needless destruction.

Music Hath Charms.

Do animals like music? The effect of it on various wild creatures was recently studied at the London Zoological Gardens. For most of the tests a violinist supplied the music.

Whether tarantulas listened or did not listen could not be determined; they remained unmoved and sulky. Not so the scorpions; after a few notes, they became agitated and writhed and danced tumultuously; their excitement increased with every crescendo and decreased with every diminuendo.

In the reptile cages the effect was more marked. The monster lizard listened and swayed; the black snakes were attentive and started up and hissed. A boa crept as close as possible to the instrument and seemed enraptured. Of all the snakes the cobra is said to be the most susceptible to music; the specimen at the Zoo did not belie the reputation of its kind. On hearing the violin it raised itself on its tail in the traditional attitude, spread its hood and swayed to and fro.

The polar bear stood up at the front of its cage to listen and showed much pleasure. The wolves snarled and cowered in fear, with their tails between their legs. Their bodies bristled, and their bodies quivered with fright. The foxes and jackals acted in the same way.

The elephant did not care for the music; on the contrary it trumpeted and snorted with rage. Some of the monkeys listened eagerly, with nods and gestures of appreciation; others scooped and turned away in disgust.

After the violinist, players on the piccolo and the flute performed. As a rule, the shrill notes of the piccolo annoyed, frightened or enraged the animals, whereas the softer tones of the flute soothed and pleased them.

X-Ray Aids Customs Officials.

It is hard to see how we managed to get along without the X-ray. Nowadays it finds so many employments, most of them very necessary. Surgeons use the X-ray to examine fractures of bones; dentists, to discover hidden abscesses at the roots of teeth, etc.

The newest use for the mysterious ray, however, is to detect dodgers of smugglers. Packages are examined for contraband without disturbing the wrappings; cakes of soap in which diamonds may be concealed are similarly inspected, and the customs officers do not hesitate to go so far as to radiograph the shoes a woman has on her feet. She is not even obliged to take them off. There may be a ring hidden in the heel of a neat boot, or in the sole.

During the war the X-ray was used to detect contraband in bales of cotton of other material shipped to Europe. It did the work so well that many manufacturers and shippers make a business of "shadowgraphing" articles in search of flaws.

One of the most remarkable new uses for the X-ray is to detect the presence of valuable pearls in mussels and pearl oysters. This is already done commercially in Ceylon. Oysters which are thereby proved not to contain pearls are restored to the beds, thus avoiding their needless destruction.

Tree Seeds for Great Britain.

In response to requests from forestry authorities in the United Kingdom, tree seeds were collected in British Columbia by officers of the Dominion Forestry Branch. These were forwarded to the Forestry Commissioners for Great Britain to be used in the carrying out of reforestation plans under way in the United Kingdom. The seeds included those of Douglas fir, Sitka spruce, alpine fir, and of other species which the British authorities desire to test—Annual Report, Director of Forestry, Ott. wa.

The Pacific coast of Costa Rica produces a species of shellfish from which a rich purple dye for silk is obtained.

Longevity and Chewing.

How reasonable it would seem to be to learn to chew food twice as long as we do, and as a natural consequence, eat half as much as we are accustomed to eat. And we might add that a natural result also would be that we would live twice as long.

Old age comes on, we are told, by the gradual decrease in the body's power to eliminate waste matter. People who practice "Fletcherizing," or very thorough chewing, are adding many years to their lives.

We are accustomed to thinking of meat as being the only food which requires very thorough mastication. Everything we eat or drink should be taken slowly so as to be well mixed with saliva. Even milk should be slowly sipped instead of being drunk as water.

Any practice which eliminates doctors' bills and improves the health is a great economy, of course, but think, too, of cutting that grocery bill in half! When ordering two pounds of steak for dinner, remember that one pound will do even better than two—if you take time to chew it well.

Matching Wits With a Grizzly.

The cunning of an old bear that Mr. Enos A. Mills tells about in his book The Grizzly, shows what a wily antagonist you will have against you if you ever try to match wits with old sph-rain.

After passing an hour or more without seeing the bear, says Mr. Mills, who was following a grizzly to study his behavior, I climbed a cliff, hoping to get a glimpse of him on some ridge ahead. I could see his line of tracks crossing a low ridge beyond and felt that he might still be an hour or so in the lead. But in descending the cliff I chanced to look back along my trail. Just at that moment the bear came out of the woods behind me. He was trailing me!

I do not know how he discovered that I was following him. He may have seen me or scented me. At any rate, instead of coming directly back and thus exposing himself, he had very nearly carried out his well-planned surprise when I discovered him. I found out afterwards that, leaving his trail far ahead of me, he had turned and walked back in his own foot-prints for a distance. After tramping this stretch a number of times he had leaped into scrubby timber and made off on the side where his tracks did not show.

After discovering him on my trail I went slowly along as if unaware of his presence. He followed within three hundred feet of me. When I stopped he stopped. He occasionally watched me from behind bushes, a tree or a boulder.

I concluded to turn the tables on him. After crossing a ridge where I was for the moment out of his sight, I turned to the right and ran for nearly a mile. Then, circling back into our old trail behind the bear, I traveled serenely along, imagining that he was far ahead. I was suddenly startled to see his shadow move from behind a boulder near the trail, only three hundred feet ahead of me! At the place where I had left the trail to circle behind him he had stopped and apparently guessed my movements, for, turning in his tracks, he had come a short distance back on the trail and lain down behind the boulder to wait for me.

I went on a few steps after discovering him, and he moved to keep out of sight. I edged toward a tall spruce, which I planned to climb if he charged. Pausing by the spruce, I could see his silver-gray fur as he peered at me from behind the boulder. I concluded finally that it was best not to follow him farther. Going a short distance down among the trees, I built a rousing fire. Between it and the cliff I spent the night, satisfied that I had had adventure enough for one outing.

Music Hath Charms.

Do animals like music? The effect of it on various wild creatures was recently studied at the London Zoological Gardens. For most of the tests a violinist supplied the music.

Whether tarantulas listened or did not listen could not be determined; they remained unmoved and sulky. Not so the scorpions; after a few notes, they became agitated and writhed and danced tumultuously; their excitement increased with every crescendo and decreased with every diminuendo.

In the reptile cages the effect was more marked. The monster lizard listened and swayed; the black snakes were attentive and started up and hissed. A boa crept as close as possible to the instrument and seemed enraptured. Of all the snakes the cobra is said to be the most susceptible to music; the specimen at the Zoo did not belie the reputation of its kind. On hearing the violin it raised itself on its tail in the traditional attitude, spread its hood and swayed to and fro.

The polar bear stood up at the front of its cage to listen and showed much pleasure. The wolves snarled and cowered in fear, with their tails between their legs. Their bodies bristled, and their bodies quivered with fright. The foxes and jackals acted in the same way.

The elephant did not care for the music; on the contrary it trumpeted and snorted with rage. Some of the monkeys listened eagerly, with nods and gestures of appreciation; others scooped and turned away in disgust.

After the violinist, players on the piccolo and the flute performed. As a rule, the shrill notes of the piccolo annoyed, frightened or enraged the animals, whereas the softer tones of the flute soothed and pleased them.

X-Ray Aids Customs Officials.

It is hard to see how we managed to get along without the X-ray. Nowadays it finds so many employments, most of them very necessary. Surgeons use the X-ray to examine fractures of bones; dentists, to discover hidden abscesses at the roots of teeth, etc.

The newest use for the mysterious ray, however, is to detect dodgers of smugglers. Packages are examined for contraband without disturbing the wrappings; cakes of soap in which diamonds may be concealed are similarly inspected, and the customs officers do not hesitate to go so far as to radiograph the shoes a woman has on her feet. She is not even obliged to take them off. There may be a ring hidden in the heel of a neat boot, or in the sole.

During the war the X-ray was used to detect contraband in bales of cotton of other material shipped to Europe. It did the work so well that many manufacturers and shippers make a business of "shadowgraphing" articles in search of flaws.

One of the most remarkable new uses for the X-ray is to detect the presence of valuable pearls in mussels and pearl oysters. This is already done commercially in Ceylon. Oysters which are thereby proved not to contain pearls are restored to the beds, thus avoiding their needless destruction.

Tree Seeds for Great Britain.

In response to requests from forestry authorities in the United Kingdom, tree seeds were collected in British Columbia by officers of the Dominion Forestry Branch. These were forwarded to the Forestry Commissioners for Great Britain to be used in the carrying out of reforestation plans under way in the United Kingdom. The seeds included those of Douglas fir, Sitka spruce, alpine fir, and of other species which the British authorities desire to test—Annual Report, Director of Forestry, Ott. wa.

The Pacific coast of Costa Rica produces a species of shellfish from which a rich purple dye for silk is obtained.

Longevity and Chewing.

How reasonable it would seem to be to learn to chew food twice as long as we do, and as a natural consequence, eat half as much as we are accustomed to eat. And we might add that a natural result also would be that we would live twice as long.

Old age comes on, we are told, by the gradual decrease in the body's power to eliminate waste matter. People who practice "Fletcherizing," or very thorough chewing, are adding many years to their lives.

We are accustomed to thinking of meat as being the only food which requires very thorough mastication. Everything we eat or drink should be taken slowly so as to be well mixed with saliva. Even milk should be slowly sipped instead of being drunk as water.

Any practice which eliminates doctors' bills and improves the health is a great economy, of course, but think, too, of cutting that grocery bill in half! When ordering two pounds of steak for dinner, remember that one pound will do even better than two—if you take time to chew it well.

STEADY PROGRESS IN NEWFOUNDLAND

POSSESSES GREAT POSSIBILITIES.

Largest Iron Ore Deposit in World—Farms, Live Stock, Pulpwood and Coal.

The island of Newfoundland is essentially a fishing country, and revenue from this source so far outstrips returns from other products that the latter are cast into shadow. The island fisheries are worth more than two millions annually. The most important fish from the point of output and revenue is the cod. Nearly 1,500 men and 58 large vessels are engaged in the bank cod fishery, and 39,680 men and 15,120 small vessels in the shore cod fishery. The sea further swells the island's revenue with its returns of lobster, whale and seal.

Great Agricultural Possibilities.

Nevertheless, the island possesses great agricultural possibilities, which the government is endeavoring to further encourage and develop, and almost supplies its own needs in farm and dairy products, the amount of importations, excluding flour and oats, being only fifteen per cent. The yearly agricultural production is worth upwards of \$3,000,000, and the island possessed 13,288 horses, 40,427 cattle, 100,447 sheep, and 27,575 hogs at the last census. Its population was nearly 250,000 in 1911, according to the Government Year Book of 1920.

The island has also the largest iron ore deposit in the world, the total scattered resources of the island being estimated at \$600 million tons. Most of the raw material utilized by the Dominion Steel and Nova Scotia Steel Corporation is drawn from this source. There are also valuable coal deposits which have been mined for some time, and are now being extended. The government is taking the unique step of entering itself into the mining industry and engaging in mining and marketing coal. There are valuable pine forests in the north of the island, and a sawmill industry has been built up and is continually active.

Government Establishing Stock Farm.

With the intention of improving the animal husbandry of the island, a government stock farm is being established near the city of St. John's. The Minister of Agriculture visited the Canadian National Exhibition at Toronto last summer, and personally selected pure bred horses, cattle and sheep which were shipped through to St. John's.

Important development of the great pulpwood resources of Newfoundland is being undertaken under two grants recently issued, one to a British and the other to a Norwegian company. The Anglo-Newfoundland Development Company, some years ago, purchased timber limits and have had a pulp mill in operation. This concern has, for some time, been supplying the Northcliffe papers in England with paper.

A New Kind of Fit.

Stodious and bookish men are proverbially careless about dress. Probably no such man ever carried his indifference to clothes to the point to which Mr. Poland, Q.C., long presiding counsel to the British treasury, carried it.

Mr. Montagu Williams, in his amusing Leaves from a Life, says that Mr. Poland had a mind far above dress, but that his family had not, and that times out of number his sister took him to task about his bodily-fitting clothes and begged him to go to a good tailor. In any difficulty Miss Poland was in the habit of seeking the advice of her brother-in-law, Mr. Underdown, Q.C. The interview that Miss Poland had with Mr. Underdown with regard to her brother's attire was a serious one, and it resulted in Underdown promising to visit Poland at his chambers. The visit was duly paid, and Underdown succeeded in persuading Mr. Poland to order a completely new outfit.

In due time the new clothes were sent home. Very soon Underdown was again summoned by his sister-in-law to a private consultation. She was in terrible distress and told him that, though the quality of the new clothes was excellent, they fitted her brother worse than the old ones. Underdown went at once to the tailor, who was one of the best in London, and asked why the clothes fitted so abominably.

"It is not my fault, sir, I assure you," the tailor replied. "Every care was taken, but how could we fit a gentleman who insisted upon being measured sitting down?"

Underdown did not know what to make of the complaint and went at once to the Temple to get an explanation from Poland. With the imperious manner peculiar to him, Poland enlightened him. "Well, it's my business and not yours," he said. "I like to be comfortable. I spend three parts of my life sitting down, and I prefer to be measured so."

Motoring on a Wall.

The first motor vehicle introduced into West China has caused a great sensation.

A missionary residing in Szechuan, returning from a holiday, took back with him a motor-cycle, the gift of some friends in America. It is the first thing on wheels seen west of Hankow, and the owner spends most of his time demonstrating its powers to schools and civic bodies in the provincial capital.

This motor-cycle has given its owner more publicity than all the missionary work he has done in the city.

There is a certain amount of thrill in navigating the first motor-cycle through the narrow streets of a Chinese city, and up to the present the only comfortable place for driving has been found to be the top of the city wall!

Your body contains as much phosphorus as 5,000 boxes of matches.

Gets More Light.

The discovery by a London scientist that oxidizing the surface of glass lessens its reflecting power has led to the invention of lenses which transmit more light than normally.

J. M. Anderson GLENCOE Plumber

thanks for a copy of the annual report of the Department of Education of the Province of Saskatchewan. Mr. Stevenson is a former Glencoe boy.

John Bright has disposed of his farm on Lake Huron to R. J. Nicholson and Harry Lambert of Wyoming, at a price said to be \$8,500. The farm consists of 97 acres and includes Bright's Grove, a well-known summer playground.

The death occurred at the family residence, concession 14, Alborough, near the Alborough-Dunwich town-line, early Friday morning, of one of the best known residents of that vicinity, in the person of Archibald M. Murray, aged 49 years.

David Leitch, field man for the Dominion Sugar Company, reports that he has already secured 2,500 acreage for this year's crop in this district. The contracts, he says, were the easiest ever obtained in the sugar beet industry, 1,000 of the acreage being contracted for in six hours.

According to reports in the daily press, towns and villages are now on the same footing as townships in regard to food roads. Pavements could be constructed in outlying sections by a change in the by-law by the county council. Towns are now securing better terms. On highways passing through them they pay 40 per cent. of the cost of pavement, the county 20 per cent. and the province 40 per cent.

An interesting meeting of the Presbyterian Y. P. G. was held on Monday evening. The meeting was of missionary character, and John Strachan, convener of the missionary committee, read the report of the papers on the life of the late Dr. James Robertson, D.D. were given by Miss Margaret Morrison, Miss Margaret Kerr, Rev. Mr. Paton, H. J. Jamieson and Mac. McAlpine. Mr. Suttler rendered a leading solo.

The League meeting on Monday, March 7th, was exceedingly interesting. A vocal solo by Miss Gladys Bechill and a piano solo by Miss Dorothy Highwood formed the musical part of the program. Miss Edna Precious gave a very instructive and delightful talk on "The Resurrection." The League is to be honored next Monday night by the presence of a returned missionary from China, Rev. E. E. Kyle Simpson, who will speak for the Leaguers. Everybody is cordially invited to attend.

PERSONAL AND SOCIAL

—Mrs. Keith and daughter spent Monday in Detroit.

—Harry Singleton of London spent the weekend at J. A. McLachlan's.

—Miss Fern Graham of Chatham spent the weekend at her home here.

—Mrs. Symes attended the funeral of the late Mrs. Bright in Windsor on Monday.

—Mrs. Eliza McIntyre and daughter Beattie of Alvinston spent the weekend at the home of the former's sister, Mrs. George F. Munroe.

Agent for Tanage for feeding pigs.

MODEL CENTRE

(S. S. No. 7, Ekfrid)

The U. F. O. held a meeting in the school house on Friday evening, March 4th. There was a large attendance as usual, in spite of the disagreeable night. A good program was given by the young people of the community, including instrumentalists by Jennie McKee and Robert Carruthers, violin selections by John McGregor and Fred McGill, and solos by Sid Hartley in his usual good manner. Another feature of the program was an interesting debate, "Resolved that Canada should have free trade." The affirmative was upheld by Dan McKellar and Jessie McAlpine, and the negative by Mrs. Fred McGill and Arthur Ash. The judges gave their decision in favor of the negative.

Dan A. McCallum and Archie McCallum attended the funeral of the late Mrs. John Mitchell of Iona on Thursday last.

Rev. D. G. Paton made a number of calls through this district last week.

Misses Margaret, Catharine and Lillian Eddie spent Saturday at John F. McTavish's.

The U. F. O. will meet again on Friday evening, March 18th. The following committee have charge of the program:—Mae Graham, Elda Campbell, John Little, Will McFarlane. Arrangements are being made to have another debate on that evening. Everybody welcome.

IRWIN-ROEMMELE

The marriage of Ila Irene, only daughter of Mr. and Mrs. Adam Roemmele of Ekfrid, to Ernest Wilfred Irwin of Davenport, Iowa, son of Thomas Irwin of Ekfrid, was quietly solemnized at Appin manse on Tuesday, March 1, at 1:30 o'clock.

After the ceremony they returned to the home of the bride, where a sumptuous wedding dinner was served, after which the happy young couple motored to London and took the evening train to their future home in Davenport, Iowa. The bride travelled in a navy blue gabardine suit trimmed with black silk embroidery, with blouse of white georgette and modish hat of blue satin and straw.

Electric Oil needs no testimonial of its power other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, will know that the medicine proves itself and needs no guarantee. This shows why this Oil is in general use.

NOTICE TO CREDITORS

In the Matter of the Estate of Charles James Armstrong, late of the Township of Euphemis, in the County of Lambton, Railway Sectionman, Deceased.

Notice is hereby given, pursuant to the Revised Statutes of Ontario, 1914, Chapter 121, Section 56, that all creditors and others having claims against the estate of the late Charles James Armstrong, who died on or about the eighth day of January, A. D. 1921, are required to send by post prepaid or to deliver to the undersigned, solicitors for Alexander Armstrong, administrator of the estate of the said Charles James Armstrong, deceased, their names and addresses and full particulars in writing of their claims and statements of their accounts and the nature of the securities, if any, held by them.

And take notice that after the 31st day of March, A. D. 1921, the said Alexander Armstrong will proceed to distribute the assets of the said deceased among the persons entitled thereto, having regard only to the claims of which he shall then have had notice, and that the said Alexander Armstrong will not be liable for the said assets or any part thereof to any person of whose claim he shall not then have received notice.

ELLIOTT & MOSS, Solicitors for the said Administrator. Dated at Glencoe this 28th day of February, A. D. 1921.

HARDWARE NEWBURY GOODYEAR TIRES

The Law

as amended Nov. 10, 1919

THIS Referendum on April 18 is to ratify a new federal law, namely, the Canada Temperance Act, as recently amended by Dominion Parliament.

If a majority of the people of Ontario vote in favor of the Canada Temperance Act as amended, then in the exact words of the law, it follows:

1. "No person shall import, send, take or transport into such province any intoxicating liquor.

2. "No person shall, either directly or indirectly, manufacture or sell, or contract or agree to manufacture or sell, any intoxicating liquor to be unlawfully imported, sent, taken or transported into such province.

3. "The carriage or importation of intoxicating liquor through such province shall only be by means of a common carrier by water or by railway and not otherwise, and during the time any intoxicating liquor is being so transported or carried no person shall open or break or allow to be opened or broken, any package or vessel containing such intoxicating liquor, or drink, or use or allow to be drunk or used any intoxicating liquor therefrom."

NOTE.—This law does not prohibit importation of liquors to be used for sacramental, medicinal, manufacturing or commercial purposes, or the importation of such liquors as are permitted to be sold by the laws of the Province.

"Shall the importation and the bringing of intoxicating liquors into the Province be forbidden?"

Vote—and Vote, "Yes"

Close the door to imported "booze"

ALLIES OCCUPY THREE RHINE CITIES AS PENALTY FOR GERMANY'S DEFAULT

Non-fulfilment of Reparations Obligations Meet With Rapid Reprisals on the Part of the Entente—Foch, Weygand and Wilson in Conference Regarding Action Taken.

London, March 8.—Allied troops marched into Germany at daybreak today in accordance with the decision of the allies to inflict on Germany the penalties provided for because of the non-fulfilment of her reparations obligations.

King Albert's advisers yesterday instructed the Minister of Defence to proceed to London to confer with the other allies. It is expected that the Belgian troops will move into Germany today.

The penalties in question were announced to the Germans last Thursday by Mr. Lloyd George. They are: Occupation of the cities of Duisburg, Duesseldorf and Ruhrort, in the German industrial area beyond the Rhine, by troops of the allies.

Imposition by each allied country of such a tax upon German imports as it may deem fitting.

The establishment of a customs boundary under allied control along the Rhine.

After the Germans left the conference late Monday afternoon the British, French and Belgian Premiers telegraphed orders for the immediate occupation by the allied troops of Ruhrort, Duisburg and Duesseldorf.

The German delegation will return to Germany today. Its members said after the conference that they were not empowered to make any further proposals, and that they regretted the possibility that the allied troops were already marching upon Germany.

The instructions to the allied commanders on the Rhine were given after the Premiers had requested Marshal Foch and Field Marshal Wilson to join in the discussion of the action to be taken.

The allied representatives will meet again today to finalize the concerted enforcement of the various penalties.

The French army will furnish the bulk of the forces for the new march into Germany. Great Britain's contribution in men will be large enough to show her solidarity with the allies.

The United States Government's attitude toward the new enterprise is awaited with interest.

inaugurated a revolution in the transportation of Canadian wheat from the central provinces. He said this use of the Panama Canal would in time make the Pacific instead of the Atlantic the front door to Canada.

The venture was tried because the Great Lakes and the St. Lawrence River were frozen up just at the time when the farmers wished to ship their stocks.

Mr. Wade says that other Canadian products will be shipped this way in ever-increasing quantities.

French Troops Occupy Duesseldorf

Berlin, March 8.—The first contingent of French troops assigned to participate in the occupation of Duesseldorf is reported to have arrived at Beuth, six miles south-east of that city.

The advance headquarters of the allied armies has been established at Cologne. The allied cavalry moved at dawn today.

Belgian heavy artillery has arrived on the Rhine.

TIMES LOOK RATHER DARK TO SOME PEOPLE.

TORONTO STREET CAR JUMPS TRACK; ONE KILLED AND SEVENTEEN INJURED

Bits of Crushed Stone Drawn Into Tracks Said to be Responsible for Derailing of Eastbound Car on the Don Bridge on Gerrard Street Which Collided Head-on With Westbound Car.

A despatch from Toronto says:—One passenger received injuries from which he died a few hours later, a score were more or less seriously injured on Friday evening when a trailer jumped the tracks on the Gerrard street bridge over the Don and crashed into a street car going in the opposite direction.

The dead man is John Evans, jun., aged about 39, of 229 Langley avenue.

The accident occurred about 5:25 and the trailer was packed with the rush-hour crowd. It was attached to an east-bound Queen car.

The two cars were proceeding at a smart rate, when the trailer left the rails, bumped along a few yards, tore the couplings loose and then collided with a westbound Queen car. All the passengers were thrown into confusion amid crashing glass and woodwork.

Evans, who is thought to have been riding on the front vestibule of the trailer, received the full impact of the collision, and from the first doubt was expressed for his recovery.

William Younger, 71 Bomore road, was standing with Evans, and had both arms and both legs broken. He may recover, however.

Miss Christina Veitch, 52 Smith street, is another of the seriously injured, and she remained unconscious for many hours. She was badly crushed.

The cause of the accident is ascribed to small stones getting into the tracks. This stone had been used to repair the roadway near at hand.

The wrecked trailer was one of the oldest belonging to the Toronto Street Railway.

Others who suffered injuries were likely thrown from the front and rear platforms to the pavement. Motorman W. Arnett, 155 Frankland avenue, who was driving an eastbound car behind the wrecked trailer, said he picked up many injured persons who, he thought, had fallen from the rear platform of the trailer.

Motorman John Haywood, No. 1644, of the westbound Queen car had a miraculous escape. The vestibule of his car was badly wrecked, but Haywood came through with some slight cuts. Neither he nor Conductor G. H. Gear-

TORONTO DRUGGIST MURDERED; CITIZEN MALTREATED BY ROBBERS

L. C. Sabine Refused to Surrender Contents of Cash Register and Was Shot, Dying a Few Hours Later—Hold-up Men Render Wm. A. Ball Unconscious With Blow From Monkey Wrench and Rifle His Pockets.

Toronto, March 7.—Bandits operating here on Saturday night murdered L. C. Sabine, druggist, 533 Manning Ave., in cold blood and brutally maltreated and robbed William A. Ball, 308 Spadina Road, in the garage at the rear of his home. At the Sabine store the bandits secured an undetermined amount of money. Mr. Ball was relieved of \$150 in bills, a diamond tiepin worth \$1,500 and cheques to the value of \$35.

Mr. Sabine was shot in the stomach in his store about 10:55 p.m. and died in the Western Hospital at 1:30 yesterday afternoon. Mr. Ball is recovering from his injuries at his home. As yet no trace of the gunmen has been found by the police, all of whom have been scouring the city and adjacent country during the week end.

While lying in the hospital on Saturday night after the shooting, Sabine outlined the story of the assault upon him in his store. He had just finished serving a customer when two gunmen entered. Neither was masked. They walked coolly to the counter and without further parley presented two revolvers at Sabine's body and ordered him to empty the cash register for them. He refused. "One of the men,

with a curse, pulled the trigger of his gun and sent a bullet into the druggist's body. Sabine dropped to the floor with a groan. Then, with the same callousness that had characterized their entrance and subsequent shooting of the victim, they rifled the cash register of the money it contained and departed. As far as the druggist could see, the robbers had no automobile in waiting.

Mr. Ball, for many years a well-known Parkdale resident and former hotel keeper, and who now conducts a public garage and motor accessories business at 1523 Queen Street, west, was held up and beaten into semi-insensibility in the garage at the rear of his home at Spadina Road and Heath Street, about 10 o'clock on Saturday night, by two armed men, who had been lying in wait for him in the darkened building. It is the belief of Mr. Ball and the police that the attack was the work of someone conversant with his (Mr. Ball's) movements, as one of the thugs called him by name when he refused to hand over his possessions at the robber's demand. Mr. Ball was beaten on the head with a revolver and a monkey wrench, and is now at his home with several bad gashes in his head and facial injuries.

Allies Control Ruhr Coal Output

London, March 8.—The three German cities named for occupation by allied troops today are three great river ports on the Rhine, the outlet of the Ruhr basin for coal shipments. Ruhrort, which will be held by the French and Belgians, is a city of 41-

000 and is Germany's largest river harbor.

Duesseldorf, a city of 229,000, is on the opposite side of the Ruhr River from Ruhrort. Immense coal exports have always been made from here.

Duesseldorf is the largest of the three cities. It is a city of 359,000. It is also a coal shipping port.

The occupation of the three centres will give the allies complete control of the coal output of the famous Ruhr district.

12,000 Perish in Japan Earthquake

Tokio, March 7.—Twelve thousand persons were killed in the Province of Kansu by an earthquake which occurred there on March 2, according to advices received here today. Major Drysdale, the United States attaché, representing the Pekin Famine Society, is assisting in aiding the homeless.

U.S. Medal for British and French Warriors

A despatch from Washington says:—The House adopted a resolution authorizing that the Congressional Medal of Honor be conferred upon an unidentified British and an unidentified French soldier buried respectively, in Westminster Abbey and at the foot of the Arch of Triumph in Paris.

Broken in Service of His Country. Woodrow Wilson, who left the office of President of the United States on March 4. Photo shows him as he is today, broken and decrepit, after two terms in office.

BRITISH GENERAL AND 3 OFFICERS KILLED IN ATTACK ON CONVOY BY SINN FEIN

Five Hundred Reds Poured Deadly Fire Into Military Party, Killing Brig.-General Cumming—Fierce Battle Waged in North County Cork.

London, March 6.—Concealed in the goose-covered slopes in Clonbannin, north County Cork, five hundred Sinn Feiners poured a deadly fire on a British military convoy last night killing Brigadier-General H. R. Cumming, war hero, as well as two other officers and two privates belonging to the East Lancashire regiment.

General Cumming, who had command of the Kerry Infantry, is the first British brigade commander to fall a victim to the Irish assassins.

Escorted by three tenders, containing a detachment of troops and one armored car, he was travelling from Rathmore to Buttevant when, from either hillside rising above the road near Clonbannin, a heavy musketry fire was opened.

The driver of the leading tender was immediately hit and the tender ran into a ditch whither the armored car followed.

Headed by General Cumming, the troops took to cover to go into action but the General was immediately struck in the head with a bullet and died instantly.

The ambushers were invisible in the gorse and they sustained the battle for an hour when their left flank was turned, forcing their retirement with undisclosed casualties.

The road over which the military force was travelling had been mined but the mines were not exploded.

Brigadier-General Cumming had his headquarters in the barracks at Buttevant, some miles to the northeast of the zone of the ambush. Recently General Cumming had motored each morning to Mallow, where he presided over the court of enquiry into the murder there recently of Mrs. King, wife of County Inspector King and the shooting of railwaymen after the murder.

BRITISH MINISTER LOSES ELECTION

Favored Embargo on Canadian Cattle—Defeated by Labor Party.

A despatch from London says:—Sir Arthur Griffiths-Boscawen, the newly-appointed Minister of Agriculture, was defeated in the Dudley by-election, the result of which was announced on Thursday, by J. Wilson, Labor candidate. The voting was: Labor 10,244 Coalition-Liberal 9,988

Majority against 276

The defeat of the Government Minister and candidate is mainly attributed to the controversy over the question of the embargo on Canadian cattle, used as an argument by the Opposition, who ascribe to this cause the high cost of meat in Great Britain.

Lord Beaverbrook took this position, and flooded the constituency with copies of The Daily Express, owned by him, in which he stated that "every vote for the Government candidate was a vote for dear meat."

Dudley is a large working-class constituency. Sir Arthur Griffiths-Boscawen had expressed himself as favoring a continuation of the embargo.

CANADA FIRST V.C. LANDS AT ST. JOHN

Going to Ottawa; Wife and Twin Sons Will Join Him Later.

A despatch from St. John, N.B., says:—The first Canadian V.C. of the great war, Lieut. Michael O'Leary of Kankur, Ireland, late of the Irish Guards, arrived in this city on Friday on the Canadian Pacific Ocean Services liner Empress of Britain, and left shortly afterward for Ottawa.

It was during the battle of Givenchy, in February, 1915, that he single-handed, charged a German machine gun nest, slew some 18 men, and then turned the gun on the Huns.

O'Leary said he was going to Ottawa, but had made no definite plans for the future. He thinks he will stay in the East, however. His wife and twin boys are in Ireland, and will wait until "daddy" has got settled, when they will join him here.

ALLOW NO LIQUOR IN U.S. TERRITORY

Not Even in Transit from One Part of Canada to Another.

A despatch from Vancouver, B.C., says:—The entire Yukon Territory and some northern sections of British Columbia are not only cold, but dry for the moment, at least. No more wet goods may be carried through United States territory, even if in bond, in transit from one part of Canada to another, by a recent ruling on the Volstead Act, according to telegrams arriving from Dawson, White Horse, and other points. Yukon officials have made a formal protest to Ottawa.

Local dealers who make liquor shipments to the North Country contend that a treaty under which Canadian imports were to be allowed to pass through Alaskan territory takes precedence over the ruling.

"Tirpitz" Banned as Name of Ship

A despatch from Berlin says:—Workers in the shipyards at Flensburg prevented the launching of a 12,000-ton freighter because they objected to naming it "Tirpitz." The famous Admiral had prepared an address, and Hugo Stinnes, owner of the vessel, as well as a number of other dignitaries, had planned to attend, but the Socialistic workmen at the last minute decided against the policy of naming Germany's new ships for her dethroned war lords.

Three States Unite to Withstand Bolshevism

A despatch from Budapest says:—A defensive alliance against the Bolsheviks has been entered into by Poland, Roumania, and Hungary, according to information from reliable sources.

House of Lords Passes Unemployment Insurance Act

A despatch from London says:—The House of Lords passed the Unemployment Insurance Act Amendment Bill, which has now gone through both Houses.

W. G. Harding Made President of United States

A despatch from Washington says:—After eight eventful years in authority, the Democratic administration of Woodrow Wilson closed up its books and terminated its term of office. Warren G. Harding, Republican President-elect, was inaugurated on Friday as twenty-ninth President of the United States of America.

Population of Winnipeg Reaches 282,818

A despatch from Winnipeg says:—The population of greater Winnipeg is 282,818, according to figures in the 1921 city directory, just issued. This is the greatest gain recorded since 1914, and a jump of 10,350 over the 1920 figures.

Weekly Market Report

Toronto.
Manitoba wheat—No. 1 Northern, \$1.93 1/4; No. 2 Northern, \$1.90 1/4; No. 3 Northern, \$1.89 1/4; No. 4 wheat, \$1.80 1/4.

DISEASE DETECTED THROUGH THE EYES

Treatment Discovered by British Physician Will Revolutionize Medical Practice.

London, March 7.—Discovery of a treatment that will revolutionize the practice of medicine has been announced by Clement Jeffrey, M.A., distinguished British physician. It consists of detecting illness by the appearance of the eyes, and is called "Iridiagnosis."
The method is a complete revolution of orthodox medicines. Instead of a patient detailing more or less accurately his symptoms, in order that the doctor can tell the patient his complaint and prescribe, under the iridiagnosis method the practitioner has

Gold Areas of N. Ontario Richest on Continent

A despatch from Montreal says:—Gold prospects in Northern Ontario surpass those of every known field on the North American continent, according to T. W. Gibson, Deputy Minister of Mines for Ontario, addressing the 23rd annual meeting of the Canadian Institute of Mining and Metallurgy in convention here. Further he added that the Province of Quebec had maintained during 1920 its unique record of having never permitted its production to fall below a previous year's record.

REGLAR FELLERS—By Gene Byrnes

The Temples' Test.

Although not so apparent, there is really as much difference between the temples of different persons as between their eyes, noses, or hands. A person with slightly depressed temples, and with the depression of oval shape, are brainy, have a gift for mathematics and chess, and in temperament are rather cold and standoffish. Many with such temples are selfish, too, although that is not an absolute rule.

Those whose hair encroaches on their temples, particularly if it is straight and coarse, have cruel dispositions, are crafty, and not to be trusted where their affections are concerned. But they will do well in the world of business.

Temples that are hollow, with a saucer-like depression indicate gifts of scholarship, music, or painting. The characters of those with temples like these are very volatile and generous, but subject to violent fits of passion.

Temples that are "full," and with the hair about them short and wiry, indicate leadership, courage, and all-round ability. Women with such temples make the best of wives and mothers, but the men, strangely enough, do not make good husbands.

Those with temples that show the vein clearly are sensitive, shy folk, but they have warm hearts and most unselfish characters. They are loyal friends.

People with "hony" temples—the cheek and frontal bones almost covering the temple space—are stolid, non-imaginative, and slow in thought and action. To set against those defects, the above type of temples is the "moral" one.

The best temple is that which is big, white, and flanked with small, well-formed ears. That is the statesman's temple, the author's temple, the temple of the "big man." Orators and noted preachers have this temple. The character indicated is justness, generosity, kindness, and a great capacity for forgiveness. This, too, is the long-life temple. Those with temples which owing to the shape of the skull and the growth of hair, look high and unduly narrow, are geniuses, with great inventive power, but of erratic temperament. This type of temple is not usually a long-life one.

Don't Put Off—

The hard problem, the tough job, tackle it first.

Writing to your mother or father, or brother or sister, and in other ways showing your affection for them.

The putting on of new clothes. Don't put off putting on a good frock, making a good appearance that will tally with the thing you are after in life.

Keeping fit, looking after your physical and mental welfare.

The daily bath and the perfect grooming of yourself.

Self-improvement. While it is never too late to learn, it is better to begin early.

Attending to your friendships. Our friends will leave us if we give them no attention, and one of the greatest regrets of multitudes of men, as they near the end of life, is that they have put off their friendships—put off cultivating them while they were making money.

Getting acquainted with your family, giving time to your children, showing interest in their sport and having fun with them. Be their pal and you will not regret it later.

Being kind to others; saying and doing the helpful, considerate thing to-day.

Trying to control your unbridled temper or cruel tongue.

Giving time and attention to your home life, and contributing toward a beautiful home atmosphere.

Registering your vow for better things.

Being honest and square in your dealings.

The higher impulses until they cease to plead with you.

The beginning of the thing your heart longs for, and that you feel able to accomplish.

Making a decision until it is useless or you lose your power to decide.

Getting out of a rut. The present is a good time to make the effort.

Turning over a new leaf and reforming your bad habits. Do it now!

—O. S. Marden.

Days Are Longer.

Happily for our convenience, the process is extremely slow, but all the same the fact is that the days are getting longer.

This does not refer to hours of daylight increasing with the advancing year, but to days as timed by the revolution of the earth on its axis.

The earth's power of rotation is growing weaker, and as a result its revolution on its axis is slowing up. Which means, of course, that the day is lengthening.

An epoch must eventually arrive when the day will be equal in length to the year; that is, to the time it takes for us to revolve about the sun. Then the earth will always turn the same face toward the solar luminary, just as the moon now always turns the same face toward us, and one-half of our planet will have sunshine all the year, while the other half is in total and permanent darkness.

That is, if the sun is still shining. It may become a dim and chilly orb before then.

Underwater Telescope.

An underwater telescope has been invented that enables a man on a boat to see the bottom of waterways 100 feet or more deep.

Used Autos

BREAKERS SELL THEM: USED cars of all types, all cars sold subject to delivery up to 300 miles, or test run of same distance if you wish. No good order or purchase, or purchase price refunded.

B to look them over, or ask us to take any car to city representative for inspection. Very large stock always on hand.

Breaker's Used Car Market
405 Yonge Street, Toronto

Unused Tools.

"It doesn't look much like the old home as I remember it," an elderly business man who had been visiting the haunts of his boyhood said to a friend. "The lawn isn't cared for, most of the trees and shrubs are dead, and the garden that father took so much pride in is overgrown with barbed wire and brambles. The orchard is growing old like the rest of us, but there's fine fruit there still, though the trees need pruning. But the saddest thing I saw was the old tool house. It's falling to pieces, and the rusty tools hang there—unused. Sam has had all the equipment father ever had to make the place attractive, but he hasn't used it."

Garden tools are not the only ones we can neglect. Not long ago a city banker stopped his car at a farmhouse to ask his way. In the woman who came to the door he recognized Amelia Webster, an old schoolmate whom he remembered as having been the prettiest and brightest girl in the academy they had both attended. She was a faded, slatternly woman, and her house was ill-kept and unattractive. Her visitor reminded her that she had led her classes in history and literature and had even written creditable poetry.

"I never read anything now except the newspaper and not much of that," she said dully. "Sometimes the girls come to me with their sums and their hard questions, but I'm too rusty to help them much. The work round the house is more than I can tend to."

Amelia's prettiness of face and sprightliness of manner had disappeared—killed by sluggish indifference. The knowledge and cultivation that her school course had given her might have been invaluable to her as a mother, but she had never used them. Killed, too, was the imagination that had once made her little poems welcome at the office of the village paper, and that might have been a priceless resource in her maturer years. She was less attractive, less

Success Nuggets.

Opportunity brings out the great man, but he alone is great who is ready to embrace it.

If the first rule is to obey your native bias, to accept the work for which you were inwardly formed—the second rule is concentration, which doubles its force.—Emerson.

Smiles attract dollars, as they attract everything that is good and wholesome.

If people would only smile more, if children were trained to smile habitually, what a wonderful world this would be!

We do not know anything about our own resources until we have taught ourselves to use them. Not until we can think for ourselves, and act for ourselves, do we become more than infants in the moral universe.—Angela Morgan.

Thoughts never die, they are immortal dreams that outlive their dreamers.

The publisher of the best Farmer's paper in the Maritime Provinces in writing to us states:

"I would say that I do not know of a medicine that has stood the test of time like MINARD'S LINIMENT. It has been an unfailing remedy in our household ever since I can remember, and has outlived dozens of would-be competitors and imitators."

Youngsters grow husky on Grape-Nuts

The great body-building values which Nature stores in wheat and barley, are retained in this easily digestible food.

The unique, sweet flavor of Grape-Nuts makes it a big favorite with both children and adults.

"There's a Reason"

SOLD BY GROCERS EVERYWHERE

Surnames and Their Origin

HILL
Variations—Hull, Heliier, Hilyer, Helier, Hillman, Helman, Helman. Racial Origin—English. Source—Locality also occupation.

This is a most widespread group of family names, the one most frequently met with being HILL, with probably Hillman, Hull and Hilyer next in order. They are all of them English names, and all trace back to an old Anglo-Saxon word which has come down to us almost unchanged, and is in as common use to-day as it was in the reign of Alfred the Great. "The word is (just what you think it is) 'hill'."

But all of the family names in this group have not developed from this word in the same manner.

The name of Hill, as well as Hull, is in the vast majority of cases a mere contraction of the old description phrase "at the hill" or "of the hill," used to designate persons who happened to dwell on or near such eminences. In the varied spellings of the late Norman days, the surname occurs as "de la Hill," "de la Hull," "de la Helle" and "atte (at the) Helle."

With the other variations another method of development is responsible for the modern names. This word "hill," or "hull" was also used figuratively to denote a roof, and also for the verb "to roof." An abstract from an ancient document reads: "Whyt a clew and red for to make crookes (crocks) and other vessels and barned (burnt) tyll (tile) to helle houses and churches." Again, Wickyffe, in the translation of one Bible passage, says: "The schip (ship) was hilled (hiller or covered) with wavis."

The words "hilyer" and "hillman," therefore, were descriptive of occupations, which explains why these family names in their varied spellings are not within the old records in such forms as "Roger de Hilyer," "Ivo le Heliier" and "John le Hillman."

GOOD HEALTH CAN BE YOURS

If Your Blood Supply is Kept Rich and Red.

It is a waste of time and money to fight merely the signs of disease; in the long run you are probably worse off than when you started. What is far more important is that you should intelligently examine the various symptoms and trace the cause. When you remove the cause, health will be yours. For example, anaemic people often endure months of suffering while treating its symptoms, such as indigestion, shortness of breath, palpitation of the heart and exhaustion after any small effort.

The apparent stomach and heart troubles are generally nothing more than the result of an insufficient supply of pure blood. This anaemic state may have followed some previous illness, or an attack of influenza; or it may have arisen from overwork, worry or too little fresh air. To obtain good health the simple and proper course is to build up the blood, but to do this you must select a reliable remedy with a reputation such as Dr. Williams' Pink Pills. These pills enrich the blood which carries nourishment to all the organs of the body and enables them to do the work nature expects of them. Thousands of men and women have proved this for themselves. One of these is Mrs. T. Flynn, R.R. No. 1, Brinsville, Ont., who says: "Last spring I got into a badly run down condition. I had no energy; work left me exhausted, and the least exertion would make my heart palpitate violently. I had often read of Dr. Williams' Pink Pills, and decided to give them a trial and got a half dozen boxes. I had not been taking the pills long when I felt a decided improvement in my condition and by the time I had used the six boxes I could do my housework with ease. I can strongly recommend Dr. Williams' Pink Pills to all weak people."

You can get these pills through any dealer in medicine, or by mail post-paid at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

'Possoms Menace.

New Zealand has a native species of opossum which wears a very beautiful fur. It is not at all like the 'possum that we know in this country.

Many years ago it was introduced into Australia, and finding there none of the natural enemies that preyed upon it in its own land, it has since increased in numbers until it has become a serious pest. It is a robber of fruit trees.

However, the value of the animal for its fur is so great as to outweigh the damage it does in the fruit-growing sections, and in view of this fact, the Australians are encouraging the increase of opossums in forest districts. Their skins are becoming a considerable item of export, and already many of them are made up into fashionably garments for women in North America.

"Try It Again!"

Here's to the chap,
With the smile on his map,
Though Fortune has dealt him a thunderous rap
And knocked him clean down on the rear of his lap,
Whose only remark is, "Gee whiz, what a slap!"
I'll try it again!"

I'm there with the guy
With the gleam in his eye,
Though Fate has let loose a stiff punch in the eye,
And has scattered his pride all over the sky,
Whose only retort is, "Doggonit if I Don't go ye again!"

I'm strong for the brick
With the courage to stick,
Though Failure has hounded him like the Old Nick,
Who cries at last, "Now I'm on to the trick,
Let's try 'er again!"

The Russian Soviet Army consists of 4,000,000 men under arms.

About one-half of our globe, it is estimated, consists of iron.

Minard's Liniment for Dandruff.

Modern Fairy Tale.

A boy dashed into a broker's office with news bulletins. As he turned to leave a member of the firm called out: "Here, you seem to have some pep. Get me a box of cigars in the lobby and keep the change."

The boy hesitated, although a \$5 bank note was thrust into his hands. Finally he stammered: "I would like to get you cigars, but we are short of boys, and I have a big route to cover. I'll come back when I deliver the bulletins." With that he left the office.

"Are you going to wait until he returns?" asked a customer.

"You bet I am," replied the broker. "In these days it is a pleasure to meet a boy who works for his boss first. Furthermore, I am going to put him on the payroll."

And he did.

Finland is Prosperous.

There is no unemployment in Finland, says M. Villjanen, chief of the Trade and Industry Department of the Finnish government, who is visiting in England. He attributed Finland's good fortune in this respect, as compared to most other countries, to the prohibition of imports. This had the effect of making the country's industrial production greater than at the beginning of the war.

Finland is now considering the advisability of gradually discontinuing the embargo on imports, he said. This country has begun to transship goods for Russia and has established a free port at Hangö.

Not Safe to Answer.

"Who discovered America?" asked the teacher.

Jack looked panic-stricken, and made no reply.

"Please ask me something else, please," he said, after a while.

"Why should I do that?" asked the teacher.

"Well," said Jack, "the fellows were talking about it yesterday. Pat said an Irishman discovered it. David said it was a Welshman, and Andrew said it was a Scot discovered it. And if you'd seen what happened to them you wouldn't ask a little fellow like me."

MONEY ORDERS.

Dominion Express Money Orders are on sale in five thousand offices throughout Canada.

Costly Fur Mantle.

One of the most costly fur garments ever made was the ermine mantle presented to the late Empress of Russia by a gathering of nobles and valued at \$60,000.

War pensions are still being awarded in Britain at the rate of 12,000 a month.

Loneliness.

I like to walk at eventide,
When dusk shuts out the din,
I like to watch the friendly lights
Of lamps that shine within—
Warm shadows play upon the walls,
Where hearth fires gleam and glow,
I like to warm my heart with love
For folk I do not know.

I like to feel the fragrant dark
Close round my shoulders pressed,
I like the witchery of stars
That eases my unrest.

At eventide, when shadows fall,
This is the hour I go,
And heal my loneliness with love
For folk I do not know.

The doctor's claim on the estate of a deceased patient ranks first in France.

Famous Chapel Under Repair.

The famous St. George's Chapel of Windsor Castle will be closed, for three years, for extensive restoration work, the need of which is so pressing that architects would not guarantee the chapel to stand another year without the collapse of the roof, which would mean the utter destruction of the fabric, with all its celebrated artistic and historic glories.

The chapel stands within the walls of the castle, but it is a freehold of the State and the State money cannot be spent for these improvements.

The question of the expense has been taken up by the Knights of the Order of the Garter, for whose use the chapel originally was founded, and in order to distribute the burden the work will be spread over a period of four years. Already \$125,000 has been collected, which will meet the expense of the first year's work. The repairs will consist of replacing the decayed material without much alteration.

Calling in Cairo.

Englishmen who do not know Cairo sometimes take hours in remote and undesirable parts of the city. In Egypt as We Knew It, Mrs. E. L. Butcher amusingly describes how hard it is to find a person who has thus gone astray. Her husband, she says, wrote to a doctor for the address of some friends whom she knew he had attended. Here is the doctor's answer: "The M—'s live in a house without a number in a street without a name next door to an Armenian butcher who, I think, has no sign, west of Abdin Palace." The statement has eighty-seven steps.

KEEP LITTLE ONES WELL IN WINTER

Winter is a dangerous season for the little ones. The days are changeable—one bright, the next one cold and stormy, that the mother is afraid to take the children out for the fresh air and exercise they need so much. In consequence they are often cooped up in overheated, badly ventilated rooms and are soon seized with colds or gripe. What is needed to keep the little ones well is Baby's Own Tablets. They will regulate the stomach and bowels and drive out colds and by their use the baby will be able to get over the winter season in perfect safety. The Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

"There's a Reason"

SOLD BY GROCERS EVERYWHERE

Surnames and Their Origin

HILL
Variations—Hull, Heliier, Hilyer, Helier, Hillman, Helman, Helman. Racial Origin—English. Source—Locality also occupation.

This is a most widespread group of family names, the one most frequently met with being HILL, with probably Hillman, Hull and Hilyer next in order. They are all of them English names, and all trace back to an old Anglo-Saxon word which has come down to us almost unchanged, and is in as common use to-day as it was in the reign of Alfred the Great. "The word is (just what you think it is) 'hill'."

But all of the family names in this group have not developed from this word in the same manner.

The name of Hill, as well as Hull, is in the vast majority of cases a mere contraction of the old description phrase "at the hill" or "of the hill," used to designate persons who happened to dwell on or near such eminences. In the varied spellings of the late Norman days, the surname occurs as "de la Hill," "de la Hull," "de la Helle" and "atte (at the) Helle."

With the other variations another method of development is responsible for the modern names. This word "hill," or "hull" was also used figuratively to denote a roof, and also for the verb "to roof." An abstract from an ancient document reads: "Whyt a clew and red for to make crookes (crocks) and other vessels and barned (burnt) tyll (tile) to helle houses and churches." Again, Wickyffe, in the translation of one Bible passage, says: "The schip (ship) was hilled (hiller or covered) with wavis."

The words "hilyer" and "hillman," therefore, were descriptive of occupations, which explains why these family names in their varied spellings are not within the old records in such forms as "Roger de Hilyer," "Ivo le Heliier" and "John le Hillman."

THE TALK OF GLENCOE

The Genuineness of Mayhew Values

The crowds that weathered the storm on Saturday (making \$ Day one of the biggest days in Glencoe's history) were well repaid by the great values they received. Everyone appeared to be well pleased. Many people congratulated Mr. Mayhew on the success of the day. At 4.30 o'clock nearly every sale item was sold out, still the eager buyers kept coming. Mr. Mayhew's orders were "Fill every advertised item at any loss," and so goods were piled on the sales tables at terrific reductions. Not one customer was let go away disappointed.

COMMENCING SATURDAY ANOTHER 5-DAY OF EXCEPTIONAL VALUES

A Sale of *Workington's Shoes*, \$3.95. This is very special selling, as the shoes are made of extra heavy tan leather, and yet they are very soft and comfortable. Heavy soles and good heels add sturdiness that is hard to find at \$3.95.

What's *Stylish for Spring*? March is here, with Easter only four weeks away! What to wear this Spring is the all important subject to be considered by every woman who wishes to be well dressed. We're ready with the largest showing of Spring styles ever shown in Dress Goods, Blouses, Silks and Voiles, all the newest in Shoes, and our prices clearly demonstrate the fact that "Buying at home means buying for less."

Big reductions in Linoleums, Oilcloths, Rugs and Carpets.

E. A. MAYHEW & CO.

THURSDAY, MARCH 10, 1921

WARDSVILLE

The A. Y. P. A. of St. James' Anglican church held a meeting Friday night in the church basement. The hostesses were Miss Blott and Miss Ward. A very pleasant evening was spent in games and contests. The prizes were won by Miss Blott and Sam Smith. The next meeting will be held Friday, March 18th, at the home of M. and Mrs. Wesley Willis. The euchre club was entertained last Tuesday evening by Mr. and Mrs. P. O'Malley.

The literary society of Wardsville high school held a very interesting session Friday afternoon. The president, Adair Bayne, took the chair. A very pleasing program was rendered by the second form, consisting of the following numbers:—A debate "Resolved that Great Britain should give Canada to the United States in payment for Great Britain's war debt." The affirmative side was upheld by James O'Hara and Ava Weer and the negative side by Helen Atchison and Janet Elliott. A piano solo by Winnifred Parnall, a recitation by Helen Atchison, a reading by Florence Blain and the reading of the bulletin by Cora McMaster were much enjoyed.

A very pleasant evening was spent last Wednesday when about forty young people gathered at the home of Lloyd Simpson for a social, singing, contests and games. The diversions of the evening, after which a dainty lunch was served.

Phillip Eaton, who has been cashier in the Royal Bank here for the past two years, has been transferred to Stoney Creek. We wish Mr. Eaton all success in his new position.

Mr. Henderson of Windsor is visiting his parents, Mr. and Mrs. Frank Henderson.

Archie Stinson, who has been seriously ill, is slightly improved.

Jean Faulds is some better.

Thos. English took a stroke Sunday afternoon. Mr. English appears fairly well in the morning and attended church. About five o'clock Dr. Glenn, upon being called, found that Mr. English had taken a stroke.

The Middlesex county organizer for the W. C. T. U., Mrs. Jones of London, met the ladies of Wardsville Friday last and effected an organization of the above society. The following officers were appointed:—President, Mrs. Alex. Douglas; 1st vice-president, Miss Atkinson; 2nd vice-president, Mrs. (Dr.) Husser; corresponding secretary, Mrs. R. J. Murphy; recording secretary, Mrs. A. J. Love; treasurer, Mrs. O'Malley.

The temperance forces held a meeting Monday night in the Presbyterian church to get ready for the coming referendum vote. Mr. Douglas was appointed president. Mr. Atkinson secretary and H. Brimston treasurer.

A meeting of the Wardsville and Cashmere congregations will be held in the Methodist church here on Wednesday afternoon, March 16th, to receive reports from all departments of the work and discuss important matters of business.

Dr. Kyle Simpson, a returned missionary from China, will speak in the Methodist church Sunday evening next at 7.30 o'clock. Dr. Simpson is supported by the Chatham and Ridgeway District Epworth Leagues, and an offering will be taken in aid of his work.

Eldridge Purdy and family have moved here from Highgate and will settle down in this community.

CAMERON

Miss Robertson and Miss King of Ridgeway, who spent the past couple of weeks with their cousin, Miss Geo. have returned home.

Miss Violet Plaine left on Monday for Alvinston, where she has opened a millinery store.

Miss Lizzie Munroe of North Glencoe is spending some time with Mr. and Mrs. Peter Munroe.

Archie Campbell, who fell from a straw stack and injured his arm at the elbow, is improving.

The Friend of All Sufferers.—Dr. Thomas' Eclectic Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of half a continent. It is on sale everywhere and can be found wherever required for.

CASHMERE

Earl Tunks spent Friday in Glencoe. The W. M. S. held an "At Home" at the home of Mrs. Earl Tunks on Wednesday evening, March 2. There was a good program presented, and games were played. Lunch was served and a silver collection taken up amounting to nearly \$8. There were about fifty present.

The Willing Workers met at the home of Miss Mildred Taylor on Saturday afternoon. They have decided to hold a St. Patrick's party on Friday evening, March 18, to increase their funds. There was a splendid attendance. Lunch was served and a half hour or so was spent socially.

Mrs. Allen Sitter of Bothwell spent Wednesday with her daughter, Mrs. Earl Tunks.

Mr. and Mrs. Arthur Tunks and children spent Sunday with the former's sister, Mrs. Wed. Darr.

On Friday evening, March 11th, Dr. Kyle Simpson of China will speak in this church. He is supported by the Ridgeway District Epworth Leagues. The League usually held on Wednesday evening will be withdrawn.

MELBOURNE

The play entitled "Deacon Dubbs," which was given in the Woodman Hall here by the young people, under the auspices of Anna Rebekah Lodge, was a decided success. The hall was filled to overflowing, some having to stand even after extra chairs were sent for. Those taking part in the play deserve great credit for the able way in which the parts were taken. Some people remarked at the close that they would not have

missed it for \$1.50. It is considered the best play ever given in the village. The proceeds amounted to \$115. At the close the Rebekahs served a supper to all taking part in the program.

About 25 friends gathered at the home of Isaac Stevenson to celebrate his birthday. A most enjoyable time was spent.

Mrs. Ted Hagerty will leave this week for her home in the West after spending the winter with her father, George Stevenson.

Mrs. James Cooper passed away at the home of her daughter, Mrs. Norman Meek, on Friday, 4th inst., in her 90th year. She leaves to mourn her loss one son, Rev. Wm. Cooper, and three daughters, Mrs. Golden of Dryden, Mrs. Smith, near Toronto, and Mrs. Meek of this place.

Miss Gertrude Howell, who has attended the millinery openings in Detroit, has secured a position as sales lady in one of the large stores there.

The members of Anna Rebekah Lodge met in the I. O. O. F. Hall for a social afternoon and tea. Fort quilts were quilted, and a good social afternoon spent.

We have a number of enterprising young men in this village who were building a telegraph line connecting the homes of Arthur Elder and Garnet Long. When the work was nearly complete Garnet fell, breaking his right arm.

The members of Anna Rebekah Lodge had a delightful social evening and banquet in the I. O. O. F. Hall on the 28th in honor of Mr. and Mrs. Arthur Staples, both active in Oddfellows, Mrs. Staples (nee Miss B. Buchanan) being a P. D. D. P. Miss Mather presided as toastmaster. A toast to the king was proposed by Mrs. G. McLean, N. G., all responding by singing the national anthem. A toast to Canada was proposed by Mrs. McGugan, J. P. G., all responding by singing "The Maple Leaf." A toast to the bride was proposed by Mrs. W. G. Robinson, Mrs. L. W. Beach presenting her with a piece of silverware on behalf of the lodge. The groom made a very suitable reply. A toast to the groom was proposed by Mrs. McDonough. Although taken by surprise the bride responded in a few well-chosen words. A toast to the sub-lodge was proposed by Mrs. E. Richards, Mr. Beach, Mr. Spontenburg and Mr. Spontenburg responding. A toast to the bride and groom was proposed. At the close of the banquet the bride and groom, accompanied by a few friends, left for Campbellton, where the young people of that community had a reception for them at the home of the bride's sister, Mrs. John McEachren. Mr. and Mrs. Staples will reside in this village.

A number of our citizens attended the funeral of George Taylor on Wednesday afternoon at the Longwood cemetery. Mr. Taylor lived here for a number of years, moving to Stratford a short time ago.

Worms, however generated, are found in the digestive tracts, where they set up disturbances detrimental to the health of the child. There can be no comfort for the little ones until the parasites have been expelled. An excellent preparation for this purpose can be had in Miller's Worm Powders. They will immediately destroy the worms and correct the condition that were favorable to their existence.

WOODGREEN

The inspector recently made his semi-annual visit to the school here. The school doctor and nurse visited the school last week and found a few children needing glasses or an operation on the throat.

Mr. Andrew Clannahan, who spent a few days in Detroit, has returned to her home here.

John Whitlock's men were drawing gravel again last week and dumping it at Wardsville.

Miss E. Reyraft spent the weekend with Miss F. Simpson.

Lee Simpson sold a number of cattle for a good figure last week.

Stink hunting is prominent here at present.

CAIRO

Miss Ida Burr arrived home on Friday after an extended visit with friends in Windsor and Walkerville.

Mrs. Minnie Forman has returned to the home of Fred Sullivan.

J. H. Bell preached to a fair congregation Sunday, the text being from 2nd Corinthians, 4th chapter, part of the 10th verse: "While we look not at the things which are seen, but at the things which are not seen." He gave an excellent and impressive discourse on the subject.

Fred Sullivan has been under medical treatment during the past week, but is improving at present.

The home streets of the roads make them almost impassable at present.

Mrs. Gardiner of Pratt's Siding has been visiting her daughter, Mrs. Will Macaulay, the past few days.

John Temple has given up possession of the farm owned by Les Sullivan, which he has occupied for two years. Mr. Sullivan will occupy it in future.

PARKDALE

Mr. and Mrs. Cecil Martin are on a two weeks' visit with relatives in Springfield, Ohio.

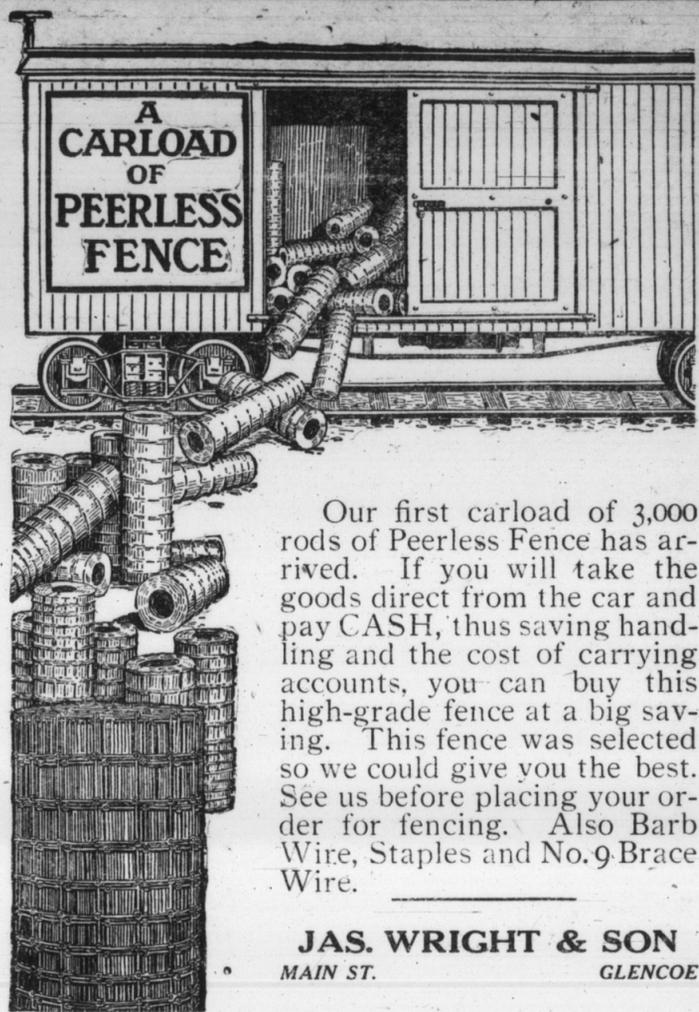

Mr. and Mrs. Fred Haggitt and kids spent Sunday with his brother Tom.

Mrs. Robert Campbell has returned home after spending the past three months with relatives in Essex and Kent.

Miss Ida Haggitt spent the past week the guest of her aunt, Mrs. Hick, Glencoe.

Mr. Purdy, Wardsville, has rented the house on the Missee Smith farm and will take possession as soon as Mr. Martin vacates.

Dragged Down by Asthma. The man or woman who is continually subject to asthma is unfitted for his or her life's work. Strength departs and energy is taken away until life becomes a dreary existence. And yet this is needless. Dr. J. D. Kellogg's Asthma Remedy has brought a great change to many sufferers. It relieves the restricted air tubes and guards against future trouble. Try it.

Our first carload of 3,000 rods of Peerless Fence has arrived. If you will take the goods direct from the car and pay CASH, thus saving handling and the cost of carrying accounts, you can buy this high-grade fence at a big saving. This fence was selected so we could give you the best. See us before placing your order for fencing. Also Barb Wire, Staples and No. 9 Brace Wire.

JAS. WRIGHT & SON
MAIN ST. GLENCOE

NORTH EKFRID

A miscellaneous shower was given Miss Ida Koennele on Monday, Feb. 28, when she received many costly and useful presents, including a number of cheques. The evening was spent in dancing. After lunch was served the Swastika Band girls presented Miss Ida with an Old Colony meat fork and a nicely-worded address.

Born to Mr. and Mrs. Roger Perry, a daughter.

Louis Koennele has gone to Alberta for the summer.

An enjoyable time was had at a

box social given in the school house on Friday evening by the U. F. O. A large number assembled and were entertained with vocal and instrumental selections. An array of artistically decorated boxes were then disposed of. The proceeds for the evening were \$33.

Mrs. George Chisholm has returned home after spending a week visiting friends in Windsor.

Mrs. Will Nichols is slowly recovering from an illness.

The sacrament of the Lord's Supper will be dispensed here on Sunday, March 13.

Ernest Irwin and Miss Ida Roem-

mele were quietly married at the manse in Appleton on March 1st by Rev. Mr. McCulloch. Dinner was afterwards served at the bride's home to the immediate relatives. The bride was handsomely dressed in cream satin. Her travelling suit was navy blue tricotine, with hat to match.

Mr. and Mrs. Irwin will reside in Deserport, Iowa, for the summer. Their friends wish them long life and happiness.

Faring a corn is both risky and ineffective. It is much better to use Holloway's Corn Remover and eradicate them entirely.
