Shortly after the counting began Photographer Goetzman appeared with his snap-shot machine and, with the seven ballot boxes piled upon the table, the election officers in the attitude of performing their duty, a number of spectators in fur coats suggestive of the Arctic region, a flashlight picture was taken which is proven by a glance at the negative today to have been an eminently successful effort. Mr. Goetzman will have the picture copyrighted and it will doubtless be extensively used by outside papers to illustrate a Yukon election in the Klondike.

Both the A. E. Co. and S-Y. T. Co. kindly remembered the occasion by each presenting a box of fine cigars and as the fluid extract of Democracy was plentiful the evening was a merry one. A large number of spectators were present and the very best of spirits prevailed. The officers worked hard and

The Nugget's election is over and the American residents of the Klondike, regardless of party preference, are to be congratulated on the manner in which it was conducted. The fact that it was stipulated that all ballots must be and the few that were voted unsigned were, therefore, more the result of oversight than of ignorance. The election was on the square and on this fact are the Yankees deserving of congratulation. The trust reposed in Yankee honor was not betrayed.

She said that her husband had taken, for a time, daily three ounces of dust. She had assisted at times in the rocking, and had picked many nuggets from the rocker. Mrs. Charlton said she had never seen Banche and Cooper till the time of their purchase, the 23d of July last. She testified that at that time the money had not been paid over, and that Charlton had told them that he understood they had a partner and that he did not want any money till the partner was present and that he wanted them all to prospect the ground and be thoroughly satisfied before they closed the deal. The money paid for the claim was dust, and had been paid on the claim in her presence. When asked about the ground known as the sixfoot strip along the line of the Lancaster claim, she said that she was not a miner, but she believed the ground was virgin ground, as the edges of the sod showed that it had been unbroken before. The prosecution then took the witness. Mr. Wade asked her if she had had any trouble with Mr. Veil, also a witness in the case, last evening after the adjournment of court. She testified that there had been no trouble, but that the witness had said something that she did not like and she had told him that she had nothing to say to him. She said he had previously visited their room many times and had asked her husband for money, but that he had been told he had none to give him. She did not know what this money was for, and said she would only swear to what she knew. The case now in court had never been mentioned between them.

He says that U. S. Geologist S. C. Schrader, who has spent several months in the country says the copper mines there are the richest ever discovered in the history of mining. These mines are located on the Koschina and Cittyna rivers which are tributaries of the Copper river south of the volcano, Mt. Wrangle. Tin ore assaying to per ent has also been discovered in the same region.

The Nicolai mine is the principal discovery thus far, and considerable work has been done on it this year. The company owning the property was tormed in Minnesota. The ore from this mine assays \$27 to the ton in gold, silver and copper, and 20 men have been kept at work on it all summer. This mine is about 200 miles from Valdez, and to its discovery is largely various creeks have gone down unti

### SLORAH WAS VERY ABSENT-MIND

And Was Reminded of Custom Of Uncovering in Court

HIS CASE IS FORMALY SET

For Hearing on the Fifteenth-The Charlton Case, and the Suit Of Chisholm vs. S. Y. T. Co.

This morning in the territorial court, lustice Dugas formally granted the petition of counsel for the defense in the Slorah case for further time in which to prepare the sese, and fixed the time

for hearing on the 15th inst. James Slorah appeared in court, this having been the day originally set for trial, and seemed much preoccupied, as he forgot the formality of removing his hat till his attention was called to the matter by the court. He was chewthem, and were they not covered by two pieces of court-plaster, conspicuously white.

After the time for the hearing of his trial had been set, Slorah was taken back to jail, and Mr. Hulme, on behalf of his client, Mr. Woodside, asked that the libel suit against his client, by Jos. A. Clarke, be enlarged in order to give time for the return of evidence by the commission which had been appointed in the east for the purpose.

Justice Dugas said that the matter could rest till the 15th, when it could be further considered. The Charlton case was then taken up

but as the first witness called was an Italian named John Sanguinetti, who he had to give his testimony through an interpreter, and the interpreter being somewhat mixed himself in the matter of comprehensive translation, but slow progress was made. The wilness was finally allowed to retire from the witness box while a messenger was dispatched in search of Mr. Gandollo to request his services as interpreter, and Charles D. Sutta who had bought the claim over which the case arose, was called and testified that himself and others who were associated with him at the time, had purchased the claim, but had never succeeded in finding anything on it except in the place where they were told to prospect before the purchase. Here they had found good pay above the bedrock, but like Mr. Sanguinetti, who had also prospected the ground with a view to purchas ing, he found nothing on the bedrock at that or any other point on the claim. though a great many holes had been sunk.

Last night the Eagles of Dawson preented at the Savoy theater a production of a comedy which in many respects would quite equal similar efforts in first-class theaters on the outside.

The packed house which greeted the players gave striking evidence of the lact, as often set forth in the Nugget mat a legitimate dramatic performance devoid of everything suggestive of filth, would prove a popular and paying enterprise in Dawson.

Dawson is today a city of families. States. fundreds of women and children came gation to add to the large number who were here before, but the fact still rebeen put forward to cater to their patronage from a public amusement standpoint. During the entire week the performances presented at the different houses are of such a nature that attendance on the part of ladies is an impossibility. Or, if the plays themselves are not 'objectionable the surprobably a fact that a theater conducted throughout the week on strictly legitinate lines would not be a paying instment. The whys and wherefores i this condition open up a field for discussion outside the limits of this article. The facts as they are, must be ecognized and the difficulty overcome as may best be done under existing cir-

We wish, therefore to point out to the theatrical managers that there is a demand in Dawson for legitimate public amusement-amusement of such a nature that men will feel justified in permitting their families to attend.

How many nights during the week this demand could be met with profit to the promoters of the enterprise can be determined only by experiment. We are of the opinion that the public would respond willingly and generously to such a movement. Certainly the appreciation which was shown for the production given at the Savoy last night indicates something. Our own belief is that it proves conclusively that Dawson wants good, clean wholesome amusement, and is willing to properly compensate the person or perho will provide the same. play's the thing, only it wants to be the right kind of play. Where is the man who will solve the problem?

### THE NUGGET'S ELECTION.

Today is election day for the choice of a president and vice-president in the United States. It is also the closing day of the contest which the Nugget has conducted in order to ascertain the sentiment among American residents of the Yukon territory, respecting the merits of the parties and candidates 13,000,000 of voters in the States to-

### TWO EXTREMES.

Dawson and Nome in their early days have furnished striking and effective examples of two extreme theories of government. In what may be termed roundings effect the same result. It is the pioneer days of this town we had a system of government almost martial in its nature, which apparently aimed at little but the repression of individual enterprise and effort. Turn where he might the man who sought to do anything for himself found his way hedged about with regulations and ordinances so restrictive as often to provoke discouragement and ultimate failure. He was made to feel all the time that he was being disciplined—that the eye of the law was on him and that a pretext only was wanted to make him feel the weight of its hand.

> Nome, on the other hand, has presented a diametrically opposite state of affairs. Instead of the tyranny of oppressive and restrictive regulations, Nome has been the victim of the tyranny of unbridled license. The rule of might has held sway in our sister camp. Instead of being oppressed by obnoxious mining laws, each man at Nome was a law unto himself and having made his own regulations he proceeded to enforce them himself with the not infrequent result that his position must needs be sustained through appeal to six-shooter.

Neither of these two extremes is natural, logical or desirable. The first self government.

> The Democrats are putting forth tremenduous efforts to carry New York state. Boss Croker anticipates no particular difficulty in carry the city for Bryan, and it is quite possible that Tammany will be able to deliver enough votes to make Croker's promises good. The boss is more concerned, however, in preserving his own prestige in New York city than he is in electing Bryan, and outside the limits of the metrop olis his interest in the election is of most perfunctory sort. It will be a most remarkable thing, in fact seemingly impossible thing to defeat Mckinley and Roosevelt outside of New York city. It is merely a question of a sufficiently large vote throughout the state to overcome any possible majority which Tammany may poll for Bryan in the city. Roosevelt's personal popularity is such that there will jority which Croker may secure in the ern colonel: city of New York.

Now all night long special attention should be given to stoves and flues. It is the old story of one ounce of prevention, which, though it be a worn out truism, is still a very valuable point to bear in mind. It is much easier to prevent a fire from starting than it is to extinguish the flames when once they have gained headway.

### A Heartless Brother.

There is a man in Dawson who has a brother in San Francisco and the San Francisco man has decided that he will quit being worked for a good thing by the Dawson member of the family. Two weeks ago the Dawson man went up against it and when morning came he was flat broke of everything save a dark brown taste and the knowledge that he had a brother in San Francisco. Whether the result of the Nugget's election is any indication of the turn affairs will take in the States remains yet to be seen.

The Nugget wishes at this time to extend its thanks to the many people, both Democrats and Republicans, who interested themselves in the election and who contributed to so great an extent toward making it the magnificent success it proved to be.

We had scarcely hoped in the beginning to poll one-third the number of votes which actually were cast, owing to the remote distances from Dawson, where many American citizens reside.

The intense interest manifested in the election overcame this difficulty, many men walking from long distances to secure an opportunity of voting. To the judges and clerks who kindly gave their services in making the count, special acknowledgement is due. The high standing in the community of all the gentlemen concerned is sufficient evidence of the fact that the count of ballots was absolutely fair and straight, with no room left for citicism of any

It was all for hats and connets, and the bill had been accumulating and the bill had been accumulating and the bill had been accumulating and the services the se lating since 1894. In other words, the Paristan fine lady in question had spent for headgear alone in the course of five years the tidy little sum of something like \$14,800. This was considered a pretty fair allowance even in Paris, and the milliner and her bill and her lavish customer were discussed for a lavish customer were discussed for a few days. In fact, attention was only turned from them by still another milliner's law suit. And this last appeal liner's law suit. And this last appeal to the courts had the specially interesting feature that the defendant in the case is the wife of a member of the chamber of deputies. The bill was only 10,000 francs—\$2000—but neither the purchaser nor her husband had enough money to meet it. So the milliner got judgment, and then proceeded to garnishee the husband's salary as a deputy, the court awarding fro every month until the score is wiped out.

### STROLLER'S COLUMN

Bill McKay, of Gay gulch, is something of a politician and during the Nugget's presidential election he put in some hard work for his favorite candidate, McKinley. If McKay could by

several hours' talk convince a voter that he should support the expansionist, he considered the time well spent.

A few days ago McKay met a man who lives, when at home, south of Mason and Dixon's line, and who has always voted the Democratic ticket. After they had conversed for a couple of nours or more the southerner admitted that McKinlety has made a good president, that under his administration the country has prospered unprecedentedly, and that in justice to the country he should be re-elected.

"Come right down to my house and vote," said McKay who had a number of the Nurger's hallots at his cabin and

Number Cast May Reach 5,0000-Souvenir Almost Complete-Will Be on Exhibition.

From Monday and Tuesday's Daily. Vesterday afternoon, last night and today were lively times in the Nugget's presidential election. Beginning soon after midday yesterday there was a steady stream of Americans, principally Dawson business men, to the Nugget office where they exercised their right with all due solemnity. So far as could be seen and heard yesterday and today of those voting it would seem that Mc. Kinley had the best of it, but previous to yesterday and ever since the voting began, it has, so far as could be estimated by the tone of the voters who came to the Nugget office, been favorable to Bryan. Reports from the creeks are to the effect that Bryan carried them by quite a fair majority, but nothing certain is known upon which to base conclusions. The result will be known tonight when the count is

At present it cannot be estimated within a thousand or more how many votes will have been cast by the time the polls close this evening, 6 o'clock, and the number is likely to run any place between 3500 and 5000. It is not supposed that all of those entitled to greater portion of them have. There are a number of Americans in Dawson present political convictions. For in- Referred to public works committee. stance, many strong advocates of the oper thing for the U. S. government to do, with the result that they have two strong hobbies, only one of which is espoused by either candidate for the presidency. The result is that a number of men entertaining these two beliefs are not voting for the very good reason that they do not know just where they stand. But nearly all Americans who have hobbies that neither of the candidates all objections and voted for the man their former affiliation.

The Nugget congratulates itself on the fact that, so far as known, its election has been entirely on the square. The object has all along been to have only eligible voters, those who, if on a winter trail be cut from the end of the outside at their old homes, would be entitled to cast ballots, take any part, and, notwithstanding the fact that several members of the Nugget staff have kept a close watch over the various polling places, not one single irregular vote is known to have been cast, Men may have voted who were not entitled to do so, but they were so very few that their ballots would cut little if any figure in an unofficial poll numbering several thousand. Yankee honor was trusted and Yankee pride has seen that the trust has not been betrayed.

The work of counting the ballots will be no small task, but as the tickets are not of the blanket size used on the outside in states where the Australian system is in vogue, they can be rapidly gone over and, notwithstanding their large number, it is thought the count can be completed by shortly after midnight, tonight. Secretary Clayton of the Board of Trade, has kindly consented to the use of his rooms in which to canvass the contents of the boxes, and as the election officers, a list of whose names appeared in the Nugget of vesterday, have consented to be on time in order that the count may begin promptly at 7 o'clock, there will be to cover traveling and living expenses.

Mr. Justice Dugas asked for information concerning the work of the public in order that the count may begin

The Nugget's souvenir for the winning candidate, which is being prepared by Jeweler J. L. Sale, is almost completed and will be exhibited in Mr.. Sale's show window for the benefit of the public. Should the winner in the Klondike be defeated on the outside he will receive no better consolation from any source than will be the souvenir third time and passed. won in the Klondike, and should he win in both places the Klondike souvenir will be the richest, finest and probably the most costly paper weight that ever graced a presidential desk,

the information brought forward by the various ladies in attendance demonstrated quite clearly that there is press ing need for the contemplated work. At a meeting of the Yukon council held Saturday afternoon the following cast a ballot have done so, but the is a synopsis of the business transacted: A petition was presented from the who are very much unsettled as to their wagon road to be built to that creek.

A communication was submitted from Third street and Fifth avenue. Referred to the officer commanding the N. W. M. P.

A communication was read from Mr. J. B. Pattullo, who had been communicated with, as to whether any arrangement existed between him and the legal adviser as to how the charges for his not party platforms espouse, have waved of any kind had been made between them. Action on this question was who is the nominee of the party of postponed until a reply is received from Ottawa to a telegram which the commissioner had forwarded with reference to the same.

> A petition was presented signed by O. J. Anderson and others, asking that Gold Run wagon road down the said Gold Run creek, across Dominion creek, thence to Gravel lake, and thence to a certain point near discovery on Clear creek. In connection with this petition a report on the feasibility of the road accompanied by a map, was submitted from Mr. C. Chataway. Referred to the committee on public works.

> A comumnication was submitted from the medical health officer giving it as his opinion that the most practical arrangement with medical men to be employed as public vaccinators would be to make them a per diem payment for their work. In another communication as to whether a vaccine station should be established; and submitted the names of various medical men who had applied to him for the work of public vaccinators. It was agreed to act upon the suggestion of the medical health officer, and to allow a fee of \$30 per day for this work. Dr. McFarlane and Dr. La Chappell were appointed as two public vaccinators-it to be understood that no extra charge be made against anyone applying for vaccination, and that the amount stated was

in regard to the matter.

Mr. Justice Dugas asked that the amendment be made to the ordinances a hardship on the debtor; and more over, he considered it unfair that the cost of the detention of the debtor should be made from the public funds. Mr. Justice Dugas was asked to put his suggestion in the form of an amendment to the capias ordinance and submit it to the council.

Mr. Girouard introduced an ordinance for granting to the commissioner cer-tain additional sums of money to defray the expenses of the public service of the Yukon territory, for the 12 months from June 30th, 1900, to June 30th, 1901, and for purposes relating thereto; and the same was introduced

The recent cold spell has been instrunental in filling chairs of the club rooms and lodging houses with sleepers and the police are somewhat at sea regarding what disposition to make of them. Many of these fellows assert that they are only waiting for work to begin on the creeks when they are certain of employment. In the meantime they have no place to sleep and how they manage to keep from starving is a mystery, as they have no money with which to buy food.

While the government is not running lodging houses or lunch counters, yet any man who has no bed and nothing to eat will be supplied with both if he will apply at the barracks.

Notwithstanding the fact that the town is full of idle men, many of whom are flat broke, the schedule price of sawing wood has advanced from § to \$7 per cord since one year ago, and yet men made good living at the business last winter. It is not the object of this effusion to encourage scab labor, but the man who will go hungry rather than saw wood for less than \$7 per cord is not an object for distinguished commiseration.

### The Benefit of Railways.

The construction of the great Siberian a marked effect on Siberian trade, which formerly was carried on entirely by monopolists. In each district or town there was a local capitalist, who laid in a stock of goods at the fairs Nijni-Novgorod, or elsewhere, and then fixed his own prices according to the means of his customers, and competition was non-existent. An enterprising man, who had neither capital nor credit, could not compete with these monopolists, because of the absence of good means of communication.

This abnormal state of affairs is already improving. The railway which has connected Siberia with centers of production has rendered traveling cheaper and quicker and made capital circulate more freely. People of small means are now enabled to make long, journeys for the purchase of stock, and they can enter into direct communication with the producers and wholesale merchants in large centers. The trade of Siberia has become more democratic, and increasing competition has affected a change in its character.-North American Review.

### Business Openings in Brazil.

In the larger cities of Brazil, physicians, surgeons and especially dentists who have graduated at American universities may find a sufficiently lucrative field of work, provided they are able to submit to a very rigid examination prescribed by the laws of Brazil ten, is conducted in the Portuguese language. In nearly all large cities there are American dentists, most of whom seem to be prosperous. - Consul General

and Who Was Accused of Adding to Her Stock by Theft and How Her Name Was Cleared.

From Monday and Tuesday's Daily. There were 20 of us making up the party at an English country house for he shooting season, and it so happened that while all were of course well known to host and hostess seven or eight were strangers to each other until introduced at the house. I do not think there were over three or four who even knew little Mrs. Hope by name or could tell anything of her past. Nor did a great deal leak out about her farther after she had been generally introduced and had come to be a favorite with both men and women. She was petite and blond. She had a baby face and big blue eyes, and your first impered that she was a distant relative of Col. Saunders, our host, and that she had married a scamp and been so ill used that a divorce had been sought tor. It was generally agreed that it must have all been the husband's fault and that the man who would ill treat such alight hearted, baby faced wife degived something beyond contempt. the was by long odds the best looking mman among the eight or ten, but as she was not given to flirtation and as the looked pretty without artificial neans she was forgiven for her handne face and became a general favorite. The man who leaves business for a week or two for an outing seldom takes along jewelry or money of any account, but nine women out of ten must carry their diamonds wherever they go. There was a brave display of gems at Rose Hill with all except little Mrs. Hope. She had two or three finger rings and a bracelet or two and made a poor showing compared to the rest. This was cormborative evidence that she was none too well fixed financially, but she did not display the slightest feeling of envy, and no hints were thrown out to hurt her feelings. A country house full of wealthy guests is a bonanza for a nervy thief, and the colonel warned the ladies from the outset to be careful of their jewelry. All of them agreed to act upon the advice and then, womanlike, carelessly left every ornament lying around. On the fourth day of the party a lady named White missed three valuable rings which had been left sternly demanded the colonel. lying on a table in her room. And here we come to the question, 'What is imperialism?''.

The Democrats describe it as "ruling alien people by a military power.' of the nation."

The word is indeed a good party word, and the Democrats seem to know it. Fancy imperialism, taken in the general sense of the word, being advocated to a republic like the United States and it must seem that it is bound to be defeated, but in this instance the word does not suit the occasion, and a man who thinks out the situation for himself will not be taken in by that cry.

I quite agree with the Democrats that nome affairs claim the first attention and neither party so far as I have read have claimed different, but one party recognizes that which the other one does not yet, but will have to recognize,

Every year sees the growth of Amerian manufactures—the supply continues to increase above the home demand there can be only one deduction from this, to keep the thousands of men and women employed in these manufatories at work, to find a market for the overproduction of these workers, foreign markets must be opened up. These every year grow scarcer (so many other countries being all the time seeking and finding them) and this I believe the Republican party has realized, and are determined that if possible American trade shall not be stunted, that the thousands dependent on American manufature shall not be idle for want of a market for American produce. Whether these markets, when found, are governed by force or have selfessing them. Canada, Australia, etc., They are not kept under by force and the way they have lately proved their loyalty and love for the mother country also proves that "imperialism" has more than one side to be considered.

The "home affairs" of the States I have naturally no wish to more than touch upon. One vital question is day by day forcing itself nearer and nearer. I refer to the negro question. Here we have on the one hand the Democratic same time we find that the negroes are meeting together to consider the advisability of nominating a colored president and vice president to run against the white candidates,

"Equality of man." There never was such a thing and there never will be, and this fact has been demonstrated very satisfactorily in the United States. Take any common laborer in the States him in education, etc., the cold nan may be the answer is the same No, he is not.

And so the world goes on, and human nature remains the same the world over, each man striving to make a place for himself and who I ask can blame the negro for doing the same; certainly not the party who talks about "equality of man,'

Other questions in "home affairs," uch as the coal strike, etc., are also bound to come to the front. These are the problems of "capital and labor," the problems of "capital and labor," and are I may say very near universal, and without doubt call for a deal of thought and wisdom and patience to overcome. These problems hardly come I should say under ordinary political controversy, although they are used as points in a campaign by either party, but the parties who best understand these questions and therefore, who can best settle their own differences are the capitalists and the laborers themselves.

### To the Pole With Steam Rams,

Boats described as steam rams are now in use in ice locked Russian harbors and rivers, and have proved that they can force their way through thick ice, even with 72 degrees of frost. The harbor of Vladirostock, till of late her metically scaled for four or five months has since 1893 been kept accessible through the winter; the Finnish port of Hango is now open to commerce throughout the year. And last winter a similar steam ram kept up connection with the Ural railway through the ice of the Volga at Saratoff. It is proposed now to keep open, by stronger boats of this kind, communication of St. Petersburg with the sea, and to force a winter connection through the ice from Admiral Makarof, addressing the Russian Geographical Society, insisted that still more powerful boats of this kind might safely be counted on to cope with

### Auction Sale of Claims.

The auction sale of claims, which began Monday in the Savoy theater, was still on yesterday and today and will be continued from day to day until all the property listed has been offered; therefore it is possible that the sale may continue until the end of the present week. When the sale opened Monday there were between 5000 and 7000 claims listed for offer and up to 2 o'clock this afternoon less than 2000

had been up for sale, consequently it is doubtful if the list is cleared within the Good Samarian hospital. Inquire at the restaurant of the Criterion if

Yesterday the hillsides and benches on Hunker were being sold, or at least offered, but for a few of them no bids Will Be Given on the Night of were made and they were consequently retired. Many sold at prices ranging from \$100 to \$450, but \$40 or \$50 was a fair average. A number sold at a figure ranging from \$2 to \$10. The Hunker claims were still being sold late yesterday afternoon and when they were disposed of the hillsides and benches of Sulphur were next offered.

No actor on the Savoy stage ever appeared before a larger or more attentive audience than greets Sheriff Eilbeck, the auctioneer, every seat in the building being occupied both yesterday and today. A large force of clerks from the gold commissioner's office is on duty to keep accurate account of all sales. It is said there is considerable very valuable property embraced in the list of claims sold and yet to be sold.
